The cover was printed by Quad Graphics/Versailles.

Founded in 1807, John Wiley & Sons, Inc. has been a valued source of knowledge and understanding for more than 200 years, helping people around the world meet their needs and fulfill their aspirations. Our company is built on a foundation of principles that include responsibility to the communities we serve and where we live and work. In 2008, we launched a Corporate Citizenship Initiative, a global effort to address the environmental, social, economic, and ethical challenges we face in our business. Among the issues we are addressing are carbon impact, paper specifications and procurement, ethical conduct within our business and among our vendors, and community and charitable support. For more information, please visit our website: www.wiley.com/go/citizenship.

From the Authors

Dear Student,

WHY THIS COURSE? Remember your biology course in high school? Did you have one of those “invisible man” models (or maybe something more high-tech than that) that gave you the opportunity to look “inside” the human body? This accounting course offers something similar. To understand a business, you have to understand the financial insides of a business organization. An accounting course will help you understand the essential financial components of businesses. Whether you are looking at a large multinational company like **Apple** or **Starbucks** or a single-owner software consulting business or coffee shop, knowing the fundamentals of accounting will help you understand what is happening. As an employee, a manager, an investor, a business owner, or a director of your own personal finances—any of which roles you will have at some point in your life—you will make better decisions for having taken this course.

“Whether you are looking at a large multinational company like **Apple** or **Starbucks** or a single-owner software consulting business or coffee shop, knowing the fundamentals of accounting will help you understand what is happening.”

WHY THIS TEXT? Your instructor has chosen this text for you because of the authors’ trusted reputation. The authors have worked hard to write a text that is engaging, timely, and accurate.

HOW TO SUCCEED? We’ve asked many students and many instructors whether there is a secret for success in this course. The nearly unanimous answer turns out to be not much of a secret: “Do the homework.” This is one course where doing is learning. The more time you spend on the homework assignments—using the various tools that this text provides—the more likely you are to learn the essential concepts, techniques, and methods of accounting. Besides the text itself, WileyPLUS also offers various support resources.

Good luck in this course. We hope you enjoy the experience and that you put to good use throughout a lifetime of success the knowledge you obtain in this course. We are sure you will not be disappointed.

Author Commitment

Jerry Weygandt

JERRY J. WEYGANDT, PhD, CPA, is Arthur Andersen Alumni Emeritus Professor of Accounting at the University of Wisconsin—Madison. He holds a Ph.D. in accounting from the University of Illinois. Articles by Professor Weygandt have appeared in *The Accounting Review*, *Journal of Accounting Research*, *Accounting Horizons*, *Journal of Accountancy*, and other academic and professional journals. These articles have examined such financial reporting issues as accounting for price-level adjustments, pensions, convertible securities, stock option contracts, and interim reports. Professor Weygandt is author of other accounting and financial reporting books and is a member of the American Accounting Association, the American Institute of Certified Public Accountants, and the Wisconsin Society of Certified Public Accountants. He has served on numerous committees of the American Accounting Association and as a member of the editorial board of *The Accounting Review*; he also has served as President and Secretary-Treasurer of the American Accounting Association. In addition, he has been actively involved with the American Institute of Certified Public Accountants and has been a member of the Accounting Standards Executive Committee (AcSEC) of that organization. He has served on the FASB task force that examined the reporting issues related to accounting for income taxes and served as a trustee of the Financial Accounting Foundation. Professor Weygandt has received the Chancellor's Award for Excellence in Teaching and the Beta Gamma Sigma Dean's Teaching Award. He is on the board of directors of M & I Bank of Southern Wisconsin. He is the recipient of the Wisconsin Institute of CPA's Outstanding Educator's Award and the Lifetime Achievement Award. In 2001 he received the American Accounting Association's Outstanding Educator Award.

Paul Kimmel

PAUL D. KIMMEL, PhD, CPA, received his bachelor's degree from the University of Minnesota and his doctorate in accounting from the University of Wisconsin. He teaches at the University of Wisconsin—Milwaukee, and has public accounting experience with Deloitte & Touche (Minneapolis). He was the recipient of the UWM School of Business Advisory Council Teaching Award, the Reggie Taite Excellence in Teaching Award and a three-time winner of the Outstanding Teaching Assistant Award at the University of Wisconsin. He is also a recipient of the Elijah Watts Sells Award for Honorary Distinction for his results on the CPA exam. He is a member of the American Accounting Association and the Institute of Management Accountants and has published articles in *The Accounting Review*, *Accounting Horizons*, *Advances in Management Accounting*, *Managerial Finance*, *Issues in Accounting Education*, *Journal of Accounting Education*, as well as other journals. His research interests include accounting for financial instruments and innovation in accounting education. He has published papers and given numerous talks on incorporating critical thinking into accounting education, and helped prepare a catalog of critical thinking resources for the Federated Schools of Accountancy.

Don Kieso

DONALD E. KIESO, PhD, CPA, received his bachelor's degree from Aurora University and his doctorate in accounting from the University of Illinois. He has served as chairman of the Department of Accountancy and is currently the KPMG Emeritus Professor of Accountancy at Northern Illinois University. He has public accounting experience with Price Waterhouse & Co. (San Francisco and Chicago) and Arthur Andersen & Co. (Chicago) and research experience with the Research Division of the American Institute of Certified Public Accountants (New York). He has done post doctorate work as a Visiting Scholar at the University of California at Berkeley and is a recipient of NIU's Teaching Excellence Award and four Golden Apple Teaching Awards. Professor Kieso is the author of other accounting and business books and is a member of the American Accounting Association, the American Institute of Certified Public Accountants, and the Illinois CPA Society. He has served as a member of the Board of Directors of the Illinois CPA Society, then AACSB's Accounting Accreditation Committees, the State of Illinois Comptroller's Commission, as Secretary-Treasurer of the Federation of Schools of Accountancy, and as Secretary-Treasurer of the American Accounting Association. Professor Kieso is currently serving on the Board of Trustees and Executive Committee of Aurora University, as a member of the Board of Directors of Kishwaukee Community Hospital, and as Treasurer and Director of Valley West Community Hospital. From 1989 to 1993 he served as a charter member of the national Accounting Education Change Commission. He is the recipient of the Outstanding Accounting Educator Award from the Illinois CPA Society, the FSA's Joseph A. Silvoso Award of Merit, the NIU Foundation's Humanitarian Award for Service to Higher Education, a Distinguished Service Award from the Illinois CPA Society, and in 2003 an honorary doctorate from Aurora University.

Hallmark Features

Accounting Principles, Thirteenth Edition, provides a simple and practical introduction to the fundamentals of accounting. It explains the concepts you need to know. This edition continues this approach by offering even more explanations, illustrations, and homework problems to help students get a firm understanding of the accounting cycle.

DO IT! Exercises

DO IT! Exercises in the body of the text prompt students to stop and review key concepts. They outline the Action Plan necessary to complete the exercise as well as show a detailed solution.

DO IT! 3 | Correcting Entries

Sanchez Company discovered the following errors made in January 2020.

1. A payment of Salaries and Wages Expense of \$600 was debited to Supplies and credited to Cash, both for \$600.
2. A collection of \$3,000 from a client on account was debited to Cash \$200 and credited to Service Revenue \$200.
3. The purchase of supplies on account for \$860 was debited to Supplies \$680 and credited to Accounts Payable \$680.

Correct the errors without reversing the incorrect entry.

Solution

1. Salaries and Wages Expense Supplies	600	600
2. Service Revenue Cash	200	2,800
Accounts Receivable		3,000

ACTION PLAN

- Compare the incorrect entry with correct entry.
- After comparison, make an entry to correct the accounts.

Review and Practice

Each chapter concludes with a Review and Practice section which includes a review of learning objectives, key terms glossary, practice multiple-choice questions with annotated solutions, practice brief exercises with solutions, practice exercises with solutions, and a practice problem with a solution.

Practice Brief Exercises

Prepare the current assets section of a balance sheet.

3. (LO 4) Financial Statement The balance sheet debit column of the worksheet for Miguel Company includes the following accounts: Accounts Receivable \$25,000, Prepaid Insurance \$7,000, Cash \$8,000, Supplies \$11,000, and Stock Investments (short-term) \$14,000. Prepare the current assets section of the balance sheet, listing the accounts in proper sequence.

Solution

3.

Miguel Company Partial Balance Sheet	
Current assets	
Cash	\$ 8,000
Stock investments	14,000
Accounts receivable	25,000
Supplies	11,000
Prepaid insurance	7,000
Total current assets	<u>\$65,000</u>

Infographic Learning

Over half of the text is visual, providing students alternative ways of learning about accounting. In addition, a new interior design promotes accessibility.

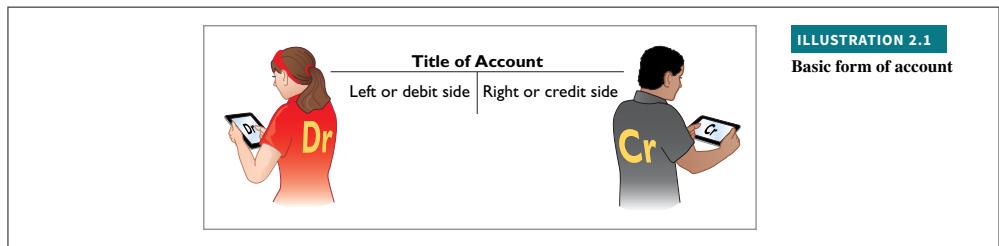

ILLUSTRATION 2.1
Basic form of account

Real-World Decision-Making

Real-world examples that illustrate interesting situations in companies and how accounting information is used are integrated throughout the text, such as in the opening Feature Story as well as the Insight boxes.

Regaining Goodwill

After falling to unforeseen lows amidst scandals, recalls, and economic crises, the American public's positive perception of the reputation of corporate America is on the rise. Overall corporate reputation is experiencing rehabilitation as the American public gives high marks overall to corporate America, specific industries, and the largest number of individual companies in a dozen years. This is according to the findings of a *Harris Interactive RQ Study*, which measures the reputations of the 60 most visible companies in the United States.

The survey focuses on six reputational dimensions that influence reputation and consumer behavior. Four of these dimensions, along

with the five corporations that ranked highest within each, are as follows.

- **Social Responsibility:** (1) Whole Foods Market, (2) Johnson & Johnson, (3) Google, (4) The Walt Disney Company, (5) Procter & Gamble Co.
- **Emotional Appeal:** (1) Johnson & Johnson, (2) Amazon.com, (3) UPS, (4) General Mills, (5) Kraft Foods
- **Financial Performance:** (1) Google, (2) Berkshire Hathaway, (3) Apple, (4) Intel, (5) The Walt Disney Company
- **Products and Services:** (1) Intel Corporation, (2) 3M Company, (3) Johnson & Johnson, (4) Google, (5) Procter & Gamble Co.

Source: www.harrisinteractive.com.

Name two industries today which are probably rated low on the reputational characteristics of "being trusted" and "having high ethical standards." (Go to WileyPLUS for this answer and additional questions.)

Additional Guidance

Throughout the text, marginal notes, such as **Helpful Hints**, **Alternative Terminology**, and **Ethics Notes**, are provided as additional guidance. In addition, more than 100 new solution walkthrough videos are now available in WileyPLUS.

Correcting Entries—An Avoidable Step

Unfortunately, errors may occur in the recording process. Companies should correct errors, as soon as they discover them, by journalizing and posting **correcting entries**. If the accounting records are free of errors, no correcting entries are needed.

You should recognize several differences between correcting entries and adjusting entries. First, adjusting entries are an integral part of the accounting cycle. Correcting entries, on the other hand, are unnecessary if the records are error-free. Second, companies journalize and post adjustments only at the end of an accounting period. In contrast, companies make correcting entries whenever they discover an error (see **Ethics Note**). Finally, adjusting entries always affect at least one balance sheet account and one income statement account. In

ETHICS NOTE

When companies find errors in previously released income statements, they restate those numbers. Perhaps because of the increased scrutiny caused by Sarbanes-Oxley, in a recent year companies filed a record 1,195 restatements

Accounting in Action

The **Chapter Preview** describes the purpose of the chapter and highlights major topics.

Chapter Preview

The following Feature Story about **Columbia Sportswear Company** highlights the importance of having good financial information and knowing how to use it to make effective business decisions. Whatever your pursuits or occupation, the need for financial information is inescapable. You cannot earn a living, spend money, buy on credit, make an investment, or pay taxes without receiving, using, or dispensing financial information. Good decision-making depends on good information.

The **Feature Story** helps you picture how the chapter topic relates to the real world of accounting and business.

Feature Story

Knowing the Numbers

Many students who take this course do not plan to be accountants. If you are in that group, you might be thinking, “If I’m not going to be an accountant, why do I need to know accounting?” Well, consider this quote from Harold Geneen, the former chairman of **IT&T**: “To be good at your business, you

have to know the numbers—cold.” In business, accounting and financial statements are the means for communicating the numbers. If you don’t know how to read financial statements, you can’t really know your business.

Knowing the numbers is sometimes even a matter of corporate survival. Consider the story of **Columbia Sportswear Company**, headquartered in Portland, Oregon. Gert Boyle’s family fled Nazi Germany when she was 13 years old and then purchased a small hat company in Oregon, Columbia Hat

Company. In 1971, Gert's husband, who was then running the company, died suddenly of a heart attack. The company was in the midst of an aggressive expansion, which had taken its sales above \$1 million for the first time but which had also left the company financially stressed. Gert took over the small, struggling company with help from her son Tim, who was then a senior at the University of Oregon. Somehow, they kept the company afloat. Today, Columbia has more than 4,000 employees and annual sales in excess of \$1 billion. Its brands include Columbia, Mountain Hardwear, Sorel, and Montrail. Gert still heads up the Board of Directors, and Tim is the company's President and CEO.

Columbia doesn't just focus on financial success. The company is very committed to corporate, social, and environmental responsibility. For example, several of its factories

have participated in a project to increase health awareness of female factory workers in developing countries. Columbia was also a founding member of the Sustainable Apparel Coalition, which is a group that strives to reduce the environmental and social impact of the apparel industry. In addition, it monitors all of the independent factories that produce its products to ensure that they comply with the company's Standards of Manufacturing Practices. These standards address issues including forced labor, child labor, harassment, wages and benefits, health and safety, and the environment.

Employers such as Columbia Sportswear generally assume that managers in all areas of the company are "financially literate." To help prepare you for that, in this textbook you will learn how to read and prepare financial statements, and how to use basic tools to evaluate financial results.

The Chapter Outline presents the chapter's topics and subtopics, as well as practice opportunities.

Chapter Outline

LEARNING OBJECTIVES

LO 1 Identify the activities and users associated with accounting.	<ul style="list-style-type: none"> • Three activities • Who uses accounting data 	DO IT! 1 Basic Concepts
LO 2 Explain the building blocks of accounting: ethics, principles, and assumptions.	<ul style="list-style-type: none"> • Ethics • GAAP • Measurement principles • Assumptions 	DO IT! 2 Building Blocks of Accounting
LO 3 State the accounting equation, and define its components.	<ul style="list-style-type: none"> • Assets • Liabilities • Owner's equity 	DO IT! 3 Owner's Equity Effects
LO 4 Analyze the effects of business transactions on the accounting equation.	<ul style="list-style-type: none"> • Accounting transactions • Transaction analysis • Summary of transactions 	DO IT! 4 Tabular Analysis
LO 5 Describe the four financial statements and how they are prepared.	<ul style="list-style-type: none"> • Income statement • Owner's equity statement • Balance sheet • Statement of cash flows 	DO IT! 5 Financial Statement Items

Go to the Review and Practice section at the end of the chapter for a review of key concepts and practice applications with solutions.

Visit WileyPLUS with ORION for additional tutorials and practice opportunities.

Accounting Activities and Users

LEARNING OBJECTIVE 1

Identify the activities and users associated with accounting.

What consistently ranks as one of the top career opportunities in business? What frequently rates among the most popular majors on campus? What was the undergraduate degree chosen by **Nike** founder Phil Knight, **Home Depot** co-founder Arthur Blank, former acting director of the **Federal Bureau of Investigation (FBI)** Thomas Pickard, and numerous members of Congress? Accounting.¹ Why did these people choose accounting? They wanted to understand what was happening financially to their organizations. Accounting is the financial information system that provides these insights. In short, to understand your organization, you have to know the numbers.

Accounting consists of three basic activities—it **identifies**, **records**, and **communicates** the economic events of an organization to interested users. Let's take a closer look at these three activities.

Essential terms are printed in blue when they first appear, and are defined in the end-of-chapter **Glossary Review**.

Three Activities

As a starting point to the accounting process, a company **identifies** the **economic events relevant to its business**. Examples of economic events are the sale of snack chips by **PepsiCo**, the provision of cell phone services by **AT&T**, and the payment of wages by **Facebook**.

Once a company like PepsiCo identifies economic events, it **records** those events in order to provide a history of its financial activities. Recording consists of keeping a **systematic, chronological diary of events**, measured in dollars and cents. In recording, PepsiCo also classifies and summarizes economic events.

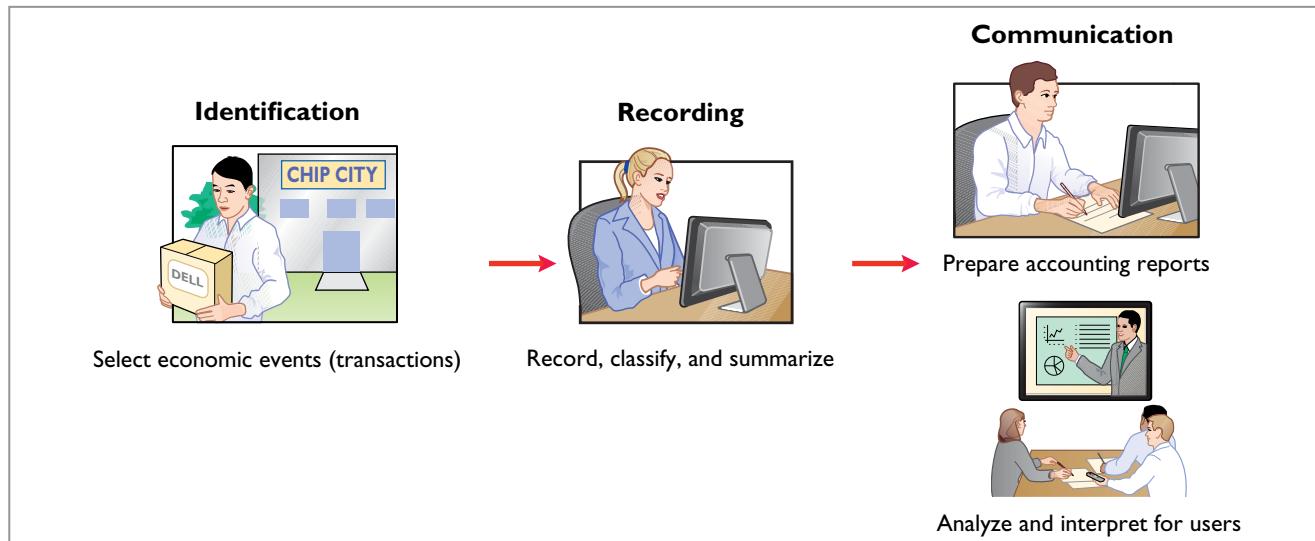

Finally, PepsiCo **communicates** the collected information to interested users by means of **accounting reports**. The most common of these reports are called **financial statements**. To make the reported financial information meaningful, PepsiCo reports the recorded data in a standardized way. It accumulates information resulting from similar transactions. For example, PepsiCo accumulates all sales transactions over a certain period of time and reports the data as one amount in the company's financial statements. Such data are said to be reported **in the aggregate**. By presenting the recorded data in the aggregate, the accounting process simplifies a multitude of transactions and makes a series of activities understandable and meaningful.

A vital element in communicating economic events is the accountant's ability to **analyze and interpret** the reported information. Analysis involves use of ratios, percentages, graphs, and charts to highlight significant financial trends and relationships. Interpretation involves **explaining the uses, meaning, and limitations of reported data**. Appendices A–E show the financial statements of **Apple Inc.**, **PepsiCo Inc.**, **The Coca-Cola Company**, **Amazon.com, Inc.**, and **Wal-Mart Stores, Inc.**, respectively. (In addition, in the *A Look at IFRS* section at the end of each chapter, the French company **Louis Vuitton Moët Hennessy** is analyzed.) We refer to these statements at various places throughout the textbook. At this point, these financial statements probably strike you as complex and confusing. By the end of this course, you'll be surprised at your ability to understand, analyze, and interpret them.

¹The appendix to this chapter describes job opportunities for accounting majors and explains why accounting is such a popular major.

Illustration 1.1 summarizes the activities of the accounting process.

ILLUSTRATION 1.1 The activities of the accounting process

You should understand that the accounting process **includes** the bookkeeping function. **Bookkeeping** usually involves **only** the recording of economic events. It is therefore just one part of the accounting process. In total, accounting involves **the entire process of identifying, recording, and communicating economic events.**²

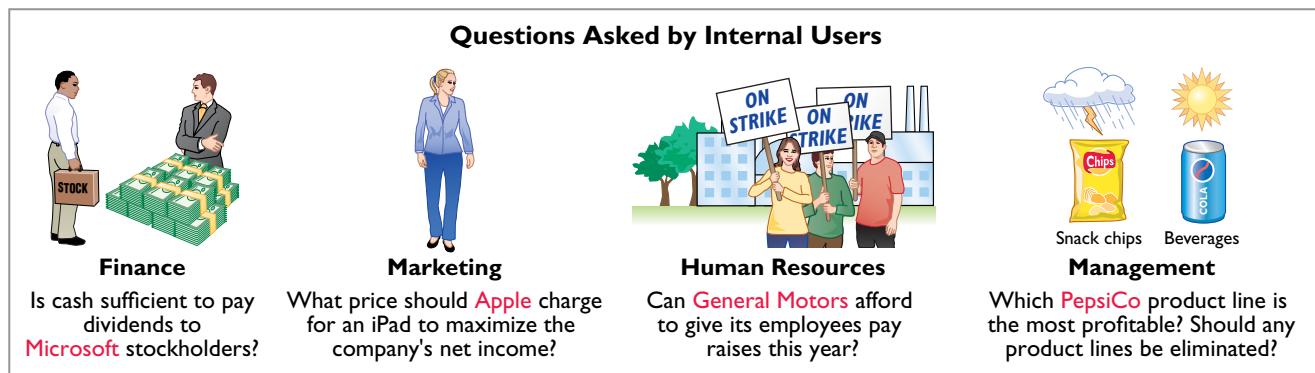

Who Uses Accounting Data

The financial information that users need depends upon the kinds of decisions they make. There are two broad groups of users of financial information: internal users and external users.

Internal Users

Internal users of accounting information are the managers who plan, organize, and run a business. These include marketing managers, production supervisors, finance directors, and company officers. In running a business, internal users must answer many important questions, as shown in **Illustration 1.2**.

ILLUSTRATION 1.2 Questions that internal users ask

²The origins of accounting are generally attributed to the work of Luca Pacioli, an Italian Renaissance mathematician. Pacioli was a close friend and tutor to Leonardo da Vinci and a contemporary of Christopher Columbus. In his 1494 text *Summa de Arithmetica, Geometria, Proportioni et Proportionalite*, Pacioli described a system to ensure that financial information was recorded efficiently and accurately.

To answer these and other questions, internal users need detailed information on a timely basis. **Managerial accounting** provides internal reports to help users make decisions about their companies. Examples are financial comparisons of operating alternatives, projections of income from new sales campaigns, and forecasts of cash needs for the next year.

Accounting Across the Organization Clif Bar & Company

© Dan Moore/iStockphoto

Owning a Piece of the Bar

The original Clif Bar® energy bar was created in 1990 after six months of experimentation by Gary Erickson and his mother in her kitchen. Today, the company has almost 300 employees and is considered one of the leading Landor's Breakaway Brands®. One of **Clif Bar & Company**'s proudest moments was the creation of an employee stock own-

ership plan (ESOP) in 2010. This plan gives its employees 20% ownership of the company. The ESOP also resulted in Clif Bar enacting an open-book management program, including the commitment to educate all employee-owners about its finances. Armed with basic accounting knowledge, employees are more aware of the financial impact of their actions, which leads to better decisions.

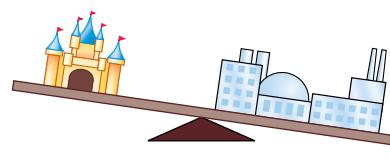

What are the benefits to the company and to the employees of making the financial statements available to all employees? (Go to WileyPLUS for this answer and additional questions.)

Accounting Across the Organization boxes demonstrate applications of accounting information in various business functions.

External Users

External users are individuals and organizations outside a company who want financial information about the company. The two most common types of external users are investors and creditors. **Investors** (owners) use accounting information to decide whether to buy, hold, or sell ownership shares of a company. **Creditors** (such as suppliers and bankers) use accounting information to evaluate the risks of granting credit or lending money. **Illustration 1.3** shows some questions that investors and creditors may ask.

ILLUSTRATION 1.3 Questions that external users ask

Questions Asked by External Users		
 <p>Investors Is General Electric earning satisfactory income?</p>	 <p>Investors How does Disney compare in size and profitability with Time Warner?</p>	 <p>Creditors Will United Airlines be able to pay its debts as they come due? What do we do if they catch us?</p>

Financial accounting answers these questions. It provides economic and financial information for investors, creditors, and other external users. The information needs of external users vary considerably. **Taxing authorities**, such as the Internal Revenue Service, want to know whether the company complies with tax laws. **Regulatory agencies**, such as the Securities and Exchange Commission or the Federal Trade Commission, want to know whether the company is operating within prescribed rules. **Customers** are interested in whether a company like **Tesla Motors** will continue to honor product warranties and support its product lines. **Labor unions**, such as the **Major League Baseball Players Association**, want to know whether the owners have the ability to pay increased wages and benefits.

The **DO IT!** exercises ask you to put newly acquired knowledge to work. They outline the **Action Plan** necessary to complete the exercise, and they show a **Solution**.

DO IT! 1 | Basic Concepts

Indicate whether each of the five statements presented below is true or false. If false, indicate how to correct the statement.

1. The three steps in the accounting process are identification, recording, and communication.
2. Bookkeeping encompasses all steps in the accounting process.
3. Accountants prepare, but do not interpret, financial reports.
4. The two most common types of external users are investors and company officers.
5. Managerial accounting activities focus on reports for internal users.

ACTION PLAN

- Review the basic concepts discussed.
- Develop an understanding of the key terms used.

Solution

1. True
2. False. Bookkeeping involves only the recording step.
3. False. Accountants analyze and interpret information in reports as part of the communication step.
4. False. The two most common types of external users are investors and creditors.
5. True.

Related exercise material: **DO IT! 1.1, E1.1, and E1.2.**

The Building Blocks of Accounting

LEARNING OBJECTIVE 2

Explain the building blocks of accounting: ethics, principles, and assumptions.

A doctor follows certain protocols in treating a patient's illness. An architect follows certain structural guidelines in designing a building. Similarly, an accountant follows certain standards in reporting financial information. These standards are based on specific principles and assumptions. For these standards to work, however, a fundamental business concept must be present—ethical behavior.

Ethics in Financial Reporting

People won't gamble in a casino if they think it is "rigged." Similarly, people won't play the stock market if they think prices are rigged. At one time, the financial press was full of articles about financial scandals at **Enron**, **WorldCom**, **HealthSouth**, and **AIG**. As more scandals came to light, a mistrust of financial reporting in general seemed to be developing. One article in the *Wall Street Journal* noted that "repeated disclosures about questionable accounting practices have bruised investors' faith in the reliability of earnings reports, which in turn has sent stock prices tumbling." Imagine trying to carry on a business or invest money if you could not depend on the financial statements to be honestly prepared. Information would have no credibility. There is no doubt that a sound, well-functioning economy depends on accurate and dependable financial reporting.

ETHICS NOTE

Circus-founder P.T. Barnum is alleged to have said, "Trust everyone, but cut the deck." What Sarbanes-Oxley does is to provide measures that (like cutting the deck of playing cards) help ensure that fraud will not occur.

Ethics Notes help sensitize you to some of the ethical issues in accounting.

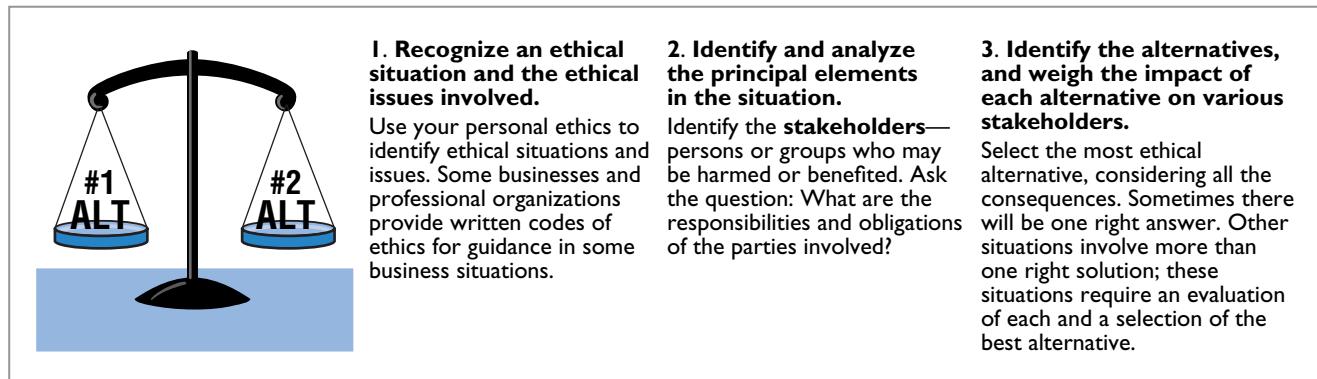

United States regulators and lawmakers were very concerned that the economy would suffer if investors lost confidence in corporate accounting because of unethical financial reporting. In response, Congress passed the **Sarbanes-Oxley Act (SOX)** to reduce unethical corporate behavior and decrease the likelihood of future corporate scandals (see **Ethics Note**). As a result of SOX, top management must now certify the accuracy of financial information. In addition, penalties for fraudulent financial activity are much more severe. Also, SOX increased the independence requirements of the outside auditors who review the accuracy of corporate financial statements and increased the oversight role of boards of directors.

The standards of conduct by which actions are judged as right or wrong, honest or dishonest, fair or not fair, are **ethics**. Effective financial reporting depends on sound ethical behavior. To sensitize you to ethical situations in business and to give you practice at solving ethical dilemmas, we address ethics in a number of ways in this textbook:

1. A number of the *Feature Stories* and other parts of the textbook discuss the central importance of ethical behavior to financial reporting.
2. *Ethics Insight* boxes and marginal *Ethics Notes* highlight ethics situations and issues in actual business settings.
3. Many of the *People, Planet, and Profit Insight* boxes focus on ethical issues that companies face in measuring and reporting social and environmental issues.
4. At the end of the chapter, an *Ethics Case* simulates a business situation and asks you to put yourself in the position of a decision-maker in that case.

When analyzing these various ethics cases and your own ethical experiences, you should apply the three steps outlined in **Illustration 1.4**.

ILLUSTRATION 1.4 Steps in analyzing ethics cases and situations

Insight boxes provide examples of business situations from various perspectives—ethics, investor, international, and corporate social responsibility. Guideline answers to the critical thinking questions as well as additional questions are available in **WileyPLUS**.

Ethics Insight Dewey & LeBoeuf LLP

I Felt the Pressure—Would You?

“I felt the pressure.” That’s what some of the employees of the now-defunct law firm of **Dewey & LeBoeuf LLP** indicated when they helped to overstate revenue and use accounting tricks to hide losses and cover up cash shortages. These employees worked for the former finance director and former chief financial officer (CFO) of the firm. Here are some of their comments:

- “I was instructed by the CFO to create invoices, knowing they would not be sent to clients. When I created these invoices, I knew that it was inappropriate.”

- “I intentionally gave the auditors incorrect information in the course of the audit.”

What happened here is that a small group of lower-level employees over a period of years carried out the instructions of their bosses. Their bosses, however, seemed to have no concern as evidenced by various e-mails with one another in which they referred to their financial manipulations as accounting tricks, cooking the books, and fake income.

Source: Ashby Jones, “Guilty Pleas of Dewey Staff Detail the Alleged Fraud,” *Wall Street Journal* (March 28, 2014).

Why did these employees lie, and what do you believe should be their penalty for these lies? (Go to WileyPLUS for this answer and additional questions.)

INTERNATIONAL NOTE

Over 115 countries use international standards (called IFRS). For example, all companies in the European Union follow IFRS. The differences between U.S. and international standards are not generally significant.

International Notes highlight differences between U.S. and international accounting standards.

Generally Accepted Accounting Principles

The accounting profession has developed standards that are generally accepted and universally practiced. This common set of standards is called **generally accepted accounting principles (GAAP)**. These standards indicate how to report economic events.

The primary accounting standard-setting body in the United States is the **Financial Accounting Standards Board (FASB)**. The **Securities and Exchange Commission (SEC)** is the agency of the U.S. government that oversees U.S. financial markets and accounting standard-setting bodies. The SEC relies on the FASB to develop accounting standards, which public companies must follow. Many countries outside of the United States have adopted the accounting standards issued by the **International Accounting Standards Board (IASB)**. These standards are called **International Financial Reporting Standards (IFRS)** (see **International Note**).

As markets become more global, it is often desirable to compare the results of companies from different countries that report using different accounting standards. In order to increase comparability, in recent years the two standard-setting bodies have made efforts to reduce the differences between U.S. GAAP and IFRS. This process is referred to as **convergence**. As a result of these convergence efforts, someday there may be a single set of high-quality accounting standards that are used by companies around the world. Because convergence is such an important issue, we highlight any major differences between GAAP and IFRS in *International Notes* (as shown in the margin here) and provide a more in-depth discussion in the *A Look at IFRS* section at the end of each chapter.

International Insight

Toru-Hanai-Pool/Getty Images, Inc.

Korean companies were inadequate and inaccurate. Accounting practices there often resulted in huge differences between stated revenues and actual revenues. Because investors did not have faith in the accuracy of the numbers, they were unwilling to pay as much for the shares of these companies relative to shares of comparable companies in different countries. This difference in share price was often referred to as the “Korean discount.”

The Korean Discount

If you think that accounting standards don’t matter, consider these events in South Korea. For many years, international investors complained that the financial reports of South

In response, Korean regulators decided that companies would have to comply with international accounting standards. This change was motivated by a desire to “make the country’s businesses more transparent” in order to build investor confidence and spur economic growth. Many other Asian countries, including China, India, Japan, and Hong Kong, have also decided either to adopt international standards or to create standards that are based on the international standards.

Source: Evan Ramstad, “End to ‘Korea Discount’?” *Wall Street Journal* (March 16, 2007).

What is meant by the phrase “make the country’s businesses more transparent”? Why would increasing transparency spur economic growth? (Go to WileyPLUS for this answer and additional questions.)

Measurement Principles

HELPFUL HINT

Relevance and *faithful representation* are two primary qualities that make accounting information useful for decision-making.

Helpful Hints further clarify concepts being discussed.

GAAP generally uses one of two measurement principles, the historical cost principle or the fair value principle. Selection of which principle to follow generally relates to trade-offs between relevance and faithful representation (see **Helpful Hint**). **Relevance** means that financial information is capable of making a difference in a decision. **Faithful representation** means that the numbers and descriptions match what really existed or happened—they are factual.

Historical Cost Principle

The **historical cost principle** (or cost principle) dictates that companies record assets at their cost. This is true not only at the time the asset is purchased, but also over the time the asset is held. For example, if **Best Buy** purchases land for \$300,000, the company initially reports

it in its accounting records at \$300,000. But what does Best Buy do if, by the end of the next year, the fair value of the land has increased to \$400,000? Under the historical cost principle, it continues to report the land at \$300,000.

Fair Value Principle

The **fair value principle** states that assets and liabilities should be reported at fair value (the price received to sell an asset or settle a liability). Fair value information may be more useful than historical cost for certain types of assets and liabilities. For example, certain investment securities are reported at fair value because market price information is usually readily available for these types of assets. In determining which measurement principle to use, companies weigh the factual nature of cost figures versus the relevance of fair value. In general, most companies choose to use cost. Only in situations where assets are actively traded, such as investment securities, do companies apply the fair value principle extensively.

Assumptions

Assumptions provide a foundation for the accounting process. Two main assumptions are the **monetary unit assumption** and the **economic entity assumption**.

Monetary Unit Assumption

The **monetary unit assumption** requires that companies include in the accounting records only transaction data that can be expressed in money terms. This assumption enables accounting to quantify (measure) economic events. The monetary unit assumption is vital to applying the historical cost principle.

This assumption prevents the inclusion of some relevant information in the accounting records. For example, the health of a company's owner, the quality of service, and the morale of employees are not included. The reason: Companies cannot quantify this information in money terms. Though this information is important, companies record only events that can be measured in money.

Economic Entity Assumption

An **economic entity** can be any organization or unit in society. It may be a company (such as **Crocs, Inc.**), a governmental unit (the state of Ohio), a municipality (Seattle), a school district (St. Louis District 48), or a church (Southern Baptist). The **economic entity assumption** requires that the activities of the entity be kept separate and distinct from the activities of its owner and all other economic entities (see **Ethics Note**). To illustrate, Sally Rider, owner of Sally's Boutique, must keep her personal living costs separate from the expenses of the business. Similarly, **J. Crew** and **Gap Inc.** are segregated into separate economic entities for accounting purposes.

Proprietorship. A business owned by one person is generally a **proprietorship**. The owner is often the manager/operator of the business. Small service-type businesses (plumbing companies, beauty salons, and auto repair shops), farms, and small retail stores (antique shops, clothing stores, and used-book stores) are often proprietorships. **Usually, only a relatively small amount of money (capital) is necessary to start in business as a proprietorship. The owner (proprietor) receives any profits, suffers any losses, and is personally liable for all debts of the business.** There is no legal distinction between the business as an economic unit and the owner, but the accounting records of the business activities are kept separate from the personal records and activities of the owner.

Partnership. A business owned by two or more persons associated as partners is a **partnership**. In most respects a partnership is like a proprietorship except that more than one owner is involved. Typically, a partnership agreement (written or oral) sets forth such terms as initial investment, duties of each partner, division of net income (or net loss), and settlement to

ETHICS NOTE

The importance of the economic entity assumption is illustrated by scandals involving **Adelphia**. In this case, senior company employees entered into transactions that blurred the line between the employees' financial interests and those of the company. For example, Adelphia guaranteed over \$2 billion of loans to the founding family.

be made upon death or withdrawal of a partner. Each partner generally has unlimited personal liability for the debts of the partnership. **Like a proprietorship, for accounting purposes the partnership transactions must be kept separate from the personal activities of the partners.** Partnerships are often used to organize retail and service-type businesses, including professional practices (lawyers, doctors, architects, and certified public accountants).

Corporation. A business organized as a separate legal entity under state corporation law and having ownership divided into transferable shares of stock is a **corporation**. The holders of the shares (stockholders) **enjoy limited liability**; that is, they are not personally liable for the debts of the corporate entity. Stockholders **may transfer all or part of their ownership shares to other investors at any time** (i.e., sell their shares). The ease with which ownership can change adds to the attractiveness of investing in a corporation. Because ownership can be transferred without dissolving the corporation, the corporation **enjoys an unlimited life**.

Although the combined number of proprietorships and partnerships in the United States is more than five times the number of corporations, the revenue produced by corporations is eight times greater. Most of the largest companies in the United States—for example, **Exxon-Mobil, Ford, Wal-Mart Stores, Inc., Citigroup, and Apple**—are corporations.

Accounting Across the Organization

Spinning the Career Wheel

How will the study of accounting help you? A working knowledge of accounting is desirable for virtually every field of business. Some examples of how accounting is used in business careers include:

General management: Managers at **Ford Motors**, Massachusetts General Hospital, California State University—Fullerton, a **McDonald's** franchise, and a **Trek** bike shop all need to understand accounting data in order to make wise business decisions.

Marketing: Marketing specialists at **Procter & Gamble** must be sensitive to costs and benefits, which accounting helps them quantify

and understand. Making a sale is meaningless unless it is a profitable sale.

Finance: Do you want to be a banker for **Citicorp**, an investment analyst for **Goldman Sachs**, or a stock broker for **Merrill Lynch**? These fields rely heavily on accounting knowledge to analyze financial statements. In fact, it is difficult to get a good job in a finance function without two or three courses in accounting.

Real estate: Are you interested in being a real estate broker for **Prudential Real Estate**? Because a third party—the bank—is almost always involved in financing a real estate transaction, brokers must understand the numbers involved: Can the buyer afford to make the payments to the bank? Does the cash flow from an industrial property justify the purchase price? What are the tax benefits of the purchase?

How might accounting help you? (Go to WileyPLUS for this answer and additional questions.)

DO IT! 2 | Building Blocks of Accounting

Indicate whether each of the five statements presented below is true or false. If false, indicate how to correct the statement.

1. Congress passed the Sarbanes-Oxley Act to reduce unethical behavior and decrease the likelihood of future corporate scandals.
2. The primary accounting standard-setting body in the United States is the Financial Accounting Standards Board (FASB).
3. The historical cost principle dictates that companies record assets at their cost. In later periods, however, the fair value of the asset must be used if fair value is higher than its cost.
4. Relevance means that financial information matches what really happened; the information is factual.
5. A business owner's personal expenses must be separated from expenses of the business to comply with accounting's economic entity assumption.

ACTION PLAN

- Review the discussion of ethics and financial reporting standards.
- Develop an understanding of the key terms used.

Solution

1. True. 2. True. 3. False. The historical cost principle dictates that companies record assets at their cost. Under the historical cost principle, the company must also use cost in later periods. 4. False. Faithful representation, not relevance, means that financial information matches what really happened; the information is factual. 5. True.

The Accounting Equation

LEARNING OBJECTIVE 3

State the accounting equation, and define its components.

The two basic elements of a business are what it owns and what it owes. **Assets** are the resources a business owns. For example, **Alphabet Inc.** has total assets of approximately \$167.5 billion. Liabilities and owner's equity are the rights or claims against these resources. Thus, Alphabet has \$167.5 billion of claims against its \$167.5 billion of assets. Claims of those to whom the company owes money (creditors) are called **liabilities**. Claims of owners are called **owner's equity**. Alphabet has liabilities of \$28.5 billion and owners' equity of \$139.0 billion.

We can express the relationship of assets, liabilities, and owner's equity as an equation, as shown in **Illustration 1.5**.

Assets	=	Liabilities	+	Owner's Equity
---------------	---	--------------------	---	-----------------------

ILLUSTRATION 1.5

The basic accounting equation

This relationship is the **basic accounting equation**. Assets must equal the sum of liabilities and owner's equity. Liabilities appear before owner's equity in the basic accounting equation because they are paid first if a business is liquidated.

The accounting equation applies to all **economic entities** regardless of size, nature of business, or form of business organization. It applies to a small proprietorship such as a corner grocery store as well as to a giant corporation such as **PepsiCo**. The equation provides the **underlying framework** for recording and summarizing economic events.

Let's look in more detail at the categories in the basic accounting equation.

Assets

As noted above, **assets** are resources a business owns. The business uses its assets in carrying out such activities as production and sales. The common characteristic possessed by all assets is the **capacity to provide future services or benefits**. In a business, that service potential or future economic benefit eventually results in cash inflows (receipts). For example, consider Campus Pizza, a local restaurant. It owns a delivery truck that provides economic benefits from delivering pizzas. Other assets of Campus Pizza are tables, chairs, jukebox, cash register, oven, tableware, and, of course, cash.

Liabilities

Liabilities are claims against assets—that is, existing debts and obligations. Businesses of all sizes usually borrow money and purchase merchandise on credit. These economic activities result in payables of various sorts:

- Campus Pizza, for instance, purchases cheese, sausage, flour, and beverages on credit from suppliers. These obligations are called **accounts payable**.

- Campus Pizza also has a **note payable** to First National Bank for the money borrowed to purchase the delivery truck.
- Campus Pizza may also have **salaries and wages payable** to employees and **sales and real estate taxes payable** to the local government.

All of these persons or entities to whom Campus Pizza owes money are its **creditors**.

Creditors may legally force the liquidation of a business that does not pay its debts. In that case, the law requires that creditor claims be paid **before** ownership claims.

Owner's Equity

HELPFUL HINT

In some places, we use the term “owner’s equity” and in others we use “owners’ equity.” *Owner’s* (singular, possessive) refers to one owner (the case with a sole proprietorship). *Owners’* (plural, possessive) refers to multiple owners (the case with partnerships or corporations).

The ownership claim on total assets is **owner’s equity** (see **Helpful Hint**). It is equal to total assets minus total liabilities. Here is why: The assets of a business are claimed by either creditors or owners. To find out what belongs to owners, we subtract the creditors’ claims (the liabilities) from assets. The remainder is the owner’s claim on the assets—the owner’s equity. Since the claims of creditors must be paid **before** ownership claims, owner’s equity is often referred to as **residual equity**.

Increases in Owner's Equity

In a proprietorship, owner’s investments and revenues increase owner’s equity.

Investments by Owner. **Investments by owner** are the assets the owner puts into the business. These investments increase owner’s equity. They are recorded in a category called **owner’s capital**.

Revenues. **Revenues** are the **increases in assets or decreases in liabilities resulting from the sale of goods or the performance of services in the normal course of business**. Revenues usually result in an increase in an asset. They may arise from different sources and are called different names depending on the nature of the business. Campus Pizza, for instance, has two categories of sales revenues—pizza sales and beverage sales.

Decreases in Owner's Equity

In a proprietorship, owner’s drawings and expenses decrease owner’s equity.

Drawings. An owner may withdraw cash or other assets for personal use. We use a separate classification called **drawings** to determine the total withdrawals for each accounting period. **Drawings decrease owner’s equity.** They are recorded in a category called **owner’s drawings**.

Expenses. **Expenses** are the cost of assets consumed or services used in the process of generating revenue. They are **decreases in owner’s equity that result from operating the business**. For example, Campus Pizza recognizes the following expenses: cost of ingredients (meat, flour, cheese, tomato paste, mushrooms, etc.); cost of beverages; salaries and wages expense; utilities expense (electric, gas, and water expense); delivery expense (gasoline, repairs, licenses, etc.); supplies expense (napkins, detergents, aprons, etc.); rent expense; interest expense; and property tax expense.

In summary, owner’s equity is increased by an owner’s investments and by revenues from business operations. Owner’s equity is decreased by an owner’s withdrawals of assets and by expenses. **Illustration 1.6** expands the basic accounting equation by showing the items that comprise owner’s equity. This format is referred to as the **expanded accounting equation**.

ILLUSTRATION 1.6 Expanded accounting equation

Basic Equation	Assets = Liabilities + Owner's Equity
Expanded Equation	Assets = Liabilities + Owner's Capital – Owner's Drawings + Revenues – Expenses

DO IT! 3 | Owner's Equity Effects

Classify the following items as investment by owner (I), owner's drawings (D), revenues (R), or expenses (E). Then indicate whether each item increases or decreases owner's equity.

1. Rent Expense.
2. Service Revenue.
3. Drawings.
4. Salaries and Wages Expense.

Solution

1. Rent Expense is an expense (E); it decreases owner's equity.
2. Service Revenue is revenue (R); it increases owner's equity.
3. Drawings is owner's drawings (D); it decreases owner's equity.
4. Salaries and Wages Expense is an expense (E); it decreases owner's equity.

Related exercise material: BE1.1, BE1.2, BE1.3, BE1.4, BE1.5, BE1.6, DO IT! 1.3, and E1.5.

ACTION PLAN

- Understand the sources of revenue.
- Understand what causes expenses.
- Review the rules for changes in owner's equity.
- Recognize that drawings are withdrawals of cash or other assets from the business for personal use.

Analyzing Business Transactions

LEARNING OBJECTIVE 4

Analyze the effects of business transactions on the accounting equation.

The system of collecting and processing transaction data and communicating financial information to decision-makers is known as the **accounting information system**. Factors that shape an accounting information system include the nature of the company's business, the types of transactions, the size of the company, the volume of data, and the information demands of management and others.

Most businesses use computerized accounting systems—sometimes referred to as electronic data processing (EDP) systems. These systems handle all the steps involved in the recording process, from initial data entry to preparation of the financial statements. In order to remain competitive, companies continually improve their accounting systems to provide accurate and timely data for decision-making. For example, in a recent annual report, **Tootsie Roll** stated, “We also invested in additional processing and data storage hardware during the year. We view information technology as a key strategic tool, and are committed to deploying leading edge technology in this area.” In addition, many companies have upgraded their accounting information systems in response to the requirements of Sarbanes-Oxley.

Accounting information systems rely on a process referred to as **the accounting cycle**. As you can see from the graphic above, the accounting cycle begins with the analysis of business transactions and ends with the preparation of a post-closing trial balance. We explain each of the steps, starting in this chapter and continuing in Chapters 2–4.

This **accounting cycle graphic** illustrates the steps companies follow each period to record transactions and eventually prepare financial statements.

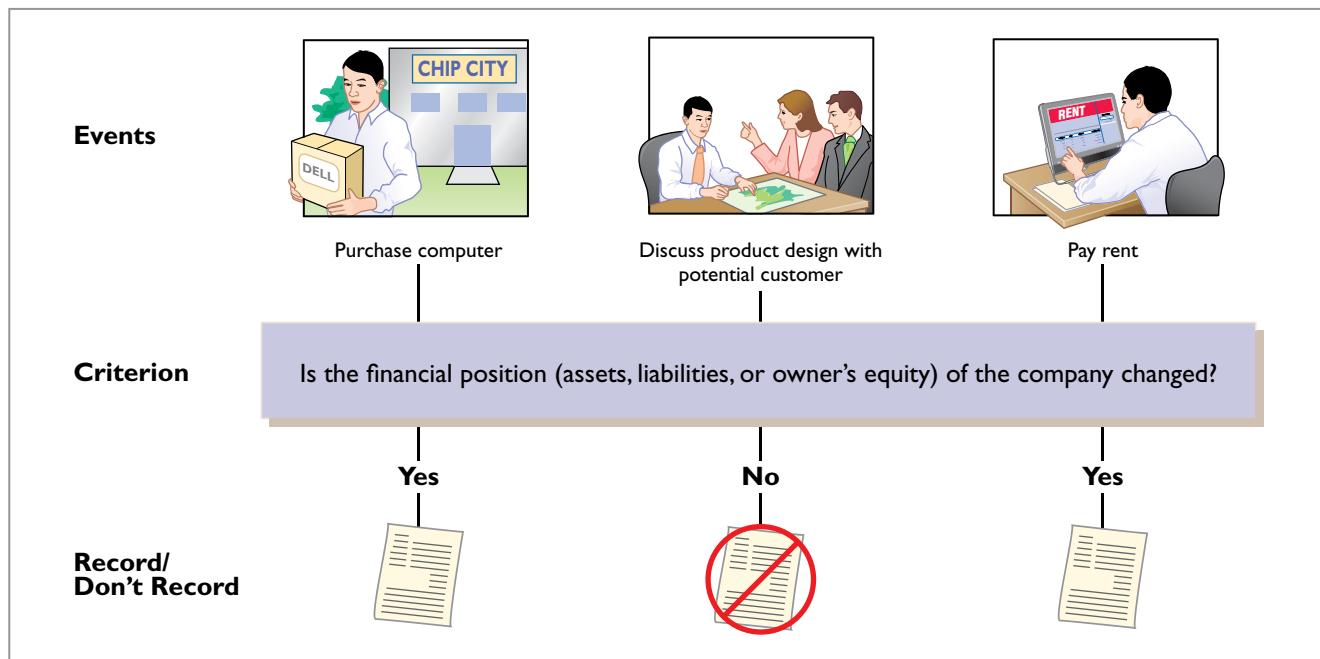

In this textbook, in order to emphasize the underlying concepts and principles, we focus on a manual accounting system. The accounting concepts and principles do not change whether a system is computerized or manual.

Accounting Transactions

Transactions (**business transactions**) are a business's economic events recorded by accountants. Transactions may be external or internal. **External transactions** involve economic events between the company and some outside enterprise. For example, Campus Pizza's purchase of cooking equipment from a supplier, payment of monthly rent to the landlord, and sale of pizzas to customers are external transactions. **Internal transactions** are economic events that occur entirely within one company. The use of cooking and cleaning supplies are internal transactions for Campus Pizza.

Companies carry on many activities that do not represent business transactions. Examples are hiring employees, responding to e-mails, talking with customers, and placing merchandise orders. Some of these activities may lead to business transactions. Employees will earn wages, and suppliers will deliver ordered merchandise. The company must analyze each event to find out if it affects the components of the accounting equation. If it does, the company will record the transaction. **Illustration 1.7** demonstrates the transaction identification process.

ILLUSTRATION 1.7 Transaction identification process

Each transaction must have a dual effect on the accounting equation. For example, if an asset is increased, there must be a corresponding:

- Decrease in another asset, *or*
- Increase in a specific liability, *or*
- Increase in owner's equity.

Two or more items could be affected. For example, as one asset is increased \$10,000, another asset could decrease \$6,000 and a liability could increase \$4,000. Any change in a liability or ownership claim is subject to similar analysis.

HELPFUL HINT

Study these transactions until you are sure you understand them. They are not difficult, but understanding them is important to your success in this course. The ability to analyze transactions in terms of the basic accounting equation is essential in accounting.

Transaction Analysis

To demonstrate how to analyze transactions in terms of the accounting equation, we will review the business activities of Softbyte, a smartphone app development company (see **Helpful Hint**). Softbyte is the creation of Ray Neal, an entrepreneur who wants to create focused apps

that inspire and engage users of all ages. Ray was encouraged to start his own business after the success of “FoodAlert,” a customizable app he developed that tracks the daily location of local food trucks. The following business transactions occur during Softbyte’s first month of operations.

Transaction (1). Investment of Cash by Owner. Ray Neal starts a smartphone app development company which he names Softbyte. On September 1, 2020, he invests \$15,000 cash in the business. This transaction results in an equal increase in assets and owner’s equity.

Basic Analysis

The asset Cash increases \$15,000, and owner’s equity (specifically Owner’s Capital) increases \$15,000.

Equation Analysis

	<u>Assets</u>	=	<u>Liabilities</u>	+	<u>Owner’s Equity</u>	
	Cash	=			Owner’s Capital	
(1)	+\$15,000	=			+\$15,000	Initial investment

Observe that the equality of the accounting equation has been maintained. Note that the investments by the owner do not represent revenues, and they are excluded in determining net income. Therefore, it is necessary to make clear that the increase is an investment (increasing Owner’s Capital) rather than revenue.

Transaction (2). Purchase of Equipment for Cash. Softbyte purchases computer equipment for \$7,000 cash. This transaction results in an equal increase and decrease in total assets, though the composition of assets changes.

Basic Analysis

The asset Cash decreases \$7,000, and the asset Equipment increases \$7,000.

Equation Analysis

	<u>Assets</u>		=	<u>Liabilities</u>	+	<u>Owner’s Equity</u>	
	Cash	+ Equipment	=			Owner’s Capital	
	\$15,000					\$15,000	
(2)	-\$7,000	+\$7,000	=				
	\$ 8,000	+ <u>\$7,000</u>	=			\$15,000	
		\$15,000					

Observe that total assets are still \$15,000. Owner’s equity also remains at \$15,000, the amount of Ray Neal’s original investment.

Transaction (3). Purchase of Supplies on Credit. Softbyte purchases headsets (and other computer accessories expected to last several months) for \$1,600 from Mobile Solutions. Mobile Solutions agrees to allow Softbyte to pay this bill in October. This transaction is a purchase on account (a credit purchase). Assets increase because of the expected future benefits of using the headsets and computer accessories, and liabilities increase by the amount due to Mobile Solutions.

Basic Analysis

The asset Supplies increases \$1,600, and the liability Accounts Payable increases \$1,600.

Equation Analysis

	Assets			=	Liabilities	+	Owner's Equity
	Cash	+	Supplies	+	Equipment	=	Accounts Payable + Owner's Capital
	\$8,000				\$7,000		\$15,000
(3)			+\$1,600			+\$1,600	
	\$8,000	+	\$1,600	+	\$7,000	=	\$1,600 + \$15,000
					\$16,600		\$16,600

Total assets are now \$16,600. This total is matched by a \$1,600 creditor's claim and a \$15,000 ownership claim.

Transaction (4). Services Performed for Cash. Softbyte receives \$1,200 cash from customers for app development services it has performed. This transaction represents Softbyte's principal revenue-producing activity. Recall that **revenue increases owner's equity**.

Basic Analysis

The asset Cash increases \$1,200, and owner's equity increases \$1,200 due to Service Revenue.

Equation Analysis

	Assets			=	Liabilities	+	Owner's Equity
	Cash	+	Supplies	+	Equipment	=	Accounts Payable + Owner's Capital + Revenues
	\$8,000		\$1,600		\$7,000		\$15,000
(4)	+\$1,200						+\$1,200 Service Revenue
	\$9,200	+	\$1,600	+	\$7,000	=	\$1,600 + \$15,000 + \$1,200
					\$17,800		\$17,800

The two sides of the equation balance at \$17,800. Service Revenue is included in determining Softbyte's net income.

Note that we do not have room to give details for each individual revenue and expense account in this illustration. Thus, revenues (and expenses when we get to them) are summarized under one column heading for Revenues and one for Expenses. However, it is important to keep track of the category (account) titles affected (e.g., Service Revenue) as they will be needed when we prepare financial statements later in the chapter.

Transaction (5). Purchase of Advertising on Credit. Softbyte receives a bill for \$250 from the *Daily News* for advertising on its online website but postpones payment until a later date. This transaction results in an increase in liabilities and a decrease in owner's equity.

Basic Analysis

The liability Accounts Payable increases \$250, and owner's equity decreases \$250 due to Advertising Expense.

Equation Analysis

	Assets			=	Liabilities	+	Owner's Equity
	Cash	+	Supplies	+	Equipment	=	Accounts Payable + Owner's Capital + Revenues - Expenses
	\$9,200		\$1,600		\$7,000		\$15,000
							\$1,200
(5)						+\$250	
	\$9,200	+	\$1,600	+	\$7,000	=	\$1,850 + \$15,000 + \$1,200 - \$250
					\$17,800		\$17,800

The two sides of the equation still balance at \$17,800. Owner's equity decreases when Softbyte incurs the expense. Expenses are not always paid in cash at the time they are incurred. When Softbyte pays at a later date, the liability Accounts Payable will decrease, and the asset Cash will decrease [see Transaction (8)]. The cost of advertising is an expense (rather than an asset) because the company has **used** the benefits. Advertising Expense is included in determining net income.

Transaction (6). Services Performed for Cash and Credit. Softbyte performs \$3,500 of app development services for customers. The company receives cash of \$1,500 from customers, and it bills the balance of \$2,000 on account. This transaction results in an equal increase in assets and owner's equity.

Basic Analysis

Three specific items are affected: The asset Cash increases \$1,500, the asset Accounts Receivable increases \$2,000, and owner's equity increases \$3,500 due to Service Revenue.

Equation Analysis

Assets	=	Liabilities	+	Owner's Equity
Accounts		Accounts		Owner's
Cash + Receivable + Supplies + Equipment	=	Payable		Capital + Revenues - Expenses
\$9,200 \$1,600 \$7,000		\$1,850		\$15,000 \$1,200 \$250
(6) +1,500 +\$2,000				+3,500
\$10,700 + \$2,000 + \$1,600 + \$7,000	=	\$1,850 + \$15,000 + \$4,700		\$21,300
\$21,300				\$21,300

Service Revenue

Softbyte recognizes \$3,500 in revenue when it performs the service. In exchange for this service, it received \$1,500 in Cash and Accounts Receivable of \$2,000. This Accounts Receivable represents customers' promises to pay \$2,000 to Softbyte in the future. When it later receives collections on account, Softbyte will increase Cash and will decrease Accounts Receivable [see Transaction (9)].

Transaction (7). Payment of Expenses. Softbyte pays the following expenses in cash for September: office rent \$600, salaries and wages of employees \$900, and utilities \$200. These payments result in an equal decrease in assets and owner's equity.

Basic Analysis

The asset Cash decreases \$1,700, and owner's equity decreases \$1,700 due to the specific expense categories (Rent Expense, Salaries and Wages Expense, and Utilities Expense).

Equation Analysis

Assets	=	Liabilities	+	Owner's Equity
Accounts		Accounts		Owner's
Cash + Receivable + Supplies + Equipment	=	Payable		Capital + Revenues - Expenses
\$10,700 \$2,000 \$1,600 \$7,000		\$1,850		\$15,000 \$4,700 \$250
(7) -1,700				-600 Rent Expense -900 Sal. and Wages Exp. -200 Utilities Exp.
\$9,000 + \$2,000 + \$1,600 + \$7,000	=	\$1,850 + \$15,000 + \$4,700		\$19,600
\$19,600				\$19,600

The two sides of the equation now balance at \$19,600. Three lines in the analysis indicate the different types of expenses that have been incurred.

Transaction (8). Payment of Accounts Payable. Softbyte pays its \$250 *Daily News* bill in cash. The company previously [in Transaction (5)] recorded the bill as an increase in Accounts Payable and a decrease in owner's equity.

Basic Analysis

This cash payment "on account" decreases the asset Cash by \$250 and also decreases the liability Accounts Payable by \$250.

Equation Analysis

Assets					=	Liabilities	+	Owner's Equity						
Cash	+	Accounts Receivable	+	Supplies	+	Equipment	=	Accounts Payable	+	Owner's Capital	+	Revenues	-	Expenses
\$9,000		\$2,000		\$1,600		\$7,000		\$1,850		\$15,000		\$4,700		\$1,950
(8) –250								–250						
<u>\$8,750</u>	+	<u>\$2,000</u>	+	<u>\$1,600</u>	+	<u>\$7,000</u>	=	<u>\$1,600</u>	+	<u>\$15,000</u>	+	<u>\$4,700</u>	–	<u>\$1,950</u>
		\$19,350								\$19,350				

Observe that the payment of a liability related to an expense that has previously been recorded does not affect owner's equity. The company recorded this expense in Transaction (5) and should not record it again.

Transaction (9). Receipt of Cash on Account. Softbyte receives \$600 in cash from customers who had been billed for services [in Transaction (6)]. Transaction (9) does not change total assets, but it changes the composition of those assets.

Basic Analysis

The asset Cash increases \$600, and the asset Accounts Receivable decreases \$600.

Equation Analysis

Note that the collection of an account receivable for services previously billed and recorded does not affect owner's equity. Softbyte already recorded this revenue in Transaction (6) and should not record it again.

Transaction (10). Withdrawal of Cash by Owner. Ray Neal withdraws \$1,300 in cash from the business for his personal use. This transaction results in an equal decrease in assets and owner's equity.

Basic Analysis

The asset Cash decreases \$1,300, and owner's equity decreases \$1,300 due to owner's withdrawal (Owner's Drawings).

Equation Analysis

Observe that the effect of a cash withdrawal by the owner is the opposite of the effect of an investment by the owner. **Owner's drawings are not expenses.** Expenses are incurred for the purpose of earning revenue. Drawings do not generate revenue. They are a **disinvestment**. Like owner's investment, the company excludes owner's drawings in determining net income.

Summary of Transactions

Illustration 1.8 summarizes the September transactions of Softbyte to show their cumulative effect on the basic accounting equation. It also indicates the transaction number and the specific effects of each transaction.

Illustration 1.8 demonstrates some significant facts:

1. Each transaction is analyzed in terms of its effect on:
 - a. The three components of the basic accounting equation (assets, liabilities, and owner's equity).
 - b. Specific types (kinds) of items within each component (such as the asset Cash).
 2. The two sides of the equation must always be equal.
 3. The Owner's Capital, Owner's Drawings, Revenues, and Expenses columns indicate the causes of each change in the owner's claim on assets.

ILLUSTRATION 1.8 Tabular summary of Softbyte transactions

	Assets				=	Liabilities		+	Owner's Equity			
Trans- action	Cash	Accounts Receivable	Supplies	Equipment	=	Accounts Payable	Owner's Capital	-	Owner's Drawings	Rev.	-	Exp.
(1)	+\$15,000							+ \$15,000				Initial invest.
(2)	-7,000				+\$7,000							
(3)			+\$1,600				+\$1,600					
(4)	+1,200									+\$1,200		Service Revenue
(5)							+250				-\$250	Adver. Expense
(6)	+1,500	+\$2,000									+3,500	Service Revenue
(7)	-600										-600	Rent Expense
	-900										-900	Sal/Wages Exp.
	-200										-200	Utilities Expense
(8)	-250						-250					
(9)	+600	-600										
(10)	-1,300								-\$1,300			Drawings
	\$ 8,050	+\$1,400	+\$1,600	+\$7,000		\$ 1,600	+\$15,000	-	\$ 1,300	+\$4,700	-\$1,950	
	\$18,050					\$18,050						

There! You made it through your first transaction analysis. If you feel a bit shaky on any of the transactions, it might be a good idea at this point to get up, take a short break, and come back again for a brief (10- to 15-minute) review of the transactions, to make sure you understand them before you go on to the next section.

DO IT! 4 | Tabular Analysis

Transactions made by Virmari & Co., a public accounting firm, for the month of August are shown below. Prepare a tabular analysis which shows the effects of these transactions on the expanded accounting equation, similar to that shown in Illustration 1.8.

1. The owner invested \$25,000 cash in the business.
 2. The company purchased \$7,000 of office equipment on credit.
 3. The company received \$8,000 cash in exchange for services performed.
 4. The company paid \$850 for this month's rent.
 5. The owner withdrew \$1,000 cash for personal use.

ACTION PLAN

- Analyze the effects of each transaction on the accounting equation.
 - Use appropriate category names (not descriptions).
 - Keep the accounting equation in balance.

Solution

	Assets		=	Liabilities	+	Owner's Equity				
Trans- action	Cash	Equipment	=	Accounts Payable	+	Owner's Capital	-	Owner's Drawings	+ Revenues	- Expenses
(1)	+\$25,000					+\$25,000				
(2)		+\$7,000				+\$7,000				
(3)	+8,000								+\$8,000	Service Revenue
(4)	-850									Rent Expense
(5)	-1,000									Drawings
	<u>\$31,150</u>	<u>+\$7,000</u>	=	<u>\$7,000</u>	<u>+</u>	<u>\$25,000</u>	<u>-</u>	<u>\$1,000</u>	<u>+\$8,000</u>	<u>-\$850</u>
	<u><u>\$38,150</u></u>			<u><u>\$38,150</u></u>

The Four Financial Statements

LEARNING OBJECTIVE 5

Describe the four financial statements and how they are prepared.

HELPFUL HINT

The income statement, owner's equity statement, and statement of cash flows are all for a *period* of time, whereas the balance sheet is for a *point* in time.

Companies prepare four financial statements from the summarized accounting data (see **Helpful Hint**):

1. An **income statement** presents the revenues and expenses and resulting net income or net loss for a specific period of time.
 2. An **owner's equity statement** summarizes the changes in owner's equity for a specific period of time.
 3. A **balance sheet** reports the assets, liabilities, and owner's equity at a specific date.
 4. A **statement of cash flows** summarizes information about the cash inflows (receipts) and outflows (payments) for a specific period of time.

These statements provide relevant financial data for internal and external users. **Illustration 1.9** shows the financial statements of Softbyte.

Note that the statements shown in Illustration 1.9 are interrelated:

1. Net income of \$2,750 on the **income statement** is added to the beginning balance of owner's capital in the **owner's equity statement**.
 2. Owner's capital of \$16,450 at the end of the reporting period shown in the **owner's equity statement** is reported on the **balance sheet**.
 3. Cash of \$8,050 on the **balance sheet** is reported on the **statement of cash flows**.

Also, explanatory notes and supporting schedules are an integral part of every set of financial statements. We illustrate these notes and schedules in later chapters of this textbook.

Be sure to carefully examine the format and content of each statement in Illustration 1.9. We describe the essential features of each in the following sections.

ALTERNATIVE TERMINOLOGY

The income statement is sometimes referred to as the statement of operations, earnings statement, or profit and loss statement.

Alternative Terminology notes introduce synonymous terms you may come across in practice.

Income Statement

The income statement reports the revenues and expenses for a specific period of time (see **Alternative Terminology**). (In Softbyte's case, this is "For the Month Ended September 30, 2020.") Softbyte's income statement is prepared from the data appearing in the owner's equity columns of Illustration 1.8.

Softbyte Income Statement For the Month Ended September 30, 2020		
Revenues		
Service revenue	\$ 4,700	
Expenses		
Salaries and wages expense	\$900	
Rent expense	600	
Advertising expense	250	
Utilities expense	200	
Total expenses	<u>1,950</u>	
Net income	<u><u>\$ 2,750</u></u>	

Softbyte Owner's Equity Statement For the Month Ended September 30, 2020		
Owner's capital, September 1	\$ -0-	
Add: Investments	<u>\$15,000</u>	
Net income	<u><u>2,750</u></u>	
	17,750	
Less: Drawings	<u>17,750</u>	
Owner's capital, September 30	<u><u>\$ 16,450</u></u>	

Softbyte Balance Sheet September 30, 2020		
<u>Assets</u>		
Cash	\$ 8,050	
Accounts receivable	1,400	
Supplies	1,600	
Equipment	7,000	
Total assets	<u><u>\$ 18,050</u></u>	
<u>Liabilities and Owner's Equity</u>		
Liabilities		
Accounts payable	\$ 1,600	
Owner's equity		
Owner's capital	<u><u>16,450</u></u>	
Total liabilities and owner's equity	<u><u>\$ 18,050</u></u>	

Softbyte Statement of Cash Flows For the Month Ended September 30, 2020		
Cash flows from operating activities		
Cash receipts from revenues	\$ 3,300	
Cash payments for expenses	(1,950)	
Net cash provided by operating activities	1,350	
Cash flows from investing activities		
Purchase of equipment	(7,000)	
Cash flows from financing activities		
Investments by owner	\$15,000	
Drawings by owner	<u>(1,300)</u>	
Net increase in cash	8,050	
Cash at the beginning of the period	0	
→ Cash at the end of the period	<u><u>\$ 8,050</u></u>	

ILLUSTRATION 1.9

Financial statements and their interrelationships

The heading of each statement identifies the company, the type of statement, and the specific date or time period covered by the statement.

1

Note that final sums are double-underlined, and negative amounts (in the statement of cash flows) are presented in parentheses.

2

The arrows show the interrelationships of the four financial statements.

3

1. Net income is computed first and is needed to determine the ending balance in owner's equity.
2. The ending balance in owner's equity is needed in preparing the balance sheet.
3. The cash shown on the balance sheet is needed in preparing the statement of cash flows.

The income statement lists revenues first, followed by expenses. Finally the statement shows net income (or net loss). **Net income** results when revenues exceed expenses. A **net loss** occurs when expenses exceed revenues.

Although practice varies, we have chosen in our illustrations and homework solutions to list expenses in order of magnitude. (We will consider alternative formats for the income statement in later chapters.)

Note that the income statement does **not** include investment and withdrawal transactions between the owner and the business in measuring net income. For example, as explained earlier, Ray Neal's withdrawal of cash from Softbyte was not regarded as a business expense.

Owner's Equity Statement

The owner's equity statement reports the changes in owner's equity for a specific period of time. The time period is the same as that covered by the income statement (in Softbyte's case, this is "For the Month Ended September 30, 2020"). Data for the preparation of the owner's equity statement come from the owner's equity columns of the tabular summary (Illustration 1.8) and from the income statement. The first line of the statement shows the beginning owner's equity amount (which was zero at the start of the business). Then come the owner's investments, net income (or loss), and the owner's drawings. This statement indicates **why** owner's equity has increased or decreased during the period.

What if Softbyte had reported a net loss in its first month? Let's assume that during the month of September 2020, Softbyte lost \$10,000. **Illustration 1.10** shows the presentation of a net loss in the owner's equity statement.

ILLUSTRATION 1.10

Presentation of net loss

Softbyte Owner's Equity Statement For the Month Ended September 30, 2020		
Owner's capital, September 1	\$ -0-	
Add: Investments	15,000	
	15,000	
Less: Drawings	\$ 1,300	
Net loss	10,000	11,300
Owner's capital, September 30		\$ 3,700

If the owner makes any additional investments, the company reports them in the owner's equity statement as investments.

Balance Sheet

Softbyte's balance sheet reports the assets, liabilities, and owner's equity at a specific date (in Softbyte's case, September 30, 2020). The company prepares the balance sheet from the column headings of the tabular summary (Illustration 1.8) and the month-end data shown in its last line.

Observe that the balance sheet lists assets at the top, followed by liabilities and owner's equity. Total assets must equal total liabilities and owner's equity. Softbyte reports only one liability—accounts payable—in its balance sheet. In most cases, there will be more than one liability. When two or more liabilities are involved, a customary way of listing is as shown in **Illustration 1.11**.

ILLUSTRATION 1.11

Presentation of liabilities

Liabilities	
Notes payable	\$10,000
Accounts payable	63,000
Salaries and wages payable	18,000
Total liabilities	\$91,000

The balance sheet is a snapshot of the company's financial condition at a specific moment in time (usually the month-end or year-end).

Statement of Cash Flows

The primary purpose of a statement of cash flows is to provide financial information about the cash receipts and cash payments of a company for a specific period of time (see **Helpful Hint**). To help investors, creditors, and others in their analysis of a company's cash position, the statement of cash flows reports the cash effects of a company's operating, investing, and financing activities. In addition, the statement shows the net increase or decrease in cash during the period, and the amount of cash at the end of the period.

Reporting the sources, uses, and change in cash is useful because investors, creditors, and others want to know what is happening to a company's most liquid resource. The statement of cash flows provides answers to the following simple but important questions.

1. Where did cash come from during the period?
2. What was cash used for during the period?
3. What was the change in the cash balance during the period?

As shown in Softbyte's statement of cash flows in Illustration 1.9, cash increased \$8,050 during the period. Net cash provided by operating activities increased cash \$1,350 (cash receipts from revenue less cash payments for expenses). Cash flow from investing activities decreased cash \$7,000 (purchase of equipment). And cash flow from financing activities increased cash \$13,700 (investment by owner less drawings by owner). At this time, you need not be concerned with how these amounts are determined. Chapter 17 will examine the statement of cash flows in detail.

HELPFUL HINT

The statement of cash flows helps users determine if the company generates enough cash from operations to fund its investing and financing activities.

People, Planet, and Profit Insight

© Marek Uliasz/iStockphoto

Beyond Financial Statements

Should we expand our financial statements beyond the income statement, owner's equity statement, balance sheet, and statement of cash flows? Some believe we should take into account ecological and social performance, in addition to financial results, in evaluating a company. The argument is that a company's responsibility lies with anyone who is influenced by its actions. In other words, a company should be interested in benefiting many different parties, instead of only maximizing stockholders' interests.

A socially responsible business does not exploit or endanger any group of individuals. It follows fair trade practices, provides safe environments for workers, and bears responsibility for environmental damage. Granted, measurement of these factors is difficult. How to report this information is also controversial. But many interesting and useful efforts are underway. Throughout this textbook, we provide additional insights into how companies are attempting to meet the challenge of measuring and reporting their contributions to society, as well as their financial results, to stockholders.

Why might a company's stockholders be interested in its environmental and social performance? (Go to WileyPLUS for this answer and additional questions.)

DO IT! 5 | Financial Statement Items

Presented below is selected information related to Flanagan Company at December 31, 2020. Flanagan reports financial information monthly.

Equipment	\$10,000	Utilities Expense	\$ 4,000
Cash	8,000	Accounts Receivable	9,000
Service Revenue	36,000	Salaries and Wages Expense	7,000
Rent Expense	11,000	Notes Payable	16,500
Accounts Payable	2,000	Owner's Drawings	5,000

- a. Determine the total assets of Flanagan Company at December 31, 2020.
- b. Determine the net income that Flanagan Company reported for December 2020.
- c. Determine the owner's equity of Flanagan Company at December 31, 2020.

ACTION PLAN

- Remember the basic accounting equation: assets must equal liabilities plus owner's equity.
- Review previous financial statements to determine how total assets, net income, and owner's equity are computed.

Solution

- a. The total assets are \$27,000, comprised of Cash \$8,000, Accounts Receivable \$9,000, and Equipment \$10,000.
- b. Net income is \$14,000, computed as follows.

Revenues		
Service revenue		\$36,000
Expenses		
Rent expense	\$11,000	
Salaries and wages expense	7,000	
Utilities expense	<u>4,000</u>	
Total expenses		<u>22,000</u>
Net income		<u>\$14,000</u>

- c. The ending owner's equity of Flanagan Company is \$8,500. By rewriting the accounting equation, we can compute owner's equity as assets minus liabilities, as follows.

Total assets [as computed in (a)]	\$27,000
Less: Liabilities	
Notes payable	\$16,500
Accounts payable	<u>2,000</u>
Owner's equity	<u>\$ 8,500</u>

Note that it is not possible to determine the company's owner's equity in any other way because the beginning total for owner's equity is not provided.

Appendix 1A**Career Opportunities in Accounting****LEARNING OBJECTIVE *6**

Explain the career opportunities in accounting.

Why is accounting such a popular major and career choice? First, there are a lot of jobs. In many cities in recent years, the demand for accountants exceeded the supply. Not only are there a lot of jobs, but there are a wide array of opportunities. As one accounting organization observed, “accounting is one degree with 360 degrees of opportunity.”

Accounting is also hot because it is obvious that accounting matters. Interest in accounting has increased, ironically, because of the attention caused by the accounting failures of companies such as **Enron** and **WorldCom**. These widely publicized scandals revealed the important role that accounting plays in society. Most people want to make a difference, and an accounting career provides many opportunities to contribute to society. Finally, the Sarbanes-Oxley Act (SOX) significantly increased the accounting and internal control requirements for corporations. This dramatically increased demand for professionals with accounting training.

Accountants are in such demand that it is not uncommon for accounting students to have accepted a job offer a year before graduation. As the following discussion reveals, the job options of people with accounting degrees are virtually unlimited.

Public Accounting

Individuals in **public accounting** offer expert service to the general public, in much the same way that doctors serve patients and lawyers serve clients. A major portion of public accounting

involves **auditing**. In auditing, a certified public accountant (CPA) examines company financial statements and provides an opinion as to how accurately the financial statements present the company's results and financial position. Analysts, investors, and creditors rely heavily on these "audit opinions," which CPAs have the exclusive authority to issue.

Taxation is another major area of public accounting. The work that tax specialists perform includes tax advice and planning, preparing tax returns, and representing clients before governmental agencies such as the Internal Revenue Service.

A third area in public accounting is **management consulting**. It ranges from installing basic accounting software or highly complex enterprise resource planning systems, to performing support services for major marketing projects and merger and acquisition activities.

Many CPAs are entrepreneurs. They form small- or medium-sized practices that frequently specialize in tax or consulting services.

Private Accounting

Instead of working in public accounting, you might choose to be an employee of a for-profit company such as **Starbucks**, **Alphabet**, or **PepsiCo**. In **managerial (or private) accounting**, you would be involved in activities such as cost accounting (finding the cost of producing specific products), budgeting, accounting information system design and support, and tax planning and preparation. You might also be a member of your company's internal audit team. In response to SOX, the internal auditors' job of reviewing the company's operations to ensure compliance with company policies and to increase efficiency has taken on increased importance.

Alternatively, many accountants work for not-for-profit organizations such as the **Red Cross** or the **Bill and Melinda Gates Foundation**, or for museums, libraries, or performing arts organizations.

Governmental Accounting

Another option is to pursue one of the many accounting opportunities in governmental agencies. For example, the Internal Revenue Service (IRS), Federal Bureau of Investigation (FBI), and the Securities and Exchange Commission (SEC) all employ accountants. The FBI has a stated goal that at least 15% of its new agents should be CPAs. There is also a very high demand for accounting educators at public colleges and universities and in state and local governments.

Forensic Accounting

Forensic accounting uses accounting, auditing, and investigative skills to conduct investigations into theft and fraud. It is listed among the top 20 career paths of the future. The job of forensic accountants is to catch the perpetrators of the estimated \$600 billion per year of theft and fraud occurring at U.S. companies. This includes tracing money-laundering and identity-theft activities as well as tax evasion. Insurance companies hire forensic accountants to detect frauds such as arson, and law offices employ forensic accountants to identify marital assets in divorces. Forensic accountants often have FBI, IRS, or similar government experience.

“Show Me the Money”

How much can a new accountant make? Take a look at the average salaries for college graduates in public and private accounting listed in **Illustration 1A.1**. Keep in mind if you also have a CPA license, you'll make 10–15% more when you start out.

ILLUSTRATION 1A.1

Salary estimates for jobs in public and corporate accounting

Employer	Jr. Level (0–3 yrs.)	Sr. Level (4–6 yrs.)
Public accounting (large firm)	\$63,250–\$83,250	\$78,500–\$106,500
Public accounting (small firm)	\$51,500–\$60,500	\$63,750–\$ 81,500
Corporate accounting (large company)	\$53,750–\$69,500	\$68,750–\$ 87,750
Corporate accounting (small company)	\$45,000–\$59,000	\$57,500–\$ 70,000

ILLUSTRATION 1A.2

Upper-level management salaries in corporate accounting

Position	Large Company	Small to Medium Company
Chief financial officer	\$207,000–\$465,750	\$105,250–\$208,750
Corporate controller	\$140,000–\$224,750	\$ 92,000–\$161,250
Tax manager	\$112,000–\$158,250	\$ 88,000–\$124,750

The Review and Practice section provides opportunities for students to review key concepts and terms as well as complete multiple-choice questions, exercises, and a comprehensive problem. Detailed solutions are also included.

Review and Practice

Learning Objectives Review

1 Identify the activities and users associated with accounting.

Accounting is an information system that identifies, records, and communicates the economic events of an organization to interested users. The major users and uses of accounting are as follows. (a) Management uses accounting information to plan, organize, and run the business. (b) Investors (owners) decide whether to buy, hold, or sell their financial interests on the basis of accounting data. (c) Creditors (suppliers and bankers) evaluate the risks of granting credit or lending money on the basis of accounting information. Other groups that use accounting information are taxing authorities, regulatory agencies, customers, and labor unions.

2 Explain the building blocks of accounting: ethics, principles, and assumptions.

Ethics are the standards of conduct by which actions are judged as right or wrong. Effective financial reporting depends on sound ethical behavior.

Generally accepted accounting principles are a common set of standards used by accountants. The primary accounting standard-setting body in the United States is the Financial Accounting Standards Board. The monetary unit assumption requires that companies include in the accounting records only transaction data that can be expressed in terms of money. The economic entity assumption requires

that the activities of each economic entity be kept separate from the activities of its owner(s) and other economic entities.

3 State the accounting equation, and define its components.

The basic accounting equation is:

$$\text{Assets} = \text{Liabilities} + \text{Owner's Equity}$$

Assets are resources a business owns. Liabilities are creditorship claims on total assets. Owner's equity is the ownership claim on total assets.

The expanded accounting equation is:

$$\text{Assets} = \text{Liabilities} + \text{Owner's Capital} - \text{Owner's Drawings} + \text{Revenues} - \text{Expenses}$$

Investments by owners (assets the owner puts into the business) are recorded in a category called owner's capital. Owner's drawings are the withdrawal of assets by the owner for personal use. Revenues are the gross increase in owner's equity from business activities for the purpose of earning income. Expenses are the costs of assets consumed or services used in the process of earning revenue.

4 Analyze the effects of business transactions on the accounting equation.

Each business transaction must have a dual effect on the accounting equation. For example, if an individual asset increases, there must be

a corresponding (1) decrease in another asset, (2) increase in a specific liability, or (3) increase in owner's equity.

5 Describe the four financial statements and how they are prepared.

An income statement presents the revenues and expenses, and resulting net income or net loss, for a specific period of time. An owner's equity statement summarizes the changes in owner's equity for a specific period of time. A balance sheet reports the assets, liabilities,

and owner's equity at a specific date. A statement of cash flows summarizes information about the cash inflows (receipts) and outflows (payments) for a specific period of time.

*6 Explain the career opportunities in accounting.

Accounting offers many different jobs in fields such as public and private accounting, governmental, and forensic accounting. Accounting is a popular major because there are many different types of jobs, with unlimited potential for career advancement.

Glossary Review

Accounting The information system that identifies, records, and communicates the economic events of an organization to interested users. (p. 1-3).

Accounting information system The system of collecting and processing transaction data and communicating financial information to decision-makers. (p. 1-13)

Assets Resources a business owns. (p. 1-11).

***Auditing** The examination of financial statements by a certified public accountant in order to express an opinion as to the fairness of presentation. (p. 1-25).

Balance sheet A financial statement that reports the assets, liabilities, and owner's equity at a specific date. (p. 1-20).

Basic accounting equation Assets = Liabilities + Owner's equity. (p. 1-11).

Bookkeeping A part of the accounting process that involves only the recording of economic events. (p. 1-4).

Convergence The process of reducing the differences between U.S. GAAP and IFRS. (p. 1-8).

Corporation A business organized as a separate legal entity under state corporation law, having ownership divided into transferable shares of stock. (p. 1-10).

Drawings Withdrawal of cash or other assets from an unincorporated business for the personal use of the owner(s). (p. 1-12).

Economic entity assumption An assumption that requires that the activities of the entity be kept separate and distinct from the activities of its owner and all other economic entities. (p. 1-9).

Ethics The standards of conduct by which actions are judged as right or wrong, honest or dishonest, fair or not fair. (p. 1-7).

Expanded accounting equation Assets = Liabilities + Owner's capital – Owner's drawings + Revenues – Expenses. (p. 1-12).

Expenses The cost of assets consumed or services used in the process of generating revenue. (p. 1-12).

Fair value principle An accounting principle stating that assets and liabilities should be reported at fair value (the price received to sell an asset or settle a liability). (p. 1-9).

Faithful representation Numbers and descriptions match what really existed or happened—they are factual. (p. 1-8).

Financial accounting The field of accounting that provides economic and financial information for investors, creditors, and other external users. (p. 1-5).

Financial Accounting Standards Board (FASB) A private organization that establishes generally accepted accounting principles (GAAP) in the United States. (p. 1-8).

***Forensic accounting** An area of accounting that uses accounting, auditing, and investigative skills to conduct investigations into theft and fraud. (p. 1-25).

Generally accepted accounting principles (GAAP) Common standards that indicate how to report economic events. (p. 1-8).

Historical cost principle An accounting principle that states that companies should record assets at their cost. (p. 1-8).

Income statement A financial statement that presents the revenues and expenses and resulting net income or net loss of a company for a specific period of time. (p. 1-20).

International Accounting Standards Board (IASB) An accounting standard-setting body that issues standards adopted by many countries outside of the United States. (p. 1-8).

International Financial Reporting Standards (IFRS) International accounting standards set by the International Accounting Standards Board (IASB). (p. 1-8).

Investments by owner The assets an owner puts into the business. (p. 1-12).

Liabilities Creditor claims against total assets. (p. 1-11).

***Management consulting** An area of public accounting ranging from development of accounting and computer systems to support services for marketing projects and merger and acquisition activities. (p. 1-25).

Managerial accounting The field of accounting that provides internal reports to help users make decisions about their companies. (p. 1-5).

Monetary unit assumption An assumption stating that companies include in the accounting records only transaction data that can be expressed in terms of money. (p. 1-9).

Net income The amount by which revenues exceed expenses. (p. 1-22).

Net loss The amount by which expenses exceed revenues. (p. 1-22).

Owner's equity The ownership claim on total assets. (p. 1-12).

Owner's equity statement A financial statement that summarizes the changes in owner's equity for a specific period of time. (p. 1-20).

Partnership A business owned by two or more persons associated as partners. (p. 1-9).

Proprietorship A business owned by one person. (p. 1-9).

***Public accounting** An area of accounting in which the accountant offers expert service to the general public. (p. 1-24).

Relevance Financial information that is capable of making a difference in a decision. (p. 1-8).

Revenues The increases in assets or decreases in liabilities resulting from the sale of goods or the performance of services in the normal course of business. (p. 1-12).

Sarbanes-Oxley Act (SOX) Law passed by Congress intended to reduce unethical corporate behavior. (p. 1-6).

Securities and Exchange Commission (SEC) A governmental agency that oversees U.S. financial markets and accounting standard-setting bodies. (p. 1-8).

Statement of cash flows A financial statement that summarizes information about the cash inflows (receipts) and cash outflows (payments) for a specific period of time. (p. 1-20).

***Taxation** An area of public accounting involving tax advice, tax planning, preparing tax returns, and representing clients before governmental agencies. (p. 1-25).

Transactions The economic events of a business that are recorded by accountants. (p. 1-14).

Practice Multiple-Choice Questions

1. (LO 1) Which of the following is **not** a step in the accounting process?

- a. Identification.
- b. Economic entity.
- c. Recording.
- d. Communication.

2. (LO 1) Which of the following statements about users of accounting information is **incorrect**?

- a. Management is an internal user.
- b. Taxing authorities are external users.
- c. Present creditors are external users.
- d. Regulatory authorities are internal users.

3. (LO 2) The historical cost principle states that:

- a. assets should be initially recorded at cost and adjusted when the fair value changes.
- b. activities of an entity are to be kept separate and distinct from its owner.
- c. assets should be recorded at their cost.
- d. only transaction data capable of being expressed in terms of money be included in the accounting records.

4. (LO 2) Which of the following statements about basic assumptions is **correct**?

- a. Basic assumptions are the same as accounting principles.
- b. The economic entity assumption states that there should be a particular unit of accountability.
- c. The monetary unit assumption enables accounting to measure employee morale.
- d. Partnerships are not economic entities.

5. (LO 2) The three types of business entities are:

- a. proprietorships, small businesses, and partnerships.
- b. proprietorships, partnerships, and corporations.
- c. proprietorships, partnerships, and large businesses.
- d. financial, manufacturing, and service companies.

6. (LO 3) Net income will result during a time period when:

- a. assets exceed liabilities.
- b. assets exceed revenues.
- c. expenses exceed revenues.
- d. revenues exceed expenses.

7. (LO 3) As of December 31, 2020, Kent Company has assets of \$3,500 and owner's equity of \$2,000. What are the liabilities for Kent Company as of December 31, 2020?

- a. \$1,500.
- b. \$1,000.
- c. \$2,500.
- d. \$2,000.

8. (LO 4) Performing services on account will have the following effects on the components of the basic accounting equation:

- a. increase assets and decrease owner's equity.
- b. increase assets and increase owner's equity.
- c. increase assets and increase liabilities.
- d. increase liabilities and increase owner's equity.

9. (LO 4) Which of the following events is **not** recorded in the accounting records?

- a. Equipment is purchased on account.
- b. An employee is terminated.
- c. A cash investment is made into the business.
- d. The owner withdraws cash for personal use.

10. (LO 4) During 2020, Bruske Company's assets decreased \$50,000 and its liabilities decreased \$50,000. Its owner's equity therefore:

- a. increased \$50,000.
- b. decreased \$50,000.
- c. decreased \$100,000.
- d. did not change.

11. (LO 4) Payment of an account payable affects the components of the accounting equation in the following way.

- a. Decreases owner's equity and decreases liabilities.
- b. Increases assets and decreases liabilities.
- c. Decreases assets and increases owner's equity.
- d. Decreases assets and decreases liabilities.

12. (LO 5) Which of the following statements is **false**?

- a. A statement of cash flows summarizes information about the cash inflows (receipts) and outflows (payments) for a specific period of time.
- b. A balance sheet reports the assets, liabilities, and owner's equity at a specific date.
- c. An income statement presents the revenues, expenses, changes in owner's equity, and resulting net income or net loss for a specific period of time.
- d. An owner's equity statement summarizes the changes in owner's equity for a specific period of time.

13. (LO 5) On the last day of the period, Alan Cesska Company buys a \$900 machine on credit. This transaction will affect the:

- a. income statement only.

- b. balance sheet only.
 c. income statement and owner's equity statement only.
 d. income statement, owner's equity statement, and balance sheet.
- 14. (LO 5)** The financial statement that reports assets, liabilities, and owner's equity is the:
 a. income statement.
 b. owner's equity statement.
- *15. (LO 6)** Services performed by a public accountant include:
 a. auditing, taxation, and management consulting.
 b. auditing, budgeting, and management consulting.
 c. auditing, budgeting, and cost accounting.
 d. auditing, budgeting, and management consulting.

Solutions

- 1. b.** Economic entity is not one of the steps in the accounting process. The other choices are true because (a) identification is the first step in the accounting process, (c) recording is the second step in the accounting process, and (d) communication is the third and final step in the accounting process.
- 2. d.** Regulatory authorities are external, not internal, users of accounting information. The other choices are true statements.
- 3. c.** The historical cost principle states that assets should be recorded at their cost. The other choices are incorrect because (a) the historical cost principle does not say that assets should be adjusted for changes in fair value, (b) describes the economic entity assumption, and (d) describes the monetary unit assumption.
- 4. b.** The economic entity assumption states that there should be a particular unit of accountability. The other choices are incorrect because (a) basic assumptions are not the same as accounting principles, (c) the monetary unit assumption allows accounting to measure economic events, and (d) partnerships are economic entities.
- 5. b.** Proprietorships, partnerships, and corporations are the three types of business entities. Choices (a) and (c) are incorrect because small and large businesses only denote the sizes of businesses. Choice (d) is incorrect because financial, manufacturing, and service companies are types of businesses, not business entities.
- 6. d.** Net income results when revenues exceed expenses. The other choices are incorrect because (a) assets and liabilities are not used in the computation of net income; (b) revenues, not assets, are included in the computation of net income; and (c) when expenses exceed revenues, a net loss results.
- 7. a.** Using a variation of the basic accounting equation, Assets – Owner's equity = Liabilities, $\$3,500 - \$2,000 = \$1,500$. Therefore, choices (b) \$1,000, (c) \$2,500, and (d) \$2,000 are incorrect.
- 8. b.** When services are performed on account, assets are increased and owner's equity is increased. The other choices are incorrect because when services are performed on account (a) owner's equity is increased, not decreased; (c) liabilities are not affected; and (d) owner's equity is increased and liabilities are not affected.
- 9. b.** If an employee is terminated, this represents an activity of a company, not a business transaction. Assets, liabilities, and owner's equity are not affected. Thus, there is no effect on the accounting equation. The other choices are incorrect because they are all recorded: (a) when equipment is purchased on account, both assets and liabilities increase; (c) when a cash investment is made into a business, both assets and owner's equity increase; and (d) when an owner withdraws cash for personal use, both assets and owner's equity decrease.
- 10. d.** In this situation, owner's equity does not change because only assets and liabilities decreased \$50,000. Therefore, the other choices are incorrect.
- 11. d.** Payment of an account payable results in an equal decrease of assets (cash) and liabilities (accounts payable). The other choices are incorrect because payment of an account payable (a) does not affect owner's equity, (b) does not increase assets, and (c) does not affect owner's equity.
- 12. c.** An income statement represents the revenues, expenses, and the resulting net income or net loss for a specific period of time but not the changes in owner's equity. The other choices are true statements.
- 13. b.** This transaction will cause assets to increase by \$900 and liabilities to increase by \$900. The other choices are incorrect because this transaction (a) will have no effect on the income statement, (c) will have no effect on the income statement or the owner's equity statement, and (d) will affect the balance sheet but not the income statement or the owner's equity statement.
- 14. c.** The balance sheet is the statement that reports assets, liabilities and owner's equity. The other choices are incorrect because (a) the income statement reports revenues and expenses, (b) the owner's equity statement reports details about owner's equity, and (d) the statement of cash flows reports inflows and outflows of cash.
- *15. a.** Auditing, taxation, and management consulting are all services performed by public accountants. The other choices are incorrect because public accountants do not perform budgeting or cost accounting.

Practice Brief Exercises

- 1. (LO 3)** At the beginning of the year, Ortiz Company had total assets of \$900,000 and total liabilities of \$440,000. Answer the following questions. *Use basic accounting equation.*
- a. If total assets decreased \$100,000 during the year and total liabilities increased \$80,000 during the year, what is the amount of owner's equity at the end of the year?
 b. During the year, total liabilities decreased \$100,000 and owner's equity increased \$200,000. What is the amount of total assets at the end of the year?

- c. If total assets increased \$50,000 during the year and owner's equity increased \$60,000 during the year, what is the amount of total liabilities at the end of the year?

Solution

1. a. $(\$900,000 - \$440,000) - \$100,000 - \$80,000 = \$280,000$ owner's equity
- b. $\$900,000 - \$100,000 + \$200,000 = \$1,000,000$ total assets
- c. $\$440,000 - \$60,000 + \$50,000 = \$430,000$ total liabilities

Determine effect of transactions on basic accounting equation

2. **(LO 4)** Presented below are three business transactions. List the letters (a), (b), and (c) with columns for assets, liabilities and owner's equity. For each column, indicate whether the transactions increased (+), decreased (-), or had no effect (NE) on assets, liabilities, and owner's equity.

- a. Purchased equipment on account.
- b. Withdrawal of cash by owner.
- c. Paid expenses in cash.

Solution

	<u>Assets</u>	<u>Liabilities</u>	<u>Owner's Equity</u>
2. a.	+	+	NE
b.	-	NE	-
c.	-	NE	-

Determine effect of transactions on basic accounting equation.

3. **(LO 4)** Follow the same format as in **Practice Brief Exercise 2**. Determine the effect on assets, liabilities, and owner's equity of the following three transactions.

- a. Performed accounting services for clients for cash.
- b. Borrowed cash from a bank on a note payable.
- c. Paid cash for rent for the month.

Solution

	<u>Assets</u>	<u>Liabilities</u>	<u>Owner's Equity</u>
3. a.	+	NE	+
b.	+	+	NE
c.	-	NE	-

Determine where items appear on financial statements.

4. **(LO 5) Financial Statement** Indicate whether the following items would appear on the income statement (IS), balance sheet (BS), or owner's equity statement (OE).

- a. Owner's capital.
- b. Cash.
- c. Salaries and wages expense.
- d. Service revenue.
- e. Accounts payable.

Solution

4. a. Owner's capital	<u>OE, BS</u>
b. Cash	<u>BS</u>
c. Salaries and wages expense	<u>IS</u>
d. Service revenue	<u>IS</u>
e. Accounts payable	<u>BS</u>

- 5. (LO 5) Financial Statement** Presented below in alphabetical order are balance sheet items for Feagler Company at December 31, 2020. Carole Feagler is the owner of the company. Prepare a balance sheet following the format of Illustration 1.9.

Prepare a balance sheet.

Accounts receivable	\$12,500
Cash	38,000
Notes payable	40,000
Owner's capital	10,500

Solution

5.

Feagler Company
Balance Sheet
December 31, 2020

<u>Assets</u>	
Cash	\$38,000
Accounts receivable	<u>12,500</u>
Total assets	<u><u>\$50,500</u></u>
<u>Liabilities and Owner's Equity</u>	
Liabilities	
Notes payable	\$40,000
Owner's equity	
Owner's capital	<u>10,500</u>
Total liabilities and owner's equity	<u><u>\$50,500</u></u>

Practice Exercises

1. (LO 3, 4) Selected transactions for Fabulous Flora Company are listed below.

Analyze the effect of transactions.

- Made cash investment to start business.
- Purchased equipment on account.
- Paid salaries.
- Billed customers for services performed.
- Received cash from customers billed in (4).
- Withdrew cash for owner's personal use.
- Incurred advertising expense on account.
- Purchased additional equipment for cash.
- Received cash from customers when service was performed.

Instructions

List the numbers of the above transactions and describe the effect of each transaction on assets, liabilities, and owner's equity. For example, the first answer is: (1) Increase in assets and increase in owner's equity.

Solution

1. Increase in assets and increase in owner's equity.
2. Increase in assets and increase in liabilities.
3. Decrease in assets and decrease in owner's equity.
4. Increase in assets and increase in owner's equity.
5. Increase in assets and decrease in assets.
6. Decrease in assets and decrease in owner's equity.

7. Increase in liabilities and decrease in owner's equity.
8. Increase in assets and decrease in assets.
9. Increase in assets and increase in owner's equity.

Analyze the effect of transactions on assets, liabilities, and owner's equity.

- 2. (LO 3, 4)** Alma's Payroll Services Company entered into the following transactions during May 2020.

1. Purchased computers for \$15,000 from Bytes of Data on account.
2. Paid \$3,000 cash for May rent on storage space.
3. Received \$12,000 cash from customers for contracts billed in April.
4. Performed payroll services for Magic Construction Company for \$2,500 cash.
5. Paid Northern Ohio Power Co. \$7,000 cash for energy usage in May.
6. Alma invested an additional \$25,000 in the business.
7. Paid Bytes of Data for the computers purchased in (1) above.
8. Incurred advertising expense for May of \$900 on account.

Instructions

Indicate with the appropriate letter whether each of the transactions above results in:

- a. an increase in assets and a decrease in assets.
- b. an increase in assets and an increase in owner's equity.
- c. an increase in assets and an increase in liabilities.
- d. a decrease in assets and a decrease in owner's equity.
- e. a decrease in assets and a decrease in liabilities.
- f. an increase in liabilities and a decrease in owner's equity.
- g. an increase in owner's equity and a decrease in liabilities.

Solution

- | | | | |
|----------------|-------------|-------------|-------------|
| 2. 1. c | 3. a | 5. d | 7. e |
| 2. d | 4. b | 6. b | 8. f |

Practice Problem

Prepare a tabular presentation and financial statements.

(LO 4, 5) Joan Robinson opens her own law office on July 1, 2020. During the first month of operations, the following transactions occurred.

1. Joan invested \$11,000 in cash in the law practice.
2. Paid \$800 for July rent on office space.
3. Purchased equipment on account \$3,000.
4. Performed legal services for clients for cash \$1,500.
5. Borrowed \$700 cash from a bank on a note payable.
6. Performed legal services for client on account \$2,000.
7. Paid monthly expenses: salaries and wages \$500, utilities \$300, and advertising \$100.
8. Joan withdrew \$1,000 cash for personal use.

Instructions

- a. Prepare a tabular summary of the transactions.
- b. **Financial Statement** Prepare the income statement, owner's equity statement, and balance sheet at July 31, 2020, for Joan Robinson, Attorney.

Solution

b.

**Joan Robinson, Attorney
Income Statement
For the Month Ended July 31, 2020**

Revenues		
Service revenue		\$3,500
Expenses		
Rent expense	\$800	
Salaries and wages expense	500	
Utilities expense	300	
Advertising expense	<u>100</u>	
Total expenses		1,700
Net income		<u>\$1,800</u>

**Joan Robinson, Attorney
Owner's Equity Statement
For the Month Ended July 31, 2020**

Owner's capital, July 1		\$ 0
Add: Investments	\$11,000	
Net income	<u>1,800</u>	<u>12,800</u>
		12,800
Less: Drawings		<u>1,000</u>
Owner's capital, July 31		\$11,800

Joan Robinson, Attorney

Balance Sheet

July 31, 2020

	<u>Assets</u>	
Cash		\$10,500
Accounts receivable		2,000
Equipment		3,000
Total assets		<u>\$15,500</u>
	<u>Liabilities and Owner's Equity</u>	
Liabilities		
Notes payable		\$ 700
Accounts payable		3,000
Total liabilities		<u>3,700</u>
Owner's equity		
Owner's capital		11,800
Total liabilities and owner's equity		<u>\$15,500</u>

WileyPLUS

Brief Exercises, DO IT! Exercises, Exercises, Problems, and many additional resources are available for practice in WileyPLUS.

Note: All asterisked Questions, Exercises, and Problems relate to material in the appendix to the chapter.

Questions

1. “Accounting is ingrained in our society and it is vital to our economic system.” Do you agree? Explain.
2. Identify and describe the steps in the accounting process.
3. (a) Who are internal users of accounting data? (b) How does accounting provide relevant data to these users?
4. What uses of financial accounting information are made by (a) investors and (b) creditors?
5. “Bookkeeping and accounting are the same.” Do you agree? Explain.
6. Benton Travel Agency purchased land for \$90,000 cash on December 10, 2020. At December 31, 2020, the land’s value has increased to \$92,000. What amount should be reported for land on Benton’s balance sheet at December 31, 2020? Explain.
7. What is the monetary unit assumption?
8. What is the economic entity assumption?
9. What are the three basic forms of business organizations for profit-oriented enterprises?
10. Helen Rupp is the owner of a successful printing shop. Recently, her business has been increasing, and Helen has been thinking about changing the organization of her business from a proprietorship to a corporation. Discuss some of the advantages Helen would enjoy if she were to incorporate her business.
11. What is the basic accounting equation?
12. a. Define the terms assets, liabilities, and owner’s equity.
b. What items affect owner’s equity?
13. Which of the following items are liabilities of Siebers Jewelry Stores?
 - a. Cash.
 - b. Accounts payable.
 - c. Owner’s drawings.
 - d. Accounts receivable.
 - e. Supplies.
 - f. Equipment.
 - g. Salaries and wages payable.
 - h. Service revenue.
 - i. Rent expense.
14. Can a business enter into a transaction in which only the left side of the basic accounting equation is affected? If so, give an example.
15. Are the following events recorded in the accounting records? Explain your answer in each case.
 - a. The owner of the company dies.
 - b. Supplies are purchased on account.
16. Indicate how the following business transactions affect the basic accounting equation.
 - a. An employee is fired.
 - b. The owner of the business withdraws cash from the business for personal use.
17. Listed below are some items found in the financial statements of Tony Gruber Co. Indicate in which financial statement(s) the following items would appear.
 - a. Service revenue.
 - b. Equipment.
 - c. Advertising expense.
 - d. Accounts receivable.
 - e. Owner’s capital.
 - f. Salaries and wages payable.
18. In February 2020, Ola Gott invested an additional \$12,000 in her business, Gott’s Pharmacy, which is organized as a proprietorship. Gott’s accountant, Sal Costa, recorded this receipt as an increase in cash and revenues. Is this treatment appropriate? Why or why not?
19. “A company’s net income appears directly on the income statement and the owner’s equity statement, and it is included indirectly in the company’s balance sheet.” Do you agree? Explain.
20. Bayler Enterprises had a capital balance of \$186,000 at the beginning of the period. At the end of the accounting period, the capital balance was \$189,000.
 - a. Assuming no additional investment or withdrawals during the period, what is the net income for the period?
 - b. Assuming an additional investment of \$13,000 but no withdrawals during the period, what is the net income for the period?
21. Summarized operations for Bayles Co. for the month of July are as follows.

Revenues recognized: for cash \$20,000; on account \$70,000.

Expenses incurred: for cash \$26,000; on account \$40,000.

 Indicate for Bayles Co. (a) the total revenues, (b) the total expenses, and (c) net income for the month of July.
22. The basic accounting equation is Assets = Liabilities + Owner’s equity. Replacing the words in that equation with dollar amounts, what is **Apple**’s accounting equation at September 26, 2015? (*Hint:* Owner’s equity is equivalent to shareholders’ equity.)

Brief Exercises

BE1.1 (LO 3) Presented below is the basic accounting equation. Determine the missing amounts.

<u>Assets</u>	=	<u>Liabilities</u>	+	<u>Owner's Equity</u>
a. \$90,000		\$50,000		?
b. ?		\$44,000		\$70,000
c. \$94,000		?		\$53,000

Use basic accounting equation.

BE1.2 (LO 3) Given the accounting equation, answer each of the following questions.

- The liabilities of Berber Company are \$120,000 and the owner's equity is \$230,000. What is the amount of Berber Company's total assets?
- The total assets of Berber Company are \$190,000 and its owner's equity is \$89,000. What is the amount of its total liabilities?
- The total assets of Berber Company are \$900,000 and its liabilities are equal to one-half of its total assets. What is the amount of Berber Company's owner's equity?

Use basic accounting equation.

BE1.3 (LO 3) At the beginning of the year, Gilles Company had total assets of \$800,000 and total liabilities of \$300,000. Answer the following questions.

- If total assets increased \$150,000 during the year and total liabilities decreased \$60,000, what is the amount of owner's equity at the end of the year?
- During the year, total liabilities increased \$100,000 and owner's equity decreased \$70,000. What is the amount of total assets at the end of the year?
- If total assets decreased \$80,000 and owner's equity increased \$120,000 during the year, what is the amount of total liabilities at the end of the year?

Use basic accounting equation.

BE1.4 (LO 3) Use the expanded accounting equation to answer each of the following questions.

- The liabilities of Platt Company are \$90,000. Owner's capital is \$150,000; drawings are \$40,000; revenues, \$450,000; and expenses, \$340,000. What is the amount of Platt Company's total assets?
- The total assets of Sierra Company are \$57,000. Owner's capital is \$35,000; drawings are \$7,000; revenues, \$52,000; and expenses, \$35,000. What is the amount of the company's total liabilities?
- The total assets of Birch Co. are \$660,000 and its liabilities are equal to two-thirds of its total assets. What is the amount of Birch Co.'s owner's equity?

Solve expanded accounting equation.

BE1.5 (LO 3) Indicate whether each of the following items is an asset (A), liability (L), or part of owner's equity (OE).

- | | |
|--|---|
| <input type="checkbox"/> a. Accounts receivable | <input type="checkbox"/> d. Supplies |
| <input type="checkbox"/> b. Salaries and wages payable | <input type="checkbox"/> e. Owner's capital |
| <input type="checkbox"/> c. Equipment | <input type="checkbox"/> f. Notes payable |

Identify assets, liabilities, and owner's equity.

BE1.6 (LO 3) Classify each of the following items as owner's drawings (D), revenue (R), or expense (E).

- | | |
|--|---|
| <input type="checkbox"/> a. Advertising expense | <input type="checkbox"/> e. Owner's drawings |
| <input type="checkbox"/> b. Service revenue | <input type="checkbox"/> f. Rent revenue |
| <input type="checkbox"/> c. Insurance expense | <input type="checkbox"/> g. Utilities expense |
| <input type="checkbox"/> d. Salaries and wages expense | |

Classify items affecting owner's equity.

BE1.7 (LO 4) Presented below are three business transactions. On a sheet of paper, list the letters (a), (b), and (c) with columns for assets, liabilities, and owner's equity. For each column, indicate whether the transactions increased (+), decreased (-), or had no effect (NE) on assets, liabilities, and owner's equity.

- Purchased supplies on account.
- Received cash for performing a service.
- Paid expenses in cash.

Determine effect of transactions on basic accounting equation.

BE1.8 (LO 4) Follow the same format as in BE1.7. Determine the effect on assets, liabilities, and owner's equity of the following three transactions.

- Invested cash in the business.
- Withdrawal of cash by owner.
- Received cash from a customer who had previously been billed for services performed.

Determine effect of transactions on basic accounting equation.

Determine effect of transactions on basic owner's equity.

BE1.9 (LO 4) Presented below are three transactions. Mark each transaction as affecting owner's investment (I), owner's drawings (D), revenue (R), expense (E), or not affecting owner's equity (NOE).

- a. Received cash for services performed
- b. Paid cash to purchase equipment
- c. Paid employee salaries

Prepare a balance sheet.

BE1.10 (LO 5) Financial Statement In alphabetical order below are balance sheet items for Smyth Company at December 31, 2020. Kathy Smyth is the owner of Smyth Company. Prepare a balance sheet, following the format of Illustration 1.9.

Accounts payable	\$90,000
Accounts receivable	62,500
Cash	49,000
Owner's capital	21,500

Determine where items appear on financial statements.

BE1.11 (LO 5) Financial Statement Indicate whether the following items would appear on the income statement (IS), balance sheet (BS), or owner's equity statement (OE).

- | | |
|---|---|
| <input type="checkbox"/> a. Notes payable | <input type="checkbox"/> d. Cash |
| <input type="checkbox"/> b. Advertising expense | <input type="checkbox"/> e. Service revenue |
| <input type="checkbox"/> c. Owner's capital | |

DO IT! Exercises

Review basic concepts.

DO IT! 1.1 (LO 1) Indicate whether each of the five statements presented below is true or false.

1. The three steps in the accounting process are identification, recording, and examination.
2. The accounting process includes the bookkeeping function.
3. Managerial accounting provides reports to help investors and creditors evaluate a company.
4. The two most common types of external users are investors and creditors.
5. Internal users include human resources managers.

Identify building blocks of accounting.

DO IT! 1.2 (LO 2) Indicate whether each of the five statements presented below is true or false.

1. Congress passed the Sarbanes-Oxley Act to ensure that investors invest only in companies that will be profitable.
2. The standards of conduct by which actions are judged as loyal or disloyal are ethics.
3. The primary accounting standard-setting body in the United States is the Securities and Exchange Commission (SEC).
4. The historical cost principle dictates that companies record assets at their cost and continue to report them at their cost over the time the assets are held.
5. The monetary unit assumption requires that companies record only transactions that can be measured in money.

Evaluate effects of transactions on owner's equity.

DO IT! 1.3 (LO 3) Classify the following items as investment by owner (I), owner's drawings (D), revenues (R), or expenses (E). Then indicate whether each item increases or decreases owner's equity.

- | | |
|------------------|--|
| 1. Drawings. | 3. Advertising expense. |
| 2. Rent revenue. | 4. Owner puts personal assets into the business. |

Prepare tabular analysis.

DO IT! 1.4 (LO 4) Transactions made by A. Marti and Co., a law firm, for the month of March are shown below. Prepare a tabular analysis which shows the effects of these transactions on the expanded accounting equation, similar to that shown in Illustration 1.8.

1. The company performed \$20,000 of services for customers, on credit.
2. The company received \$20,000 in cash from customers who had been billed for services (in transaction 1).
3. The company received a bill for \$3,200 of advertising but will not pay it until a later date.
4. A. Marti withdrew \$2,500 cash from the business for personal use.

DO IT! 1.5 (LO 5) Presented below is selected information related to Kirby Company at December 31, 2020. Kirby reports financial information monthly.

Determine specific amounts on the financial statements.

Accounts Payable	\$ 3,000	Salaries and Wages Expense	\$16,500
Cash	6,500	Notes Payable	25,000
Advertising Expense	6,000	Rent Expense	10,500
Service Revenue	53,500	Accounts Receivable	13,500
Equipment	29,000	Owner's Drawings	7,500

- Determine the total assets of Kirby Company at December 31, 2020.
- Determine the net income that Kirby Company reported for December 2020.
- Determine the owner's equity of Kirby Company at December 31, 2020.

Exercises

E1.1 (LO 1) Genesis Company performs the following accounting tasks during the year.

Classify the three activities of accounting.

- Analyzing and interpreting information.
- Classifying economic events.
- Explaining uses, meaning, and limitations of data.
- Keeping a systematic chronological diary of events.
- Measuring events in dollars and cents.
- Preparing accounting reports.
- Reporting information in a standard format.
- Selecting economic activities relevant to the company.
- Summarizing economic events.

Accounting is “an information system that **identifies, records, and communicates** the economic events of an organization to interested users.”

Instructions

Categorize the accounting tasks performed by Genesis as relating to either the identification (I), recording (R), or communication (C) aspects of accounting.

E1.2 (LO 1) a. The following are users of financial statements.

Identify users of accounting information.

- | | |
|---|---|
| <input type="checkbox"/> Customers | <input type="checkbox"/> Securities and Exchange Commission |
| <input type="checkbox"/> Internal Revenue Service | <input type="checkbox"/> Store manager |
| <input type="checkbox"/> Labor unions | <input type="checkbox"/> Suppliers |
| <input type="checkbox"/> Marketing manager | <input type="checkbox"/> Vice president of finance |
| <input type="checkbox"/> Production supervisor | |

Instructions

Identify the users as being either **external users** or **internal users**.

b. The following questions could be asked by an internal user or an external user.

- Can we afford to give our employees a pay raise?
- Did the company earn a satisfactory income?
- Do we need to borrow in the near future?
- How does the company’s profitability compare to other companies?
- What does it cost us to manufacture each unit produced?
- Which product should we emphasize?
- Will the company be able to pay its short-term debts?

Instructions

Identify each of the questions as being more likely asked by an **internal user** or an **external user**.

Discuss ethics and the historical cost principle.

E1.3 (LO 2) Angela Duffy, president of Duffy Company, has instructed Jana Barth, the head of the accounting department for Duffy Company, to report the company's land in the company's accounting reports at its fair value of \$170,000 instead of its cost of \$100,000. Duffy says, "Showing the land at \$170,000 will make our company look like a better investment when we try to attract new investors next month."

Instructions

Explain the ethical situation involved for Jana Barth, identifying the stakeholders and the alternatives.

Use accounting concepts.

E1.4 (LO 2) The following situations involve accounting principles and assumptions.

1. Sosa Company owns buildings that are worth substantially more than they originally cost. In an effort to provide more relevant information, Sosa reports the buildings at fair value in its accounting reports.
2. Mays Company includes in its accounting records only transaction data that can be expressed in terms of money.
3. Curt Russell, owner of Curt's Photography, records his personal living costs as expenses of the business.

Instructions

For each of the three situations, say if the accounting method used is correct or incorrect. If correct, identify which principle or assumption supports the method used. If incorrect, identify which principle or assumption has been violated.

Classify accounts as assets, liabilities, and owner's equity.

E1.5 (LO 3) Diehl Cleaners has the following balance sheet items.

Accounts payable	Accounts receivable
Cash	Notes payable
Equipment	Salaries and wages payable
Supplies	Owner's capital

Instructions

Classify each item as an asset, liability, or owner's equity.

Analyze the effect of transactions.

E1.6 (LO 4) Selected transactions for Poway Landscaping Company are listed below.

1. Made cash investment to start business.
2. Paid monthly rent.
3. Purchased equipment on account.
4. Billed customers for services performed.
5. Withdrew cash for owner's personal use.
6. Received cash from customers billed in (4).
7. Incurred advertising expense on account.
8. Purchased additional equipment for cash.
9. Received cash from customers when service was performed.

Instructions

List the numbers of the above transactions and describe the effect of each transaction on assets, liabilities, and owner's equity. For example, the first answer is: (1) Increase in assets and increase in owner's equity.

Analyze the effect of transactions on assets, liabilities, and owner's equity.

E1.7 (LO 4) Falske Computer Timeshare Company entered into the following transactions during May 2020.

1. Purchased computers for \$20,000 from Digital Equipment on account.
2. Paid \$4,000 cash for May rent on storage space.
3. Received \$17,000 cash from customers for contracts billed in April.
4. Performed computer services for Viking Construction Company for \$4,000 cash.
5. Paid Tri-State Power Co. \$11,000 cash for energy usage in May.

6. Falske invested an additional \$29,000 in the business.
7. Paid Digital Equipment for the computers purchased in (1) above.
8. Incurred advertising expense for May of \$1,200 on account.

Instructions

Indicate with the appropriate letter whether each of the transactions above results in:

- a. An increase in assets and a decrease in assets.
- b. An increase in assets and an increase in owner's equity.
- c. An increase in assets and an increase in liabilities.
- d. A decrease in assets and a decrease in owner's equity.
- e. A decrease in assets and a decrease in liabilities.
- f. An increase in liabilities and a decrease in owner's equity.
- g. An increase in owner's equity and a decrease in liabilities.

E1.8 (LO 4) Writing An analysis of the transactions made by Peat Deloitte & Co., a certified public accounting firm, for the month of August is shown below. The expenses were \$560 for rent, \$4,800 for salaries and wages, and \$400 for utilities.

Analyze transactions and compute net income.

	Accounts Cash	+ Receivable	+ Supplies	+ Equipment	=	Accounts Payable	+ Owner's Capital	- Owner's Drawings	+ Revenues	- Expenses
1.	+\$15,000						+\$15,000			
2.	-2,000				+\$5,000		+\$3,000			
3.	-750				+\$750					
4.	+4,000				+\$4,500					+\$8,500
5.	-1,500						-1,500			
6.	-2,000									-\$2,000
7.	-560									-\$560
8.	+450				-450					
9.	-4,800									-4,800
10.										-400

Instructions

- a. Describe each transaction that occurred for the month.
- b. Determine how much owner's equity increased for the month.
- c. Compute the amount of net income for the month.

E1.9 (LO 5) Financial Statement An analysis of transactions for Peat DeLoitte & Co. was presented in E1.8.

Prepare financial statements.

Instructions

Prepare an income statement and an owner's equity statement for August and a balance sheet at August 31, 2020. Assume that August is the company's first month of business.

E1.10 (LO 5) Hawke Company had the following assets and liabilities on the dates indicated.

Determine net income (or loss).

December 31	Total Assets	Total Liabilities
2019	\$400,000	\$250,000
2020	\$460,000	\$300,000
2021	\$590,000	\$400,000

Hawke began business on January 1, 2019, with an investment of \$100,000.

Instructions

From an analysis of the change in owner's equity during the year, compute the net income (or loss) for:

- a. 2019, assuming Hawke's drawings were \$12,000 for the year.
- b. 2020, assuming Hawke made an additional investment of \$34,000 and had no drawings in 2020.
- c. 2021, assuming Hawke made an additional investment of \$12,000 and had drawings of \$25,000 in 2021.

Analyze financial statements items.

E1.11 (LO 5) Two items are omitted from each of the following summaries of balance sheet and income statement data for two proprietorships for the year 2020, Greene's Goods and Solar Enterprises.

	<u>Greene's Goods</u>	<u>Solar Enterprises</u>
Beginning of year:		
Total assets	\$110,000	\$129,000
Total liabilities	85,000	(c)
Total owner's equity	(a)	80,000
End of year:		
Total assets	160,000	180,000
Total liabilities	120,000	50,000
Total owner's equity	40,000	130,000
Changes during year in owner's equity:		
Additional investment	(b)	25,000
Drawings	37,000	(d)
Total revenues	220,000	100,000
Total expenses	175,000	60,000

Instructions

Determine the missing amounts.

Prepare income statement and owner's equity statement.

E1.12 (LO 5) Financial Statement The following information relates to Fleet Co. for the year 2020.

Owner's capital, January 1, 2020	\$42,000	Advertising expense	\$ 1,800
Owner's drawings during 2020	6,000	Rent expense	10,400
Service revenue	63,600	Utilities expense	3,100
Salaries and wages expense	30,200		

Instructions

After analyzing the data, prepare an income statement and an owner's equity statement for the year ending December 31, 2020.

Correct an incorrectly prepared balance sheet.

E1.13 (LO 5) Financial Statement Abby Roland is the bookkeeper for Cheng Company. Abby has been trying to determine the correct balance sheet for Cheng Company. Cheng's balance sheet is shown below.

Cheng Company Balance Sheet December 31, 2020			
Assets		Liabilities	
Cash	\$15,000	Accounts payable	\$21,000
Supplies	8,000	Accounts receivable	(6,500)
Equipment	46,000	Owner's capital	<u>67,500</u>
Owner's drawings	13,000	Total liabilities and owner's equity	<u>\$82,000</u>
Total assets	<u>\$82,000</u>		

Instructions

Prepare a correct balance sheet.

Compute net income and prepare a balance sheet.

E1.14 (LO 5) Financial Statement Saira Morrow is the sole owner of Buena Vista Park, a public camping ground near the Crater Lake National Recreation Area. Saira has compiled the following financial information as of December 31, 2020.

Revenues during 2020—camping fees	\$140,000	Fair value of equipment	\$140,000
Revenues during 2020—general store	65,000	Notes payable	60,000
Accounts payable	11,000	Expenses during 2020	160,000
Cash on hand	23,000	Accounts receivable	17,500
Original cost of equipment	115,500		

Instructions

- a. Determine Saira Morrow's net income from Buena Vista Park for 2020.
- b. Prepare a balance sheet for Buena Vista Park as of December 31, 2020.

E1.15 (LO 5) Financial Statement Presented below is financial information related to the 2020 operations of Sea Legs Cruise Company. *Prepare an income statement.*

Maintenance and repairs expense	\$ 95,000
Utilities expense	13,000
Salaries and wages expense	142,000
Advertising expense	24,500
Ticket revenue	410,000

Instructions

Prepare the 2020 income statement for Sea Legs Cruise Company.

E1.16 (LO 5) Financial Statement Presented below is information related to the sole proprietorship of Helen Archer, attorney. *Prepare an owner's equity statement.*

Legal service revenue—2020	\$330,000
Total expenses—2020	211,000
Assets, January 1, 2020	98,000
Liabilities, January 1, 2020	62,000
Assets, December 31, 2020	168,000
Liabilities, December 31, 2020	100,000
Drawings—2020	?

Instructions

Prepare the 2020 owner's equity statement for Helen Archer's legal practice.

E1.17 (LO 5) Financial Statement This information is for Paulo Company for the year ended December 31, 2020. *Prepare a cash flow statement.*

Cash received from revenues from customers	\$600,000
Cash received from investment by owner	280,000
Cash paid for new equipment	115,000
Cash drawings by owner paid	18,000
Cash paid for expenses	430,000
Cash balance 1/1/20	30,000

Instructions

Prepare the 2020 statement of cash flows for Paulo Company.

E1.18 (LO 5) The statement of cash flows classifies each transaction as an operating activity, an investing activity, or a financing activity. Operating activities are the types of activities the company performs to generate profits. Investing activities include the purchase of long-lived assets such as equipment or the purchase of investment securities. Financing activities are borrowing money, investment by owner, and cash drawings by owner.

Identify cash flow activities.

Presented below are the following transactions.

1. Owner invested \$20,000 cash.
2. Issued note payable for \$12,000 cash.
3. Purchased office equipment for \$11,000 cash.
4. Received \$15,000 cash for services performed.
5. Paid \$1,000 cash for rent.
6. Paid \$600 cash drawings to owner.
7. Paid \$5,700 cash for salaries.

Instructions

Classify each of these transactions as operating, investing, or financing activities.

Problems: Set A

Analyze transactions and compute net income.

P1.1A (LO 3, 4) On April 1, Julie Spengel established Spengel's Travel Agency. The following transactions were completed during the month.

1. Invested \$15,000 cash to start the agency.
2. Paid \$600 cash for April office rent.
3. Purchased equipment for \$3,000 cash.
4. Incurred \$700 of advertising costs in the *Chicago Tribune*, on account.
5. Paid \$900 cash for office supplies.
6. Performed services worth \$10,000: \$3,000 cash is received from customers, and the balance of \$7,000 is billed to customers on account.
7. Withdraw \$600 cash for personal use.
8. Paid *Chicago Tribune* \$500 of the amount due in transaction (4).
9. Paid employees' salaries \$2,500.
10. Received \$4,000 in cash from customers who have previously been billed in transaction (6).

Check figures provide a key number to let you know you are on the right track.

a. Total assets \$20,800

b. Net income \$6,200

Analyze transactions and prepare income statement, owner's equity statement, and balance sheet.

Instructions

- a. Prepare a tabular analysis of the transactions using the following column headings: Cash, Accounts Receivable, Supplies, Equipment, Accounts Payable, Owner's Capital, Owner's Drawings, Revenues, and Expenses.
- b. From an analysis of the owner's equity columns, compute the net income or net loss for April.

P1.2A (LO 4, 5) Financial Statement Sonya Jared opened a law office on July 1, 2020. On July 31, the balance sheet showed Cash \$5,000, Accounts Receivable \$1,500, Supplies \$500, Equipment \$6,000, Accounts Payable \$4,200, and Owner's Capital \$8,800. During August, the following transactions occurred.

1. Collected \$1,200 of accounts receivable.
2. Paid \$2,800 cash on accounts payable.
3. Recognized revenue of \$7,500 of which \$4,000 is collected in cash and the balance is due in September.
4. Purchased additional equipment for \$2,000, paying \$400 in cash and the balance on account.
5. Paid salaries \$2,800, rent for August \$900, and advertising expenses \$400.
6. Withdraw \$700 in cash for personal use.
7. Received \$2,000 from Standard Federal Bank—money borrowed on a note payable.
8. Incurred utility expenses for month on account \$270.

Instructions

a. Total assets \$16,500

b. Net income \$3,130
Ending capital \$11,230

Prepare income statement, owner's equity statement, and balance sheet.

P1.3A (LO 5) Financial Statement On June 1, Cindy Godfrey started Divine Designs Co., a company that provides craft opportunities, by investing \$12,000 cash in the business. Following are the assets and liabilities of the company at June 30 and the revenues and expenses for the month of June.

Cash	\$10,150	Service Revenue	\$6,500
Accounts Receivable	2,800	Advertising Expense	500
Supplies	2,000	Rent Expense	1,600
Equipment	10,000	Gasoline Expense	200
Notes Payable	9,000	Utilities Expense	150
Accounts Payable	1,200		

Cindy made no additional investment in June but withdrew \$1,300 in cash for personal use during the month.

Instructions

- Prepare an income statement and owner's equity statement for the month of June and a balance sheet at June 30, 2020.
- Prepare an income statement and owner's equity statement for June assuming the following data are not included above: (1) \$900 of services were performed and billed but not collected at June 30, and (2) \$150 of gasoline expense was incurred but not paid.

P1.4A (LO 4, 5) Financial Statement Maisie Taft started her own consulting firm, Maisie Consulting, on May 1, 2020. The following transactions occurred during the month of May.

- May 1 Maisie invested \$7,000 cash in the business.
 2 Paid \$900 for office rent for the month.
 3 Purchased \$800 of supplies on account.
 5 Paid \$125 to advertise in the *County News*.
 9 Received \$4,000 cash for services performed.
 12 Withdrew \$1,000 cash for personal use.
 15 Performed \$6,400 of services on account.
 17 Paid \$2,500 for employee salaries.
 20 Made a partial payment of \$600 for the supplies purchased on account on May 3.
 23 Received a cash payment of \$4,000 for services performed on account on May 15.
 26 Borrowed \$5,000 from the bank on a note payable.
 29 Purchased equipment for \$4,200 on account.
 30 Paid \$275 for utilities.

Analyze transactions and prepare financial statements.

Instructions

- Show the effects of the previous transactions on the accounting equation using the following format.
- Total assets \$22,000

Date	Assets		Liabilities		Owner's Equity	
	Accounts	Notes	Accounts	Owner's	Owner's	
	Cash + Receivable + Supplies + Equipment	=	Payable + Payable	Capital + Drawings	+ Revenues - Expenses	

- Prepare an income statement for the month of May.
- Net income \$6,600
- Prepare a balance sheet at May 31, 2020.
- Cash \$14,600

P1.5A (LO 4, 5) Writing Financial Statement Financial statement information about four different companies is as follows.

Determine financial statement amounts and prepare owner's equity statement.

	Alpha Company	Beta Company	Psi Company	Omega Company
January 1, 2020				
Assets	\$ 80,000	\$ 90,000	(g)	\$150,000
Liabilities	41,000	(d)	80,000	(j)
Owner's equity	(a)	40,000	49,000	90,000
December 31, 2020				
Assets	(b)	112,000	170,000	(k)
Liabilities	60,000	72,000	(h)	100,000
Owner's equity	50,000	(e)	82,000	151,000
Owner's equity changes in year				
Additional investment	(c)	8,000	10,000	15,000
Drawings	15,000	(f)	12,000	10,000
Total revenues	350,000	410,000	(i)	500,000
Total expenses	333,000	385,000	350,000	(l)

Instructions

- Determine the missing amounts. (*Hint*: For example, to solve for (a), Assets – Liabilities = Owner's equity = \$39,000.)
- Prepare the owner's equity statement for Alpha Company.
- Write a memorandum explaining the sequence for preparing financial statements and the interrelationship of the owner's equity statement to the income statement and balance sheet.

Continuing Case

The ***Cookie Creations*** case starts in this chapter and continues through Chapter 18. The business begins as a sole proprietorship and then evolves into a partnership and finally a corporation. You also can find this case in WileyPLUS.

Cookie Creations

© leungchopan/
Shutterstock

CC1 Natalie Koebel spent much of her childhood learning the art of cookie-making from her grandmother. They passed many happy hours mastering every type of cookie imaginable and later creating new recipes that were both healthy and delicious. Now at the start of her second year in college, Natalie is investigating various possibilities for starting her own business as part of the requirements of the entrepreneurship program in which she is enrolled.

A long-time friend insists that Natalie has to include cookies in her business plan. After a series of brainstorming sessions, Natalie settles on the idea of operating a cookie-making school. She will start on a part-time basis and offer her services in people's homes. Now that she has started thinking about it, the possibilities seem endless. During the fall, she will concentrate on holiday cookies. She will offer individual lessons and group sessions (which will probably be more entertainment than education for the participants). Natalie also decides to include children in her target market.

The first difficult decision is coming up with the perfect name for her business. Natalie settles on "Cookie Creations" and then moves on to more important issues.

Instructions

- a. What form of business organization—proprietorship, partnership, or corporation—do you recommend that Natalie use for her business? Discuss the benefits and weaknesses of each form and give the reasons for your choice.
- b. Will Natalie need accounting information? If yes, what information will she need and why? How often will she need this information?
- c. Identify specific asset, liability, and owner's equity accounts that Cookie Creations will likely use to record its business transactions.
- d. Should Natalie open a separate bank account for the business? Why or why not?

Ethics Case

EC1 After numerous campus interviews, Travis Chase, a senior at Great Northern College, received two office interview invitations from the Baltimore offices of two large firms. Both firms offered to cover his out-of-pocket expenses (travel, hotel, and meals). He scheduled the interviews for both firms on the same day, one in the morning and one in the afternoon. At the conclusion of each interview, he submitted to both firms his total out-of-pocket expenses for the trip to Baltimore: mileage \$112 (280 miles at \$0.40), hotel \$130, meals \$36, and parking and tolls \$18, for a total of \$296. He believes this approach is appropriate. If he had made two trips, his cost would have been two times \$296. He is also certain that neither firm knew he had visited the other on that same trip. Within 10 days, Travis received two checks in the mail, each in the amount of \$296.

Instructions

- a. Who are the stakeholders (affected parties) in this situation?
- b. What are the ethical issues in this case?
- c. What would you do in this situation?

Expand Your Critical Thinking

Financial Reporting Problem: Apple Inc.

CT1.1 The financial statements of **Apple Inc.** for 2015 are presented in Appendix A. The complete annual report, including the notes to the financial statements, is available at the company's website.

Instructions

Refer to Apple's financial statements and answer the following questions.

- a. What were Apple's total assets at September 26, 2015? At September 27, 2014?
- b. How much cash (and cash equivalents) did Apple have on September 26, 2015?
- c. What amount of accounts payable did Apple report on September 26, 2015? On September 27, 2014?
- d. What were Apple's net sales in 2013? In 2014? In 2015?
- e. What is the amount of the change in Apple's net income from 2014 to 2015?

Comparative Analysis Problem: PepsiCo, Inc. vs. The Coca-Cola Company

CT1.2 **PepsiCo, Inc.**'s financial statements are presented in Appendix B. Financial statements of **The Coca-Cola Company** are presented in Appendix C. The complete annual reports of PepsiCo and Coca-Cola, including the notes to the financial statements, are available at each company's respective website.

Instructions

- a. Based on the information contained in these financial statements, determine the following for each company.
 1. Total assets at December 26, 2015, for PepsiCo and for Coca-Cola at December 31, 2015.
 2. Accounts (notes) receivable, net at December 26, 2015, for PepsiCo and at December 31, 2015, for Coca-Cola.
 3. Net revenues for year ended in 2015.
 4. Net income for year ended in 2015.
- b. What conclusions concerning the two companies can be drawn from these data?

Comparative Analysis Problem: Amazon.com, Inc. vs. Wal-Mart Stores, Inc.

CT1.3 **Amazon.com, Inc.**'s financial statements are presented in Appendix D. Financial statements of **Wal-Mart Stores, Inc.** are presented in Appendix E. The complete annual reports of Amazon and Wal-Mart, including the notes to the financial statements, are available at each company's respective website.

Instructions

- a. Based on the information contained in these financial statements, determine the following for each company.
 1. Total assets at December 31, 2015, for Amazon and for Wal-Mart at January 31, 2016.
 2. Receivables (net) at December 31, 2015, for Amazon and for Wal-Mart at January 31, 2016.
 3. Net sales (product only) for year ended in 2015 (2016 for Wal-Mart).
 4. Net income for the year ended in 2015 (2016 for Wal-Mart).
- b. What conclusions concerning these two companies can be drawn from these data?

Real-World Focus

CT1.4 This exercise will familiarize you with the skills needed (other than accounting skills) to be a successful accountant.

Instructions

Search the Internet for "start here go places" to access free accounting resources for future CPAs and then answer the following questions.

- a. What are the four skill sets that are useful for success in accounting?
- b. Why are these skill sets useful for a successful accounting career?

Decision-Making Across the Organization

CT1.5 Anya and Nick Ramon, local golf stars, opened the Chip-Shot Driving Range on March 1, 2020, by investing \$25,000 of their cash savings in the business. A caddy shack was constructed for cash at a cost of \$8,000, and \$800 was spent on golf balls and golf clubs. The Ramons leased five acres of land

at a cost of \$1,000 per month and paid the first month's rent. During the first month, advertising costs totaled \$750, of which \$100 was unpaid at March 31, and \$400 was paid to members of the high-school golf team for retrieving golf balls. All revenues from customers were deposited in the company's bank account. On March 15, Anya and Nick withdrew a total of \$1,000 in cash for personal living expenses. A \$120 utility bill was received on March 31 but was not paid. On March 31, the balance in the company's bank account was \$18,900.

Anya and Nick thought they had a pretty good first month of operations. But, their estimates of profitability ranged from a loss of \$6,100 to net income of \$2,480.

Instructions

With the class divided into groups, answer the following.

- a. How could the Ramons have concluded that the business operated at a loss of \$6,100? Was this a valid basis on which to determine net income?
- b. How could the Ramons have concluded that the business operated at a net income of \$2,480? (*Hint:* Prepare a balance sheet at March 31.) Was this a valid basis on which to determine net income?
- c. Without preparing an income statement, determine the actual net income for March.
- d. What was the revenue recognized in March?

Communication Activity

CT1.6 Amy Sawyer, the bookkeeper for New Hampshire Company, has been trying to determine the correct balance sheet for the company. The company's balance sheet is shown below.

New Hampshire Company			
Balance Sheet			
For the Month Ended December 31, 2020			
Assets		Liabilities	
Equipment	\$25,500	Owner's capital	\$26,000
Cash	9,000	Accounts receivable	(5,000)
Supplies	3,000	Owner's drawings	(2,000)
Accounts payable	(8,000)	Notes payable	10,500
	<u><u>\$29,500</u></u>		<u><u>\$29,500</u></u>

Instructions

Explain to Amy Sawyer in a memo why the original balance sheet is incorrect, and what should be done to correct it.

All About You

CT1.7 Some people are tempted to make their finances look worse to get financial aid. Companies sometimes also manage their financial numbers in order to accomplish certain goals. Earnings management is the planned timing of revenues, expenses, gains, and losses to smooth out bumps in net income. In managing earnings, companies' actions vary from being within the range of ethical activity to being both unethical and illegal attempts to mislead investors and creditors.

Instructions

Provide responses for each of the following questions.

- a. Discuss whether you think each of the following actions (adapted from the FAFSA website) to increase the chances of receiving financial aid is ethical.
 1. Spend the student's assets and income first, before spending parents' assets and income.
 2. Accelerate necessary expenses to reduce available cash. For example, if you need a new car, buy it before applying for financial aid.
 3. State that a truly financially dependent child is independent.
 4. Have a parent take an unpaid leave of absence for long enough to get below the "threshold" level of income.
- b. What are some reasons why a **company** might want to overstate its earnings?

- c. What are some reasons why a **company** might want to underestimate its earnings?
- d. Under what circumstances might an otherwise ethical person decide to illegally overstate or underestimate earnings?

Considering People, Planet, and Profit

CT1.8 Although **Clif Bar & Company** is not a public company, it does share its financial information with its employees as part of its open-book management approach. Further, although it does not publicly share its financial information, it does provide a different form of an annual report to external users. In this report, the company provides information regarding its sustainability efforts.

Instructions

Go to the Who We Are page at the Clif Bar website and identify the five aspirations.

FASB Codification Activity

CT1.9 The FASB has developed the Financial Accounting Standards Board Accounting Standards Codification (or more simply “the Codification”). The FASB’s primary goal in developing the Codification is to provide in one place all the authoritative literature related to a particular topic. To provide easy access to the Codification, the FASB also developed the Financial Accounting Standards Board Codification Research System (CRS). CRS is an online, real-time database that provides easy access to the Codification. The Codification and the related CRS provide a topically organized structure, subdivided into topic, subtopics, sections, and paragraphs, using a numerical index system.

You may find this system useful in your present and future studies, and so we have provided an opportunity to use this online system as part of the *Expand Your Critical Thinking* section.

Instructions

Academic access to the FASB Codification is available through university subscriptions, obtained from the American Accounting Association, for an annual fee of \$150. This subscription covers an unlimited number of students within a single institution. Once this access has been obtained by your school, you should log in and familiarize yourself with the resources that are accessible at the FASB Codification site.

A Look at IFRS

LEARNING OBJECTIVE 7

Describe the impact of international accounting standards on U.S. financial reporting.

Most agree that there is a need for one set of international accounting standards. Here is why:

Multinational corporations. Today’s companies view the entire world as their market. For example, **Coca-Cola**, **Intel**, and **McDonald’s** generate more than 50% of their sales outside the United States. Many foreign companies, such as **Toyota**, **Nestlé**, and **Sony**, find their largest market to be the United States.

Mergers and acquisitions. The mergers between **Fiat/Chrysler** and **Vodafone/Mannesmann** suggest that we will see even more such business combinations of companies from different countries in the future.

Information technology. As communication barriers continue to topple through advances in technology, companies and individuals in different countries and markets are becoming more comfortable buying and selling goods and services from one another.

Financial markets. Financial markets are of international significance today. Whether it is currency, equity securities (stocks), bonds, or derivatives, there are active markets throughout the world trading these types of instruments.

Key Points

Following are the key similarities and differences between GAAP and IFRS as related to accounting fundamentals.

Similarities

- The basic techniques for recording business transactions are the same for U.S. and international companies.
- Both international and U. S. accounting standards emphasize transparency in financial reporting. Both sets of standards are primarily driven by meeting the needs of investors and creditors.
- The three most common forms of business organizations, proprietorships, partnerships, and corporations, are also found in countries that use international accounting standards.

Differences

- International standards are referred to as International Financial Reporting Standards (IFRS), developed by the International Accounting Standards Board. Accounting standards in the United States are referred to as generally accepted accounting principles (GAAP) and are developed by the Financial Accounting Standards Board.
- IFRS tends to be simpler in its accounting and disclosure requirements; some people say it is more “principles-based.” GAAP is more detailed; some people say it is more “rules-based.”
- The internal control standards applicable to Sarbanes-Oxley (SOX) apply only to large public companies listed on U.S. exchanges. There is continuing debate as to whether non-U.S. companies should have to comply with this extra layer of regulation.

Looking to the Future

Both the IASB and the FASB are hard at work developing standards that will lead to the elimination of major differences in the way certain transactions are accounted for and reported.

IFRS Practice

IFRS Self-Test Questions

1. Which of the following is **not** a reason why a single set of high-quality international accounting standards would be beneficial?
 - Mergers and acquisition activity.
 - Financial markets.
 - Multinational corporations.
 - GAAP is widely considered to be a superior reporting system.
2. The Sarbanes-Oxley Act determines:
 - international tax regulations.
3. IFRS is considered to be more:
 - principles-based and less rules-based than GAAP.
 - rules-based and less principles-based than GAAP.
 - detailed than GAAP.
 - None of the above.

IFRS Exercises

IFRS1.1 Who are the two key international players in the development of international accounting standards? Explain their role.

IFRS1.2 What is the benefit of a single set of high-quality accounting standards?

International Financial Reporting Problem: Louis Vuitton

IFRS1.3 The financial statements of **Louis Vuitton** are presented in Appendix F. The complete annual report, including the notes to its financial statements, is available at the company’s website.

Instructions

Visit Louis Vuitton’s corporate website and answer the following questions from the company’s 2015 annual report.

- What accounting firm performed the audit of Louis Vuitton’s financial statements?
- What is the address of the company’s corporate headquarters?
- What is the company’s reporting currency?

Answers to IFRS Self-Test Questions

The Recording Process

Chapter Preview

In Chapter 1, we analyzed business transactions in terms of the accounting equation, and we presented the cumulative effects of these transactions in tabular form. Imagine a company like **MF Global** (as in the following Feature Story) using the same tabular format as Softbyte to keep track of its transactions. In a single day, MF Global engaged in thousands of business transactions. To record each transaction this way would be impractical, expensive, and unnecessary. Instead, companies use a set of procedures and records to keep track of transaction data more easily. This chapter introduces and illustrates these basic procedures and records.

Feature Story

Accidents Happen

How organized are you financially? Take a short quiz. Answer yes or no to each question:

- Does your wallet contain so many cash machine receipts that you've been declared a walking fire hazard?
- Do you wait until your debit card is denied before checking the status of your funds?

- Was Aaron Rodgers (the quarterback for the **Green Bay Packers**) playing high school football the last time you verified the accuracy of your bank account?

If you think it is hard to keep track of the many transactions that make up your life, imagine how difficult it is for a big corporation to do so. Not only that, but now consider how important it is for a large company to have good accounting records, especially if it has control of your life savings. **MF Global Holdings Ltd** was such a company. As a large investment broker, it held billions of dollars of investments for clients. If

you had your life savings invested at MF Global, you might be slightly displeased if you heard this from one of its representatives: “You know, I kind of remember an account for someone with a name like yours—now what did we do with that?”

Unfortunately, that is almost exactly what happened to MF Global’s clients shortly before it filed for bankruptcy. During the days immediately following the bankruptcy filing, regulators and auditors struggled to piece things together. In the words of one regulator, “Their books are a disaster . . . we’re trying to figure out what numbers are real numbers.” One company that considered buying an interest in MF Global walked away from

the deal because it “couldn’t get a sense of what was on the balance sheet.” That company said the information that should have been instantly available instead took days to produce.

It now appears that MF Global did not properly segregate customer accounts from company accounts. And, because of its sloppy recordkeeping, customers were not protected when the company had financial troubles. Total customer losses were approximately \$1 billion. As you can see, accounting matters!

Visit WileyPLUS with ORION for additional tutorials and practice opportunities.

Accounts, Debits, and Credits

LEARNING OBJECTIVE 1

Describe how accounts, debits, and credits are used to record business transactions.

The Account

An **account** is an individual accounting record of increases and decreases in a specific asset, liability, or owner’s equity item. For example, Softbyte (the company discussed in Chapter 1) would have separate accounts for Cash, Accounts Receivable, Accounts Payable, Service

Revenue, Salaries and Wages Expense, and so on. (Note that whenever we are referring to a specific account, we capitalize the name.)

In its simplest form, an account consists of three parts: (1) a title, (2) a left or debit side, and (3) a right or credit side. Because the format of an account resembles the letter T, we refer to it as a **T-account**. **Illustration 2.1** shows the basic form of an account.

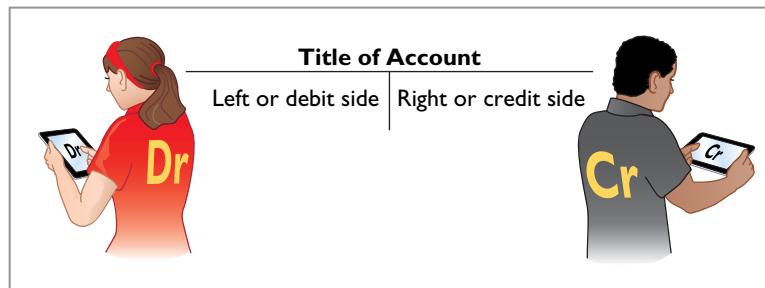

ILLUSTRATION 2.1

Basic form of account

We use this form often throughout this book to explain basic accounting relationships.

Debits and Credits

The term **debit** indicates the left side of an account, and **credit** indicates the right side. They are commonly abbreviated as **Dr.** for debit and **Cr.** for credit. They **do not** mean increase or decrease, as is commonly thought. We use the terms **debit** and **credit** repeatedly in the recording process to describe **where** entries are made in accounts. For example, the act of entering an amount on the left side of an account is called **debiting** the account. Making an entry on the right side is **crediting** the account.

When comparing the totals of the two sides, an account shows a **debit balance** if the total of the debit amounts exceeds the credits. An account shows a **credit balance** if the credit amounts exceed the debits. Note the position of the debit side and credit side in Illustration 2.1.

The procedure of recording debits and credits in an account is shown in **Illustration 2.2** for the transactions affecting the Cash account of Softbyte. The data are taken from the Cash column of the tabular summary in Illustration 1.8.

Tabular Summary		Account Form	
		Cash	
Cash		(Debits)	(Credits)
\$15,000		15,000	
-7,000		1,200	1,700
1,200		1,500	250
1,500		600	1,300
-1,700			
-250			
600			
-1,300			
\$ 8,050		Balance 8,050	
		(Debit)	

ILLUSTRATION 2.2

Tabular summary and account form for Softbyte's Cash account

Every positive item in the tabular summary represents a receipt of cash. Every negative amount represents a payment of cash. **Notice that in the account form, we record the increases in cash as debits and the decreases in cash as credits.** For example, the \$15,000 receipt of cash (in blue) is debited to Cash, and the -\$7,000 payment of cash (in red) is credited to Cash.

Having increases on one side and decreases on the other reduces recording errors and helps in determining the totals of each side of the account as well as the account balance. The balance is determined by netting the two sides (subtracting one amount from the other). The account balance, a debit of \$8,050, indicates that Softbyte had \$8,050 more increases than decreases in cash. In other words, Softbyte started with a balance of zero and now has \$8,050 in its Cash account.

Debit and Credit Procedure

INTERNATIONAL NOTE

Rules for accounting for specific events sometimes differ across countries. Despite the differences, the double-entry accounting system is the basis of accounting systems worldwide.

In Chapter 1, you learned the effect of a transaction on the basic accounting equation. Remember that each transaction must affect two or more accounts to keep the basic accounting equation in balance. In other words, for each transaction, debits must equal credits. The equality of debits and credits provides the basis for the **double-entry system** of recording transactions (see **International Note**).

Under the double-entry system, the dual (two-sided) effect of each transaction is recorded in appropriate accounts. This system provides a logical method for recording transactions and also helps ensure the accuracy of the recorded amounts as well as the detection of errors. If every transaction is recorded with equal debits and credits, the sum of all the debits to the accounts must equal the sum of all the credits.

The double-entry system for determining the equality of the accounting equation is much more efficient than the plus/minus procedure used in Chapter 1. The following discussion illustrates debit and credit procedures in the double-entry system.

Dr./Cr. Procedures for Assets and Liabilities

In Illustration 2.2 for Softbyte, increases in Cash—an asset—are entered on the left side, and decreases in Cash are entered on the right side. We know that both sides of the basic equation ($\text{Assets} = \text{Liabilities} + \text{Owner's Equity}$) must be equal. It therefore follows that increases and decreases in liabilities have to be recorded **opposite from** increases and decreases in assets. Thus, increases in liabilities are entered on the right or credit side, and decreases in liabilities are entered on the left or debit side. The effects that debits and credits have on assets and liabilities are summarized in **Illustration 2.3**.

ILLUSTRATION 2.3

Debit and credit effects—assets and liabilities

Debits	Credits
Increase assets	Decrease assets
Decrease liabilities	Increase liabilities

ILLUSTRATION 2.4

Normal balances—assets and liabilities

Asset accounts normally show debit balances. That is, debits to a specific asset account should exceed credits to that account. Likewise, **liability accounts normally show credit balances.** That is, credits to a liability account should exceed debits to that account. The **normal balance** of an account is on the side where an increase in the account is recorded. **Illustration 2.4** shows the normal balances for assets and liabilities.

Assets		Liabilities	
Debit for increase	Credit for decrease	Debit for decrease	Credit for increase
Normal balance			Normal balance

Knowing the normal balance in an account may help you trace errors. For example, a credit balance in an asset account such as Land or a debit balance in a liability account such as Salaries and Wages Payable usually indicates an error. Occasionally, though, an abnormal balance may be correct. The Cash account, for example, will have a credit balance when a company has overdrawn its bank balance by spending more than it has in its account.

Dr./Cr. Procedures for Owner's Equity

As Chapter 1 indicated, owner's investments and revenues increase owner's equity. Owner's drawings and expenses decrease owner's equity. Companies keep accounts for each of these types of transactions.

Owner's Capital. Investments by owners are credited to the Owner's Capital account. Credits increase this account, and debits decrease it. When an owner invests cash in the business, the company debits (increases) Cash and credits (increases) Owner's Capital. When the owner's investment in the business is reduced, Owner's Capital is debited (decreased).

Illustration 2.5 shows the rules of debit and credit for the Owner's Capital account.

Debits	Credits
Decrease Owner's Capital	Increase Owner's Capital

We can diagram the normal balance in Owner's Capital as shown in **Illustration 2.6**.

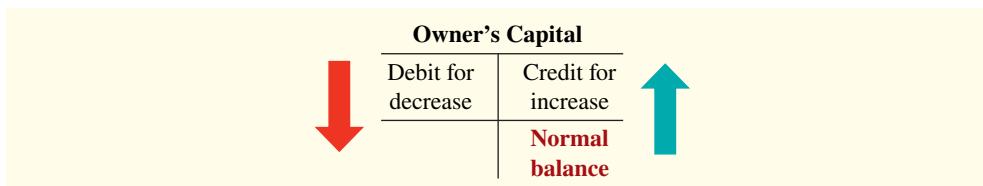

ILLUSTRATION 2.5

Debit and credit effects—Owner's Capital

ILLUSTRATION 2.6

Normal balance—Owner's Capital

Owner's Drawings. An owner may withdraw cash or other assets for personal use. Withdrawals could be debited directly to Owner's Capital to indicate a decrease in owner's equity. However, it is preferable to use a separate account, called Owner's Drawings. This separate account makes it easier to determine total withdrawals for each accounting period. Owner's Drawings is increased by debits and decreased by credits. Normally, the drawings account will have a debit balance.

Illustration 2.7 shows the rules of debit and credit for the Owner's Drawings account.

Debits	Credits
Increase Owner's Drawings	Decrease Owner's Drawings

We can diagram the normal balance as shown in **Illustration 2.8**.

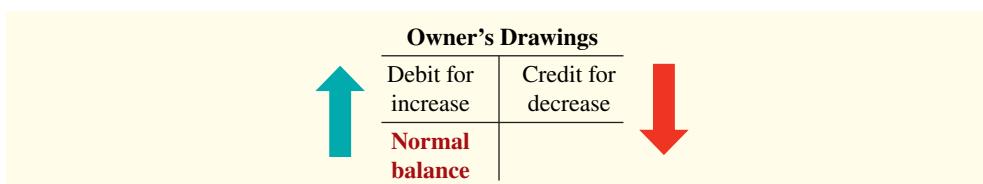

ILLUSTRATION 2.7

Debit and credit effects—Owner's Drawings

ILLUSTRATION 2.8

Normal balance—Owner's Drawings

The Owner's Drawings account decreases owner's equity. It is not an income statement account like revenues and expenses.

Revenues and Expenses. The purpose of earning revenues is to benefit the owner(s) of the business. When a company recognizes revenues, owner's equity increases. Therefore, the effect of debits and credits on revenue accounts is the same as their effect on Owner's Capital. That is, revenue accounts are increased by credits and decreased by debits (see **Helpful Hint**).

Expenses have the opposite effect. Expenses decrease owner's equity. Since expenses decrease net income and revenues increase it, it is logical that the increase and decrease sides of expense accounts should be the opposite of revenue accounts. Thus, expense accounts are increased by debits and decreased by credits. **Illustration 2.9** shows the rules of debits and credits for revenues and expenses.

HELPFUL HINT

Because revenues increase owner's equity, a revenue account has the same debit/credit rules as the Owner's Capital account. Expenses have the opposite effect.

ILLUSTRATION 2.9

Debit and credit effects—revenues and expenses

Debits

Decrease revenues
Increase expenses

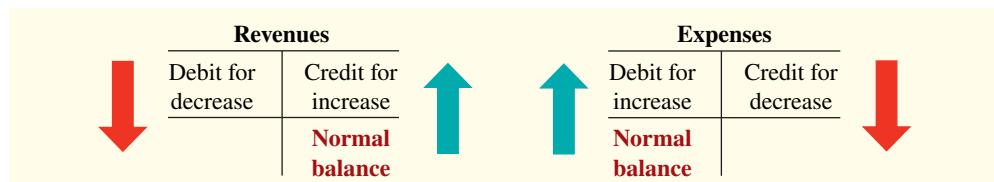

Credits

Increase revenues
Decrease expenses

Credits to revenue accounts should exceed debits. Debits to expense accounts should exceed credits. Thus, revenue accounts normally show credit balances, and expense accounts normally show debit balances. **Illustration 2.10** shows the normal balances for revenues and expenses.

ILLUSTRATION 2.10

Normal balances—revenues and expenses

Investor Insight Chicago Cubs

Jonathan Daniel/Getty Images, Inc.

Keeping Score

The **Chicago Cubs** baseball team probably has these major revenue and expense accounts:

Revenues

Admissions (ticket sales)
Concessions
Television and radio
Advertising

Expenses

Players' salaries
Administrative salaries
Travel
Ballpark maintenance

Do you think that the **Chicago Bears** football team would be likely to have the same major revenue and expense accounts as the Cubs? (Go to WileyPLUS for this answer and additional questions.)

HELPFUL HINT

You may want to bookmark Illustration 2.11. You probably will refer to it often.

Summary of Debit/Credit Rules

Illustration 2.11 shows a summary of the debit/credit rules and effects on each type of account. Study this diagram carefully. It will help you understand the fundamentals of the double-entry system (see **Helpful Hint**).

ILLUSTRATION 2.11 Summary of debit/credit rules

Basic Equation

$$\text{Assets} = \text{Liabilities} + \text{Owner's Equity}$$

Expanded Equation

$$\begin{array}{c} \text{Assets} = \text{Liabilities} + \text{Owner's Equity} \\ \\ \text{Assets} = \text{Liabilities} + \text{Owner's Capital} - \text{Owner's Drawings} + \text{Revenues} - \text{Expenses} \\ \text{Dr.} \quad \text{Cr.} \qquad \text{Dr.} \quad \text{Cr.} \qquad \text{Dr.} \quad \text{Cr.} \qquad \text{Dr.} \quad \text{Cr.} \end{array}$$

Debit / Credit Effects

DO IT! 1 | Normal Account Balances

Kate Browne has just rented space in a shopping mall. In this space, she will open a hair salon to be called “Hair It Is.” A friend has advised Kate to set up a double-entry set of accounting records in which to record all of her business transactions.

Identify the balance sheet accounts that Kate will likely need to record the transactions needed to open her business. Indicate whether the normal balance of each account is a debit or a credit.

Solution

Kate would likely need the following accounts in which to record the transactions necessary to ready her hair salon for opening day:

Cash (debit balance)	If she borrows money: Notes Payable
Equipment (debit balance)	(credit balance)
Supplies (debit balance)	Owner's Capital (credit balance)
Accounts Payable (credit balance)	

Related exercise material: BE2.1, BE2.2, DO IT! 2.1, E2.1, E2.2, and E2.4.

ACTION PLAN

- Determine the types of accounts needed. Kate will need asset accounts for each different type of asset she invests in the business and liability accounts for any debts she incurs.
- Understand the types of owner's equity accounts. Only Owner's Capital will be needed when Kate begins the business. Other owner's equity accounts will be needed later.

The Journal

LEARNING OBJECTIVE 2

Indicate how a journal is used in the recording process.

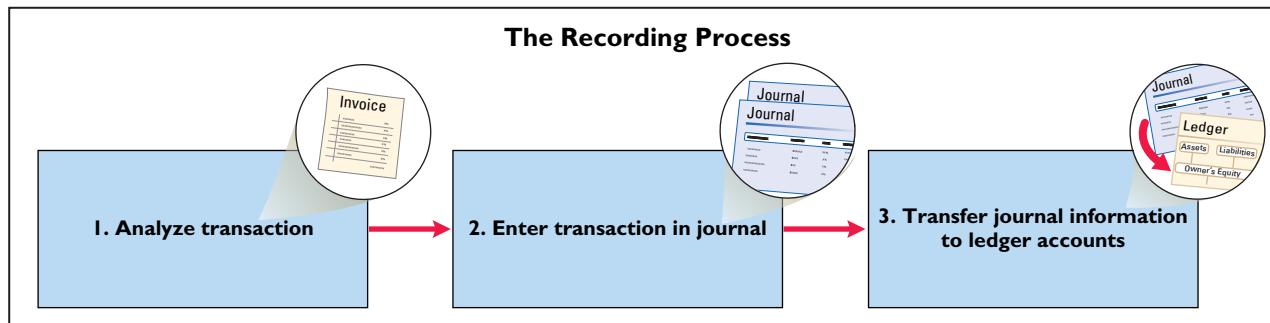

The Recording Process

Although it is possible to enter transaction information directly into the accounts, few businesses do so. Practically every business uses the basic steps shown in **Illustration 2.12** in the recording process (an integral part of the accounting cycle):

- Analyze each transaction in terms of its effect on the accounts.
- Enter the transaction information in a journal.
- Transfer the journal information to the appropriate accounts in the ledger.

ILLUSTRATION 2.12 The recording process

The steps in the recording process occur repeatedly. In Chapter 1, we illustrated the first step, the analysis of transactions, and will give further examples in this and later chapters. The other two steps in the recording process are explained in the next sections.

The Journal

Companies initially record transactions in chronological order (the order in which they occur). Thus, the **journal** is referred to as the book of original entry. For each transaction, the journal shows the debit and credit effects on specific accounts.

Companies may use various kinds of journals, but every company has the most basic form of journal, a **general journal**. Typically, a general journal has spaces for dates, account titles and explanations, references, and two amount columns. See the format of the journal in Illustration 2.13. *Whenever we use the term “journal” in this textbook, we mean the general journal unless we specify otherwise.*

The journal makes several significant contributions to the recording process:

1. It discloses in one place the **complete effects of a transaction**.
2. It provides a **chronological record** of transactions.
3. It helps to **prevent or locate errors** because the debit and credit amounts for each entry can be easily compared.

Journalizing

Entering transaction data in the journal is known as **journalizing**. Companies make separate journal entries for each transaction. A complete entry consists of (1) the date of the transaction, (2) the accounts and amounts to be debited and credited, and (3) a brief explanation of the transaction.

Illustration 2.13 shows the technique of journalizing, using the first two transactions of Softbyte. Recall that on September 1, Ray Neal invested \$15,000 cash in the business, and Softbyte purchased computer equipment for \$7,000 cash. The number J1 indicates that these two entries are recorded on the first page of the journal. **Illustration 2.13** shows the standard form of journal entries for these two transactions. (The boxed numbers correspond to explanations in the list below the illustration.)

ILLUSTRATION 2.13

Technique of journalizing

GENERAL JOURNAL				J1
Date	Account Titles and Explanation	Ref.	Debit	Credit
2020 Sept. 1 1	2 Cash 3 Owner's Capital 4 (Owner's investment of cash in business)	5	15,000	15,000
1	Equipment Cash (Purchase of equipment for cash)		7,000	7,000

- 1** The date of the transaction is entered in the Date column.
- 2** The debit account title (that is, the account to be debited) is entered first at the extreme left margin of the column headed “Account Titles and Explanation,” and the amount of the debit is recorded in the Debit column.
- 3** The credit account title (that is, the account to be credited) is indented and entered on the next line in the column headed “Account Titles and Explanation,” and the amount of the credit is recorded in the Credit column.
- 4** A brief explanation of the transaction appears on the line below the credit account title. A space is left between journal entries. The blank space separates individual journal entries and makes the entire journal easier to read.
- 5** The column titled Ref. (which stands for Reference) is left blank when the journal entry is made. This column is used later when the journal entries are transferred to the individual accounts.

It is important to use correct and specific account titles in journalizing. Erroneous account titles lead to incorrect financial statements. However, some flexibility exists initially in selecting account titles. The main criterion is that each title must appropriately describe the content of the account. Once a company chooses the specific title to use, it should record under that account title all later transactions involving the account. *In homework problems, you should use specific account titles when they are given.* When account titles are not given, you may select account titles that identify the nature and content of each account. The account titles used in journalizing should not contain explanations such as Cash Paid or Cash Received.

Simple and Compound Entries

Some entries involve only two accounts, one debit and one credit. (See, for example, the entries in Illustration 2.13.) This type of entry is called a **simple entry**. Some transactions, however, require more than two accounts in journalizing. An entry that requires three or more accounts is a **compound entry**. To illustrate, assume that on July 1, Butler Company purchases a delivery truck costing \$14,000. It pays \$8,000 cash now and agrees to pay the remaining \$6,000 on account (to be paid later). **Illustration 2.14** shows the compound entry.

GENERAL JOURNAL				J1
Date	Account Titles and Explanation	Ref.	Debit	Credit
2020 July 1	Equipment Cash Accounts Payable (Purchased truck for cash with balance on account)		14,000 8,000 6,000	

ILLUSTRATION 2.14
Compound journal entry

In a compound entry, the standard format requires that all debits be listed before the credits.

Accounting Across the Organization Hain Celestial Group

Keith Homan/
Shutterstock

It Starts with the Transaction

Recording financial transactions in a company's records should be straightforward. If a company determines that a transaction involves revenue, it records revenue. If it has an expense, then it records an expense. However, sometimes this is difficult to do. For example, for more than a year, **Hain Celestial Group** (an organic food company) did not provide income information to investors and regulators. The reason was that the company discovered revenue irregularities and said it could not release financial results until it determined when and how to record revenue for certain transactions.

When Hain missed four deadlines for reporting earnings information, the food company suffered a 34% drop in its stock price. As one analyst noted, it was hard to fathom why a seemingly simple revenue recognition issue took one year to resolve.

In other situations, outright fraud may occur. For example, regulators charged **Obsidian Energy** for fraudulently moving

millions of dollars in expenses from operating expenses to capital expenditure accounts. By understating reported operating expenses, Obsidian made it appear that it was efficiently managing its costs as well as increasing its income.

These examples demonstrate that “getting the basic transaction right” is the foundation for relevant and reliable financial statements. Starting with an incorrect or inappropriate transaction leads to distortions in the financial statements.

Sources: Shawn Tully, “The Mystery of Hain Celestial’s Accounting,” *Fortune.com* (August 20, 2016); and Kelly Cryderman, “U.S. Charges Obsidian, Formerly Penn West, with Accounting Fraud,” *The Globe and Mail* (June 28, 2017).

Why is it important for companies to record financial transactions completely and accurately? (Go to WileyPLUS for this answer and additional questions.)

DO IT! 2 | Recording Business Activities

Kate Browne engaged in the following activities in establishing her salon, Hair It Is:

1. Opened a bank account in the name of Hair It Is and deposited \$20,000 of her own money in this account as her initial investment.
2. Purchased equipment on account (to be paid in 30 days) for a total cost of \$4,800.
3. Interviewed three people for the position of hair stylist.

Prepare the journal entries to record the transactions.

Solution

The three activities would be recorded as follows.

1. Cash		20,000		20,000
	Owner's Capital (Owner's investment of cash in business)			
2. Equipment		4,800		4,800
	Accounts Payable (Purchase of equipment on account)			

3. No entry because no transaction has occurred.

Related exercise material: **BE2.3, BE2.4, BE2.5, BE2.6, DO IT! 2.2, E2.3, E2.5, E2.6, E2.7, E2.8, and E2.9.**

ACTION PLAN

- Understand which activities need to be recorded and which do not. Any that affect assets, liabilities, or owner's equity should be recorded in a journal.
- Analyze the effects of transactions on asset, liability, and owner's equity accounts.

The Ledger and Posting

LEARNING OBJECTIVE 3

Explain how a ledger and posting help in the recording process.

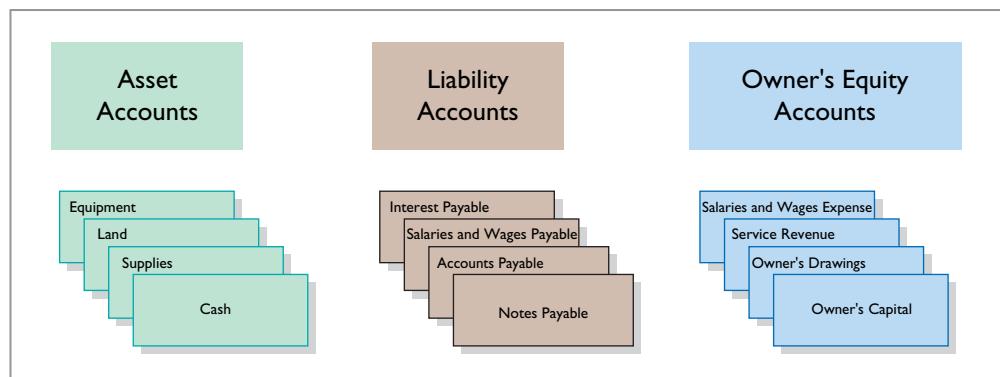

The Ledger

The entire group of accounts maintained by a company is the **ledger**. The ledger provides the balance in each of the accounts as well as keeps track of changes in these balances.

Companies may use various kinds of ledgers, but every company has a general ledger. A **general ledger** contains all the asset, liability, and owner's equity accounts, as shown in **Illustration 2.15**. Whenever we use the term "ledger" in this textbook, we are referring to the general ledger unless we specify otherwise.

ILLUSTRATION 2.15

The general ledger, which contains all of a company's accounts

Companies arrange the ledger in the sequence in which they present the accounts in the financial statements, beginning with the balance sheet accounts. First in order are the asset accounts, followed by liability accounts, owner's capital, owner's drawings, revenues, and expenses. Each account is numbered for easier identification.

The ledger provides the balance in each of the accounts. For example, the Cash account shows the amount of cash available to meet current obligations. The Accounts Receivable account shows amounts due from customers. Accounts Payable shows amounts owed to creditors.

A Convenient Overstatement

Sometimes a company's investment securities suffer a permanent decline in value below their original cost. When this occurs, the company is supposed to reduce the recorded value of the securities on its balance sheet ("write them down" in common financial lingo) and record a loss. It appears, however, that during the financial crisis of 2008, employees at some financial institutions chose to look the other way as the value of their investments skidded.

A number of Wall Street traders that worked for the investment bank **Credit Suisse Group** were charged with intentionally overstating the value of securities that had suffered declines of approximately \$2.85 billion. One reason that they may have been reluctant to record the losses is out of fear that the company's shareholders and clients would panic if they saw the magnitude of the losses. However, personal self-interest might have been equally to blame—the bonuses of the traders were tied to the value of the investment securities.

Source: S. Pulliam, J. Eaglesham, and M. Siconolfi, "U.S. Plans Changes on Bond Fraud," *Wall Street Journal Online* (February 1, 2012).

What incentives might employees have had to overstate the value of these investment securities on the company's financial statements? (Go to WileyPLUS for this answer and additional questions.)

Standard Form of Account

The simple T-account form used in accounting textbooks is often very useful for illustration purposes. However, in practice, the account forms used in ledgers are much more structured.

Illustration 2.16 shows a typical form, using assumed data from a cash account.

		CASH		NO. 101		
Date	Explanation	Ref.	Debit	Credit	Balance	
2020						
June 1			25,000		25,000	
2				8,000	17,000	
3			4,200		21,200	
9			7,500		28,700	
17				11,700	17,000	
20				250	16,750	
30				7,300	9,450	

ILLUSTRATION 2.16

Three-column form of account

This format is called the **three-column form of account**. It has three money columns—debit, credit, and balance. The balance in the account is determined after each transaction. Companies use the explanation space and reference columns to provide special information about the transaction.

Posting

The procedure of transferring journal entries to the ledger accounts is called **posting**. This phase of the recording process accumulates the effects of journalized transactions into the individual accounts. Posting involves the following steps.

1. In the **ledger**, in the appropriate columns of the account(s) debited, enter the date, journal page, and debit amount shown in the journal.
2. In the reference column of the **journal**, write the account number to which the debit amount was posted.
3. In the **ledger**, in the appropriate columns of the account(s) credited, enter the date, journal page, and credit amount shown in the journal.
4. In the reference column of the **journal**, write the account number to which the credit amount was posted.

Illustration 2.17 shows these four steps using Softbyte's first journal entry. The boxed numbers indicate the sequence of the steps.

ILLUSTRATION 2.17

Posting a journal entry

GENERAL JOURNAL					J1
Date	Account Titles and Explanation	Ref.	Debit	Credit	
2020 Sept.1	Cash Owner's Capital (Owner's investment of cash in business)	101 301	15,000	15,000	

GENERAL LEDGER					
Cash					No.101
Date	Explanation	Ref.	Debit	Credit	Balance
2020 Sept.1		J1	15,000		15,000

Owner's Capital					No.301
Date	Explanation	Ref.	Debit	Credit	Balance
2020 Sept.1		J1		15,000	15,000

Key:

- 1** Post to debit account—date, journal page number, and amount.
- 2** Enter debit account number in journal reference column.
- 3** Post to credit account—date, journal page number, and amount.
- 4** Enter credit account number in journal reference column.

Posting should be performed in chronological order. That is, the company should post all the debits and credits of one journal entry before proceeding to the next journal entry. Postings should be made on a timely basis to ensure that the ledger is up-to-date. *In homework problems, you can journalize all transactions before posting any of the journal entries.*

The reference column of a ledger account indicates the journal page from which the transaction was posted. (After the last entry has been posted, the accountant should scan the reference column **in the journal**, to confirm that all postings have been made.) The explanation space of the ledger account is used infrequently because an explanation already appears in the journal.

Chart of Accounts

The number and type of accounts differ for each company. The number of accounts depends on the amount of detail management desires. For example, the management of one company may want a single account for all types of utility expense. Another may keep separate expense accounts for each type of utility, such as gas, electricity, and water. Similarly, a small company like Softbyte will have fewer accounts than a corporate giant like **Dell**. Softbyte may be able to manage and report its activities in 20 to 30 accounts, while Dell may require thousands of accounts to keep track of its worldwide activities.

Most companies have a **chart of accounts**. This chart lists the accounts and the account numbers that identify their location in the ledger. The numbering system that identifies the accounts usually starts with the balance sheet accounts and follows with the income statement accounts.

In this and the next two chapters, we explain the accounting for Pioneer Advertising (a service company). Accounts 101–199 indicate asset accounts; 200–299 indicate liabilities; 301–350 indicate owner's equity accounts; 400–499, revenues; 601–799, expenses; 800–899, other revenues; and 900–999, other expenses. **Illustration 2.18** shows Pioneer's chart of accounts. Accounts listed in red are used in this chapter; accounts shown in black are explained in later chapters.

Pioneer Advertising	
Chart of Accounts	
Assets	Owner's Equity
101 Cash	301 Owner's Capital
112 Accounts Receivable	306 Owner's Drawings
126 Supplies	350 Income Summary
130 Prepaid Insurance	
157 Equipment	
158 Accumulated Depreciation—Equipment	
	Revenues
	400 Service Revenue
Liabilities	Expenses
200 Notes Payable	631 Supplies Expense
201 Accounts Payable	711 Depreciation Expense
209 Unearned Service Revenue	722 Insurance Expense
212 Salaries and Wages Payable	726 Salaries and Wages Expense
230 Interest Payable	729 Rent Expense
	732 Utilities Expense
	905 Interest Expense

ILLUSTRATION 2.18

Chart of accounts

You will notice that there are gaps in the numbering system of the chart of accounts for Pioneer. Companies leave gaps to permit the insertion of new accounts as needed during the life of the business.

The Recording Process Illustrated

Illustrations 2.19 through **2.28** show the basic steps in the recording process, using the October transactions of Pioneer Advertising (see **Helpful Hint**). Pioneer's accounting period is a month. In these illustrations, a basic analysis, an equation analysis, and a debit-credit analysis precede the journal entry and posting of each transaction. For simplicity, we use the T-account form to show the posting instead of the standard account form.

Study these transaction analyses carefully. **The purpose of transaction analysis is first to identify the type of account involved, and then to determine whether to make a debit**

HELPFUL HINT

The Accounting Cycle Tutorial in WileyPLUS provides an interactive presentation of the accounting cycle using these transaction analyses.

or a credit to the account. You should always perform this type of analysis before preparing a journal entry. Doing so will help you understand the journal entries discussed in this chapter as well as more complex journal entries in later chapters (see **Helpful Hint**).

ILLUSTRATION 2.19

Investment of cash by owner

Cash flow analyses show the impact of each transaction on cash.

Cash Flows
+\$10,000

HELPFUL HINT

Follow these steps:

1. Determine what type of account is involved.
2. Determine what items increased or decreased and by how much.
3. Translate the increases and decreases into debits and credits.

Transaction

On October 1, C. R. Byrd invests \$10,000 cash in an advertising company called Pioneer Advertising.

Basic Analysis

The asset Cash increases \$10,000; owner's equity (specifically, Owner's Capital) increases \$10,000.

Equation Analysis

$$\begin{array}{c} \text{Assets} = \text{Liabilities} + \text{Owner's Equity} \\ \hline \text{Cash} = \\ +\$10,000 \end{array}$$

Owner's Capital
+\$10,000

Debit–Credit Analysis

Debits increase assets: debit Cash \$10,000.
Credits increase owner's equity: credit Owner's Capital \$10,000.

Journal Entry

Oct. 1	Cash Owner's Capital (Owner's investment of cash in business)	101 301	10,000	10,000
--------	--	------------	--------	--------

Posting

Oct. 1	10,000				Oct. 1 10,000

ILLUSTRATION 2.20

Purchase of office equipment

Cash Flows
no effect

Transaction

On October 1, Pioneer purchases office equipment costing \$5,000 by signing a 3-month, 12%, \$5,000 note payable.

Basic Analysis

The asset Equipment increases \$5,000;
the liability Notes Payable increases \$5,000.

Equation Analysis

$$\begin{array}{c} \text{Assets} = \text{Liabilities} + \text{Owner's Equity} \\ \hline \text{Equipment} = \\ +\$5,000 \end{array}$$

Notes Payable
+\$5,000

Debit–Credit Analysis

Debits increase assets: debit Equipment \$5,000.
Credits increase liabilities: credit Notes Payable \$5,000.

Journal Entry

Oct. 1	Equipment Notes Payable (Issued 3-month, 12% note for office equipment)	157 200	5,000	5,000
--------	--	------------	-------	-------

Posting

Equipment		157	Notes Payable		200
Oct. 1	5,000				Oct. 1 5,000

Transaction**Basic Analysis**

On October 2, Pioneer receives a \$1,200 cash advance from R. Knox, a client, for advertising services that are expected to be completed by December 31.

The asset Cash increases \$1,200; the liability Unearned Service Revenue increases \$1,200 because the service has not been performed yet. That is, when Pioneer receives an advance payment, it should record an unearned revenue (a liability) in order to recognize the obligation that exists.

Equation Analysis

$$\begin{array}{rcl} \text{Assets} & = & \text{Liabilities} + \text{Owner's Equity} \\ \text{Cash} & = & \text{Unearned Service Revenue} \\ +\$1,200 & & +\$1,200 \end{array}$$

Debit–Credit Analysis

Debits increase assets: debit Cash \$1,200.
Credits increase liabilities: credit Unearned Service Revenue \$1,200.

Journal Entry

Oct. 2	Cash Unearned Service Revenue (Received cash from R. Knox for future services)	101 209	1,200	1,200
--------	---	------------	-------	-------

Posting

Oct. 1	10,000			
2	1,200			Oct. 2 1,200

ILLUSTRATION 2.21**Receipt of cash for future service**

Many liabilities have the word “payable” in their title. But, note that Unearned Service Revenue is considered a liability even though the word *payable* is not used.

Cash Flows

+1,200

**Transaction****Basic Analysis**

On October 3, Pioneer pays office rent for October in cash, \$900.

The expense account Rent Expense increases \$900 because the payment pertains only to the current month; the asset Cash decreases \$900.

$$\begin{array}{rcl} \text{Assets} & = & \text{Liabilities} + \text{Owner's Equity} \\ \text{Cash} & = & \text{Rent} \\ -\$900 & & \text{Expense} \\ & & -\$900 \end{array}$$

Equation Analysis

Debits increase expenses: debit Rent Expense \$900.
Credits decrease assets: credit Cash \$900.

Debit–Credit Analysis

Oct. 3	Rent Expense Cash (Paid cash for October office rent)	729 101	900	900
--------	---	------------	-----	-----

Journal Entry

	Cash	101	Rent Expense	729
Oct. 1	10,000			
2	1,200	Oct. 3 900	Oct. 3 900	

Posting**ILLUSTRATION 2.22****Payment of monthly rent****Cash Flows**

-900

ILLUSTRATION 2.23**Payment for insurance**

Cash Flows  **-\$600**

Transaction

On October 4, Pioneer pays \$600 for a one-year insurance policy that will expire next year on September 30.

Basic Analysis

The asset Prepaid Insurance increases \$600 because the payment extends to more than the current month; the asset Cash decreases \$600. Payments of expenses that will benefit more than one accounting period are prepaid expenses or prepayments. When a company makes a payment, it debits an asset account in order to show the service or benefit that will be received in the future.

Equation Analysis

$$\begin{array}{c} \text{Assets} \\ \hline \text{Cash} & + & \text{Prepaid} \\ \hline -\$600 & & +\$600 \end{array} = \begin{array}{c} \text{Liabilities} \\ + \end{array} \begin{array}{c} \text{Owner's Equity} \end{array}$$

Debit–Credit Analysis

Debits increase assets: debit Prepaid Insurance \$600. Credits decrease assets: credit Cash \$600.

Journal Entry

Oct. 4	Prepaid Insurance		130	600	600
	Cash	(Paid one-year policy; effective date October 1)	101		

Posting

ILLUSTRATION 2.24**Purchase of supplies on credit**

Cash Flows
no effect

Transaction

On October 5, Pioneer purchases an estimated 3-month supply of advertising materials on account from Aero Supply for \$2,500.

Basic Analysis

The asset Supplies increases \$2,500; the liability Accounts Payable increases \$2,500.

Equation Analysis

$$\begin{array}{c} \text{Assets} \\ \hline \text{Supplies} \\ \hline +\$2,500 \end{array} = \begin{array}{c} \text{Liabilities} \\ \hline \text{Accounts} \\ \hline \text{Payable} \\ \hline +\$2,500 \end{array} + \begin{array}{c} \text{Owner's Equity} \end{array}$$

Debit–Credit Analysis

Debits increase assets: debit Supplies \$2,500. Credits increase liabilities: credit Accounts Payable \$2,500.

Journal Entry

Oct. 5	Supplies		126	2,500	2,500
	Accounts Payable	(Purchased supplies on account from Aero Supply)	201		

Posting

Supplies	126	Accounts Payable	201
Oct. 5	2,500		Oct. 5 2,500

Event

On October 9, Pioneer hires four employees to begin work on October 15. Each employee is to receive a weekly salary of \$500 for a 5-day work week, payable every 2 weeks—first payment made on October 26.

Basic Analysis

A business transaction has not occurred. There is only an agreement between the employer and the employees to enter into a business transaction beginning on October 15. Thus, a debit–credit analysis is not needed because there is no accounting entry (see October 26 transaction for first entry).

ILLUSTRATION 2.25**Hiring of employees****Cash Flows
no effect****Transaction**

On October 20, C. R. Byrd withdraws \$500 cash for personal use.

Basic Analysis

The owner's equity account Owner's Drawings increases \$500; the asset Cash decreases \$500.

$$\begin{array}{rcl} \text{Assets} & = & \text{Liabilities} + \text{Owner's Equity} \\ \text{Cash} & = & \text{Owner's} \\ -\$500 & & \text{Drawings} \\ & & -\$500 \end{array}$$

DO IT! 3 | Posting

Kate Browne recorded the following transactions in a general journal during the month of March.

Mar. 4	Cash		2,280		
	Service Revenue			2,280	
15	Salaries and Wages Expense		400		
	Cash			400	
19	Utilities Expense		92		
	Cash			92	

Post these entries to the Cash account of the general ledger to determine its ending balance. The beginning balance of Cash on March 1 was \$600.

Solution

Cash			
3/1 Bal.	600	3/15	400
3/4	2,280	3/19	92
3/31 Bal.	2,388		

Related exercise material: **BE2.7, BE2.8, DO IT! 2.3, E2.11, and E2.14.**

ACTION PLAN

- Recall that posting involves transferring the journalized debits and credits to specific accounts in the ledger.
- Determine the ending balance by netting the total debits and credits.

The Trial Balance

LEARNING OBJECTIVE 4

Prepare a trial balance.

A **trial balance** is a list of accounts and their balances at a given time. Companies usually prepare a trial balance at the end of an accounting period. They list accounts in the order in which they appear in the ledger. Debit balances appear in the left column and credit balances in the right column. The totals of the two columns must equal.

The trial balance proves the mathematical equality of debits and credits after posting. Under the double-entry system, this equality occurs when the sum of the debit account balances equals the sum of the credit account balances. A trial balance may also uncover errors in journalizing and posting. For example, a trial balance may well have detected the error at **MF Global** discussed in the Feature Story. In addition, a trial balance is useful in the preparation of financial statements, as we will explain in the next two chapters.

The steps for preparing a trial balance are:

1. List the account titles and their balances in the appropriate debit or credit column.
2. Total the debit and credit columns.
3. Verify the equality of the two columns.

Illustration 2.31 shows the trial balance prepared from Pioneer Advertising's ledger. Note that the total debits equal the total credits.

Pioneer Advertising

Trial Balance

October 31, 2020

	<u>Debit</u>	<u>Credit</u>
Cash	\$15,200	
Supplies	2,500	
Prepaid Insurance	600	
Equipment	5,000	
Notes Payable		\$ 5,000
Accounts Payable		2,500
Unearned Service Revenue		1,200
Owner's Capital		10,000
Owner's Drawings	500	
Service Revenue		10,000
Salaries and Wages Expense	4,000	
Rent Expense	900	
	<u>\$28,700</u>	<u>\$28,700</u>

ILLUSTRATION 2.31

A Trial balance

Note that the order of presentation in the trial balance is:

Assets
Liabilities
Owner's equity
Revenues
Expenses

A trial balance is a necessary checkpoint for uncovering certain types of errors. For example, if only the debit portion of a journal entry has been posted, the trial balance would bring this error to light.

Limitations of a Trial Balance

ETHICS NOTE

An **error** is the result of an unintentional mistake; it is neither ethical nor unethical. An **irregularity** is an intentional misstatement, which is viewed as unethical.

A trial balance does not guarantee freedom from recording errors, however (see **Ethics Note**). Numerous errors may exist even though the totals of the trial balance columns agree. For example, the trial balance may balance even when:

1. A transaction is not journalized.
2. A correct journal entry is not posted.
3. A journal entry is posted twice.
4. Incorrect accounts are used in journalizing or posting.
5. Offsetting errors are made in recording the amount of a transaction.

As long as equal debits and credits are posted, even to the wrong account or in the wrong amount, the total debits will equal the total credits. **The trial balance does not prove that the company has recorded all transactions or that the ledger is correct.**

Locating Errors

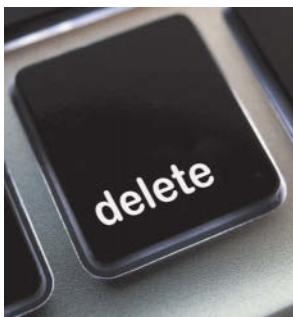

Errors in a trial balance generally result from mathematical mistakes, incorrect postings, or simply transcribing data incorrectly. What do you do if you are faced with a trial balance that does not balance? First, determine the amount of the difference between the two columns of the trial balance. After this amount is known, the following steps are often helpful:

1. If the error is \$1, \$10, \$100, or \$1,000, re-add the trial balance columns and recompute the account balances.
2. If the error is divisible by 2, scan the trial balance to see whether a balance equal to half the error has been entered in the wrong column.
3. If the error is divisible by 9, retrace the account balances on the trial balance to see whether they are incorrectly copied from the ledger. For example, if a balance was \$12 and it was listed as \$21, a \$9 error has been made. Reversing the order of numbers is called a **transposition error**.
4. If the error is not divisible by 2 or 9, scan the ledger to see whether an account balance in the amount of the error has been omitted from the trial balance, and scan the journal to see whether a posting of that amount has been omitted.

Dollar Signs and Underlining

Note that dollar signs do not appear in journals or ledgers. Dollar signs are typically used only in the trial balance and the financial statements. Generally, a dollar sign is shown only for the first item in the column and for the total of that column. A single line (a totaling rule) is placed under the column of figures to be added or subtracted. Total amounts are double-underlined to indicate they are final sums.

Investor Insight Fannie Mae

Enviromatic/iStockphoto

Why Accuracy Matters

While most companies record transactions very carefully, the reality is that mistakes still happen. For example, bank regulators fined **Bank One Corporation** (now **Chase**) \$1.8 million because they felt that the unreliability of the bank's accounting system caused it to violate regulatory requirements.

Also, in recent years **Fannie Mae**, the government-chartered mortgage association, announced a series of large accounting errors. These announcements caused alarm among investors, regulators, and politicians because they fear that the errors may suggest larger, undetected problems. This is important because

the home-mortgage market depends on Fannie Mae to buy hundreds of billions of dollars of mortgages each year from banks, thus enabling the banks to issue new mortgages.

Finally, before a major overhaul of its accounting system, the financial records of **Waste Management Inc.** were in such disarray that of the company's 57,000 employees, 10,000 were receiving pay slips that were in error.

The Sarbanes-Oxley Act was created to minimize the occurrence of errors like these by increasing every employee's responsibility for accurate financial reporting.

In order for these companies to prepare and issue financial statements, their accounting equations (debits and credits) must have been in balance at year-end. How could these errors or misstatements have occurred? (Go to WileyPLUS for this answer and additional questions.)

DO IT! 4 | Trial Balance

The following accounts come from the ledger of SnowGo Company at December 31, 2020.

157 Equipment	\$88,000	301 Owner's Capital	\$20,000
306 Owner's Drawings	8,000	212 Salaries and Wages Payable	2,000
201 Accounts Payable	22,000	200 Notes Payable (due in 3 months)	19,000
726 Salaries and Wages Expense	42,000	732 Utilities Expense	3,000
112 Accounts Receivable	4,000	130 Prepaid Insurance	6,000
400 Service Revenue	95,000	101 Cash	7,000

Prepare a trial balance in good form.

ACTION PLAN

- Determine normal balances and list accounts in the order they appear in the ledger.
- Accounts with debit balances appear in the left column, and those with credit balances in the right column.
- Total the debit and credit columns to prove equality.

Solution

SnowGo Company Trial Balance December 31, 2020

	<u>Debit</u>	<u>Credit</u>
Cash	\$ 7,000	
Accounts Receivable	4,000	
Prepaid Insurance	6,000	
Equipment	88,000	
Notes Payable		\$ 19,000
Accounts Payable		22,000
Salaries and Wages Payable		2,000
Owner's Capital		20,000
Owner's Drawings	8,000	
Service Revenue		95,000
Utilities Expense	3,000	
Salaries and Wages Expense	42,000	
	<u><u>\$158,000</u></u>	<u><u>\$158,000</u></u>

Review and Practice

Learning Objectives Review

1 Describe how accounts, debits, and credits are used to record business transactions.

An account is a record of increases and decreases in specific asset, liability, and owner's equity items. The terms debit and credit are synonymous with left and right. Assets, drawings, and expenses are increased by debits and decreased by credits. Liabilities, owner's capital, and revenues are increased by credits and decreased by debits.

2 Indicate how a journal is used in the recording process.

The basic steps in the recording process are (a) analyze each transaction for its effects on the accounts, (b) enter the transaction information in a journal, and (c) transfer the journal information to the appropriate accounts in the ledger.

The initial accounting record of a transaction is entered in a journal before the data are entered in the accounts. A journal (a) discloses in one place the complete effects of a transaction, (b) provides a chronological record of transactions, and (c) prevents

or locates errors because the debit and credit amounts for each entry can be easily compared.

3 Explain how a ledger and posting help in the recording process.

The ledger is the entire group of accounts maintained by a company. The ledger provides the balance in each of the accounts as well as keeps track of changes in these balances. Posting is the transfer of journal entries to the ledger accounts. This phase of the recording process accumulates the effects of journalized transactions in the individual accounts.

4 Prepare a trial balance.

A trial balance is a list of accounts and their balances at a given time. Its primary purpose is to prove the equality of debits and credits after posting. A trial balance also uncovers errors in journalizing and posting and is useful in preparing financial statements.

Glossary Review

Account A record of increases and decreases in specific asset, liability, or owner's equity items. (p. 2-2).

Chart of accounts A list of accounts and the account numbers that identify their location in the ledger. (p. 2-13).

Compound entry A journal entry that involves three or more accounts. (p. 2-9).

Credit The right side of an account. (p. 2-3).

Debit The left side of an account. (p. 2-3).

Double-entry system A system that records in appropriate accounts the dual effect of each transaction. (p. 2-4).

General journal The most basic form of journal. (p. 2-8).

General ledger A ledger that contains all asset, liability, and owner's equity accounts. (p. 2-10).

Journal An accounting record in which transactions are initially recorded in chronological order. (p. 2-8).

Journalizing The entering of transaction data in the journal. (p. 2-8).

Ledger The entire group of accounts maintained by a company. (p. 2-10).

Normal balance An account balance on the side where an increase in the account is recorded. (p. 2-4).

Posting The procedure of transferring journal entries to the ledger accounts. (p. 2-12).

Simple entry A journal entry that involves only two accounts. (p. 2-9).

T-account The basic form of an account, consisting of (1) a title, (2) a left or debit side, and (3) a right or credit side. (p. 2-3).

Three-column form of account A form with columns for debit, credit, and balance amounts in an account. (p. 2-11).

Trial balance A list of accounts and their balances at a given time. (p. 2-21).

Practice Multiple-Choice Questions

1. (LO 1) Which of the following statements about an account is true?

- a. The right side of an account is the debit, or increase, side.
- b. An account is an individual accounting record of increases and decreases in specific asset, liability, and owner's equity items.

c. There are separate accounts for specific assets and liabilities but only one account for owner's equity items.

d. The left side of an account is the credit, or decrease, side.

- 2. (LO 1) Debits:**
- increase both assets and liabilities.
 - decrease both assets and liabilities.
 - increase assets and decrease liabilities.
 - decrease assets and increase liabilities.
- 3. (LO 1) A revenue account:**
- is increased by debits.
 - is decreased by credits.
 - has a normal balance of a debit.
 - is increased by credits.
- 4. (LO 1) Accounts that normally have debit balances are:**
- assets, expenses, and revenues.
 - assets, expenses, and owner's capital.
 - assets, liabilities, and owner's drawings.
 - assets, owner's drawings, and expenses.
- 5. (LO 1) The expanded accounting equation is:**
- Assets + Liabilities = Owner's Capital + Owner's Drawings + Revenues + Expenses.
 - Assets = Liabilities + Owner's Capital + Owner's Drawings + Revenues - Expenses.
 - Assets = Liabilities - Owner's Capital - Owner's Drawings - Revenues - Expenses.
 - Assets = Liabilities + Owner's Capital - Owner's Drawings + Revenues - Expenses.
- 6. (LO 2) Which of the following is **not** part of the recording process?**
- Analyzing transactions.
 - Preparing an income statement.
 - Entering transactions in a journal.
 - Posting journal entries.
- 7. (LO 2) Which of the following statements about a journal is **false**?**
- It is not a book of original entry.
 - It provides a chronological record of transactions.
 - It helps to locate errors because the debit and credit amounts for each entry can be readily compared.
 - It discloses in one place the complete effect of a transaction.
- 8. (LO 2) The purchase of supplies on account should result in:**
- a debit to Supplies Expense and a credit to Cash.
 - a debit to Supplies Expense and a credit to Accounts Payable.
 - a debit to Supplies and a credit to Accounts Payable.
 - a debit to Supplies and a credit to Accounts Receivable.
- 9. (LO 3) The order of the accounts in the ledger is:**
- assets, revenues, expenses, liabilities, owner's capital, owner's drawings.
 - assets, liabilities, owner's capital, owner's drawings, revenues, expenses.
 - owner's capital, assets, revenues, expenses, liabilities, owner's drawings.
 - revenues, assets, expenses, liabilities, owner's capital, owner's drawings.
- 10. (LO 3) A ledger:**
- contains only asset and liability accounts.
 - should show accounts in alphabetical order.
 - is a collection of the entire group of accounts maintained by a company.
 - is a book of original entry.
- 11. (LO 3) Posting:**
- normally occurs before journalizing.
 - transfers ledger transaction data to the journal.
 - is an optional step in the recording process.
 - transfers journal entries to ledger accounts.
- 12. (LO 3) Before posting a payment of \$5,000, the Accounts Payable of Senator Company had a normal balance of \$16,000. The balance after posting this transaction was:**
- \$21,000.
 - \$5,000.
 - \$11,000.
 - Cannot be determined.
- 13. (LO 4) A trial balance:**
- is a list of accounts with their balances at a given time.
 - proves the journalized transactions are correct.
 - will not balance if a correct journal entry is posted twice.
 - proves that all transactions have been recorded.
- 14. (LO 4) A trial balance will not balance if:**
- a correct journal entry is posted twice.
 - the purchase of supplies on account is debited to Supplies and credited to Cash.
 - a \$100 cash drawing by the owner is debited to Owner's Drawings for \$1,000 and credited to Cash for \$100.
 - a \$450 payment on account is debited to Accounts Payable for \$45 and credited to Cash for \$45.
- 15. (LO 4) The trial balance of Jeong Company had accounts with the following normal balances: Cash \$5,000, Service Revenue \$85,000, Salaries and Wages Payable \$4,000, Salaries and Wages Expense \$40,000, Rent Expense \$10,000, Owner's Capital \$42,000, Owner's Drawings \$15,000, and Equipment \$61,000. In preparing a trial balance, the total in the debit column is:**
- \$131,000.
 - \$216,000.
 - \$91,000.
 - \$116,000.

Solutions

- 1. b.** An account is an individual accounting record of increases and decreases in specific asset, liability, and owner's equity items. The other choices are incorrect because (a) the right side of the account is the credit side, not the debit side, and can be either the increase or

the decrease side, depending on the specific classification account; (c) there are also separate accounts for different owner's equity items; and (d) the left side of the account is the debit side, not the credit side, and can be either the decrease or the increase side, depending on the specific classification account.

- 2. c.** Debits increase assets but they decrease liabilities. The other choices are incorrect because debits (a) decrease, not increase, liabilities; (b) increase, not decrease, assets; and (d) increase, not decrease, assets and decrease, not increase, liabilities.
- 3. d.** A revenue account is increased by credits. The other choices are incorrect because a revenue account (a) is increased by credits, not debits; (b) is decreased by debits, not credits; and (c) has a normal balance of a credit, not a debit.
- 4. d.** Assets, owner's drawings, and expenses all have normal debit balances. The other choices are incorrect because (a) revenues have normal credit balances, (b) owner's capital has a normal credit balance, and (c) liabilities have normal credit balances.
- 5. d.** The expanded accounting equation is Assets = Liabilities + Owner's Capital – Owner's Drawings + Revenue – Expenses. The other choices are incorrect because (a) both Owner's Drawings and Expenses must be subtracted, not added, and Liabilities should be added to the right side of equation, not to the left side; (b) Owner's Drawings must be subtracted, not added; and (c) Owner's Capital and Revenues must be added, not subtracted.
- 6. b.** Preparing an income statement is not part of the recording process. Choices (a) analyzing transactions, (c) entering transactions in a journal, and (d) posting journal entries are all part of the recording process.
- 7. a.** The journal is a book of original entry. The other choices are all true statements.
- 8. c.** The purchase of supplies on account results in a debit to Supplies and a credit to Accounts Payable. The other choices are incorrect because the purchase of supplies on account results in (a) a debit to Supplies, not Supplies Expense, and a credit to Accounts Payable, not Cash; (b) a debit to Supplies, not Supplies Expense; and (d) a credit to Accounts Payable, not Accounts Receivable.
- 9. b.** The correct order of the accounts in the ledger is assets, liabilities, owner's capital, owner's drawing, revenues, expenses. The other choices are incorrect because they do not reflect this order. The order of the accounts in the ledger is (1) balance sheet accounts: assets, liabilities, and owner's equity accounts (owner's capital and owner's drawings); and then (2) income statement accounts: revenues and expenses.
- 10. c.** A ledger is a collection of all the accounts maintained by a company. The other choices are incorrect because a ledger (a) contains all account types—assets, liabilities, and owner's equity—not just assets and liability accounts; (b) usually shows accounts in account number order, not alphabetical order; and (d) is not a book of original entry because entries made in the ledger come from the journals (the books of original entry).
- 11. d.** Posting transfers journal entries to ledger accounts. The other choices are incorrect because posting (a) occurs after journalizing, (b) transfers journal transaction data to the ledger; and (c) is not an optional step in the recording process.
- 12. c.** The balance is \$11,000 (\$16,000 normal balance – \$5,000 payment), not (a) \$21,000 or (b) \$5,000. Choice (d) is incorrect because the balance can be determined.
- 13. a.** A trial balance is a list of accounts with their balances at a given time. The other choices are incorrect because (b) the trial balance does not prove that journalized transactions are mathematically correct; (c) if a journal entry is posted twice, the trial balance will still balance; and (d) the trial balance does not prove that all transactions have been recorded.
- 14. c.** The trial balance will not balance in this case because the debit of \$1,000 to Owner's Drawings is not equal to the credit of \$100 to Cash. The other choices are incorrect because (a) if a correct journal entry is posted twice, the trial balance will still balance; (b) if the purchase of supplies on account is debited to Supplies and credited to Cash, Cash and Accounts Payable will be understated but the trial balance will still balance; and (d) since the debit and credit amounts are the same, the trial balance will still balance but both Accounts Payable and Cash will be overstated.
- 15. a.** The total debit column = \$5,000 (Cash) + \$40,000 (Salaries and Wages Expense) + \$10,000 (Rent Expense) + \$15,000 (Owner's Drawings) + \$61,000 (Equipment) = \$131,000. The normal balance for Assets, Expenses, and Owner's Drawings is a debit. The other choices are incorrect because (b) revenue of \$85,000 should not be included in the total of \$216,000 and its normal balance is a credit; (c) the total of \$91,000 is missing the Salaries and Wages Expense of \$40,000, which has a normal balance of a debit; and (d) the total of \$116,000 is missing the Owner's Drawings of \$15,000, which has a normal balance of a debit.

Practice Brief Exercises

Identify accounts to be debited and credited.

- 1. (LO 1)** Transactions for the Warren Potter Company for the month of May are presented below. Identify the accounts to be debited and credited for each transaction.

May 1 Warren Potter invested \$22,000 in the business.
 6 Paid office rent of \$900.
 12 Performed consulting services and billed client \$4,400.
 18 Purchased equipment on account for \$1,200.

Solution

1.	<u>Account Debited</u>	<u>Account Credited</u>
May 1	Cash	Owner's Capital
6	Rent Expense	Cash
12	Accounts Receivable	Service Revenue
18	Equipment	Accounts Payable

Journalize transactions.

- 2. (LO 2)** Using the data from Practice Brief Exercise 1, journalize the transactions (omit explanations).

Solution

2. May 1	Cash	22,000	
	Owner's Capital		22,000
6	Rent Expense	900	
	Cash		900
12	Accounts Receivable	4,400	
	Service Revenue		4,400
18	Equipment	1,200	
	Accounts Payable		1,200

3. (LO 3) Selected transactions for Carlos Santana Company are presented in journal form below. Post the transactions to T-accounts. Make one T-account for each and determine each account's ending balance.

Post journal entries to T-accounts.

J1				
Date	Account Titles and Explanation	Ref.	Debit	Credit
June 6	Cash Owner's Capital (Owner's investment of cash in business)		22,000	22,000
13	Accounts Receivable Service Revenue (Billed for services performed)		8,200	8,200
14	Cash Accounts Receivable (Received cash in payment of account)		3,700	3,700

Solution**3.**

Cash	
6/6	22,000
6/14	3,700
	Bal. 25,700

Accounts Receivable			
6/13	8,200	6/14	3,700
			Bal. 4,500

Service Revenue		
	6/13	8,200
		Bal. 8,200

Owner's Capital		
	6/6	22,000
		Bal. 22,000

4. (LO 3) Selected journal entries for Carlos Santana Company are presented in **Practice Brief Exercise 3**. Post the transactions using the standard form of account.

Post journal entries to standard form of account.

Solution**4. Cash**

Date	Explanation	Ref.	Debit	Credit	Balance
June 6		J1	22,000		22,000
14		J1	3,700		25,700

Accounts Receivable

Date	Explanation	Ref.	Debit	Credit	Balance
June 13		J1	8,200		8,200
14		J1		3,700	4,500

Service Revenue

Date	Explanation	Ref.	Debit	Credit	Balance
June 13		J1		8,200	8,200

Owner's Capital

Date	Explanation	Ref.	Debit	Credit	Balance
June 6		J1		22,000	22,000

Prepare a trial balance.

- 5. (LO 4)** From the ledger accounts below, prepare a trial balance for Bundy Company at December 31, 2020. List the accounts in the order shown in the textbook. All account balances are normal.

Accounts Receivable	\$10,000	Salaries and Wages Expense	\$ 2,300
Supplies	4,100	Rent Expense	1,200
Accounts Payable	3,500	Owner's Capital	10,200
Owner's Drawing	1,100	Cash	6,000
Service Revenue	11,000		

Solution

5.

Bundy Company
Trial Balance
December 31, 2020

	<u>Debit</u>	<u>Credit</u>
Cash	\$ 6,000	
Accounts Receivable	10,000	
Supplies	4,100	
Accounts Payable		\$ 3,500
Owner's Capital		10,200
Owner's Drawings	1,100	
Service Revenue		11,000
Salaries and Wages Expense	2,300	
Rent Expense	1,200	
	<u><u>\$24,700</u></u>	<u><u>\$24,700</u></u>

Practice Exercises

Analyze and journalize transactions.

- 1. (LO 2)** Presented below is information related to Hammond Real Estate Agency.

- Oct. 1 Lia Berge begins business as a real estate agent with a cash investment of \$30,000.
- 2 Paid rent, \$700, on office space.
- 3 Purchases office equipment for \$2,800, on account.
- 6 Sells a house and lot for Hal Smith; bills Hal Smith \$4,400 for realty services performed.
- 27 Pays \$1,100 on the balance related to the transaction of October 3.
- 30 Receives bill for October utilities, \$130 (not paid at this time).

Instructions

Journalize the transactions. (You may omit explanations)

Solution

1. GENERAL JOURNAL					
Date	Account Titles and Explanation		Ref.	Debit	Credit
Oct. 1	Cash			30,000	30,000
	Owner's Capital				
2	Rent Expense			700	700
	Cash				
3	Equipment			2,800	2,800
	Accounts Payable				
6	Accounts Receivable			4,400	4,400

	4/7	2,900
	4/12	1,200

Salaries and Wages Expense No. 726		
4/15	700	

Instructions

- Prepare the complete general journal (including explanations) from which the postings to Cash were made.
- Prepare a trial balance at April 30, 2020.

Solution

GENERAL JOURNAL				
Date	Account Titles and Explanation	Ref.	Debit	Credit
Apr. 1	Cash Owner's Capital (Owner's investment of cash in business)		16,000	16,000
4	Supplies Accounts Payable (Purchased supplies on account)		1,900	1,900
7	Accounts Receivable Service Revenue (Billed customers for services performed)		2,900	2,900
12	Cash Service Revenue (Received cash for services performed)		1,200	1,200
15	Salaries and Wages Expense Cash (Paid salaries to date)		700	700
25	Accounts Payable Cash (Paid creditors on account)		1,600	1,600
29	Cash Accounts Receivable (Received cash in payment of account)		900	900
30	Cash Unearned Service Revenue (Received cash for future services)		1,600	1,600

b.

Depot Company
Trial Balance
April 30, 2020

	Debit	Credit
Cash	\$17,400	
Accounts Receivable	2,000	
Supplies	1,900	

Journalize transactions from account data and prepare a trial balance.

Accounts Payable	\$ 300
Unearned Service Revenue	1,600
Owner's Capital	16,000
Service Revenue	4,100
Salaries and Wages Expense	700
	<u> \$22,000</u>
	<u> \$22,000</u>

Practice Problem

Journalize transactions, post, and prepare a trial balance.

(LO 1, 2, 3, 4) Bob Sample opened the Campus Laundromat on September 1, 2020. During the first month of operations, the following transactions occurred.

- Sept. 1 Bob invested \$20,000 cash in the business.
- 2 The company paid \$1,000 cash for store rent for September.
- 3 Purchased washers and dryers for \$25,000, paying \$10,000 in cash and signing a \$15,000, 6-month, 12% note payable.
- 4 Paid \$1,200 for a one-year accident insurance policy.
- 10 Received a bill from the *Daily News* for online advertising of the opening of the laundromat \$200.
- 20 Bob withdrew \$700 cash for personal use.
- 30 The company determined that cash receipts for laundry services for the month were \$6,200.

The chart of accounts for the company is the same as that for Pioneer Advertising plus No. 610 Advertising Expense.

Instructions

- Journalize the September transactions. (Use J1 for the journal page number.)
- Open ledger accounts and post the September transactions.
- Prepare a trial balance at September 30, 2020.

Solution

GENERAL JOURNAL					J1	
Date	Account Titles and Explanation			Ref.	Debit	Credit

WileyPLUS

Brief Exercises, DO IT! Exercises, Exercises, Problems, and many additional resources are available for practice in WileyPLUS.

Questions

1. Describe the parts of a T-account.
2. “The terms debit and credit mean increase and decrease, respectively.” Do you agree? Explain.
3. Pete Harcourt, a fellow student, contends that the double-entry system means each transaction must be recorded twice. Is Pete correct? Explain.
4. Melissa Estes, a beginning accounting student, believes debit balances are favorable and credit balances are unfavorable. Is Melissa correct? Discuss.
5. State the rules of debit and credit as applied to (a) asset accounts, (b) liability accounts, and (c) the owner’s equity accounts (revenue, expenses, owner’s drawings, and owner’s capital).
6. What is the normal balance for each of the following accounts? (a) Accounts Receivable. (b) Cash. (c) Owner’s Drawings. (d) Accounts Payable. (e) Service Revenue. (f) Salaries and Wages Expense. (g) Owner’s Capital.
7. Indicate whether each of the following accounts is an asset, a liability, or an owner’s equity account and whether it has a normal debit or credit balance: (a) Accounts Receivable, (b) Accounts Payable, (c) Equipment, (d) Owner’s Drawings, and (e) Supplies.
8. For the following transactions, indicate the account debited and the account credited.
 - a. Supplies are purchased on account.
 - b. Cash is received on signing a note payable.
 - c. Employees are paid salaries in cash.
9. Indicate whether the following accounts generally will have (a) debit entries only, (b) credit entries only, or (c) both debit and credit entries.

1. Cash.	5. Salaries and Wages Expense.
2. Accounts Receivable.	6. Service Revenue.
3. Owner’s Drawings.	
4. Accounts Payable.	
10. What are the basic steps in the recording process?
11. What are the advantages of using a journal in the recording process?
12. a. When entering a transaction in the journal, should the debit or credit be written first?
b. Which should be indented, the debit or credit?
13. Describe a compound entry, and provide an example.
14. a. Should business transaction debits and credits be recorded directly in the ledger accounts?
b. What are the advantages of first recording transactions in the journal and then posting to the ledger?
15. The account number is entered as the last step in posting the amounts from the journal to the ledger. What is the advantage of this step?
16. Journalize the following business transactions.
 - a. Wes Lee invests \$7,000 cash in the business.
 - b. Insurance of \$800 is paid for the year.
 - c. Supplies of \$2,000 are purchased on account.
 - d. Cash of \$8,500 is received for services performed.
17. a. What is a ledger?
b. What is a chart of accounts and why is it important?
18. What is a trial balance and what are its purposes?
19. Victor Grimm is confused about how accounting information flows through the accounting system. He believes the flow of information is as follows.
 - a. Debits and credits posted to the ledger.
 - b. Business transaction occurs.
 - c. Information entered in the journal.
 - d. Financial statements are prepared.
 - e. Trial balance is prepared.

Is Victor correct? If not, indicate to Victor the proper flow of the information.
20. Two students are discussing the use of a trial balance. They wonder whether the following errors, each considered separately, would prevent the trial balance from balancing.
 - a. The bookkeeper debited Cash for \$600 and credited Salaries and Wages Expense for \$600 for payment of wages.
 - b. Cash collected on account was debited to Cash for \$800 and Service Revenue was credited for \$80.

What would you tell them?
21. What are the normal balances for **Apple**’s Cash, Accounts Payable, and Interest Expense accounts?

Brief Exercises

Indicate debit and credit effects and normal balance.

BE2.1 (LO 1) For each of the following accounts, indicate the effects of (a) a debit and (b) a credit on the accounts and (c) the normal balance of the account.

- | | |
|-------------------------|-------------------------|
| 1. Accounts Payable. | 4. Accounts Receivable. |
| 2. Advertising Expense. | 5. Owner’s Capital. |
| 3. Service Revenue. | 6. Owner’s Drawings. |

BE2.2 (LO 1) Transactions for the Oleg Thorn Company for the month of June are presented below. Identify the accounts to be debited and credited for each transaction.

- June 1 Oleg Thorn invests \$5,000 cash in a small welding business of which he is the sole proprietor.
 2 Purchases equipment on account for \$3,600.
 3 \$800 cash is paid to landlord for June rent.
 12 Sends a bill to K. Johnsen for \$400 after completing welding work done on account.

Identify accounts to be debited and credited.

BE2.3 (LO 2) Using the data in BE2.2, journalize the transactions. (You may omit explanations.)

Journalize transactions.

BE2.4 (LO 2) Writing Shea Jonas, a fellow student, is unclear about the basic steps in the recording process. Identify and briefly explain the steps in the order in which they occur.

Identify and explain steps in recording process.

BE2.5 (LO 2) M. Gonzales has the following transactions during August of the current year. Indicate (a) the effect on the accounting equation and (b) the debit-credit analysis illustrated in the textbook.

- Aug. 1 Opens an office as a financial advisor, investing \$9,000 in cash.
 4 Pays insurance in advance for 6 months, \$2,100 cash.
 16 Receives \$3,600 from clients for services performed.
 27 Pays secretary \$1,000 salary.

Indicate basic and debit-credit analysis.

BE2.6 (LO 2) Using the data in BE2.5, journalize the transactions. (You may omit explanations.)

Journalize transactions.

BE2.7 (LO 3) Selected transactions for the Walt Bryce Company are presented in journal form below. Post the transactions to T-accounts. Make one T-account for each item and determine each account's ending balance.

Post journal entries to T-accounts.

Date	Account Titles and Explanation	Ref.	Debit	Credit	J1
May 5	Accounts Receivable Service Revenue (Billed for services performed)		5,400	5,400	
12	Cash Accounts Receivable (Received cash in payment of account)		4,200	4,200	
15	Cash Service Revenue (Received cash for services performed)		3,000	3,000	

BE2.8 (LO 3) Selected journal entries for the Walt Bryce Company are presented in BE2.7. Post the transactions using the standard form of account.

Post journal entries to standard form of account.

BE2.9 (LO 4) From the ledger balances given below, prepare a trial balance for the Amaro Company at June 30, 2020. List the accounts in the order shown in the textbook. All account balances are normal.

Prepare a trial balance.

Accounts Payable \$8,100, Cash \$5,800, Owner's Capital \$15,000, Owner's Drawings \$1,200, Equipment \$17,000, Service Revenue \$10,000, Accounts Receivable \$3,000, Salaries and Wages Expense \$5,100, and Rent Expense \$1,000.

BE2.10 (LO 4) An inexperienced bookkeeper prepared the following trial balance. Prepare a correct trial balance, assuming all account balances are normal.

Prepare a correct trial balance.

Shaushank Company
Trial Balance
December 31, 2020

	Debit	Credit
Cash	\$10,600	
Prepaid Insurance		\$ 3,500
Accounts Payable		3,000
Unearned Service Revenue	2,200	
Owner's Capital		9,000
Owner's Drawings		4,500
Service Revenue		25,400
Salaries and Wages Expense	18,600	
Rent Expense		2,400
	<u>\$31,400</u>	<u>\$47,800</u>

DO IT! Exercises

Identify normal balances.

DO IT! 2.1 (LO 1) Tom Rast has just rented space in a strip mall. In this space, he will open a photography studio, to be called “Picture This!” A friend has advised Tom to set up a double-entry set of accounting records in which to record all of his business transactions.

Identify the balance sheet accounts that Tom will likely need to record the transactions needed to open his business. Indicate whether the normal balance of each account is a debit or credit.

Record business activities.

DO IT! 2.2 (LO 2) Ron Tost engaged in the following activities in establishing his photography studio, Shutter Bug:

1. Opened a bank account in the name of Shutter Bug and deposited \$6,500 of his own money into this account as his initial investment.
2. Purchased photography supplies at a total cost of \$1,200. The business paid \$400 in cash and the balance is on account.
3. Obtained estimates on the cost of photography equipment from three different manufacturers.

Prepare the journal entries to record the transactions. (You may omit explanations.)

Post transactions.

DO IT! 2.3 (LO 3) Tom Rast recorded the following transactions during the month of April.

April 3	Cash		3,400	
	Service Revenue			3,400
April 16	Rent Expense		700	
	Cash			700
April 20	Salaries and Wages Expense		250	
	Cash			250

Post these entries to the Cash T-account of the general ledger to determine the ending balance in cash. The beginning balance in cash on April 1 was \$1,600.

Prepare a trial balance.

DO IT! 2.4 (LO 4) The following accounts are taken from the ledger of Macon Company at December 31, 2020.

200	Notes Payable	\$20,000	101	Cash	\$ 6,000
301	Owner's Capital	28,000	126	Supplies	7,000
157	Equipment	80,000	729	Rent Expense	4,000
306	Owner's Drawings	9,000	212	Salaries and Wages Payable	3,000
726	Salaries and Wages Expense	38,000	201	Accounts Payable	11,000
400	Service Revenue	90,000	112	Accounts Receivable	8,000

Prepare a trial balance in good form.

Exercises

Analyze statements about accounting and the recording process.

E2.1 (LO 1) Kim Yi has prepared the following list of statements about accounts.

1. An account is an accounting record of either a specific asset or a specific liability.
2. An account shows only increases, not decreases, in the item it relates to.
3. Some items, such as Cash and Accounts Receivable, are combined into one account.
4. An account has a left, or credit side, and a right, or debit side.
5. A simple form of an account consisting of just the account title, the left side, and the right side, is called a T-account.

Instructions

Identify each statement as true or false. If false, indicate how to correct the statement.

E2.2 (LO 1) Selected transactions for M. Acosta, an interior decorator, in her first month of business, are as follows.

- Jan. 2 Invested \$10,000 cash in business.
- 3 Purchased used car for \$3,000 cash for use in business.
- 9 Purchased supplies on account for \$600.
- 11 Billed customers \$2,400 for services performed.
- 16 Paid \$350 cash for advertising.
- 20 Received \$900 cash from customers billed on January 11.
- 23 Paid creditor \$300 cash on balance owed.
- 28 Withdrew \$1,000 cash for personal use by owner.

Identify debits, credits, and normal balances.

Instructions

For each transaction, indicate the following.

- The basic type of account debited and credited (asset, liability, owner's equity).
- The specific account debited and credited (Cash, Rent Expense, Service Revenue, etc.).
- Whether the specific account is increased or decreased.
- The normal balance of the specific account.

Use the following format, in which the January 2 transaction is given as an example.

Date	Account Debited				Account Credited			
	(a) Basic Type	(b) Specific Account	(c) Effect	(d) Normal Balance	(a) Basic Type	(b) Specific Account	(c) Effect	(d) Normal Balance
	Jan. 2	Asset	Cash	Increase	Debit	Owner's Equity	Owner's Capital	Increase

E2.3 (LO 2) Data for M. Acosta, interior decorator, are presented in E2.2.

Journalize transactions.

Instructions

Journalize the transactions using journal page J1. (You may omit explanations.)

E2.4 (LO 1) The following information relates to Royale Real Estate Agency.

Analyze transactions and determine their effect on accounts.

- Oct. 1 James Royale begins business as a real estate agent with a cash investment of \$17,000.
- 2 Hires an administrative assistant.
- 3 Purchases office furniture for \$1,900, on account.
- 6 Sells a house and lot for C. Rouse; bills C. Rouse \$3,800 for realty services performed.
- 27 Pays \$1,300 on the balance related to the transaction of October 3.
- 30 Pays the administrative assistant \$2,500 in salary for October.

Instructions

Prepare the debit-credit analysis for each transaction as illustrated in the textbook.

E2.5 (LO 2) Transaction data for Royale Real Estate Agency are presented in E2.4.

Journalize transactions.

Instructions

Journalize the transactions. (You may omit explanations.)

E2.6 (LO 1, 2) Lennon Industries had the following transactions.

Analyze transactions and journalize.

- Borrowed \$5,000 from the bank by signing a note.
- Paid \$3,900 cash for a computer.
- Purchased \$650 of supplies on account.

Instructions

- Indicate what accounts are increased and decreased by each transaction.
- Journalize each transaction. (Omit explanations.)

*Analyze transactions and journalize.***E2.7 (LO 1, 2)** Halladay Enterprises had the following selected transactions.

1. Bo Halladay invested \$4,000 cash in the business.
2. Paid office rent of \$840.
3. Performed consulting services and billed a client \$5,200.
4. Bo Halladay withdrew \$750 cash for personal use.

Instructions

- a. Indicate the effect each transaction has on the accounting equation ($\text{Assets} = \text{Liabilities} + \text{Owner's Equity}$), using plus and minus signs.
- b. Journalize each transaction. (Omit explanations.)

*Journalize a series of transactions.***E2.8 (LO 2)** Selected transactions for Sophie's Dog Care are as follows during the month of March.

- March 1 Paid monthly rent of \$1,200.
 3 Performed services for \$160 on account.
 5 Performed services for cash of \$75.
 8 Purchased equipment for \$600. The company paid cash of \$90 and the balance was on account.
 12 Received cash from customers billed on March 3.
 14 Paid salaries and wages to employees of \$525.
 22 Paid utilities of \$72.
 24 Borrowed \$1,500 from Grafton State Bank by signing a note.
 27 Paid \$220 to repair service for plumbing repairs.
 28 Paid balance amount owed from equipment purchase on March 8.
 30 Paid \$1,800 for six months of insurance.

Instructions

Journalize the transactions. (Omit explanations.)

*Record journal entries.***E2.9 (LO 2)** On April 1, Adventures Travel Agency began operations. The following transactions were completed during the month.

1. Owner invested \$24,000 in the business.
2. Obtained a bank loan for \$7,000 by issuing a note payable.
3. Paid \$11,000 cash to buy equipment.
4. Paid \$1,200 cash for April office rent.
5. Paid \$1,450 for supplies.
6. Purchased \$600 of advertising in the *Daily Herald*, on account.
7. Performed services for \$18,000: cash of \$2,000 was received from customers, and the balance of \$16,000 was billed to customers on account.
8. Cash withdrawal of \$400 by owner for personal use.
9. Paid the utility bill for the month, \$2,000.
10. Paid *Daily Herald* the amount due in transaction (6).
11. Paid \$40 of interest on the bank loan obtained in transaction (2).
12. Paid employees' salaries and wages, \$6,400.
13. Received \$12,000 cash from customers billed in transaction (7).

Instructions

Journalize the transactions. (Omit explanations.)

*Analyze statements about the ledger.***E2.10 (LO 3)** Alma Ortiz has prepared the following list of statements about the general ledger.

1. The general ledger contains all the asset and liability accounts but no owner's equity accounts.
2. The general ledger is sometimes referred to as simply the ledger.
3. The accounts in the general ledger are arranged in alphabetical order.
4. Each account in the general ledger is numbered for easier identification.
5. The general ledger is a book of original entry.

Instructions

Identify each statement as true or false. If false, indicate how to correct the statement.

E2.11 (LO 3, 4) Selected transactions from the journal of June Feldman, investment broker, are presented below.

Post journal entries and prepare a trial balance.

Date	Account Titles and Explanation	Ref.	Debit	Credit
Aug. 1	Cash Owner's Capital (Owner's investment of cash in business)		5,000	5,000
10	Cash Service Revenue (Received cash for services performed)		2,600	2,600
12	Equipment Cash Notes Payable (Purchased equipment for cash and notes payable)		5,000 2,300 2,700	
25	Accounts Receivable Service Revenue (Billed clients for services performed)		1,700	1,700
31	Cash Accounts Receivable (Receipt of cash on account)		900	900

Instructions

- a. Post the transactions to T-accounts.
- b. Prepare a trial balance at August 31, 2020.

E2.12 (LO 2, 4) The T-accounts below summarize the ledger of Negrete Landscaping Company at the end of the first month of operations.

Journalize transactions from account data and prepare a trial balance.

Cash		No. 101
4/1	14,000	4/15 1,300
4/12	900	4/25 1,500

Notes Payable		No. 200					
		10/10	4,000				
Accounts Payable		No. 201					
10/12	1,500	10/3	2,000				

Instructions

- Reproduce the journal entries for the transactions that occurred on October 1, 10, and 20, and provide explanations for each.
- Determine the October 31 balance for each of the accounts above, and prepare a trial balance at October 31, 2020.

Prepare journal entries and post using standard account form.

E2.14 (LO 2, 3) Selected transactions for Bonnie Donne Company during its first month in business are presented below.

- Sept. 1 Invested \$10,000 cash in the business.
 5 Purchased equipment for \$14,000 paying \$4,000 in cash and the balance on account.
 25 Paid \$3,000 cash on balance owed for equipment.
 30 Withdrew \$900 cash for personal use.

Donne's chart of accounts shows No. 101 Cash, No. 157 Equipment, No. 201 Accounts Payable, No. 301 Owner's Capital, and No. 306 Owner's Drawings.

Instructions

- Journalize the transactions on page J1 of the journal. (Omit explanations.)
- Post the transactions using the standard account form.

Analyze errors and their effects on trial balance.

E2.15 (LO 4) The bookkeeper for J.L. Kang Equipment Repair made a number of errors in journalizing and posting, as described below.

- A credit posting of \$525 to Accounts Receivable was omitted.
- A debit posting of \$750 for Prepaid Insurance was debited to Insurance Expense.
- A collection from a customer of \$100 in payment of its account owed was journalized and posted as a debit to Cash \$100 and a credit to Service Revenue \$100.
- A credit posting of \$415 to Property Taxes Payable was made twice.
- A cash purchase of supplies for \$250 was journalized and posted as a debit to Supplies \$25 and a credit to Cash \$25.
- A debit of \$625 to Advertising Expense was posted as \$652.

Instructions

For each error:

- Indicate whether the trial balance will balance.
- If the trial balance will not balance, indicate the amount of the difference.
- Indicate the trial balance column that will have the larger total.

Consider each error separately. Use the following form, in which error (1) is given as an example.

Error	(a) In Balance	(b) Difference	(c) Larger Column
(1)	No	\$525	debit

E2.16 (LO 4) The accounts in the ledger of Prompt Delivery Service contain the following balances on July 31, 2020.

Prepare a trial balance.

Accounts Receivable	\$ 7,640	Prepaid Insurance	\$ 1,968
Accounts Payable	8,394	Maintenance and Repairs Expense	961
Cash	?	Service Revenue	10,610
Equipment	45,360	Owner's Drawings	700
Gasoline Expense	758	Owner's Capital	38,000
Utilities Expense	523	Salaries and Wages Expense	4,428
Notes Payable	17,000	Salaries and Wages Payable	815

Instructions

Prepare a trial balance with the accounts arranged as illustrated in the chapter and fill in the missing amount for Cash.

E2.17 (LO 2, 3, 4) Beyers Security Company provides security services. Selected transactions for Beyers are presented below.

Journalize transactions, post transactions to T-accounts, and prepare trial balance.

- Oct. 1 Invested \$66,000 cash in the business.
 2 Hired part-time security consultant. Salary will be \$2,000 per month. First day of work will be October 15.
 4 Paid one month of rent for building for \$2,000.
 7 Purchased equipment for \$18,000, paying \$4,000 cash and the balance on account.
 8 Paid \$500 for advertising.
 10 Received bill for equipment repair cost of \$390.
 12 Provided security services for event for \$3,200 on account.
 16 Purchased supplies for \$410 on account.
 21 Paid balance due from October 7 purchase of equipment.
 24 Received and paid utility bill for \$148.
 27 Received payment from customer for October 12 services performed.
 31 Paid employee salaries and wages of \$5,100.

Instructions

- Journalize the transactions. Do not provide explanations.
- Post the transactions to T-accounts.
- Prepare a trial balance at October 31, 2020. (*Hint:* Compute ending balances of T-accounts first.)

Problems: Set A

P2.1A (LO 1, 2) Holz Disc Golf Course was opened on March 1 by Ian Holz. The following selected events and transactions occurred during March.

Journalize a series of transactions.

- Mar. 1 Invested \$20,000 cash in the business.
 3 Purchased Rainbow Golf Land for \$15,000 cash. The price consists of land \$12,000, shed \$2,000, and equipment \$1,000. (Make one compound entry.)
 5 Paid advertising expenses of \$900.
 6 Paid cash \$600 for a one-year insurance policy.
 10 Purchased golf discs and other equipment for \$1,050 from Stevenson Company payable in 30 days.

- Mar. 18 Received \$1,100 in cash for golf fees (Holz records golf fees as service revenue).
 19 Sold 150 coupon books for \$10 each. Each book contains 4 coupons that enable the holder to play one round of disc golf.
 25 Withdrew \$800 cash for personal use.
 30 Paid salaries of \$250.
 30 Paid Stevenson Company in full.
 31 Received \$2,700 cash for golf fees.

Holz Disc Golf uses the following accounts: Cash, Prepaid Insurance, Land, Buildings, Equipment, Accounts Payable, Unearned Service Revenue, Owner's Capital, Owner's Drawings, Service Revenue, Advertising Expense, and Salaries and Wages Expense.

Instructions

Journalize the March transactions.

Journalize transactions, post, and prepare a trial balance.

- P2.2A (LO 1, 2, 3, 4)** Vera Ernst is a licensed dentist. During the first month of the operation of her business, the following events and transactions occurred.

- April 1 Invested \$20,000 cash in her business.
 1 Hired a secretary-receptionist at a salary of \$700 per week payable monthly.
 2 Paid office rent for the month \$1,500.
 3 Purchased dental supplies on account from Dazzle Company \$4,000.
 10 Performed dental services and billed insurance companies \$5,100.
 11 Received \$1,000 cash advance from Leah Mataruka for an implant.
 20 Received \$2,100 cash for services performed from Michael Santos.
 30 Paid secretary-receptionist for the month \$2,800.
 30 Paid \$2,600 to Dazzle for accounts payable due.

Vera uses the following chart of accounts: No. 101 Cash, No. 112 Accounts Receivable, No. 126 Supplies, No. 201 Accounts Payable, No. 209 Unearned Service Revenue, No. 301 Owner's Capital, No. 400 Service Revenue, No. 726 Salaries and Wages Expense, and No. 729 Rent Expense.

Instructions

- Journalize the transactions.
- Post to the ledger accounts.
- Prepare a trial balance on April 30, 2020.

c. Trial balance totals \$29,600

Journalize transactions, post, and prepare a trial balance.

- P2.3A (LO 1, 2, 3, 4)** Maquoketa Services was formed on May 1, 2020. The following transactions took place during the first month.

Transactions on May 1:

- Jay Bradford invested \$40,000 cash in the company, as its sole owner.
- Hired two employees to work in the warehouse. They will each be paid a salary of \$3,050 per month.
- Signed a 2-year rental agreement on a warehouse; paid \$24,000 cash in advance for the first year.
- Purchased furniture and equipment costing \$30,000. A cash payment of \$10,000 was made immediately; the remainder will be paid in 6 months.
- Paid \$1,800 cash for a one-year insurance policy on the furniture and equipment.

Transactions during the remainder of the month:

- Purchased basic office supplies for \$420 cash.
- Purchased more office supplies for \$1,500 on account.
- Total revenues earned were \$20,000—\$8,000 cash and \$12,000 on account.
- Paid \$400 to suppliers for accounts payable due.
- Received \$3,000 from customers in payment of accounts receivable.
- Received utility bills in the amount of \$380, to be paid next month.
- Paid the monthly salaries of the two employees, totaling \$6,100.

Instructions

- Prepare journal entries to record each of the events listed. (Omit explanations.)
- Post the journal entries to T-accounts.
- Prepare a trial balance as of May 31, 2020.

c. Trial balance totals \$81,480

P2.4A (LO 4) The following trial balance of Sergei Asbrecht Co. does not balance.

Prepare a correct trial balance.

Sergei Asbrecht Co.
Trial Balance
June 30, 2020

	Debit	Credit
Cash		\$ 3,140
Accounts Receivable	\$ 2,812	
Supplies	1,200	
Equipment	2,600	
Accounts Payable		3,666
Unearned Service Revenue	1,100	
Owner's Capital		8,000
Owner's Drawings	800	
Service Revenue		2,480
Salaries and Wages Expense	3,200	
Utilities Expense	810	
	<u>\$12,522</u>	<u>\$17,286</u>

Each of the listed accounts has a normal balance per the general ledger. An examination of the ledger and journal reveals the following errors.

1. Cash received from a customer in payment of its account was debited for \$850, and Accounts Receivable was credited for the same amount. The actual collection was for \$580.
2. The purchase of a computer on account for \$710 was recorded as a debit to Supplies for \$710 and a credit to Accounts Payable for \$710.
3. Services were performed on account for a client for \$980. Accounts Receivable was debited for \$980, and Service Revenue was credited for \$98.
4. A debit posting to Salaries and Wages Expense of \$900 was omitted.
5. A payment of a balance due for \$306 was credited to Cash for \$306 and credited to Accounts Payable for \$360.
6. The withdrawal of \$600 cash for Sergei's personal use was debited to Salaries and Wages Expense for \$600 and credited to Cash for \$600.

Instructions

Prepare a correct trial balance. (*Hint:* It helps to prepare the correct journal entry for the transaction described and compare it to the mistake made.)

Trial balance totals \$15,462

P2.5A (LO 1, 2, 3, 4) The Starr Theater, owned by Meg Vargo, will begin operations in March. The Starr will be unique in that it will show only triple features of sequential theme movies. As of March 1, the ledger of Starr showed No. 101 Cash \$3,000, No. 140 Land \$24,000, No. 145 Buildings (concession stand, projection room, ticket booth, and screen) \$10,000, No. 157 Equipment \$10,000, No. 201 Accounts Payable \$7,000, and No. 301 Owner's Capital \$40,000. During the month of March, the following events and transactions occurred.

Journalize transactions, post, and prepare a trial balance.

- Mar. 2 Rented the three *Indiana Jones* movies to be shown for the first 3 weeks of March. The film rental was \$3,500; \$1,500 was paid in cash and \$2,000 will be paid on March 10.
- 3 Ordered the *Lord of the Rings* movies to be shown the last 10 days of March. It will cost \$200 per night.
- 9 Received \$4,300 cash from admissions.
- 10 Paid balance due on *Indiana Jones* movies rental and \$2,100 on March 1 accounts payable.
- 11 Starr Theater contracted with Adam Ladd to operate the concession stand. Ladd is to pay 15% of gross concession receipts, payable monthly, for the rental of the concession stand.
- 12 Paid advertising expenses \$900.
- 20 Received \$5,000 cash from customers for admissions.
- 20 Received the *Lord of the Rings* movies and paid the rental fee of \$2,000.
- 31 Paid salaries of \$3,100.
- 31 Received statement from Adam Ladd showing gross receipts from concessions of \$6,000 and the balance due to Starr Theater of \$900 (\$6,000 × 15%) for March. Ladd paid one-half the balance due and will remit the remainder on April 5.
- 31 Received \$9,000 cash from customers for admissions.

In addition to the accounts identified above, the chart of accounts includes No. 112 Accounts Receivable, No. 400 Service Revenue, No. 429 Rent Revenue, No. 610 Advertising Expense, No. 726 Salaries and Wages Expense, and No. 729 Rent Expense.

Instructions

- a. Enter the beginning balances in the ledger. Insert a check mark (✓) in the reference column of the ledger for the beginning balance.
- b. Journalize the March transactions. Starr records admission revenue as service revenue, rental of the concession stand as rent revenue, and film rental expense as rent expense.
- c. Post the March journal entries to the ledger. Assume that all entries are posted from page 1 of the journal.
- d. Trial balance totals \$64,100
- d. Prepare a trial balance on March 31, 2020.

Continuing Case

Cookie Creations

(Note: This is a continuation of the Cookie Creations case from Chapter 1.)

© leungchopan/
Shutterstock

CC2 After researching the different forms of business organization, Natalie Koebel decides to operate “Cookie Creations” as a proprietorship. She then starts the process of getting the business running. In November 2019, the following activities take place.

- | | |
|--------|--|
| Nov. 8 | Natalie cashes her U.S. Savings Bonds and receives \$520, which she deposits in her personal bank account. |
| 8 | She opens a bank account under the name “Cookie Creations” and transfers \$500 from her personal account to the new account. |
| 11 | Natalie pays \$65 for advertising. |
| 13 | She buys baking supplies, such as flour, sugar, butter, and chocolate chips, for \$125 cash. (<i>Hint:</i> Use Supplies account.) |
| 14 | Natalie starts to gather some baking equipment to take with her when teaching the cookie classes. She has an excellent top-of-the-line food processor and mixer that originally cost her \$750. Natalie decides to start using it only in her new business. She estimates that the equipment is currently worth \$300. She invests the equipment in the business. |
| 16 | Natalie realizes that her initial cash investment is not enough. Her grandmother lends her \$2,000 cash, for which Natalie signs a note payable in the name of the business. Natalie deposits the money in the business bank account. (<i>Hint:</i> The note does not have to be repaid for 24 months. As a result, the note payable should be reported in the accounts as the last liability and also on the balance sheet as the last liability.) |
| 17 | She buys more baking equipment for \$900 cash. |
| 20 | She teaches her first class and collects \$125 cash. |
| 25 | Natalie books a second class for December 4 for \$150. She receives \$30 cash in advance as a down payment. |
| 30 | Natalie pays \$1,320 for a one-year insurance policy that will expire on December 1, 2020. |

Instructions

- a. Prepare journal entries to record the November transactions.
- b. Post the journal entries to general ledger accounts.
- c. Prepare a trial balance at November 30.

Ethics Cases

EC2.1 Ellynn Kole is the assistant chief accountant at Doman Company, a manufacturer of computer chips and cellular phones. The company presently has total sales of \$20 million. It is the end of the first quarter. Ellynn is hurriedly trying to prepare a trial balance so that quarterly financial statements can be prepared and released to management and the regulatory agencies. The total credits on the trial balance exceed the debits by \$1,000. In order to meet the 4 p.m. deadline, Ellynn decides to force the debits and credits into balance by adding the amount of the difference to the Equipment account. She chooses

Equipment because it is one of the larger account balances; percentage-wise, it will be the least misstated. Ellynn “plugs” the difference! She believes that the difference will not affect anyone’s decisions. She wishes that she had another few days to find the error but realizes that the financial statements are already late.

Instructions

- a. Who are the stakeholders in this situation?
- b. What are the ethical issues involved in this case?
- c. What are Ellynn’s alternatives?

EC2.2 If you haven’t already done so, in the not-too-distant future you will prepare a résumé. In some ways, your résumé is like a company’s annual report. Its purpose is to enable others to evaluate your past, in an effort to predict your future.

A résumé is your opportunity to create a positive first impression. It is important that it be impressive—but it should also be accurate. In order to increase their job prospects, some people are tempted to “inflate” their résumés by overstating the importance of some past accomplishments or positions. In fact, you might even think that “everybody does it” and that if you don’t do it, you will be at a disadvantage.

David Edmondson, the president and CEO of well-known electronics retailer **Radio Shack**, overstated his accomplishments by claiming that he had earned a bachelor’s of science degree, when in fact he had not. Apparently, his employer had not done a background check to ensure the accuracy of his résumé. Should Radio Shack have fired him?

YES: Radio Shack is a publicly traded company. Investors, creditors, employees, and others doing business with the company will not trust it if its leader is known to have poor integrity. The “tone at the top” is vital to creating an ethical organization.

NO: Mr. Edmondson had been a Radio Shack employee for 11 years. He had served the company in a wide variety of positions, and had earned the position of CEO through exceptional performance. While the fact that he lied 11 years earlier on his résumé was unfortunate, his service since then made this past transgression irrelevant. In addition, the company was in the midst of a massive restructuring, which included closing 700 of its 7,000 stores. It could not afford additional upheaval at this time.

Instructions

Write a response indicating your position regarding this situation. Provide support for your view.

Expand Your Critical Thinking

Financial Reporting Problem: Apple Inc.

CT2.1 The financial statements of **Apple Inc.** are presented in Appendix A. The complete annual report, including the notes to the financial statements, is available at the company’s website.

Apple’s financial statements contain the following selected accounts, stated in millions of dollars.

Accounts Payable	Cash and Cash Equivalents
Accounts Receivable	Research and Development Expense
Property, Plant, and Equipment	Inventories

Instructions

- a. Answer the following questions.
 1. What is the increase and decrease side for each account?
 2. What is the normal balance for each account?
- b. Identify the probable other account in the transaction and the effect on that account when:
 1. Accounts Receivable is decreased.
 2. Accounts Payable is decreased.
 3. Inventories are increased.
- c. Identify the other account(s) that ordinarily would be involved when:
 1. Research and Development Expense is increased.
 2. Property, Plant, and Equipment is increased.

Comparative Analysis Problem: PepsiCo, Inc. vs. The Coca-Cola Company

CT2.2 **PepsiCo, Inc.**'s financial statements are presented in Appendix B. Financial statement of **The Coca-Cola Company** are presented in Appendix C. The complete annual reports of PepsiCo and Coca-Cola, including the notes to the financial statements, are available at each company's respective website.

Instructions

- a. Based on the information contained in the financial statements, determine the normal balance of the listed accounts for each company.

PepsiCo	Coca-Cola
1. Inventory	1. Accounts Receivable
2. Property, Plant, and Equipment	2. Cash and Cash Equivalents
3. Accounts Payable	3. Cost of Goods Sold (expense)
4. Interest Expense	4. Sales (revenue)

- b. Identify the other account ordinarily involved when:

1. Accounts Receivable is increased.
2. Salaries and Wages Payable is decreased.
3. Property, Plant, and Equipment is increased.
4. Interest Expense is increased.

Comparative Analysis Problem: Amazon.com, Inc. vs. Wal-Mart Stores, Inc.

CT2.3 **Amazon.com, Inc.**'s financial statements are presented in Appendix D. Financial statements of **Wal-Mart Stores, Inc.** are presented in Appendix E. The complete annual reports of Amazon and Wal-Mart, including the notes to the financial statements, are available at each company's respective website.

Instructions

- a. Based on the information contained in the financial statements, determine the normal balance of the listed accounts for each company.

Amazon	Wal-Mart
1. Interest Expense	1. Net Product Revenues
2. Cash and Cash Equivalents	2. Inventories
3. Accounts Payable	3. Cost of Sales

- b. Identify the other account ordinarily involved when:

1. Accounts Receivable is increased.
2. Interest Expense is increased.
3. Salaries and Wages Payable is decreased.
4. Service Revenue is increased.

Real-World Focus

CT2.4 Much information about specific companies is available on the Internet. Such information includes basic descriptions of the company's location, activities, industry, financial health, and financial performance.

Instructions

Go to the **Yahoo! Finance** website and then answer the following questions.

- a. What is the company's industry?
- b. What is the company's total sales?
- c. What is the company's net income?
- d. What are the names of four of the company's competitors?
- e. Choose one of these competitors.
- f. What is this competitor's name? What are its sales? What is its net income?
- g. Which of these two companies is larger by size of sales? Which one reported higher net income?

CT2.5 The January 27, 2011, edition of the *New York Times* contains an article by Richard Sandomir entitled “N.F.L. Finances, as Seen Through Packers’ Records.” The author of the article discusses the fact that the **Green Bay Packers** are the only NFL team that publicly publishes its annual report.

Instructions

Read the article and answer the following questions.

- a. Why are the Green Bay Packers the only professional football team to publish and distribute an annual report?
- b. Why is the football players’ labor union particularly interested in the Packers’ annual report?
- c. In addition to the players’ labor union, what other outside party might be interested in the annual report?
- d. Even though the Packers’ revenue increased in recent years, the company’s operating profit fell significantly. How does the article explain this decline?

Communication Activity

CT2.6 Melia’s Maid Company offers home-cleaning service. Two recurring transactions for the company are billing customers for services performed and paying employee salaries. For example, on March 15, bills totaling \$6,000 were sent to customers and \$2,000 was paid in salaries to employees.

Instructions

Write a memo to your instructor that explains and illustrates the steps in the recording process for each of the March 15 transactions. Use the format illustrated in the textbook.

All About You

CT2.7 Every company needs to plan in order to move forward. Its top management must consider where it wants the company to be in three to five years. Like a company, you need to think about where you want to be three to five years from now, and you need to start taking steps now in order to get there.

Instructions

Provide responses to each of the following items.

- a. Where would you like to be working in three to five years? Describe your plan for getting there by identifying between five and 10 specific steps that you need to take.
- b. In order to get the job you want, you will need a résumé. Your résumé is the equivalent of a company’s annual report. It needs to provide relevant and reliable information about your past accomplishments so that employers can decide whether to “invest” in you. Do a search on the Internet to find a good résumé format. What are the basic elements of a résumé?
- c. A company’s annual report provides information about a company’s accomplishments. In order for investors to use the annual report, the information must be reliable; that is, users must have faith that the information is accurate and believable. How can you provide assurance that the information on your résumé is reliable?
- d. Prepare a résumé assuming that you have accomplished the five to 10 specific steps you identified in part (a). Also, provide evidence that would give assurance that the information is reliable.

Considering People, Planet, and Profit

CT2.8 Auditors provide a type of certification of corporate financial statements. Certification is used in many other aspects of business as well. For example, it plays a critical role in the sustainability movement. The February 7, 2012, issue of the *New York Times* contained an article by S. Amanda Caudill entitled “Better Lives in Better Coffee,” which discusses the role of certification in the coffee business.

Instructions

Conduct an Internet search to locate and read the article, and then answer the following questions.

- a. The article mentions three different certification types that coffee growers can obtain from three different certification bodies. Using financial reporting as an example, what potential problems might the existence of multiple certification types present to coffee purchasers?
- b. According to the author, which certification is most common among coffee growers? What are the possible reasons for this?
- c. What social and environmental benefits are coffee certifications trying to achieve? Are there also potential financial benefits to the parties involved?

A Look at IFRS

LEARNING OBJECTIVE 5

Compare the procedures for the recording process under GAAP and IFRS.

International companies use the same set of procedures and records to keep track of transaction data. Thus, the material in Chapter 2 dealing with the account, general rules of debit and credit, and steps in the recording process—the journal, ledger, and chart of accounts—is the same under both GAAP and IFRS.

Key Points

Following are the key similarities and differences between GAAP and IFRS as related to the recording process.

Similarities

- Transaction analysis is the same under IFRS and GAAP.
- Both the IASB and the FASB go beyond the basic definitions provided in the textbook for the key elements of financial statements, that is assets, liabilities, equity, revenue, and expenses. The implications of the expanded definitions are discussed in more advanced accounting courses.
- As shown in the textbook, dollar signs are typically used only in the trial balance and the financial statements. The same practice is followed under IFRS, using the currency of the country where the reporting company is headquartered.
- A trial balance under IFRS follows the same format as shown in the textbook.

Differences

- IFRS relies less on historical cost and more on fair value than do FASB standards.
- Internal controls are a system of checks and balances designed to prevent and detect fraud and errors. While most public U.S. companies have these systems in place, many non-U.S. companies have never completely documented the controls nor had an independent auditors attest to their effectiveness.

Looking to the Future

The basic recording process shown in this textbook is followed by companies across the globe. It is unlikely to change in the future. The definitional structure of assets, liabilities, equity, revenues, and expenses may change over time as the IASB and FASB evaluate their overall conceptual framework for establishing accounting standards.

IFRS Practice

IFRS Self-Test Questions

1. Which statement is **correct** regarding IFRS?
 - a. IFRS reverses the rules of debits and credits, that is, debits are on the right and credits are on the left.
 - b. IFRS uses the same process for recording transactions as GAAP.
 - c. The chart of accounts under IFRS is different because revenues follow assets.
 - d. None of the above statements are correct.
2. The expanded accounting equation under IFRS is as follows:
 - a. $\text{Assets} = \text{Liabilities} + \text{Owner's Capital} + \text{Owner's Drawings} + \text{Revenues} - \text{Expenses}$.
 - b. $\text{Assets} + \text{Liabilities} = \text{Owner's Capital} + \text{Owner's Drawings} + \text{Revenues} - \text{Expenses}$.
3. Assets = Liabilities + Owner's Capital – Owner's Drawings + Revenues – Expenses.
4. Assets = Liabilities + Owner's Capital + Owner's Drawings – Revenues – Expenses.
3. A trial balance:
 - a. is the same under IFRS and GAAP.
 - b. proves that transactions are recorded correctly.
 - c. proves that all transactions have been recorded.
 - d. will not balance if a correct journal entry is posted twice.
4. One difference between IFRS and GAAP is that:
 - a. GAAP uses accrual-accounting concepts and IFRS uses primarily the cash basis of accounting.
 - b. IFRS uses a different posting process than GAAP.

- c. IFRS uses more fair value measurements than GAAP.
 - d. the limitations of a trial balance are different between IFRS and GAAP.
5. The general policy for using proper currency signs (dollar, yen, pound, etc.) is the same for both IFRS and this textbook. This policy is as follows:
- a. Currency signs only appear in ledgers and journal entries.
 - b. Currency signs are only shown in the trial balance.
 - c. Currency signs are shown for all compound journal entries.
 - d. Currency signs are shown in trial balances and financial statements.

International Financial Reporting Problem: Louis Vuitton

IFRS2.1 The financial statements of **Louis Vuitton** are presented in Appendix F. The complete annual report, including the notes to its financial statements, is available at the company's website.

Instructions

Describe in which statement each of the following items is reported, and the position in the statement (e.g., current asset).

- a. Other operating income and expenses.
- b. Cash and cash equivalents.
- c. Trade accounts payable.
- d. Cost of net financial debt.

Answers to IFRS Self-Test Questions

Adjusting the Accounts

Chapter Preview

In Chapter 1, you learned a neat little formula: Net income = Revenues – Expenses. In Chapter 2, you learned some rules for recording revenue and expense transactions. Guess what? Things are not really that nice and neat. In fact, it is often difficult for companies to determine in what time period they should report some revenues and expenses. In other words, in measuring net income, timing is everything.

Feature Story

Keeping Track of Groupons

Who doesn't like buying things at a discount? That's why it's not surprising that three years after it started as a company, **Groupon, Inc.** was estimated to be worth \$16 billion. This translates into an average increase in value of almost \$15 million per day.

Now consider that Groupon had previously been estimated to be worth even more than that. What happened? Well, accounting regulators and investors began to question the way that Groupon had accounted for some of its transactions. Groupon sells coupons ("groupons"), so how hard can it be

to accurately account for that? It turns out that accounting for coupons is not as easy as you might think.

First, consider what happens when Groupon makes a sale. Suppose it sells a groupon for \$30 for Highrise Hamburgers. When it receives the \$30 from the customer, it must turn over half of that amount (\$15) to Highrise Hamburgers. So should Groupon record revenue for the full \$30 or just \$15? Until recently, Groupon recorded the full \$30. But, in response to an SEC ruling on the issue, Groupon now records revenue of \$15 instead.

A second issue is a matter of timing. When should Groupon record this \$15 revenue? Should it record the revenue when it sells the groupon, or must it wait until the customer uses the groupon at Highrise Hamburgers? You can find the answer to

this question in the notes to Groupon's financial statements. It recognizes the revenue once "the number of customers who purchase the daily deal exceeds the predetermined threshold, the Groupon has been electronically delivered to the purchaser and a listing of Groupons sold has been made available to the merchant."

The accounting becomes even more complicated when you consider the company's loyalty programs. Groupon offers free or discounted groupons to its subscribers for doing things such as referring new customers or participating in promotions. These groupons are to be used for future purchases, yet the company must record the expense at the time the customer receives the

Groupon. The cost of these programs is huge for Groupon, so the timing of this expense can definitely affect its reported income.

Finally, Groupon, like all other companies, relies on many estimates in its financial reporting. For example, Groupon reports that "estimates are utilized for, but not limited to, stock-based compensation, income taxes, valuation of acquired goodwill and intangible assets, customer refunds, contingent liabilities and the depreciable lives of fixed assets." It notes that "actual results could differ materially from those estimates." So, next time you use a coupon, think about what that means for the company's accountants!

Accrual-Basis Accounting and Adjusting Entries

LEARNING OBJECTIVE 1

Explain the accrual basis of accounting and the reasons for adjusting entries.

If we could wait to prepare financial statements until a company ended its operations, no adjustments would be needed. At that point, we could easily determine its final balance sheet and the amount of lifetime income it earned.

However, most companies need feedback about how well they are performing during a period of time. For example, management usually wants monthly financial statements. The Internal Revenue Service requires all businesses to file annual tax returns. Therefore, **accountants**

divide the economic life of a business into artificial time periods. This convenient assumption is referred to as the **time period assumption** (see **Alternative Terminology**).

Many business transactions affect more than one of these arbitrary time periods. For example, the airplanes purchased by **Southwest Airlines** five years ago are still in use today. It would not make sense to expense the full cost of the airplanes at the time of purchase because they will be used for many subsequent periods. Instead, companies must therefore allocate the costs to the periods of use (how much of the cost of an airplane contributed to operations this year?).

Fiscal and Calendar Years

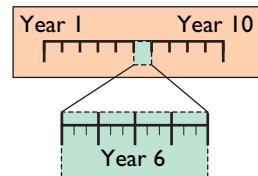

Both small and large companies prepare financial statements periodically in order to assess their financial condition and results of operations. **Accounting time periods are generally a month, a quarter, or a year.** Monthly and quarterly time periods are called **interim periods**. Most large companies must prepare both quarterly and annual financial statements.

An accounting time period that is one year in length is a **fiscal year**. A fiscal year usually begins with the first day of a month and ends 12 months later on the last day of a month. Many businesses use the **calendar year** (January 1 to December 31) as their accounting period. Some do not. Companies whose fiscal year differs from the calendar year include **Delta Air Lines**, June 30, and **The Walt Disney Company**, September 30. Sometimes a company's year-end will vary from year to year. For example, **PepsiCo**'s fiscal year ends on the Friday closest to December 31, which was December 27 in 2014 and December 26 in 2015.

ALTERNATIVE TERMINOLOGY

The time period assumption is also called the *periodicity assumption*.

Time Period Assumption

Accrual- versus Cash-Basis Accounting

What you will learn in this chapter is **accrual-basis accounting**. Under the accrual basis, companies record transactions that change a company's financial statements **in the periods in which the events occur**. For example, using the accrual basis to determine net income means companies recognize revenues when they perform services (rather than when they receive cash). It also means recognizing expenses when incurred (rather than when paid).

An alternative to the accrual basis is the cash basis. Under **cash-basis accounting**, companies record revenue at the time they receive cash. They record an expense at the time they pay out cash. The cash basis seems appealing due to its simplicity, but it often produces misleading financial statements. For example, it fails to record revenue for a company that has performed services but has not yet received payment. As a result, the cash basis may not recognize revenue in the period that a performance obligation is satisfied.

Accrual-basis accounting is therefore in accordance with generally accepted accounting principles (GAAP). Individuals and some small companies, however, do use cash-basis accounting. The cash basis is justified for small businesses because they often have few receivables and payables. Medium and large companies use accrual-basis accounting.

Recognizing Revenues and Expenses

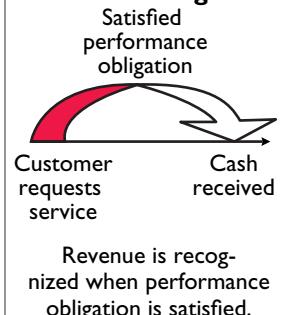

It can be difficult to determine when to report revenues and expenses. The revenue recognition principle and the expense recognition principle help in this task.

Revenue Recognition Principle

When a company agrees to perform a service or sell a product to a customer, it has a **performance obligation**. When the company meets this performance obligation, it recognizes revenue. The **revenue recognition principle** therefore requires that companies recognize revenue in the accounting period in which the performance obligation is satisfied. A company satisfies its performance obligation by performing a service or providing a good to a customer.

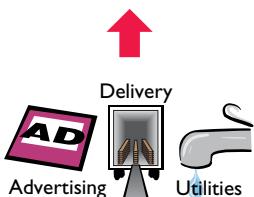

To illustrate, assume that Dave's Dry Cleaning cleans clothing on June 30 but customers do not claim and pay for their clothes until the first week of July. Dave's should record revenue in June when it performed the service (satisfied the performance obligation) rather than in July when it received the cash. At June 30, Dave's would report a receivable on its balance sheet and revenue in its income statement for the service performed.

Revenue Recognition

Expense Recognition

Efforts generated revenue

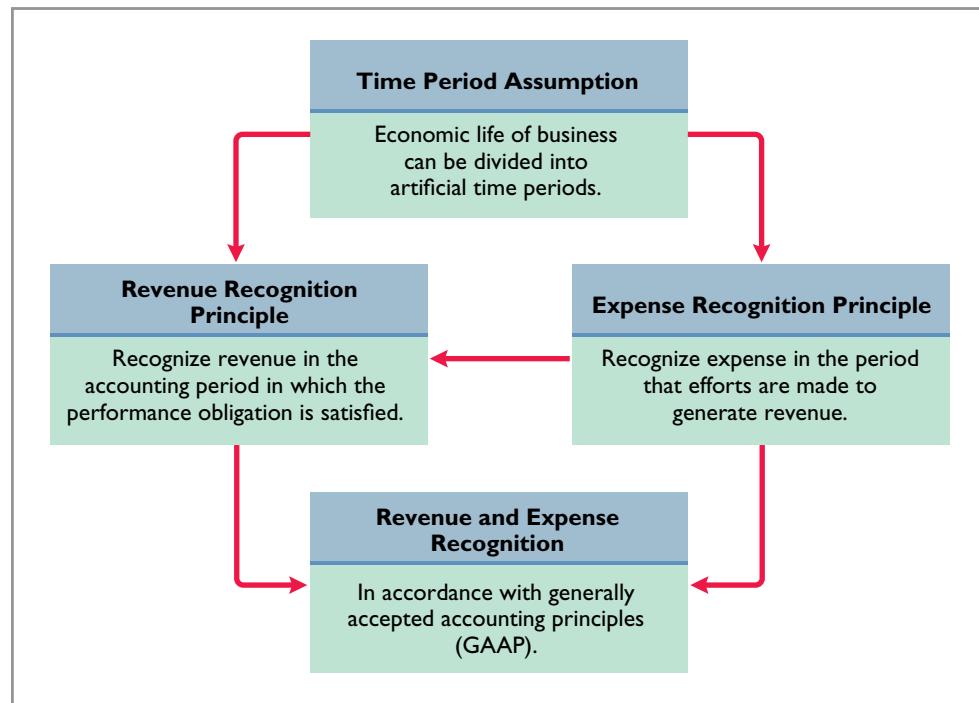

Expense is recognized when efforts are made to generate revenue.

Expense Recognition Principle

Accountants follow a simple rule in recognizing expenses: “Let the expenses follow the revenues.” Thus, expense recognition is tied to revenue recognition. In the dry cleaning example, this means that Dave’s should report the salary expense incurred in performing the June 30 cleaning service in the same period in which it recognizes the service revenue. The critical issue in expense recognition is when the expense makes its contribution to revenue. This may or may not be the same period in which the expense is paid. If Dave’s does not pay the salary incurred on June 30 until July, it would report salaries payable on its June 30 balance sheet.

This practice of expense recognition is referred to as the **expense recognition principle**. It requires that companies recognize expenses in the period in which they make efforts (consume assets or incur liabilities) to generate revenue. The term matching is sometimes used in expense recognition to indicate the relationship between the effort expended and the revenue generated. **Illustration 3.1** summarizes the revenue and expense recognition principles.

ILLUSTRATION 3.1 GAAP relationships in revenue and expense recognition

Investor Insight Apple Inc.

PhotoAlto/James Hardy/Getty Images, Inc.

Reporting Revenue Accurately

Until recently, electronics manufacturer **Apple** was required to spread the revenues from iPhone sales over the two year period following the sale of the phone. Accounting standards required this because Apple was obligated to provide software updates after the phone was sold. Since Apple had service obligations after the initial date of sale, it was forced to spread the revenue over a two-year period.

As a result, the rapid growth of iPhone sales was not fully reflected in the revenue amounts reported in Apple’s income statement. A new accounting standard now enables Apple to report much more of its iPhone revenue at the point of sale. It was estimated that under the new rule revenues would have been about 17% higher and earnings per share almost 50% higher.

In the past, why was it argued that Apple should spread the recognition of iPhone revenue over a two-year period, rather than recording it upfront? (Go to WileyPLUS for this answer and additional questions.)

The Need for Adjusting Entries

In order for revenues to be recorded in the period in which services are performed and for expenses to be recognized in the period in which they are incurred, companies make adjusting entries. **Adjusting entries ensure that the revenue recognition and expense recognition principles are followed** (see **International Note**).

Adjusting entries are necessary because the **trial balance**—the first pulling together of the transaction data—may not contain up-to-date and complete data. This is true for several reasons:

1. Some events are not recorded daily because it is not efficient to do so. Examples are the use of supplies and the earning of wages by employees.
2. Some costs are not recorded during the accounting period because these costs expire with the passage of time rather than as a result of recurring daily transactions. Examples are charges related to the use of buildings and equipment, rent, and insurance.
3. Some items may be unrecorded. An example is a utility service bill that will not be received until the next accounting period.

Adjusting entries are required every time a company prepares financial statements. The company analyzes each account in the trial balance to determine whether it is complete and up-to-date for financial statement purposes. **Every adjusting entry will include one income statement account and one balance sheet account.**

Types of Adjusting Entries

Adjusting entries are classified as either **deferrals** or **accruals**. As **Illustration 3.2** shows, each of these classes has two subcategories.

Deferrals:

1. **Prepaid expenses:** Expenses paid in cash before they are used or consumed.
2. **Unearned revenues:** Cash received before services are performed.

Accruals:

1. **Accrued revenues:** Revenues for services performed but not yet received in cash or recorded.
2. **Accrued expenses:** Expenses incurred but not yet paid in cash or recorded.

Subsequent sections give examples of each type of adjustment. Each example is based on the October 31 trial balance of Pioneer Advertising from Chapter 2, reproduced in **Illustration 3.3**.

Pioneer Advertising		
Trial Balance		
October 31, 2020		
	<u>Debit</u>	<u>Credit</u>
Cash	\$15,200	
Supplies	2,500	
Prepaid Insurance	600	
Equipment	5,000	
Notes Payable		\$ 5,000
Accounts Payable		2,500
Unearned Service Revenue		1,200
Owner's Capital		10,000
Owner's Drawings	500	
Service Revenue		10,000
Salaries and Wages Expense	4,000	
Rent Expense	900	
	\$28,700	\$28,700

INTERNATIONAL NOTE

Internal controls are a system of checks and balances designed to detect and prevent fraud and errors. The Sarbanes-Oxley Act requires U.S. companies to enhance their systems of internal control. However, many foreign companies do not have to meet strict internal control requirements. Some U.S. companies believe that this gives foreign firms an unfair advantage because developing and maintaining internal controls can be very expensive.

ILLUSTRATION 3.2

Categories of adjusting entries

ILLUSTRATION 3.3

Trial balance

We assume that Pioneer uses an accounting period of one month. Thus, monthly adjusting entries are made. The entries are dated October 31.

DO IT! 1 | Timing Concepts

Below is a list of timing concepts in the left column, with a description of the concept in the right column. There are more descriptions provided than concepts. Match the description to the concept.

- | | |
|---|--|
| 1. _____ Accrual-basis accounting. | (a) Monthly and quarterly time periods. |
| 2. _____ Calendar year. | (b) Efforts (expenses) should be recognized in the period in which a company uses assets or incurs liabilities to generate results (revenues). |
| 3. _____ Time period assumption. | (c) Accountants divide the economic life of a business into artificial time periods. |
| 4. _____ Expense recognition principle. | (d) Companies record revenues when they receive cash and record expenses when they pay out cash. |
| | (e) An accounting time period that starts on January 1 and ends on December 31. |
| | (f) Companies record transactions in the period in which the events occur. |

ACTION PLAN

- Review the definitions of the timing concepts in the Glossary Review section.
- Study carefully the revenue recognition principle, the expense recognition principle, and the time period assumption.

Adjusting Entries for Deferrals

LEARNING OBJECTIVE 2

Prepare adjusting entries for deferrals.

To defer means to postpone or delay. **Deferrals** are expenses or revenues that are recognized at a date later than the point when cash was originally exchanged. The two types of deferrals are prepaid expenses and unearned revenues.

Prepaid Expenses

When companies record payments of expenses that will benefit more than one accounting period, they record an asset called **prepaid expenses** or **prepayments**. When expenses are prepaid, an asset account is increased (debited) to show the service or benefit that the company will receive in the future. Examples of common prepayments are insurance, supplies, advertising, and rent. In addition, companies make prepayments when they purchase buildings and equipment.

Prepaid expenses are costs that expire either with the passage of time (e.g., rent and insurance) or through use (e.g., supplies). The expiration of these costs does not require daily entries, which would be impractical and unnecessary. Accordingly, companies postpone the recognition of such cost expirations until they prepare financial statements. At each statement date, they make adjusting entries to record the expenses applicable to the current accounting period and to show the remaining amounts in the asset accounts.

Prior to adjustment, assets are overstated and expenses are understated. Therefore, as shown in **Illustration 3.4**, an adjusting entry for prepaid expenses results in an increase (a debit) to an expense account and a decrease (a credit) to an asset account.

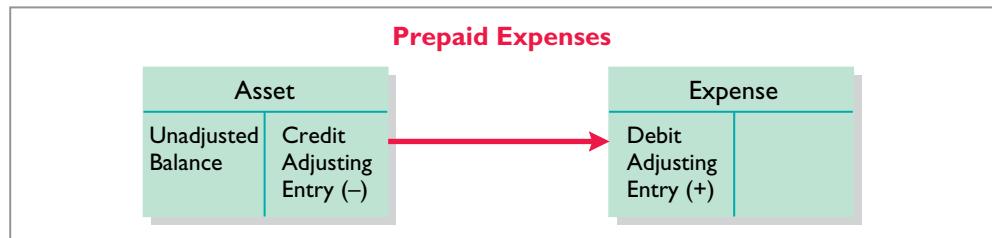

ILLUSTRATION 3.4

Adjusting entries for prepaid expenses

Let's look in more detail at some specific types of prepaid expenses, beginning with supplies.

Supplies

The purchase of supplies, such as paper and envelopes, results in an increase (a debit) to an asset account. During the accounting period, the company uses supplies. Rather than record supplies expense as the supplies are used, companies recognize supplies expense at the end of the accounting period. At the end of the accounting period, the company counts the remaining supplies. As shown in Illustration 3.5, the difference between the unadjusted balance in the Supplies (asset) account and the actual cost of supplies on hand represents the supplies used (an expense) for that period.

Recall from Chapter 2 that Pioneer Advertising purchased supplies costing \$2,500 on October 5. Pioneer recorded the purchase by increasing (debiting) the asset Supplies. This account shows a balance of \$2,500 in the October 31 trial balance. An inventory count at the close of business on October 31 reveals that \$1,000 of supplies are still on hand. Thus, the cost of supplies used is \$1,500 ($\$2,500 - \$1,000$). This use of supplies decreases an asset, Supplies. It also decreases owner's equity by increasing an expense account, Supplies Expense. This is shown in **Illustration 3.5**.

Supplies

Oct. 5

Supplies purchased;
record asset

Oct. 31

Supplies used;
record supplies expense

ILLUSTRATION 3.5 Adjustment for supplies

Basic Analysis	The expense Supplies Expense is increased \$1,500; the asset Supplies is decreased \$1,500.																																				
Equation Analysis	(1) $\begin{array}{c} \text{Assets} \\ \hline \text{Supplies} \\ \hline -\$1,500 \end{array} = \begin{array}{c} \text{Liabilities} \\ + \\ \text{Owner's Equity} \\ \hline \text{Supplies Expense} \\ \hline -\$1,500 \end{array}$																																				
Debit–Credit Analysis	Debits increase expenses: debit Supplies Expense \$1,500. Credits decrease assets: credit Supplies \$1,500.																																				
Journal Entry	Oct. 31 Supplies Expense 126 631 Supplies 1,500 1,500 (To record supplies used)																																				
Posting	<table border="1"> <tr> <td>Supplies</td> <td>126</td> <td>Oct. 5</td> <td>2,500</td> <td>Oct. 31</td> <td>Adj. 1,500</td> </tr> <tr> <td></td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td></td> <td></td> <td></td> <td>Bal. 1,000</td> <td></td> <td></td> </tr> </table> <table border="1"> <tr> <td>Supplies Expense</td> <td>631</td> <td>Oct. 31</td> <td>Adj. 1,500</td> <td></td> </tr> <tr> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td></td> <td></td> <td></td> <td>Bal. 1,500</td> <td></td> </tr> </table>				Supplies	126	Oct. 5	2,500	Oct. 31	Adj. 1,500										Bal. 1,000			Supplies Expense	631	Oct. 31	Adj. 1,500										Bal. 1,500	
Supplies	126	Oct. 5	2,500	Oct. 31	Adj. 1,500																																
			Bal. 1,000																																		
Supplies Expense	631	Oct. 31	Adj. 1,500																																		
			Bal. 1,500																																		

After adjustment, the asset account Supplies shows a balance of \$1,000, which is equal to the cost of supplies on hand at the statement date. In addition, Supplies Expense shows a balance of \$1,500, which equals the cost of supplies used in October. **If Pioneer does not make the adjusting entry, October expenses are understated and net income is overstated by \$1,500.** Moreover, both assets and owner's equity will be overstated by \$1,500 on the October 31 balance sheet.

I YEAR \$600																															
Oct. 31																															
Insurance expired; record insurance expense																															

Insurance

Companies purchase insurance to protect themselves from losses due to fire, theft, and unforeseen events. Insurance must be paid in advance, often for multiple months. The cost of insurance (premiums) paid in advance is recorded as an increase (debit) in the asset account Prepaid Insurance. At the financial statement date, companies increase (debit) Insurance Expense and decrease (credit) Prepaid Insurance for the cost of insurance that has expired during the period.

On October 4, Pioneer Advertising paid \$600 for a one-year fire insurance policy. Coverage began on October 1. Pioneer recorded the payment by increasing (debiting) Prepaid Insurance. This account shows a balance of \$600 in the October 31 trial balance. Insurance of \$50 ($\$600 \div 12$) expires each month. The expiration of prepaid insurance decreases an asset, Prepaid Insurance. It also decreases owner's equity by increasing an expense account, Insurance Expense.

As shown in **Illustration 3.6**, the asset Prepaid Insurance shows a balance of \$550, which represents the unexpired cost for the remaining 11 months of coverage. At the same time, the balance in Insurance Expense equals the insurance cost that expired in October. **If Pioneer does not make this adjustment, October expenses are understated by \$50 and net income is overstated by \$50. Moreover, both assets and owner's equity will be overstated by \$50 on the October 31 balance sheet.**

Depreciation

A company typically owns a variety of assets that have long lives, such as buildings, equipment, and motor vehicles. The period of service is referred to as the **useful life** of the asset. Because a building is expected to be of service for many years, it is recorded as an asset, rather than an expense, on the date it is acquired. As explained in Chapter 1, companies record such assets **at cost**, as required by the historical cost principle. To follow the expense recognition principle, companies allocate a portion of this cost as an expense during each period of the

asset's useful life. **Depreciation** is the process of allocating the cost of an asset to expense over its useful life.

Need for Adjustment. The acquisition of long-lived assets is essentially a long-term prepayment for the use of an asset. An adjusting entry for depreciation is needed to recognize the cost that has been used (an expense) during the period and to report the unused cost (an asset) at the end of the period. One very important point to understand: **Depreciation is an allocation concept, not a valuation concept.** That is, depreciation **allocates an asset's cost to the periods in which it is used. Depreciation does not attempt to report the actual change in the value of the asset.**

For Pioneer Advertising, assume that depreciation on the equipment is \$480 a year, or \$40 per month. As shown in **Illustration 3.7**, rather than decrease (credit) the asset account directly, Pioneer instead credits Accumulated Depreciation—Equipment. Accumulated Depreciation is called a **contra asset account**. Such an account is offset against an asset account on the balance sheet (see **Helpful Hint**). Thus, the Accumulated Depreciation—Equipment account offsets the asset Equipment. **This account keeps track of the total amount of depreciation expense taken over the life of the asset.** To keep the accounting equation in balance, Pioneer decreases owner's equity by increasing an expense account, Depreciation Expense.

HELPFUL HINT

All contra accounts have increases, decreases, and normal balances opposite to the account to which they relate.

The balance in the Accumulated Depreciation—Equipment account will increase \$40 each month, and the balance in Equipment remains \$5,000.

Statement Presentation. As indicated, Accumulated Depreciation—Equipment is a contra asset account. It is offset against Equipment on the balance sheet. The normal balance of a contra asset account is a credit. A theoretical alternative to using a contra asset account would be to decrease (credit) the asset account by the amount of depreciation each period. But using the contra account is preferable for a simple reason: It discloses **both** the original cost of the equipment **and** the total cost that has been expensed to date. Thus, in the balance sheet, Pioneer deducts Accumulated Depreciation—Equipment from the related asset account, as shown in **Illustration 3.8**.

ILLUSTRATION 3.8

Equipment	\$5,000
Less: Accumulated depreciation—equipment	40
	\$4,960

ALTERNATIVE TERMINOLOGY

Book value is also referred to as *carrying value*.

Book value is the difference between the cost of any depreciable asset and its related accumulated depreciation (see **Alternative Terminology**). In Illustration 3.8, the book value of the equipment at the balance sheet date is \$4,960. The book value and the fair value of the asset are generally two different values. As noted earlier, **the purpose of depreciation is not valuation but a means of cost allocation**.

Depreciation expense identifies the portion of an asset's cost that expired during the period (in this case, in October). The accounting equation shows that **without this adjusting entry, total assets, total owner's equity, and net income are overstated by \$40 and depreciation expense is understated by \$40**.

Illustration 3.9 summarizes the accounting for prepaid expenses.

Unearned Revenues

When companies receive cash before services are performed, they record a liability by increasing (crediting) a liability account called **unearned revenues**. In other words, a **company now has a performance obligation** (liability) to transfer a service to one of its customers. Items like rent, magazine subscriptions, and customer deposits for future service may result in unearned revenues. Airlines such as **United, Southwest, and Delta**, for instance, treat receipts from the sale of tickets as unearned revenue until the flight service is provided.

Unearned revenues are the opposite of prepaid expenses. Indeed, unearned revenue on the books of one company is likely to be a prepaid expense on the books of the company that has made the advance payment. For example, if identical accounting periods are assumed, a landlord will have unearned rent revenue when a tenant has prepaid rent.

When a company receives payment for services to be performed in a future accounting period, it increases (credits) an unearned revenue (a liability) account to recognize the liability that exists. The company subsequently recognizes revenues when it performs the service (see **Illustration 3.10**).

ILLUSTRATION 3.10

Adjusting entries for unearned revenues

Unearned Revenues

During the accounting period, it is not practical to make daily entries as the company performs services. Instead, the company delays recognition of revenue until the adjustment process. Then, the company makes an adjusting entry to record the revenue for services performed during the period and to show the liability that remains at the end of the accounting period. Typically, prior to adjustment, liabilities are overstated and revenues are understated. Therefore, the adjusting entry for unearned revenues results in a decrease (a debit) to a liability account and an increase (a credit) to a revenue account.

Pioneer Advertising received \$1,200 on October 2 from R. Knox for advertising services expected to be completed by December 31. Pioneer credited the payment to Unearned Service Revenue. This liability account shows a balance of \$1,200 in the October 31 trial balance. From an evaluation of the services Pioneer performed for Knox during October, the company determines that it should recognize \$400 of revenue in October. The liability (Unearned Service Revenue) is therefore decreased, and owner's equity (Service Revenue) is increased.

As shown in **Illustration 3.11**, the liability Unearned Service Revenue now shows a balance of \$800. That amount represents the remaining advertising services Pioneer is obligated to perform in the future. At the same time, Service Revenue shows total revenue recognized in October of \$10,400. **Without this adjustment, revenues and net income are understated by \$400 in the income statement. Moreover, liabilities will be overstated and owner's equity will be understated by \$400 on the October 31 balance sheet.**

Accounting Across the Organization Best Buy

© Skip O'Donnell/iStockphoto

Turning Gift Cards into Revenue

Those of you who are marketing majors (and even most of you who are not) know that gift cards are among the hottest marketing tools in merchandising today. Customers purchase gift cards and give them to someone for later use. In a recent year, gift-card sales were expected to exceed \$124 billion.

Although these programs are popular with marketing executives, they create accounting questions. Should

revenue be recorded at the time the gift card is sold, or when it is exercised? How should expired gift cards be accounted for? In a recent balance sheet, **Best Buy** reported unearned revenue related to gift cards of \$427 million.

Source: "2014 Gift Card Sales to Top \$124 Billion, but Growth Slowing," PR Newswire (December 10, 2014).

Suppose that Robert Jones purchases a \$100 gift card at Best Buy on December 24, 2019, and gives it to his wife, Mary Jones, on December 25, 2019. On January 3, 2020, Mary uses the card to purchase \$100 worth of CDs. When do you think Best Buy should recognize revenue and why? (Go to WileyPLUS for this answer and additional questions.)

DO IT! 2 | Adjusting Entries for Deferrals

The ledger of Hammond Company, on March 31, 2020, includes these selected accounts before adjusting entries are prepared.

	<u>Debit</u>	<u>Credit</u>
Prepaid Insurance	\$ 3,600	
Supplies	2,800	
Equipment	25,000	
Accumulated Depreciation—Equipment		\$5,000
Unearned Service Revenue		9,200

An analysis of the accounts shows the following.

1. Insurance expires at the rate of \$100 per month.
2. Supplies on hand total \$800.
3. The equipment depreciates \$200 a month.
4. During March, services were performed for \$4,000 of the unearned service revenue reported.

Prepare the adjusting entries for the month of March.

Solution

1. Insurance Expense	100	100
Prepaid Insurance (To record insurance expired)		
2. Supplies Expense (\$2,800 – \$800)	2,000	2,000
Supplies (To record supplies used)		
3. Depreciation Expense	200	200
Accumulated Depreciation—Equipment (To record monthly depreciation)		
4. Unearned Service Revenue	4,000	4,000
Service Revenue (To record revenue for services performed)		

ACTION PLAN

- Make adjusting entries at the end of the period for revenues recognized and expenses incurred in the period.
- Don't forget to make adjusting entries for deferrals. Failure to adjust for deferrals leads to overstatement of the asset or liability and understatement of the related expense or revenue.

Adjusting Entries for Accruals

LEARNING OBJECTIVE 3

Prepare adjusting entries for accruals.

The second category of adjusting entries is **accruals**. Prior to an accrual adjustment, the revenue account (and the related asset account) or the expense account (and the related liability account) are understated. Thus, the adjusting entry for accruals will **increase both a balance sheet and an income statement account**.

Accrued Revenues

Revenues for services performed but not yet recorded at the statement date are **accrued revenues**. Accrued revenues may accumulate (accrue) with the passing of time, as in the case of interest revenue. These are unrecorded because the earning of interest does not involve daily transactions. Companies do not record interest revenue on a daily basis because it is often impractical to do so. Accrued revenues also may result from services that have been performed but not yet billed nor collected, as in the case of commissions and fees. These may be unrecorded because only a portion of the total service has been performed and the clients will not be billed until the service has been completed.

An adjusting entry records the receivable that exists at the balance sheet date and the revenue for the services performed during the period. Prior to adjustment, both assets and revenues are understated. As shown in **Illustration 3.13**, an **adjusting entry for accrued revenues results in an increase (a debit) to an asset account and an increase (a credit) to a revenue account**.

Accrued Revenues

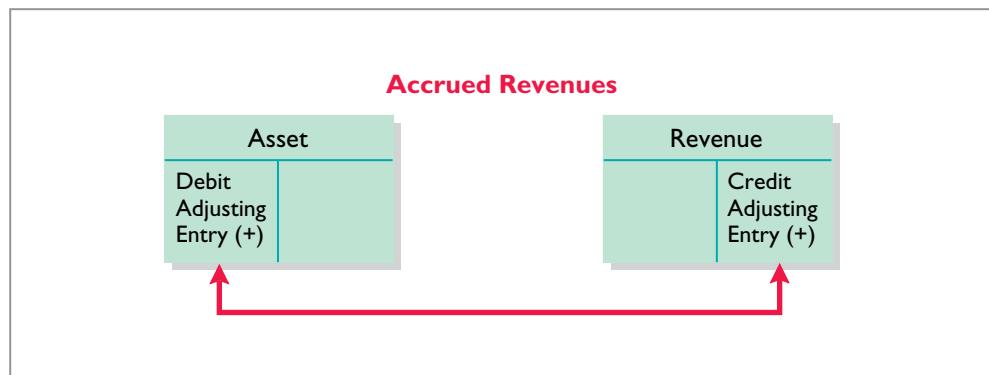

Revenue and receivable are recorded for unbilled services

Nov. 10

Cash is received; receivable is reduced

ILLUSTRATION 3.13 Adjusting entries for accrued revenues

In October, Pioneer Advertising performed services worth \$200 that were not billed to clients on or before October 31. Because these services were not billed, they were not recorded. The accrual of unrecorded service revenue increases an asset account, Accounts Receivable. It also increases owner's equity by increasing a revenue account, Service Revenue, as shown in **Illustration 3.14**.

ILLUSTRATION 3.14 Adjustment for accrued revenue

Basic Analysis	The asset Accounts Receivable is increased \$200; the revenue Service Revenue is increased \$200.													
Equation Analysis	$\begin{array}{c} \text{Assets} \\ \hline \text{Accounts} \\ \text{Receivable} \\ + \$200 \end{array} = \begin{array}{c} \text{Liabilities} \\ + \\ \text{Owner's Equity} \\ \hline \text{Service Revenue} \\ + \$200 \end{array}$													
Debit–Credit Analysis	Debits increase assets: debit Accounts Receivable \$200. Credits increase revenues: credit Service Revenue \$200.

ILLUSTRATION 3.15**Accounting for accrued revenues****ETHICS NOTE**

A report released by Fannie Mae's board of directors stated that improper adjusting entries at the mortgage-finance company resulted in delayed recognition of expenses caused by interest rate changes. The motivation for such accounting apparently was the desire to hit earnings estimates.

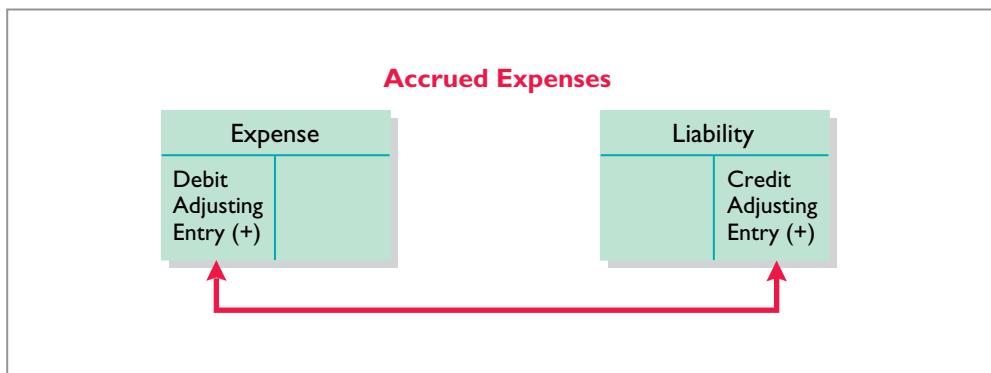

Accounting for Accrued Revenues

<u>Examples</u>	<u>Reason for Adjustment</u>	<u>Accounts Before Adjustment</u>	<u>Adjusting Entry</u>
Interest, rent, services	Services performed but not yet received in cash or recorded.	Assets understated. Revenues understated.	Dr. Assets Cr. Revenues

Accrued Expenses

Expenses incurred but not yet paid or recorded at the statement date are called **accrued expenses**. Interest, taxes, and salaries are common examples of accrued expenses.

Companies make adjustments for accrued expenses to record the obligations that exist at the balance sheet date and to recognize the expenses that apply to the current accounting period (see **Ethics Note**). Prior to adjustment, both liabilities and expenses are understated. Therefore, as **Illustration 3.16** shows, an adjusting entry for accrued expenses results in an increase (a debit) to an expense account and an increase (a credit) to a liability account.

**ILLUSTRATION 3.16**

Adjusting entries for accrued expenses

Let's look in more detail at some specific types of accrued expenses, beginning with accrued interest.

Accrued Interest

Pioneer Advertising signed a three-month note payable in the amount of \$5,000 on October 1. The note requires Pioneer to pay interest at an annual rate of 12%.

The amount of the interest recorded is determined by three factors: (1) the face value of the note; (2) the interest rate, which is always expressed as an annual rate; and (3) the length of time the note is outstanding. For Pioneer, the total interest due on the \$5,000 note at its maturity date three months in the future is \$150 ($\$5,000 \times 12\% \times \frac{3}{12}$), or \$50 for one month. **Illustration 3.17** shows the formula for computing interest and its application to Pioneer for the month of October (see **Helpful Hint**).

HELPFUL HINT

In computing interest, we express the time period as a fraction of a year.

Face Value of Note	\times	Annual Interest Rate	\times	Time in Terms of One Year	=	Interest
\$5,000	\times	12%	\times	$\frac{1}{12}$	=	\$50

As **Illustration 3.18** shows, the accrual of interest at October 31 increases a liability account, Interest Payable. It also decreases owner's equity by increasing an expense account, Interest Expense.

ILLUSTRATION 3.18 Adjustment for accrued interest

Basic Analysis	The expense Interest Expense is increased \$50; the liability Interest Payable is increased \$50.												
Equation Analysis	$\text{Assets} = \frac{\text{Liabilities}}{\text{Interest Payable} + \$50} + \frac{\text{Owner's Equity}}{\text{Interest Expense} - \$50}$												
Debit–Credit Analysis	Debits increase expenses: debit Interest Expense \$50. Credits increase liabilities: credit Interest Payable \$50.												
Journal Entry	Oct. 31 Interest Expense Interest Payable Interest Payable (To record interest on notes payable) 905 50 50												
Posting	<table border="1"> <tr> <td>Interest Expense</td> <td>905</td> <td>Interest Payable</td> <td>230</td> </tr> <tr> <td>Oct. 31 Adj. 50</td> <td></td> <td>Oct. 31 Adj. 50</td> <td></td> </tr> <tr> <td>Oct. 31 Bal. 50</td> <td></td> <td>Oct. 31 Bal. 50</td> <td></td> </tr> </table>	Interest Expense	905	Interest Payable	230	Oct. 31 Adj. 50		Oct. 31 Adj. 50		Oct. 31 Bal. 50		Oct. 31 Bal. 50	
Interest Expense	905	Interest Payable	230										
Oct. 31 Adj. 50		Oct. 31 Adj. 50											
Oct. 31 Bal. 50		Oct. 31 Bal. 50											

Interest Expense shows the interest charges for the month of October. Interest Payable shows the amount of interest the company owes at the statement date. Pioneer will not pay the interest until the note comes due at the end of three months. Companies use the Interest Payable account, instead of crediting Notes Payable, to disclose the two different types of obligations—interest and principal—in the accounts and statements. **Without this adjusting entry, liabilities and interest expense are understated, and net income and owner's equity are overstated.**

Accrued Salaries and Wages

Companies pay for some types of expenses, such as employee salaries and wages, after the services have been performed. Pioneer Advertising paid salaries and wages on October 26 for its employees' first two weeks of work. The next payment of salaries will not occur until November 9. As **Illustration 3.19** shows, three working days remain in October (October 29–31).

ILLUSTRATION 3.19

Calendar showing Pioneer's pay periods

October							November						
S	M	Tu	W	Th	F	S	S	M	Tu	W	Th	F	S
1	2	3	4	5	6			1	2	3			
7	8	9	10	11	12	13	4	5	6	7	8	9	10
14	15	16	17	18	19	20	11	12	13	14	15	16	17
21	22	23	24	25	26	27	18	19	20	21	22	23	24
28	29	30	31				25	26	27	28	29	30	

Start of pay period **Adjustment period** **Payday**

Payday

At October 31, the salaries and wages for these three days represent an accrued expense and a related liability to Pioneer. The employees receive total salaries and wages of \$2,000 for a five-day work week, or \$400 per day. Thus, accrued salaries and wages at October 31 are \$1,200 ($\400×3). This accrual increases a liability, Salaries and Wages Payable. It also decreases owner's equity by increasing an expense account, Salaries and Wages Expense, as shown in **Illustration 3.20**.

ILLUSTRATION 3.20 Adjustment for accrued salaries and wages

Basic Analysis	The expense Salaries and Wages Expense is increased \$1,200; the liability Salaries and Wages Payable is increased \$1,200.																								
Equation Analysis	$\begin{array}{c} \text{Assets} = \text{Liabilities} + \text{Owner's Equity} \\ \text{Salaries and Wages Payable} \\ \quad + \$1,200 \\ \text{Salaries and Wages Expense} \\ \quad - \$1,200 \end{array}$																								
Debit–Credit Analysis	Debits increase expenses: debit Salaries and Wages Expense \$1,200. Credits increase liabilities: credit Salaries and Wages Payable \$1,200.																								
Journal Entry	<table border="1" style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 10%;">Oct. 31</td> <td style="width: 60%;">Salaries and Wages Expense Salaries and Wages Payable (To record accrued salaries and wages)</td> <td style="width: 10%; text-align: center;">726 212</td> <td style="width: 10%; text-align: center;">1,200</td> <td style="width: 10%; text-align: center;">1,200</td> </tr> </table>	Oct. 31	Salaries and Wages Expense Salaries and Wages Payable (To record accrued salaries and wages)	726 212	1,200	1,200																			
Oct. 31	Salaries and Wages Expense Salaries and Wages Payable (To record accrued salaries and wages)	726 212	1,200	1,200																					
Posting	<table border="1" style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 25%;">Oct. 26</td> <td style="width: 25%;">4,000</td> <td style="width: 25%; text-align: right;">726</td> <td style="width: 25%; text-align: right;">Salaries and Wages Expense</td> </tr> <tr> <td>31</td> <td>Adj. 1,200</td> <td></td> <td></td> </tr> <tr> <td>Oct. 31</td> <td>Bal. 5,200</td> <td></td> <td></td> </tr> </table> <table border="1" style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 25%;">Oct. 31</td> <td style="width: 25%; text-align: right;">Adj. 1,200</td> <td style="width: 25%; text-align: right;">212</td> <td style="width: 25%; text-align: right;">Salaries and Wages Payable</td> </tr> <tr> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td></td> <td></td> <td></td> <td>Oct. 31 Bal. 1,200</td> </tr> </table>	Oct. 26	4,000	726	Salaries and Wages Expense	31	Adj. 1,200			Oct. 31	Bal. 5,200			Oct. 31	Adj. 1,200	212	Salaries and Wages Payable								Oct. 31 Bal. 1,200
Oct. 26	4,000	726	Salaries and Wages Expense																						
31	Adj. 1,200																								
Oct. 31	Bal. 5,200																								
Oct. 31	Adj. 1,200	212	Salaries and Wages Payable																						
			Oct. 31 Bal. 1,200																						

After this adjustment, the balance in Salaries and Wages Expense of \$5,200 ($13 \text{ days} \times \400) is the actual salary and wages expense for October. The balance in Salaries and Wages Payable of \$1,200 is the amount of the liability for salaries and wages Pioneer owes as of October 31. **Without the \$1,200 adjustment for salaries and wages, Pioneer's expenses are understated \$1,200 and its liabilities are understated \$1,200.**

Pioneer pays salaries and wages every two weeks. Consequently, the next payday is November 9, when the company will again pay total salaries and wages of \$4,000. The payment consists of \$1,200 of salaries and wages payable at October 31 plus \$2,800 of salaries and wages expense for November (7 working days, as shown in the November calendar $\times \$400$). Therefore, Pioneer makes the following entry on November 9.

Nov. 9	Salaries and Wages Payable	1,200	
	Salaries and Wages Expense	2,800	
	Cash	4,000	
	(To record November 9 payroll)		

A	=	L	+ OE
		-1,200	
		-2,800	
		<u>-4,000</u>	
	Cash Flows	\$	
		-4,000	

This entry eliminates the liability for Salaries and Wages Payable that Pioneer recorded in the October 31 adjusting entry, and it records the proper amount of Salaries and Wages Expense for the period between November 1 and November 9.

Illustration 3.21 summarizes the accounting for accrued expenses.

Got Junk?

Do you have an old computer or two that you no longer use? How about an old TV that needs replacing? Many people do. Approximately 163,000 computers and televisions become obsolete each day. Yet, in a recent year, only 11% of computers were recycled. It is estimated that 75% of all

computers ever sold are sitting in storage somewhere, waiting to be disposed of. Each of these old TVs and computers is loaded with lead, cadmium, mercury, and other toxic chemicals. If you have one of these electronic gadgets, you have a responsibility, and a probable cost, for disposing of it. Companies have the same problem, but their discarded materials may include lead paint, asbestos, and other toxic chemicals.

What accounting issue might this cause for companies? (Go to WileyPLUS for this answer and additional questions.)

Summary of Basic Relationships

Illustration 3.22 summarizes the four basic types of adjusting entries. Take some time to study and analyze the adjusting entries. Be sure to note that **each adjusting entry affects one balance sheet account and one income statement account**.

ILLUSTRATION 3.22**Summary of adjusting entries**

Type of Adjustment	Accounts Before Adjustment	Adjusting Entry
Prepaid expenses	Assets overstated. Expenses understated.	Dr. Expenses Cr. Assets or Contra Assets
Unearned revenues	Liabilities overstated. Revenues understated.	Dr. Liabilities Cr. Revenues
Accrued revenues	Assets understated. Revenues understated.	Dr. Assets Cr. Revenues
Accrued expenses	Expenses understated. Liabilities understated.	Dr. Expenses Cr. Liabilities

Illustrations 3.23 and **3.24** show the journalizing and posting of adjusting entries for Pioneer Advertising on October 31. The ledger identifies all adjustments by the reference J2 because they have been recorded on page 2 of the general journal. The company may insert a center caption “Adjusting Entries” between the last transaction entry and the first adjusting entry in the journal. When you review the general ledger in Illustration 3.24, note that the entries highlighted in red are the adjustments.

ILLUSTRATION 3.23**General journal showing adjusting entries**

- (1) **Adjusting entries should not involve debits or credits to Cash.**
- (2) **Evaluate whether the adjustment makes sense. For example, an adjustment to recognize supplies used should increase Supplies Expense.**
- (3) **Double-check all computations.**
- (4) **Each adjusting entry affects one balance sheet account and one income statement account.**

DO IT! 3 | Adjusting Entries for Accruals

Micro Computer Services began operations on August 1, 2020. At the end of August 2020, management prepares monthly financial statements. The following information relates to August.

- At August 31, the company owed its employees \$800 in salaries and wages that will be paid on September 1.
- On August 1, the company borrowed \$30,000 from a local bank on a 15-year mortgage. The annual interest rate is 10%.
- Revenue for services performed but unrecorded for August totaled \$1,100.

Prepare the adjusting entries needed at August 31, 2020.

Solution

1. Salaries and Wages Expense		800		800
Salaries and Wages Payable (To record accrued salaries)				
2. Interest Expense		250		250
Interest Payable (To record accrued interest: $\$30,000 \times 10\% \times \frac{1}{12} = \250)				
3. Accounts Receivable		1,100		1,100
Service Revenue (To record revenue for services performed)				

Related exercise material: BE3.7, DO IT! 3.3, E3.5, E3.6, E3.7, E3.8 and E3.9.

ACTION PLAN

- Make adjusting entries at the end of the period to recognize revenues for services performed and for expenses incurred.
- Don't forget to make adjusting entries for accruals. Adjusting entries for accruals will increase both a balance sheet and an income statement account.

Adjusted Trial Balance and Financial Statements

LEARNING OBJECTIVE 4

Describe the nature and purpose of an adjusted trial balance.

After a company has journalized and posted all adjusting entries, it prepares another trial balance from the ledger accounts. This trial balance is called an **adjusted trial balance**. It shows the balances of all accounts, including those adjusted, at the end of the accounting period. The purpose of an adjusted trial balance is to **prove the equality** of the total debit balances and the total credit balances in the ledger after all adjustments. Because the accounts contain all data needed for financial statements, the adjusted trial balance is the **primary basis for the preparation of financial statements**.

Preparing the Adjusted Trial Balance

Illustration 3.25 presents the adjusted trial balance for Pioneer Advertising prepared from the ledger accounts in Illustration 3.24. The amounts affected by the adjusting entries are highlighted in red. Compare these amounts to those in the unadjusted trial balance in Illustration 3.3. In this comparison, you will see that there are more accounts in the adjusted trial balance as a result of the adjusting entries made at the end of the month.

Pioneer Advertising Adjusted Trial Balance October 31, 2020		
	<u>Debit</u>	<u>Credit</u>
Cash	\$15,200	
Accounts Receivable	200	
Supplies	1,000	
Prepaid Insurance	550	
Equipment	5,000	
Accumulated Depreciation—Equipment		\$ 40
Notes Payable		5,000
Accounts Payable		2,500
Interest Payable		50
Unearned Service Revenue		800
Salaries and Wages Payable		1,200
Owner's Capital		10,000
Owner's Drawings	500	
Service Revenue		10,600
Salaries and Wages Expense	5,200

Depreciation Expense	40	
	\$30,190	\$30,190

ILLUSTRATION 3.25
Adjusted trial balance

Preparing Financial Statements

Companies can prepare financial statements directly from the adjusted trial balance. **Illustrations 3.26** and **3.27** present the interrelationships of data in the adjusted trial balance and the financial statements.

As Illustration 3.26 shows, companies prepare the income statement from the revenue and expense accounts. Next, they use the owner's capital and drawings accounts and the net income (or net loss) from the income statement to prepare the owner's equity statement.

ILLUSTRATION 3.26 Preparation of the income statement and owner's equity statement from the adjusted trial balance

The diagram illustrates the preparation of financial statements from the Adjusted Trial Balance. Red arrows point from the trial balance to the Income Statement, and blue arrows point from the trial balance to the Owner's Equity Statement.

Pioneer Advertising Adjusted Trial Balance October 31, 2020		
Account	Debit	Credit
Cash	\$15,200	
Accounts Receivable	200

DO IT! 4 | Trial Balance

Skolnick Co. was organized on April 1, 2020. The company prepares quarterly financial statements. The adjusted trial balance amounts at June 30 are shown below.

	Debit	Credit
Cash	\$ 6,700	Accumulated Depreciation—
Accounts Receivable	600	Equipment
Prepaid Rent	900	Notes Payable
Supplies	1,000	Accounts Payable
Equipment	15,000	Salaries and Wages Payable
Owner's Drawings	600	Interest Payable
Salaries and Wages Expense	9,400	Unearned Rent Revenue
Rent Expense	1,500	Owner's Capital
Depreciation Expense	850	Service Revenue
Supplies Expense	200	Rent Revenue
Utilities Expense	510	
Interest Expense	50	
	<u>\$37,310</u>	<u>\$37,310</u>

ACTION PLAN

- In an adjusted trial balance, all asset, liability, revenue, and expense accounts are properly stated.
- To determine the ending balance in Owner's Capital, add net income and subtract dividends.

- Determine the net income for the quarter April 1 to June 30.
- Determine the total assets and total liabilities at June 30, 2020, for Skolnick Co.
- Determine the amount of owner's capital at June 30, 2020.

Solution

- a. The net income is determined by adding revenues and subtracting expenses. The net income is computed as follows.

Revenues	
Service revenue	\$14,200
Rent revenue	800
Total revenues	<u> </u>
	\$15,000
Expenses	
Salaries and wages expense	9,400
Rent expense	1,500
Depreciation expense	850
Utilities expense	510
Supplies expense	200
Interest expense	50
Total expenses	<u> </u>
	12,510
Net income	<u> </u>
	<u> </u> \$ 2,490

- b. Total assets and liabilities are computed as follows.

Assets	Liabilities
Cash	\$ 6,700
Accounts receivable	600
Supplies	1,000
Prepaid rent	900
Equipment	\$15,000
Less: Accumulated depreciation—equipment	<u> </u>
	850
Total assets	<u> </u>
	\$23,350
	<u> </u>
c. Owner's capital, April 1	\$ 0
Add: Investments	14,000
Net income	2,490
Less: Owner's drawings	<u> </u>
	600
Owner's capital, June 30	<u> </u>
	<u> </u> \$15,890
	<u> </u>
Total liabilities	<u> </u>
	<u> </u> \$7,460
	<u> </u>

Related exercise material: BE3.9, BE3.10, DO IT! 3.4, and E3.11.

Appendix 3A**Alternative Treatment of Deferrals****LEARNING OBJECTIVE *5**

Prepare adjusting entries for the alternative treatment of deferrals.

In discussing adjusting entries for prepaid expenses and unearned revenues, we illustrated transactions for which companies made the initial entries to balance sheet accounts. In the case of prepaid expenses, the company debited the prepayment to an asset account. In the case of unearned revenue, the company credited a liability account to record the cash received.

Some companies use an alternative treatment. (1) When a company prepays an expense, it debits that amount to an expense account. (2) When it receives payment for future services, it credits the amount to a revenue account. In this appendix, we describe the circumstances

that justify such entries and the different adjusting entries that may be required. This alternative treatment of prepaid expenses and unearned revenues has the same effect on the financial statements as the procedures described in the chapter.

Prepaid Expenses

Prepaid expenses become expired costs either through the passage of time (e.g., insurance) or through consumption (e.g., advertising supplies). If at the time of purchase the company expects to consume the supplies before the next financial statement date, **it may choose to debit (increase) an expense account rather than an asset account. This alternative treatment is simply more convenient.**

Assume that Pioneer Advertising expects that it will use before the end of the month all of the supplies purchased on October 5. A debit of \$2,500 to Supplies Expense (rather than to the asset account Supplies) on October 5 will eliminate the need for an adjusting entry on October 31. At October 31, the Supplies Expense account will show a balance of \$2,500, which is the cost of supplies used between October 5 and October 31.

But what if the company does not use all the supplies? For example, what if an inventory of \$1,000 of advertising supplies remains on October 31? Obviously, the company would need to make an adjusting entry. Prior to adjustment, the expense account Supplies Expense is overstated \$1,000, and the asset account Supplies is understated \$1,000. Thus, Pioneer makes the following adjusting entry.

A	=	L	+	OE
+1,000				+1,000 Exp
Cash Flows				
no effect				

Illustration 3A.1 shows the accounts after the company posts the adjusting entry.

Supplies			Supplies Expense		
10/31	Adj. 1,000		10/5	2,500	10/31 Adj. 1,000
			10/31 Bal. 1,500		

ILLUSTRATION 3A.1

Prepaid expenses accounts after adjustment

After adjustment, the asset account Supplies shows a balance of \$1,000, which is equal to the cost of supplies on hand at October 31. In addition, Supplies Expense shows a balance of \$1,500. This is equal to the cost of supplies used between October 5 and October 31. Without the adjusting entry, expenses are overstated and net income is understated by \$1,000 in the October income statement. Also, both assets and owner's equity are understated by \$1,000 on the October 31 balance sheet.

Illustration 3A.2 compares the entries and accounts for advertising supplies in the two adjustment approaches.

Prepayment Initially Debited to Asset Account (per chapter)			Prepayment Initially Debited to Expense Account (per appendix)		
Oct. 5	Supplies 2,500		Oct. 5	Supplies Expense 2,500	
	Accounts Payable 2,500			Accounts Payable 2,500	
Oct. 31	Supplies Expense 1,500		Oct. 31	Supplies 1,000	
	Supplies 1,500			Supplies Expense 1,000	

ILLUSTRATION 3A.2

Adjustment approaches—a comparison

After Pioneer posts the entries, the accounts appear as shown in **Illustration 3A.3**.

ILLUSTRATION 3A.3**Comparison of accounts**

(per chapter) Supplies					(per appendix) Supplies			
10/5	2,500	10/31	Adj.	1,500	10/31	Adj.	1,000	
10/31	Bal.	1,000						
Supplies Expense					Supplies Expense			
10/31	Adj.	1,500			10/5	2,500	10/31	Adj.
					10/31	Bal.	1,500	1,000

Note that the account balances under each alternative are the same at October 31: Supplies \$1,000 and Supplies Expense \$1,500.

Unearned Revenues

Unearned revenues are recognized as revenue at the time services are performed. Similar to the case for prepaid expenses, companies may credit (increase) a revenue account when they receive cash for future services.

To illustrate, assume that Pioneer Advertising received \$1,200 for future services on October 2. Pioneer expects to perform the services before October 31.¹ In such a case, the company credits Service Revenue. If Pioneer in fact performs the service before October 31, no adjustment is needed.

However, if at the statement date Pioneer has not performed \$800 of the services, it would make an adjusting entry (see **Helpful Hint**). Without the entry, the revenue account Service Revenue is overstated \$800, and the liability account Unearned Service Revenue is understated \$800. Thus, Pioneer makes the following adjusting entry.

HELPFUL HINT

The required adjusted balances here are Service Revenue \$400 and Unearned Service Revenue \$800.

$$A = L + OE$$

-800 Rev	Oct. 31	Service Revenue	800
+800		Unearned Service Revenue	800

Cash Flows
no effect

Oct. 31	Service Revenue	800	
	Unearned Service Revenue		800
	(To record unearned service revenue)		

Illustration 3A.4 shows the accounts after Pioneer posts the adjusting entry.

ILLUSTRATION 3A.4**Unearned service revenue accounts after adjustment**

Unearned Service Revenue				Service Revenue			
	10/31	Adj.	800	10/31	Adj.	800	10/2 10/31 Bal. 400

The liability account Unearned Service Revenue shows a balance of \$800. This equals the services that will be performed in the future. In addition, the balance in Service Revenue equals the services performed in October. Without the adjusting entry, both revenues and net income are overstated by \$800 in the October income statement. Also, liabilities are understated by \$800 and owner's equity is overstated by \$800 on the October 31 balance sheet.

¹This example focuses only on the alternative treatment of unearned revenues. For simplicity, we have ignored the entries to Service Revenue pertaining to the immediate recognition of revenue (\$10,000) and the adjusting entry for accrued revenue (\$200).

Illustration 3A.5 compares the entries and accounts for initially recording unearned service revenue in (1) a liability account or (2) a revenue account.

Unearned Service Revenue Initially Credited to Liability Account (per chapter)			Unearned Service Revenue Initially Credited to Revenue Account (per appendix)		
Oct. 2 Cash	1,200		Oct. 2 Cash	1,200	
Unearned Service Revenue	1,200		Service Revenue	1,200	
Oct. 31 Unearned Service Revenue	400	400	Oct. 31 Service Revenue	800	
Service Revenue			Unearned Service Revenue		800

ILLUSTRATION 3A.5

Adjustment approaches—
a comparison

After Pioneer posts the entries, the accounts appear as shown in **Illustration 3A.6**.

(per chapter) Unearned Service Revenue				(per appendix) Unearned Service Revenue			
10/31	Adj.	400	10/2		1,200		10/31 Adj. 800
			10/31 Bal.	800			
Service Revenue				Service Revenue			
	10/31	Adj. 400		10/31 Adj. 800	10/2	1,200	
					10/31 Bal. 400		

ILLUSTRATION 3A.6

Comparison of accounts

Note that the balances in the accounts are the same under the two alternatives: Unearned Service Revenue \$800 and Service Revenue \$400.

Summary of Additional Adjustment Relationships

Illustration 3A.7 provides a summary of basic relationships for deferrals.

ILLUSTRATION 3A.7 Summary of basic relationships for deferrals

Type of Adjustment	Reason for Adjustment	Account Balances before Adjustment	Adjusting Entry
1. Prepaid expenses	(a) Prepaid expenses initially recorded in asset accounts have been used. (b) Prepaid expenses initially recorded in expense accounts have not been used.	Assets overstated. Expenses understated. Assets understated. Expenses overstated.	Dr. Expenses Cr. Assets Dr. Assets Cr. Expenses
2. Unearned revenues	(a) Unearned revenues initially recorded in liability accounts are now recognized as revenue. (b) Unearned revenues initially recorded in revenue accounts are still unearned.	Liabilities overstated. Revenues understated. Liabilities understated. Revenues overstated.	Dr. Liabilities Cr. Revenues Dr. Revenues Cr. Liabilities

Alternative adjusting entries **do not apply** to accrued revenues and accrued expenses because **no entries occur before companies make these types of adjusting entries.**

Appendix 3B

Financial Reporting Concepts

LEARNING OBJECTIVE *6

Discuss financial reporting concepts.

This appendix provides a summary of the concepts in action used in this textbook. In addition, it provides other useful concepts which accountants use as a basis for recording and reporting financial information.

Qualities of Useful Information

Recently, the FASB completed the first phase of a project in which it developed a conceptual framework to serve as the basis for future accounting standards. The framework begins by stating that the primary objective of financial reporting is to provide financial information that is **useful** to investors and creditors for making decisions about providing capital. Useful information should possess two fundamental qualities, relevance and faithful representation, as shown in **Illustration 3B.1**.

ILLUSTRATION 3B.1

Fundamental qualities of useful information

Relevance Accounting information has **relevance** if it would make a difference in a business decision. Information is considered relevant if it provides information that has **predictive value**, that is, helps provide accurate expectations about the future, and has **confirmatory value**, that is, confirms or corrects prior expectations. **Materiality** is a company-specific aspect of relevance. An item is material when its **size** makes it likely to influence the decision of an investor or creditor.

Faithful Representation **Faithful representation** means that information accurately depicts what really happened. To provide a faithful representation, information must be **complete** (nothing important has been omitted), **neutral** (is not biased toward one position or another), and **free from error**.

Enhancing Qualities

In addition to the two fundamental qualities, the FASB also describes a number of enhancing qualities of useful information. These include **comparability**, **verifiability**, **timeliness**, and **understandability**. In accounting, **comparability** results when different companies use the same accounting principles. Another type of comparability is consistency. **Consistency** means that a company uses the same accounting principles and methods from year to year. Information is **verifiable** if independent observers, using the same methods, obtain similar results. For accounting information to have relevance, it must be **timely**. That is, it must be available to decision-makers before it loses its capacity to influence decisions. For example, public companies like **Google** or **Best Buy** provide their annual reports to investors within 60 days of their year-end. Information has the quality of **understandability** if it is presented in a clear and concise fashion, so that reasonably informed users of that information can interpret it and comprehend its meaning.

Assumptions in Financial Reporting

To develop accounting standards, the FASB relies on some key assumptions, as shown in **Illustration 3B.2**. These include assumptions about the monetary unit, economic entity, time period, and going concern.

	<p>Monetary Unit Assumption The monetary unit assumption requires that only those things that can be expressed in money are included in the accounting records. This means that certain important information needed by investors, creditors, and managers, such as customer satisfaction, is not reported in the financial statements. This assumption relies on the monetary unit remaining relatively stable in value.</p>
	<p>Economic Entity Assumption The economic entity assumption states that every economic entity can be separately identified and accounted for. In order to assess a company's performance and financial position accurately, it is important to not blur company transactions with personal transactions (especially those of its managers) or transactions of other companies.</p>
	<p>Time Period Assumption Notice that the income statement, retained earnings statement, and statement of cash flows all cover periods of one year, and the balance sheet is prepared at the end of each year. The time period assumption states that the life of a business can be divided into artificial time periods and that useful reports covering those periods can be prepared for the business.</p>
	<p>Going Concern Assumption The going concern assumption states that the business will remain in operation for the foreseeable future. Of course, many businesses do fail, but in general it is reasonable to assume that the business will continue operating.</p>

ILLUSTRATION 3B.2

Key assumptions in financial reporting

Principles in Financial Reporting

Measurement Principles

GAAP generally uses one of two measurement principles, the historical cost principle or the fair value principle. Selection of which principle to follow generally relates to trade-offs between relevance and faithful representation.

Historical Cost Principle. The **historical cost principle** (or cost principle, discussed in Chapter 1) dictates that companies record assets at their cost. This is true not only at the time the asset is purchased but also over the time the asset is held. For example, if land that was purchased for \$30,000 increases in value to \$40,000, it continues to be reported at \$30,000.

Fair Value Principle. The **fair value principle** (discussed in Chapter 1) indicates that assets and liabilities should be reported at fair value (the price received to sell an asset or settle a liability). Fair value information may be more useful than historical cost for certain types of assets and liabilities. For example, certain investment securities are reported at fair value because market price information is often readily available for these types of assets. In choosing between cost and fair value, two qualities that make accounting information useful for decision-making are used—relevance and faithful representation. In determining which measurement principle to use, the factual nature of cost figures are weighed versus the relevance of fair value. In general, most assets follow the historical cost principle because fair values may not be representationally faithful. Only in situations where assets are actively traded, such as investment securities, is the fair value principle applied.

Revenue Recognition Principle

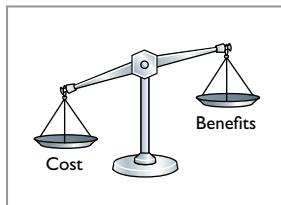

The **revenue recognition principle** requires that companies recognize revenue in the accounting period in which the performance obligation is satisfied. As discussed earlier in the chapter, in a service company, revenue is recognized at the time the service is performed. In a merchandising company, the performance obligation is generally satisfied when the goods transfer from the seller to the buyer (discussed in Chapter 5). At this point, the sales transaction is complete and the sales price established.

Expense Recognition Principle

The **expense recognition principle** (discussed earlier in the chapter) dictates that companies recognize expense in the period in which they make efforts to generate revenue. Thus, expenses follow revenues.

Full Disclosure Principle

The **full disclosure principle** (discussed in Chapter 11) requires that companies disclose all circumstances and events that would make a difference to financial statement users. If an important item cannot reasonably be reported directly in one of the four types of financial statements, then it should be discussed in notes that accompany the statements.

Cost Constraint

Providing information is costly. In deciding whether companies should be required to provide a certain type of information, accounting standard-setters consider the **cost constraint**. It weighs the cost that companies will incur to provide the information against the benefit that financial statement users will gain from having the information available.

Review and Practice

Learning Objectives Review

1 Explain the accrual basis of accounting and the reasons for adjusting entries.

The time period assumption assumes that the economic life of a business is divided into artificial time periods. Accrual-basis accounting means that companies record events that change a company's financial statements in the periods in which those events occur, rather than in the periods in which the company receives or pays cash.

Companies make adjusting entries at the end of an accounting period. Such entries ensure that companies recognize revenues in the period in which the performance obligation is satisfied and recognize expenses in the period in which they are incurred. The major types of adjusting entries are deferrals (prepaid expenses and unearned revenues) and accruals (accrued revenues and accrued expenses).

2 Prepare adjusting entries for deferrals.

Deferrals are either prepaid expenses or unearned revenues. Companies make adjusting entries for deferrals to record the portion of the prepayment that represents the expense incurred or the revenue for services performed in the current accounting period.

3 Prepare adjusting entries for accruals.

Accruals are either accrued revenues or accrued expenses. Companies make adjusting entries for accruals to record revenues for services performed and expenses incurred in the current accounting period that have not been recognized through daily entries.

4 Describe the nature and purpose of an adjusted trial balance.

An adjusted trial balance shows the balances of all accounts, including those that have been adjusted, at the end of an accounting period. Its purpose is to prove the equality of the total debit balances and total credit balances in the ledger after all adjustments.

***5 Prepare adjusting entries for the alternative treatment of deferrals.**

Companies may initially debit prepayments to an expense account. Likewise, they may credit unearned revenues to a revenue account. At the end of the period, these accounts may be overstated. The adjusting entries for prepaid expenses are a debit to an asset account and a credit to an expense account. Adjusting entries for unearned revenues are a debit to a revenue account and a credit to a liability account.

***6 Discuss financial reporting concepts.**

To be judged useful, information should have the primary characteristics of relevance and faithful representation. In addition, it

should be comparable, consistent, verifiable, timely, and understandable.

The **monetary unit assumption** requires that companies include in the accounting records only transaction data that can be expressed in terms of money. The **economic entity assumption** states that economic events can be identified with a particular unit of accountability. The **time period assumption** states that the economic life of a business can be divided into artificial time periods and that meaningful accounting reports can be prepared for each period. The **going concern assumption** states that the company will continue in operation long enough to carry out its existing objectives and commitments.

The **historical cost principle** states that companies should record assets at their cost. The **fair value principle** indicates that assets and liabilities should be reported at fair value. The **revenue recognition principle** requires that companies recognize revenue in the accounting period in which the performance obligation is satisfied. The **expense recognition principle** dictates that efforts (expenses) be matched with results (revenues). The **full disclosure principle** requires that companies disclose circumstances and events that matter to financial statement users.

The **cost constraint** weighs the cost that companies incur to provide a type of information against its benefits to financial statement users.

Glossary Review

Accrual-basis accounting Accounting basis in which companies record transactions that change a company's financial statements in the periods in which the events occur. (p. 3-3).

Accruals Adjusting entries for either accrued revenues or accrued expenses. (p. 3-5).

Accrued expenses Expenses incurred but not yet paid in cash or recorded. (p. 3-14).

Accrued revenues Revenues for services performed but not yet received in cash or recorded. (p. 3-13).

Adjusted trial balance A list of accounts and their balances after the company has made all adjustments. (p. 3-20).

Adjusting entries Entries made at the end of an accounting period to ensure that companies follow the revenue recognition and expense recognition principles. (p. 3-5).

Book value The difference between the cost of a depreciable asset and its related accumulated depreciation. (p. 3-10).

Calendar year An accounting period that extends from January 1 to December 31. (p. 3-3).

Cash-basis accounting Accounting basis in which companies record revenue when they receive cash and an expense when they pay out cash. (p. 3-3).

***Comparability** Ability to compare the accounting information of different companies because they use the same accounting principles. (p. 3-28).

***Consistency** Use of the same accounting principles and methods from year to year within a company. (p. 3-28).

Contra asset account An account offset against an asset account on the balance sheet. (p. 3-9).

***Cost constraint** Constraint that weighs the cost that companies will incur to provide the information against the benefit that financial statement users will gain from having the information available. (p. 3-30).

Deferrals Adjusting entries for either prepaid expenses or unearned revenues. (p. 3-5).

Depreciation The process of allocating the cost of an asset to expense over its useful life. (p. 3-9).

***Economic entity assumption** An assumption that every economic entity can be separately identified and accounted for. (p. 3-29).

Expense recognition principle (matching principle) The principle that companies recognize expense in the period in which they make efforts (consume assets or incur liabilities) to generate revenue. (pp. 3-4, 3-30).

***Fair value principle** Assets and liabilities should be reported at fair value (the price received to sell an asset or settle a liability). (p. 3-29).

***Faithful representation** Information that accurately depicts what really happened. (p. 3-28).

Fiscal year An accounting period that is one year in length. (p. 3-3).

***Full disclosure principle** Accounting principle that dictates that companies disclose circumstances and events that make a difference to financial statement users. (p. 3-30).

***Going concern assumption** The assumption that the company will continue in operation for the foreseeable future. (p. 3-29).

***Historical cost principle** An accounting principle that states that companies should record assets at their cost. (p. 3-29).

Interim periods Monthly or quarterly accounting time periods. (p. 3-3).

***Materiality** A company-specific aspect of relevance. An item is material when its size makes it likely to influence the decision of an investor or creditor. (p. 3-28).

***Monetary unit assumption** An assumption that requires that only those things that can be expressed in money are included in the accounting records. (p. 3-29).

Prepaid expenses (prepayments) Expenses paid in cash before they are used or consumed. (p. 3-6).

***Relevance** The quality of information that indicates the information makes a difference in a decision. (p. 3-28).

Revenue recognition principle The principle that companies recognize revenue in the accounting period in which the performance obligation is satisfied. (pp. 3-3, 3-30).

***Timely** Information that is available to decision-makers before it loses its capacity to influence decisions. (p. 3-28).

Time period assumption An assumption that accountants can divide the economic life of a business into artificial time periods. (pp. 3-3, 3-29).

***Understandability** Information presented in a clear and concise fashion so that users can interpret it and comprehend its meaning. (p. 3-28).

Unearned revenues A liability recorded for cash received before services are performed. (p. 3-10).

Useful life The length of service of a long-lived asset. (p. 3-8).

***Verifiable** The quality of information that occurs when independent observers, using the same methods, obtain similar results. (p. 3-28).

Practice Multiple-Choice Questions

1. (LO 1) The revenue recognition principle states that:

- a. revenue should be recognized in the accounting period in which a performance obligation is satisfied.
- b. expenses should be matched with revenues.
- c. the economic life of a business can be divided into artificial time periods.
- d. the fiscal year should correspond with the calendar year.

2. (LO 1) The time period assumption states that:

- a. companies must wait until the calendar year is completed to prepare financial statements.
- b. companies use the fiscal year to report financial information.
- c. the economic life of a business can be divided into artificial time periods.
- d. companies record information in the time period in which the events occur.

3. (LO 1) Which of the following statements about the accrual basis of accounting is **false**?

- a. Events that change a company's financial statements are recorded in the periods in which the events occur.
- b. Revenue is recognized in the period in which services are performed.
- c. This basis is in accordance with generally accepted accounting principles.
- d. Revenue is recorded only when cash is received, and expense is recorded only when cash is paid.

4. (LO 1) The principle or assumption dictating that efforts (expenses) should be recognized in the period in which a company consumes assets or incurs liabilities to generate revenue is the:

- a. expense recognition principle.
- b. cost assumption.
- c. time period assumption.
- d. revenue recognition principle.

5. (LO 1) Adjusting entries are made to ensure that:

- a. expenses are recognized in the period in which they are incurred.
- b. revenues are recorded in the period in which services are performed.
- c. balance sheet and income statement accounts have correct balances at the end of an accounting period.
- d. All the responses above are correct.

6. (LO 1) Each of the following is a major type (or category) of adjusting entries **except**:

- a. prepaid expenses.
- b. accrued revenues.
- c. accrued expenses.
- d. recognized revenues.

7. (LO 2) The trial balance shows Supplies \$1,350 and Supplies Expense \$0. If \$600 of supplies are on hand at the end of the period, the adjusting entry is:

a. Supplies	600		
Supplies Expense			600
b. Supplies	750		
Supplies Expense			750
c. Supplies Expense	750		
Supplies			750
d. Supplies Expense	600		
Supplies			600

8. (LO 2) Adjustments for prepaid expenses:

- a. decrease assets and increase revenues.
- b. decrease expenses and increase assets.
- c. decrease assets and increase expenses.
- d. decrease revenues and increase assets.

9. (LO 2) Accumulated Depreciation is:

- a. a contra asset account.
- b. an expense account.
- c. an owner's equity account.
- d. a liability account.

10. (LO 2) Rivera Company computes depreciation on delivery equipment at \$1,000 for the month of June. The adjusting entry to record this depreciation is as follows.

a. Depreciation Expense	1,000		
Accumulated Depreciation—			
Rivera Company			1,000
b. Depreciation Expense	1,000		
Equipment			1,000
c. Depreciation Expense	1,000		
Accumulated Depreciation—			
Equipment			1,000
d. Equipment Expense	1,000		
Accumulated Depreciation—			
Equipment			1,000

11. (LO 2) Adjustments for unearned revenues:

- a. decrease liabilities and increase revenues.
- b. have an assets-and-revenues-account relationship.
- c. increase assets and increase revenues.
- d. decrease revenues and decrease assets.

12. (LO 3) Adjustments for accrued revenues:

- a. have a liabilities-and-revenues-account relationship.
- b. have an assets-and-revenues-account relationship.
- c. decrease assets and revenues.
- d. decrease liabilities and increase revenues.

- 13. (LO 3)** Anika Wilson earned a salary of \$400 for the last week of September. She will be paid on October 1. The adjusting entry for Anika's employer at September 30 is:

a. No entry is required.

b. Salaries and Wages Expense 400
 Salaries and Wages Payable 400

c. Salaries and Wages Expense 400
 Cash 400

d. Salaries and Wages Payable 400
 Cash 400

- 14. (LO 4)** Which of the following statements is **incorrect** concerning the adjusted trial balance?

- a. An adjusted trial balance proves the equality of the total debit balances and the total credit balances in the ledger after all adjustments are made.
- b. The adjusted trial balance provides the primary basis for the preparation of financial statements.
- c. The adjusted trial balance lists the account balances segregated by assets and liabilities.

- d. The adjusted trial balance is prepared after the adjusting entries have been journalized and posted.

- *15. (LO 5)** The trial balance shows Supplies \$0 and Supplies Expense \$1,500. If \$800 of supplies are on hand at the end of the period, the adjusting entry is:

- a. debit Supplies \$800 and credit Supplies Expense \$800.
- b. debit Supplies Expense \$800 and credit Supplies \$800.
- c. debit Supplies \$700 and credit Supplies Expense \$700.
- d. debit Supplies Expense \$700 and credit Supplies \$700.

- *16. (LO 6)** Neutrality is an ingredient of:

	Faithful Representation	Relevance
a.	Yes	Yes
b.	No	No
c.	Yes	No
d.	No	Yes

- *17. (LO 6)** Which item is a constraint in financial accounting?

- a. Comparability.
- b. Materiality.
- c. Cost.
- d. Consistency.

Solutions

1. a. Revenue should be recognized in the accounting period in which a performance obligation is satisfied. The other choices are incorrect because (b) defines the expense recognition principle, (c) describes the time period assumption, and (d) a company's fiscal year does not need to correspond with the calendar year.

2. c. The economic life of a business can be divided into artificial time periods. The other choices are incorrect because (a) companies report their activities on a more frequent basis and not necessarily based on a calendar year; (b) companies report financial information more frequently than annually, such as monthly or quarterly, in order to evaluate results of operations; and (d) describes accrual-basis accounting.

3. d. Under the accrual basis of accounting, revenue is recognized when the performance obligation is satisfied, not when cash is received, and expense is recognized when incurred, not when cash is paid. The other choices are all true statements.

4. a. The expense recognition principle dictates that companies recognize expense in the period in which they make efforts to generate revenue. The other choices are incorrect because (b) there is no cost assumption, but the historical cost principle states that assets should be recorded at their cost; (c) the time period assumption states that the economic life of a business can be divided into artificial time periods; and (d) the revenue recognition principle indicates that revenue should be recognized in the accounting period in which a performance obligation is satisfied.

5. d. Adjusting entries are made for the reasons noted in choices (a), (b), and (c). The other choices are true statements, but (d) is the best answer.

6. d. Unearned revenues, not recognized revenues, is one of the major categories of adjusting entries. The other choices all list one of the major categories of adjusting entries.

7. c. Debiting Supplies Expense for \$750 and crediting Supplies for \$750 ($\$1,350 - \600) will decrease Supplies and increase Supplies Expense. The other choices are incorrect because (a) will increase

Supplies and decrease Supplies Expense and also for the wrong amounts, (b) will increase Supplies and decrease Supplies Expense, and (d) will cause Supplies to have an incorrect balance of \$750 ($\$1,350 - \600) and Supplies Expense to have an incorrect balance of \$600 ($\$0 + \600).

8. c. Adjustments for prepaid expenses decrease assets and increase expenses. The other choices are incorrect because an adjusting entry for prepaid expenses (a) increases expenses, not revenues; (b) increases, not decreases, expenses and decreases, not increases, assets; and (d) increases expenses, not decreases, revenues and decreases, not increases, assets.

9. a. Accumulated Depreciation is a contra asset account; it is offset against an asset account on the balance sheet. The other choices are incorrect because Accumulated Depreciation is not (b) an expense account nor located on the income statement, (c) an owner's equity account, or (d) a liability account.

10. c. The adjusting entry is to debit Depreciation Expense and credit Accumulated Depreciation—Equipment. The other choices are incorrect because (a) the contra asset account title includes the asset being depreciated, not the company name; (b) the credit should be to the contra asset account, not directly to the asset; and (d) the debit for this entry should be Depreciation Expense, not Equipment Expense.

11. a. Adjustments for unearned revenues will consist of a debit (decrease) to unearned revenues (a liability) and a credit (increase) to a revenue account. Choices (b), (c), and (d) are incorrect because adjustments for unearned revenues will increase revenues but will have no effect on assets.

12. b. Adjustments for accrued revenues will have an assets-and-revenues-account relationship. Choices (a) and (d) are incorrect because adjustments for accrued revenues have no effect on liabilities. Choice (c) is incorrect because these adjustments will increase, not decrease, both assets and revenues.

13. b. The adjusting entry should be to debit Salaries and Wages Expense for \$400 and credit Salaries and Wages Payable for \$400.

The other choices are incorrect because (a) if an adjusting entry is not made, the amount of money owed (liability) that is shown on the balance sheet will be understated and the amount of salaries and wages expense will also be understated; (c) the credit account is incorrect as adjusting entries never affect cash; and (d) the debit account should be Salaries and Wages Expense and the credit account should be Salaries and Wages Payable. Adjusting entries never affect cash.

14. c. The accounts on the trial balance can be segregated by the balance in the account—either debit or credit—not whether they are assets or liabilities. All accounts in the ledger are included in the adjusted trial balance, not just assets and liabilities. The other choices are all true statements.

***15. a.** This adjusting entry correctly states the Supplies account at \$800 ($\$0 + \800) and the Supplies Expense account at \$700

($\$1,500 - \800). The other choices are incorrect because (b) will cause the Supplies account to have a credit balance (assets have a normal debit balance) and the Supplies Expense account to be stated at \$2,300, which is too high; (c) will result in a \$700 balance in the Supplies account (\$100 too low) and an \$800 balance in the Supplies Expense account (\$100 too high); and (d) will cause the Supplies account to have a credit balance (assets have a normal debit balance) and the Supplies Expense account to be stated at \$2,200, which is too high.

***16. c.** Neutrality is one of the enhancing qualities that makes information more representationally faithful, not relevant. Therefore, choices (a), (b), and (d) are incorrect.

***17. c.** Cost is a constraint in financial accounting. The other choices are all enhancing qualities of useful information.

Practice Brief Exercises

Indicate why adjusting entries are needed.

- 1. (LO 1)** The ledger of Dey Company includes the following accounts. Explain why each account may need adjustment.
- a. Supplies.
 - b. Unearned Service Revenue.
 - c. Salaries and Wages Payable.
 - d. Interest Payable.

Solution

1. a. Supplies: to recognize supplies used during the period.
- b. Unearned Service Revenue: to record revenue generated for services performed.
- c. Salaries and Wages Payable: to recognize salaries and wages accrual to employees at the end of a reporting period.
- d. Interest Payable: to recognize interest accrued but unpaid on notes payable.

Prepare adjusting entry for depreciation.

- 2. (LO 2) Financial Statement** At the end of its first year, the trial balance of Denton Company shows Equipment of \$40,000 and zero balances in Accumulated Depreciation—Equipment and Depreciation Expense. Depreciation for the year is estimated to be \$8,000. Prepare the adjusting entry for depreciation at December 31, post the adjustments to T-accounts, and indicate the balance sheet presentation of the equipment at December 31.

Solution

2. Dec. 31	Depreciation Expense		8,000	
	Accumulated Depreciation—Equipment			8,000
	Dec. 31	8,000		
	Depreciation Expense		Accum. Depreciation—Equipment	
12/31	8,000		12/31	8,000
	Balance Sheet:			
	Equipment		\$40,000	
	Less: Accumulated Depreciation—Equipment		8,000	\$32,000

Prepare adjusting entries for accruals.

- 3. (LO 3)** You are asked to prepare the following accrued adjusting entries at December 31.

1. Services performed but not recorded are \$4,200.
2. Utility expenses incurred but not paid are \$660.
3. Salaries and wages earned by employees of \$3,000 are unpaid.

Use the following account titles: Accounts Payable, Accounts Receivable, Service Revenue, Salaries and Wages Expense, Salaries and Wages Payable, and Utility Expense.

Solution

3. Dec. 31	Accounts Receivable Service Revenue	4,200	4,200
31	Utility Expense Accounts Payable	660	660
31	Salaries and Wage Expense Salaries and Wages Payable	3,000	3,000

- 4. (LO 1, 2, 3)** The trial balance for Blair Company includes the following balance sheet accounts. Identify the accounts that may require adjustment. For each account that requires adjustment, indicate (a) the type of adjusting entry (prepaid expense, unearned revenue, accrued revenue, or accrued expense) and (b) the related account in the adjusting entry.

Accounts Receivable	Interest Payable
Supplies	Unearned Service Revenue
Prepaid Insurance	

Analyze accounts in an unadjusted trial balance.

Solution

4.	Account	Type of Adjustment	Related Account
	Accounts Receivable	Accrued Revenue	Service Revenue
	Supplies	Prepaid Expense	Supplies Expense
	Prepaid Insurance	Prepaid Expense	Insurance Expense
	Interest Payable	Accrued Expense	Interest Expense
	Unearned Service Revenue	Unearned Revenue	Service Revenue

- 5. (LO 4) Financial Statement** The adjusted trial balance of Harmony Company includes the following accounts at December 31, 2020: Cash \$12,000, Owner's Capital \$22,000, Owner's Drawing \$3,000, Service Revenue \$41,000, Rent Expense \$900, Salaries and Wages Expense \$6,000, Supplies Expense \$700, and Depreciation Expense \$1,800. Prepare an income statement for the year.

Prepare an income statement from an adjusted trial balance.

Solution

5. **Harmony Company**
Income Statement

For the Year Ended December 31, 2020

Revenues		
Service revenue		\$41,000
Expenses		
Salaries and wages expense	\$6,000	
Rent expense	900	
Depreciation expense	1,800	
Supplies expense	700	
Total expenses		9,400
Net income		<u><u>\$31,600</u></u>

Practice Exercises

- 1. (LO 2, 3)** Evan Watts, D.D.S., opened a dental practice on January 1, 2020. During the first month of operations, the following transactions occurred.

Prepare adjusting entries.

- Watts performed services for patients totaling \$2,400. These services have not yet been recorded.
- Utility expenses incurred but not paid prior to January 31 totaled \$400.
- Purchased dental equipment on January 1 for \$80,000, paying \$20,000 in cash and signing a \$60,000, 3-year note payable. The equipment depreciates \$500 per month. Interest is \$600 per month.
- Purchased a one-year malpractice insurance policy on January 1 for \$12,000.
- Purchased \$2,600 of dental supplies. On January 31, determined that \$900 of supplies were on hand.

Instructions

Prepare the adjusting entries on January 31. Account titles are Accumulated Depreciation—Equipment, Depreciation Expense, Service Revenue, Accounts Receivable, Insurance Expense, Interest Expense, Interest Payable, Prepaid Insurance, Supplies, Supplies Expense, Utilities Expense, and Utilities Payable.

Solution**1.**

Jan. 31	Accounts Receivable Service Revenue Utilities Expense Utilities Payable Depreciation Expense Accumulated Depreciation—Equipment Interest Expense Interest Payable Insurance Expense ($\$12,000 \div 12$) Prepaid Insurance Supplies Expense ($\$2,600 - \900) Supplies		2,400 2,400 400 400 500 500 600 600 1,000 1,000 1,700 1,700
---------	---	--	--

Prepare correct income statement.

2. (LO 2, 3, 4) Financial Statement The income statement of Venden Co. for the month of July shows net income of \$4,000 based on Service Revenue \$8,700, Salaries and Wages Expense \$2,500, Supplies Expense \$1,700, and Utilities Expense \$500. In reviewing the statement, you discover the following.

1. Insurance expired during July of \$700 was omitted.
2. Supplies expense includes \$250 of supplies that are still on hand at July 31.
3. Depreciation on equipment of \$300 was omitted.
4. Accrued but unpaid wages at July 31 of \$400 were not included.
5. Services performed but unrecorded totaled \$650.

Instructions

Prepare a correct income statement for July 2020.

Solution**2.**

Venden Co.		
Income Statement		
For the Month Ended July 31, 2020		
Revenues		
Service revenue ($\$8,700 + \650)		\$9,350
Expenses		
Salaries and wages expense ($\$2,500 + \400)	\$2,900	
Supplies expense ($\$1,700 - \250)	1,450	
Utilities expense	500	
Insurance expense	700	
Depreciation expense	300	
Total expenses	5,850	
Net income		<u><u>\$3,500</u></u>

Practice Problem

(LO 2, 3) The Green Thumb Lawn Care Company began operations on April 1. At April 30, the trial balance shows the following balances for selected accounts.

Prepare adjusting entries from selected data.

Prepaid Insurance	\$ 3,600
Equipment	28,000
Notes Payable	20,000
Unearned Service Revenue	4,200
Service Revenue	1,800

Analysis reveals the following additional data.

1. Prepaid insurance is the cost of a 2-year insurance policy, effective April 1.
2. Depreciation on the equipment is \$500 per month.
3. The note payable is dated April 1. It is a 6-month, 12% note.
4. Seven customers paid for the company's 6-month lawn service package of \$600 beginning in April. The company performed services for these customers in April.
5. Lawn services performed for other customers but not recorded at April 30 totaled \$1,500.

Instructions

Prepare the adjusting entries for the month of April. Show computations.

Solution

GENERAL JOURNAL			J1	
Date	Account Titles and Explanation	Ref.	Debit	Credit
	<u>Adjusting Entries</u>			
Apr. 30	Insurance Expense Prepaid Insurance (To record insurance expired: $\$3,600 \div 24 = \150 per month)		150	150
30	Depreciation Expense Accumulated Depreciation—Equipment (To record monthly depreciation)		500	500
30	Interest Expense Interest Payable (To record interest on notes payable: $\$20,000 \times 12\% \times 1/12 = \200)		200	200
30	Unearned Service Revenue Service Revenue (To record revenue for services performed: $\$600 \div 6 = \100 ; $\$100 \text{ per month} \times 7 = \700)		700	700
30	Accounts Receivable Service Revenue (To record revenue for services performed)		1,500	1,500

WileyPLUS

Brief Exercises, DO IT! Exercises, Exercises, Problems, and many additional resources are available for practice in WileyPLUS.

Note: All asterisked Questions, Exercises, and Problems relate to material in the appendices to the chapter.

Questions

1. a. How does the time period assumption affect an accountant's analysis of business transactions?
b. Explain the terms fiscal year, calendar year, and interim periods.
2. Define two generally accepted accounting principles that relate to adjusting the accounts.
3. Susan Hardy, a lawyer, accepts a legal engagement in March, performs the work in April, and is paid in May. If Hardy's law firm prepares monthly financial statements, when should it recognize revenue from this engagement? Why?
4. Why do accrual-basis financial statements provide more useful information than cash-basis statements?
5. In completing the engagement in Question 3, Hardy pays no costs in March, \$2,000 in April, and \$2,500 in May (incurred in April). How much expense should the firm deduct from revenues in the month when it recognizes the revenue? Why?
6. "Adjusting entries are required by the historical cost principle of accounting." Do you agree? Explain.
7. Why may a trial balance not contain up-to-date and complete financial information?
8. Distinguish between the two categories of adjusting entries, and identify the types of adjustments applicable to each category.
9. What is the debit/credit effect of a prepaid expense adjusting entry?
10. "Depreciation is a valuation process that results in the reporting of the fair value of the asset." Do you agree? Explain.
11. Explain the differences between depreciation expense and accumulated depreciation.
12. G. Phillips Company purchased equipment for \$18,000. By the current balance sheet date, \$6,000 had been depreciated. Indicate the balance sheet presentation of the data.
13. What is the debit/credit effect of an unearned revenue adjusting entry?
14. Whistler Corp. performed services for a customer but has not yet recorded payment, nor has it recorded any entry related to the work. Which of the following accounts are involved in the adjusting entry: (a) asset, (b) liability, (c) revenue, or (d) expense? For the accounts selected, indicate whether they would be debited or credited in the entry.
15. A company fails to recognize an expense incurred but not paid. Indicate which of the following accounts is debited and which is credited in the adjusting entry: (a) asset, (b) liability, (c) revenue, or (d) expense.
16. A company makes an accrued revenue adjusting entry for \$900 and an accrued expense adjusting entry for \$700. How much was net income understated prior to these entries? Explain.
17. On January 9, a company pays \$5,000 for salaries and wages of which \$2,000 was reported as Salaries and Wages Payable on December 31. Give the entry to record the payment.
18. For each of the following items before adjustment, indicate the type of adjusting entry (prepaid expense, unearned revenue, accrued revenue, or accrued expense) that is needed to correct the misstatement. If an item could result in more than one type of adjusting entry, indicate each of the types.

a. Assets are understated.	d. Expenses are understated.
b. Liabilities are overstated.	e. Assets are overstated.
c. Liabilities are understated.	f. Revenue is understated.
19. One-half of the adjusting entry is given below. Indicate the account title for the other half of the entry.

a. Salaries and Wages Expense is debited.
b. Depreciation Expense is debited.
c. Interest Payable is credited.
d. Supplies is credited.
e. Accounts Receivable is debited.
f. Unearned Service Revenue is debited.
20. "An adjusting entry may affect more than one balance sheet or income statement account." Do you agree? Why or why not?
21. Why is it possible to prepare financial statements directly from an adjusted trial balance?
- *22. Dashan Company debits Supplies Expense for all purchases of supplies and credits Rent Revenue for all advanced rentals. For each type of adjustment, give the adjusting entry.
- *23. a. What is the primary objective of financial reporting?
b. Identify the characteristics of useful accounting information.
- *24. Dan Fineman, the president of King Company, is pleased. King substantially increased its net income in 2020 while keeping its unit inventory relatively the same. Howard Gross, chief accountant, cautions Dan, however. Gross says that since King changed its method of inventory valuation, there is a consistency problem and it is difficult to determine whether King is better off. Is Gross correct? Why or why not?
- *25. What is the distinction between comparability and consistency?
- *26. Describe the constraint inherent in the presentation of accounting information.
- *27. Quinn Becker is president of Better Books. She has no accounting background. Becker cannot understand why fair value is not used as the basis for all accounting measurement and reporting. Discuss.
- *28. What is the economic entity assumption? Give an example of its violation.

Brief Exercises

Indicate why adjusting entries are needed.

BE3.1 (LO 1) The ledger of Althukair Company includes the following accounts. Explain why each account may require adjustment.

- | | |
|--------------------------|------------------------------|
| a. Prepaid Insurance. | c. Unearned Service Revenue. |
| b. Depreciation Expense. | d. Interest Payable. |

BE3.2 (LO 1, 2) Gee Company accumulates the following adjustment data at December 31. Indicate (a) the type of adjustment (prepaid expense, accrued revenue, and so on), and (b) the status of accounts before adjustment (for example, “assets understated and revenues understated”).

1. Supplies of \$150 are on hand.
2. Services performed but not recorded total \$900.
3. Interest of \$200 has accumulated on a note payable.
4. Rent collected in advance totaling \$850 has been earned.

Identify the major types of adjusting entries.

BE3.3 (LO 2) Schramel Advertising Company’s trial balance at December 31 shows Supplies \$6,700 and Supplies Expense \$0. On December 31, there are \$2,100 of supplies on hand. Prepare the adjusting entry at December 31, and using T-accounts, enter the balances in the accounts, post the adjusting entry, and indicate the adjusted balance in each account.

Prepare adjusting entry for supplies.

BE3.4 (LO 2) At the end of its first year, the trial balance of Wolowitz Company shows Equipment \$30,000 and zero balances in Accumulated Depreciation—Equipment and Depreciation Expense. Depreciation for the year is estimated to be \$3,750. Prepare the annual adjusting entry for depreciation at December 31, post the adjustments to T-accounts, and indicate the balance sheet presentation of the equipment at December 31.

Prepare adjusting entry for depreciation.

BE3.5 (LO 2) On July 1, 2019, Major Co. pays \$15,120 to Mesa Insurance Co. for a 4-year insurance contract. Both companies have fiscal years ending December 31. For Major Co., journalize and post the entry on July 1 and the annual adjusting entry on December 31.

Prepare adjusting entry for prepaid expense.

BE3.6 (LO 2) Using the data in BE3.5, journalize and post the entry on July 1 and the adjusting entry on December 31 for Mesa Insurance Co. Mesa uses the accounts Unearned Service Revenue and Service Revenue.

Prepare adjusting entry for unearned revenue.

BE3.7 (LO 3) The bookkeeper for Abduli Company asks you to prepare the following accrued adjusting entries at December 31.

1. Interest on notes payable of \$400 is accrued.
2. Services performed but not recorded total \$2,300.
3. Salaries earned by employees of \$900 have not been recorded.

Prepare adjusting entries for accruals.

Use the following account titles: Service Revenue, Accounts Receivable, Interest Expense, Interest Payable, Salaries and Wages Expense, and Salaries and Wages Payable.

Analyze accounts in an unadjusted trial balance.

BE3.8 (LO 1, 2, 3) The trial balance of Beowulf Company includes the following balance sheet accounts, which may require adjustment. For each account that requires adjustment, indicate (a) the type of adjusting entry (prepaid expense, unearned revenue, accrued revenue, or accrued expense) and (b) the related account in the adjusting entry.

Accounts Receivable
Prepaid Insurance
Accumulated Depreciation—Equipment

Interest Payable
Unearned Service Revenue

BE3.9 (LO 4) Financial Statement The adjusted trial balance of Miller Company at December 31, 2020, includes the following accounts: Owner’s Capital \$16,400, Owner’s Drawings \$7,000, Service Revenue \$39,000, Salaries and Wages Expense \$16,000, Insurance Expense \$2,000, Rent Expense \$4,000, Supplies Expense \$1,500, and Depreciation Expense \$1,300. Prepare an income statement for the year.

Prepare an income statement from an adjusted trial balance.

BE3.10 (LO 4) Financial Statement Partial adjusted trial balance data for Miller Company is presented in BE3.9. The balance in Owner’s Capital is the balance as of January 1. Prepare an owner’s equity statement for the year assuming net income is \$14,200 for the year.

Prepare an owner’s equity statement from an adjusted trial balance.

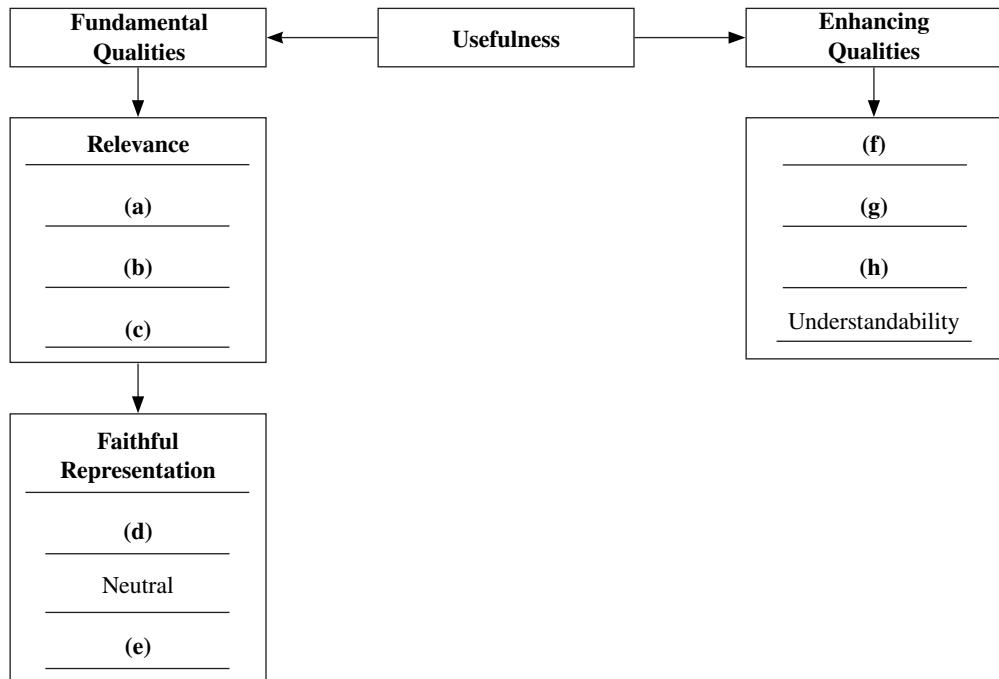

***BE3.11 (LO 5)** Eckholm Company records all prepayments in income statement accounts. At April 30, the trial balance shows Supplies Expense \$2,800, Service Revenue \$9,200, and zero balances in related

Prepare adjusting entries under alternative treatment of deferrals.

balance sheet accounts. Prepare the adjusting entries at April 30 assuming (a) \$400 of supplies on hand and (b) \$3,000 of service revenue should be reported as unearned.

Identify characteristics of useful information.

***BE3.12 (LO 6)** The accompanying chart shows the qualitative characteristics of useful accounting information. Fill in the blanks.

Identify characteristics of useful information.

***BE3.13 (LO 6)** Given the characteristics of useful accounting information, complete each of the following statements.

- a. For information to be _____, it should have predictive value, confirmatory value, and be material.
- b. _____ is the quality of information that gives assurance that the information accurately depicts what really happened.
- c. _____ means using the same accounting principles and methods from year to year within a company.

Identify characteristics of useful information.

***BE3.14 (LO 6)** Here are some qualitative characteristics of useful accounting information:

- | | |
|----------------------|----------------|
| 1. Predictive value. | 3. Verifiable. |
| 2. Neutral. | 4. Timely. |

Match each qualitative characteristic to one of the following statements.

- _____ a. Accounting information should help provide accurate expectations about future events.
- _____ b. Accounting information cannot be selected, prepared, or presented to favor one set of interested users over another.
- _____ c. The quality of information that occurs when independent observers, using the same methods, obtain similar results.
- _____ d. Accounting information must be available to decision-makers before it loses its capacity to influence their decisions.

Define full disclosure principle.

***BE3.15 (LO 6)** Select the response that completes the following statement correctly. The full disclosure principle dictates that:

- a. financial statements should disclose all assets at their cost.
- b. financial statements should disclose only those events that can be measured in currency.
- c. financial statements should disclose all events and circumstances that would matter to users of financial statements.
- d. financial statements should not be relied on unless an auditor has expressed an unqualified opinion on them.

DO IT! Exercises

DO IT! 3.1 (LO 1) Below is a list of concepts in the left column, with a description of the concept in the right column. There are more descriptions provided than concepts. Match the description of the concept to the concept.

1. Cash-basis accounting.
2. Fiscal year.
3. Revenue recognition principle.
4. Expense recognition principle.

- a. Monthly and quarterly time periods.
- b. Accountants divide the economic life of a business into artificial time periods.
- c. Efforts (expenses) should be recognized in the period in which a company uses assets or incurs liabilities to generate accomplishments (revenues).
- d. Companies record revenues when they receive cash and record expenses when they pay out cash.
- e. An accounting time period that is one year in length.
- f. An accounting time period that starts on January 1 and ends on December 31.
- g. Companies record transactions in the period in which the events occur.
- h. Recognize revenue in the accounting period in which a performance obligation is satisfied.

Identify timing concepts.

DO IT! 3.2 (LO 2) The ledger of Milton, Inc. on March 31, 2020, includes the following selected accounts before adjusting entries.

Prepare adjusting entries for deferrals.

	<u>Debit</u>	<u>Credit</u>
Prepaid Insurance	\$ 2,400	
Supplies	2,500	
Equipment	30,000	
Unearned Service Revenue		\$9,000

An analysis of the accounts shows the following.

1. Insurance expires at the rate of \$400 per month.
2. Supplies on hand total \$1,600.
3. The equipment depreciates \$480 per month.
4. During March, services were performed for two-fifths of the unearned service revenue.

Prepare the adjusting entries for the month of March.

DO IT! 3.3 (LO 3) Fiske Computer Services began operations in July 2020. At the end of the month, the company prepares monthly financial statements. It has the following information for the month.

Prepare adjusting entries for accruals.

1. At July 31, the company owed employees \$1,300 in salaries that the company will pay in August.
2. On July 1, the company borrowed \$20,000 from a local bank on a 10-year note. The annual interest rate is 6%.
3. Service revenue unrecorded in July totaled \$2,400.

Prepare the adjusting entries needed at July 31, 2020.

DO IT! 3.4 (LO 4) Financial Statement Ming Company was organized on April 1, 2020. The company prepares quarterly financial statements. The adjusted trial balance amounts at June 30 are as follows.

Calculate amounts from trial balance.

	<u>Debit</u>		<u>Credit</u>
Cash	\$ 5,360	Accumulated Depreciation—	
Accounts Receivable	580	Equipment	\$ 700
Prepaid Rent	1,120	Notes Payable	4,000
Supplies	920	Accounts Payable	790
Equipment	12,000	Salaries and Wages Payable	300
Owner's Drawings	500	Interest Payable	40
Salaries and Wages Expense	7,400	Unearned Rent Revenue	400
Rent Expense	1,200	Owner's Capital	11,200
Depreciation Expense	700	Service Revenue	11,360
Supplies Expense	160	Rent Revenue	1,600
Utilities Expense	410		
Interest Expense	40		
	\$30,390		\$30,390

- a. Determine the net income for the quarter April 1 to June 30.
- b. Determine the total assets and total liabilities at June 30, 2020, for Ming Company.
- c. Determine the amount that appears for Owner's Capital at June 30, 2020.

Exercises

Explain the time period assumption.

- E3.1 (LO 1)** Chloe Davis has prepared the following list of statements about the time period assumption.
1. Adjusting entries would not be necessary if a company's life were not divided into artificial time periods.
 2. The IRS requires companies to file annual tax returns.
 3. Accountants divide the economic life of a business into artificial time periods, but each transaction affects only one of these periods.
 4. Accounting time periods are generally a month, a quarter, or a year.
 5. A time period lasting one year is called an interim period.
 6. All fiscal years are calendar years, but not all calendar years are fiscal years.

Instructions

Identify each statement as true or false. If false, indicate how to correct the statement.

Distinguish between cash and accrual basis of accounting.

- E3.2 (LO 1) Writing** On numerous occasions, proposals have surfaced to put the federal government on the accrual basis of accounting. This is no small issue. If this basis were used, it would mean that billions in unrecorded liabilities would have to be booked, and the federal deficit would increase substantially.

Instructions

- a. What is the difference between accrual-basis accounting and cash-basis accounting?
- b. Why would politicians prefer the cash basis over the accrual basis?
- c. Write a letter to your senator explaining why the federal government should adopt the accrual basis of accounting.

Compute cash and accrual accounting income.

- E3.3 (LO 1)** Carillo Industries collected \$108,000 from customers in 2020. Of the amount collected, \$25,000 was for services performed in 2019. In addition, Carillo performed services worth \$36,000 in 2020, which will not be collected until 2021.

Carillo Industries also paid \$72,000 for expenses in 2020. Of the amount paid, \$30,000 was for expenses incurred on account in 2019. In addition, Carillo incurred \$42,000 of expenses in 2020, which will not be paid until 2021.

Instructions

- a. Compute 2020 cash-basis net income.
- b. Compute 2020 accrual-basis net income.

E3.4 (LO 1, 2, 3) Luong Corporation encounters the following situations:

1. Luong collects \$1,300 from a customer in 2020 for services to be performed in 2021.
2. Luong incurs utility expense which is not yet paid in cash or recorded.
3. Luong's employees worked 3 days in 2020 but will not be paid until 2021.
4. Luong performs services for customers but has not yet received cash or recorded the transaction.
5. Luong paid \$2,800 rent on December 1 for the 4 months starting December 1.
6. Luong received cash for future services and recorded a liability until the service was performed.
7. Luong performed consulting services for a client in December 2020. On December 31, it had not billed the client for services provided of \$1,200.
8. Luong paid cash for an expense and recorded an asset until the item was used up.
9. Luong purchased \$900 of supplies in 2020; at year-end, \$400 of supplies remain unused.
10. Luong purchased equipment on January 1, 2020; the equipment will be used for 5 years.
11. Luong borrowed \$12,000 on October 1, 2020, signing an 8% one-year note payable.

Identify the type of adjusting entry needed.

Instructions

Identify what type of adjusting entry (prepaid expense, unearned revenue, accrued expense, or accrued revenue) is needed in each situation at December 31, 2020.

E3.5 (LO 2, 3) Devin Wolf Company has the following balances in selected accounts on December 31, 2020.

Prepare adjusting entries from selected data.

Accounts Receivable	\$ -0-
Accumulated Depreciation—Equipment	-0-
Equipment	7,000
Interest Payable	-0-
Notes Payable	10,000
Prepaid Insurance	2,100
Salaries and Wages Payable	-0-
Supplies	2,450
Unearned Service Revenue	32,000

All the accounts have normal balances. The information below has been gathered at December 31, 2020.

1. Devin Wolf Company borrowed \$10,000 by signing a 9%, one-year note on September 1, 2020.
2. A count of supplies on December 31, 2020, indicates that supplies of \$900 are on hand.
3. Depreciation on the equipment for 2020 is \$1,000.
4. Devin Wolf Company paid \$2,100 for 12 months of insurance coverage on June 1, 2020.
5. On December 1, 2020, Devin Wolf collected \$32,000 for consulting services to be performed from December 1, 2020, through March 31, 2021.
6. Devin Wolf performed consulting services for a client in December 2020. The client will be billed \$4,200.
7. Devin Wolf Company pays its employees total salaries of \$9,000 every Monday for the preceding 5-day week (Monday through Friday). On Monday, December 29, employees were paid for the week ending December 26. All employees worked the last 3 days of 2020.

Instructions

Prepare adjusting entries for the seven items described above.

E3.6 (LO 2, 3, 4) Mendoza Company accumulates the following adjustment data at December 31.

Identify types of adjustments and account relationships.

1. Services performed but unbilled total \$3,000.
2. Supplies of \$300 have been used.
3. Utility expenses of \$552 are unpaid.
4. Services performed of \$260 collected in advance.
5. Salaries of \$800 are unpaid.
6. Prepaid insurance totaling \$350 has expired.

Instructions

For each of the above items indicate the following.

- a. The type of adjustment (prepaid expense, unearned revenue, accrued revenue, or accrued expense).
- b. The status of accounts before adjustment (overstatement or understatement).

Prepare adjusting entries from selected account data.

E3.7 (LO 2, 3) The ledger of Paschel Rental Agency on March 31 of the current year includes the selected accounts, shown below, before adjusting entries have been prepared.

	Debit	Credit
Prepaid Insurance	\$ 3,600	
Supplies	2,800	
Equipment	25,000	
Accumulated Depreciation—Equipment	\$ 8,400	
Notes Payable	20,000	
Unearned Rent Revenue	10,200	
Rent Revenue	60,000	
Interest Expense	—0—	
Salaries and Wages Expense	14,000	

An analysis of the accounts shows the following.

1. The equipment depreciates \$400 per month.
2. One-third of the unearned rent revenue was earned during the quarter.
3. Interest of \$500 is accrued on the notes payable.
4. Supplies on hand total \$750.
5. Insurance expires at the rate of \$300 per month.

Instructions

Prepare the adjusting entries at March 31, assuming that adjusting entries are made **quarterly**. Additional accounts are Depreciation Expense, Insurance Expense, Interest Payable, and Supplies Expense.

Prepare adjusting entries.

E3.8 (LO 2, 3) Lorena Manzone, D.D.S., opened a dental practice on January 1, 2020. During the first month of operations, the following transactions occurred.

1. Performed services for patients who had dental plan insurance. At January 31, \$785 of such services were performed but not yet recorded.
2. Utility expenses incurred but not paid prior to January 31 totaled \$650.
3. Purchased dental equipment on January 1 for \$80,000, paying \$30,000 in cash and signing a \$50,000, 3-year note payable. The equipment depreciates \$400 per month. Interest is \$500 per month.
4. Purchased a one-year malpractice insurance policy on January 1 for \$24,000.
5. Purchased \$1,600 of dental supplies. On January 31, determined that \$400 of supplies were on hand.

Instructions

Prepare the adjusting entries on January 31. Account titles are Accumulated Depreciation—Equipment, Depreciation Expense, Service Revenue, Accounts Receivable, Insurance Expense, Interest Expense, Interest Payable, Prepaid Insurance, Supplies, Supplies Expense, Utilities Expense, and Utilities Payable.

Prepare adjusting entries.

E3.9 (LO 2, 3) The trial balance for Pioneer Advertising is shown in Illustration 3.3. Instead of the adjusting entries shown in the textbook at October 31, assume the following adjustment data.

1. Supplies on hand at October 31 total \$500.
2. Expired insurance for the month is \$120.
3. Depreciation for the month is \$50.
4. Services related to unearned service revenue in October worth \$600 were performed.
5. Services performed but not recorded at October 31 are \$360.
6. Interest accrued at October 31 is \$95.
7. Accrued salaries at October 31 are \$1,625.

Instructions

Prepare the adjusting entries for the items above.

E3.10 (LO 1, 2, 3, 4) Financial Statement The income statement of Lundein Co. for the month of July shows net income of \$1,400 based on Service Revenue \$5,500, Salaries and Wages Expense \$2,300, Supplies Expense \$1,200, and Utilities Expense \$600. In reviewing the statement, you discover the following.

1. Insurance expired during July of \$500 was omitted.
2. Supplies expense includes \$250 of supplies that are still on hand at July 31.
3. Depreciation on equipment of \$150 was omitted.
4. Accrued but unpaid salaries and wages at July 31 of \$400 were not included.
5. Services performed but unrecorded totaled \$650.

Prepare correct income statement.

Instructions

Prepare a correct income statement for July 2020.

E3.11 (LO 1, 2, 3, 4) A partial adjusted trial balance of Frangesch Company at January 31, 2020, shows the following.

Analyze adjusted data.

Frangesch Company
Adjusted Trial Balance
January 31, 2020

	<u>Debit</u>	<u>Credit</u>
Supplies	\$ 850	
Prepaid Insurance	2,400	
Salaries and Wages Payable		\$ 920
Unearned Service Revenue		750
Supplies Expense	950	
Insurance Expense	400	
Salaries and Wages Expense	2,900	
Service Revenue		2,000

Instructions

Answer the following questions, assuming the year begins January 1.

- a. If the amount in Supplies Expense is the January 31 adjusting entry and \$1,000 of supplies was purchased in January, what was the balance in Supplies on January 1?
- b. If the amount in Insurance Expense is the January 31 adjusting entry and the original insurance premium was for one year, what was the total premium and when was the policy purchased?
- c. If \$3,800 of salaries was paid in January, what was the balance in Salaries and Wages Payable at December 31, 2019?

E3.12 (LO 2, 3) Selected accounts of Shannon Company are shown as follows.

Journalize basic transactions and adjusting entries.

Supplies Expense			
7/31	900		
Supplies			
7/1 Bal.	1,100	7/31	900
7/10	650		
Accounts Receivable			
7/31	500		
Salaries and Wages Payable			
		7/31	1,200
Unearned Service Revenue			
7/31	1,150	7/1 Bal.	1,500
		7/20	1,000
Salaries and Wages Expense			
7/15	1,200		
7/31	1,200		
Service Revenue			
		7/14	2,200
		7/31	1,150
		7/31	500

Instructions

After analyzing the accounts, journalize (a) the July transactions and (b) the adjusting entries that were made on July 31. (*Hint:* July transactions were for cash.)

Prepare adjusting entries from selected account data.

E3.13 (LO 2, 3) The ledger of Armour Lake Lumber Supply on July 31, 2020, includes the selected accounts below before adjusting entries have been prepared.

	<u>Debit</u>	<u>Credit</u>
Notes Payable		\$ 20,000
Supplies	\$ 24,000	
Prepaid Rent	3,600	
Buildings	250,000	
Accumulated Depreciation—Buildings		140,000
Unearned Service Revenue		11,500

An analysis of the company's accounts shows the following.

1. The notes payable pays interest at a rate of 6% per year.
2. Supplies on hand at the end of the month totaled \$18,600.
3. The balance in Prepaid Rent represents 4 months of rent costs.
4. Employees were owed \$3,100 related to unpaid salaries and wages.
5. Depreciation on buildings is \$6,000 per year.
6. During the month, the company satisfied obligations worth \$4,700 related to the Unearned Services Revenue.
7. Unpaid maintenance and repairs costs were \$2,300.

Instructions

Prepare the adjusting entries at July 31 assuming that adjusting entries are made monthly. Use additional accounts as needed.

Determine effect of adjusting entries.

E3.14 (LO 2, 3) On December 31, 2020, Waters Company prepared an income statement and balance sheet, but failed to take into account three adjusting entries. The balance sheet showed total assets \$150,000, total liabilities \$70,000, and owner's equity \$80,000. The incorrect income statement showed net income of \$70,000.

The data for the three adjusting entries were:

1. Salaries and wages amounting to \$10,000 for the last 2 days in December were not paid and not recorded. The next payroll will be in January.
2. Rent payments of \$8,000 was received for two months in advance on December 1. The entire amount was credited to Unearned Rent Revenue when paid.
3. Depreciation expense for 2020 is \$9,000.

Instructions

Complete the following table to correct the financial statement amounts shown (indicate deductions with parentheses).

Item	Net Income	Total Assets	Total Liabilities	Owner's Equity
Incorrect balances	\$70,000	\$150,000	\$70,000	\$80,000
Effects of:				
Salaries and Wages	_____	_____	_____	_____
Rent Revenue	_____	_____	_____	_____
Depreciation	_____	_____	_____	_____
Correct balances	=====	=====	=====	=====

Prepare and post transaction and adjusting entries for prepayments.

E3.15 (LO 2) Action Quest Games Co. adjusts its accounts annually. The following information is available for the year ended December 31, 2020.

1. Purchased a 1-year insurance policy on June 1 for \$1,800 cash.
2. Paid \$6,500 on August 31 for 5 months' rent in advance.
3. On September 4, received \$3,600 cash in advance from a company to sponsor a game each month for a total of 9 months for the most improved students at a local school.
4. Signed a contract for cleaning services starting December 1 for \$1,000 per month. Paid for the first 2 months on November 30. (*Hint:* Use the account Prepaid Cleaning to record prepayments.)
5. On December 5, received \$1,500 in advance from a gaming club. Determined that on December 31, \$475 of these games had not yet been played.

Instructions

- For each of the above transactions, prepare the journal entry to record the initial transaction.
- For each of the above transactions, prepare the adjusting journal entry that is required on December 31, (*Hint:* Use the account Service Revenue for item 3 and Repairs and Maintenance Expense for item 4.)
- Post the journal entries in parts (a) and (b) to T-accounts and determine the final balance in each account balance. (*Note:* Posting to the Cash account is not required.)

E3.16 (LO 3) Greenock Company has the following information available for accruals for the year ended December 31, 2020. The company adjusts its accounts annually.

- The December utility bill for \$425 was unrecorded on December 31. Greenock paid the bill on January 11.
- Greenock is open 7 days a week and employees are paid a total of \$3,500 every Monday for a 7-day (Monday–Sunday) workweek. December 31 is a Thursday, so employees will have worked 4 days (Monday, December 28–Thursday, December 31) that they have not been paid for by year-end. Employees will be paid next on January 4.
- Greenock signed a \$48,000, 5% bank loan on November 1, 2019, due in 2 years. Interest is payable on the first day of each following month.
- Greenock receives a fee from Pizza Shop next door for all pizzas sold to customers using Greenock's facility. The amount owed for December is \$300, which Pizza Shop will pay on January 4. (*Hint:* Use the Service Revenue account.)
- Greenock rented some of its unused warehouse space to a client for \$6,000 a month, payable the first day of the following month. It received the rent for the month of December on January 2.

Prepare adjusting and subsequent entries for accruals.

Instructions

- For each situation, prepare the adjusting entry required at December 31. (Round all calculations to the nearest dollar.)
- For each situation, prepare the journal entry to record the subsequent cash transaction in 2021.

E3.17 (LO 2, 3, 4) The trial balances before and after adjustment for Renfro Company at the end of its fiscal year are presented below.

Prepare adjusting entries from analysis of trial balances.

Renfro Company
Trial Balance
August 31, 2020

	Before Adjustment		After Adjustment	
	Dr.	Cr.	Dr.	Cr.
Cash	\$10,400		\$10,400	
Accounts Receivable	8,800		11,200	
Supplies	2,300		700	
Prepaid Insurance	4,000		2,500	
Equipment	14,000		14,000	
Accumulated Depreciation—Equipment	\$ 3,600		\$ 4,500	
Accounts Payable	5,800		5,800	
Salaries and Wages Payable	–0–		1,100	
Unearned Rent Revenue	1,500		400	
Owner's Capital	15,600		15,600	
Service Revenue	34,000		36,400	
Rent Revenue	11,000		12,100	
Salaries and Wages Expense	17,000		18,100	
Supplies Expense	–0–		1,600	
Rent Expense	15,000		15,000	
Insurance Expense	–0–		1,500	
Depreciation Expense	–0–		900	
	<u>\$71,500</u>		<u>\$75,900</u>	

Instructions

Prepare the adjusting entries that were made.

Prepare financial statements from adjusted trial balance.

Record transactions on accrual basis; convert revenue to cash receipts.

E3.18 (LO 4) Financial Statement The adjusted trial balance for Renfro Company is given in E3.17.

Instructions

Prepare the income and owner's equity statements for the year and the balance sheet at August 31.

E3.19 (LO 2, 3) The following data are taken from the comparative balance sheets of Bundies Billiards Club, which prepares its financial statements using the accrual basis of accounting.

December 31	2020	2019
Accounts receivable from members	\$16,000	\$ 8,000
Unearned service revenue	17,000	25,000

Members are billed based upon their use of the club's facilities. Unearned service revenues arise from the sale of gift certificates, which members can apply to their future use of club facilities. The 2020 income statement for the club showed that service revenue of \$161,000 was earned during the year.

Instructions

(Hint: You will probably find it helpful to use T-accounts to analyze these data.)

- Prepare journal entries for each of the following events that took place during 2020.
 - Accounts receivable from 2019 were all collected.
 - Gift certificates outstanding at the end of 2019 were all redeemed.
 - An additional \$38,000 worth of gift certificates were sold during 2020. A portion of these was used by the recipients during the year; the remainder was still outstanding at the end of 2020.
 - Services performed for members for 2020 were billed to members.
 - Accounts receivable for 2020 (i.e., those billed in item [4] above) were partially collected.
- Determine the amount of cash received by the club, with respect to member services, during 2020.

Journalize adjusting entries.

***E3.20 (LO 5)** Bob Zeller Company has the following balances in selected accounts on December 31, 2020.

Service Revenue	\$40,000
Insurance Expense	2,400
Supplies Expense	2,450

All the accounts have normal balances. Bob Zeller Company debits prepayments to expense accounts when paid, and credits unearned revenues to revenue accounts when received. The following information below has been gathered at December 31, 2020.

- Bob Zeller Company paid \$2,400 for 12 months of insurance coverage on June 1, 2020.
- On December 1, 2020, Bob Zeller Company collected \$40,000 for consulting services to be performed from December 1, 2020, through March 31, 2021.
- A count of supplies on December 31, 2020, indicates that supplies of \$600 are on hand.

Instructions

Prepare the adjusting entries needed at December 31, 2020.

Journalize transactions and adjusting entries.

***E3.21 (LO 5)** At Sekon Company, prepayments are debited to expense when paid, and unearned revenues are credited to revenue when cash is received. During January of the current year, the following transactions occurred.

- | | |
|--------|--|
| Jan. 2 | Paid \$1,920 for fire insurance protection for the year. |
| 10 | Paid \$1,700 for supplies. |
| 15 | Received \$6,100 for services to be performed in the future. |

On January 31, it is determined that \$2,100 of the services were performed and that there are \$650 of supplies on hand.

Instructions

- Journalize and post the January transactions. (Use T-accounts.)
- Journalize and post the adjusting entries at January 31.
- Determine the ending balance in each of the accounts.

***E3.22 (LO 6)** Presented below are the assumptions and principles discussed in this chapter.

Identify accounting assumptions and principles.

- 1. Full disclosure principle.
- 2. Going concern assumption.
- 3. Monetary unit assumption.
- 4. Time period assumption.
- 5. Historical cost principle.
- 6. Economic entity assumption.

Instructions

Identify by number the accounting assumption or principle that is described below. Do not use a number more than once.

- _____ a. Is the rationale for why plant assets are not reported at liquidation value. (*Note:* Do not use the historical cost principle.)
- _____ b. Indicates that personal and business recordkeeping should be separately maintained.
- _____ c. Assumes that the monetary unit is the “measuring stick” used to report on financial performance.
- _____ d. Separates financial information into time periods for reporting purposes.
- _____ e. Measurement basis used when a reliable estimate of fair value is not available.
- _____ f. Dictates that companies should disclose all circumstances and events that make a difference to financial statement users.

***E3.23 (LO 6)** Weber Co. had three major business transactions during 2020.

Identify the assumption or principle that has been violated.

- a. Reported at its fair value of \$260,000 merchandise inventory with a cost of \$208,000.
- b. The president of Weber Co., Austin Weber, purchased a truck for personal use and charged it to his expense account.
- c. Weber Co. wanted to make its 2020 income look better, so it added 2 more weeks to the year (a 54-week year). Previous years were 52 weeks.

Instructions

In each situation, identify the assumption or principle that has been violated, if any, and discuss what the company should have done.

***E3.24 (LO 6)** The following characteristics, assumptions, principles, or constraint guide the FASB when it creates accounting standards.

Identify financial accounting concepts and principles.

Relevance	Expense recognition principle
Faithful representation	Time period assumption
Comparability	Going concern assumption
Consistency	Historical cost principle
Monetary unit assumption	Full disclosure principle
Economic entity assumption	Materiality

Match each item above with a description below.

- 1. _____ Ability to easily evaluate one company’s results relative to another’s.
- 2. _____ Requirement that a company will continue to operate for the foreseeable future.
- 3. _____ The judgment concerning whether an item’s size is large enough to matter to decision-makers.
- 4. _____ The reporting of all information that would make a difference to financial statement users.
- 5. _____ The practice of preparing financial statements at regular intervals.
- 6. _____ The quality of information that indicates the information makes a difference in a decision.
- 7. _____ A belief that items should be reported on the balance sheet at the price that was paid to acquire them.
- 8. _____ A company’s use of the same accounting principles and methods from year to year.
- 9. _____ Tracing accounting events to particular companies.
- 10. _____ The desire to minimize bias in financial statements.
- 11. _____ Reporting only those things that can be measured in monetary units.
- 12. _____ Dictates that efforts (expenses) be recognized in the period in which a company generates results (revenues).

Comment on the objective and qualitative characteristics of accounting information.

***E3.25 (LO 6) Writing** Speyeware International Inc., headquartered in Vancouver, Canada, specializes in Internet safety and computer security products for both the home and commercial markets. In a recent balance sheet, it reported a deficit of US\$5,678,288. It has reported only net losses since its inception. In spite of these losses, Speyeware's shares of stock have traded anywhere from a high of \$3.70 to a low of \$0.32 on the Canadian Venture Exchange.

Speyeware's financial statements have historically been prepared in Canadian dollars. Recently, the company adopted the U.S. dollar as its reporting currency.

Instructions

- What is the objective of financial reporting? How does this objective meet or not meet Speyeware's investors' needs?
- Why would investors want to buy Speyeware's shares if the company has consistently reported losses over the last few years? Include in your answer an assessment of the relevance of the information reported on Speyeware's financial statements.
- Comment on how the change in reporting information from Canadian dollars to U.S. dollars likely affected the readers of Speyeware's financial statements. Include in your answer an assessment of the comparability of the information.

Comment on the objective and qualitative characteristics of financial reporting.

***E3.26 (LO 6) Writing** A friend of yours, Mindy Gare, recently completed an undergraduate degree in science and has just started working with a biotechnology company. Mindy tells you that the owners of the business are trying to secure new sources of financing which are needed in order for the company to proceed with development of a new healthcare product. Mindy said that her boss told her that the company must put together a report to present to potential investors.

Mindy thought that the company should include in this package the detailed scientific findings related to the Phase I clinical trials for this product. She said, "I know that the biotech industry sometimes has only a 10% success rate with new products, but if we report all the scientific findings, everyone will see what a sure success this is going to be! The president was talking about the importance of following some set of accounting principles. Why do we need to look at some accounting rules? What they need to realize is that we have scientific results that are quite encouraging, some of the most talented employees around, and the start of some really great customer relationships. We haven't made any sales yet, but we will. We just need the funds to get through all the clinical testing and get government approval for our product. Then these investors will be quite happy that they bought in to our company early!"

Instructions

- What is accounting information?
- Comment on how Mindy's suggestions for what should be reported to prospective investors conforms to the qualitative characteristics of accounting information. Do you think that the things that Mindy wants to include in the information for investors will conform to financial reporting guidelines?

Problems: Set A

Prepare adjusting entries, post to ledger accounts, and prepare an adjusted trial balance.

P3.1A (LO 2, 3, 4) Logan Krause started her own consulting firm, Krause Consulting, on May 1, 2020. The trial balance at May 31 is as follows.

Krause Consulting
Trial Balance
May 31, 2020

Account Number		Debit	Credit
101	Cash	\$ 4,500	
112	Accounts Receivable	6,000	
126	Supplies	1,900	
130	Prepaid Insurance	3,600	
149	Equipment	11,400	
201	Accounts Payable		\$ 4,500
209	Unearned Service Revenue		2,000
301	Owner's Capital		18,700
400	Service Revenue		9,500
726	Salaries and Wages Expense	6,400	
729	Rent Expense	900	
		<u>\$34,700</u>	<u>\$34,700</u>

In addition to those accounts listed on the trial balance, the chart of accounts for Krause Consulting also contains the following accounts and account numbers: No. 150 Accumulated Depreciation—Equipment, No. 212 Salaries and Wages Payable, No. 631 Supplies Expense, No. 717 Depreciation Expense, No. 722 Insurance Expense, and No. 732 Utilities Expense.

Other data:

1. \$900 of supplies have been used during the month.
2. Utilities expense incurred but not paid on May 31, 2020, \$250.
3. The insurance policy is for 2 years.
4. \$400 of the balance in the unearned service revenue account remains unearned at the end of the month.
5. May 31 is a Wednesday, and employees are paid on Fridays. Krause Consulting has two employees, who are paid \$920 each for a 5-day work week.
6. The office furniture has a 5-year life with no salvage value. It is being depreciated at \$190 per month for 60 months.
7. Invoices representing \$1,700 of services performed during the month have not been recorded as of May 31.

Instructions

- a. Prepare the adjusting entries for the month of May. Use J4 as the page number for your journal.
- b. Post the adjusting entries to the ledger accounts. Enter the totals from the trial balance as beginning account balances and place a check mark in the posting reference column.
- c. Prepare an adjusted trial balance at May 31, 2020.
- c. Adj. trial balance \$37,944**

P3.2A (LO 2, 3, 4) Financial Statement Hank's Hotel opened for business on May 1, 2020. Its trial balance before adjustment on May 31 is as follows.

Prepare adjusting entries, post, and prepare adjusted trial balance and financial statements.

Hank's Hotel
Trial Balance
May 31, 2020

Account Number		Debit	Credit
101	Cash	\$ 3,400	
126	Supplies	2,080	
130	Prepaid Insurance	2,400	
140	Land	12,000	
141	Buildings	60,000	
149	Equipment	15,000	
201	Accounts Payable		\$ 4,700
208	Unearned Rent Revenue		3,300
275	Mortgage Payable		40,000
301	Owner's Capital		41,380
429	Rent Revenue		10,300
610	Advertising Expense	600	
726	Salaries and Wages Expense	3,300	
732	Utilities Expense	900	
		<u>\$99,680</u>	<u>\$99,680</u>

In addition to those accounts listed on the trial balance, the chart of accounts for Hank's Hotel also contains the following accounts and account numbers: No. 142 Accumulated Depreciation—Buildings, No. 150 Accumulated Depreciation—Equipment, No. 212 Salaries and Wages Payable, No. 230 Interest Payable, No. 619 Depreciation Expense, No. 631 Supplies Expense, No. 718 Interest Expense, and No. 722 Insurance Expense.

Other data:

1. Prepaid insurance is a 1-year policy starting May 1, 2020.
2. A count of supplies shows \$750 of unused supplies on May 31.
3. Annual depreciation is \$3,600 on the buildings and \$1,500 on equipment.
4. The mortgage interest rate is 6%. (The mortgage was taken out on May 1.)
5. Two-thirds of the unearned rent revenue has been earned.
6. Salaries of \$750 are accrued and unpaid at May 31.

Instructions

- c. Adj. trial balance \$101,055
 d. Net income \$4,795
 Ending capital \$46,175
 Total assets \$92,925

Prepare adjusting entries and financial statements.

P3.3A (LO 2, 3, 4) Financial Statement Alena Co. was organized on July 1, 2020. Quarterly financial statements are prepared. The unadjusted and adjusted trial balances as of September 30 are shown below.

**Alena Co.
Trial Balance
September 30, 2020**

	Unadjusted		Adjusted	
	Dr.	Cr.	Dr.	Cr.
Cash	\$ 8,700		\$ 8,700	
Accounts Receivable	10,400		11,500	
Supplies	1,500		650	
Prepaid Rent	2,200		500	
Equipment	18,000		18,000	
Accumulated Depreciation—Equipment	\$ –0–		\$ 700	
Notes Payable	10,000		10,000	
Accounts Payable	2,500		2,500	
Salaries and Wages Payable	–0–		725	
Interest Payable	–0–		100	
Unearned Rent Revenue	1,900		450	
Owner's Capital	22,000		22,000	
Owner's Drawings	1,600		1,600	
Service Revenue	16,000		17,100	
Rent Revenue	1,410		2,860	
Salaries and Wages Expense	8,000		8,725	
Rent Expense	1,900		3,600	
Depreciation Expense	700		700	
Supplies Expense	850		850	
Utilities Expense	1,510		1,510	
Interest Expense	100		100	
	<u>\$53,810</u>		<u>\$53,810</u>	
	<u>\$56,435</u>		<u>\$56,435</u>	

Instructions

- b. Net income \$4,475
 Ending capital \$24,875
 Total assets \$38,650

Prepare adjusting entries.

1. Insurance expense \$4,840

 2. Rent revenue \$75,500

- a. Journalize the adjusting entries that were made.
 b. Prepare an income statement and an owner's equity statement for the 3 months ending September 30 and a balance sheet at September 30.
 c. If the note bears interest at 12%, how many months has it been outstanding?

P3.4A (LO 2, 3) A review of the ledger of Gina Company at December 31, 2020, produces the following data pertaining to the preparation of annual adjusting entries.

1. Prepaid Insurance \$10,440. The company has separate insurance policies on its buildings and its motor vehicles. Policy B4564 on the building was purchased on April 1, 2019, for \$7,920. The policy has a term of 3 years. Policy A2958 on the vehicles was purchased on January 1, 2020, for \$4,400. This policy has a term of 2 years.
2. Unearned Rent Revenue \$429,000. The company began subleasing office space in its new building on November 1. At December 31, the company had the following rental contracts that are paid in full for the entire term of the lease.

Date	Term (in months)	Monthly Rent	Number of Leases
Nov. 1	9	\$5,000	5
Dec. 1	6	\$8,500	3

3. Notes Payable \$120,000. This balance consists of a note for 9 months at an annual interest rate of 6%, dated November 1.
4. Salaries and Wages Payable \$0. There are eight salaried employees. Salaries are paid every Friday for the current week. Five employees receive a salary of \$700 each per week, and three employees earn \$500 each per week. Assume December 31 is a Tuesday. Employees do not work weekends. All employees worked the last 2 days of December.
3. Interest expense \$1,200
4. Salaries and wages expense \$2,000

Instructions

Prepare the adjusting entries at December 31, 2020.

P3.5A (LO 2, 3, 4) Financial Statement On November 1, 2020, the account balances of Hamm Equipment Repair were as follows.

Journalize transactions and follow through accounting cycle to preparation of financial statements.

No.		Debit	No.		Credit
101	Cash	\$ 2,400	154	Accumulated Depreciation—Equipment	\$ 2,000
112	Accounts Receivable	4,250	201	Accounts Payable	2,600
126	Supplies	1,800	209	Unearned Service Revenue	1,200
153	Equipment	12,000	212	Salaries and Wages Payable	700
			301	Owner's Capital	13,950
		<u><u>\$20,450</u></u>			<u><u>\$20,450</u></u>

During November, the following summary transactions were completed.

- Nov. 8 Paid \$1,700 for salaries due employees, of which \$700 is for October salaries.
 10 Received \$3,620 cash from customers on account.
 12 Received \$3,100 cash for services performed in November.
 15 Purchased equipment on account \$2,000.
 17 Purchased supplies on account \$700.
 20 Paid creditors on account \$2,700.
 22 Paid November rent \$400.
 25 Paid salaries \$1,700.
 27 Performed services on account and billed customers for these services \$2,200.
 29 Received \$600 from customers for future service.

Adjustment data consist of:

1. Supplies on hand \$1,400.
2. Accrued salaries payable \$350.
3. Depreciation for the month is \$200.
4. Services related to unearned service revenue of \$1,220 were performed.

Instructions

- a. Enter the November 1 balances in the ledger accounts.
- b. Journalize the November transactions.
- c. Post to the ledger accounts. Use J1 for the posting reference. Use the following additional accounts: No. 407 Service Revenue, No. 615 Depreciation Expense, No. 631 Supplies Expense, No. 726 Salaries and Wages Expense, and No. 729 Rent Expense.
- d. Prepare a trial balance at November 30.
- e. Journalize and post adjusting entries.
- f. Prepare an adjusted trial balance.
- g. Prepare an income statement and an owner's equity statement for November and a balance sheet at November 30.
- d. Trial balance \$25,650
- f. Adj. trial balance \$26,200
- g. Net income \$1,770;
Ending capital \$15,720
Total assets \$19,250

***P3.6A (LO 2, 3, 4, 5) Financial Statement** Gabriel's Graphics Company was organized on January 1, 2020, by Gabriel Mediña. At the end of the first 6 months of operations, the trial balance contained the following accounts.

Prepare adjusting entries, adjusted trial balance, and financial statements using appendix.

	Debit		Credit
Cash	\$ 8,600	Notes Payable	\$ 20,000
Accounts Receivable	14,000	Accounts Payable	9,000
Equipment	45,000	Owner's Capital	22,000
Insurance Expense	2,700	Sales Revenue	52,100
Salaries and Wages Expense	30,000	Service Revenue	6,000
Supplies Expense	3,700		
Advertising Expense	1,900		
Rent Expense	1,500		
Utilities Expense	1,700		
	<u>\$109,100</u>		<u>\$109,100</u>

Analysis reveals the following additional data.

1. The \$3,700 balance in Supplies Expense represents supplies purchased in January. At June 30, \$1,300 of supplies are on hand.
2. The note payable was issued on February 1. It is a 6%, 6-month note.
3. The balance in Insurance Expense is the premium on a one-year policy, dated April 1, 2020.
4. Service revenues are credited to revenue when received. At June 30, services revenue of \$1,300 are unearned.
5. Revenue for services performed but unrecorded at June 30 totals \$2,000.
6. Depreciation is \$2,250 per year.

Instructions

- b. Adj. trial balance \$112,725
- c. Net income \$19,000
Ending capital \$41,000
Total assets \$71,800

- a. Journalize the adjusting entries at June 30. (Assume adjustments are recorded every 6 months.)
- b. Prepare an adjusted trial balance.
- c. Prepare an income statement and owner's equity statement for the 6 months ended June 30 and a balance sheet at June 30.

Continuing Case

Cookie Creations

(Note: This is a continuation of the Cookie Creations case from Chapters 1 and 2. Use the information from the previous chapters and follow the instructions below using the general ledger accounts you have already prepared.)

CC3 It is the end of November and Natalie has been in touch with her grandmother. Her grandmother asked Natalie how well things went in her first month of business. Natalie, too, would like to know if she has been profitable or not during November. Natalie realizes that in order to determine Cookie Creations' income, she must first make adjustments.

Natalie puts together the following additional information.

© leungchopan/
Shutterstock

1. A count reveals that \$35 of baking supplies were used during November.
2. Natalie estimates that all of her baking equipment will have a useful life of 5 years or 60 months. (Assume Natalie decides to record a full month's worth of depreciation, regardless of when the equipment was obtained by the business.)
3. Natalie's grandmother has decided to charge interest of 6% on the note payable extended on November 16. The loan plus interest is to be repaid in 24 months. (Assume that half a month of interest accrued during November.)
4. On November 30, a friend of Natalie's asks her to teach a class at the neighborhood school. Natalie agrees and teaches a group of 35 first-grade students how to make gingerbread cookies. The next

day, Natalie prepares an invoice for \$300 and leaves it with the school principal. The principal says that he will pass the invoice along to the head office, and it will be paid sometime in December.

5. Natalie receives a utilities bill for \$45. The bill is for utilities consumed by Natalie's business during November and is due December 15.

Instructions

Using the information that you have gathered through Chapter 2, and based on the new information above, do the following.

- a. Prepare and post the adjusting journal entries.
- b. Prepare an adjusted trial balance.
- c. Using the adjusted trial balance, calculate Cookie Creations' net income or net loss for the month of November. Do not prepare an income statement.

Ethics Case

EC3 Russell Company is a pesticide manufacturer. Its sales declined greatly this year due to the passage of legislation outlawing the sale of several of Russell's chemical pesticides. In the coming year, Russell will have environmentally safe and competitive chemicals to replace these discontinued products. Sales in the next year are expected to greatly exceed any prior year's. The decline in sales and profits appears to be a one-year aberration. But even so, the company president fears a large dip in the current year's profits. He believes that such a dip could cause a significant drop in the market price of Russell's stock and make the company a takeover target.

To avoid this possibility, the company president calls in Zoe Baas, controller, to discuss this period's year-end adjusting entries. He urges her to accrue every possible revenue and to defer as many expenses as possible. He says to Zoe, "We need the revenues this year, and next year can easily absorb expenses deferred from this year. We can't let our stock price be hammered down!" Zoe didn't get around to recording the adjusting entries until January 17, but she dated the entries December 31 as if they were recorded then. Zoe also made every effort to comply with the president's request.

Instructions

- a. Who are the stakeholders in this situation?
- b. What are the ethical considerations of (1) the president's request and (2) Zoe dating the adjusting entries December 31?
- c. Can Zoe accrue revenues and defer expenses and still be ethical?

Expand Your Critical Thinking

Financial Reporting Problem: Apple Inc.

CT3.1 The financial statements of **Apple Inc.** are presented in Appendix A at the end of this textbook. The complete annual report, including the notes to the financial statements, is available at the company's website.

Instructions

- a. Using the consolidated financial statements and related information, identify items that may result in adjusting entries for prepayments.
- b. Using the consolidated financial statements and related information, identify items that may result in adjusting entries for accruals.
- c. What has been the trend since 2013 for net income?

Comparative Analysis Problem: PepsiCo, Inc. vs. The Coca-Cola Company

CT3.2 **PepsiCo, Inc.**'s financial statements are presented in Appendix B. Financial statements of **The Coca-Cola Company** are presented in Appendix C. The complete annual reports of PepsiCo and Coca-Cola, including the notes to the financial statements, are available at each company's respective website.

Instructions

Based on information contained in these financial statements, determine the following for each company.

- a. Net increase (decrease) in property, plant, and equipment (net) from 2014 to 2015.
- b. Increase (decrease) in selling, general, and administrative expenses from 2014 to 2015.
- c. Increase (decrease) in long-term debt (obligations) from 2014 to 2015.
- d. Increase (decrease) in net income from 2014 to 2015.
- e. Increase (decrease) in cash and cash equivalents from 2014 to 2015.

Comparative Analysis Problem: Amazon.com, Inc. vs. Wal-Mart Stores, Inc.

CT3.3 **Amazon.com, Inc.**'s financial statements are presented in Appendix D. Financial statements of **Wal-Mart Stores, Inc.** are presented in Appendix E. The complete annual reports of Amazon and Wal-Mart, including the notes to the financial statements, are available at each company's respective website.

Instructions

Based on information contained in these financial statements, determine the following for each company.

1. a. Increase (decrease) in interest expense from 2014 to 2015.
b. Increase (decrease) in net income from 2014 to 2015.
c. Increase (decrease) in cash flow from operations from 2014 to 2015.
2. Cash flow from operations and net income for each company is different. What are some possible reasons for these differences?

Real-World Focus

CT3.4 No financial decision-maker should ever rely solely on the financial information reported in the annual report to make decisions. It is important to keep abreast of financial news. This activity demonstrates how to search for financial news on the Internet.

Instructions

Conduct an Internet search and select an article that sounds interesting to you and that would be relevant to an investor in **Wal-Mart, Target Corp., or Kmart**.

- a. What was the source of the article (e.g., Reuters, Businesswire, Prnewswire)?
- b. Assume that you are a personal financial planner and that one of your clients owns stock in the company. Write a brief memo to your client summarizing the article and explaining the implications of the article for his or her investment.

Decision-Making Across the Organization

CT3.5 Financial Statement Happy Camper Park was organized on April 1, 2019, by Erica Hatt. Erica is a good manager but a poor accountant. From the trial balance prepared by a part-time bookkeeper, Erica prepared the following income statement for the quarter that ended March 31, 2020.

Happy Camper Park		
Income Statement		
For the Quarter Ended March 31, 2020		
Revenues		
Rent revenue		\$90,000
Operating expenses		
Advertising	\$ 5,200	
Salaries and wages	29,800	
Utilities	900	
Depreciation	800	
Maintenance and repairs	4,000	
Total operating expenses		40,700
Net income		\$49,300

Erica thought that something was wrong with the statement because net income had never exceeded \$20,000 in any one quarter. Knowing that you are an experienced accountant, she asks you to review the income statement and other data.

You first look at the trial balance. In addition to the account balances reported above in the income statement, the ledger contains the following additional selected balances at March 31, 2020.

Supplies	\$ 6,200
Prepaid Insurance	7,200
Notes Payable	12,000

You then make inquiries and discover the following.

1. Rent revenues include advanced rentals for summer occupancy \$15,000.
2. There were \$1,700 of supplies on hand at March 31.
3. Prepaid insurance resulted from the payment of a one-year policy on January 1, 2020.
4. The mail on April 1, 2020, brought the following bills: advertising for week of March 24, \$110; repairs made March 10, \$260; and utilities, \$180.
5. Salaries and wages expense total \$300 per day. At March 31, 2 days' salaries and wages have been incurred but not paid.
6. The note payable is a 3-month, 10% note dated January 1, 2020.

Instructions

With the class divided into groups, answer the following.

- a. Prepare a correct income statement for the quarter ended March 31, 2020.
- b. Explain to Erica the generally accepted accounting principles that she did not recognize in preparing her income statement and their effect on her results.

Communication Activity

CT3.6 In reviewing the accounts of Terri Kahn Co. at the end of the year, you discover that adjusting entries have not been made.

Instructions

Write a memo to Terri Kahn, the owner of Terri Kahn Co., that explains the following: the nature and purpose of adjusting entries, why adjusting entries are needed, and the types of adjusting entries that may be made.

All About You

CT3.7 Companies must report or disclose in their financial statement information about all liabilities, including potential liabilities related to environmental cleanup. There are many situations in which you will be asked to provide personal financial information about your assets, liabilities, revenue, and expenses. Sometimes you will face difficult decisions regarding what to disclose and how to disclose it.

Instructions

Suppose that you are putting together a loan application to purchase a home. Based on your income and assets, you qualify for the mortgage loan, but just barely. How would you address each of the following situations in reporting your financial position for the loan application? Provide responses for each of the following situations.

- a. You signed a guarantee for a bank loan that a friend took out for \$25,000. If your friend doesn't pay, you will have to pay. Your friend has made all of the payments so far, and it appears he will be able to pay in the future.
- b. You were involved in an auto accident in which you were at fault. There is the possibility that you may have to pay as much as \$60,000 as part of a settlement. The issue will not be resolved before the bank processes your mortgage request.
- c. The company for which you work isn't doing very well, and it has recently laid off employees. You are still employed, but it is quite possible that you will lose your job in the next few months.

Considering People, Planet, and Profit

CT3.8 Many companies have potential pollution or environmental-disposal problems—not only for electronic gadgets, but also for the lead paint or asbestos they sold. How do we fit these issues into the accounting equation? Are these costs and related liabilities that companies should report?

YES: As more states impose laws holding companies responsible, and as more courts levy pollution-related fines, it becomes increasingly likely that companies will have to pay large amounts in the future.

NO: The amounts still are too difficult to estimate. Putting inaccurate estimates on the financial statements reduces their usefulness. Instead, why not charge the costs later, when the actual environmental cleanup or disposal occurs, at which time the company knows the actual cost?

Instructions

Write a response indicating your position regarding this situation. Provide support for your view.

FASB Codification Activity

CT3.9 If your school has a subscription to the FASB Codification, log in and prepare responses to the following.

Instructions

Access the glossary (“Master Glossary”) to answer the following.

- a. What is the definition of revenue?
- b. What is the definition of compensation?

A Look at IFRS

LEARNING OBJECTIVE 7

Compare the procedures for adjusting entries under GAAP and IFRS.

It is often difficult for companies to determine in what time period they should report particular revenues and expenses. Both the IASB and FASB are working on a joint project to develop a common conceptual framework that will enable companies to better use the same principles to record transactions consistently over time.

Key Points

Following are the key similarities and differences between GAAP and IFRS as related to accrual accounting.

Similarities

- In this chapter, you learned accrual-basis accounting applied under GAAP. Companies applying IFRS also use accrual-basis accounting to ensure that they record transactions that change a company’s financial statements in the period in which events occur.
- Similar to GAAP, cash-basis accounting is not in accordance with IFRS.
- IFRS also divides the economic life of companies into artificial time periods. Under both GAAP and IFRS, this is referred to as the **time period assumption**.
- The **general** revenue recognition principle required by GAAP that is used in this textbook is similar to that used under IFRS.
- Revenue recognition fraud is a major issue in U.S. financial reporting. The same situation occurs in other countries, as evidenced by revenue recognition breakdowns at Dutch software company **Baan NV**, Japanese electronics giant **NEC**, and Dutch grocer **Ahold NV**.

Differences

- Under IFRS, revaluation (using fair value) of items such as land and buildings is permitted. IFRS allows depreciation based on revaluation of assets, which is not permitted under GAAP.
- The terminology used for revenues and gains, and expenses and losses, differs somewhat between IFRS and GAAP. For example, income under IFRS includes both revenues, which arise during the normal course of operating activities, and gains, which arise from activities outside of the normal sales of goods and services. The term income is not used this way under GAAP. Instead, under GAAP income refers to the net difference between revenues and expenses.
- Under IFRS, expenses include both those costs incurred in the normal course of operations as well as losses that are not part of normal operations. This is in contrast to GAAP, which defines each separately.

Looking to the Future

The IASB and FASB are completing a joint project on revenue recognition. The purpose of this project is to develop comprehensive guidance on when to recognize revenue. It is hoped that this approach will lead to more consistent accounting in this area.

IFRS Practice

IFRS Self-Test Questions

1. IFRS:
 - a. uses accrual accounting.
 - b. uses cash-basis accounting.
 - c. allows revenue to be recognized when a customer makes an order.
 - d. requires that revenue not be recognized until cash is received.
2. Which of the following statements is **false**?
 - a. IFRS employs the time period assumption.
 - b. IFRS employs accrual accounting.
 - c. IFRS requires that revenues and costs must be capable of being measured reliably.
 - d. IFRS uses the cash basis of accounting.
3. As a result of the revenue recognition project by the FASB and IASB:
 - a. revenue recognition places more emphasis on when the performance obligation is satisfied.
 - b. revenue recognition places more emphasis on when revenue is realized.
4. Which of the following is **false**?
 - c. revenue recognition places more emphasis on when expenses are incurred.
 - d. revenue is no longer recorded unless cash has been received.
5. Accrual-basis accounting:
 - a. is optional under IFRS.
 - b. results in companies recording transactions that change a company's financial statements in the period in which events occur.
 - c. has been eliminated as a result of the IASB/FASB joint project on revenue recognition.
 - d. is not consistent with the IASB conceptual framework.

International Financial Reporting Problem: Louis Vuitton

IFRS3.1 The financial statements of **Louis Vuitton** are presented in Appendix F. The complete annual report, including the notes to its financial statements, is available at the company's website.

Instructions

Visit Louis Vuitton's corporate website and answer the following questions from Louis Vuitton's 2015 annual report.

- a. From the notes to the financial statements, how does the company determine the amount of revenue to record at the time of a sale?
- b. From the notes to the financial statements, how does the company determine the provision for product returns?
- c. Using the consolidated income statement and consolidated statement of financial position, identify items that may result in adjusting entries for deferrals.
- d. Using the consolidated income statement, identify two items that may result in adjusting entries for accruals.

Completing the Accounting Cycle

Chapter Preview

As the following Feature Story highlights, at **Rhino Foods, Inc.**, financial statements help employees understand what is happening in the business. In Chapter 3, we prepared financial statements directly from the adjusted trial balance. However, with so many details involved in the end-of-period accounting procedures, it is easy to make errors. One way to minimize errors in the records and to simplify the end-of-period procedures is to use a worksheet.

In this chapter, we will explain the role of the worksheet in accounting. We also will study the remaining steps in the accounting cycle, especially the closing process, again using Pioneer Advertising as an example. Then, we will consider correcting entries and classified balance sheets.

Feature Story

Everyone Likes to Win

When Ted Castle was a hockey coach at the University of Vermont, his players were self-motivated by their desire to win. Hockey was a game you usually either won or lost. But at **Rhino Foods, Inc.**, a bakery-foods company he founded in Burlington, Vermont, he discovered that manufacturing-line workers were

not so self-motivated. Ted thought, what if he turned the food-making business into a game, with rules, strategies, and trophies?

In a game, knowing the score is all-important. Ted felt that only if the employees know the score—know exactly how the business is doing daily, weekly, monthly—could he turn food-making into a game. But Rhino is a closely held, family-owned business, and its financial statements and profits were confidential. Ted wondered, should he open Rhino's books to the employees?

A consultant put Ted's concerns in perspective when he said, "Imagine you're playing touch football. You play for an hour or two, and the whole time I'm sitting there with a book, keeping score. All of a sudden I blow the whistle, and I say, 'OK, that's it. Everybody go home.' I close my book and walk away. How would you feel?" Ted opened his books and revealed the financial statements to his employees.

The next step was to teach employees the rules and strategies of how to "win" at making food. The first lesson: "Your opponent at Rhino is expenses. You must cut and control expenses." Ted and his staff distilled those lessons into daily

scorecards—production reports and income statements—that keep Rhino's employees up-to-date on the game. At noon each day, Ted posts the previous day's results at the entrance to the production room. Everyone checks whether they made or lost money on what they produced the day before. And it's not just an academic exercise: There's a bonus check for each employee at the end of every four-week "game" that meets profitability guidelines.

Rhino has flourished since the first game. Employment has increased from 20 to 130 people, while both revenues and profits have grown dramatically.

Visit WileyPLUS with ORION for additional tutorials and practice opportunities.

The Worksheet

LEARNING OBJECTIVE 1

Prepare a worksheet.

A **worksheet** is a multiple-column form used in the adjustment process and in preparing financial statements. As its name suggests, the worksheet is a working tool. **It is not a**

permanent accounting record. It is neither a journal nor a part of the general ledger. The worksheet is merely a device used in preparing adjusting entries and the financial statements. Companies generally computerize worksheets using an electronic spreadsheet program such as **Microsoft** Excel.

Illustration 4.1 shows the basic form of a worksheet and the five steps for preparing it. Each step is performed in sequence. **The use of a worksheet is optional.** When a company chooses to use one, it prepares financial statements directly from the worksheet. It enters the adjustments in the worksheet columns and then journalizes and posts the adjustments after it has prepared the financial statements. Thus, worksheets make it possible to provide the financial statements to management and other interested parties at an earlier date.

Steps in Preparing a Worksheet

We will use the October 31 trial balance and adjustment data of Pioneer Advertising from Chapter 3 to illustrate how to prepare a worksheet. In the following pages, we describe and then demonstrate each step of the process.

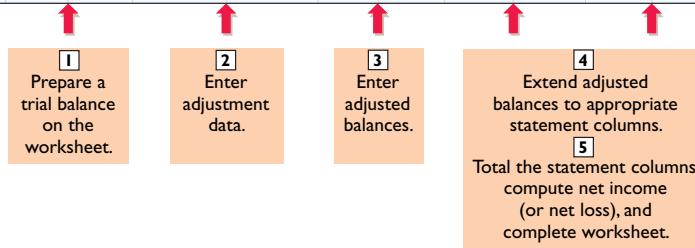

ILLUSTRATION 4.1

Form and procedure for a worksheet

Step 1

Prepare a Trial Balance on the Worksheet

The first step in preparing a worksheet is to enter all ledger accounts with balances in the account titles column and then enter debit and credit amounts from the ledger in the trial balance columns. **Illustration 4.2** shows the worksheet trial balance for Pioneer Advertising. This trial balance is the same one that appears in Illustration 2.31 and Illustration 3.3.

ILLUSTRATION 4.2 **Preparing a trial balance**

Include all accounts with balances from ledger.

Trial balance amounts come directly from ledger accounts.

Step 2

Enter the Adjustments in the Adjustments Columns

As shown in **Illustration 4.3**, the second step when using a worksheet is to enter all adjustments in the adjustments columns. In entering the adjustments, use applicable trial balance accounts. If additional accounts are needed, insert them on the lines immediately below the trial balance totals. A different letter identifies the debit and credit for each adjusting entry. The term used to describe this process is **keying**. **Companies do not journalize the adjustments until after they complete the worksheet and prepare the financial statements.**

The adjustments for Pioneer Advertising are the same as the adjustments in Illustration 3.23. They are keyed in the adjustments columns of the worksheet as follows.

- a. Pioneer debits an additional account, Supplies Expense, \$1,500 for the cost of supplies used, and credits Supplies \$1,500.
- b. Pioneer debits an additional account, Insurance Expense, \$50 for the insurance that has expired, and credits Prepaid Insurance \$50.
- c. The company needs two additional depreciation accounts. It debits Depreciation Expense \$40 for the month's depreciation, and credits Accumulated Depreciation—Equipment \$40.
- d. Pioneer debits Unearned Service Revenue \$400 for services performed, and credits Service Revenue \$400.
- e. Pioneer debits an additional account, Accounts Receivable, \$200 for services performed but not billed, and credits Service Revenue \$200.
- f. The company needs two additional accounts relating to interest. It debits Interest Expense \$50 for accrued interest, and credits Interest Payable \$50.
- g. Pioneer debits Salaries and Wages Expense \$1,200 for accrued salaries, and credits an additional account, Salaries and Wages Payable, \$1,200.

After Pioneer has entered all the adjustments, the adjustments columns are totaled to prove their equality.

ILLUSTRATION 4.3 Entering the adjustments in the adjustments columns

7	Account Titles	Dr.	Cr.	Dr.	Cr.	Dr.	Cr.	Dr.	Cr.	Dr.	Cr.
8	Cash	15,200									
9	Supplies	2,500			(a) 1,500						
10	Prepaid Insurance	600			(b) 50						
11	Equipment	5,000									
12	Notes Payable		5,000								
13	Accounts Payable		2,500								
14	Unearned Service Revenue			1,200	(d) 400						
15	Owner's Capital		10,000								
16	Owner's Drawings	500									
17	Service Revenue		10,000			(d) 400					
18						(e) 200					
19	Salaries and Wages Expense	4,000		(g) 1,200							
20	Rent Expense	900									
21	Totals	28,700	28,700								
22											
23											
24	Supplies Expense			(a) 1,500							
25	Insurance Expense			(b) 50							
26	Accum. Depreciation—					(c) 40					
27	Equipment					(c) 40					
28	Depreciation Expense			(c) 40							
29	Accounts Receivable			(e) 200							
30	Interest Expense			(f) 50							
31	Interest Payable				(f) 50						
32	Salaries and Wages Payable					(g) 1,200					
33	Totals					3,440	3,440				
34											
35											
36											

Add additional accounts as needed to complete the adjustments:
 (a) Supplies Used.
 (b) Insurance Expired.
 (c) Depreciation Expensed.
 (d) Service Revenue Recognized.
 (e) Service Revenue Accrued.
 (f) Interest Accrued.
 (g) Salaries Accrued.

Enter adjustment amounts in appropriate columns, and use letters to cross-reference the debit and credit adjustments.

Total adjustments columns and check for equality.

Step 3

Enter Adjusted Balances in the Adjusted Trial Balance Columns

As shown in **Illustration 4.4**, Pioneer Advertising next determines the adjusted balance of an account by combining the amounts entered in the first four columns of the worksheet for each account. For example, the Prepaid Insurance account in the trial balance columns has a \$600 debit balance and a \$50 credit in the adjustments columns. The result is a \$550 debit balance recorded in the adjusted trial balance columns. **For each account, the amount in the adjusted trial balance columns is the balance that will appear in the ledger after journalizing and posting the adjusting entries.** The balances in these columns are the same as those in the adjusted trial balance in Illustration 3.25.

After Pioneer has entered all account balances in the adjusted trial balance columns, the columns are totaled to prove their equality. If the column totals do not agree, the financial statement columns will not balance and the financial statements will be incorrect.

34											
35											
36											

Combine trial balance amounts with adjustment amounts to obtain the adjusted trial balance.

Total adjusted trial balance columns and check for equality.

Step 4

Extend Adjusted Trial Balance Amounts to Appropriate Financial Statement Columns

HELPFUL HINT

Every adjusted trial balance amount must be extended to one of the four statement columns.

As shown in **Illustration 4.5**, the fourth step is to extend adjusted trial balance amounts to the income statement and balance sheet columns of the worksheet (see **Helpful Hint**). Pioneer Advertising enters balance sheet accounts in the appropriate balance sheet debit and credit columns. For instance, it enters Cash in the balance sheet debit column, and Notes Payable in the balance sheet credit column. Pioneer extends Accumulated Depreciation—Equipment to the balance sheet credit column. The reason is that accumulated depreciation is a contra asset account with a credit balance.

Because the worksheet does not have columns for the owner's equity statement, Pioneer extends the balance in owner's capital to the balance sheet credit column. In addition, it extends the balance in owner's drawings to the balance sheet debit column because it is an owner's equity account with a debit balance.

The company enters the expense and revenue accounts such as Salaries and Wages Expense and Service Revenue in the appropriate income statement columns.

35											
36											
Extend all revenue and expense account balances to the income statement columns.											
Extend all asset and liability account balances, as well as owner's capital and drawings account balances, to the balance sheet columns.											

Extend all revenue and expense account balances to the income statement columns.

Extend all asset and liability account balances, as well as owner's capital and drawings account balances, to the balance sheet columns.

Step 5

Total the Statement Columns, Compute the Net Income (or Net Loss), and Complete the Worksheet

As shown in **Illustration 4.6**, Pioneer Advertising must now total each of the financial statement columns. The net income or loss for the period is the difference between the totals of the two income statement columns. If total credits exceed total debits, the result is net income. In such a case, the company inserts the words “Net Income” in the account titles space. It then enters the amount in the income statement debit column and the balance sheet credit column. **The debit amount balances the income statement columns; the credit amount balances the balance sheet columns.** In addition, the credit in the balance sheet column indicates the increase in owner’s equity resulting from net income.

What if total debits in the income statement columns exceed total credits? In that case, Pioneer has a net loss. It enters the amount of the net loss in the income statement credit column and the balance sheet debit column.

After entering the net income or net loss, Pioneer determines new column totals. The totals shown in the debit and credit income statement columns will match. So will the totals shown in the debit and credit balance sheet columns. If either the income statement columns or the balance sheet columns are not equal after the net income or net loss has been entered, there is an error in the worksheet.

ILLUSTRATION 4.6 Computing net income or net loss and completing the worksheet

16	Owner’s Drawings	500				500				500	
17	Service Revenue	10,000		(d)	400		10,600		10,600		
18				(e)	200						
19	Salaries and Wages Expense	4,000		(g)	1,200		5,200		5,200		
20	Rent Expense	900				900			900		
21	Totals	28,700	28,700								
22											
23											
24	Supplies Expense		(a)	1,500		1,500		1,500			
25	Insurance Expense		(b)	50		50		50			
26	Accum. Depreciation—										
27	Equipment			(c)	40		40			40	
28	Depreciation Expense		(c)	40		40		40			
29	Accounts Receivable		(e)	200		200				200	
30	Interest Expense		(f)	50		50		50			
31	Interest Payable		(f)	50		50				50	
32	Salaries and Wages Payable		(g)	1,200		1,200				1,200	
33	Totals	3,440	3,440	30,190	30,190	7,740	10,600	22,450	19,590		
34											
35	Net Income					2,860		2,860			
36	Totals					10,600	10,600	22,450	22,450		

The difference between the totals of the two income statement columns determines net income or net loss.

Net income is extended to the credit column of the balance sheet columns. (Net loss would be extended to the debit column.)

Preparing Financial Statements from a Worksheet

After a company has completed a worksheet, it has at hand all the data required for preparation of financial statements. The income statement is prepared from the income statement columns. The owner's equity statement and balance sheet are prepared from the balance sheet columns. **Illustration 4.7** shows the financial statements prepared from Pioneer Advertising's

ILLUSTRATION 4.7

worksheet. At this point, the company has not journalized or posted adjusting entries. Therefore, ledger balances for some accounts are not the same as the financial statement amounts.

The amount shown for owner's capital on the worksheet is the account balance **before considering drawings and net income (or loss)**. When the owner has made no additional investments of capital during the period, this worksheet amount for owner's capital is the balance at the beginning of the period.

Using a worksheet, companies can prepare financial statements before they journalize and post adjusting entries. **However, the completed worksheet is not a substitute for formal financial statements.** The format of the data in the financial statement columns of the worksheet is not the same as the format of the financial statements. A **worksheet is essentially a working tool of the accountant**; companies do not distribute it to management and other parties.

Preparing Adjusting Entries from a Worksheet

A **worksheet is not a journal, and it cannot be used as a basis for posting to ledger accounts.** To adjust the accounts, the company must journalize the adjustments and post them to the ledger. **The adjusting entries are prepared from the adjustments columns of the worksheet.** The reference letters in the adjustments columns and the explanations of the adjustments at the bottom of the worksheet help identify the adjusting entries (see **Helpful Hint**). The journalizing and posting of adjusting entries **follows** the preparation of financial statements when a worksheet is used. The adjusting entries on October 31 for Pioneer Advertising are the same as those shown in Illustration 3.23.

HELPFUL HINT

Note that writing the explanation to the adjustment at the bottom of the worksheet is not required.

DO IT! 1 | Worksheet

Susan Elbe is preparing a worksheet. Explain to Susan how she should extend the following adjusted trial balance accounts to the financial statement columns of the worksheet.

Cash	Owner's Drawings
Accumulated Depreciation—Equipment	Service Revenue
Accounts Payable	Salaries and Wages Expense

Solution

Income statement debit column—Salaries and Wages Expense
 Income statement credit column—Service Revenue
 Balance sheet debit column—Cash; Owner's Drawings
 Balance sheet credit column—Accumulated Depreciation—Equipment; Accounts Payable

Related exercise material: **BE4.1, BE4.2, BE4.3, DO IT! 4.1, E4.1, E4.2, E4.3, E4.5, and E4.6.**

ACTION PLAN

- **Balance sheet:** Extend assets to debit column. Extend liabilities to credit column. Extend contra assets to credit column. Extend drawings account to debit column.
- **Income statement:** Extend expenses to debit column. Extend revenues to credit column.

Closing the Books

LEARNING OBJECTIVE 2

Prepare closing entries and a post-closing trial balance.

At the end of the accounting period, the company makes the accounts ready for the next period. This is called **closing the books**. In closing the books, the company distinguishes between temporary and permanent accounts.

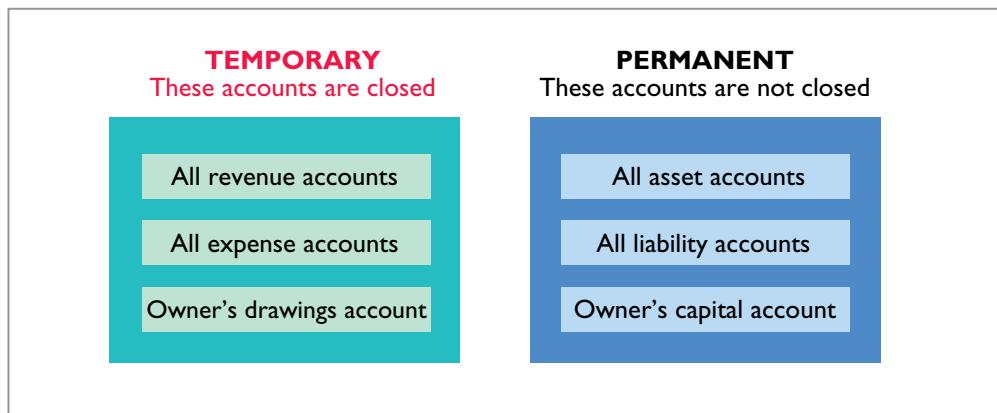

ALTERNATIVE TERMINOLOGY

Temporary accounts are sometimes called *nominal accounts*, and permanent accounts are sometimes called *real accounts*.

ILLUSTRATION 4.8**Temporary versus permanent accounts**

Temporary accounts relate only to a given accounting period. They include all income statement accounts and the owner's drawings account. **The company closes all temporary accounts at the end of the period.**

In contrast, **permanent accounts** relate to one or more future accounting periods. They consist of all balance sheet accounts, including the owner's capital account. **Permanent accounts are not closed from period to period.** Instead, the company carries forward the balances of permanent accounts into the next accounting period. **Illustration 4.8** identifies the accounts in each category (see **Alternative Terminology**).

Preparing Closing Entries

At the end of the accounting period, the company transfers temporary account balances to the permanent owner's equity account, Owner's Capital, by means of closing entries.¹

Closing entries formally recognize in the ledger the transfer of net income (or net loss) and owner's drawings to owner's capital. The owner's equity statement shows the results of these entries. **Closing entries also produce a zero balance in each temporary account.** The temporary accounts are then ready to accumulate data in the next accounting period separate from the data of prior periods. Permanent accounts are not closed.

Journalizing and posting closing entries is a required step in the accounting cycle (see Illustration 4.15). The company performs this step after it has prepared financial statements. In contrast to the steps in the cycle that you have already studied, companies generally journalize and post closing entries **only at the end of the annual accounting period.** Thus, all temporary accounts will contain data for the entire accounting period.

In preparing closing entries, companies could close each income statement account directly to owner's capital. However, to do so would result in excessive detail in the permanent Owner's Capital account. Instead, companies close the revenue and expense accounts to another temporary account, **Income Summary**, and then transfer the resulting net income or net loss from this account to owner's capital.

Companies **record closing entries in the general journal.** A center caption, **Closing Entries**, inserted in the journal between the last adjusting entry and the first closing entry, identifies these entries. Then the company posts the closing entries to the ledger accounts.

Companies generally prepare closing entries directly from the adjusted balances in the ledger. They could prepare separate closing entries for each nominal account, but the following four entries accomplish the desired result more efficiently:

1. Debit each revenue account for its balance, and credit Income Summary for total revenues.

¹We explain closing entries for a partnership and for a corporation in Chapters 12 and 13, respectively.

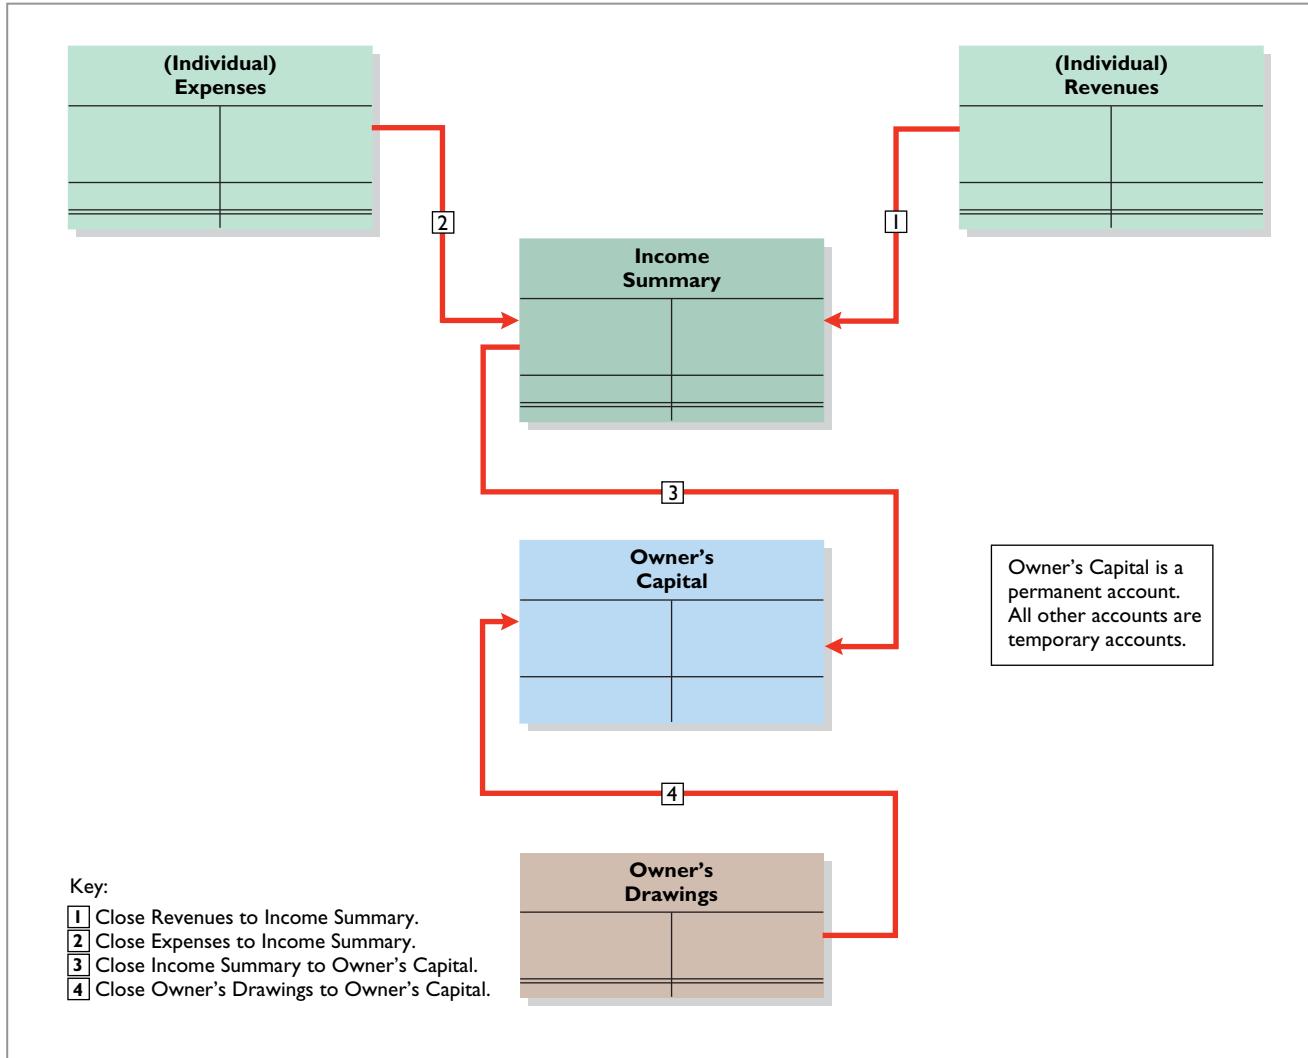

2. Debit Income Summary for total expenses, and credit each expense account for its balance.
3. Debit Income Summary and credit Owner's Capital for the amount of net income.
4. Debit Owner's Capital for the balance in the Owner's Drawings account, and credit Owner's Drawings for the same amount (see **Helpful Hint**).

Illustration 4.9 presents a diagram of the closing process. In it, the boxed numbers refer to the four entries required in the closing process.

HELPFUL HINT

Owner's Drawings is closed directly to Owner's Capital and not to Income Summary. Owner's Drawings is not an expense.

ILLUSTRATION 4.9 Diagram of closing process—proprietorship

If there were a net loss (because expenses exceeded revenues), entry 3 in Illustration 4.9 would be reversed: there would be a credit to Income Summary and a debit to Owner's Capital.

Closing Entries Illustrated

In practice, companies generally prepare closing entries only at the end of the annual accounting period. However, to illustrate the journalizing and posting of closing entries, we will assume that Pioneer Advertising closes its books monthly. **Illustration 4.10** shows the closing entries at October 31. (The numbers in parentheses before each entry correspond to the four entries diagrammed in Illustration 4.9.)

ILLUSTRATION 4.10**Closing entries journalized**

GENERAL JOURNAL					J3
Date	Account Titles and Explanation		Ref.	Debit	Credit
Closing Entries					
2020 Oct. 31	(1)				
	Service Revenue		400	10,600	
	Income Summary		350		10,600
	(To close revenue account)				
31	(2)				
	Income Summary		350	7,740	
	Supplies Expense		631		1,500
	Depreciation Expense		711		40
	Insurance Expense		722		50
	Salaries and Wages Expense		726		5,200
	Rent Expense		729		900
	Interest Expense		905		50
	(To close expense accounts)				
31	(3)				
	Income Summary		350	2,860	
	Owner's Capital		301		2,860
	(To close net income to capital)				
31	(4)				
	Owner's Capital		301	500	
	Owner's Drawings		306		500
	(To close drawings to capital)				

Note that the amounts for Income Summary in entries (1) and (2) are the totals of the income statement credit and debit columns, respectively, in the worksheet.

A couple of cautions in preparing closing entries. (1) Avoid unintentionally doubling the revenue and expense balances rather than zeroing them. (2) Do not close Owner's Drawings through the Income Summary account. **Owner's Drawings is not an expense, and it is not a factor in determining net income.**

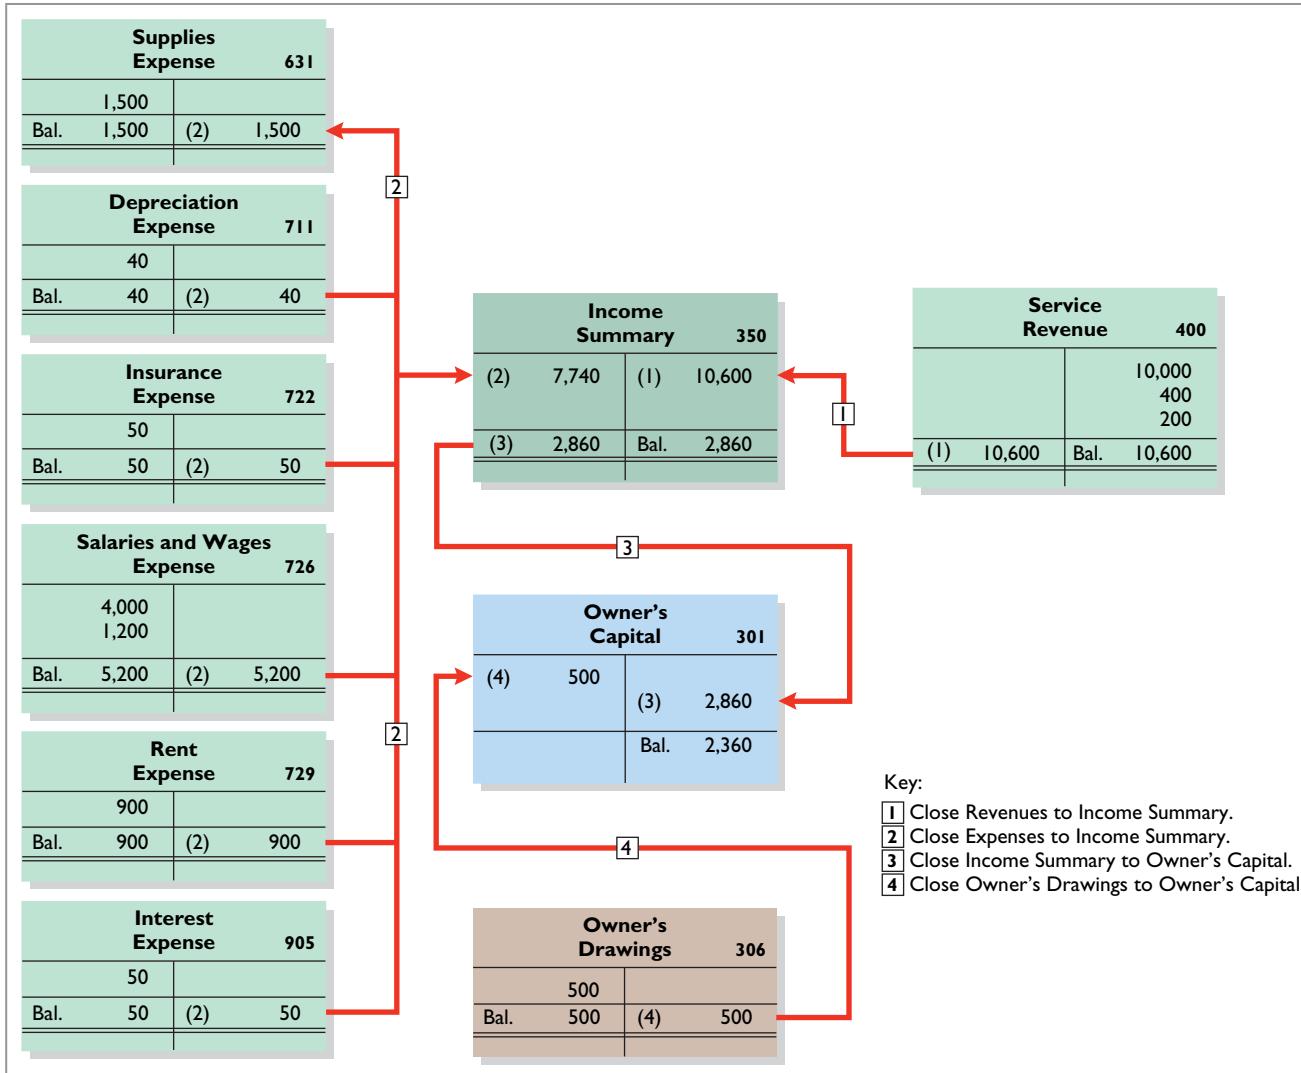

Posting Closing Entries

Illustration 4.11 shows the posting of the closing entries and the underlining (ruling) of the accounts. Note that all temporary accounts have zero balances after posting the closing entries. In addition, notice that the balance in owner's capital (Owner's Capital) represents the total equity of the owner at the end of the accounting period. This balance is shown on the balance sheet and is the ending capital reported on the owner's equity statement, as shown in Illustration 4.7. Pioneer Advertising uses the Income Summary account only in closing. It does not journalize and post entries to this account during the year (see **Helpful Hint**).

HELPFUL HINT

The balance in Income Summary before it is closed must equal the net income or net loss for the period.

As part of the closing process, Pioneer totals, balances, and double-underlines its temporary accounts—revenues, expenses, and Owner's Drawings, as shown in T-account form in Illustration 4.11. It does not close its permanent accounts—assets, liabilities, and Owner's Capital. Instead, Pioneer draws a single underline beneath the current-period entries for the permanent accounts. The account balance is then entered below the single underline and is carried forward to the next period (for example, see Owner's Capital).

ILLUSTRATION 4.11 Posting of closing entries

Accounting Across the Organization Cisco Systems

© Steve Cole/iStockphoto

Performing the Virtual Close

Technology has dramatically shortened the closing process. Recent surveys have reported that the average company now takes only six to seven days to close, rather than the previous 20 days. But a few companies do much better. **Cisco Systems** can perform a “virtual close”—closing within 24 hours on any day in the quarter. The same is true at **Lockheed Martin Corp.**, which improved its closing time by 85% in just the last few years. Not very

long ago, it took 14 to 16 days. Managers at these companies emphasize that this increased speed has not reduced the accuracy and completeness of the data.

This is not just showing off. Knowing exactly where you are financially all of the time allows the company to respond faster than its competitors. It also means that the hundreds of people who used to spend 10 to 20 days a quarter tracking transactions can now be more usefully employed on things such as mining data for business intelligence to find new business opportunities.

Source: “Reporting Practices: Few Do It All,” *Financial Executive* (November 2003), p. 11.

Who else benefits from a shorter closing process? (Go to WileyPLUS for this answer and additional questions.)

Preparing a Post-Closing Trial Balance

After Pioneer Advertising has journalized and posted all closing entries, it prepares another trial balance, called a **post-closing trial balance**, from the ledger. The post-closing trial balance lists permanent accounts and their balances after the journalizing and posting of closing entries. The purpose of the post-closing trial balance is **to prove the equality of the permanent account balances carried forward into the next accounting period**. Since all temporary accounts will have zero balances, **the post-closing trial balance will contain only permanent—balance sheet—accounts**.

Illustration 4.12 shows the post-closing trial balance for Pioneer Advertising.

Note: The permanent accounts for Pioneer Advertising are shown here. Illustration 4.14 shows the temporary accounts. Both permanent and temporary accounts are part of the general ledger. They are segregated here to aid in learning.

A post-closing trial balance provides evidence that the company has properly journalized and posted the closing entries. It also shows that the accounting equation is in balance at the end of the accounting period. However, like the trial balance, it does not prove that Pioneer has recorded all transactions or that the ledger is correct. For example, the post-closing trial balance still will balance even if a transaction is not journalized and posted or if a transaction is journalized and posted twice.

The remaining accounts in the general ledger are temporary accounts, shown in **Illustration 4.14**. After Pioneer correctly posts the closing entries, each temporary account has a zero balance. These accounts are double-underlined to finalize the closing process.

DO IT! 2 | Closing Entries

Hancock Company has the following balances in selected accounts of its adjusted trial balance.

Accounts Payable	\$27,000	Owner's Drawings	\$15,000
Service Revenue	98,000	Owner's Capital	42,000
Rent Expense	22,000	Accounts Receivable	38,000
Salaries and Wages Expense	51,000	Supplies Expense	7,000

Prepare the closing entries at December 31.

ACTION PLAN

- Close revenue and expense accounts to Income Summary.
- Close Income Summary to Owner's Capital.
- Close Owner's Drawings to Owner's Capital.

Solution

Dec. 31	Service Revenue		98,000	
	Income Summary			98,000
	(To close revenue account to Income Summary)			
31	Income Summary		80,000	
	Salaries and Wages Expense			51,000
	Rent Expense			22,000
	Supplies Expense			7,000
	(To close expense accounts to Income Summary)			

31	Income Summary (\$98,000 – \$80,000) Owner's Capital (To close net income to owner's capital)	18,000	18,000
31	Owner's Capital Owner's Drawings (To close owner's drawings to owner's capital)	15,000	15,000

The Accounting Cycle and Correcting Entries

LEARNING OBJECTIVE 3

Explain the steps in the accounting cycle and how to prepare correcting entries.

Summary of the Accounting Cycle

Illustration 4.15 summarizes the steps in the accounting cycle. You can see that the cycle begins with the analysis of business transactions and ends with the preparation of a post-closing trial balance. Companies perform the steps in the cycle in sequence and repeat them in each accounting period.

Steps 1–3 may occur daily during the accounting period. Companies perform Steps 4–7 on a periodic basis, such as monthly, quarterly, or annually. Steps 8 and 9—closing entries and a post-closing trial balance—usually take place only at the end of a company's **annual** accounting period.

There are also two **optional steps** in the accounting cycle. As you have seen, companies may use a worksheet in preparing adjusting entries and financial statements. In addition, they may use reversing entries, as explained below.

Reversing Entries—An Optional Step

Some accountants prefer to reverse certain adjusting entries by making a **reversing entry** at the beginning of the next accounting period. A reversing entry is the exact opposite of the adjusting entry made in the previous period. **Use of reversing entries is an optional bookkeeping procedure; it is not a required step in the accounting cycle.** Accordingly, we have chosen to cover this topic in an appendix at the end of the chapter.

Correcting Entries—An Avoidable Step

Unfortunately, errors may occur in the recording process. Companies should correct errors, **as soon as they discover them**, by journalizing and posting **correcting entries**. If the accounting records are free of errors, no correcting entries are needed.

You should recognize several differences between correcting entries and adjusting entries. First, adjusting entries are an integral part of the accounting cycle. Correcting entries, on the other hand, are unnecessary if the records are error-free. Second, companies journalize and post adjustments **only at the end of an accounting period**. In contrast, companies make correcting entries **whenever they discover an error** (see **Ethics Note**). Finally, adjusting entries always affect at least one balance sheet account and one income statement account. In

ETHICS NOTE

When companies find errors in previously released income statements, they restate those numbers. Perhaps because of the increased scrutiny caused by Sarbanes-Oxley, in a recent year companies filed a record 1,195 restatements

ILLUSTRATION 4.15

Required steps in the accounting cycle

THE ACCOUNTING CYCLE**1. ANALYZE BUSINESS TRANSACTIONS**

Equation Analysis	Assets = Liabilities + Owner's Equity
	<u>Accounts</u> <u> = </u> <u>Liabilities</u> + <u>Owner's Equity</u>
	Cash + Receivable + Supplies + Equipment = Payable + Capital + Revenues - Expenses

contrast, correcting entries may involve any combination of accounts in need of correction.

Correcting entries must be posted before closing entries.

To determine the correcting entry, it is useful to compare the incorrect entry with the correct entry. Doing so helps identify the accounts and amounts that should—and should not—be corrected. After comparison, the accountant makes an entry to correct the accounts. The following two cases for Mercato Co. illustrate this approach.

Case 1

On May 10, Mercato Co. journalized and posted a \$50 cash collection on account from a customer as a debit to Cash \$50 and a credit to Service Revenue \$50. The company discovered the error on May 20, when the customer paid the remaining balance in full (see **Illustration 4.16**).

Incorrect Entry (May 10)		Correct Entry (May 10)	
Cash	50	Cash	50
Service Revenue	50	Accounts Receivable	50

ILLUSTRATION 4.16

Comparison of entries

Comparison of the incorrect entry with the correct entry reveals that the debit to Cash \$50 is correct. However, the \$50 credit to Service Revenue should have been credited to Accounts Receivable. As a result, both Service Revenue and Accounts Receivable are overstated in the ledger. Mercato makes the correcting entry shown in **Illustration 4.17**.

Correcting Entry			
May 20	Service Revenue		50
	Accounts Receivable		50
	(To correct entry of May 10)		

ILLUSTRATION 4.17

Correcting entry

A	=	L	+	OE
				-50 Rev
<hr/>				
Cash Flows				
no effect				

Case 2

On May 18, Mercato purchased on account equipment costing \$450. The transaction was journalized and posted as a debit to Equipment \$45 and a credit to Accounts Payable \$45. The error was discovered on June 3, when Mercato received the monthly statement for May from the creditor (see **Illustration 4.18**).

Incorrect Entry (May 18)		Correct Entry (May 18)	
Equipment	45	Equipment	450
Accounts Payable	45	Accounts Payable	450

ILLUSTRATION 4.18

Comparison of entries

Comparison of the two entries shows that two accounts are incorrect. Equipment is understated \$405, and Accounts Payable is understated \$405. Mercato makes the correcting entry shown in **Illustration 4.19**.

Correcting Entry			
June 3	Equipment		405
	Accounts Payable		405
	(To correct entry of May 18)		

ILLUSTRATION 4.19

Correcting entry

A	=	L	+	OE
+405				+405
<hr/>				
Cash Flows				
no effect				

Instead of preparing a correcting entry, **it is possible to reverse the incorrect entry and then prepare the correct entry**. This approach will result in more entries and postings than a correcting entry, but it will accomplish the desired result.

Accounting Across the Organization Yale Express

© Christian Lagereek/iStockphoto

Lost in Transportation

Yale Express, a short-haul trucking firm, turned over much of its cargo to local truckers to complete deliveries. Yale collected the entire delivery charge. When billed by the local trucker, Yale sent payment for the final phase to the local trucker. Yale used a cutoff period of 20 days into the next accounting period in making its adjusting entries for accrued liabilities. That is, it waited 20 days to receive the local truckers' bills to determine the amount of the unpaid but incurred delivery charges as of the balance sheet date.

On the other hand, **Republic Carloading**, a nationwide, long-distance freight forwarder, frequently did not receive transportation bills from truckers to whom it passed on cargo until months after the year-end. In making its year-end adjusting entries, Republic waited for months in order to include all of these outstanding transportation bills.

When Yale Express merged with Republic Carloading, Yale's vice president employed the 20-day cutoff procedure for both firms. As a result, millions of dollars of Republic's accrued transportation bills went unrecorded. When the company detected the error and made correcting entries, these and other errors changed a reported profit of \$1.14 million into a loss of \$1.88 million!

What might Yale Express's vice president have done to produce more accurate financial statements without waiting months for Republic's outstanding transportation bills? (Go to WileyPLUS for this answer and additional questions.)

DO IT! 3 | Correcting Entries

Sanchez Company discovered the following errors made in January 2020.

1. A payment of Salaries and Wages Expense of \$600 was debited to Supplies and credited to Cash, both for \$600.
2. A collection of \$3,000 from a client on account was debited to Cash \$200 and credited to Service Revenue \$200.
3. The purchase of supplies on account for \$860 was debited to Supplies \$680 and credited to Accounts Payable \$680.

Correct the errors without reversing the incorrect entry.

Solution

1. Salaries and Wages Expense
Supplies
2. Service Revenue
Cash
3. Supplies (\$860 – \$680)
Accounts Payable

600	600
200	200
2,800	2,800
3,000	3,000
180	180
180	180

ACTION PLAN

- Compare the incorrect entry with correct entry.
- After comparison, make an entry to correct the accounts.

Classified Balance Sheet

LEARNING OBJECTIVE 4

Identify the sections of a classified balance sheet.

The balance sheet presents a snapshot of a company's financial position at a point in time. To improve users' understanding of a company's financial position, companies often use a classified balance sheet. A **classified balance sheet** groups together similar assets and similar liabilities, using a number of standard classifications and sections. This is useful because items within a group have similar economic characteristics. A classified balance sheet generally contains the standard classifications listed in **Illustration 4.20**.

Assets	Liabilities and Owner's Equity
Current assets	Current liabilities
Long-term investments	Long-term liabilities
Property, plant, and equipment	Owner's (Stockholders') equity
Intangible assets	

ILLUSTRATION 4.20

Standard balance sheet classifications

These groupings help financial statement readers determine such things as (1) whether the company has enough assets to pay its debts as they come due, and (2) the claims of short- and long-term creditors on the company's total assets. Many of these groupings can be seen in the balance sheet of Franklin Company shown in **Illustration 4.21** (see **Helpful Hint**). In the sections that follow, we explain each of these groupings.

HELPFUL HINT

Recall that the basic accounting equation is Assets = Liabilities + Owner's Equity.

Franklin Company Balance Sheet October 31, 2020			
Assets			
Current assets			
Cash		\$ 6,600	
Debt investments		2,000	
Accounts receivable		7,000	
Notes receivable		1,000	
Inventory		3,000	
Supplies		2,100	
Prepaid insurance		400	
			<hr/>
Total current assets			\$22,100
Long-term investments			
Stock investments		5,200	
Investment in real estate		2,000	7,200
			<hr/>

Classified balance sheet

ILLUSTRATION 4.21

(continued)

		Liabilities and Owner's Equity
Current liabilities		
Notes payable		\$11,000
Accounts payable		2,100
Unearned service revenue		900
Salaries and wages payable		1,600
Interest payable		450
Total current liabilities		\$16,050
Long-term liabilities		
Mortgage payable		10,000
Notes payable		1,300
Total long-term liabilities		11,300
Total liabilities		27,350
Owner's equity		
Owner's capital		34,050
Total liabilities and owner's equity		\$61,400

Current Assets

Current assets are assets that a company expects to convert to cash or use up within one year or its operating cycle, whichever is longer. In Illustration 4.21, Franklin Company had current assets of \$22,100. For most businesses, the cutoff for classification as current assets is one year from the balance sheet date. For example, accounts receivable are current assets because the company will collect them and convert them to cash within one year. Supplies is a current asset because the company expects to use them up in operations within one year.

Some companies use a period longer than one year to classify assets and liabilities as current because they have an operating cycle longer than one year. The **operating cycle** of a company is the average time that it takes to purchase inventory, sell it on account, and then collect cash from customers. For most businesses, this cycle takes less than a year so they use a one-year cutoff. But for some businesses, such as vineyards or airplane manufacturers, this period may be longer than a year. **Except where noted, we will assume that companies use one year to determine whether an asset or liability is current or long-term.**

Common types of current assets are (1) cash, (2) investments (such as short-term U.S. government securities), (3) receivables (notes receivable, accounts receivable, and interest receivable), (4) inventories, and (5) prepaid expenses (supplies and insurance). **On the balance sheet, companies usually list these items in the order in which they expect to convert them into cash.** Illustration 4.22 presents the current assets of **Southwest Airlines Co.**

ILLUSTRATION 4.22

Current assets section

Southwest Airlines Co.
Balance Sheet (partial)
(in millions)
Current assets

Cash and cash equivalents	\$1,355
Short-term investments	1,797
Accounts receivable	419
Inventories	467
Prepaid expenses and other current assets	418
Total current assets	\$4,456

As we explain later in the chapter, a company's current assets are important in assessing its short-term debt-paying ability.

Long-Term Investments

Long-term investments are generally (1) investments in stocks and bonds of other companies that are normally held for many years, (2) long-term assets such as land or buildings that a company is not currently using in its operating activities, and (3) long-term notes receivable (see **Alternative Terminology**). In Illustration 4.21, Franklin Company reported total long-term investments of \$7,200 on its balance sheet. **Alphabet Inc.** reported long-term investments in its balance sheet, as shown in **Illustration 4.23**.

Real World		Alphabet Inc. Balance Sheet (partial) (in millions)	
Long-term investments			
	Non-marketable equity investments		\$1,469

ALTERNATIVE TERMINOLOGY

Long-term investments are often referred to simply as *investments*.

ILLUSTRATION 4.23

Long-term investments section

Property, Plant, and Equipment

Property, plant, and equipment are assets with relatively long useful lives that a company is currently using in operating the business. This category includes land, buildings, machinery and equipment, delivery equipment, and furniture (see **Alternative Terminology**). In Illustration 4.21, Franklin Company reported property, plant, and equipment of \$29,000.

Depreciation is the practice of allocating the cost of assets to a number of years. Companies do this by systematically assigning a portion of an asset's cost as an expense each year (rather than expensing the full purchase price in the year of purchase). The assets that the company depreciates are reported on the balance sheet at cost less accumulated depreciation. The **accumulated depreciation** account shows the total amount of depreciation that the company has expensed thus far in the asset's life. In Illustration 4.21, Franklin Company reported accumulated depreciation of \$5,000. **Illustration 4.24** presents the property, plant, and equipment of **Tesla Motors, Inc.**

ALTERNATIVE TERMINOLOGY

Property, plant, and equipment is sometimes called *fixed assets* or *plant assets*.

Real World		Tesla Motors, Inc. Balance Sheet (partial) (in thousands)

Intangible Assets

Many companies have long-lived assets that do not have physical substance yet often are very valuable. We call these assets **intangible assets** (see **Helpful Hint**). One significant intangible asset is goodwill. Others include patents, copyrights, and trademarks or trade names that give

HELPFUL HINT

Sometimes intangible assets are reported under a broader heading called “*Other assets*.”

the company **exclusive right** of use for a specified period of time. In Illustration 4.21, Franklin Company reported intangible assets of \$3,100. **Illustration 4.25** shows the intangible assets of media and theme-park giant **The Walt Disney Company** in a recent year.

Regaining Goodwill

After falling to unforeseen lows amidst scandals, recalls, and economic crises, the American public's positive perception of the reputation of corporate America is on the rise. Overall corporate reputation is experiencing rehabilitation as the American public gives high marks overall to corporate America, specific industries, and the largest number of individual companies in a dozen years. This is according to the findings of a *Harris Interactive RQ Study*, which measures the reputations of the 60 most visible companies in the United States.

The survey focuses on six reputational dimensions that influence reputation and consumer behavior. Four of these dimensions, along

with the five corporations that ranked highest within each, are as follows.

- **Social Responsibility:** (1) Whole Foods Market, (2) Johnson & Johnson, (3) Google, (4) The Walt Disney Company, (5) Procter & Gamble Co.
- **Emotional Appeal:** (1) Johnson & Johnson, (2) Amazon.com, (3) UPS, (4) General Mills, (5) Kraft Foods
- **Financial Performance:** (1) Google, (2) Berkshire Hathaway, (3) Apple, (4) Intel, (5) The Walt Disney Company
- **Products and Services:** (1) Intel Corporation, (2) 3M Company, (3) Johnson & Johnson, (4) Google, (5) Procter & Gamble Co.

Source: www.harrisinteractive.com.

Name two industries today which are probably rated low on the reputational characteristics of “being trusted” and “having high ethical standards.” (Go to WileyPLUS for this answer and additional questions.)

ETHICS NOTE

A company that has more current assets than current liabilities can increase the ratio of current assets to current liabilities by using cash to pay off some current liabilities. This gives the appearance of being more liquid. Do you think this move is ethical?

Current Liabilities

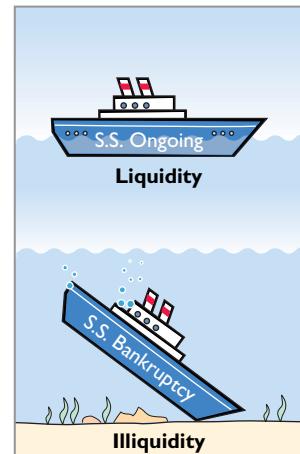

In the liabilities and owner's equity section of the balance sheet, the first grouping is current liabilities. **Current liabilities** are obligations that the company is to pay within the coming year or its operating cycle, whichever is longer (see **Ethics Note**). Common examples are accounts payable, salaries and wages payable, notes payable, interest payable, and income taxes payable. Also included as current liabilities are current maturities of long-term obligations—payments to be made within the next year on long-term obligations. In Illustration 4.21, Franklin Company reported five different types of current liabilities, for a total of

\$16,050. **Illustration 4.26** shows the current liabilities section adapted from the balance sheet of **Marcus Corporation**.

Real World

Marcus Corporation	
Balance Sheet (partial)	
(in thousands)	
Current liabilities	
Notes payable	\$ 239
Accounts payable	24,242
Current maturities of long-term debt	57,250
Other current liabilities	27,477
Income taxes payable	11,215
Salaries and wages payable	6,720
Total current liabilities	\$127,143

ILLUSTRATION 4.26
Current liabilities section

Users of financial statements look closely at the relationship between current assets and current liabilities. This relationship is important in evaluating a company's **liquidity**—its ability to pay obligations expected to be due within the next year. When current assets exceed current liabilities, the likelihood for paying the liabilities is favorable. When the reverse is true, short-term creditors may not be paid, and the company may ultimately be forced into bankruptcy.

Accounting Across the Organization REL Consultancy Group

© Jorge Salcedo/iStockphoto

Can a Company Be Too Liquid?

There actually is a point where a company can be too liquid—that is, it can have too much working capital (current assets less current liabilities). While it is important to be liquid enough to be able to pay short-term bills as they come due, a company does not want to tie up its cash in extra inventory or receivables that are not earning the company money.

By one estimate from the **REL Consultancy Group**, the

thousand largest U.S. companies have on their books cumulative excess working capital of \$764 billion. Based on this figure, companies could have reduced debt by 36% or increased net income by 9%. Given that managers throughout a company are interested in improving profitability, it is clear that they should have an eye toward managing working capital. They need to aim for a “Goldilocks solution”—not too much, not too little, but just right.

Source: K. Richardson, “Companies Fall Behind in Cash Management,” *Wall Street Journal* (June 19, 2007).

What can various company managers do to ensure that working capital is managed efficiently to maximize net income? (Go to WileyPLUS for this answer and additional questions.)

Long-Term Liabilities

Long-term liabilities are obligations that a company expects to pay **after** one year. Liabilities in this category include bonds payable, mortgages payable, long-term notes payable, lease liabilities, and pension liabilities. Many companies report long-term debt maturing after one year as a single amount in the balance sheet and show the details of the debt in notes that accompany the financial statements. Others list the various types of long-term liabilities. In Illustration 4.21, Franklin Company reported long-term liabilities of \$11,300. **Illustration 4.27** shows the long-term liabilities that **Nike, Inc.** reported in its balance sheet in a recent year.

ILLUSTRATION 4.27**Long-term liabilities section**

Real World		Nike, Inc.
		Balance Sheet (partial)
		(in millions)
Long-term liabilities		
Bonds payable		\$1,106
Notes payable		51
Deferred income taxes and other		1,544
Total long-term liabilities		\$2,701

Owner's Equity

The content of the owner's equity section varies with the form of business organization. In a proprietorship, there is one capital account. In a partnership, there is a capital account for each partner. Corporations divide owners' equity into two accounts—Common Stock (sometimes referred to as Capital Stock) and Retained Earnings. Corporations record stockholders' investments in the company by debiting an asset account and crediting the Common Stock account. They record in the Retained Earnings account income retained for use in the business. Corporations combine the Common Stock and Retained Earnings accounts and report them on the balance sheet as **stockholders' equity**. (We discuss these corporation accounts in later chapters.) **Nordstrom, Inc.** recently reported its stockholders' equity section as shown in **Illustration 4.28**.

ILLUSTRATION 4.28**Stockholders' equity section**

Real World		Nordstrom, Inc.
		Balance Sheet (partial)
		(in thousands)
Stockholders' equity		
Common stock, 271,331 shares		\$ 685,934
Retained earnings		1,406,747
Total stockholders' equity		\$2,092,681

DO IT! 4 | Balance Sheet Classifications

The following accounts were taken from the financial statements of Callahan Company.

- | | |
|--|---|
| ____ Salaries and wages payable | ____ Stock investments (long-term) |
| ____ Service revenue | ____ Equipment |
| ____ Interest payable | ____ Accumulated depreciation—equipment |
| ____ Goodwill | ____ Depreciation expense |
| ____ Debt investments (short-term) | ____ Owner's capital |
| ____ Mortgage payable (due in 3 years) | ____ Unearned service revenue |

Match each of the following to its proper balance sheet classification, shown below. If the item would not appear on a balance sheet, use "NA."

- | | |
|--------------------------------------|-----------------------------|
| Current assets (CA) | Current liabilities (CL) |
| Long-term investments (LTI) | Long-term liabilities (LTL) |
| Property, plant, and equipment (PPE) | Owner's equity (OE) |
| Intangible assets (IA) | |

Solution

- | | | | |
|-----|-----------------------------------|-----|------------------------------------|
| CL | Salaries and wages payable | LTI | Stock investments (long-term) |
| NA | Service revenue | PPE | Equipment |
| CL | Interest payable | PPE | Accumulated depreciation—equipment |
| IA | Goodwill | NA | Depreciation expense |
| CA | Debt investments (short-term) | OE | Owner's capital |
| LTL | Mortgage payable (due in 3 years) | CL | Unearned service revenue |

ACTION PLAN

- Analyze whether each financial statement item is an asset, liability, or owner's equity.
- Determine if asset and liability items are short-term or long-term.

Appendix 4A

Reversing Entries

LEARNING OBJECTIVE *5

Prepare reversing entries.

After preparing the financial statements and closing the books, it is often helpful to reverse some of the adjusting entries before recording the regular transactions of the next period. Such entries are **reversing entries**. Companies make a **reversing entry at the beginning of the next accounting period**. Each reversing entry is the exact opposite of the adjusting entry made in the previous period. The recording of reversing entries is an **optional step** in the accounting cycle.

The purpose of reversing entries is to simplify the recording of a subsequent transaction related to an adjusting entry. For example, in Chapter 3, the payment of salaries after an adjusting entry resulted in two debits: one to Salaries and Wages Payable and the other to Salaries and Wages Expense. With reversing entries, the company can debit the entire subsequent payment to Salaries and Wages Expense. **The use of reversing entries does not change the amounts reported in the financial statements.** What it does is simplify the recording of subsequent transactions.

Reversing Entries Example

Companies most often use reversing entries to reverse two types of adjusting entries: accrued revenues and accrued expenses. To illustrate the optional use of reversing entries for accrued expenses, we will use the salaries expense transactions for Pioneer Advertising as illustrated in Chapters 2, 3, and 4. The transaction and adjustment data are as follows.

1. October 26 (initial salary entry): Pioneer pays \$4,000 of salaries and wages earned between October 15 and October 26.
2. October 31 (adjusting entry): Salaries and wages earned between October 29 and October 31 are \$1,200. The company will pay these in the November 9 payroll.
3. November 9 (subsequent salary entry): Salaries and wages paid are \$4,000. Of this amount, \$1,200 applied to accrued salaries and wages payable and \$2,800 was earned between November 1 and November 9.

Illustration 4A.1 shows the entries with and without reversing entries.

ILLUSTRATION 4A.1 Comparative entries—without and with reversing

Without Reversing Entries (per chapter)		With Reversing Entries (per appendix)	
<u>Initial Salary Entry</u>		<u>Initial Salary Entry</u>	
Oct. 26 Salaries and Wages Expense	4,000	Oct. 26 (Same entry)	
Cash	4,000		
<u>Adjusting Entry</u>		<u>Adjusting Entry</u>	
Oct. 31 Salaries and Wages Expense	1,200	Oct. 31 (Same entry)	
Salaries and Wages Payable	1,200		
<u>Closing Entry</u>		<u>Closing Entry</u>	
Oct. 31 Income Summary	5,200	Oct. 31 (Same entry)	
Salaries and Wages Expense	5,200		
<u>Reversing Entry</u>		<u>Reversing Entry</u>	
Nov. 1 No reversing entry is made.			
<u>Subsequent Salary Entry</u>		<u>Subsequent Salary Entry</u>	
Nov. 9 Salaries and Wages Payable	1,200	Nov. 9 Salaries and Wages Payable	1,200
Salaries and Wages Expense	2,800	Salaries and Wages Expense	1,200
Cash	4,000	Cash	4,000

The first three entries are the same whether or not Pioneer uses reversing entries. The last two entries are different. The November 1 **reversing entry** eliminates the \$1,200 balance in Salaries and Wages Payable created by the October 31 adjusting entry. The reversing entry also creates a \$1,200 credit balance in the Salaries and Wages Expense account. As you know, it is unusual for an expense account to have a credit balance. The balance is correct in this instance, though, because it anticipates that the entire amount of the first salaries and wages payment in the new accounting period will be debited to Salaries and Wages Expense. This debit will eliminate the credit balance. The resulting debit balance in the expense account will equal the salaries and wages expense incurred in the new accounting period (\$2,800 in this example).

If Pioneer makes reversing entries, it can debit all cash payments of expenses to the expense account. This means that on November 9 (and every payday) Pioneer can debit Salaries and Wages Expense for the amount paid, without regard to any accrued salaries and wages payable. Being able to make the **same entry each time** simplifies the recording process. The company can record subsequent transactions as if the related adjusting entry had never been made.

Illustration 4A.2 shows the posting of the entries with reversing entries.

ILLUSTRATION 4A.2 Postings with reversing entries

Salaries and Wages Expense			Salaries and Wages Payable		
10/26 Paid	4,000		11/1 Reversing	1,200	10/31 Adjusting
31 Adjusting	1,200				1,200
	5,200	10/31 Closing		5,200	
11/9 Paid	4,000	11/1 Reversing	1,200		

A company can also use reversing entries for accrued revenue adjusting entries. For Pioneer, the adjusting entry was Accounts Receivable (Dr.) \$200 and Service Revenue (Cr.) \$200. Thus, the reversing entry on November 1 is:

$$\begin{array}{l} A = L + OE \\ \hline +200 & -200 \text{ Rev} \\ \hline \text{Cash Flows} & \text{no effect} \end{array}$$

Nov. 1	Service Revenue	200
	Accounts Receivable	
	(To reverse October 31 adjusting entry)	200

When Pioneer collects the accrued service revenue, it debits Cash and credits Service Revenue.

Review and Practice

Learning Objectives Review

1 Prepare a worksheet.

The steps in preparing a worksheet are as follows. (a) Prepare a trial balance on the worksheet. (b) Enter the adjustments in the adjustments columns. (c) Enter adjusted balances in the adjusted trial balance columns. (d) Extend adjusted trial balance amounts to appropriate financial statement columns. (e) Total the statement columns, compute net income (or net loss), and complete the worksheet.

2 Prepare closing entries and a post-closing trial balance.

Closing the books occurs at the end of an accounting period. The process is to journalize and post closing entries and then underline and balance all accounts. In closing the books, companies make separate entries to close revenues and expenses to Income Summary, Income Summary to Owner's Capital, and Owner's Drawings to Owner's Capital. Only temporary accounts are closed. A post-closing trial

balance contains the balances in permanent accounts that are carried forward to the next accounting period. The purpose of this trial balance is to prove the equality of these balances.

3 Explain the steps in the accounting cycle and how to prepare correcting entries.

The required steps in the accounting cycle are (1) analyze business transactions, (2) journalize the transactions, (3) post to ledger accounts, (4) prepare a trial balance, (5) journalize and post adjusting entries, (6) prepare an adjusted trial balance, (7) prepare financial statements, (8) journalize and post closing entries, and (9) prepare a post-closing trial balance.

One way to determine the correcting entry is to compare the incorrect entry with the correct entry. After comparison, the company makes a correcting entry to correct the accounts. An alternative to a correcting entry is to reverse the incorrect entry and then prepare the correct entry.

Glossary Review

Classified balance sheet A balance sheet that contains standard classifications or sections. (p. 4-23).

Closing entries Entries made at the end of an accounting period to transfer the balances of temporary accounts to a permanent owner's equity account, Owner's Capital. (p. 4-12).

Correcting entries Entries to correct errors made in recording transactions. (p. 4-19).

Current assets Assets that a company expects to convert to cash or use up within one year or its operating cycle, whichever is longer. (p. 4-24).

Current liabilities Obligations that a company expects to pay within the coming year or its operating cycle, whichever is longer. (p. 4-26).

Income Summary A temporary account used in closing revenue and expense accounts. (p. 4-12).

Intangible assets Long-lived assets that do not have physical substance. (p. 4-25).

Liquidity The ability of a company to pay obligations expected to be due within the next year. (p. 4-27).

Long-term investments Generally, (1) investments in stocks and bonds of other companies that companies normally hold for many years; (2) long-term assets, such as land and buildings, not currently being used in operating activities; and (3) long-term notes receivable. (p. 4-25).

Long-term liabilities Obligations that a company expects to pay after one year. (p. 4-27).

4 Identify the sections of a classified balance sheet.

A classified balance sheet categorizes assets as current assets; long-term investments; property, plant, and equipment; and intangibles. Liabilities are classified as either current or long-term. There is also an owner's (owners') equity section, which varies with the form of business organization.

*5 Prepare reversing entries.

Reversing entries are the opposite of the adjusting entries made in the preceding period. Some companies choose to make reversing entries at the beginning of a new accounting period to simplify the recording of later transactions related to the adjusting entries. In most cases, only accrued adjusting entries are reversed.

Operating cycle The average time that it takes to purchase inventory, sell it on account, and then collect cash from customers. (p. 4-24).

Permanent (real) accounts Accounts that relate to one or more future accounting periods. Consist of all balance sheet accounts. Balances are carried forward to the next accounting period. (p. 4-12).

Post-closing trial balance A list of permanent accounts and their balances after a company has journalized and posted closing entries. (p. 4-16).

Property, plant, and equipment Assets with relatively long useful lives and currently being used in operations. (p. 4-25).

Reversing entry An entry, made at the beginning of the next accounting period that is the exact opposite of the adjusting entry made in the previous period. (p. 4-19).

Stockholders' equity The ownership claim of shareholders on total assets. It is to a corporation what owner's equity is to a proprietorship. (p. 4-28).

Temporary (nominal) accounts Accounts that relate only to a given accounting period. Consist of all income statement accounts and owner's drawings account. All temporary accounts are closed at end of the accounting period. (p. 4-12).

Worksheet A multiple-column form that may be used in making adjustments and in preparing financial statements. (p. 4-2).

Practice Multiple-Choice Questions

1. **(LO 1)** Which of the following statements is **incorrect** concerning the worksheet?

- The worksheet is essentially a working tool of the accountant.
- The worksheet is distributed to management and other interested parties.
- The worksheet cannot be used as a basis for posting to ledger accounts.
- Financial statements can be prepared directly from the worksheet before journalizing and posting the adjusting entries.

2. **(LO 1)** In a worksheet, net income is entered in the following columns:

- income statement (Dr) and balance sheet (Dr).
- income statement (Cr) and balance sheet (Dr).
- income statement (Dr) and balance sheet (Cr).
- income statement (Cr) and balance sheet (Cr).

3. **(LO 1)** In the unadjusted trial balance of its worksheet for the year ended December 31, 2020, Knox Company reported Equipment of \$120,000. The year-end adjusting entries require an adjustment of

\$15,000 for depreciation expense for the equipment. After the adjusted trial balance is completed, what amount should be shown in the financial statement columns?

- A debit of \$105,000 for Equipment in the balance sheet column.
 - A credit of \$15,000 for Depreciation Expense in the income statement column.
 - A debit of \$120,000 for Equipment in the balance sheet column.
 - A debit of \$15,000 for Accumulated Depreciation—Equipment in the balance sheet column.
- 4. (LO 2)** An account that will have a zero balance after closing entries have been journalized and posted is:

- Service Revenue.
- Supplies.
- Prepaid Insurance.
- Accumulated Depreciation—Equipment.

5. (LO 2) When a net loss has occurred, Income Summary is:

- debited and Owner's Capital is credited.
- credited and Owner's Capital is debited.
- debited and Owner's Drawings is credited.
- credited and Owner's Drawings is debited.

6. (LO 2) The closing process involves separate entries to close (1) expenses, (2) drawings, (3) revenues, and (4) income summary. The correct sequencing of the entries is:

- (4), (3), (2), (1).
- (1), (2), (3), (4).
- (3), (1), (4), (2).
- (3), (2), (1), (4).

7. (LO 2) Which types of accounts will appear in the post-closing trial balance?

- Permanent (real) accounts.
- Temporary (nominal) accounts.
- Accounts shown in the income statement columns of a worksheet.
- None of these answer choices is correct.

8. (LO 3) All of the following are required steps in the accounting cycle except:

- journalizing and posting closing entries.
- preparing financial statements.
- journalizing the transactions.
- preparing a worksheet.

9. (LO 3) The proper order of the following steps in the accounting cycle is:

- prepare unadjusted trial balance, journalize transactions, post to ledger accounts, journalize and post adjusting entries.
- journalize transactions, prepare unadjusted trial balance, post to ledger accounts, journalize and post adjusting entries.
- journalize transactions, post to ledger accounts, prepare unadjusted trial balance, journalize and post adjusting entries.

d. prepare unadjusted trial balance, journalize and post adjusting entries, journalize transactions, post to ledger accounts.

10. (LO 3) When Lopez Company purchased supplies worth \$600, it incorrectly recorded a credit to Supplies for \$6,000 and a debit to Cash for \$6,000. Before correcting this error:

- Cash is overstated and Supplies is overstated.
- Cash is understated and Supplies is understated.
- Cash is understated and Supplies is overstated.
- Cash is overstated and Supplies is understated.

11. (LO 3) Cash of \$100 received at the time the service was performed was journalized and posted as a debit to Cash \$100 and a credit to Accounts Receivable \$100. Assuming the incorrect entry is not reversed, the correcting entry is:

- debit Service Revenue \$100 and credit Accounts Receivable \$100.
- debit Accounts Receivable \$100 and credit Service Revenue \$100.
- debit Cash \$100 and credit Service Revenue \$100.
- debit Accounts Receivable \$100 and credit Cash \$100.

12. (LO 4) The correct order of presentation in a classified balance sheet for the following current assets is:

- accounts receivable, cash, prepaid insurance, inventory.
- cash, inventory, accounts receivable, prepaid insurance.
- cash, accounts receivable, inventory, prepaid insurance.
- inventory, cash, accounts receivable, prepaid insurance.

13. (LO 4) A company has purchased a tract of land. It expects to build a production plant on the land in approximately 5 years. During the 5 years before construction, the land will be idle. The land should be reported as:

- property, plant, and equipment.
- land expense.
- a long-term investment.
- an intangible asset.

14. (LO 4) In a classified balance sheet, assets are usually classified using the following categories:

- current assets; long-term assets; property, plant, and equipment; and intangible assets.
- current assets; long-term investments; property, plant, and equipment; and tangible assets.
- current assets; long-term investments; tangible assets; and intangible assets.
- current assets; long-term investments; property, plant, and equipment; and intangible assets.

15. (LO 4) Current assets are listed:

- by expected conversion to cash.
- by importance.
- by longevity.
- alphabetically.

***16. (LO 5)** On December 31, Harvey Kohl Company correctly made an adjusting entry to recognize \$2,000 of accrued salaries payable. On January 8 of the next year, total salaries of \$3,800 were paid. Assuming

the correct reversing entry was made on January 1, the entry on January 8 will result in a credit to Cash \$3,800 and the following debit(s):

- a. Salaries and Wages Payable \$1,800 and Salaries and Wages Expense \$2,000.

- b. Salaries and Wages Payable \$2,000 and Salaries and Wages Expense \$1,800.
- c. Salaries and Wages Expense \$3,800.
- d. Salaries and Wages Payable \$3,800.

Solutions

1. b. The worksheet is a working tool of the accountant; it is not distributed to management and other interested parties. The other choices are all true statements.

2. c. Net income is entered in the Dr column of the income statement and the Cr column of the balance sheet. The other choices are incorrect because net income is entered in the (a) Cr (not Dr) column of the balance sheet, (b) Dr (not Cr) column of the income statement and in the Cr (not Dr) column of the balance sheet, and (d) Dr (not Cr) column of the income statement.

3. c. A debit of \$120,000 for Equipment would appear in the balance sheet column. The other choices are incorrect because (a) Equipment, less accumulated depreciation of \$15,000, would total \$105,000 under assets on the balance sheet, not on the worksheet; (b) a debit, not credit, for Depreciation Expense would appear in the income statement column; and (d) a credit, not debit, of \$15,000 for Accumulated Depreciation—Equipment would appear in the balance sheet column.

4. a. The Service Revenue account will have a zero balance after closing entries have been journalized and posted because it is a temporary account. The other choices are incorrect because (b) Supplies, (c) Prepaid Insurance, and (d) Accumulated Depreciation—Equipment are all permanent accounts and therefore not closed in the closing process.

5. b. The effect of a net loss is a credit to Income Summary and a debit to Owner's Capital. The other choices are incorrect because (a) Income Summary is credited, not debited, and Owner's Capital is debited, not credited; (c) Income Summary is credited, not debited, and Owner's Drawings is not affected; and (d) Owner's Capital, not Owner's Drawings, is debited.

6. c. The correct order is (3) revenues, (1) expenses, (4) income summary, and (2) drawings. Therefore, choices (a), (b), and (d) are incorrect.

7. a. Permanent accounts appear in the post-closing trial balance. The other choices are incorrect because (b) temporary accounts and (c) income statement accounts are closed to a zero balance and are therefore not included in the post-closing trial balance. Choice (d) is wrong as there is only one correct answer for this question.

8. d. Preparing a worksheet is not a required step in the accounting cycle. The other choices are all required steps in the accounting cycle.

9. c. The proper order of the steps in the accounting cycle is (1) journalize transactions, (2) post to ledger accounts, (3) prepare unadjusted trial balance, and (4) journalize and post adjusting entries. Therefore, choices (a), (b), and (d) are incorrect.

10. d. This entry causes Cash to be overstated and Supplies to be understated. Supplies should have been debited (increasing supplies) and Cash should have been credited (decreasing cash). The other choices are incorrect because (a) Supplies is understated, not overstated; (b) Cash is overstated, not understated; and (c) Cash is overstated, not understated, and Supplies is understated, not overstated.

11. b. The correcting entry is to debit Accounts Receivable \$100 and credit Service Revenue \$100. The other choices are incorrect because (a) Service Revenue should be credited, not debited, and Accounts Receivable should be debited, not credited; (c) Service Revenue should be credited for \$100, and Cash should not be included in the correcting entry as it was recorded properly; and (d) Accounts Receivable should be debited for \$100 and Cash should not be included in the correcting entry as it was recorded properly.

12. c. Companies list current assets on balance sheet in the order of liquidity: cash, accounts receivable, inventory, and prepaid insurance. Therefore, choices (a), (b), and (d) are incorrect.

13. c. Long-term investments include long-term assets such as land that a company is not currently using in its operating activities. The other choices are incorrect because (a) land would be reported as property, plant, and equipment only if it is being currently used in the business; (b) land is an asset, not an expense; and (d) land has physical substance and thus is a tangible property.

14. d. These are the categories usually used in a classified balance sheet. The other choices are incorrect because the categories (a) "long-term assets" and (b) and (c) "tangible assets" are generally not used.

15. a. Current assets are listed in order of their liquidity, not (b) by importance, (c) by longevity, or (d) alphabetically.

***16. c.** The use of reversing entries simplifies the recording of the first payroll following the end of the year by eliminating the need to make an entry to the Salaries and Wages Payable account. The other choices are incorrect because (a) Salaries and Wages Payable is not part of the payroll entry on January 8, and the debit to Salaries and Wages Expense should be for \$3,800, not \$2,000; and (b) and (d) the Salaries and Wages Expense account, not the Salaries and Wages Payable account, should be debited.

Practice Brief Exercises

- 1. (LO 2)** The ledger of Quintana Company contains the following balances: Owner's Capital \$40,000, Owner's Drawings \$3,000, Service Revenue \$65,000, Salaries and Wages Expense \$39,000, and Maintenance and Repairs Expense \$9,000. Prepare the closing entries at December 31.

Prepare closing entries from ledger balances.

Solution

1.	Dec. 31	Service Revenue	65,000	
		Income Summary		65,000
	31	Income Summary	48,000	
		Salaries and Wages Expense		39,000
		Maintenance and Repairs Expense		9,000
	31	Income Summary	17,000	
		Owner's Capital		17,000
	31	Owner's Capital	3,000	
		Owner's Drawing		3,000

Prepare correcting entries.

- 2. (LO 3)** At Shields Company, the following errors were discovered after the transactions had been journalized and posted. Prepare the correcting entries.

- a. A cash sale to a customer for \$780 was recorded as a debit to Cash \$780 and a credit to Accounts Receivable \$780.
- b. The purchase of equipment on account for \$1,730 was recorded as a debit to Equipment \$1,370 and a credit to Accounts Payable \$1,370.

Solution

2. a.	Accounts Receivable	780	
	Service Revenue		780
b.	Equipment (\$1,730 – \$1,370)	360	
	Accounts Payable		360

Prepare the current assets section of a balance sheet.

- 3. (LO 4) Financial Statement** The balance sheet debit column of the worksheet for Miguel Company includes the following accounts: Accounts Receivable \$25,000, Prepaid Insurance \$7,000, Cash \$8,000, Supplies \$11,000, and Stock Investments (short-term) \$14,000. Prepare the current assets section of the balance sheet, listing the accounts in proper sequence.

Solution

3.

Miguel Company
Partial Balance Sheet

Current assets	
Cash	\$ 8,000
Stock investments	14,000
Accounts receivable	25,000
Supplies	11,000
Prepaid insurance	7,000
Total current assets	<u><u>\$65,000</u></u>

Practice Exercises

Journalize and post closing entries, and prepare a post-closing trial balance.

- 1. (LO 2)** Hercules Company ended its fiscal year on August 31, 2020. The company's adjusted trial balance as of the end of its fiscal year is as shown below.

Hercules Company
Adjusted Trial Balance
August 31, 2020

No.	Account Titles	Debit	Credit
101	Cash	\$10,900	
112	Accounts Receivable	6,200	
157	Equipment	10,600	
167	Accumulated Depr.—Equip.		\$ 5,400
201	Accounts Payable		2,800
208	Unearned Rent Revenue		1,200
301	Owner's Capital		31,700
306	Owner's Drawings	12,000	
404	Service Revenue		42,400
429	Rent Revenue		6,100
711	Depreciation Expense	2,700	
720	Salaries and Wages Expense	37,100	
732	Utilities Expense	10,100	
		<u>\$89,600</u>	<u>\$89,600</u>

Instructions

- Prepare the closing entries using page J15 in a general journal.
- Post to Owner's Capital and No. 350 Income Summary accounts. (Use the three-column form.)
- Prepare a post-closing trial balance at August 31, 2020.

Solution**1. a.**

GENERAL JOURNAL					J15	
Date	Account Titles			Ref.	Debit	Credit
Aug. 31	Service Revenue			404	42,400	
	Rent Revenue			429	6,100	
	Income Summary			350		48,500
	(To close revenue accounts)					
31	Income Summary			350	49,900	
	Salaries and Wages Expense			720		37,100
	Utilities Expense			732		10,100
	Depreciation Expense			711		2,700
	(To close expense accounts)					
31	Owner's Capital (\$49,900 – \$48,500)			301	1,400	
	Income Summary			350		1,400
	(To close net loss to capital)					
31	Owner's Capital			301	12,000	
	Owner's Drawings			306		12,000
	(To close drawings to capital)					

b.

Owner's Capital			No. 301	Income Summary			No. 350				
Date	Explanation	Ref.	Debit	Credit	Balance	Date	Explanation	Ref.	Debit	Credit	Balance
Aug. 31	Balance				31,700	Aug. 31	Close revenue	J15		48,500	48,500
31	Close net loss	J15	1,400		30,300	31	Close expenses	J15	49,000		(1,400)
31	Close drawings	J15	12,000		18,300	31	Close net loss	J15		1,400	0

c.

Hercules Company Post-Closing Trial Balance August 31, 2020		
	<u>Debit</u>	<u>Credit</u>
Cash	\$10,900	
Accounts Receivable	6,200	
Equipment	10,600	
Accumulated Depreciation—Equipment		\$ 5,400
Accounts Payable		2,800
Unearned Rent Revenue		1,200
Owner's Capital		18,300
	<u>\$27,700</u>	<u>\$27,700</u>

Prepare financial statements.

2. (LO 4) Financial Statement The adjusted trial balance for Hercules Company is presented in **Practice Exercise 1**.

Instructions

- Prepare an income statement and an owner's equity statement for the year ended August 31, 2020. Hercules did not make any capital investments during the year.
- Prepare a classified balance sheet at August 31, 2020.

Solution

2. a.

Hercules Company Income Statement For the Year Ended August 31, 2020		
Revenues		
Service revenue	\$42,400	
Rent revenue	6,100	
Total revenues		\$48,500
Expenses		
Salaries and wages expense	37,100	
Utilities expense	10,100	
Depreciation expense	2,700	
Total expenses		\$49,900
Net loss		<u><u>\$ (1,400)</u></u>

Hercules Company
Owner's Equity Statement
For the Year Ended August 31, 2020

Owner's capital, September 1, 2019		\$ 31,700
Less: Net loss		\$ 1,400
Owner's drawings	12,000	13,400
Owner's capital, August 31, 2020		<u><u>\$ 18,300</u></u>

b.

Hercules Company		
Balance Sheet		
August 31, 2020		
Assets		
Current assets		
Cash	\$10,900	
Accounts receivable	<u>6,200</u>	
Total current assets		\$17,100
Property, plant, and equipment		
Equipment	10,600	
Less: Accumulated depreciation—equip.	<u>5,400</u>	<u>5,200</u>
Total assets		<u><u>\$22,300</u></u>
Liabilities and Owner's Equity		
Current liabilities		
Accounts payable	\$ 2,800	
Unearned rent revenue	<u>1,200</u>	
Total current liabilities		\$ 4,000
Owner's equity		
Owner's capital		18,300
Total liabilities and owner's equity		<u><u>\$22,300</u></u>

Practice Problem

(LO 1, 2, 4) Financial Statement At the end of its first month of operations, Pampered Pet Service has the following unadjusted trial balance.

Prepare worksheet and classified balance sheet, and journalize closing entries.

Pampered Pet Service		
August 31, 2020		
Trial Balance		
	Debit	Credit
Cash	\$ 5,400	
Accounts Receivable	2,800	
Supplies	1,300	
Prepaid Insurance	2,400	
Equipment	60,000	
Notes Payable		\$40,000
Accounts Payable		2,400
Owner's Capital		30,000
Owner's Drawings	1,000	
Service Revenue		4,900
Salaries and Wages Expense	3,200	
Utilities Expense	800	
Advertising Expense	400	
	<u><u>\$77,300</u></u>	<u><u>\$77,300</u></u>

Other data:

1. Insurance expires at the rate of \$200 per month.
2. \$1,000 of supplies are on hand at August 31.
3. Monthly depreciation on the equipment is \$900.
4. Interest of \$500 on the notes payable has accrued during August.

Instructions

- Prepare a worksheet.
- Prepare a classified balance sheet assuming \$35,000 of the notes payable are long-term.
- Journalize the closing entries.

Solution

a. **Pampered Pet Service**
Worksheet for the Month Ended August 31, 2020

Account Titles	Trial Balance		Adjustments		Adjusted Trial Balance		Income Statement		Balance Sheet	
	Dr.	Cr.	Dr.	Cr.	Dr.	Cr.	Dr.	Cr.	Dr.	Cr.
Cash	5,400				5,400				5,400	
Accounts Receivable	2,800				2,800				2,800	
Supplies	1,300		(b) 300		1,000				1,000	
Prepaid Insurance	2,400		(a) 200		2,200				2,200	
Equipment	60,000				60,000				60,000	
Notes Payable		40,000				40,000				40,000
Accounts Payable		2,400				2,400				2,400
Owner's Capital		30,000				30,000				30,000
Owner's Drawings	1,000				1,000				1,000	
Service Revenue		4,900				4,900		4,900		4,900
Salaries and Wages Expense	3,200				3,200		3,200			
Utilities Expense	800				800		800			
Advertising Expense	400				400		400			
Totals	<u>77,300</u>	<u>77,300</u>								
Insurance Expense		(a) 200			200		200			
Supplies Expense		(b) 300			300		300

Notes payable	35,000		
Total liabilities	42,900		
Owner's equity			
Owner's capital	27,600*		
Total liabilities and owner's equity	\$70,500		

*Owner's capital \$30,000 less drawings \$1,000 and net loss \$1,400.

c.

Aug. 31	Service Revenue Income Summary (To close revenue account)	4,900	4,900
31	Income Summary Salaries and Wages Expense Depreciation Expense Utilities Expense Interest Expense Advertising Expense Supplies Expense Insurance Expense (To close expense accounts)	6,300	3,200 900 800 500 400 300 200
31	Owner's Capital (\$6,300 – \$4,900) Income Summary (To close net loss to capital)	1,400	1,400
31	Owner's Capital Owner's Drawings (To close drawings to capital)	1,000	1,000

WileyPLUS

Brief Exercises, DO IT! Exercises, Exercises, Problems, and many additional resources are available for practice in WileyPLUS.

Note: All asterisked Questions, Exercises, and Problems relate to material in the appendix to the chapter.

Questions

1. "A worksheet is a permanent accounting record and its use is required in the accounting cycle." Do you agree? Explain.
2. Explain the purpose of the worksheet.
3. What is the relationship, if any, between the amount shown in the adjusted trial balance column for an account and that account's ledger balance?
4. If a company's revenues are \$125,000 and its expenses are \$113,000, in which financial statement columns of the worksheet will the net income of \$12,000 appear? When expenses exceed revenues, in which columns will the difference appear?
5. Why is it necessary to prepare formal financial statements if all of the data are in the statement columns of the worksheet?
6. Identify the account(s) debited and credited in each of the four closing entries, assuming the company has net income for the year.
7. Describe the nature of the Income Summary account and identify the types of summary data that may be posted to this account.

8. What are the content and purpose of a post-closing trial balance?
9. Which of the following accounts would not appear in the post-closing trial balance? Interest Payable, Equipment, Depreciation Expense, Owner's Drawings, Unearned Service Revenue, Accumulated Depreciation—Equipment, and Service Revenue.
10. Distinguish between a reversing entry and an adjusting entry. Are reversing entries required?
11. Indicate, in the sequence in which they are made, the three required steps in the accounting cycle that involve journalizing.
12. Identify, in the sequence in which they are prepared, the three trial balances that are used in the accounting cycles.
13. How do correcting entries differ from adjusting entries?
14. What standard classifications are used in preparing a classified balance sheet?
15. What is meant by the term “operating cycle”?
16. Define current assets. What basis is used for arranging individual items within the current assets section?
17. Distinguish between long-term investments and property, plant, and equipment.
18. (a) What is the term used to describe the owner's equity section of a corporation? (b) Identify the two owners' equity accounts in a corporation and indicate the purpose of each.
19. Using **Apple**'s annual report, determine its current liabilities at September 27, 2014, and September 26, 2015. Were current liabilities higher or lower than current assets in these two years?
- *20. Cigale Company prepares reversing entries. If the adjusting entry for interest payable is reversed, what type of an account balance, if any, will there be in Interest Payable and Interest Expense after the reversing entry is posted?
- *21. At December 31, accrued salaries payable totaled \$3,500. On January 10, total salaries of \$8,000 are paid. (a) Assume that reversing entries are made at January 1. Give the January 10 entry, and indicate the Salaries and Wages Expense account balance after the entry is posted. (b) Repeat part (a) assuming reversing entries are not made.

Brief Exercises

List the steps in preparing a worksheet.

BE4.1 (LO 1) The steps in using a worksheet are presented in random order below. List the steps in the proper order by placing numbers 1–5 in the blank spaces.

- a. _____ Prepare a trial balance on the worksheet.
- b. _____ Enter adjusted balances.
- c. _____ Extend adjusted balances to appropriate statement columns.
- d. _____ Total the statement columns, compute net income (loss), and complete the worksheet.
- e. _____ Enter adjustment data.

Prepare partial worksheet.

BE4.2 (LO 1) The ledger of Walters Company includes the following unadjusted balances: Prepaid Insurance \$3,000, Service Revenue \$60,000, and Salaries and Wages Expense \$25,000. Adjusting entries are required for (a) expired insurance \$1,800, (b) services performed \$1,100 are billed and not yet collected, and (c) accrued salaries payable \$900. Enter the unadjusted balances and adjustments into a worksheet and complete the worksheet for all accounts. (*Note:* You will need to add the following accounts: Accounts Receivable, Salaries and Wages Payable, and Insurance Expense.)

Identify worksheet columns for selected accounts.

BE4.3 (LO 1) The following selected accounts appear in the adjusted trial balance columns of the worksheet for Ashram Company: Accumulated Depreciation, Depreciation Expense, Owner's Capital, Owner's Drawings, Service Revenue, Supplies, and Accounts Payable. Indicate the financial statement column (income statement Dr., balance sheet Cr., etc.) to which each balance should be extended.

Prepare closing entries from ledger balances.

BE4.4 (LO 2) The ledger of Pitt Company contains the following balances: Owner's Capital \$30,000, Owner's Drawings \$2,000, Service Revenue \$58,000, Salaries and Wages Expense \$39,000, and Supplies Expense \$7,000. Prepare the closing entries at December 31.

Post closing entries; underline and balance T-accounts.

BE4.5 (LO 2) Using the data in BE4.4, enter the balances in T-accounts, post the closing entries, and underline and balance the accounts.

Journalize and post closing entries using the three-column form of account.

BE4.6 (LO 2) The income statement for Salt Creek Golf Club for the month ending July 31 shows Service Revenue \$17,800, Salaries and Wages Expense \$9,600, Maintenance and Repairs Expense \$2,500, and Net Income \$5,700. Prepare the entries to close the revenue and expense accounts. Post the entries to the revenue and expense accounts, and complete the closing process for these accounts using the three-column form of account.

Identify post-closing trial balance accounts.

BE4.7 (LO 2) Using the data in BE4.3, identify the accounts that would be included in a post-closing trial balance.

BE4.8 (LO 3) The steps in the accounting cycle are listed in random order below. List the steps in proper sequence, assuming no worksheet is prepared, by placing numbers 1–9 in the blank spaces.

- a. _____ Prepare a trial balance.
- b. _____ Journalize the transactions.
- c. _____ Journalize and post closing entries.
- d. _____ Prepare financial statements.
- e. _____ Journalize and post adjusting entries.
- f. _____ Post to ledger accounts.
- g. _____ Prepare a post-closing trial balance.
- h. _____ Prepare an adjusted trial balance.
- i. _____ Analyze business transactions.

List the required steps in the accounting cycle in sequence.

BE4.9 (LO 3) At Raymond Company, the following errors were discovered after the transactions had been journalized and posted. Prepare the correcting entries.

1. A collection on account from a customer for \$870 was recorded as a debit to Cash \$870 and a credit to Service Revenue \$870.
2. The purchase of store supplies on account for \$1,510 was recorded as a debit to Supplies \$1,150 and a credit to Accounts Payable \$1,150.

Prepare correcting entries.

BE4.10 (LO 4) Financial Statement The balance sheet debit column of the worksheet for Jolie Company includes the following accounts: Accounts Receivable \$12,500, Prepaid Insurance \$4,500, Cash \$4,100, Supplies \$5,200, and Debt Investments (short-term) \$7,600. Prepare the current assets section of the balance sheet, listing the accounts in proper sequence.

Prepare the current assets section of a balance sheet.

BE4.11 (LO 4) The following are the major balance sheet classifications:

Current assets (CA)	Current liabilities (CL)
Long-term investments (LTI)	Long-term liabilities (LTL)
Property, plant, and equipment (PPE)	Owner's equity (OE)
Intangible assets (IA)	

Classify accounts on balance sheet.

Match each of the following accounts to its proper balance sheet classification.

_____ Accounts payable	_____ Income taxes payable
_____ Accounts receivable	_____ Debt investments (long-term)
_____ Accumulated depreciation—buildings	_____ Land
_____ Buildings	_____ Inventory
_____ Cash	_____ Patents
_____ Copyrights	_____ Supplies

***BE4.12 (LO 5)** At October 31, Miras Company made an accrued expense adjusting entry of \$3,300 for salaries. Prepare the reversing entry on November 1, and indicate the balances in Salaries and Wages Payable and Salaries and Wages Expense after posting the reversing entry.

Prepare reversing entries.

DO IT! Exercises

DO IT! 4.1 (LO 1) Jordan Carr is preparing a worksheet. Explain to Jordan how he should extend the following adjusted trial balance accounts to the financial statement columns of the worksheet.

Prepare a worksheet.

Service Revenue	Accounts Receivable
Notes Payable	Accumulated Depreciation
Owner's Capital	Utilities Expense

DO IT! 4.2 (LO2) Paloma Company shows the following balances in selected accounts of its adjusted trial balance.

Prepare closing entries.

Supplies	\$32,000	Service Revenue	\$108,000
Supplies Expense	6,000	Salaries and Wages Expense	40,000
Accounts Receivable	12,000	Utilities Expense	8,000
Owner's Drawings	22,000	Rent Expense	18,000
Owner's Capital	70,000		

Prepare the closing entries at December 31.

Prepare correcting entries.

DO IT! 4.3 (LO 3) Hanson Company has an inexperienced accountant. During the first month on the job, the accountant made the following errors in journalizing transactions. All entries were posted as made.

1. The purchase of supplies for \$650 cash was debited to Equipment \$210 and credited to Cash \$210.
2. A \$500 withdrawal of cash for B. Hanson's personal use was debited to Salaries and Wages Expense \$900 and credited to Cash \$900.
3. A payment on account of \$820 to a creditor was debited to Accounts Payable \$280 and credited to Cash \$280.

Prepare the correcting entries.

Match accounts to balance sheet classifications.

DO IT! 4.4 (LO 4) The following accounts were taken from the financial statements of Giles Company.

_____ Interest revenue	_____ Owner's capital
_____ Utilities payable	_____ Accumulated depreciation—equipment
_____ Accounts payable	_____ Equipment
_____ Supplies	_____ Salaries and wages expense
_____ Bonds payable	_____ Debt investments (long-term)
_____ Goodwill	_____ Unearned rent revenue

Match each of the accounts to its proper balance sheet classification, as shown below. If the item would not appear on a balance sheet, use "NA."

Current assets (CA)	Current liabilities (CL)
Long-term investments (LTI)	Long-term liabilities (LTL)
Property, plant, and equipment (PPE)	Owner's equity (OE)
Intangible assets (IA)	

Exercises

Complete the worksheet.

E4.1 (LO 1, 3) The trial balance columns of the worksheet for Dixon Company at June 30, 2020, are as follows.

**Dixon Company
Worksheet
For the Month Ended June 30, 2020**

Account Titles	Trial Balance	
	Dr.	Cr.
Cash	2,320	
Accounts Receivable	2,440	
Supplies	1,880	
Accounts Payable		1,120
Unearned Service Revenue		240
Owner's Capital		3,600
Service Revenue		2,400
Salaries and Wages Expense	560	
Miscellaneous Expense	160	
	7,360	7,360

Other data:

1. A physical count reveals \$500 of supplies on hand.
2. \$100 of the unearned revenue is still unearned at month-end.
3. Accrued salaries are \$210.

Instructions

Enter the trial balance on a worksheet and complete the worksheet.

E4.2 (LO 1) The adjusted trial balance columns of the worksheet for Auburn Company are as follows.

Complete the worksheet.

**Auburn Company
Worksheet (partial)
For the Month Ended April 30, 2020**

Account Titles	Adjusted Trial Balance		Income Statement		Balance Sheet	
	Dr.	Cr.	Dr.	Cr.	Dr.	Cr.
Cash	10,000					
Accounts Receivable	7,840					
Prepaid Rent	2,280					
Equipment	23,050					
Accumulated Depreciation—Equip.		4,900				
Notes Payable		5,700				
Accounts Payable		4,920				
Owner's Capital		27,960				
Owner's Drawings	3,650					
Service Revenue		15,590				
Salaries and Wages Expense	10,840					
Rent Expense	760					
Depreciation Expense	650					
Interest Expense	57					
Interest Payable		57				
Totals	<u>59,127</u>	<u>59,127</u>				

Instructions

Complete the worksheet.

E4.3 (LO 1, 4) Financial Statement Worksheet data for Auburn Company are presented in E4.2. The owner did not make any additional investments in the business in April.

Prepare financial statements from worksheet.

Instructions

Prepare an income statement, an owner's equity statement, and a classified balance sheet.

E4.4 (LO 2) Worksheet data for Auburn Company are presented in E4.2.

Journalize and post closing entries and prepare a post-closing trial balance.

Instructions

- a. Journalize the closing entries at April 30.
- b. Post the closing entries to Income Summary and Owner's Capital. Use T-accounts.
- c. Prepare a post-closing trial balance at April 30.

E4.5 (LO 1) The adjustments columns of the worksheet for Becker Company are shown below.

Prepare adjusting entries from a worksheet, and extend balances to worksheet columns.

Account Titles	Adjustments	
	Debit	Credit
Accounts Receivable	1,100	
Prepaid Insurance		300
Accumulated Depreciation—Equipment		900
Salaries and Wages Payable		500
Service Revenue		1,100
Salaries and Wages Expense	500	
Insurance Expense	300	
Depreciation Expense	900	
	<u>2,800</u>	<u>2,800</u>

Instructions

- Prepare the adjusting entries.
- Assuming the adjusted trial balance amount for each account is normal, indicate the financial statement column to which each balance should be extended.

Derive adjusting entries from worksheet data.

E4.6 (LO 1) Selected worksheet data for Bonita Company are presented below.

Account Titles	Trial Balance		Adjusted Trial Balance	
	Dr.	Cr.	Dr.	Cr.
Accounts Receivable	?		34,000	
Prepaid Insurance	26,000		20,000	
Supplies	7,000			?
Accumulated Depreciation—Equipment		12,000		?
Salaries and Wages Payable		?		5,600
Service Revenue		88,000		97,000
Insurance Expense				?
Depreciation Expense			10,000	
Supplies Expense			4,500	
Salaries and Wages Expense		?		49,000

Instructions

- Fill in the missing amounts.
- Prepare the adjusting entries that were made.

Prepare closing entries, and prepare a post-closing trial balance.

E4.7 (LO 2) Victoria Lee Company had the following adjusted trial balance.

**Victoria Lee Company
Adjusted Trial Balance
For the Month Ended June 30, 2020**

Account Titles	Adjusted Trial Balance	
	Debit	Credit
Cash	\$ 3,712	
Accounts Receivable	3,904	
Supplies	480	
Accounts Payable		\$ 1,382
Unearned Service Revenue		160
Owner's Capital		5,760
Owner's Drawings	550	
Service Revenue		4,300
Salaries and Wages Expense	1,260	
Miscellaneous Expense	256	
Supplies Expense	1,900	
Salaries and Wages Payable		460
	<u><u>\$12,062</u></u>	<u><u>\$12,062</u></u>

Instructions

- Prepare closing entries at June 30, 2020.
- Prepare a post-closing trial balance.

Journalize and post closing entries, and prepare a post-closing trial balance.

E4.8 (LO 2) Phoebe Company ended its fiscal year on July 31, 2020. The company's adjusted trial balance as of the end of its fiscal year is as follows.

Phoebe Company
Adjusted Trial Balance
July 31, 2020

No.	Account Titles	Debit	Credit
101	Cash	\$ 9,840	
112	Accounts Receivable	8,780	
157	Equipment	15,900	
158	Accumulated Depreciation—Equip.		\$ 7,400
201	Accounts Payable		4,220
208	Unearned Rent Revenue		1,800
301	Owner's Capital		45,200
306	Owner's Drawings	16,000	
400	Service Revenue		64,000
429	Rent Revenue		6,500
711	Depreciation Expense	8,000	
726	Salaries and Wages Expense	55,700	
732	Utilities Expense	14,900	
		<u>\$129,120</u>	<u>\$129,120</u>

Instructions

- a. Prepare the closing entries using page J15.
- b. Post to Owner's Capital and No. 350 Income Summary accounts. (Use the three-column form.)
- c. Prepare a post-closing trial balance at July 31.

E4.9 (LO 4) Financial Statement The adjusted trial balance for Phoebe Company is presented in E4.8. Prepare financial statements.

Instructions

- a. Prepare an income statement and an owner's equity statement for the year. Phoebe did not make any capital investments during the year.
- b. Prepare a classified balance sheet at July 31.

E4.10 (LO 3) Ray Louis has prepared the following list of statements about the accounting cycle.

Answer questions related to the accounting cycle.

1. "Journalize the transactions" is the first step in the accounting cycle.
2. Reversing entries are a required step in the accounting cycle.
3. Correcting entries do not have to be part of the accounting cycle.
4. If a worksheet is prepared, some steps of the accounting cycle are incorporated into the worksheet.
5. The accounting cycle begins with the analysis of business transactions and ends with the preparation of a post-closing trial balance.
6. All steps of the accounting cycle occur daily during the accounting period.
7. The step of "post to the ledger accounts" occurs before the step of "journalize the transactions."
8. Closing entries must be prepared before financial statements can be prepared.

Instructions

Identify each statement as true or false. If false, indicate how to correct the statement.

E4.11 (LO 2) Selected accounts for Tamora's Salon are presented below. All June 30 postings are from closing entries. Prepare closing entries.

Salaries and Wages Expense		Service Revenue		Owner's Capital	
6/10	3,200		6/15	9,700	6/30
6/28	5,600		6/24	8,400	2,500
Bal.	8,800	6/30	Bal.	18,100	6/1 12,000 6/30 5,000
Supplies Expense		Rent Expense		Owner's Drawings	
6/12	600		6/1	3,000	6/13 1,000
6/24	700		Bal.	3,000	6/25 1,500
Bal.	1,300	6/30	6/30	3,000	Bal. 2,500

Instructions

- a. Prepare the closing entries that were made.
- b. Post the closing entries to Income Summary.

Prepare correcting entries.

E4.12 (LO 3) Blair Natt Company discovered the following errors made in January 2020.

1. A payment of Salaries and Wages Expense of \$700 was debited to Equipment and credited to Cash, both for \$700.
2. A collection of \$1,500 from a client on account was debited to Cash \$150 and credited to Service Revenue \$150.
3. The purchase of equipment on account for \$670 was debited to Equipment \$760 and credited to Accounts Payable \$760.

Instructions

- a. Correct the errors by reversing the incorrect entry and preparing the correct entry.
- b. Correct the errors without reversing the incorrect entry.

Prepare correcting entries.

E4.13 (LO 3) Patel Company has an inexperienced accountant. During the first 2 weeks on the job, the accountant made the following errors in journalizing transactions. All entries were posted as made.

1. A payment on account of \$750 to a creditor was debited to Accounts Payable \$570 and credited to Cash \$570.
2. The purchase of supplies on account for \$560 was debited to Equipment \$56 and credited to Accounts Payable \$56.
3. A \$500 withdrawal of cash for N. Patel's personal use was debited to Salaries and Wages Expense \$500 and credited to Cash \$500.

Instructions

Prepare the correcting entries.

Prepare a classified balance sheet.

E4.14 (LO 4) Writing Financial Statement The adjusted trial balance for Carter Bowling Alley at December 31, 2020, contains the following accounts.

	Debit		Credit
Buildings	\$128,800	Owner's Capital	\$113,000
Accounts Receivable	14,520	Accumulated Depreciation—Buildings	42,600
Prepaid Insurance	4,680	Accounts Payable	12,300
Cash	18,040	Notes Payable	97,780
Equipment	62,400	Accumulated Depreciation—Equipment	18,720
Land	65,000	Interest Payable	3,800
Insurance Expense	780	Service Revenue	17,180
Depreciation Expense	7,360		\$305,380
Interest Expense	3,800		
	\$305,380		

Instructions

- a. Prepare a classified balance sheet; assume that \$30,000 of the note payable will be paid in 2021.
- b. Comment on the liquidity of the company.

Classify accounts on balance sheet.

E4.15 (LO 4) The following are the major balance sheet classifications.

Current assets (CA)	Current liabilities (CL)
Long-term investments (LTI)	Long-term liabilities (LTL)
Property, plant, and equipment (PPE)	Owner's equity (OE)
Intangible assets (IA)	

Instructions

Classify each of the following accounts taken from Faust Company's balance sheet.

_____ Accounts payable	_____ Accumulated depreciation—equipment
_____ Accounts receivable	_____ Buildings
_____ Cash	_____ Land (in use)
_____ Owner's capital	_____ Notes payable (due in 2 years)
_____ Patents	_____ Supplies
_____ Salaries and wages payable	_____ Equipment
_____ Inventory	_____ Prepaid expenses
_____ Stock investments (to be sold in 7 months)	

E4.16 (LO 4) Financial Statement The following items were taken from the financial statements of P. Jimenez Company. (All amounts are in thousands.)

Long-term debt	\$ 1,000	Accumulated depreciation—equipment	\$ 5,655
Prepaid insurance	650	Accounts payable	1,214
Equipment	11,500	Notes payable (due after 2021)	400
Stock investments (long-term)	264	Owner's capital	12,955
Debt investments (short-term)	3,690	Accounts receivable	1,696
Notes payable (due in 2021)	500	Inventory	1,256
Cash	2,668		

Prepare a classified balance sheet.

Instructions

Prepare a classified balance sheet in good form as of December 31, 2020.

E4.17 (LO 4) Financial Statement These financial statement items are for Bosten Company at year-end, July 31, 2020.

Salaries and wages payable	\$ 2,080	Notes payable (long-term)	\$ 1,800
Salaries and wages expense	48,700	Cash	14,200
Utilities expense	22,600	Accounts receivable	9,780
Equipment	34,400	Accumulated depreciation—equipment	6,000
Accounts payable	4,100	Owner's drawings	3,000
Service revenue	63,000	Depreciation expense	4,000
Rent revenue	8,500	Owner's capital (beginning of the year)	51,200

Prepare financial statements.

Instructions

- a. Prepare an income statement and an owner's equity statement for the year. The owner did not make any new investments during the year.
- b. Prepare a classified balance sheet at July 31.

***E4.18 (LO 5)** Krantz Company pays salaries of \$15,000 every Monday for the preceding 5-day week (Monday through Friday). Assume December 31 falls on a Tuesday, so Krantz's employees have worked 2 days without being paid at the end of the fiscal year.

Use reversing entries.

Instructions

- a. Assume the company does not use reversing entries. Prepare the December 31 adjusting entry and the entry on Monday, January 6, when Krantz pays the payroll.
- b. Assume the company does use reversing entries. Prepare the December 31 adjusting entry, the January 1 reversing entry, and the entry on Monday, January 6, when Krantz pays the payroll.

***E4.19 (LO 2, 5)** On December 31, the adjusted trial balance of Shihata Employment Agency shows the following selected data.

Prepare closing and reversing entries.

Accounts Receivable	\$24,500	Service Revenue	\$92,500
Interest Expense	7,700	Interest Payable	2,200

Analysis shows that adjusting entries were made to (1) accrue \$5,000 of service revenue and (2) accrue \$2,200 interest expense.

Instructions

- a. Prepare the closing entries for the temporary accounts shown above at December 31.
- b. Prepare the reversing entries on January 1.
- c. Post the entries in (a) and (b). Underline and balance the accounts. (Use T-accounts.)
- d. Prepare the entries to record (1) the collection of the accrued revenue on January 10 and (2) the payment of all interest due (\$3,000) on January 15.
- e. Post the entries in (d) to the temporary accounts.

Problems: Set A

P4.1A (LO 1, 2, 4) Financial Statement The trial balance columns of the worksheet for Warren Roofing at March 31, 2020, are as follows.

Prepare a worksheet, financial statements, and adjusting and closing entries.

**Warren Roofing
Worksheet
For the Month Ended March 31, 2020**

Account Titles	Trial Balance	
	Dr.	Cr.
Cash	4,500	
Accounts Receivable	3,200	
Supplies	2,000	
Equipment	11,000	
Accumulated Depreciation—Equipment		1,250
Accounts Payable		2,500
Unearned Service Revenue		550
Owner's Capital		12,900
Owner's Drawings	1,100	
Service Revenue		6,300
Salaries and Wages Expense	1,300	
Miscellaneous Expense	400	
	23,500	23,500

Other data:

1. A physical count reveals only \$480 of roofing supplies on hand.
2. Depreciation for March is \$250.
3. Unearned revenue amounted to \$260 at March 31.
4. Accrued salaries are \$700.

Instructions

- a. Adjusted trial balance
\$24,450
- b. Net income \$2,420
- Total assets \$17,680

Complete worksheet; prepare financial statements, closing entries, and post-closing trial balance.

P4.2A (LO 1, 2, 4) Financial Statement The adjusted trial balance columns of the worksheet for Nguyen Company, owned by C. Nguyen, are as follows.

**Nguyen Company
Worksheet
For the Year Ended December 31, 2020**

Account No.	Account Titles	Adjusted Trial Balance	
		Dr.	Cr.
101	Cash	5,300	
112	Accounts Receivable	10,800	
126	Supplies	1,500	
130	Prepaid Insurance	2,000	
157	Equipment	27,000	
158	Accumulated Depreciation—Equipment		5,600
200	Notes Payable		15,000
201	Accounts Payable		6,100
212	Salaries and Wages Payable		3,600
230	Interest Payable		600
301	Owner's Capital		13,000
306	Owner's Drawings	7,600	
400	Service Revenue		61,000
610	Advertising Expense	9,000	
631	Supplies Expense	4,000	
711	Depreciation Expense	5,600	
722	Insurance Expense	3,500	
726	Salaries and Wages Expense	28,000	
905	Interest Expense	600	
	Totals	104,900	104,900

Instructions

- a. Complete the worksheet by extending the balances to the financial statement columns.
- b. Prepare an income statement, owner's equity statement, and a classified balance sheet. (*Note:* \$4,000 of the notes payable become due in 2021.) C. Nguyen did not make any additional investments in the business during the year.
- c. Prepare the closing entries. Use J14 for the journal page.
- d. Post the closing entries. Use the three-column form of account. Income Summary is No. 350.
- e. Prepare a post-closing trial balance.

P4.3A (LO 1, 2, 4) Financial Statement The completed financial statement columns of the worksheet for Bray Company are shown as follows.

- a. Net income \$10,300
- b. Current assets \$19,600
Current liabilities \$14,300
- e. Post-closing trial balance
\$46,600

Prepare financial statements, closing entries, and post-closing trial balance.

Bray Company
Worksheet
For the Year Ended December 31, 2020

Account No.	Account Titles	Income Statement		Balance Sheet	
		Dr.	Cr.	Dr.	Cr.
101	Cash			8,800	
112	Accounts Receivable			10,800

Instructions

- a. Net income \$25,100
 b. Total current assets \$44,200

- e. Post-closing trial balance

\$297,200

Complete all steps in accounting cycle.

P4.5A (LO 1, 2, 4) Anya Clark opened Anya's Cleaning Service on July 1, 2020. During July, the following transactions were completed.

- July 1 Anya invested \$20,000 cash in the business.
 1 Purchased used truck for \$12,000, paying \$4,000 cash and the balance on account.
 3 Purchased cleaning supplies for \$2,100 on account.
 5 Paid \$1,800 cash on a 1-year insurance policy effective July 1.
 12 Billed customers \$4,500 for cleaning services.
 18 Paid \$1,500 cash on amount owed on truck and \$1,400 on amount owed on cleaning supplies.
 20 Paid \$2,800 cash for employee salaries.
 21 Collected \$3,400 cash from customers billed on July 12.
 25 Billed customers \$6,000 for cleaning services.
 31 Paid \$350 for the monthly gasoline bill for the truck.
 31 Withdraw \$5,600 cash for personal use.

The chart of accounts for Anya's Cleaning Service contains the following accounts: No. 101 Cash, No. 112 Accounts Receivable, No. 126 Supplies, No. 130 Prepaid Insurance, No. 157 Equipment, No. 158 Accumulated Depreciation—Equipment, No. 201 Accounts Payable, No. 212 Salaries and Wages Payable, No. 301 Owner's Capital, No. 306 Owner's Drawings, No. 350 Income Summary, No. 400 Service Revenue, No. 631 Supplies Expense, No. 633 Gasoline Expense, No. 711 Depreciation Expense, No. 722 Insurance Expense, and No. 726 Salaries and Wages Expense.

Instructions

- a. Journalize and post the July transactions. Use page J1 for the journal and the three-column form of account.
 b. Prepare a trial balance at July 31 on a worksheet.
 c. Enter the following adjustments on the worksheet and complete the worksheet.
 1. Unbilled and uncollected revenue for services performed at July 31 were \$2,700.
 2. Depreciation on equipment for the month was \$500.
- b. Trial balance \$37,700
 c. Adjusted trial balance
 \$41,900

3. One-twelfth of the insurance expired.
 4. An inventory count shows \$600 of cleaning supplies on hand at July 31.
 5. Accrued but unpaid employee salaries were \$1,000.
- d. Prepare the income statement and owner's equity statement for July and a classified balance sheet at July 31.
- e. Journalize and post adjusting entries. Use page J2 for the journal.
- f. Journalize and post closing entries and complete the closing process. Use page J3 for the journal.
- g. Prepare a post-closing trial balance at July 31.

P4.6A (LO 3) Horace Culpepper, CPA, was retained by Pulsar Cable to prepare financial statements for April 2020. Horace accumulated all the ledger balances per Pulsar's records and found the following.

d. Net income \$6,900
Total assets \$29,500

g. Post-closing trial balance
\$30,000

Analyze errors and prepare correcting entries and trial balance.

Pulsar Cable
Trial Balance
April 30, 2020

	<u>Debit</u>	<u>Credit</u>
Cash	\$ 4,100	
Accounts Receivable	3,200	
Supplies	800	
Equipment	10,800	
Accumulated Depreciation—Equip.		\$ 1,350
Accounts Payable		2,100
Salaries and Wages Payable		700
Unearned Service Revenue		890
Owner's Capital		12,900
Service Revenue		5,650
Salaries and Wages Expense	3,300	
Advertising Expense	600	
Miscellaneous Expense	290	
Depreciation Expense	500	
	<u>\$23,590</u>	<u>\$23,590</u>

Horace Culpepper then reviewed the records and found the following errors.

1. Cash received from a customer on account was recorded as \$950 instead of \$590.
2. A payment of \$75 for advertising expense was entered as a debit to Miscellaneous Expense \$75 and a credit to Cash \$75.
3. The first salary payment in April was for \$1,900, which included \$900 of salaries payable on March 31. The payment was recorded as a debit to Salaries and Wages Expense \$1,900 and a credit to Cash \$1,900. (No reversing entries were made on April 1.)
4. The purchase on account of a printer costing \$510 was recorded as a debit to Supplies and a credit to Accounts Payable for \$510.
5. A cash payment of repair expense on equipment for \$96 was recorded as a debit to Equipment \$69 and a credit to Cash \$69.

Instructions

- a. Prepare an analysis of each error showing (1) the incorrect entry, (2) the correct entry, and (3) the correcting entry. Items 4 and 5 occurred on April 30, 2020.
- b. Prepare a correct trial balance.

b. Trial balance \$22,890

Continuing Case

Cookie Creations

(Note: This is a continuation of the Cookie Creations case from Chapters 1 through 3.)

CC4 Natalie had a very busy December. At the end of the month, after journalizing and posting the December transactions and adjusting entries, Natalie prepared the following adjusted trial balance.

© leungchopan/
Shutterstock

Cookie Creations
Adjusted Trial Balance
December 31, 2019

	Debit	Credit
Cash	\$1,180	
Accounts Receivable	875	
Supplies	350	
Prepaid Insurance	1,210	
Equipment	1,200	
Accumulated Depreciation—Equipment		\$ 40
Accounts Payable		75
Salaries and Wages Payable		56
Interest Payable		15
Unearned Service Revenue		300
Notes Payable		2,000
Owner's Capital		800
Owner's Drawings	500	
Service Revenue		4,515
Salaries and Wages Expense	1,006	
Utilities Expense	125	
Advertising Expense	165	
Supplies Expense	1,025	
Depreciation Expense	40	
Insurance Expense	110	
Interest Expense	15	
	\$7,801	\$7,801

Instructions

Using the information in the adjusted trial balance, do the following.

- Prepare an income statement and an owner's equity statement for the 2 months ended December 31, 2019, and a classified balance sheet at December 31, 2019. The note payable has a stated interest rate of 6%, and the principal and interest are due on November 16, 2021.
- Natalie has decided that her year-end will be December 31, 2019. Prepare and post closing entries as of December 31, 2019.
- Prepare a post-closing trial balance.

Ethics Case

EC4 As the controller of Take No Prisoners Perfume Company, you discover a misstatement that overstated net income in the prior year's financial statements. The misleading financial statements appear in the company's annual report which was issued to banks and other creditors less than a month ago. After much thought about the consequences of telling the president, Mike Flanary, about this misstatement, you gather your courage to inform him. Mike says, "Hey! What they don't know won't hurt them. But, just so we set the record straight, we'll adjust this year's financial statements for last year's misstatement. We can absorb that misstatement better in this year than in last year anyway! Just don't make such a mistake again."

Instructions

- Who are the stakeholders in this situation?
- What are the ethical issues in this situation?
- What would you do as a controller in this situation?

Comprehensive Accounting Cycle Review

Complete all steps in
accounting cycle.

ACR4.1 Financial Statement Mike Greenberg opened Kleene Window Washing Co. on July 1, 2020. During July, the following transactions were completed.

- July 1 Owner invested \$12,000 cash in the company.
- 1 Purchased used truck for \$8,000, paying \$2,000 cash and the balance on account.
- 3 Purchased cleaning supplies for \$900 on account.
- 5 Paid \$1,800 cash on a 1-year insurance policy effective July 1.
- 12 Billed customers \$3,700 for cleaning services performed.
- 18 Paid \$1,000 cash on amount owed on truck and \$500 on amount owed on cleaning supplies.
- 20 Paid \$2,000 cash for employee salaries.
- 21 Collected \$1,600 cash from customers billed on July 12.
- 25 Billed customers \$2,500 for cleaning services performed.
- 31 Paid \$290 for maintenance of the truck during month.
- 31 Owner withdrew \$600 cash from the company.

The chart of accounts for Kleene Window Washing contains the following accounts: Cash, Accounts Receivable, Supplies, Prepaid Insurance, Equipment, Accumulated Depreciation—Equipment, Accounts Payable, Salaries and Wages Payable, Owner's Capital, Owner's Drawings, Income Summary, Service Revenue, Maintenance and Repairs Expense, Supplies Expense, Depreciation Expense, Insurance Expense, and Salaries and Wages Expense.

Instructions

- a. Journalize the July transactions.
- b. Post to the ledger accounts. (Use T-accounts.)
- c. Prepare a trial balance at July 31.
- d. Journalize the following adjustments.
 - 1. Services performed but unbilled and uncollected at July 31 were \$1,700.
 - 2. Depreciation on equipment for the month was \$180.
 - 3. One-twelfth of the insurance expired.
 - 4. A count shows \$320 of cleaning supplies on hand at July 31.
 - 5. Accrued but unpaid employee salaries were \$400.
- e. Post adjusting entries to the T-accounts.
- f. Prepare an adjusted trial balance.
- g. Prepare the income statement and an owner's equity statement for July and a classified balance sheet at July 31.
- h. Journalize and post closing entries and complete the closing process.
- i. Prepare a post-closing trial balance at July 31.

ACR4.2 Financial Statement Lars Linken opened Lars Cleaners on March 1, 2020. During March, the following transactions were completed.

- Mar. 1 Owner invested \$15,000 cash in the company.
- 1 Borrowed \$6,000 cash by signing a 6-month, 6%, \$6,000 note payable. Interest will be paid the first day of each subsequent month.
- 1 Purchased used truck for \$8,000 cash.
- 2 Paid \$1,500 cash to cover rent from March 1 through May 31.
- 3 Paid \$2,400 cash on a 6-month insurance policy effective March 1.
- 6 Purchased cleaning supplies for \$2,000 on account.
- 14 Billed customers \$3,700 for cleaning services performed.
- 18 Paid \$500 on amount owed on cleaning supplies.
- 20 Paid \$1,750 cash for employee salaries.
- 21 Collected \$1,600 cash from customers billed on March 14.
- 28 Billed customers \$4,200 for cleaning services performed.
- 31 Paid \$350 for gas and oil used in truck during month (use Maintenance and Repairs Expense).
- 31 Owner withdrew \$900 cash from the company.

Complete all steps in accounting cycle.

The chart of accounts for Lars Cleaners contains the following accounts: Cash, Accounts Receivable, Supplies, Prepaid Insurance, Prepaid Rent, Equipment, Accumulated Depreciation—Equipment, Accounts Payable, Salaries and Wages Payable, Notes Payable, Interest Payable, Owner's Capital, Owner's Drawings, Income Summary, Service Revenue, Maintenance and Repairs Expense, Supplies Expense, Depreciation Expense, Insurance Expense, Salaries and Wages Expense, Rent Expense, and Interest Expense.

Instructions

- a. Journalize the March transactions.
 - b. Post to the ledger accounts. (Use T-accounts.)
 - c. Prepare a trial balance at March 31.
 - d. Journalize the following adjustments.
 1. Services performed but unbilled and uncollected at March 31 were \$200.
 2. Depreciation on equipment for the month was \$250.
 3. One-sixth of the insurance expired.
 4. An inventory count shows \$280 of cleaning supplies on hand at March 31.
 5. Accrued but unpaid employee salaries were \$1,080.
 6. One month of the prepaid rent has expired.
 7. One month of interest expense related to the note payable has accrued and will be paid April 1. (*Hint:* Use the formula from Illustration 3.17 to compute interest.)
 - e. Post adjusting entries to the T-accounts.
 - f. Prepare an adjusted trial balance.
 - g. Prepare the income statement and an owner's equity statement for March and a classified balance sheet at March 31.
 - h. Journalize and post closing entries and complete the closing process.
 - i. Prepare a post-closing trial balance at March 31.
- f. Tot. adj. trial balance**
\$31,960
- g. Tot. assets \$24,730**

Journalize transactions and follow through accounting cycle to preparation of financial statements.

ACR4.3 Financial Statement On August 1, 2020, the following were the account balances of B&B Repair Services.

	Debit		Credit
Cash	\$ 6,040	Accumulated Depreciation—Equipment	\$ 600
Accounts Receivable	2,910	Accounts Payable	2,300
Notes Receivable	4,000	Unearned Service Revenue	1,260
Supplies	1,030	Salaries and Wages Payable	1,420
Equipment	10,000	Owner's Capital	18,400
	<u>\$23,980</u>		<u>\$23,980</u>

During August, the following summary transactions were completed.

- Aug. 1 Paid \$400 cash for advertising in local newspapers. Advertising flyers will be included with newspapers delivered during August and September.
- 3 Paid August rent \$380.
- 5 Received \$1,200 cash from customers in payment on account.
- 10 Paid \$3,120 for salaries due employees, of which \$1,700 is for August and \$1,420 is for July salaries payable.
- 12 Received \$2,800 cash for services performed in August.
- 15 Purchased store equipment on account \$2,000.
- 20 Paid creditors \$2,000 of accounts payable due.
- 22 Purchased supplies on account \$800.
- 25 Paid \$2,900 cash for employees' salaries.
- 27 Billed customers \$3,760 for services performed.
- 29 Received \$780 from customers for services to be performed in the future.

Adjustment data:

1. A count shows supplies on hand of \$960.
2. Accrued but unpaid employees' salaries are \$1,540.
3. Depreciation on equipment for the month is \$320.
4. Services were performed to satisfy \$800 of unearned service revenue.
5. One month's worth of advertising services has been received.
6. One month of interest revenue related to the \$4,000 note receivable has accrued. The 4-month note has a 6% annual interest rate. (*Hint:* Use the formula from Illustration 3.17 to compute interest.)

Instructions

- a. Enter the August 1 balances in the ledger accounts. (Use T-accounts.)
- b. Journalize the August transactions.

- c. Post to the ledger accounts. B&B's chart of accounts includes Prepaid Advertising, Interest Receivable, Service Revenue, Interest Revenue, Advertising Expense, Depreciation Expense, Supplies Expense, Salaries and Wages Expense, and Rent Expense.
 - d. Prepare a trial balance at August 31.
 - e. Journalize and post adjusting entries.
 - f. Prepare an adjusted trial balance.
 - g. Prepare an income statement and an owner's equity statement for August and a classified balance sheet at August 31.
 - h. Journalize and post closing entries and complete the closing process.
 - i. Prepare a post-closing trial balance at August 31.
- f. Cash \$2,020**
Tot. adj. trial balance \$32,580
g. Net loss \$530

ACR4.4 Financial Statement At June 30, 2020, the end of its most recent fiscal year, Green River Computer Consultants' post-closing trial balance was as follows:

	<u>Debit</u>	<u>Credit</u>
Cash	\$5,230	
Accounts receivable	1,200	
Supplies	690	
Accounts payable		\$ 400
Unearned service revenue		1,120
Owner's capital		5,600
	<u>\$7,120</u>	<u>\$7,120</u>

Record and post transaction, adjusting, and closing journal entries; prepare adjusted trial balance and financial statements.

The company underwent a major expansion in July. New staff was hired and more financing was obtained. Green River conducted the following transactions during July 2020, and adjusts its accounts monthly.

- July 1 Purchased equipment, paying \$4,000 cash and signing a 2-year note payable for \$20,000. The equipment has a 4-year useful life. The note has a 6% interest rate which is payable on the first day of each following month.
- 2 Owner invested \$50,000 cash in the company.
- 3 Paid \$3,600 cash for a 12-month insurance policy effective July 1.
- 3 Paid the first 2 (July and August 2020) months' rent for an annual lease of office space for \$4,000 per month.
- 6 Paid \$3,800 for supplies.
- 9 Visited client offices and agreed on the terms of a consulting project. Green River will bill the client, Connor Productions, on the 20th of each month for services performed.
- 10 Collected \$1,200 cash on account from Milani Brothers. This client was billed in June when Green River performed the service.
- 13 Performed services for Fitzgerald Enterprises. This client paid \$1,120 in advance last month. All services relating to this payment are now completed.
- 14 Paid \$400 cash for a utility bill. This related to June utilities that were accrued at the end of June.
- 16 Met with a new client, Thunder Bay Technologies. Received \$12,000 cash in advance for future services to be performed.
- 18 Paid semi-monthly salaries for \$11,000.
- 20 Performed services worth \$28,000 on account and billed customers.
- 20 Received a bill for \$2,200 for advertising services received during July. The amount is not due until August 15.
- 23 Performed the first phase of the project for Thunder Bay Technologies. Recognized \$10,000 of revenue from the cash advance received July 16.
- 27 Received \$15,000 cash from customers billed on July 20.

Adjustment data:

1. Adjustment of prepaid insurance.
2. Adjustment of prepaid rent.
3. Supplies used, \$1,250.
4. Equipment depreciation, \$500 per month.
5. Accrual of interest on note payable. (*Hint:* Use the formula from Illustration 3.17 to compute interest.)
6. Salaries for the second half of July, \$11,000, to be paid on August 1.

7. Estimated utilities expense for July, \$800 (invoice will be received in August).
8. Income tax for July, \$1,200, will be paid in August. (*Hint:* Use the accounts Income Tax Expense and Income Taxes Payable.)

The chart of accounts for Green River Computer Consultants contains the following accounts: Cash, Accounts Receivable, Supplies, Prepaid Insurance, Prepaid Rent, Equipment, Accumulated Depreciation—Equipment, Accounts Payable, Notes Payable, Interest Payable, Income Taxes Payable, Salaries and Wages Payable, Unearned Service Revenue, Owner's Capital, Owner's Drawings, Income Summary, Service Revenue, Supplies Expense, Depreciation Expense, Insurance Expense, Salaries and Wages Expense, Advertising Expense, Income Tax Expense, Interest Expense, Rent Expense, and Utilities Expense.

Instructions

- a. Enter the July 1 balances in the ledger accounts. (Use T-accounts.)
 - b. Journalize the July transactions.
 - c. Post to the ledger accounts.
 - d. Prepare a trial balance at July 31.
 - e. Journalize and post adjusting entries for the month ending July 31.
 - f. Prepare an adjusted trial balance.
 - g. Prepare an income statement and an owner's equity statement for July and a classified balance sheet at July 31.
 - h. Journalize and post closing entries and complete the closing process.
 - i. Prepare a post-closing trial balance at July 31.
- g. Net income \$6,770**
Tot. assets \$99,670

Expand Your Critical Thinking

Financial Reporting Problem: Apple Inc.

CT4.1 The financial statements of **Apple Inc.** are presented in Appendix A at the end of this textbook. The complete annual report, including the notes to the financial statements, is available at the company's website.

Instructions

Answer the questions below using Apple's Consolidated Balance Sheets.

- a. What were Apple's total current assets at September 26, 2015, and September 27, 2014?
- b. Are assets that Apple included under current assets listed in proper order? Explain.
- c. How are Apple's assets classified?
- d. What was Apple's "Cash and cash equivalents" at September 26, 2015?
- e. What were Apple's total current liabilities at September 26, 2015, and September 27, 2014?

Comparative Analysis Problem: PepsiCo, Inc. vs. The Coca-Cola Company

CT4.2 **PepsiCo, Inc.**'s financial statements are presented in Appendix B. Financial statements of **The Coca-Cola Company** are presented in Appendix C. The complete annual reports of PepsiCo and Coca-Cola, including the notes to the financial statements, are available at each company's respective website.

Instructions

- a. Based on the information contained in these financial statements, determine each of the following for PepsiCo at December 26, 2015, and for Coca-Cola at December 31, 2015.
 1. Total current assets.
 2. Net amount of property, plant, and equipment (land, buildings, and equipment).
 3. Total current liabilities.
 4. Total equity.
- b. What conclusions concerning the companies' respective financial positions can be drawn?

Comparative Analysis Problem: Amazon.com, Inc. vs. Wal-Mart Stores, Inc.

CT4.3 **Amazon.com, Inc.**'s financial statements are presented in Appendix D. Financial statements of **Wal-Mart Stores, Inc.** are presented in Appendix E. The complete annual reports of Amazon and Wal-Mart, including the notes to the financial statements, are available at each company's respective website.

Instructions

- a. Based on the information contained in these financial statements, determine the following for Amazon at December 31, 2015, and Wal-Mart at January 31, 2016.
 1. Total current assets.
 2. Net amount of property and equipment (fixed assets), net.
 3. Total current liabilities.
 4. Total equity.
- b. What conclusions concerning these two companies can be drawn from these data?

Real-World Focus

CT4.4 Most companies have established home pages on the Internet, but each might offer different types of information.

Instructions

Examine the home pages of any two companies and then answer the following questions.

- a. What type of information is available?
- b. Is any accounting-related information presented?
- c. Would you describe the home page as informative, promotional, or both? Why?

Decision-Making Across the Organization

CT4.5 Whitegloves Janitorial Service was started 2 years ago by Jenna Olson. Because business has been exceptionally good, Jenna decided on July 1, 2020, to expand operations by acquiring an additional truck and hiring two more assistants. To finance the expansion, Jenna obtained on July 1, 2020, a \$25,000, 10% bank loan, payable \$10,000 on July 1, 2021, and the balance on July 1, 2022. The terms of the loan require the borrower to have \$10,000 more current assets than current liabilities at December 31, 2020. If these terms are not met, the bank loan will be refinanced at 15% interest. At December 31, 2020, the accountant for Whitegloves Janitorial Service prepared the balance sheet shown below.

Whitegloves Janitorial Service
Balance Sheet
December 31, 2020

<u>Assets</u>	<u>Liabilities and Owner's Equity</u>		
Current assets		Current liabilities	
Cash	\$ 6,500	Notes payable	\$10,000
Accounts receivable	9,000	Accounts payable	2,500
Supplies	5,200	Total current liabilities	12,500
Prepaid insurance	4,800	Long-term liability	
Total current assets	<u>25,500</u>	Notes payable	<u>15,000</u>
Property, plant, and equipment		Total liabilities	27,500
Equipment (net)	22,000	Owner's equity	
Delivery trucks (net)	34,000	Owner's capital	<u>54,000</u>
Total property, plant, and equipment	<u>56,000</u>		
Total assets	<u>\$81,500</u>	Total liabilities and owner's equity	<u>\$81,500</u>

Jenna presented the balance sheet to the bank's loan officer on January 2, 2021, confident that the company had met the terms of the loan. The loan officer was not impressed. She said, "We need financial statements audited by a CPA." A CPA was hired and immediately realized that the balance sheet had been prepared from a trial balance and not from an adjusted trial balance. The adjustment data at the balance sheet date consisted of the following.

1. Unbilled janitorial services performed were \$3,700.
2. Janitorial supplies on hand were \$2,500.
3. Prepaid insurance was a 3-year policy dated January 1, 2020.
4. December expenses incurred but unpaid at December 31, \$500.
5. Interest on the bank loan was not recorded.
6. The amounts for property, plant, and equipment presented in the balance sheet were reported net of accumulated depreciation (cost less accumulated depreciation). These amounts were \$4,000 for cleaning equipment and \$5,000 for delivery trucks as of January 1, 2020. Depreciation for 2020, still unrecorded, was \$2,000 for cleaning equipment and \$5,000 for delivery trucks.

Instructions

With the class divided into groups, answer the following.

- a. Prepare a correct balance sheet.
- b. Were the terms of the bank loan met? Explain.

Communication Activity

CT4.6 The accounting cycle is important in understanding the accounting process.

Instructions

Write a memo to your instructor that lists the steps of the accounting cycle in the order they should be completed. End with a paragraph that explains the optional steps in the cycle.

All About You

CT4.7 Companies prepare balance sheets in order to know their financial position at a specific point in time. This enables them to make a comparison to their position at previous points in time, and gives them a basis for planning for the future. In order to evaluate your financial position, you need to prepare a personal balance sheet. Assume that you have compiled the following information regarding your finances. (*Note:* Some of the items might not be used in your personal balance sheet.)

Amount owed on student loan balance (long-term)	\$ 5,000
Balance in checking account	1,200
Certificate of deposit (6-month)	3,000
Annual earnings from part-time job	11,300
Automobile	7,000
Balance on automobile loan (current portion)	1,500
Balance on automobile loan (long-term portion)	4,000
Home computer	800
Amount owed to you by younger brother	300
Balance in money market account	1,800
Annual tuition	6,400
Video and stereo equipment	1,250
Balance owed on credit card (current portion)	150
Balance owed on credit card (long-term portion)	1,650

Instructions

Prepare a personal balance sheet using the format you have learned for a classified balance sheet for a company. For the capital account, use Owner's Capital.

FASB Codification Activity

CT4.8 If your school has a subscription to the FASB Codification, log in and prepare responses to the following.

Instructions

- a. Access the glossary (“Master Glossary”) at the FASB Codification website to answer the following.
 1. What is the definition of current assets?
 2. What is the definition of current liabilities?
- b. A company wants to offset its accounts payable against its cash account and show a cash amount net of accounts payable on its balance sheet. Identify the criteria (found in the FASB Codification) under which a company has the right of set off. Does the company have the right to offset accounts payable against the cash account?

A Look at IFRS

LEARNING OBJECTIVE 6

Compare the procedures for the closing process under GAAP and IFRS.

The classified balance sheet, although generally required internationally, contains certain variations in format when reporting under IFRS.

Key Points

Following are the key similarities and differences between GAAP and IFRS related to the closing process and the financial statements.

Similarities

- The procedures of the closing process are applicable to all companies, whether they are using IFRS or GAAP.
- IFRS generally requires a classified statement of financial position similar to the classified balance sheet under GAAP.
- IFRS follows the same guidelines as GAAP for distinguishing between current and non-current assets and liabilities.

Differences

- IFRS recommends but does not require the use of the title “statement of financial position” rather than balance sheet.
- The format of statement of financial position information is often presented differently under IFRS. Although no specific format is required, many companies that follow IFRS present statement of financial position information in this order:
 - ◆ Non-current assets
 - ◆ Current assets
 - ◆ Equity
 - ◆ Non-current liabilities
 - ◆ Current liabilities
- Under IFRS, current assets are usually listed in the reverse order of liquidity. For example, under GAAP cash is listed first, but under IFRS it is listed last.
- IFRS has many differences in terminology from what are shown in your textbook. For example, in the following sample statement of financial position, notice in the investment category that stock is called shares.

Franklin Company Statement of Financial Position October 31, 2020			
<u>Assets</u>			
Intangible assets			
Patents			\$ 3,100
Property, plant, and equipment			
Land			\$10,000
Equipment	\$24,000		
Less: Accumulated depreciation	5,000		29,000
Long-term investments			
Share investments			5,200
Investment in real estate			2,000
			7,200
Current assets			
Prepaid insurance			400
Supplies			2,100
Inventory			3,000
Notes receivable			1,000
Accounts receivable			7,000
Debt investments			2,000
Cash			6,600
Total assets			<u><u>\$61,400</u></u>
<u>Equity and Liabilities</u>			
Equity			
Owner's capital			\$34,050
Non-current liabilities			
Mortgage payable			\$10,000
Notes payable			1,300
			11,300
Current liabilities			
Notes payable			11,000
Accounts payable			2,100
Salaries and wages payable			1,600
Unearned service revenue			900
Interest payable			450
Total equity and liabilities			<u><u>\$61,400</u></u>

- Both GAAP and IFRS are increasing the use of fair value to report assets. However, at this point IFRS has adopted it more broadly. As examples, under IFRS, companies can apply fair value to property, plant, and equipment, and in some cases intangible assets.

Looking to the Future

The IASB and the FASB are working on a project to converge their standards related to financial statement presentation. A key feature of the proposed framework is that each of the statements will be organized in the same format, to separate an entity's financing activities from its operating and investing activities and, further, to separate financing activities into transactions with owners and creditors. Thus, the same classifications used in the statement of financial position would also be used in the income statement and the statement of cash flows. The project has three phases. You can follow the joint financial presentation project at the FASB website.

IFRS Practice

IFRS Self-Test Questions

1. A company has purchased a tract of land and expects to build a production plant on the land in approximately 5 years. During the 5 years before construction, the land will be idle. Under IFRS, the land should be reported as:
 - a. land expense.
 - b. property, plant, and equipment.
 - c. an intangible asset.
 - d. a long-term investment.
2. Current assets under IFRS are listed generally:
 - a. by importance.
 - b. in the reverse order of their expected conversion to cash.
 - c. by longevity.
 - d. alphabetically.
3. Companies that use IFRS:
 - a. may report all their assets on the statement of financial position at fair value.
4. Companies that follow IFRS to prepare a statement of financial position generally use the following order of classification:
 - a. current assets, current liabilities, non-current assets, non-current liabilities, equity.
 - b. non-current assets, non-current liabilities, current assets, current liabilities, equity.
 - c. non-current assets, current assets, equity, non-current liabilities, current liabilities.
 - d. equity, non-current assets, current assets, non-current liabilities, current liabilities.

IFRS Exercises

IFRS4.1 In what ways does the format of a statement of financial position under IFRS often differ from a balance sheet presented under GAAP?

IFRS4.2 What term is commonly used under IFRS in reference to the balance sheet?

IFRS4.3 The statement of financial position for Wallby Company includes the following accounts (in British pounds): Accounts Receivable £12,500, Prepaid Insurance £3,600, Cash £15,400, Supplies £5,200, and Debt Investments (short-term) £6,700. Prepare the current assets section of the statement of financial position, listing the accounts in proper sequence.

IFRS4.4 The following information is available for Sutter Bowling Alley at December 31, 2020.

Buildings	\$128,800	Owner's Capital	\$115,000
Accounts Receivable	14,520	Accumulated Depreciation—Buildings	42,600
Prepaid Insurance	4,680	Accounts Payable	12,300
Cash	18,040	Notes Payable	97,780
Equipment	62,400	Accumulated Depreciation—Equipment	18,720
Land	64,000	Interest Payable	2,600
Insurance Expense	780	Bowling Revenues	14,180
Depreciation Expense	7,360		
Interest Expense	2,600		

Prepare a classified statement of financial position. Assume that \$13,900 of the notes payable will be paid in 2021.

International Comparative Analysis Problem: Apple vs. Louis Vuitton

IFRS4.5 The financial statements of **Louis Vuitton** are presented in Appendix F. The complete annual report, including the notes to its financial statements, is available at the company's website.

Instructions

Identify five differences in the format of the statement of financial position used by Louis Vuitton compared to a company, such as **Apple**, that follows GAAP. (Apple's financial statements are available in Appendix A.)

Accounting for Merchandising Operations

Chapter Preview

Merchandising is one of the largest and most influential industries in the United States. It is likely that a number of you will work for a merchandiser. Therefore, understanding the financial statements of merchandising companies is important. In this chapter, you will learn the basics about reporting merchandising transactions. In addition, you will learn how to prepare and analyze a commonly used form of the income statement—the multiple-step income statement.

Feature Story

Buy Now, Vote Later

Have you ever shopped for outdoor gear at an **REI (Recreational Equipment Incorporated)** store? If so, you might have been surprised if a salesclerk asked if you were a member. A member? What do you mean a member? REI is a consumer cooperative, or “co-op” for short. To figure out what that means, consider this quote from the company’s annual stewardship report:

As a cooperative, the Company is owned by its members. Each member is entitled to one vote in the election of the Company’s Board of Directors. Since January 1, 2008, the nonrefundable, nontransferable, one-time membership fee has been 20 dollars. As of December 31, 2010, there were approximately 10.8 million members.

Voting rights? Now that's something you don't get from shopping at **Wal-Mart**. REI members get other benefits as well, including sharing in the company's profits through a dividend at the end of the year. The more you spend, the bigger your dividend.

Since REI is a co-op, you might also wonder whether management's incentives might be a little different than at other stores. Management is still concerned about making a profit as it ensures the long-term viability of the company. REI's members also want the company to be run efficiently, so that prices remain low. In order for its members to evaluate just how well management is doing, REI publishes an audited annual report, just like publicly traded companies do.

How well is this business model working for REI? Well, it has consistently been rated as one of the best places to work

in the United States by *Fortune* magazine. It is one of only five companies named each year since the list was created in 1998. Also, REI had sustainable business practices long before social responsibility became popular at other companies. The CEO's stewardship report states "we reduced the absolute amount of energy we use despite opening four new stores and growing our business; we grew the amount of FSC-certified paper we use to 58.4 percent of our total paper footprint—including our cash register receipt paper; we facilitated 2.2 million volunteer hours and we provided \$3.7 million to more than 330 conservation and recreation nonprofits."

So, while REI, like other retailers, closely monitors its financial results, it also strives to succeed in other areas. And, with over 10 million votes at stake, REI's management knows that it has to deliver.

Merchandising Operations and Inventory Systems

LEARNING OBJECTIVE 1

Describe merchandising operations and inventory systems.

REI, **Wal-Mart**, and **Amazon.com** are called merchandising companies because they buy and sell merchandise rather than perform services as their primary source of revenue. Merchandising companies that purchase and sell directly to consumers are called **retailers**. Merchandising companies that sell to retailers are known as **wholesalers**. For example, retailer **Walgreens** might buy goods from wholesaler **McKesson**. Retailer **Office Depot** might buy office supplies from wholesaler **United Stationers**. The primary source of revenue for merchandising companies is the sale of merchandise, often referred to simply as **sales revenue** or **sales**. A merchandising company has two categories of expenses: cost of goods sold and operating expenses.

Cost of goods sold is the total cost of merchandise sold during the period. This expense is directly related to the revenue recognized from the sale of goods. **Illustration 5.1** shows the income measurement process for a merchandising company. The items in the two blue boxes are unique to a merchandising company; they are not used by a service company.

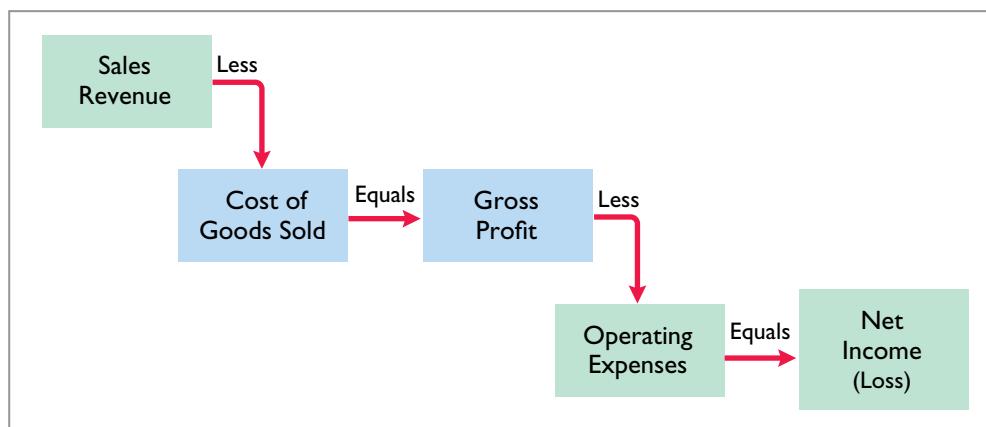

ILLUSTRATION 5.1

Income measurement process for a merchandising company

Operating Cycles

The operating cycle of a merchandising company ordinarily is longer than that of a service company. The purchase of merchandise inventory and its eventual sale lengthen the cycle. **Illustration 5.2** shows the operating cycle of a service company.

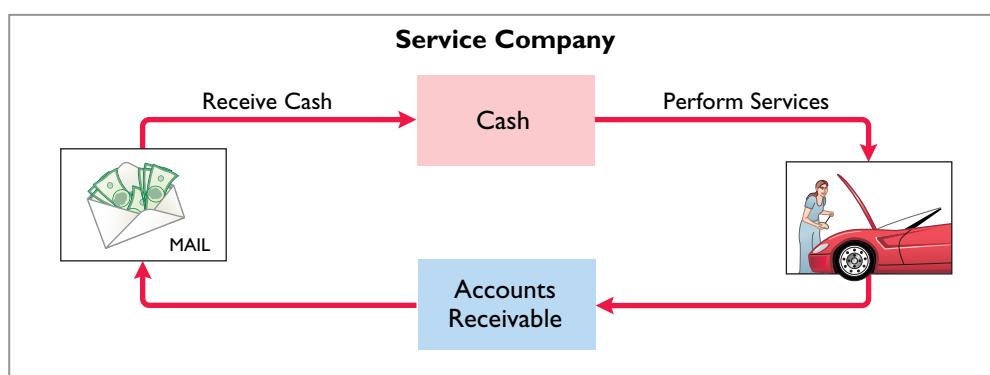

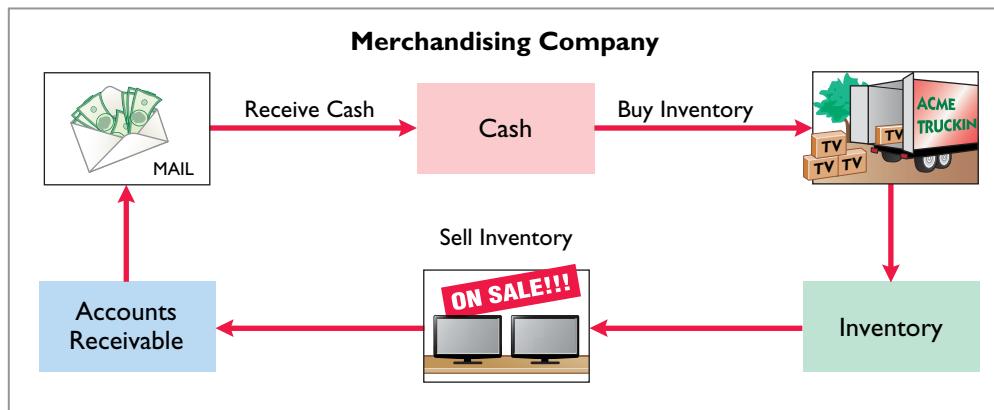

ILLUSTRATION 5.2

Operating cycle for a service company

Illustration 5.3 shows the operating cycle of a merchandising company.

ILLUSTRATION 5.3

Operating cycle for a merchandising company

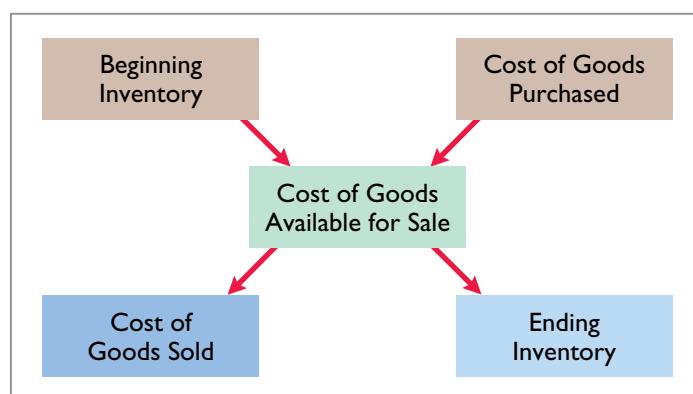

Note that the added asset account for a merchandising company is the **Inventory** account. Companies report inventory as a current asset on the balance sheet.

Flow of Costs

The flow of costs for a merchandising company is as follows. Beginning inventory plus the cost of goods purchased is the cost of goods available for sale. As goods are sold, they are assigned to cost of goods sold. Those goods that are not sold by the end of the accounting period represent ending inventory. **Illustration 5.4** describes these relationships. Companies use one of two systems to account for inventory: a **perpetual inventory system** or a **periodic inventory system**.

ILLUSTRATION 5.4

Flow of costs

Perpetual System

HELPFUL HINT

Even under perpetual inventory systems, companies take a physical inventory count. This is done as a control procedure to verify inventory levels, in order to detect theft or “shrinkage.”

In a **perpetual inventory system**, companies keep detailed records of the cost of each inventory purchase and sale (see **Helpful Hint**). These records continuously—perpetually—show the inventory that should be on hand for every item. For example, a **Ford** dealership has separate inventory records for each automobile, truck, and van on its lot and showroom floor. Similarly, a **Kroger** grocery store uses bar codes and optical scanners to keep a daily running record of every box of cereal and every jar of jelly that it buys and sells. Under a perpetual inventory system, a company determines the cost of goods sold **each time a sale occurs**.

Periodic System

In a **periodic inventory system**, companies do not keep detailed inventory records of the goods on hand throughout the period. Instead, they determine the cost of goods sold **only at the end of the accounting period**—that is, periodically. At that point, the company takes a physical inventory count to determine the cost of goods on hand.

To determine the cost of goods sold under a periodic inventory system, the following steps are necessary:

1. Determine the cost of goods on hand at the beginning of the accounting period.
2. Add to it the cost of goods purchased.
3. Subtract the cost of goods on hand as determined by the physical inventory count at the end of the accounting period.

Illustration 5.5 compares the sequence of activities and the timing of the cost of goods sold computation under the two inventory systems.

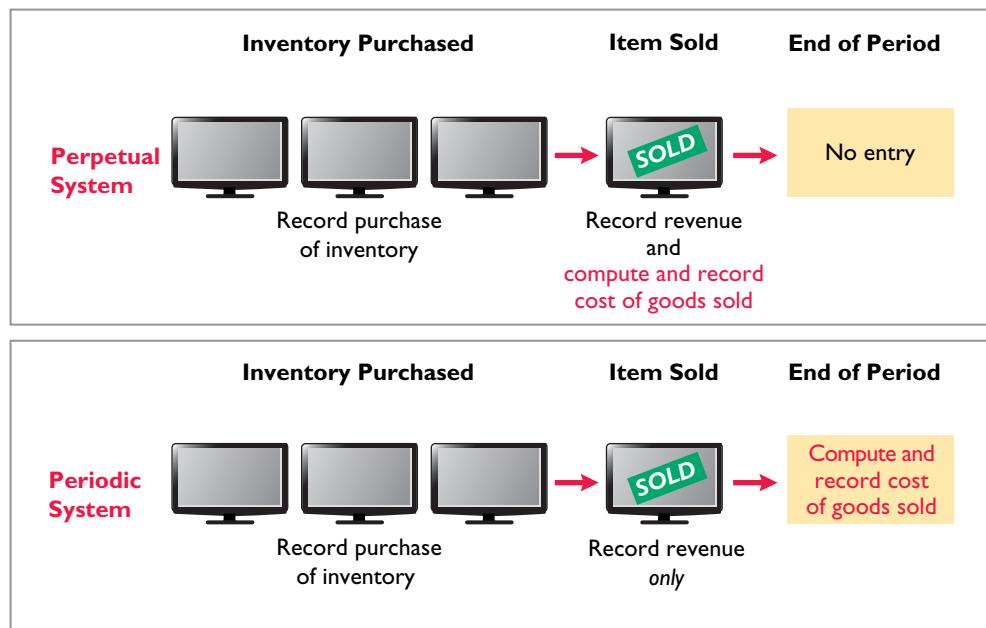

ILLUSTRATION 5.5

Comparing perpetual and periodic inventory systems

Advantages of the Perpetual System

Companies that sell merchandise with high unit values, such as automobiles, furniture, and major home appliances, have traditionally used perpetual systems. The growing use of computers and electronic scanners has enabled many more companies to install perpetual inventory systems. The perpetual inventory system is so named because the accounting records continuously—perpetually—show the quantity and cost of the inventory that should be on hand at any time.

A perpetual inventory system provides better control over inventories than a periodic system. Since the inventory records show the quantities that should be on hand, the company can count the goods at any time to see whether the amount of goods actually on hand agrees with the inventory records. If shortages are uncovered, the company can investigate immediately. Although a perpetual inventory system requires both additional clerical work and expense to maintain the subsidiary records, a computerized system can minimize this cost. Much of **Amazon.com's** success is attributed to its sophisticated inventory system.

Some businesses find it either unnecessary or uneconomical to invest in a sophisticated, computerized perpetual inventory system such as Amazon's. Many small merchandising businesses now use basic accounting software which provides some of the essential benefits of a

perpetual inventory system. Also, managers of some small businesses still find that they can control their merchandise and manage day-to-day operations using a periodic inventory system.

Because of the widespread use of the perpetual inventory system, we illustrate it in this chapter. We discuss and illustrate the periodic system in Appendix 5B.

Investor Insight Morrow Snowboards, Inc.

© Ben Blankenburg/iStockphoto

Improving Stock Appeal

Investors are often eager to invest in a company that has a hot new product. However, when snowboard-maker **Morrow Snowboards, Inc.** issued shares of stock to the public for the first time, some investors expressed reluctance to invest in Morrow because of a number of accounting control problems. To reduce investor concerns, Morrow implemented a

perpetual inventory system to improve its control over inventory. In addition, the company stated that it would perform a physical inventory count every quarter until it felt that its perpetual inventory system was reliable.

If a perpetual system keeps track of inventory on a daily basis, why do companies ever need to do a physical count? (Go to WileyPLUS for this answer and additional questions.)

DO IT! 1 | Merchandising Operations and Inventory Systems

Indicate whether the following statements are true or false. If false, indicate how to correct the statement.

1. The primary source of revenue for a merchandising company results from performing services for customers.
2. The operating cycle of a service company is usually shorter than that of a merchandising company.
3. Sales revenue less cost of goods sold equals gross profit.
4. Ending inventory plus the cost of goods purchased equals cost of goods available for sale.

Solution

1. False. The primary source of revenue for a service company results from performing services for customers.
2. True.
3. True.
4. False. Beginning inventory plus the cost of goods purchased equals cost of goods available for sale.

Related exercise material: **BE5.1, BE5.2, DO IT! 5.1, and E5.1.**

ACTION PLAN

- Review merchandising concepts.
- Understand the flow of costs in a merchandising company.

Recording Purchases under a Perpetual System

LEARNING OBJECTIVE 2

Record purchases under a perpetual inventory system.

Companies purchase inventory using cash or credit (on account). They normally record purchases when they receive the goods from the seller. Every purchase should be supported by

business documents that provide written evidence of the transaction. Each cash purchase should be supported by a canceled check or a cash register receipt indicating the items purchased and amounts paid. Companies record cash purchases by an increase in Inventory and a decrease in Cash.

A **purchase invoice** should support each credit purchase. This invoice indicates the total purchase price and other relevant information. However, the purchaser does not prepare a separate purchase invoice. Instead, the purchaser uses as a purchase invoice a copy of the sales invoice sent by the seller. In **Illustration 5.6**, for example, Sauk Stereo (the buyer) uses as a purchase invoice the sales invoice prepared by PW Audio Supply (the seller) (see **Helpful Hint**).

INVOICE NO. 731				
 PW AUDIO SUPPLY 27 CIRCLE DRIVE HARDING, MICHIGAN 48281				
S	Firm Name <u>Sauk Stereo</u>			
O	Attention of <u>James Hoover, Purchasing Agent</u>			
L				
D				
T	Address <u>125 Main Street</u>			
O	<u>Chelsea</u>	<u>Illinois</u>	<u>60915</u>	
	City	State	Zip	
Date 5/4/20	Salesperson Malone	Terms 2/10, n/30	FOB Shipping Point	
Catalog No.	Description		Quantity	Price
X572Y9820	Printed Circuit Board-prototype		1	\$2,300
A2547Z45	Production Model Circuits		5	300
			TOTAL	\$3,800
IMPORTANT: ALL RETURNS MUST BE MADE WITHIN 10 DAYS				

ILLUSTRATION 5.6

Sales invoice used as purchase invoice by Sauk Stereo

HELPFUL HINT

To better understand the contents of this invoice, identify these items:

1. Seller
2. Invoice date
3. Purchaser
4. Salesperson
5. Credit terms
6. Freight terms
7. Goods sold: catalog number, description, quantity, price per unit
8. Total invoice amount

Sauk Stereo makes the following journal entry to record its purchase from PW Audio Supply on account. The entry increases (debits) Inventory and increases (credits) Accounts Payable.

May 4	Inventory		3,800	
	Accounts Payable			3,800
	(To record goods purchased on account from PW Audio Supply)			

A	=	L	+	OE
		+3,800		+3,800

Cash Flows
no effect

Under the perpetual inventory system, companies record purchases of merchandise for sale in the Inventory account. Thus, **REI** would increase (debit) Inventory for clothing, sporting goods, and anything else purchased for resale to customers.

Not all purchases are debited to Inventory, however. Companies record purchases of assets acquired for use and not for resale, such as supplies, equipment, and similar items, as increases to specific asset accounts rather than to Inventory. For example, to record the purchase

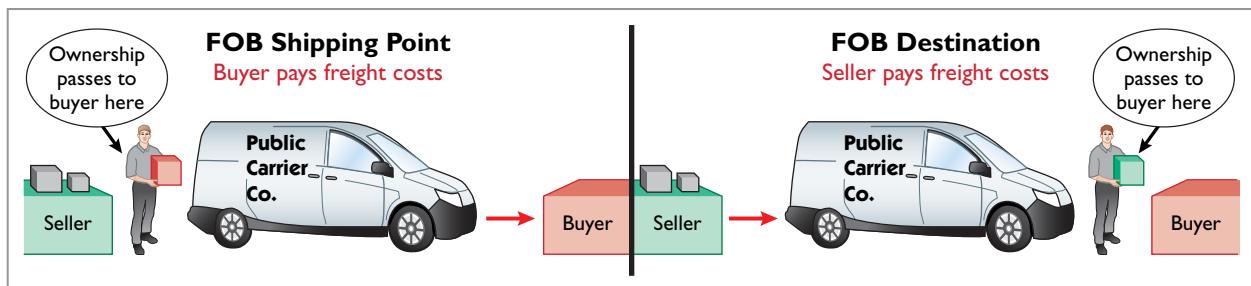

of materials used to make shelf signs or for cash register receipt paper, REI would increase (debit) Supplies.

Freight Costs

The sales agreement should indicate who—the seller or the buyer—is to pay for transporting the goods to the buyer's place of business. When a common carrier such as a railroad, trucking company, or airline transports the goods, the carrier prepares a freight bill in accord with the sales agreement.

Freight terms are expressed as either FOB shipping point or FOB destination. The letters FOB mean **free on board**. Thus, **FOB shipping point** means that the seller places the goods free on board the carrier, and the buyer pays the freight costs. Conversely, **FOB destination** means that the seller places the goods free on board to the buyer's place of business, and the seller pays the freight. For example, the sales invoice in Illustration 5.6 indicates FOB shipping point. Thus, the buyer (Sauk Stereo) pays the freight charges. **Illustration 5.7** illustrates these shipping terms.

ILLUSTRATION 5.7 Shipping terms

Freight Costs Incurred by the Buyer

When the buyer incurs the transportation costs, these costs are considered part of the cost of purchasing inventory. Therefore, the buyer debits (increases) the Inventory account. For example, if Sauk Stereo (the buyer) pays Public Carrier Co. \$150 for freight charges on May 6, the entry on Sauk Stereo's books is:

A	=	L	+	OE
+150				
-150				
Cash Flows				
				-150

May 6	Inventory		150
	Cash		
	(To record payment of freight on goods purchased)		150

Thus, any freight costs incurred by the buyer are part of the cost of merchandise purchased. The reason: Inventory cost should include all costs to acquire the inventory, including freight necessary to deliver the goods to the buyer. Companies recognize these costs as cost of goods sold when inventory is sold.

Freight Costs Incurred by the Seller

In contrast, **freight costs incurred by the seller on outgoing merchandise are an operating expense to the seller**. These costs increase an expense account titled Freight-Out (sometimes called Delivery Expense). For example, if the freight terms on the invoice in Illustration 5.6 had required PW Audio Supply (the seller) to pay the freight charges, the entry by PW Audio Supply would be:

A	=	L	+	OE
				-150 Exp
Cash Flows				
				-150

May 4	Freight-Out (or Delivery Expense)		150
	Cash		
	(To record payment of freight on goods sold)		150

When the seller pays the freight charges, the seller will usually establish a higher invoice price for the goods to cover the shipping expense.

Purchase Returns and Allowances

A purchaser may be dissatisfied with the merchandise received because the goods are damaged or defective, of inferior quality, or do not meet the purchaser's specifications. In such cases, the purchaser may return the goods to the seller for credit if the sale was made on credit, or for a cash refund if the purchase was for cash. This transaction is known as a **purchase return**. Alternatively, the purchaser may choose to keep the merchandise if the seller is willing to grant an allowance (deduction) from the purchase price. This transaction is known as a **purchase allowance**.

Assume that Sauk Stereo returned goods costing \$300 to PW Audio Supply on May 8. The following entry by Sauk Stereo for the returned merchandise decreases (debits) Accounts Payable and decreases (credits) Inventory.

A	=	L	+ OE
May 8 Accounts Payable		300	
Inventory			-300
(To record return of goods purchased from PW Audio Supply)		300	
<hr/>			
Cash Flows			
no effect			

Because Sauk Stereo increased Inventory when the goods were received, Inventory is decreased when Sauk Stereo returns the goods.

Suppose instead that Sauk Stereo chose to keep the goods after being granted a \$50 allowance (reduction in price). It would reduce (debit) Accounts Payable and reduce (credit) Inventory for \$50.

Purchase Discounts

The credit terms of a purchase on account may permit the buyer to claim a cash discount for prompt payment. The buyer calls this cash discount a **purchase discount**. This incentive offers advantages to both parties. The purchaser saves money, and the seller is able to shorten the operating cycle by converting the accounts receivable into cash.

Credit terms specify the amount of the cash discount and time period in which it is offered. They also indicate the time period in which the purchaser is expected to pay the full invoice price. In the sales invoice in Illustration 5.6, credit terms are 2/10, n/30, which is read "two-ten, net thirty" (see **Helpful Hint**). This means that the buyer may take a 2% cash discount on the invoice price, less ("net of") any returns or allowances, if payment is made within 10 days of the invoice date (the **discount period**). Otherwise, the invoice price, less any returns or allowances, is due 30 days from the invoice date.

Alternatively, the discount period may extend to a specified number of days following the month in which the sale occurs. For example, 1/10 EOM (end of month) means that a 1% discount is available if the invoice is paid within the first 10 days of the next month.

When the seller elects not to offer a cash discount for prompt payment, credit terms will specify only the maximum time period for paying the balance due. For example, the invoice may state the time period as n/30, n/60, or n/10 EOM. This means, respectively, that the buyer must pay the net amount in 30 days, 60 days, or within the first 10 days of the next month.

When the buyer pays an invoice within the discount period, the amount of the discount decreases Inventory. Why? Because companies record inventory at cost and, by paying within the discount period, the buyer has reduced its cost. To illustrate, assume Sauk Stereo pays the balance due of \$3,500 (gross invoice price of \$3,800 less purchase returns and allowances of \$300) on May 14, the last day of the discount period. Since the terms are 2/10, n/30, the cash discount is \$70 ($\$3,500 \times 2\%$), and Sauk Stereo pays \$3,430 ($\$3,500 - \70). The entry Sauk Stereo makes to record its May 14 payment decreases (debits) Accounts Payable by

HELPFUL HINT

The term *net* in "net 30" means the remaining amount due after subtracting any sales returns and allowances and partial payments.

the amount of the gross invoice price, reduces (credits) Inventory by the \$70 discount, and reduces (credits) Cash by the net amount owed.

A	=	L	+	OE
		-3,500		
-3,430				
-70				
Cash Flows				
-3,430				

May 14	Accounts Payable	3,500	
	Cash		3,430
	Inventory		70
(To record payment within discount period)			

If Sauk Stereo failed to take the discount and instead made full payment of \$3,500 on June 3, it would debit Accounts Payable and credit Cash for \$3,500 each.

A	=	L	+	OE
		-3500		
-3,500				
Cash Flows				
-3,500				

June 3	Accounts Payable	3,500	
	Cash		3,500
(To record payment with no discount taken)			

A merchandising company usually should take all available discounts. Passing up the discount may be viewed as **paying interest** for use of the money. For example, passing up the discount offered by PW Audio Supply would be comparable to Sauk Stereo paying an interest rate of 2% for the use of \$3,500 for 20 days. This is the equivalent of an annual interest rate of approximately 36.5% ($2\% \times 365/20$). Obviously, it would be better for Sauk Stereo to borrow at prevailing bank interest rates of 6% to 10% than to lose the discount.

Summary of Purchasing Transactions

The following T-account (with transaction descriptions in red) provides a summary of the effect of the previous transactions on Inventory. Sauk Stereo originally purchased \$3,800 worth of inventory on account for resale. It then returned \$300 of goods. It paid \$150 in freight charges, and finally, it received a \$70 discount off the balance owed because it paid within the discount period. This results in a balance in Inventory of \$3,580.

Inventory				
Purchase		May 4	3,800	
Freight-in		6	150	
Balance			14	70
			3,580	

DO IT! 2 | Purchase Transactions

On September 5, De La Hoya Company buys merchandise on account from Junot Diaz Company. The purchase price of the goods paid by De La Hoya is \$1,500, and the cost to Diaz Company was \$800. On September 8, De La Hoya returns defective goods with a selling price of \$200. Record the transactions on the books of De La Hoya Company.

ACTION PLAN

- Purchaser records goods at cost.
- When goods are returned, purchaser reduces Inventory.

Solution

Sept. 5	Inventory	1,500	
	Accounts Payable		1,500
	(To record goods purchased on account)		
8	Accounts Payable	200	
	Inventory		200
	(To record return of defective goods)		

Related exercise material: **BE5.3, BE5.5, DO IT! 5.2, E5.2, E5.3, and E5.4.**

Recording Sales Under a Perpetual System

LEARNING OBJECTIVE 3

Record sales under a perpetual inventory system.

In accordance with the revenue recognition principle, companies record sales revenue when the performance obligation is satisfied. Typically, the performance obligation is satisfied when the goods transfer from the seller to the buyer. At this point, the sales transaction is complete and the sales price established.

Sales may be made on credit or for cash. A **business document** should support every sales transaction, to provide written evidence of the sale. **Cash register documents** provide evidence of cash sales. A **sales invoice**, like the one shown in Illustration 5.6, provides support for a credit sale. The original copy of the invoice goes to the customer, and the seller keeps a copy for use in recording the sale. The invoice shows the date of sale, customer name, total sales price, and other relevant information.

The seller makes two entries for each sale. **The first entry records the sale:** The seller increases (debits) Cash (or Accounts Receivable if a credit sale) and also increases (credits) Sales Revenue. **The second entry records the cost of the merchandise sold:** The seller increases (debits) Cost of Goods Sold and also decreases (credits) Inventory for the cost of those goods. As a result, the Inventory account will show at all times the amount of inventory that should be on hand.

To illustrate a credit sales transaction, PW Audio Supply records its May 4 sale of \$3,800 to Sauk Stereo (see Illustration 5.6) as follows (assume the merchandise cost PW Audio Supply \$2,400).

May 4		3,800	3,800
	Accounts Receivable		
	Sales Revenue	+3,800	+3,800 Rev
	(To record credit sale to Sauk Stereo per invoice #731)		

$$\begin{array}{r} \boxed{A} = \boxed{L} + \boxed{OE} \\ +3,800 \\ \hline +3,800 \text{ Rev} \end{array}$$

Cash Flows
no effect

4		2,400	2,400
	Cost of Goods Sold		
	Inventory	-2,400	-2,400 Exp
	(To record cost of merchandise sold on invoice #731 to Sauk Stereo)		

$$\begin{array}{r} \boxed{A} = \boxed{L} + \boxed{OE} \\ -2,400 \\ \hline -2,400 \text{ Exp} \end{array}$$

Cash Flows
no effect

For internal decision-making purposes, merchandising companies may use more than one sales account. For example, PW Audio Supply may decide to keep separate sales accounts for its sales of TVs, Blu-ray players, and headsets. **REI** might use separate accounts for camping gear, children's clothing, and ski equipment—or it might have even more narrowly defined accounts. By using separate sales accounts for major product lines, rather than a single combined sales account, company management can more closely monitor sales trends and respond to changes in sales patterns more strategically. For example, if TV sales are increasing while Blu-ray player sales are decreasing, PW Audio Supply might reevaluate both its advertising and pricing policies on these items to ensure they are optimal.

On its income statement presented to outside investors, a merchandising company normally would provide only a single sales figure—the sum of all of its individual sales accounts. This is done for two reasons. First, providing detail on all of its individual sales accounts would add considerable length to its income statement. Second, companies do not want their competitors to know the details of their operating results. However, **Microsoft** recently expanded its disclosure of revenue from three to five types. The reason: The additional categories enabled financial statement users to better evaluate the growth of the company's consumer and Internet businesses (see **Ethics Note**).

ETHICS NOTE

Many companies are trying to improve the quality of their financial reporting. For example, **General Electric** now provides more detail on its revenues and operating profits.

Anatomy of a Fraud¹

Holly Harmon was a cashier at a national supermarket for only a short time when she began stealing merchandise using three methods. Under the first method, her husband or friends took UPC labels from cheaper items and put them on more expensive items. Holly then scanned the goods at the register. Using the second method, Holly scanned an item at the register but then voided the sale and left the merchandise in the shopping cart. A third approach was to put goods into large plastic containers. She scanned the plastic containers but not the goods within them. After Holly quit, a review of past surveillance tapes enabled the store to observe the thefts and to identify the participants.

Total take: \$12,000

The Missing Controls

Human resource controls. A background check would have revealed Holly's previous criminal record. She would not have been hired as a cashier.

Physical controls. Software can flag high numbers of voided transactions or a high number of sales of low-priced goods. Random comparisons of video records with cash register records can ensure that the goods reported as sold on the register are the same goods that are shown being purchased on the video recording. Finally, employees should be aware that they are being monitored.

Source: Adapted from Wells, *Fraud Casebook* (2007), pp. 251–259.

At the end of “Anatomy of a Fraud” stories, which describe some recent real-world frauds, we discuss the missing control activities that would likely have prevented or uncovered the fraud.

Sales Returns and Allowances

We now look at the “flip side” of purchase returns and allowances, which the seller records as **sales returns and allowances**. These are transactions where the seller either accepts goods back from the buyer (a return) or grants a reduction in the purchase price (an allowance) so the buyer will keep the goods. PW Audio Supply’s entries to record credit for returned goods involve (1) an increase (debit) in Sales Returns and Allowances (a contra account to Sales Revenue) and a decrease (credit) in Accounts Receivable at the \$300 selling price, and (2) an increase (debit) in Inventory (assume a \$140 cost) and a decrease (credit) in Cost of Goods Sold, as shown below (assuming that the goods were not defective).

A	=	L	+	OE
				-300 Rev

Cash Flows
no effect

A	=	L	+	OE
+140				+140 Exp

Cash Flows
no effect

May 8		Sales Returns and Allowances	300	
		Accounts Receivable		300
		(To record credit granted to Sauk Stereo for returned goods)		
8		Inventory	140	
		Cost of Goods Sold		140
		(To record cost of goods returned)		

If Sauk Stereo returns goods because they are damaged or defective, then PW Audio Supply’s entry to Inventory and Cost of Goods Sold should be for the fair value of the returned goods, rather than their cost. For example, if the returned goods were defective and had a fair value of \$50, PW Audio Supply would debit Inventory for \$50 and credit Cost of Goods Sold for \$50.

¹The “Anatomy of a Fraud” stories in this textbook are adapted from *Fraud Casebook: Lessons from the Bad Side of Business*, edited by Joseph T. Wells (Hoboken, NJ: John Wiley & Sons, Inc., 2007). Used by permission. The names of some of the people and organizations in the stories are fictitious, but the facts in the stories are true.

What happens if the goods are not returned but the seller grants the buyer an allowance by reducing the purchase price? In this case, the seller debits Sales Returns and Allowances and credits Accounts Receivable for the amount of the allowance. An allowance has no impact on Inventory or Cost of Goods Sold.

Sales Returns and Allowances is a **contra revenue account** to Sales Revenue. This means that it is offset against a revenue account on the income statement. The normal balance of Sales Returns and Allowances is a debit. Companies use a contra account, instead of debiting Sales Revenue, to disclose in the accounts and in the income statement the amount of sales returns and allowances. Disclosure of this information is important to management. Excessive returns and allowances may suggest problems—inferior merchandise, inefficiencies in filling orders, errors in billing customers, or delivery or shipment mistakes. Moreover, a decrease (debit) recorded directly to Sales Revenue would obscure the relative importance of sales returns and allowances as a percentage of sales. It also could distort comparisons between total sales in different accounting periods.

At the end of the accounting period, if the company anticipates that sales returns and allowances will be material, the company should make an adjusting entry to estimate the amount of returns. In some industries, such as those relating to the sale of books and periodicals, returns are often material. The accounting for situations where returns must be estimated is addressed in advanced accounting courses.

Accounting Across the Organization Costco Wholesale Corp.

© Jacob Wackerhausen/iStockphoto

The Point of No Returns?

In most industries, sales returns are relatively minor. But returns of consumer electronics can really take a bite out of profits. Recently, the marketing executives at **Costco Wholesale Corp.** faced a difficult decision. Costco has always prided itself on its generous return policy. Most goods have had

an unlimited grace period for returns. However, a new policy requires that certain electronics must be returned within 90 days of their purchase. The reason? The cost of returned products such as high-definition TVs, computers, and iPods cut an estimated 8¢ per share off Costco's earnings per share, which was \$2.30.

Source: Kris Hudson, "Costco Tightens Policy on Returning Electronics," *Wall Street Journal* (February 27, 2007), p. B4.

If a company expects significant returns, what are the implications for revenue recognition? (Go to WileyPLUS for this answer and additional questions.)

Sales Discounts

As mentioned in our discussion of purchase transactions, the seller may offer the customer a cash discount—called by the seller a **sales discount**—for the prompt payment of the balance due. Like a purchase discount, a sales discount is based on the invoice price less returns and allowances, if any. The seller increases (debits) the Sales Discounts account for discounts that are taken. For example, PW Audio Supply makes the following entry to record the cash receipt on May 14 from Sauk Stereo within the discount period.

May 14	Cash	3,430	
	Sales Discounts	70	
	Accounts Receivable		3,500
	(To record collection within 2/10, n/30 discount period from Sauk Stereo)		

A	=	L	+ OE
+3,430			-70 Rev
			<hr/>
		-3,500	
			<hr/>
		Cash Flows	
		+3,430	

Like Sales Returns and Allowances, Sales Discounts is a **contra revenue account** to Sales Revenue. Its normal balance is a debit. PW Audio Supply uses this account, instead of debiting Sales Revenue, to disclose the amount of cash discounts taken by customers. If Sauk

Stereo does not take the discount, PW Audio Supply increases (debits) Cash for \$3,500 and decreases (credits) Accounts Receivable for the same amount at the date of collection.

At the end of the accounting period, if the amount of potential discounts is material, the company should make an adjusting entry to estimate the discounts. This would not usually be the case for sales discounts but might be necessary for other types of discounts such as volume discounts, which are addressed in more advanced accounting courses.

The following T-accounts summarize the three sales-related transactions and show their combined effect on net sales.

Sales Revenue	Sales Returns and Allowances	Sales Discounts
3,800	300	70
Net Sales \$3,430		

People, Planet, and Profit Insight PepsiCo

Helen Sessions/Alamy

We did that. Sun Chips should be made in a facility that puts back more water than it uses. It does that. And we partnered with our

Selling Green

Here is a question an executive of **PepsiCo** was asked: Should PepsiCo market green? The executive indicated that the company should, as he believes it's the No. 1 thing consumers all over the world care about. Here are some of his thoughts on this issue:

"Sun Chips are part of the food business I run. It's a 'healthy snack.' We decided that Sun Chips, if it's a healthy snack, should be made in facilities that have a net-zero footprint. In other words, I want off the electric grid everywhere we make Sun Chips.

suppliers and came out with the world's first compostable chip package.

Now, there was an issue with this package: It was louder than the New York subway, louder than jet engines taking off. What would a company that's committed to green do: walk away or stay committed? If your people are passionate, they're going to fix it for you as long as you stay committed. Six months later, the compostable bag has half the noise of our current package.

So the view today is: we should market green, we should be proud to do it . . . it has to be a 360-degree process, both internal and external. And if you do that, you can monetize environmental sustainability for the shareholders."

Source: "Four Problems—and Solutions," *Wall Street Journal* (March 7, 2011), p. R2.

What is meant by "monetize environmental sustainability" for shareholders? (Go to WileyPLUS for this answer and additional questions.)

DO IT! 3 | Sales Transactions

On September 5, De La Hoya Company buys merchandise on account from Junot Diaz Company. The selling price of the goods is \$1,500, and the cost to Diaz Company was \$800. On September 8, De La Hoya returns defective goods with a selling price of \$200 and a fair value of \$30. Record the transactions on the books of Junot Diaz Company.

Solution

Sept. 5	Accounts Receivable Sales Revenue (To record credit sale)	1,500	1,500
5	Cost of Goods Sold Inventory (To record cost of goods sold on account)	800	800

ACTION PLAN

- Seller records both the sale and the cost of goods sold at the time of the sale.
- When goods are returned, the seller records the return in a contra account, Sales Returns and Allowances, and reduces Accounts Receivable.

8 Sales Returns and Allowances Accounts Receivable (To record credit granted for receipt of returned goods)	200	200
8 Inventory Cost of Goods Sold (To record fair value of goods returned)	30	30

ACTION PLAN (cont.)

- Any goods returned increase Inventory and reduce Cost of Goods Sold. Defective or damaged inventory is recorded at fair value (scrap value).

The Accounting Cycle for a Merchandising Company

LEARNING OBJECTIVE 4

Apply the steps in the accounting cycle to a merchandising company.

Up to this point, we have illustrated the basic entries for transactions relating to purchases and sales in a perpetual inventory system. Now we consider the remaining steps in the accounting cycle for a merchandising company. Each of the required steps described in Chapter 4 for service companies apply to merchandising companies. Appendix 5A to this chapter shows use of a worksheet by a merchandiser (an optional step).

Adjusting Entries

A merchandising company generally has the same types of adjusting entries as a service company. However, a merchandiser using a perpetual system will require one additional adjustment to make the records agree with the actual inventory on hand. Here's why. At the end of each period, for control purposes, a merchandising company that uses a perpetual system will take a physical count of its goods on hand. The company's unadjusted balance in Inventory usually does not agree with the actual amount of inventory on hand. The perpetual inventory records may be incorrect due to recording errors, theft, or waste. Thus, the company needs to adjust the perpetual records to make the recorded inventory amount agree with the inventory on hand. **This involves adjusting Inventory and Cost of Goods Sold.**

For example, suppose that PW Audio Supply has an unadjusted balance of \$40,500 in Inventory. Through a physical count, PW Audio Supply determines that its actual merchandise inventory at December 31 is \$40,000. The company would make an adjusting entry as follows.

Dec. 31 Cost of Goods Sold Inventory (\$40,500 – \$40,000) (To adjust inventory to physical count)	500	500
--	-----	-----

A	=	L	+	OE
–500				–500 Exp
<hr/>				
Cash Flows no effect				

Closing Entries

A merchandising company, like a service company, closes to Income Summary all accounts that affect net income. In journalizing, the company credits all temporary accounts with debit balances, and debits all temporary accounts with credit balances, as the following shows for PW Audio Supply (see **Helpful Hint**). Note that PW Audio Supply closes Cost of Goods Sold to Income Summary.

Dec. 31 Sales Revenue Income Summary (To close income statement accounts with credit balances)	480,000	480,000
---	---------	---------

HELPFUL HINT

The easiest way to prepare the first two closing entries is to identify the temporary accounts by their balances and then prepare one entry for the credits and one for the debits.

31	Income Summary Sales Returns and Allowances Sales Discounts Cost of Goods Sold Salaries and Wages Expense Freight-Out Advertising Expense Utilities Expense Depreciation Expense Insurance Expense (To close income statement accounts with debit balances)	450,000	
31	Income Summary Owner's Capital (To close net income to capital)	30,000	30,000
31	Owner's Capital Owner's Drawings (To close drawings to capital)	15,000	15,000

After PW Audio Supply has posted the closing entries, all temporary accounts have zero balances. Also, Owner's Capital has a balance that is carried over to the next period.

Summary of Merchandising Entries

Illustration 5.8 summarizes the entries for the merchandising accounts using a perpetual inventory system.

DO IT! 4 | Closing Entries

The trial balance of Celine's Sports Wear Shop at December 31 shows Inventory \$25,000, Sales Revenue \$162,400, Sales Returns and Allowances \$4,800, Sales Discounts \$3,600, Cost of Goods Sold \$110,000, Rent Revenue \$6,000, Freight-Out \$1,800, Rent Expense \$8,800, and Salaries and Wages Expense \$22,000. Prepare the closing entries for the above accounts.

Solution

The two closing entries are:

Dec. 31	Sales Revenue Rent Revenue Income Summary (To close accounts with credit balances)	162,400 6,000 168,400
31	Income Summary Cost of Goods Sold Sales Returns and Allowances Sales Discounts Freight-Out Rent Expense Salaries and Wages Expense (To close accounts with debit balances)	151,000 110,000 4,800 3,600 1,800 8,800 22,000

Related exercise material: **BE5.6, BE5.7, DO IT! 5.4, E5.6, E5.7, and E5.8.**

ACTION PLAN

- Close all temporary accounts with credit balances to Income Summary by debiting these accounts.
- Close all temporary accounts with debit balances, except drawings, to Income Summary by crediting these accounts.

Multiple-Step and Comprehensive Income Statements**LEARNING OBJECTIVE 5**

Prepare a multiple-step income statement and a comprehensive income statement.

Merchandising companies widely use the classified balance sheet introduced in Chapter 4 and one of two forms for the income statement. This section explains the use of these financial statements by merchandisers.

Multiple-Step Income Statement

The **multiple-step income statement** is so named because it shows several steps in determining net income. Two of these steps relate to the company's principal operating activities. A multiple-step statement also distinguishes between **operating** and **nonoperating activities**. Finally, the statement highlights intermediate components of income and shows subgroupings of expenses.

Income Statement Presentation of Sales

The multiple-step income statement begins by presenting **sales revenue**. It then deducts contra revenue accounts—sales returns and allowances, and sales discounts—from sales revenue to arrive at **net sales**. **Illustration 5.9** presents the sales section for PW Audio Supply, using assumed data.

ILLUSTRATION 5.9

Computation of net sales

PW Audio Supply Income Statement (partial)

Sales			
Sales revenue			\$480,000
Less: Sales returns and allowances		\$12,000	
Sales discounts		8,000	20,000
Net sales			\$460,000

Gross Profit

ALTERNATIVE TERMINOLOGY

Gross profit is sometimes referred to as *gross margin*.

From Illustration 5.1, you learned that companies deduct cost of goods sold from sales revenue to determine **gross profit** (see **Alternative Terminology**). For this computation, companies use **net sales** (which takes into consideration Sales Returns and Allowances and Sales Discounts) as the amount of sales revenue. On the basis of the sales data in Illustration 5.9 (net sales of \$460,000) and cost of goods sold under the perpetual inventory system (assume \$316,000), PW Audio Supply's gross profit is \$144,000, computed as shown in **Illustration 5.10**.

ILLUSTRATION 5.10

Computation of gross profit

Net sales	\$460,000
Cost of goods sold	316,000
Gross profit	\$144,000

We also can express a company's gross profit as a percentage, called the **gross profit rate**. To do so, we divide the amount of gross profit by net sales. For PW Audio Supply, the **gross profit rate** is 31.3%, computed as shown in **Illustration 5.11**.

ILLUSTRATION 5.11

Gross profit rate formula and computation

Gross Profit	÷	Net Sales	=	Gross Profit Rate
\$144,000	÷	\$460,000	=	31.3%

Analysts generally consider the **gross profit rate** to be more useful than the **gross profit amount**. The rate expresses a more meaningful (qualitative) relationship between net sales and gross profit. For example, a gross profit of \$1,000,000 may sound impressive. But if it is the result of a gross profit rate of only 7%, it is not so impressive. The gross profit rate tells how many cents of each sales dollar go to gross profit.

Gross profit represents the **merchandising profit** of a company. It is not a measure of the overall profitability because operating expenses are not yet deducted. But managers and other interested parties closely watch the amount and trend of gross profit. They compare current gross profit with amounts reported in past periods. They also compare the company's gross profit rate with rates of competitors and with industry averages. Such comparisons provide

information about the effectiveness of a company's purchasing function and the soundness of its pricing policies.

Operating Expenses and Net Income

Operating expenses are the next component in measuring net income for a merchandising company. They are the expenses incurred in the process of earning sales revenue. These expenses are similar in merchandising and service companies. Companies sometimes segregate operating expenses into selling expenses and administrative expenses to provide additional information. Selling expenses include such items as expenses for sales salaries and advertising. Administrative expenses include such items as insurance expense and utility expense.

At PW Audio Supply, operating expenses were \$114,000. The company determines its net income by subtracting operating expenses from gross profit. Thus, net income is \$30,000, as **Illustration 5.12** shows.

Gross profit	\$144,000
Operating expenses	<u>114,000</u>
Net income	<u><u>\$ 30,000</u></u>

ILLUSTRATION 5.12

Operating expenses in computing net income

The net income amount is the so-called “bottom line” of a company’s income statement.

Nonoperating Activities

Nonoperating activities consist of various revenues and expenses and gains and losses that are unrelated to the company’s main line of operations. When nonoperating items are included, the label “**Income from operations**” (or “Operating income”) precedes them. This label clearly identifies the results of the company’s normal operations, an amount determined by subtracting cost of goods sold and operating expenses from net sales. The results of nonoperating activities are shown in the categories “**Other revenues and gains**” and “**Other expenses and losses**.” **Illustration 5.13** lists examples of each.

Other Revenues and Gains

Interest revenue from notes receivable and marketable securities.

Dividend revenue from investments in common stock.

Rent revenue from subleasing a portion of the store.

Gain from the sale of property, plant, and equipment.

Other Expenses and Losses

Interest expense on notes and loans payable.

Casualty losses from recurring causes, such as vandalism and accidents.

Loss from the sale or abandonment of property, plant, and equipment.

Loss from strikes by employees and suppliers.

ILLUSTRATION 5.13

Other items of nonoperating activities

Merchandising companies report the nonoperating activities in the income statement immediately after the company’s operating activities. **Illustration 5.14** shows these sections for PW Audio Supply, using assumed data.

The distinction between operating and nonoperating activities is crucial to many external users of financial data. These users view operating income as sustainable and many nonoperating activities as non-recurring (see **Ethics Note**). Therefore, when forecasting next year’s income, analysts put the most weight on this year’s operating income and less weight on this year’s nonoperating activities.

ETHICS NOTE

Companies manage earnings in various ways. **ConAgra Foods** recorded a non-recurring gain for \$186 million from the sale of **Pilgrim's Pride** stock to help meet an earnings projection for the quarter.

Disclosing More Details

After **Enron**, increased investor criticism and regulator scrutiny forced many companies to improve the clarity of their financial disclosures. For example, **IBM** began providing more detail regarding its “Other gains and losses.” It had previously included these items in its selling, general, and administrative expenses, with little disclosure. For example, previously if IBM

sold off one of its buildings at a gain, it would include this gain in the selling, general and administrative expense line item, thus reducing that expense. This made it appear that the company had done a better job of controlling operating expenses than it actually had.

As another example, when **eBay** sold the remainder of its investment in **Skype** to **Microsoft**, it reported a gain in “Other revenues and gains” of \$1.7 billion. Since eBay’s total income from operations was \$2.4 billion, it was very important that the gain from the Skype sale not be buried in operating income.

Why have investors and analysts demanded more accuracy in isolating “Other gains and losses” from operating items? (Go to WileyPLUS for this answer and additional questions.)

Single-Step Income Statement

Another income statement format is the **single-step income statement**. The statement is so named because only one step—subtracting total expenses from total revenues—is required in determining net income.

In a single-step statement, all data are classified into two categories: (1) **revenues**, which include both operating revenues and other revenues and gains; and (2) **expenses**, which include cost of goods sold, operating expenses, and other expenses and losses. **Illustration 5.15** shows a single-step statement for PW Audio Supply.

PW Audio Supply	
Income Statement	
For the Year Ended December 31, 2020	
Revenues	
Net sales	\$460,000
Interest revenue	3,000
Gain on disposal of plant assets	600
Total revenues	463,600
Expenses	
Cost of goods sold	\$316,000
Operating expenses	114,000
Interest expense	1,800
Casualty loss from vandalism	200
Total expenses	432,000
Net income	\$ 31,600

ILLUSTRATION 5.15
Single-step income statement

There are two primary reasons for using the single-step format. (1) A company does not realize any type of profit or income until total revenues exceed total expenses, so it makes sense to divide the statement into these two categories. (2) The format is simpler and easier to read. *For homework problems, however, you should use the single-step format only when specifically instructed to do so.*

Comprehensive Income Statement

Chapter 1 discussed the fair value principle. Accounting standards require companies to adjust the recorded values of certain types of assets and liabilities to their fair values at the end of each reporting period. In some instances, the unrealized gains or losses that result from adjusting recorded amounts to fair value are included in net income. However, in other cases, these unrealized gains and losses are not included in net income. Instead, these excluded items are reported as part of a more inclusive earnings measure, called **comprehensive income**. Examples of such items include certain adjustments to pension plan assets, gains and losses on foreign currency translation, and unrealized gains and losses on certain types of investments. Items that are excluded from net income but included in comprehensive income are either reported in a combined statement of net income and comprehensive income, or in a separate comprehensive income statement. The **comprehensive income statement** presents items that are not included in the determination of net income, referred to as other comprehensive income. **Illustration 5.16** shows how comprehensive income is presented in a separate comprehensive income statement. It assumes that PW Audio Supply had an unrealized gain of \$2,300. *Use this format when preparing your homework.*

PW Audio Supply	
Comprehensive Income Statement	
For the Year Ended December 31, 2020	
Net income	\$31,600
Other comprehensive income	
Unrealized holding gain on investment securities	2,300
Comprehensive income	<u><u>\$33,900</u></u>

ILLUSTRATION 5.16
Combined statement of net income and comprehensive income

Classified Balance Sheet

In the balance sheet, merchandising companies report inventory as a current asset immediately below accounts receivable. Recall from Chapter 4 that companies generally list current asset items in the order of their closeness to cash (liquidity). Inventory is less close to cash than accounts receivable because the goods must first be sold and then collection made from

the customer. **Illustration 5.17** presents the assets section of a classified balance sheet for PW Audio Supply (see **Helpful Hint**).

ILLUSTRATION 5.17 Assets section of a classified balance sheet

PW Audio Supply Balance Sheet (Partial) December 31, 2020		
	<u>Assets</u>	
Current assets		
Cash	\$ 9,500	
Accounts receivable	16,100	
Inventory	40,000	
Prepaid insurance	1,800	
Total current assets	<u>67,400</u>	
Property, plant, and equipment		
Equipment	\$80,000	
Less: Accumulated depreciation—equipment	24,000	56,000
Total assets	<u>\$123,400</u>	

HELPFUL HINT

The \$40,000 is the cost of the inventory on hand, not its expected selling price.

DO IT! 5 | Multiple-Step Income Statement

The following information is available for Art Center for the year ended December 31, 2020.

Other revenues and gains	\$ 8,000	Sales revenue	\$462,000
Other expenses and losses	3,000	Operating expenses	187,000
Cost of goods sold	147,000	Sales discounts	20,000

Other comprehensive loss 10,000

Prepare a multiple-step income statement and comprehensive income statement for Art Center.

Solution

Art Center Income Statement For the Year Ended December 31, 2020		
Sales		
Sales revenue	\$462,000

Comprehensive income	<u><u>\$103,000</u></u>	

ACTION PLAN

- Subtract cost of goods sold from net sales to determine gross profit.
- Subtract operating expenses from gross profit to determine income from operations.
- Add/subtract nonoperating items to determine net income.

Appendix 5A

Worksheet for a Merchandising Company

LEARNING OBJECTIVE *6

Prepare a worksheet for a merchandising company.

Using a Worksheet

As indicated in Chapter 4, a worksheet enables companies to prepare financial statements before they journalize and post adjusting entries. The steps in preparing a worksheet for a merchandising company are the same as for a service company. **Illustration 5A.1** shows the worksheet for PW Audio Supply (excluding nonoperating items). The unique accounts for a merchandiser using a **perpetual inventory system** are in red.

ILLUSTRATION 5A.1 Worksheet for merchandising company—perpetual inventory system

Trial Balance Columns

Data for the trial balance come from the ledger balances of PW Audio Supply at December 31. The amount shown for Inventory, \$40,500, is the year-end inventory amount from the perpetual inventory system.

Adjustments Columns

A merchandising company generally has the same types of adjustments as a service company. As you see in the worksheet, adjustments (b), (c), and (d) are for insurance, depreciation, and salaries. Pioneer Advertising, as illustrated in Chapters 3 and 4, also had these adjustments. Adjustment (a) was required to adjust the perpetual inventory carrying amount to the actual count.

After PW Audio Supply enters all adjustments data on the worksheet, it establishes the equality of the adjustments column totals. It then extends the balances in all accounts to the adjusted trial balance columns.

Adjusted Trial Balance

The adjusted trial balance shows the balance of all accounts after adjustment at the end of the accounting period.

Income Statement Columns

Next, the merchandising company transfers the accounts and balances that affect the income statement from the adjusted trial balance columns to the income statement columns. PW Audio Supply shows Sales Revenue of \$480,000 in the credit column. It shows the contra revenue accounts Sales Returns and Allowances \$12,000 and Sales Discounts \$8,000 in the debit column. The difference of \$460,000 is the net sales shown on the income statement (Illustration 5.14).

Finally, the company totals all the credits in the income statement column and compares those totals to the total of the debits in the income statement column. If the credits exceed the debits, the company has net income. PW Audio Supply has net income of \$30,000. If the debits exceed the credits, the company would report a net loss.

Balance Sheet Columns

The major difference between the balance sheets of a service company and a merchandiser is inventory. PW Audio Supply shows the ending inventory amount of \$40,000 in the balance sheet debit column. The information to prepare the owner's equity statement is also found in these columns. That is, the Owner's Capital account is \$83,000. Owner's Drawings are \$15,000. Net income results when the total of the debit column exceeds the total of the credit column in the balance sheet columns. A net loss results when the total of the credits exceeds the total of the debit balances.

Appendix 5B

Periodic Inventory System

LEARNING OBJECTIVE *7

Record purchases and sales under a periodic inventory system.

As described in this chapter, companies may use one of two basic systems of accounting for inventories: (1) the perpetual inventory system or (2) the periodic inventory system. In the chapter, we focused on the characteristics of the perpetual inventory system. In this appendix, we discuss and illustrate the **periodic inventory system**. One key difference between the two systems is the point at which the company computes cost of goods sold. For a visual reminder of this difference, refer back to Illustration 5.5.

Determining Cost of Goods Sold Under a Periodic System

Determining cost of goods sold is different when a periodic inventory system is used rather than a perpetual system. As you have seen, a company using a **perpetual system** makes an entry to record cost of goods sold and to reduce inventory each time a sale is made. A company using a **periodic system** does not determine cost of goods sold until the end of the period. At the end of the period, the company performs a count to determine the ending balance of inventory. It then **calculates cost of goods sold by subtracting ending inventory from the cost of goods available for sale**. Cost of goods available for sale is the sum of beginning inventory plus purchases, as shown in **Illustration 5B.1**.

$$\begin{array}{r}
 \text{Beginning Inventory} \\
 + \text{Cost of Goods Purchased} \\
 \hline
 \text{Cost of Goods Available for Sale} \\
 - \text{Ending Inventory} \\
 \hline
 \text{Cost of Goods Sold}
 \end{array}$$

ILLUSTRATION 5B.1

Basic formula for cost of goods sold using the periodic system

Another difference between the two approaches is that the perpetual system directly adjusts the Inventory account for any transaction that affects inventory (such as freight costs, returns, and discounts). The periodic system does not do this. Instead, it creates different accounts for purchases, freight costs, returns, and discounts. These various accounts are shown in **Illustration 5B.2**, which presents the calculation of cost of goods sold for PW Audio Supply using the periodic approach (see **Helpful Hint**).

PW Audio Supply Cost of Goods Sold For the Year Ended December 31, 2020		
Cost of goods sold		
Inventory, January 1		\$ 36,000
Purchases	\$325,000	
Less: Purchase returns and allowances	\$10,400	
Purchase discounts	6,800	17,200
Net purchases		307,800
Add: Freight-in		12,200
Cost of goods purchased		320,000
Cost of goods available for sale		356,000
Less: Inventory, December 31		40,000
Cost of goods sold		\$316,000

ILLUSTRATION 5B.2

Cost of goods sold for a merchandiser using a periodic inventory system

HELPFUL HINT

The far right column identifies the primary items that make up cost of goods sold of \$316,000. The middle column explains cost of goods purchased of \$320,000. The left column reports contra purchase items of \$17,200.

Note that the basic elements from Illustration 5B.1 are highlighted in Illustration 5B.2. You will learn more in Chapter 6 about how to determine cost of goods sold using the periodic system.

The use of the periodic inventory system does not affect the form of presentation in the balance sheet. As under the perpetual system, a company reports inventory in the current assets section.

Recording Merchandise Transactions

In a **periodic inventory system**, companies record revenues from the sale of merchandise when sales are made, just as in a perpetual system. Unlike the perpetual system, however, companies **do not attempt on the date of sale to record the cost of the merchandise sold**.

Instead, they take a physical inventory count at the **end of the period** to determine (1) the cost of the merchandise then on hand and (2) the cost of the goods sold during the period. And, **under a periodic system, companies record purchases of merchandise in the Purchases account rather than in the Inventory account.** Purchase returns and allowances, purchase discounts, and freight costs on purchases are recorded in separate accounts.

To illustrate the recording of merchandise transactions under a periodic inventory system, we will use purchase/sales transactions between PW Audio Supply and Sauk Stereo, as illustrated for the perpetual inventory system in this chapter.

Recording Purchases of Merchandise

HELPFUL HINT

Be careful not to debit purchases of equipment or supplies to a Purchases account.

On the basis of the sales invoice (Illustration 5.6) and receipt of the merchandise ordered from PW Audio Supply, Sauk Stereo records the \$3,800 purchase as follows (see **Helpful Hint**).

May 4	Purchases	3,800	
	Accounts Payable		3,800
	(To record goods purchased on account from PW Audio Supply)		

Purchases is a temporary account whose normal balance is a debit.

Freight Costs

When the purchaser directly incurs the freight costs, it debits the account Freight-In (or Transportation-In). For example, if Sauk Stereo pays Public Carrier Co. \$150 for freight charges on its purchase from PW Audio Supply on May 6, the entry on Sauk Stereo's books is as follows.

May 6	Freight-In (Transportation-In)	150	
	Cash		150
	(To record payment of freight on goods purchased)		

Like Purchases, Freight-In is a temporary account whose normal balance is a debit. **Freight-In is part of cost of goods purchased.** The reason is that cost of goods purchased should include any freight charges necessary to bring the goods to the purchaser. Freight costs are not subject to a purchase discount. Purchase discounts apply only to the invoice cost of the merchandise.

Purchase Returns and Allowances

Sauk Stereo returns goods costing \$300 to PW Audio Supply and prepares the following entry to recognize the return.

May 8	Accounts Payable	300	
	Purchase Returns and Allowances		300
	(To record return of goods purchased from PW Audio Supply)		

Purchase Returns and Allowances is a temporary account whose normal balance is a credit.

Purchase Discounts

On May 14, Sauk Stereo pays the balance due on account to PW Audio Supply, taking the 2% cash discount allowed by PW Audio Supply for payment within 10 days. Sauk Stereo records the payment and discount as follows.

May 14	Accounts Payable (\$3,800 – \$300)	3,500	
	Purchase Discounts (\$3,500 × .02)		70
	Cash		3,430
	(To record payment within the discount period)		

Purchase Discounts is a temporary account whose normal balance is a credit.

Recording Sales of Merchandise

The seller, PW Audio Supply, records the sale of \$3,800 of merchandise to Sauk Stereo on May 4 (sales invoice No. 731, Illustration 5.6) as follows.

May 4	Accounts Receivable Sales Revenue (To record credit sales per invoice #731 to Sauk Stereo)	3,800	3,800
-------	---	-------	-------

Sales Returns and Allowances

To record the returned goods received from Sauk Stereo on May 8, PW Audio Supply records the \$300 sales return as follows.

May 8	Sales Returns and Allowances Accounts Receivable (To record credit granted to Sauk Stereo for returned goods)	300	300
-------	--	-----	-----

Sales Discounts

On May 14, PW Audio Supply receives payment of \$3,430 on account from Sauk Stereo. PW Audio Supply honors the 2% cash discount and records the payment of Sauk Stereo's account receivable in full as follows.

May 14	Cash Sales Discounts (\$3,500 × .02) Accounts Receivable (\$3,800 – \$300) (To record collection within 2/10, n/30 discount period from Sauk Stereo)	3,430 70	3,500
--------	--	-------------	-------

Comparison of Entries—Perpetual vs. Periodic

Illustration 5B.3 summarizes the periodic inventory entries shown in this appendix and compares them to the perpetual system entries from the chapter. Entries that differ in the two systems are shown in color.

ILLUSTRATION 5B.3 Comparison of entries for perpetual and periodic inventory systems

ENTRIES ON SAUK STEREO'S BOOKS					
Transaction		Perpetual Inventory System	Periodic Inventory System		
May 4	Purchase of merchandise on credit.	Inventory Accounts Payable	3,800 3,800	Purchases Accounts Payable	3,800 3,800
6	Freight costs on purchases.	Inventory Cash	150 150	Freight-In Cash	150 150
8	Purchase returns and allowances.	Accounts Payable Inventory	300 300	Accounts Payable Purchase Returns and Allowances	300 300
14	Payment on account with a discount.	Accounts Payable Cash Inventory	3,500 3,430 70	Accounts Payable Cash Purchase Discounts	3,500 3,430 70

ILLUSTRATION 5B.3 (Continued)

ENTRIES ON PW AUDIO SUPPLY'S BOOKS						
			Perpetual Inventory System		Periodic Inventory System	
May	4	Sale of merchandise on credit.	Accounts Receivable	3,800	Accounts Receivable	3,800
			Sales Revenue	3,800	Sales Revenue	3,800
			Cost of Goods Sold	2,400	No entry for cost of goods sold	
			Inventory	2,400		
	8	Return of merchandise sold.	Sales Returns and Allowances	300	Sales Returns and Allowances	300
			Accounts Receivable	300	Accounts Receivable	300
			Inventory	140	No entry	
			Cost of Goods Sold	140		
	14	Cash received on account with a discount.	Cash	3,430	Cash	3,430
			Sales Discounts	70	Sales Discounts	70
			Accounts Receivable	3,500	Accounts Receivable	3,500

Journalizing and Posting Closing Entries

For a merchandising company, like a service company, all accounts that affect the determination of net income are closed to Income Summary. Data for the preparation of closing entries may be obtained from the income statement columns of the worksheet. In journalizing, all debit column amounts are credited, and all credit column amounts are debited. To close the merchandise inventory in a periodic inventory system:

1. The beginning inventory balance is debited to Income Summary and credited to Inventory.
2. The ending inventory balance is debited to Inventory and credited to Income Summary.

The two entries for PW Audio Supply are as follows.

		(1)
Dec. 31	Income Summary Inventory (To close beginning inventory)	36,000
		36,000
		(2)
31	Inventory Income Summary (To record ending inventory)	40,000
		40,000

Illustration 5B.4 shows the Inventory and Income Summary accounts after posting.

ILLUSTRATION 5B.4

Posting closing entries for merchandise inventory

Inventory				Income Summary			
1/1	Bal.	36,000	12/31	Close	36,000	12/31	Close
12/31	Close	40,000					
12/31	Bal.	40,000					

HELPFUL HINT

Except for merchandise inventory, the easiest way to prepare the first two closing entries is to identify the temporary accounts by their balances and then prepare one entry for the credits and one for the debits.

Often, the closing of inventory is included with other closing entries, as shown below for PW Audio Supply (see **Helpful Hint**). (*Close inventory with other accounts in homework problems unless stated otherwise.*)

Dec. 31	Inventory (Dec. 31) Sales Revenue Purchase Returns and Allowances Purchase Discounts Income Summary (To record ending inventory and close accounts with credit balances)	40,000 480,000 10,400 6,800 537,200
---------	---	--

31	Income Summary Inventory (Jan. 1) Sales Returns and Allowances Sales Discounts Purchases Freight-In Salaries and Wages Expense Freight-Out Advertising Expense Utilities Expense Depreciation Expense Insurance Expense (To close beginning inventory and other income statement accounts with debit balances)	507,200	36,000
		12,000	12,000
		8,000	8,000
		325,000	325,000
		12,200	12,200
		64,000	64,000
		7,000	7,000
		16,000	16,000
		17,000	17,000
		8,000	8,000
		2,000	2,000
31	Income Summary Owner's Capital (To transfer net income to capital)	30,000	30,000
31	Owner's Capital Owner's Drawings (To close drawings to capital)	15,000	15,000

After the closing entries are posted, all temporary accounts have zero balances. In addition, Owner's Capital has a credit balance of \$98,000: beginning balance + net income – drawings (\$83,000 + \$30,000 – \$15,000).

Using a Worksheet

As indicated in Chapter 4, a worksheet enables companies to prepare financial statements before journalizing and posting adjusting entries. The steps in preparing a worksheet for a merchandising company are the same as they are for a service company.

Trial Balance Columns

Data for the trial balance come from the ledger balances of PW Audio Supply at December 31. The amount shown for Inventory, \$36,000, is the beginning inventory amount from the periodic inventory system.

Adjustments Columns

A merchandising company generally has the same types of adjustments as a service company. As you see in the worksheet in **Illustration 5B.5**, adjustments (a), (b), and (c) are for insurance, depreciation, and salaries and wages. These adjustments were also required for Pioneer Advertising, as illustrated in Chapters 3 and 4. The unique accounts for a merchandiser using a **periodic inventory system** are shown in capital red letters. Note, however, that the worksheet excludes nonoperating items.

After all adjustment data are entered on the worksheet, the equality of the adjustment column totals is established. The balances in all accounts are then extended to the adjusted trial balance columns.

Income Statement Columns

Next, PW Audio Supply transfers the accounts and balances that affect the income statement from the adjusted trial balance columns to the income statement columns. The company shows Sales Revenue of \$480,000 in the credit column. It shows the contra revenue accounts, Sales Returns and Allowances of \$12,000 and Sales Discounts of \$8,000 in the debit column. The difference of \$460,000 is the net sales shown on the income statement (Illustration 5.9).

33	Net Income							30,000			30,000
34	Totals							537,200	537,200	162,400	162,400
35											
36											
	Key: (a) Insurance expired. (b) Depreciation expense. (c) Salaries and wages accrued.										

Similarly, Purchases of \$325,000 and Freight-In of \$12,200 are extended to the debit column. The contra purchase accounts, Purchase Returns and Allowances of \$10,400 and Purchase Discounts of \$6,800, are extended to the credit columns.

The worksheet procedures for the Inventory account merit specific comment. The procedures are:

1. The beginning balance, \$36,000, is extended from the adjusted trial balance column to the **income statement debit column**. From there, it can be added in reporting cost of goods available for sale in the income statement.
2. The ending inventory, \$40,000, is added to the worksheet by an **income statement credit and a balance sheet debit**. The credit makes it possible to deduct ending inventory from

the cost of goods available for sale in the income statement to determine cost of goods sold. The debit means the ending inventory can be reported as an asset on the balance sheet.

Illustration 5B.6 shows these two procedures.

	Income Statement		Balance Sheet	
	Dr.	Cr.	Dr.	Cr.
Inventory	(1) 36,000	40,000	(2)	40,000

ILLUSTRATION 5B.6

Worksheet procedures for inventories

The computation for cost of goods sold, taken from the income statement column in Illustration 5B.5, is as shown in **Illustration on 5B.7** (see **Helpful Hint**).

Debit Column	Credit Column
Beginning inventory	\$ 36,000
Purchases	325,000
Freight-in	12,200
Total debits	373,200
Less: Total credits	57,200
Cost of goods sold	\$316,000

ILLUSTRATION 5B.7

Computation of cost of goods sold from worksheet columns

Finally, PW Audio Supply totals all the credits in the income statement column and compares these totals to the total of the debits in the income statement column. If the credits exceed the debits, the company has net income. PW Audio Supply has net income of \$30,000. If the debits exceed the credits, the company would report a net loss.

HELPFUL HINT

In a periodic system, cost of goods sold is a computation—it is not a separate account with a balance.

Balance Sheet Columns

The major difference between the balance sheets of a service company and a merchandising company is inventory. PW Audio Supply shows ending inventory of \$40,000 in the balance sheet debit column. The information to prepare the owner's equity statement is also found in these columns. That is, the Owner's Capital account is \$83,000. Owner's Drawings are \$15,000. Net income results when the total of the debit column exceeds the total of the credit column in the balance sheet columns. A net loss results when the total of the credits exceeds the total of the debit balances.

Review and Practice

Learning Objectives Review

1 Describe merchandising operations and inventory systems.

Because of inventory, a merchandising company has sales revenue, cost of goods sold, and gross profit. To account for inventory, a merchandising company must choose between a perpetual and a periodic inventory system.

2 Record purchases under a perpetual inventory system.

The company debits the Inventory account for all purchases of merchandise and freight-in, and credits it for purchase discounts and purchase returns and allowances.

3 Record sales under a perpetual inventory system.

When a merchandising company sells inventory, it debits Accounts Receivable (or Cash) and credits Sales Revenue for the **selling price** of the merchandise. At the same time, it debits Cost of Goods Sold and credits Inventory for the **cost** of the inventory items sold. Sales Returns and Allowances and Sales Discounts are debited and are contra revenue accounts.

4 Apply the steps in the accounting cycle to a merchandising company.

Each of the required steps in the accounting cycle for a service company applies to a merchandising company. A worksheet is again an optional step. Under a perpetual inventory system, the company must adjust the Inventory account to agree with the physical count.

5 Prepare a multiple-step income statement and a comprehensive income statement.

A multiple-step income statement shows numerous steps in determining net income, including nonoperating activities sections. A

single-step income statement classifies all data under two categories, revenues or expenses, and determines net income in one step. A comprehensive income statement adds or subtracts any items of other comprehensive income to net income to arrive at comprehensive income.

***6 Prepare a worksheet for a merchandising company.**

The steps in preparing a worksheet for a merchandising company are the same as for a service company. The unique accounts for a merchandiser are Inventory, Sales Revenue, Sales Returns and Allowances, Sales Discounts, and Cost of Goods Sold.

***7 Record purchases and sales under a periodic inventory system.**

In recording purchases under a periodic system, companies must make entries for (a) cash and credit purchases, (b) purchase returns and allowances, (c) purchase discounts, and (d) freight costs. In recording sales, companies must make entries for (a) cash and credit sales, (b) sales returns and allowances, and (c) sales discounts.

Glossary Review

Comprehensive income An income measure that includes gains and losses that are excluded from the determination of net income. (p. 5-21).

Comprehensive income statement A statement that presents items that are not included in the determination of net income, referred to as other comprehensive income. (p. 5-21).

Contra revenue account An account that is offset against a revenue account on the income statement. (p. 5-13).

Cost of goods sold The total cost of merchandise sold during the period. (p. 5-3).

FOB destination Freight terms indicating that the seller places the goods free on board to the buyer's place of business, and the seller pays the freight. (p. 5-8).

FOB shipping point Freight terms indicating that the seller places goods free on board the carrier, and the buyer pays the freight costs. (p. 5-8).

Gross profit The excess of net sales over the cost of goods sold. (p. 5-18).

Gross profit rate Gross profit expressed as a percentage, by dividing the amount of gross profit by net sales. (p. 5-18).

Income from operations Income from a company's principal operating activity; determined by subtracting cost of goods sold and operating expenses from net sales. (p. 5-19).

Multiple-step income statement An income statement that shows several steps in determining net income. (p. 5-18).

Net sales Sales revenue less sales returns and allowances and less sales discounts. (p. 5-18).

Nonoperating activities Various revenues, expenses, gains, and losses that are unrelated to a company's main line of operations. (p. 5-19).

Operating expenses Expenses incurred in the process of earning sales revenue. (p. 5-19).

Other expenses and losses A nonoperating-activities section of the income statement that shows expenses and losses unrelated to the company's main line of operations. (p. 5-19).

Other revenues and gains A nonoperating-activities section of the income statement that shows revenues and gains unrelated to the company's main line of operations. (p. 5-19).

Periodic inventory system An inventory system under which the company does not keep detailed inventory records throughout the accounting period but determines the cost of goods sold only at the end of an accounting period. (p. 5-5).

Perpetual inventory system An inventory system under which the company keeps detailed records of the cost of each inventory purchase and sale, and the records continuously show the inventory that should be on hand. (p. 5-4).

Purchase allowance A deduction made to the selling price of merchandise, granted by the seller so that the buyer will keep the merchandise. (p. 5-9).

Purchase discount A cash discount claimed by a buyer for prompt payment of a balance due. (p. 5-9).

Purchase invoice A document that supports each credit purchase. (p. 5-7).

Purchase return A return of goods from the buyer to the seller for a cash or credit refund. (p. 5-9).

Sales discount A reduction given by a seller for prompt payment of a credit sale. (p. 5-13).

Sales invoice A document that supports each credit sale. (p. 5-11).

Sales returns and allowances Purchase returns and allowances from the seller's perspective. See *Purchase return* and *Purchase allowance*, above. (p. 5-12).

Sales revenue (Sales) The primary source of revenue in a merchandising company. (p. 5-3).

Single-step income statement An income statement that shows only one step in determining net income. (p. 5-20).

Practice Multiple-Choice Questions

- 1. (LO 1)** Gross profit will result if:
 - a. operating expenses are less than net income.
 - b. net sales are greater than operating expenses.
 - c. net sales are greater than cost of goods sold.
 - d. operating expenses are greater than cost of goods sold.

- 2. (LO 2)** Under a perpetual inventory system, when goods are purchased for resale by a company:
 - a. purchases on account are debited to Inventory.
 - b. purchases on account are debited to Purchases.
 - c. purchase returns are debited to Purchase Returns and Allowances.
 - d. freight costs are debited to Freight-Out.

- 3. (LO 3)** The sales accounts that normally have a debit balance are:
 - a. Sales Discounts.
 - b. Sales Returns and Allowances.
 - c. Both (a) and (b).
 - d. Neither (a) nor (b).

- 4. (LO 3)** A credit sale of \$750 is made on June 13, terms 2/10, net/30. A return of \$50 is granted on June 16. The amount received as payment in full on June 23 is:

a. \$700.	c. \$685.
b. \$686.	d. \$650.

- 5. (LO 2)** Which of the following accounts will normally appear in the ledger of a merchandising company that uses a perpetual inventory system?

a. Purchases.	c. Cost of Goods Sold.
b. Freight-In.	d. Purchase Discounts.

- 6. (LO 3)** To record the sale of goods for cash in a perpetual inventory system:
 - a. only one journal entry is necessary to record cost of goods sold and reduction of inventory.
 - b. only one journal entry is necessary to record the receipt of cash and the sales revenue.
 - c. two journal entries are necessary: one to record the receipt of cash and sales revenue, and one to record the cost of goods sold and reduction of inventory.
 - d. two journal entries are necessary: one to record the receipt of cash and reduction of inventory, and one to record the cost of goods sold and sales revenue.

- 7. (LO 4)** The steps in the accounting cycle for a merchandising company are the same as those in a service company **except:**
 - a. an additional adjusting journal entry for inventory may be needed in a merchandising company.
 - b. closing journal entries are not required for a merchandising company.
 - c. a post-closing trial balance is not required for a merchandising company.
 - d. a multiple-step income statement is required for a merchandising company.

- 8. (LO 5)** The multiple-step income statement for a merchandising company shows each of the following features **except:**
 - a. gross profit.
 - b. cost of goods sold.
 - c. a sales section.
 - d. an investing activities section.

- 9. (LO 5)** If net sales are \$400,000, cost of goods sold is \$310,000, and operating expenses are \$60,000, the gross profit is:

a. \$30,000.	c. \$340,000.
b. \$90,000.	d. \$400,000.

- 10. (LO 5)** A single-step income statement:
 - a. reports gross profit.
 - b. does not report cost of goods sold.
 - c. reports sales revenue and “Other revenues and gains” in the revenues section of the income statement.
 - d. reports operating income separately.

- 11. (LO 5)** Which of the following appears on both a single-step and a multiple-step income statement?
 - a. Inventory.
 - b. Gross profit.
 - c. Income from operations.
 - d. Cost of goods sold.

- *12. (LO 6)** In a worksheet using a perpetual inventory system, Inventory is shown in the following columns:

a. adjusted trial balance debit and balance sheet debit.	b. income statement debit and balance sheet debit.
c. income statement credit and balance sheet debit.	d. income statement credit and adjusted trial balance debit.

- *13. (LO 7)** In determining cost of goods sold in a periodic system:
 - a. purchase discounts are deducted from net purchases.
 - b. freight-out is added to net purchases.
 - c. purchase returns and allowances are deducted from net purchases.
 - d. freight-in is added to net purchases.

- *14. (LO 7)** If beginning inventory is \$60,000, cost of goods purchased is \$380,000, and ending inventory is \$50,000, cost of goods sold is:

a. \$390,000.	c. \$330,000.
b. \$370,000.	d. \$420,000.

- *15. (LO 7)** When goods are purchased for resale by a company using a periodic inventory system:
 - a. purchases on account are debited to Inventory.
 - b. purchases on account are debited to Purchases.
 - c. purchase returns are debited to Purchase Returns and Allowances.
 - d. freight costs are debited to Purchases.

Solutions

- 1. c.** Gross profit will result if net sales are greater than cost of goods sold. The other choices are incorrect because (a) operating expenses and net income are not used in the computation of gross profit; (b) gross profit results when net sales are greater than cost of goods sold, not operating expenses; and (d) gross profit results when net sales, not operating expenses, are greater than cost of goods sold.
- 2. a.** Under a perpetual inventory system, when a company purchases goods for resale, purchases on account are debited to the Inventory account, not (b) Purchases or (c) Purchase Returns and Allowances. Choice (d) is incorrect because freight costs are also debited to the Inventory account, not the Freight-Out account.
- 3. c.** Both Sales Discounts and Sales Returns and Allowances normally have a debit balance. Choices (a) and (b) are both correct, but (c) is the better answer. Choice (d) is incorrect as both (a) and (b) are correct.
- 4. b.** The full amount of \$686 is paid within 10 days of the purchase ($\$750 - \$50 - [(\$750 - \$50) \times 2\%]$). The other choices are incorrect because (a) does not consider the discount of \$14; (c) the amount of the discount is based upon the amount after the return is granted ($\$700 \times 2\%$), not the amount before the return of merchandise ($\$750 \times 2\%$); and (d) does not constitute payment in full on June 23.
- 5. c.** The Cost of Goods Sold account normally appears in the ledger of a merchandising company using a perpetual inventory system. The other choices are incorrect because (a) the Purchases account, (b) the Freight-In account, and (d) the Purchase Discounts account all appear in the ledger of a merchandising company that uses a periodic inventory system.
- 6. c.** Two journal entries are necessary: one to record the receipt of cash and sales revenue, and one to record the cost of goods sold and reduction of inventory. The other choices are incorrect because (a) only considers the recognition of the expense and ignores the revenue, (b) only considers the recognition of revenue and leaves out the expense or cost of merchandise sold, and (d) the receipt of cash and sales revenue, not reduction of inventory, are paired together, and the cost of goods sold and reduction of inventory, not sales revenue, are paired together.
- 7. a.** An additional adjusting journal entry for inventory may be needed in a merchandising company to adjust for a physical inventory count, but it is not needed for a service company. The other choices are incorrect because (b) closing journal entries and (c) a post-closing trial balance are required for both types of companies. Choice
- (d) is incorrect because while a multiple-step income statement is not required for a merchandising company, it is useful to distinguish income generated from operating the business versus income or loss from non-recurring, nonoperating items.
- 8. d.** An investing activities section appears on the statement of cash flows, not on a multiple-step income statement. Choices (a) gross profit, (b) cost of goods sold, and (c) a sales section are all features of a multiple-step income statement.
- 9. b.** Gross profit = Net sales (\$400,000) – Cost of goods sold (\$310,000) = \$90,000, not (a) \$30,000, (c) \$340,000, or (d) \$400,000.
- 10. c.** Both sales revenue and “Other revenues and gains” are reported in the revenues section of a single-step income statement. The other choices are incorrect because (a) gross profit is not reported on a single-step income statement, (b) cost of goods sold is included in the expenses section of a single-step income statement, and (d) income from operations is not shown separately on a single-step income statement.
- 11. d.** Cost of goods sold appears on both a single-step and a multiple-step income statement. The other choices are incorrect because (a) inventory does not appear on either a single-step or a multiple-step income statement and (b) gross profit and (c) income from operations appear on a multiple-step income statement but not on a single-step income statement.
- 12. a.** In a worksheet using a perpetual inventory system, inventory is shown in the adjusted trial balance debit column and in the balance sheet debit column. The other choices are incorrect because the Inventory account is not shown in the income statement columns.
- *13. d.** In determining cost of goods sold in a periodic system, freight-in is added to net purchases. The other choices are incorrect because (a) purchase discounts are deducted from purchases, not net purchases; (b) freight-out is a cost of sales, not a cost of purchases; and (c) purchase returns and allowances are deducted from purchases, not net purchases.
- *14. a.** Beginning inventory (\$60,000) + Cost of goods purchased (\$380,000) – Ending inventory (\$50,000) = Cost of goods sold (\$390,000), not (b) \$370,000, (c) \$330,000, or (d) \$420,000.
- *15. b.** Purchases for resale are debited to the Purchases account. The other choices are incorrect because (a) purchases on account are debited to Purchases, not Inventory; (c) Purchase Returns and Allowances are always credited; and (d) freight costs are debited to Freight-In, not Purchases.

Practice Brief Exercises

Compute the missing amounts in determining cost of goods sold.

- 1. (LO 1)** Presented below are the components in determining cost of goods sold for (a) Frazier Company, (b) Todd Company, and (c) Abreu Enterprises. Determine the missing amounts.

Beginning Inventory	Purchases	Cost of Goods Available for Sale	Ending Inventory	Cost of Goods Sold
a. \$120,000	\$150,000	?	?	\$160,000
b. \$ 50,000	?	\$125,000	\$45,000	?
c. ?	\$220,000	\$330,000	\$61,000	?

Solution

1. a. Cost of goods available for sale = $\$120,000 + \$150,000 = \$270,000$

Ending inventory = $\$270,000 - \$160,000 = \$110,000$

- b. Purchases = \$125,000 – \$50,000 = \$75,000
 Cost of goods sold = \$125,000 – \$45,000 = \$80,000
 c. Beginning inventory = \$330,000 – \$220,000 = \$110,000
 Cost of goods sold = \$330,000 – \$61,000 = \$269,000

- 2. (LO 2)** Prepare the journal entries to record the following transactions on Robertson Company's books using a perpetual inventory system.

Journalize purchase transactions.

- a. On March 2, Melky Company sold \$800,000 of merchandise to Robertson Company, terms 2/10, n/30.
- b. On March 6, Robertson Company returned \$100,000 of the merchandise purchased on March 2.
- c. On March 12, Robertson Company paid the balance due to Melky Company.

Solution

2. a. Inventory	800,000	
Accounts Payable		800,000
b. Accounts Payable	100,000	
Inventory		100,000
c. Accounts Payable (\$800,000 – \$100,000)	700,000	
Inventory (\$700,000 × 2%)		14,000
Cash (\$700,000 – \$14,000)		686,000

- 3. (LO 4)** Cabrera Company has the following account balances: Sales Revenue \$300,000, Sales Returns and Allowances \$10,000, Cost of Goods Sold \$174,000, and Inventory \$50,000. Prepare the entries to record the closing of these items to Income Summary.

Prepare closing entries.

Solution

3. Sales Revenue	300,000	
Income Summary		300,000
Income Summary	184,000	
Cost of Goods Sold		174,000
Sales Returns and Allowances		10,000

- 4. (LO 5)** Assume Yoan Company has the following reported amounts: Sales revenue \$400,000, Sales discounts \$10,000, Cost of goods sold \$234,000, and Operating expenses \$60,000. Compute the following: (a) net sales, (b) gross profit, (c) income from operations, and (d) gross profit rate. (Round to one decimal place.)

Compute net sales, gross profit, income from operations, and gross profit rate.

Solution

- 4. a. Net sales = \$400,000 – \$10,000 = \$390,000
- b. Gross profit = \$390,000 – \$234,000 = \$156,000
- c. Income from operations = \$156,000 – \$60,000 = \$96,000
- d. Gross profit rate = \$156,000 ÷ \$390,000 = 40%

Practice Exercises

- 1. (LO 2, 3)** On June 10, Spinner Company purchased \$10,000 of merchandise on account from Lawrence Company, FOB shipping point, terms 2/10, n/30. Spinner pays the freight costs of \$600 on June 11. Damaged goods totaling \$700 are returned to Lawrence for credit on June 12. The fair value of these goods is \$300. On June 19, Spinner pays Lawrence in full, less the purchase discount. Both companies use a perpetual inventory system.

Prepare purchase and sales entries.

Instructions

- Prepare separate entries for each transaction on the books of Spinner Company.
- Prepare separate entries for each transaction for Lawrence Company. The merchandise purchased by Spinner on June 10 had cost Lawrence \$6,400.

Solution**1. a.**

June 10	Inventory Accounts Payable	10,000	10,000
11	Inventory Cash	600	600
12	Accounts Payable Inventory	700	700
19	Accounts Payable (\$10,000 – \$700) Inventory (\$9,300 × 2%) Cash (\$9,300 – \$186)	9,300	186
			9,114

b.

June 10	Accounts Receivable Sales Revenue	10,000	10,000
	Cost of Goods Sold	6,400	6,400
	Inventory		
12	Sales Returns and Allowances Accounts Receivable	700	700
	Inventory	300	300
19	Sales Discounts (\$9,300 × 2%) Cash (\$9,300 – \$186)	186	9,114
	Accounts Receivable (\$10,000 – \$700)		9,300

Prepare multiple-step and single-step income statements.

- (LO 5) **Financial Statement** In its income statement for the year ended December 31, 2020, Sale Company reported the following condensed data.

Interest expense	\$ 50,000	Net sales	\$1,650,000
Operating expenses	590,000	Interest revenue	20,000
Cost of goods sold	902,000	Loss on disposal of equipment	7,000

Instructions

- Prepare a multiple-step income statement.
- Prepare a single-step income statement.

Solution**2. a.**

Sale Company
Income Statement
For the Year Ended December 31, 2020

Net sales	\$1,650,000
Cost of goods sold	902,000
Gross profit	748,000
Operating expenses	590,000
Income from operations	158,000
Other revenues and gains	
Interest revenue	\$20,000
Other expenses and losses	
Interest expense	\$50,000
Loss on disposal of equipment	7,000
Net income	<u><u>\$ 121,000</u></u>

b.

Sale Company Income Statement For the Year Ended December 31, 2020		
Revenues		
Net sales	\$1,650,000	
Interest revenue	<u>20,000</u>	
Total revenues		\$1,670,000
Expenses		
Cost of goods sold	902,000	
Operating expenses	590,000	
Interest expenses	50,000	
Loss on sale of equipment	<u>7,000</u>	
Total expenses		<u>1,549,000</u>
Net income		<u>\$ 121,000</u>

Practice Problem

(LO 5) Financial Statement The adjusted trial balance columns of Falcetto Company's worksheet for the year ended December 31, 2020, are as follows.

Prepare a multiple-step income statement.

	<u>Debit</u>	<u>Credit</u>
Cash	14,500	Accumulated Depreciation—
Accounts Receivable	11,100	Equipment
Inventory	29,000	Notes Payable
Prepaid Insurance	2,500	Accounts Payable
Equipment	95,000	Owner's Capital
Owner's Drawings	12,000	Sales Revenue
Sales Returns and Allowances	6,700	Interest Revenue
Sales Discounts	5,000	
Cost of Goods Sold	363,400	
Freight-Out	7,600	
Advertising Expense	12,000	
Salaries and Wages Expense	56,000	
Utilities Expense	18,000	
Rent Expense	24,000	
Depreciation Expense	9,000	
Insurance Expense	4,500	
Interest Expense	3,600	
	<u>673,900</u>	

Instructions

Prepare a multiple-step income statement for Falcetto Company.

Solution

Falcetto Company Income Statement For the Year Ended December 31, 2020		
Sales		
Sales revenue		\$536,800
Less: Sales returns and allowances	\$ 6,700	
Sales discounts	<u>5,000</u>	<u>11,700</u>

Net sales	525,100
Cost of goods sold	363,400
Gross profit	161,700
Operating expenses	
Salaries and wages expense	56,000
Rent expense	24,000
Utilities expense	18,000
Advertising expense	12,000
Depreciation expense	9,000
Freight-out	7,600
Insurance expense	4,500
Total operating expenses	131,100
Income from operations	30,600
Other revenues and gains	
Interest revenue	2,500
Other expenses and losses	
Interest expense	3,600
Net income	\$ 29,500

WileyPLUS

Brief Exercises, DO IT! Exercises, Exercises, Problems, and many additional resources are available for practice in WileyPLUS.

Note: All asterisked Questions, Exercises, and Problems relate to material in the appendices to the chapter.

Questions

1. (a) "The steps in the accounting cycle for a merchandising company are different from the accounting cycle for a service company." Do you agree or disagree? (b) Is the measurement of net income for a merchandising company conceptually the same as for a service company? Explain.
2. Why is the normal operating cycle for a merchandising company likely to be longer than for a service company?
3. What components of revenues and expenses are different between merchandising and service companies?
4. How does income measurement differ between a merchandising and a service company?
5. When is cost of goods sold determined in a perpetual inventory system?
6. Distinguish between FOB shipping point and FOB destination. Identify the freight terms that will result in a debit to Inventory by the buyer and a debit to Freight-Out by the seller.
7. Explain the meaning of the credit terms 2/10, n/30.
8. Goods costing \$2,000 are purchased on account on July 15 with credit terms of 2/10, n/30. On July 18, a \$200 credit memo is received from the supplier for damaged goods. Give the journal entry on July 24 to record payment of the balance due within the discount period using a perpetual inventory system.
9. Celina Harris believes revenues from credit sales may be recorded before they are collected in cash. Do you agree? Explain.
10. (a) What is the primary source document for recording (1) cash sales and (2) credit sales? (b) Using XXs for amounts, give the journal entry for each of the transactions in part (a).
11. A credit sale is made on July 10 for \$900, terms 2/10, n/30. On July 12, \$100 of goods are returned for credit. Give the journal entry on July 19 to record the receipt of the balance due within the discount period.
12. Explain why the Inventory account will usually require adjustment at year-end.
13. Prepare the closing entries for the Sales Revenue account, assuming a balance of \$200,000 and the Cost of Goods Sold account with a \$145,000 balance.
14. What merchandising account(s) will appear in the post-closing trial balance?
15. Cupery Co. has net sales of \$105,000, cost of goods sold of \$70,000, and operating expenses of \$20,000. What is its gross profit and its gross profit rate?

16. Stefan Page Company reports net sales of \$800,000, gross profit of \$370,000, and net income of \$240,000. What are its operating expenses?

17. Identify the distinguishing features of an income statement for a merchandising company.

18. Identify the sections of a multiple-step income statement that relate to (a) operating activities, and (b) nonoperating activities.

19. How does the single-step form of income statement differ from the multiple-step form?

20. Determine Apple's gross profit rate for 2015 and 2014. Indicate whether it increased or decreased from 2014 to 2015.

***21.** Indicate the columns of the worksheet in a perpetual system in which (a) inventory and (b) cost of goods sold will be shown.

***22.** Identify the accounts that are added to or deducted from Purchases in a periodic system to determine the cost of goods purchased. For each account, indicate whether it is added or deducted.

***23.** Goods costing \$3,000 are purchased on account on July 15 with credit terms of 2/10, n/30. On July 18, a \$200 credit was received from the supplier for damaged goods. Give the journal entry on July 24 to record payment of the balance due within the discount period, assuming a periodic inventory system.

Brief Exercises

BE5.1 (LO 1) Presented below are the components in determining cost of goods sold. Determine the missing amounts.

Compute missing amounts in determining cost of goods sold.

Beginning Inventory	Purchases	Cost of Goods Available for Sale	Ending Inventory	Cost of Goods Sold
a. \$80,000	\$100,000	?	?	\$120,000
b. \$50,000	?	\$115,000	\$35,000	?
c. ?	\$110,000	\$160,000	\$29,000	?

BE5.2 (LO 1) Presented below are the components in Veasy Company's income statement. Determine the missing amounts.

Compute missing amounts in determining net income.

Sales Revenue	Cost of Goods Sold	Gross Profit	Operating Expenses	Net Income
a. \$ 75,000	?	\$28,000	?	\$ 9,800
b. \$108,000	\$70,000	?	?	\$29,500
c. ?	\$83,900	\$79,600	\$39,500	?

BE5.3 (LO 2, 3) Cha Company buys merchandise on account from Wirtz Company. The selling price of the goods is \$780, and the cost of the goods is \$470. Both companies use perpetual inventory systems. Journalize the transaction on the books of both companies.

Journalize perpetual inventory entries.

BE5.4 (LO 3) Prepare the journal entries to record the following transactions on Novy Company's books using a perpetual inventory system.

Journalize sales transactions.

- On March 2, Novy Company sold \$900,000 of merchandise on account to Opps Company, terms 2/10, n/30. The cost of the merchandise sold was \$590,000.
- On March 6, Opps Company returned \$90,000 of the merchandise purchased on March 2. The cost of the returned merchandise was \$62,000.
- On March 12, Novy Company received the balance due from Opps Company.

BE5.5 (LO 2) From the information in BE5.4, prepare the journal entries to record these transactions on Opps Company's books under a perpetual inventory system.

Journalize purchase transactions.

BE5.6 (LO 4) At year-end, the perpetual inventory records of Gutierrez Company showed merchandise inventory of \$98,000. The company determined, however, that its actual inventory on hand was \$96,100. Record the necessary adjusting entry.

Prepare adjusting entry for inventory.

BE5.7 (LO 4) Brueser Company has the following account balances: Sales Revenue \$195,000, Sales Discounts \$2,000, Cost of Goods Sold \$117,000, and Inventory \$40,000. Prepare the entries to record the closing of these items to Income Summary.

Prepare closing entries for accounts.

BE5.8 (LO 5) Financial Statement Nelson Company provides the following information for the month ended October 31, 2020: sales on credit \$280,000, cash sales \$95,000, sales discounts \$5,000, and sales returns and allowances \$11,000. Prepare the sales section of the income statement based on this information.

Prepare sales section of income statement.

Contrast presentation in multiple-step and single-step income statements.

Compute net sales, gross profit, income from operations, and gross profit rate.

Identify worksheet columns for selected accounts.

Compute net purchases and cost of goods purchased.

Compute cost of goods sold and gross profit.

Journalize purchase transactions.

Prepare closing entries for merchandise accounts.

Identify worksheet columns for selected accounts

BE5.9 (LO 5) Writing Financial Statement Explain where each of the following items would appear on (1) a multiple-step income statement, and on (2) a single-step income statement: (a) gain on sale of equipment, (b) interest expense, (c) casualty loss from vandalism, and (d) cost of goods sold.

BE5.10 (LO 5) Assume Kupfer Company has the following reported amounts: Sales revenue \$510,000, Sales returns and allowances \$15,000, Cost of goods sold \$330,000, and Operating expenses \$90,000. Compute the following: (a) net sales, (b) gross profit, (c) income from operations, and (d) gross profit rate. (Round to one decimal place.)

***BE5.11 (LO 6)** Presented below is the format of the worksheet using the perpetual inventory system presented in Appendix 5A.

Trial Balance		Adjustments		Adjusted Trial Balance		Income Statement		Balance Sheet	
Dr.	Cr.	Dr.	Cr.	Dr.	Cr.	Dr.	Cr.	Dr.	Cr.

Indicate where the following items will appear on the worksheet: (a) Cash, (b) Inventory, (c) Sales revenue, and (d) Cost of goods sold.

Example:

Cash: Trial balance debit column; Adjusted trial balance debit column; and Balance sheet debit column.

***BE5.12 (LO 7)** Assume that Morgan Company uses a periodic inventory system and has these account balances: Purchases \$450,000, Purchase Returns and Allowances \$13,000, Purchase Discounts \$9,000, and Freight-In \$18,000. Determine net purchases and cost of goods purchased.

***BE5.13 (LO 7)** Assume the same information as in BE5.12 and also that Morgan Company has beginning inventory of \$60,000, ending inventory of \$90,000, and net sales of \$730,000. Determine the amounts to be reported for cost of goods sold and gross profit.

***BE5.14 (LO 7)** Prepare the journal entries to record these transactions on Shabani Company's books using a periodic inventory system.

- a. On March 2, Shabani Company purchased \$900,000 of merchandise on account from Ballas Company, terms 2/10, n/30.
- b. On March 6, Shabani Company returned \$110,000 of the merchandise purchased on March 2.
- c. On March 12, Shabani Company paid the balance due to Ballas Company.

***BE5.15 (LO 7)** T. Corlett Company has the following merchandise account balances: Sales Revenue \$180,000, Sales Discounts \$2,000, Purchases \$120,000, and Purchases Returns and Allowances \$30,000. In addition, it has a beginning inventory of \$40,000 and an ending inventory of \$30,000. Prepare the entries to record the closing of these items to Income Summary using the periodic inventory system.

***BE5.16 (LO 7)** Presented below is the format of the worksheet using the periodic inventory system presented in Appendix 5B.

Trial Balance		Adjustments		Adjusted Trial Balance		Income Statement		Balance Sheet	
Dr.	Cr.	Dr.	Cr.	Dr.	Cr.	Dr.	Cr.	Dr.	Cr.

Indicate where the following items will appear on the worksheet: (a) Cash, (b) Beginning inventory, (c) Accounts payable, and (d) Ending inventory.

Example:

Cash: Trial balance debit column; Adjustment trial balance debit column; and Balance sheet debit column.

DO IT! Exercises

Answer general questions about merchandisers.

DO IT! 5.1 (LO 1) Indicate whether the following statements are true or false. If false, indicate how to correct the statement.

1. A merchandising company reports gross profit but a service company does not.
2. Under a periodic inventory system, a company determines the cost of goods sold each time a sale occurs.

3. A service company is likely to use accounts receivable but a merchandising company is not likely to do so.
4. Under a periodic inventory system, the cost of goods on hand at the beginning of the accounting period plus the cost of goods purchased less the cost of goods on hand at the end of the accounting period equals cost of goods sold.

DO IT! 5.2 (LO 2) On October 5, Wang Company buys merchandise on account from Davis Company. The selling price of the goods is \$4,800, and the cost to Davis Company is \$3,100. On October 8, Wang returns defective goods with a selling price of \$650 and a fair value of \$100. Record the transactions on the books of Wang Company.

Record transactions of purchasing company.

DO IT! 5.3 (LO 3) Assume information similar to that in **DO IT! 5.2**. On October 5, Wang Company buys merchandise on account from Davis Company. The selling price of the goods is \$4,800, and the cost to Davis Company is \$3,100. On October 8, Wang returns defective goods with a selling price of \$650 and a fair value of \$100. Record the transactions on the books of Davis Company.

Record transactions of selling company.

DO IT! 5.4 (LO 4) The trial balance of Beads and Bangles at December 31 shows Inventory \$21,000, Sales Revenue \$156,000, Sales Returns and Allowances \$4,000, Sales Discounts \$3,000, Cost of Goods Sold \$92,400, Interest Revenue \$5,000, Freight-Out \$1,800, Utilities Expense \$7,700, and Salaries and Wages Expense \$19,500. Prepare the closing entries for Beads and Bangles for these accounts.

Prepare closing entries for a merchandising company.

DO IT! 5.5 (LO 5) Financial Statement The following information is available for Berlin Corp. for the year ended -December 31, 2020:

Other revenues and gains	\$ 12,700	Sales revenue	\$592,000
Other expenses and losses	13,300	Operating expenses	186,000
Cost of goods sold	156,000	Sales returns and allowances	
Other comprehensive income	5,400		40,000

Prepare a multiple-step income statement for Berlin Corp. and a comprehensive income statement.

Prepare a multiple-step income statement and comprehensive income statement.

Exercises

E5.1 (LO 1) Mr. McKenzie has prepared the following list of statements about service companies and merchandisers.

Answer general questions about merchandisers.

1. Measuring net income for a merchandiser is conceptually the same as for a service company.
2. For a merchandiser, sales less operating expenses is called gross profit.
3. For a merchandiser, the primary source of revenues is the sale of inventory.
4. Sales salaries and wages is an example of an operating expense.
5. The operating cycle of a merchandiser is the same as that of a service company.
6. In a perpetual inventory system, no detailed inventory records of goods on hand are maintained.
7. In a periodic inventory system, the cost of goods sold is determined only at the end of the accounting period.
8. A periodic inventory system provides better control over inventories than a perpetual system.

Instructions

Identify each statement as true or false. If false, indicate how to correct the statement.

E5.2 (LO 2) Information related to Kerber Co. is presented below.

Journalize purchase transactions.

1. On April 5, purchased merchandise on account from Wilkes Company for \$23,000, terms 2/10, net/30, FOB shipping point.
2. On April 6, paid freight costs of \$900 on merchandise purchased from Wilkes.
3. On April 7, purchased equipment on account for \$26,000.
4. On April 8, returned damaged merchandise to Wilkes Company and was granted a \$3,000 credit for returned merchandise.
5. On April 15, paid the amount due to Wilkes Company in full.

Instructions

- a. Prepare the journal entries to record these transactions on the books of Kerber Co. under a perpetual inventory system.
- b. Assume that Kerber Co. paid the balance due to Wilkes Company on May 4 instead of April 15. Prepare the journal entry to record this payment.

Journalize perpetual inventory entries.

E5.3 (LO 2, 3) On September 1, Nixa Office Supply had an inventory of 30 calculators at a cost of \$18 each. The company uses a perpetual inventory system. During September, the following transactions occurred.

- | | |
|---------|--|
| Sept. 6 | Purchased 90 calculators at \$22 each from York. |
| 9 | Paid freight of \$90 on calculators purchased from York Co. |
| 10 | Returned 3 calculators to York Co. for \$69 cash (including freight) because they did not meet specifications. |
| 12 | Sold 26 calculators costing \$23 (including freight) for \$31 each on account to Sura Book Store, terms n/30. |
| 14 | Granted credit of \$31 to Sura Book Store for the return of one calculator that was not ordered. |
| 20 | Sold 30 calculators costing \$23 for \$32 each on account to Davis Card Shop, terms n/30. |

Instructions

Journalize the September transactions.

Prepare purchase and sales entries.

E5.4 (LO 2, 3) On June 10, Diaz Company purchased \$8,000 of merchandise on account from Taylor Company, FOB shipping point, terms 2/10, n/30. Diaz pays the freight costs of \$400 on June 11. Damaged goods totaling \$300 are returned to Taylor for credit on June 12. The fair value of these goods is \$70. On June 19, Diaz pays Taylor Company in full, less the purchase discount. Both companies use a perpetual inventory system.

Instructions

- a. Prepare separate entries for each transaction on the books of Diaz Company.
- b. Prepare separate entries for each transaction for Taylor Company. The merchandise purchased by Diaz on June 10 had cost Taylor \$4,800.

Journalize sales transactions.

E5.5 (LO 3) Presented below are transactions related to R. Humphrey Company.

1. On December 3, R. Humphrey Company sold \$570,000 of merchandise on account to Frazier Co., terms 1/10, n/30, FOB destination. R. Humphrey paid \$400 for freight charges. The cost of the merchandise sold was \$350,000.
2. On December 8, Frazier Co. was granted an allowance of \$20,000 for merchandise purchased on December 3.
3. On December 13, R. Humphrey Company received the balance due from Frazier Co.

Instructions

- a. Prepare the journal entries to record these transactions on the books of R. Humphrey Company using a perpetual inventory system.
- b. Assume that R. Humphrey Company received the balance due from Frazier Co. on January 2 of the following year instead of December 13. Prepare the journal entry to record the receipt of payment on January 2.

Prepare sales section and closing entries.

E5.6 (LO 4, 5) Financial Statement The adjusted trial balance of Sang Company shows the following data pertaining to sales at the end of its fiscal year October 31, 2020: Sales Revenue \$820,000, Freight-Out \$16,000, Sales Returns and Allowances \$25,000, and Sales Discounts \$13,000.

Instructions

- a. Prepare the sales section of the income statement.
- b. Prepare separate closing entries for (1) sales revenue, and (2) the contra accounts to sales revenue.

Prepare adjusting and closing entries.

E5.7 (LO 4) Tim Jarosz Company had the following account balances at year-end: Cost of Goods Sold \$60,000, Inventory \$15,000, Operating Expenses \$29,000, Sales Revenue \$115,000, Sales Discounts

\$1,200, and Sales Returns and Allowances \$1,700. A physical count of inventory determines that merchandise inventory on hand is \$13,600.

Instructions

- Prepare the adjusting entry necessary as a result of the physical count.
- Prepare closing entries.

E5.8 (LO 4) Presented below is information related to Hoerl Co. for the month of January 2020.

Prepare adjusting and closing entries.

Ending inventory per perpetual records	\$ 21,600	Insurance expense	\$ 12,000
		Rent expense	20,000
Ending inventory actually on hand	21,000	Salaries and wages expense	55,000
Cost of goods sold	218,000	Sales discounts	10,000
Freight-out	7,000	Sales returns and allowances	13,000
		Sales revenue	380,000

Instructions

- Prepare the necessary adjusting entry for inventory.
- Prepare the necessary closing entries.

E5.9 (LO 5) Financial Statement Presented below is information for Kaila Company for the month of March 2020.

Prepare a multiple-step income statement and calculate profitability.

Cost of goods sold	\$215,000	Rent expense	\$ 30,000
Freight-out	7,000	Sales discounts	8,000
Insurance expense	6,000	Sales returns and allowances	13,000
Salaries and wages expense	58,000	Sales revenue	380,000

Instructions

- Prepare a multiple-step income statement.
- Compute the gross profit rate.

E5.10 (LO 5) Financial Statement In its income statement for the year ended December 31, 2020, Anhad Company reported the following condensed data.

Prepare income statements and a comprehensive income statement.

Operating expenses	\$ 725,000	Interest revenue	\$ 28,000
Cost of goods sold	1,289,000	Loss on disposal of plant assets	17,000
Interest expense	70,000	Net sales	2,200,000

 Excel

Instructions

- Prepare a multiple-step income statement.
- Prepare a single-step income statement.
- Prepare a comprehensive income statement.

E5.11 (LO 2,3) An inexperienced accountant for Stahr Company made the following errors in recording merchandising transactions.

Prepare correcting entries for sales and purchases.

- A \$210 refund to a customer for faulty merchandise was debited to Sales Revenue \$210 and credited to Cash \$210.
- A \$180 credit purchase of supplies was debited to Inventory \$180 and credited to Cash \$180.
- A \$215 sales discount was debited to Sales Revenue.
- A cash payment of \$20 for freight on merchandise purchases was debited to Freight-Out \$200 and credited to Cash \$200.

Instructions

Prepare separate correcting entries for each error, assuming that the incorrect entry is not reversed. (Omit explanations.)

E5.12 (LO 5) Financial Statement In 2020, Laquen Company had net sales of \$900,000 and cost of goods sold of \$522,000. Operating expenses were \$225,000, and interest expense was \$11,000. Laquen prepares a multiple-step income statement.

Compute various income measures.

Instructions

- a. Compute Laquen's gross profit.
- b. Compute the gross profit rate. Why is this rate computed by financial statement users?
- c. What is Laquen's income from operations and net income?
- d. If Laquen prepared a single-step income statement, what amount would it report for net income?
- e. In what section of its classified balance sheet should Laquen report inventory?

Compute missing amounts and compute gross profit rate.

E5.13 (LO 5) Presented below is financial information for two different companies.

	Summer Company	Winter Company
Sales revenue	\$92,000	(d)
Sales returns	(a)	\$ 5,000
Net sales	87,000	102,000
Cost of goods sold	56,000	(e)
Gross profit	(b)	41,500
Operating expenses	15,000	(f)
Net income	(c)	18,000

Instructions

- a. Determine the missing amounts.
- b. Determine the gross profit rates. (Round to one decimal place.)

Compute missing amounts.

E5.14 (LO 5) Financial information is presented below for three different companies.

	Hardy Cosmetics	Yee Grocery	Wang Wholesalers
Sales revenue	\$90,000	\$ (e)	\$122,000
Sales returns and allowances	(a)	5,000	12,000
Net sales	86,000	95,000	(i)
Cost of goods sold	56,000	(f)	(j)
Gross profit	(b)	38,000	24,000
Operating expenses	15,000	(g)	18,000
Income from operations	(c)	(h)	(k)
Other expenses and losses	4,000	7,000	(l)
Net income	(d)	11,000	5,000

Instructions

Determine the missing amounts.

Complete worksheet using a perpetual inventory system.

***E5.15 (LO 6)** The following are selected accounts for McPhan Company as reported in the worksheet using a perpetual inventory system at the end of May 2020.

Accounts	Adjusted Trial Balance		Income Statement		Balance Sheet	
	Dr.	Cr.	Dr.	Cr.	Dr.	Cr.
Cash	11,000					
Inventory	76,000					
Sales Revenue			480,000			
Sales Returns and Allowances	10,000					
Sales Discounts	9,000					
Cost of Goods Sold	300,000					

Instructions

Complete the worksheet by extending amounts reported in the adjusted trial balance to the appropriate columns in the worksheet. Do not total individual columns.

Prepare a worksheet using a perpetual inventory system.

***E5.16 (LO 6)** The trial balance columns of the worksheet using a perpetual inventory system for Balistreri Company at June 30, 2020, are as follows.

**Balistreri Company
Worksheet
For the Month Ended June 30, 2020**

Account Titles	Trial Balance	
	Debit	Credit
Cash	1,920	
Accounts Receivable	2,440	
Inventory	11,640	
Accounts Payable		1,120
Owner's Capital		3,500
Sales Revenue		42,500
Cost of Goods Sold	20,560	
Operating Expenses	10,560	
	<u>47,120</u>	<u>47,120</u>

Other data:

Operating expenses incurred on account, but not yet recorded, total \$1,500.

Instructions

Enter the trial balance on a worksheet and complete the worksheet.

*E5.17 (LO 7) The trial balance of A. Wiencek Company at the end of its fiscal year, August 31, 2020, includes these accounts: Inventory \$19,500; Purchases \$149,000; Sales Revenue \$190,000; Freight-In \$5,000; Sales Returns and Allowances \$3,000; Freight-Out \$1,000; and Purchase Returns and Allowances \$2,000. The ending inventory is \$23,000.

Prepare cost of goods sold section.

Instructions

Prepare a cost of goods sold section for the year ending August 31 (periodic inventory).

*E5.18 (LO 7) On January 1, 2020, Brooke Hanson Corporation had inventory of \$50,000. At December 31, 2020, Brooke Hanson had the following account balances.

Compute various income statement items.

Freight-in	\$ 4,000
Purchases	509,000
Purchase discounts	6,000
Purchase returns and allowances	2,000
Sales revenue	840,000
Sales discounts	5,000
Sales returns and allowances	10,000

At December 31, 2020, Brooke Hanson determines that its ending inventory is \$60,000.

Instructions

- a. Compute Brooke Hanson's 2020 gross profit.
- b. Compute Brooke Hanson's 2020 operating expenses if net income is \$130,000 and there are no nonoperating activities.

*E5.19 (LO 7) Below is a series of cost of goods sold sections for companies B, F, L, and R.

Prepare cost of goods sold section.

	B	F	L	R
Beginning inventory	\$ 180	\$ 70	\$ 1,000	\$ (j)
Purchases	1,620	1,060	(g)	43,590
Purchase returns and allowances	40	(d)	290	(k)
Net purchases	(a)	1,030	6,210	41,090
Freight-in	110	(e)	(h)	2,240
Cost of goods purchased	(b)	1,280	7,940	(l)
Cost of goods available for sale	1,870	1,350	(i)	49,530
Ending inventory	250	(f)	1,450	6,230
Cost of goods sold	(c)	1,230	7,490	43,300

Instruction

Fill in the lettered blanks to complete the cost of goods sold sections.

*Journalize purchase transactions.****E5.20 (LO 7)** This information relates to Nandi Co.

- On April 5, purchased merchandise on account from Dion Company for \$25,000, terms 2/10, net/30, FOB shipping point.
- On April 6, paid freight costs of \$900 on merchandise purchased from Dion Company.
- On April 7, purchased equipment on account for \$30,000.
- On April 8, returned some of April 5 merchandise, which cost \$2,800, to Dion Company.
- On April 15, paid the amount due to Dion Company in full.

Instructions

- Prepare the journal entries to record these transactions on the books of Nandi Co. using a periodic inventory system.
- Assume that Nandi Co. paid the balance due to Dion Company on May 4 instead of April 15. Prepare the journal entry to record this payment.

*Journalize purchase transactions.****E5.21 (LO 7)** Presented below is information related to Chung Co.

- On April 5, purchased merchandise on account from Jose Company for \$21,000, terms 2/10, net/30, FOB shipping point.
- On April 6, paid freight costs of \$800 on merchandise purchased from Jose.
- On April 7, purchased equipment on account from Winker Mfg. Co. for \$26,000.
- On April 8, returned merchandise, which cost \$4,000, to Jose Company.
- On April 15, paid the amount due to Jose Company in full.

Instructions

- Prepare the journal entries to record these transactions on the books of Chung Co. using a periodic inventory system.
- Assume that Chung Co. paid the balance due to Jose Company on May 4 instead of April 15. Prepare the journal entry to record this payment.

*Complete worksheet for selected accounts.****E5.22 (LO 7)** Presented below are selected accounts for T. Swift Company as reported in the worksheet at the end of May 2020. Ending inventory is \$75,000.

Accounts	Adjusted Trial Balance		Income Statement		Balance Sheet	
	Dr.	Cr.	Dr.	Cr.	Dr.	Cr.
Cash	9,000					
Inventory	80,000					
Purchases	240,000					
Purchase Returns and Allowances		30,000				
Sales Revenue		450,000				
Sales Returns and Allowances	10,000					
Sales Discounts	5,000					
Rent Expense	42,000					

Instructions

Complete the worksheet by extending amounts reported in the adjustment trial balance to the appropriate columns in the worksheet. The company uses the periodic inventory system.

Problems: Set A*Journalize purchase and sales transactions under a perpetual inventory system.***P5.1A (LO 2, 3)** Kern's Book Warehouse distributes hardcover books to retail stores and extends credit terms of 2/10, n/30 to all of its customers. At the end of May, Kern's inventory consisted of books purchased for \$1,800. During June, the following merchandising transactions occurred.

- June 1 Purchased books on account for \$1,600 from Binsfeld Publishers, FOB destination, terms 2/10, n/30. The appropriate party also made a cash payment of \$50 for the freight on this date.
- 3 Sold books on account to Reading Rainbow for \$2,500. The cost of the books sold was \$1,440.
- 6 Received \$100 credit for books returned to Binsfeld Publishers.
- 9 Paid Binsfeld Publishers in full, less discount.
- 15 Received payment in full from Reading Rainbow.
- 17 Sold books on account to Rapp Books for \$1,800. The cost of the books sold was \$1,080.
- 20 Purchased books on account for \$1,800 from McGinn Publishers, FOB destination, terms 2/15, n/30. The appropriate party also made a cash payment of \$60 for the freight on this date.
- 24 Received payment in full from Rapp Books.
- 26 Paid McGinn Publishers in full, less discount.
- 28 Sold books on account to Baeten Bookstore for \$1,600. The cost of the books sold was \$970.
- 30 Granted Baeten Bookstore \$120 credit for books returned costing \$72.

Kern's Book Warehouse's chart of accounts includes the following: No. 101 Cash, No. 112 Accounts Receivable, No. 120 Inventory, No. 201 Accounts Payable, No. 401 Sales Revenue, No. 412 Sales Returns and Allowances, No. 414 Sales Discounts, and No. 505 Cost of Goods Sold.

Instructions

Journalize the transactions for the month of June for Kern's Book Warehouse using a perpetual inventory system.

P5.2A (LO 2, 3, 5) Financial Statement Renner Hardware Store completed the following merchandising transactions in the month of May. At the beginning of May, the ledger of Renner showed Cash of \$5,000 and Owner's Capital of \$5,000.

Journalize, post, and prepare a partial income statement.

- May 1 Purchased merchandise on account from Braun's Wholesale Supply \$4,200, terms 2/10, n/30.
- 2 Sold merchandise on account \$2,100, terms 1/10, n/30. The cost of the merchandise sold was \$1,300.
- 5 Received credit from Braun's Wholesale Supply for merchandise returned \$300.
- 9 Received collections in full, less discounts, from customers billed on sales of \$2,100 on May 2.
- 10 Paid Braun's Wholesale Supply in full, less discount.
- 11 Purchased supplies for cash \$400.
- 12 Purchased merchandise for cash \$1,400.
- 15 Received refund for poor quality merchandise from supplier on cash purchase \$150.
- 17 Purchased merchandise from Valley Distributors \$1,300, FOB shipping point, terms 2/10, n/30.
- 19 Paid freight on May 17 purchase \$130.
- 24 Sold merchandise for cash \$3,200. The merchandise sold had a cost of \$2,000.
- 25 Purchased merchandise on account from Lumley, Inc. \$620, FOB destination, terms 2/10, n/30.
- 27 Paid Valley Distributors in full, less discount.
- 29 Made refunds to cash customers for defective merchandise \$70. The returned merchandise had a fair value of \$30.
- 31 Sold merchandise on account \$1,000 terms n/30. The cost of the merchandise sold was \$560.

Renner Hardware's chart of accounts includes the following: No. 101 Cash, No. 112 Accounts Receivable, No. 120 Inventory, No. 126 Supplies, No. 201 Accounts Payable, No. 301 Owner's Capital, No. 401 Sales Revenue, No. 412 Sales Returns and Allowances, No. 414 Sales Discounts, and No. 505 Cost of Goods Sold.

Instructions

- Journalize the transactions using a perpetual inventory system.
- Enter the beginning cash and capital balances and post the transactions. (Use J1 for the journal reference.)
- Prepare an income statement through gross profit for the month of May 2020.
- Gross profit \$2,379

Prepare financial statements and adjusting and closing entries.

P5.3A (LO 4, 5) Financial Statement Big Box Store is located in midtown Madison. During the past several years, net income has been declining because of suburban shopping centers. At the end of the company's fiscal year on November 30, 2020, the following accounts appeared in two of its trial balances.

	Unadjusted	Adjusted	Unadjusted	Adjusted
Accounts Payable	\$ 25,200	\$ 25,200	Notes Payable	\$ 37,000
Accounts Receivable	30,500	30,500	Owner's Capital	101,700
Accumulated Depr.—Equip.	34,000	45,000	Owner's Drawings	10,000
Cash	26,000	26,000	Prepaid Insurance	10,500
Cost of Goods Sold	518,000	518,000	Property Tax Expense	2,500
Freight-Out	6,500	6,500	Property Taxes Payable	2,500
Equipment	146,000	146,000	Rent Expense	15,000
Depreciation Expense		11,000	Salaries and Wages Expense	96,000
Insurance Expense		7,000	Sales Revenue	720,000
Interest Expense	6,400	6,400	Sales Commissions Expense	6,500
Interest Revenue	2,000	2,000	Sales Commissions Payable	4,500
Inventory	32,000	32,000	Sales Returns and Allowances	8,000
			Utilities Expense	8,500
				8,500

Instructions

- a. Net income \$32,100
- Owner's capital \$123,800
- Total assets \$193,000

- a. Prepare a multiple-step income statement, an owner's equity statement, and a classified balance sheet. Notes payable are due in 2023.
- b. Journalize the adjusting entries that were made.
- c. Journalize the closing entries that are necessary.

Journalize, post, and prepare a trial balance.

P5.4A (LO 2, 3, 4) Financial Statement Yolanda Hagen, a former disc golf star, operates Yolanda's Discorama. At the beginning of the current season on April 1, the ledger of Yolanda's Discorama showed Cash \$1,800, Inventory \$2,500, and Owner's Capital \$4,300. The following transactions were completed during April.

- | | |
|--------|--|
| Apr. 5 | Purchased golf discs, bags, and other inventory on account from Mumford Co. \$1,200, FOB shipping point, terms 2/10, n/60. |
| 7 | Paid freight on the Mumford purchase \$50. |
| 9 | Received credit from Mumford Co. for merchandise returned \$100. |
| 10 | Sold merchandise on account for \$900, terms n/30. The merchandise sold had a cost of \$540. |
| 12 | Purchased disc golf shirts and other accessories on account from Saucer Sportswear \$670, terms 1/10, n/30. |
| 14 | Paid Mumford Co. in full, less discount. |
| 17 | Received credit from Saucer Sportswear for merchandise returned \$70. |
| 20 | Made sales on account for \$610, terms n/30. The cost of the merchandise sold was \$370. |
| 21 | Paid Saucer Sportswear in full, less discount. |
| 27 | Granted an allowance to customers for clothing that was flawed \$20. |
| 30 | Received payments on account from customers \$900. |

The chart of accounts for the store includes the following: No. 101 Cash, No. 112 Accounts Receivable, No. 120 Inventory, No. 201 Accounts Payable, No. 301 Owner's Capital, No. 401 Sales Revenue, No. 412 Sales Returns and Allowances, and No. 505 Cost of Goods Sold.

Instructions

- a. Journalize the April transactions using a perpetual inventory system.
- b. Enter the beginning balances in the ledger accounts and post the April transactions. (Use J1 for the journal reference.)
- c. Prepare a trial balance on April 30, 2020.
- c. Total debits \$5,810

Complete accounting cycle beginning with a worksheet.

P5.5A (LO 4, 5, 6) Financial Statement The trial balance of Gaolee Fashion Center contained the following accounts at November 30, the end of the company's fiscal year.

Gaolee Fashion Center
Trial Balance
November 30, 2020

	<u>Debit</u>	<u>Credit</u>
Cash	\$ 20,700	
Accounts Receivable	30,700	
Inventory	44,700	
Supplies	6,200	
Equipment	133,000	
Accumulated Depreciation—Equipment		\$ 28,000
Notes Payable		60,000
Accounts Payable		48,500
Owner's Capital		93,000
Owner's Drawings	12,000	
Sales Revenue		755,200
Sales Returns and Allowances	8,800	
Cost of Goods Sold	497,400	
Salaries and Wages Expense	140,000	
Advertising Expense	24,400	
Utilities Expense	14,000	
Maintenance and Repairs Expense	12,100	
Freight-Out	16,700	
Rent Expense	24,000	
Totals	\$984,700	\$984,700

Adjustment data:

1. Supplies on hand totaled \$2,600.
2. Depreciation is \$11,500 on the equipment.
3. Interest of \$3,800 is accrued on notes payable at November 30.
4. Inventory actually on hand is \$44,400.

Instructions

- a. Enter the trial balance on a worksheet, and complete the worksheet.
- b. Prepare a multiple-step income statement and an owner's equity statement for the year, and a classified balance sheet as of November 30, 2020. Notes payable of \$20,000 are due in January 2021.
- c. Journalize the adjusting entries.
- d. Journalize the closing entries.
- e. Prepare a post-closing trial balance.

P5.6A (LO 5, 7) Financial Statement At the end of Donaldson Department Store's fiscal year on November 30, 2020, these accounts appeared in its adjusted trial balance.

- a. Adj. trial balance \$1,000,000
 Net loss \$1,400
 b. Gross profit \$248,700
 Total assets \$191,900

Determine cost of goods sold and gross profit under periodic approach.

Freight-In	\$ 7,500
Inventory	40,000
Purchases	585,000
Purchase Discounts	6,300
Purchase Returns and Allowances	2,700
Sales Revenue	1,000,000
Sales Returns and Allowances	20,000

Additional facts:

1. Merchandise inventory on November 30, 2020, is \$52,600.
2. Donaldson Department Store uses a periodic system.

Instructions

Prepare an income statement through gross profit for the year ended November 30, 2020.

Gross profit \$409,100

Calculate missing amounts and assess profitability.

P5.7A (LO 5, 7) Writing Kayla Inc. operates a retail operation that purchases and sells home entertainment products. The company purchases all merchandise inventory on credit and uses a periodic inventory system. The Accounts Payable account is used for recording inventory purchases only; all other current liabilities are accrued in separate accounts. You are provided with the following selected information for the fiscal years 2017 through 2020, inclusive.

	2017	2018	2019	2020
Income Statement Data				
Sales revenue	\$55,000	\$ (e)	\$47,000	
Cost of goods sold	(a)	14,800	14,300	
Gross profit	38,300	35,200	(i)	
Operating expenses	34,900	(f)	28,800	
Net income	\$ (b)	\$ 2,500	\$ (j)	
Balance Sheet Data				
Inventory	\$7,200	\$ (c)	\$ 8,100	\$ (k)
Accounts payable	3,200	3,600	2,500	(l)
Additional Information				
Purchases of merchandise inventory on account		\$14,200	\$ (g)	\$13,200
Cash payments to suppliers		(d)	(h)	13,600

c. \$4,700

g. \$18,200

i. \$32,700

Instructions

- Calculate the missing amounts.
- Sales declined over the 3-year fiscal period, 2018–2020. Does that mean that profitability necessarily also declined? Explain, computing the gross profit rate and the profit margin (Net income ÷ Sales revenue) for each fiscal year to help support your answer. (Round to one decimal place.)

Journalize, post, and prepare trial balance and partial income statement using periodic approach.

P5.8A (LO 7) Financial Statement At the beginning of the current season on April 1, the ledger of Gage Pro Shop showed Cash \$3,000, Inventory \$4,000, and Owner's Capital \$7,000. These transactions occurred during April 2020.

- | | |
|--------|---|
| Apr. 5 | Purchased golf bags, clubs, and balls on account from Tiger Co. \$1,200, FOB shipping point, terms 2/10, n/60. |
| 7 | Paid freight on Tiger Co. purchases \$50. |
| 9 | Received credit from Tiger Co. for merchandise returned \$100. |
| 10 | Sold merchandise on account to customers \$600, terms n/30. |
| 12 | Purchased golf shoes, sweaters, and other accessories on account from Classic Sportswear \$450, terms 1/10, n/30. |
| 14 | Paid Tiger Co. in full. |
| 17 | Received credit from Classic Sportswear for merchandise returned \$50. |
| 20 | Made sales on account to customers \$600, terms n/30. |
| 21 | Paid Classic Sportswear in full. |
| 27 | Granted credit to customers for clothing that had flaws \$35. |
| 30 | Received payments on account from customers \$600. |

The chart of accounts for the pro shop includes Cash, Accounts Receivable, Inventory, Accounts Payable, Owner's Capital, Sales Revenue, Sales Returns and Allowances, Purchases, Purchase Returns and Allowances, Purchase Discounts, and Freight-In.

Instructions

- Journalize the April transactions using a periodic inventory system.
- Using T-accounts, enter the beginning balances in the ledger accounts and post the April transactions.
- Prepare a trial balance on April 30, 2020.
- Prepare an income statement through gross profit, assuming merchandise inventory on hand at April 30 is \$4,824.

c. Tot. trial balance \$8,376

d. Gross profit \$465

Continuing Case

Cookie Creations

(Note: This is a continuation of the Cookie Creations case from Chapters 1 through 4.)

CC5 Because Natalie has had such a successful first few months, she is considering other opportunities to develop her business. One opportunity is the sale of fine European mixers. The owner of Kzinski Supply Company has approached Natalie to become the exclusive U.S. distributor of these fine mixers. The current cost of a mixer is approximately \$525 (U.S.), and Natalie would sell each one for \$1,050. Natalie comes to you for advice on how to account for these mixers.

Shutterstock

Ethics Case

EC5 Tiffany Lyons was just hired as the assistant treasurer of Key West Stores. The company is a specialty chain store with nine retail stores concentrated in one metropolitan area. Among other things, the payment of all invoices is centralized in one of the departments Tiffany will manage. Her primary responsibility is to maintain the company's high credit rating by paying all bills when due and to take advantage of all cash discounts.

Jay Barnes, the former assistant treasurer who has been promoted to treasurer, is training Tiffany in her new duties. He instructs Tiffany that she is to continue the practice of preparing all checks "net of discount" and dating the checks the last day of the discount period. "But," Jay continues, "we always hold the checks at least 4 days beyond the discount period before mailing them. That way, we get another 4 days of interest on our money. Most of our creditors need our business and don't complain. And, if they scream about our missing the discount period, we blame it on the mailroom or the post office. We've only lost one discount out of every hundred we take that way. I think everybody does it. By the way, welcome to our team!"

Instructions

- What are the ethical considerations in this case?
- Who are the stakeholders that are harmed or benefitted in this situation?
- Should Tiffany continue the practice started by Jay? Does she have any choice?

Comprehensive Accounting Cycle Review

ACR5 Financial Statement On December 1, 2020, Rodriguez Distributing Company had the following account balances.

	<u>Debit</u>		<u>Credit</u>
Cash	\$ 7,200	Accumulated Depreciation—	
Accounts Receivable	4,600	Equipment	\$ 2,200
Inventory	12,000	Accounts Payable	4,500
Supplies	1,200	Salaries and Wages Payable	1,000
Equipment	22,000	Owner's Capital	39,300
	<u>\$47,000</u>		<u>\$47,000</u>

During December, the company completed the following summary transactions.

- Dec. 6 Paid \$1,600 for salaries and wages due employees, of which \$600 is for December and \$1,000 is for November salaries and wages payable.
- 8 Received \$2,200 cash from customers in payment of account (no discount allowed).
- 10 Sold merchandise for cash \$6,300. The cost of the merchandise sold was \$4,100.
- 13 Purchased merchandise on account from Boehm Co. \$9,000, terms 2/10, n/30.
- 15 Purchased supplies for cash \$2,000.
- 18 Sold merchandise on account \$15,000, terms 3/10, n/30. The cost of the merchandise sold was \$10,000.
- 20 Paid salaries and wages \$1,800.
- 23 Paid Boehm Co. in full, less discount.
- 27 Received collections in full, less discounts, from customers billed on December 18.

Adjustment data:

1. Accrued salaries and wages payable \$840.
2. Depreciation \$200 per month.
3. Supplies on hand \$1,500.

Instructions

d. Totals	\$68,340
e. Net income	\$1,610

- a. Journalize the December transactions using a perpetual inventory system.
- b. Enter the December 1 balances in the ledger T-accounts and post the December transactions. Use Cost of Goods Sold, Depreciation Expense, Salaries and Wages Expense, Sales Revenue, Sales Discounts, and Supplies Expense.
- c. Journalize and post adjusting entries.
- d. Prepare an adjusted trial balance.
- e. Prepare an income statement and an owner's equity statement for December and a classified balance sheet at December 31.

Expand Your Critical Thinking

Financial Reporting Problem: Apple Inc.

CT5.1 The financial statements of **Apple Inc.** are presented in Appendix A at the end of this textbook. The complete annual report, including the notes to the financial statements, is available at the company's website.

Instructions

Answer the following questions using Apple's Consolidated Statement of Income.

- a. What was the percentage change in (1) net sales and in (2) net income from 2013 to 2014 and from 2014 to 2015?
- b. What was the company's gross profit rate in 2013, 2014, and 2015?
- c. What was the company's percentage of net income to net sales in 2013, 2014, and 2015? Comment on any trend in this percentage.

Comparative Analysis Problem: PepsiCo, Inc. vs. The Coca-Cola Company

CT5.2 **PepsiCo, Inc.**'s financial statements are presented in Appendix B. Financial statements of **The Coca-Cola Company** are presented in Appendix C. The complete annual reports of PepsiCo and Coca-Cola, including the notes to the financial statements, are available at each company's respective website.

Instructions

- a. Based on the information contained in these financial statements, determine each of the following for each company.
 1. Gross profit for 2015.
 2. Gross profit rate for 2015.
 3. Operating income for 2015.
 4. Percentage change in operating income from 2014 to 2015.
- b. What conclusions concerning the relative profitability of the two companies can you draw from these data?

Comparative Analysis Problem: Amazon.com, Inc. vs. Wal-Mart Stores, Inc.

CT5.3 **Amazon.com, Inc.**'s financial statements are presented in Appendix D. Financial statements of **Wal-Mart Stores, Inc.** are presented in Appendix E. (Use Wal-Mart's January 31, 2016, financial statements for comparative purposes.) The complete annual reports of Amazon and Wal-Mart, including the notes to the financial statements, are available at each company's respective website.

Instructions

- a. Based on the information contained in these financial statements, determine each of the following for each company. Use Amazon's net product sales to compute gross profit information.

1. Gross profit for 2015.
 2. Gross profit rate for 2015.
 3. Operating income for 2015.
 4. Percentage change in operating income from 2014 to 2015.
- b. What conclusions concerning the relative profitability of the two companies can you draw from these data?

Real-World Focus

CT5.4 No financial decision-maker should ever rely solely on the financial information reported in the annual report to make decisions. It is important to keep abreast of financial news. This activity demonstrates how to search for financial news on the Web.

Instructions

Search the Internet for an article on either **PepsiCo** or **Coca-Cola** that sounds interesting to you and then answer the following questions.

- a. What was the source of the article (e.g., Reuters, Businesswire, PR Newswire)?
- b. Assume that you are a personal financial planner and that one of your clients owns stock in the company. Write a brief memo to your client, summarizing the article and explaining the implications of the article for his or her investment.

Decision-Making Across the Organization

CT5.5 Financial Statement Three years ago, Amy Hessler and her brother-in-law Jacob Seelig opened Family Department Store. For the first two years, business was good, but the following condensed income results for 2019 were disappointing.

**Family Department Store
Income Statement
For the Year Ended December 31, 2019**

Net sales	\$700,000
Cost of goods sold	<u>553,000</u>
Gross profit	147,000
Operating expenses	
Selling expenses	\$100,000
Administrative expenses	<u>20,000</u>
Net income	<u><u>\$ 27,000</u></u>

Amy believes the problem lies in the relatively low gross profit rate (gross profit divided by net sales) of 21%. Jacob believes the problem is that operating expenses are too high.

Amy thinks the gross profit rate can be improved by making both of the following changes. She does not anticipate that these changes will have any effect on operating expenses.

1. Increase average selling prices by 17%. This increase is expected to lower sales volume so that total sales will increase only 6%.
2. Buy merchandise in larger quantities and take all purchase discounts. These changes to selling prices and purchasing practices are expected to increase the gross profit rate from 21% to 24%.

Jacob thinks expenses can be cut by making both of the following changes. He feels that these changes will not have any effect on net sales.

1. Cut sales salaries (selling expense) of \$60,000 in half and give sales personnel a commission of 2% of net sales.
2. Reduce store deliveries to one day per week rather than twice a week. This change will reduce delivery expenses (selling expense) of \$30,000 by 40%.

Amy and Jacob come to you for help in deciding the best way to improve net income.

Instructions

With the class divided into groups, answer the following.

- a. Prepare a condensed income statement for 2020, assuming (1) Amy's changes are implemented and (2) Jacob's ideas are adopted.

- b. What is your recommendation to Amy and Jacob?
- c. Prepare a condensed income statement for 2020, assuming both sets of proposed changes are made.

Communication Activity

CT5.6 The following situation is in chronological order.

1. Parker decides to buy a surfboard.
2. He calls Surfing USA Co. to inquire about its surfboards.
3. Two days later, he requests Surfing USA Co. to make a surfboard.
4. Three days later, Surfing USA Co. sends him a purchase order to fill out.
5. He sends back the purchase order.
6. Surfing USA Co. receives the completed purchase order.
7. Surfing USA Co. completes the surfboard.
8. Parker picks up the surfboard.
9. Surfing USA Co. bills Parker.
10. Surfing USA Co. receives payment from Parker.

Instructions

In a memo to the president of Surfing USA Co., answer the following.

- a. When should Surfing USA Co. record the sale?
- b. Suppose that with his purchase order, Parker is required to make a down payment. Would that change your answer?

All About You

CT5.7 There are many situations in business where it is difficult to determine the proper period in which to record revenue. Suppose that after graduation with a degree in finance, you take a job as a manager at a consumer electronics store called Impact Electronics. The company has expanded rapidly in order to compete with **Best Buy**. Impact has also begun selling gift cards for its electronic products. The cards are available in any dollar amount and allow the holder of the card to purchase an item for up to 2 years from the time the card is purchased. If the card is not used during that 2 years, it expires.

Instructions

Answer the following questions.

At what point should the revenue from the gift cards be recognized? Should the revenue be recognized at the time the card is sold, or should it be recorded when the card is redeemed? Explain the reasoning to support your answers.

FASB Codification Activity

CT5.8 If your school has a subscription to the FASB Codification, log in and prepare responses to the following.

Instructions

- a. Access the glossary (“Master Glossary”) to answer the following:
 1. What is the definition provided for inventory?
 2. What is a customer?
- b. What guidance does the Codification provide concerning reporting inventories above cost?

A Look at IFRS

LEARNING OBJECTIVE 8

Compare the accounting for merchandising under GAAP and IFRS.

The basic accounting entries for merchandising are the same under both GAAP and IFRS. The income statement is a required statement under both sets of standards. The basic format is similar although some differences do exist.

Key Points

Following are the key similarities and differences between GAAP and IFRS related to inventories.

Similarities

- Under both GAAP and IFRS, a company can choose to use either a perpetual or periodic inventory systems.
- The definition of inventories is basically the same under GAAP and IFRS.
- As indicated above, the basic accounting entries for merchandising are the same under both GAAP and IFRS.
- Both GAAP and IFRS require that income statement information be presented for multiple years. For example, IFRS requires that 2 years of income statement information be presented, whereas GAAP requires 3 years.

Differences

- Under GAAP companies generally classify income statement items by function. Classification by function leads to descriptions like administration, distribution (selling), and manufacturing. Under IFRS, companies must classify expenses either by nature or by function. Classification by nature leads to descriptions such as the following: salaries, depreciation expense, and utilities expense. If a company uses the functional-expense method on the income statement, disclosure by nature is required in the notes to the financial statements.
- Presentation of the income statement under GAAP follows either a single-step or multiple-step format. IFRS does not mention a single-step or multiple-step approach.
- Under IFRS revaluation of land, buildings, and intangible assets is permitted. The initial gains and losses resulting from this revaluation are reported as adjustments to equity, often referred to as **other comprehensive income**. The effect of this difference is that the use of IFRS results in more transactions affecting equity (other comprehensive income) but not net income.

Looking to the Future

The IASB and FASB are working on a project that would rework the structure of financial statements. Specifically, this project will address the issue of how to classify various items in the income statement. A main goal of this new approach is to provide information that better represents how businesses are run. In addition, this approach draws attention away from just one number—net income. It will adopt major groupings similar to those currently used by the statement of cash flows (operating, investing, and financing), so that numbers can be more readily traced across statements. For example, the amount of income that is generated by operations would be traceable to the assets and liabilities used to generate the income. Finally, this approach would also provide detail, beyond that currently seen in most statements (either GAAP or IFRS), by requiring that line items be presented both by function and by nature. The new financial statement format was heavily influenced by suggestions from financial statement analysts.

IFRS Practice

IFRS Self-Test Questions

1. Which of the following would **not** be included in the definition of inventory under IFRS?

- a. Photocopy paper held for sale by an office supply store.
- b. Stereo equipment held for sale by an electronics store.
- c. Used office equipment held for sale by the human relations department of a plastics company.
- d. All of the above would meet the definition.

2. Which of the following would **not** be a line item of a company reporting costs by nature?

- a. Depreciation expense.
- b. Salaries expense.
- c. Interest expense.
- d. Manufacturing expense.

3. Which of the following would **not** be a line item of a company reporting costs by function?

- a. Administration.
- b. Manufacturing.
- c. Utilities expense.
- d. Distribution.

4. Which of the following statements is **false**?

- a. IFRS specifically requires use of a multiple-step income statement.
- b. Under IFRS, companies can use either a perpetual or periodic system.
- c. The proposed new format for financial statements was heavily influenced by the suggestions of financial statement analysts.
- d. The new income statement format will try to de-emphasize the focus on the “net income” line item.

IFRS Exercises

IFRS5.1 Explain the difference between the “nature-of-expense” and “function-of-expense” classifications.

IFRS5.2 For each of the following income statement line items, state whether the item is a “by nature” expense item or a “by function” expense item.

<input type="checkbox"/> Cost of goods sold	<input type="checkbox"/> Utilities expense
<input type="checkbox"/> Depreciation expense	<input type="checkbox"/> Delivery expense
<input type="checkbox"/> Salaries and wages expense	<input type="checkbox"/> General and administrative expenses
<input type="checkbox"/> Selling expenses	

IFRS5.3 Matilda Company reported the following amounts (in euros) in 2020: Net income, €150,000; Unrealized gain related to revaluation of buildings, €10,000; and Unrealized loss on non-trading securities, €(35,000). Determine Matilda’s total comprehensive income for 2020.

International Financial Reporting Problem: Louis Vuitton

IFRS5.4 The financial statements of **Louis Vuitton** are presented in Appendix F. The complete annual report, including the notes to its financial statements, is available at the company’s website.

Instructions

Use Louis Vuitton’s annual report to answer the following questions.

- a. Does Louis Vuitton use a multiple-step or a single-step income statement format? Explain how you made your determination.
- b. Instead of “interest expense,” what label does Louis Vuitton use for interest costs that it incurs?
- c. Using the notes to the company’s financial statements, determine the following:
 1. Composition of the inventory.
 2. Amount of inventory (gross) before impairment.

Answers to IFRS Self-Test Questions

James Porter/Workbook/Getty Images, Inc.

Inventories

Chapter Preview

In the previous chapter, we discussed the accounting for merchandise inventory using a perpetual inventory system. In this chapter, we explain the methods used to calculate the cost of inventory on hand at the balance sheet date and the cost of goods sold.

Feature Story

“Where Is That Spare Bulldozer Blade?”

Let's talk inventory—big, bulldozer-size inventory. **Caterpillar Inc.** is the world's largest manufacturer of construction and mining equipment, diesel and natural gas engines, and industrial gas turbines. It sells its products in over 200 countries, making it one of the most successful U.S. exporters. More than 70% of its productive assets are located domestically, and nearly 50% of its sales are foreign.

In the past, Caterpillar's profitability suffered, but today it is very successful. A big part of this turnaround can be attributed to effective management of its inventory. Imagine what it costs Caterpillar to have too many bulldozers sitting around in

inventory—a situation the company definitely wants to avoid. Yet Caterpillar must also make sure it has enough inventory to meet demand.

At one time during a 7-year period, Caterpillar's sales increased by 100% while its inventory increased by only 50%. To achieve this dramatic reduction in the amount of resources tied up in inventory while continuing to meet customers' needs, Caterpillar used a two-pronged approach. First, it completed a factory modernization program, which greatly increased its production efficiency. The program reduced by 60% the amount of inventory the company processes at any one time. It also reduced by an incredible 75% the time it takes to manufacture a part.

Second, Caterpillar dramatically improved its parts distribution system. It ships more than 100,000 items daily from its

23 distribution centers strategically located around the world (10 million square feet of warehouse space—remember, we're talking bulldozers). The company can virtually guarantee that it can get any part to anywhere in the world within 24 hours.

These changes led to record exports, profits, and revenues for Caterpillar. It would seem that things couldn't be better. But industry analysts, as well as the company's managers, thought otherwise. In order to maintain Caterpillar's

position as the industry leader, management began another major overhaul of inventory production and inventory management processes. The goal: to cut the number of repairs in half, increase productivity by 20%, and increase inventory turnover by 40%.

In short, Caterpillar's ability to manage its inventory has been a key reason for its past success and will very likely play a huge part in its future profitability as well.

Chapter Outline

LEARNING OBJECTIVES

LO 1 Discuss how to classify and determine inventory.	<ul style="list-style-type: none"> • Classifying inventory • Determining inventory quantities 	DO IT! 1 Rules of Ownership
LO 2 Apply inventory cost flow methods and discuss their financial effects.	<ul style="list-style-type: none"> • Specific identification • Cost flow assumptions • Financial statement and tax effects • Using inventory cost flow methods consistently 	DO IT! 2 Cost Flow Methods

Classifying and Determining Inventory

LEARNING OBJECTIVE 1

Discuss how to classify and determine inventory.

Two important steps in the reporting of inventory at the end of the accounting period are the classification of inventory based on its degree of completeness and the determination of inventory amounts.

Classifying Inventory

How a company classifies its inventory depends on whether the firm is a merchandiser or a manufacturer. In a **merchandising** company, such as those described in Chapter 5, inventory consists of many different items. For example, in a grocery store, canned goods, dairy products, meats, and produce are just a few of the inventory items on hand. These items have two common characteristics: (1) they are owned by the company, and (2) they are in a form ready for sale to customers in the ordinary course of business. Thus, merchandisers need only one inventory classification, **merchandise inventory**, to describe the many different items that make up the total inventory.

In a **manufacturing** company, some inventory may not yet be ready for sale. As a result, manufacturers usually classify inventory into three categories: finished goods, work in process, and raw materials (see **Helpful Hint**). **Finished goods inventory** is manufactured items that are completed and ready for sale. **Work in process** is that portion of manufactured inventory that has been placed into the production process but is not yet complete. **Raw materials** are the basic goods that will be used in production but have not yet been placed into production.

For example, **Caterpillar** classifies earth-moving tractors completed and ready for sale as **finished goods**. It classifies the tractors on the assembly line in various stages of production as **work in process**. The steel, glass, tires, and other components that are on hand waiting to be used in the production of tractors are identified as **raw materials**. **Illustration 6.1** shows an adapted excerpt from Note 7 of Caterpillar's annual report.

HELPFUL HINT

Regardless of the classification, companies report all inventories under Current Assets on the balance sheet.

	December 31	
(millions of dollars)	<u>2016</u>	<u>2015</u>
Raw materials	\$2,102	\$2,467
Work-in-process	1,719	1,857
Finished goods	4,576	5,122
Supplies	217	254
Total inventories	\$8,614	\$9,700

ILLUSTRATION 6.1

Composition of Caterpillar's inventory

By observing the levels and changes in the levels of these three inventory types, financial statement users can gain insight into management's production plans. For example, low levels of raw materials and high levels of finished goods suggest that management believes it has enough inventory on hand and production will be slowing down—perhaps in anticipation of a recession. Conversely, high levels of raw materials and low levels of finished goods probably signal that management is planning to step up production.

Many companies have significantly lowered inventory levels and costs using **just-in-time (JIT) inventory** methods. Under a just-in-time method, companies manufacture or purchase goods only when needed. **Dell** is famous for having developed a system for making computers in response to individual customer requests. Even though it makes each computer to meet each customer's particular specifications, Dell is able to assemble the computer and put it on a truck in less than 48 hours. The success of the JIT system depends on reliable suppliers. By integrating its information systems with those of its suppliers, Dell reduced its inventories to nearly zero. This is a huge advantage in an industry where products become obsolete nearly overnight.

The accounting concepts discussed in this chapter apply to the inventory classifications of both merchandising and manufacturing companies. Our focus here is on merchandise inventory. Additional issues specific to manufacturing companies are discussed as part of managerial accounting.

Accounting Across the Organization Ford

© PeskyMonkey/iStockphoto

A Big Hiccup

JIT can save a company a lot of money, but it isn't without risk. An unexpected disruption in the supply chain can cost a company a lot of money. Japanese automakers experienced just such a disruption when a 6.8-magnitude earthquake caused major damage to the company that produces 50% of their piston rings. The rings themselves cost only \$1.50, but you can't make a car without them. As a result, the automakers were

forced to shut down production for a few days—a loss of tens of thousands of cars.

Similarly, a major snowstorm halted production at the Canadian plants of **Ford**. A Ford spokesperson said, "Because the plants run with just-in-time inventory, we don't have large stockpiles of parts sitting around. When you have a somewhat significant disruption, you can pretty quickly run out of parts."

Sources: Amy Chozick, "A Key Strategy of Japan's Car Makers Backfires," *Wall Street Journal* (July 20, 2007); and Kate Linebaugh, "Canada Military Evacuates Motorists Stranded by Snow," *Wall Street Journal* (December 15, 2010).

What steps might the companies take to avoid such a serious disruption in the future? (Go to WileyPLUS for this answer and additional questions.)

Determining Inventory Quantities

No matter whether they are using a periodic or perpetual inventory system, all companies need to determine inventory quantities at the end of the accounting period. If using a perpetual system, companies take a physical inventory for the following reasons:

1. To check the accuracy of their perpetual inventory records.
2. To determine the amount of inventory lost due to wasted raw materials, shoplifting, or employee theft.

Companies using a periodic inventory system take a physical inventory for **two different purposes**: to determine the inventory on hand at the balance sheet date, and to determine the cost of goods sold for the period.

Determining inventory quantities involves two steps: (1) taking a physical inventory of goods on hand and (2) determining the ownership of goods.

Taking a Physical Inventory

ETHICS NOTE

In a famous fraud, a salad oil company filled its storage tanks mostly with water. The oil rose to the top, so auditors thought the tanks were full of oil. The company also said it had more tanks than it really did: It repainted numbers on the tanks to confuse auditors.

Companies take a physical inventory at the end of the accounting period. Taking a physical inventory involves actually counting, weighing, or measuring each kind of inventory on hand (see **Ethics Note**). In many companies, taking an inventory is a formidable task. Retailers such as **Target**, **True Value Hardware**, or **Home Depot** have thousands of different inventory items. An inventory count is generally more accurate when goods are not being sold or received during the counting. Consequently, companies often "take inventory" when the business is closed or when business is slow. Many retailers close early on a chosen day in January—after the holiday sales and returns, when inventories are at their lowest level—to count inventory. **Wal-Mart Stores, Inc.**, for example, has a year-end of January 31.

Determining Ownership of Goods

One challenge in computing inventory quantities is determining what inventory a company owns. To determine ownership of goods, two questions must be answered: Do all of the goods included in the count belong to the company? Does the company own any goods that were not included in the count?

Ethics Insight Leslie Fay

© Greg Brookes/iStockphoto

Falsifying Inventory to Boost Income

Managers at women's apparel maker **Leslie Fay** were convicted of falsifying inventory records to boost net income in an attempt to increase management bonuses. In another case, executives at **Craig Consumer Electronics** were accused of defrauding lenders by manipulating inventory records. The

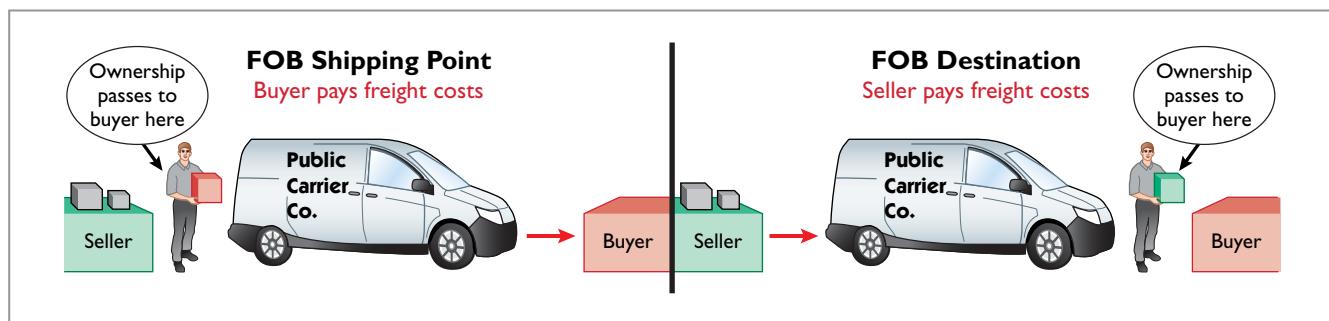

indictment said the company classified "defective goods as new or refurbished" and claimed that it owned certain shipments "from overseas suppliers" when, in fact, Craig either did not own the shipments or the shipments did not exist.

What effect does an overstatement of inventory have on a company's financial statements? (Go to WileyPLUS for this answer and additional questions.)

Goods in Transit. A complication in determining ownership is **goods in transit** (on board a truck, train, ship, or plane) at the end of the period. The company may have purchased goods that have not yet been received, or it may have sold goods that have not yet been delivered. To arrive at an accurate count, the company must determine ownership of these goods.

Goods in transit should be included in the inventory of the company that has legal title to the goods. Legal title is determined by the terms of the sale, as shown in **Illustration 6.2** and described below.

ILLUSTRATION 6.2 Terms of sale

- When the terms are **FOB (free on board) shipping point**, ownership of the goods passes to the buyer when the public carrier accepts the goods from the seller.
- When the terms are **FOB destination**, ownership of the goods remains with the seller until the goods reach the buyer.

If goods in transit at the statement date are ignored, inventory quantities may be seriously miscounted. Assume, for example, that Hargrove Company has 20,000 units of inventory on hand on December 31. It also has the following goods in transit:

- Sales of 1,500 units shipped December 31 FOB destination.
- Purchases of 2,500 units shipped FOB shipping point by the seller on December 31.

Hargrove has legal title to both the 1,500 units sold and the 2,500 units purchased. If the company ignores the units in transit, it would underestimate inventory quantities by 4,000 units ($1,500 + 2,500$).

As we will see later in the chapter, inaccurate inventory counts affect not only the inventory amount shown on the balance sheet but also the cost of goods sold calculation on the income statement.

Consigned Goods. In some lines of business, it is common to hold the goods of other parties and try to sell the goods for them for a fee, but without taking ownership of the goods. These are called **consigned goods**.

For example, you might have a used car that you would like to sell. If you take the item to a dealer, the dealer might be willing to put the car on its lot and charge you a commission if it is sold. Under this agreement, the dealer **would not take ownership** of the car, which would still belong to you. Therefore, if an inventory count were taken, the car would not be included in the dealer's inventory because the dealer does not own it.

Many car, boat, and antique dealers sell goods on consignment to keep their inventory costs down and to avoid the risk of purchasing an item that they will not be able to sell. Today, even some manufacturers are making consignment agreements with their suppliers in order to keep their inventory levels low.

Anatomy of a Fraud

Ted Nickerson, CEO of clock manufacturer Dally Industries, had expensive tastes. To support this habit, Ted took out large loans, which he collateralized with his shares of Dally Industries stock. If the price of Dally's stock fell, he was required to provide the bank with more shares of stock. To achieve target net income figures and thus maintain the stock price, Ted coerced employees in the company to alter inventory figures. Inventory quantities were manipulated by changing the amounts on inventory control tags after the year-end physical inventory count. For example, if a tag said there were 20 units of a particular item, the tag was changed to 220. Similarly, the unit costs that were used to determine the value of ending inventory were increased from, for example, \$125 per unit to \$1,250. Both of these fraudulent changes had the

effect of increasing the amount of reported ending inventory. This reduced cost of goods sold and increased net income.

Total take: \$245,000

The Missing Control

Independent internal verification. The company should have spot-checked its inventory records periodically, verifying that the number of units in the records agreed with the amount on hand and that the unit costs agreed with vendor price sheets.

Source: Adapted from Wells, *Fraud Casebook* (2007), pp. 502–509.

DO IT! 1 | Rules of Ownership

Hasbeen Company completed its inventory count. It arrived at a total inventory value of \$200,000. As a new member of Hasbeen's accounting department, you have been given the information listed below. Discuss how this information affects the reported cost of inventory.

1. Hasbeen included in the inventory goods held on consignment for Falls Co., costing \$15,000.
2. The company did not include in the count purchased goods of \$10,000 which were in transit (terms: FOB shipping point).
3. The company did not include in the count sold inventory with a cost of \$12,000 which was in transit (terms: FOB shipping point).

Solution

The goods of \$15,000 held on consignment should be deducted from the inventory count. The goods of \$10,000 purchased FOB shipping point should be added to the inventory count. Sold goods of \$12,000 which were in transit FOB shipping point should not be included in the ending inventory. Thus, inventory should be carried at \$195,000 ($\$200,000 - \$15,000 + \$10,000$).

Related exercise material: **BE6.1, BE6.2, DO IT! 6.1, E6.1, E6.2, and E6.3.**

ACTION PLAN

- Apply the rules of ownership to goods held on consignment.
- Apply the rules of ownership to goods in transit.

Inventory Methods and Financial Effects

LEARNING OBJECTIVE 2

Apply inventory cost flow methods and discuss their financial effects.

Inventory is accounted for at cost. Cost includes all expenditures necessary to acquire goods and place them in a condition ready for sale. For example, freight costs incurred to acquire inventory are added to the cost of inventory, but the cost of shipping goods to a customer is a selling expense.

After a company has determined the quantity of units of inventory, it applies unit costs to the quantities to compute the total cost of the inventory and the cost of goods sold. This process can be complicated if a company has purchased inventory items at different times and at different prices.

For example, assume that Crivitz TV Company purchases three identical 50-inch TVs on different dates at costs of \$720, \$750, and \$800. During the year, Crivitz sold two TVs at \$1,200 each. These facts are summarized in **Illustration 6.3**.

Purchases			
February 3	1 TV	at	\$720
March 5	1 TV	at	\$750
May 22	1 TV	at	\$800
Sales			
June 1	2 TVs	for	\$2,400 (\$1,200 × 2)

ILLUSTRATION 6.3

Data for inventory costing example

Cost of goods sold will differ depending on which two TVs the company sold. For example, it might be \$1,470 (\$720 + \$750), or \$1,520 (\$720 + \$800), or \$1,550 (\$750 + \$800). In this section, we discuss alternative costing methods available to Crivitz.

Specific Identification

If Crivitz can positively identify which particular units it sold and which are still in ending inventory, it can use the **specific identification method** of inventory costing. For example, if Crivitz sold the TVs it purchased on February 3 and May 22, then its cost of goods sold is \$1,520 (\$720 + \$800), and its ending inventory is \$750 (see **Illustration 6.4**). Using this method, companies can accurately determine ending inventory and cost of goods sold.

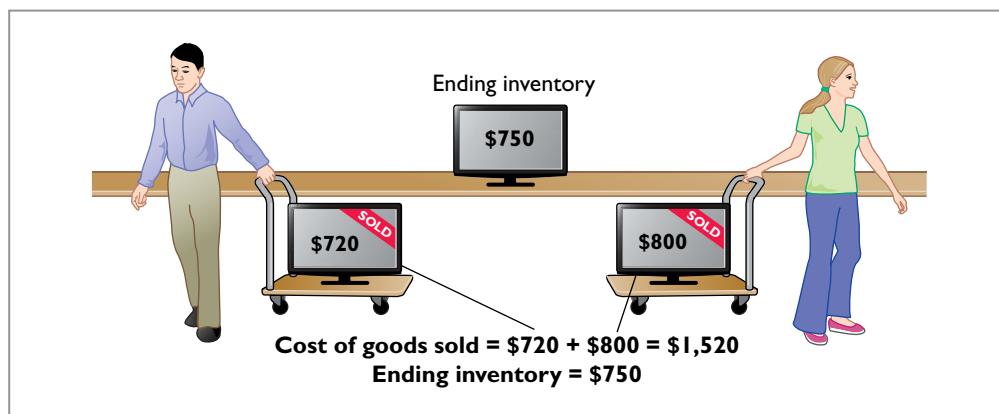

ILLUSTRATION 6.4

Specific identification method

ETHICS NOTE

A major disadvantage of the specific identification method is that management may be able to manipulate net income. For example, it can boost net income by selling units purchased at a low cost, or reduce net income by selling units purchased at a high cost.

Specific identification requires that companies keep records of the original cost of each individual inventory item. Historically, specific identification was possible only when a company sold a limited variety of high-unit-cost items that could be identified clearly from the time of purchase through the time of sale. Examples of such products are cars, pianos, or expensive antiques.

Today, bar coding, electronic product codes, and radio frequency identification make it theoretically possible to do specific identification with nearly any type of product. The reality is, however, that this practice is still relatively rare (see **Ethics Note**). Instead, rather than keep track of the cost of each particular item sold, most companies make assumptions, called **cost flow assumptions**, about which units were sold.

Cost Flow Assumptions

Because specific identification is often impractical, other cost flow methods are permitted. These differ from specific identification in that they **assume** flows of costs that may be unrelated to the physical flow of goods. There are three assumed cost flow methods:

1. First-in, first-out (FIFO)
2. Last-in, first-out (LIFO)
3. Average-cost

There is no accounting requirement that the cost flow assumption be consistent with the physical movement of the goods. Company management selects the appropriate cost flow method.

To demonstrate the three cost flow methods, we will use a **periodic** inventory system. We assume a periodic system because **very few companies use perpetual LIFO, FIFO, or average-cost** to cost their inventory and related cost of goods sold. Instead, companies that use perpetual systems often use an assumed cost (called a standard cost) to record cost of goods sold at the time of sale. Then, at the end of the period when they count their inventory, they **recalculate cost of goods sold using periodic FIFO, LIFO, or average-cost** as shown in this chapter and adjust cost of goods sold to this recalculated number.¹

To illustrate the three inventory cost flow methods, we will use the data for Houston Electronics' Astro condensers, shown in **Illustration 6.5**.

ILLUSTRATION 6.5

Data for Houston Electronics

Houston Electronics Astro Condensers				
Date	Explanation	Units	Unit Cost	Total Cost
Jan. 1	Beginning inventory	100	\$10	\$ 1,000
Apr. 15	Purchase	200	11	2,200
Aug. 24	Purchase	300	12	3,600
Nov. 27	Purchase	400	13	5,200
	Total units available for sale	1,000		\$12,000
	Units in ending inventory	450		<u><u></u></u>
	Units sold	550		<u><u></u></u>

The cost of goods sold formula in a periodic system is:

$$\text{Beginning Inventory} + \text{Cost of Goods Purchased} - \text{Ending Inventory} = \text{Cost of Goods Sold}$$

¹Also, some companies use a perpetual system to keep track of units, but they do not make an entry for perpetual cost of goods sold. In addition, firms that employ LIFO tend to use **dollar-value LIFO**, a method discussed in upper-level courses. FIFO periodic and FIFO perpetual give the same result. Therefore, companies should not incur the additional cost to use FIFO perpetual. Few companies use perpetual average-cost because of the added cost of recordkeeping. Finally, for instructional purposes, we believe it is easier to demonstrate the cost flow assumptions under the periodic system, which makes it more pedagogically appropriate.

Houston Electronics had a total of 1,000 units available to sell during the period (beginning inventory plus purchases). The total cost of these 1,000 units is \$12,000, referred to as **cost of goods available for sale**. A physical inventory taken at December 31 determined that there were 450 units in ending inventory. Therefore, Houston sold 550 units ($1,000 - 450$) during the period. To determine the cost of the 550 units that were sold (the cost of goods sold), we assign a cost to the ending inventory and subtract that value from the cost of goods available for sale. The value assigned to the ending inventory depends on which cost flow method we use. No matter which cost flow assumption we use, though, the sum of cost of goods sold plus the cost of the ending inventory must equal the cost of goods available for sale—in this case, \$12,000.

First-In, First-Out (FIFO)

The **first-in, first-out (FIFO) method** assumes that the **earliest goods** purchased are the first to be sold. FIFO often parallels the actual physical flow of merchandise. That is, it generally is good business practice to sell the oldest units first. Under the FIFO method, therefore, the **costs** of the earliest goods purchased are the first to be recognized in determining cost of goods sold. (This does not necessarily mean that the oldest units **are** sold first, but that the costs of the oldest units are **recognized** first. In a bin of picture hangers at the hardware store, for example, no one really knows, nor would it matter, which hangers are sold first.) **Illustration 6.6** shows the allocation of the cost of goods available for sale at Houston Electronics under FIFO (see **Helpful Hint**).

COST OF GOODS AVAILABLE FOR SALE				
Date	Explanation	Units	Unit Cost	Total Cost
Jan. 1	Beginning inventory	100	\$10	\$ 1,000
Apr. 15	Purchase	200	11	2,200
Aug. 24	Purchase	300	12	3,600
Nov. 27	Purchase	400	13	5,200
	Total	1,000		\$12,000

STEP 1: ENDING INVENTORY		STEP 2: COST OF GOODS SOLD	
Date	Units	Unit Cost	Total Cost
Nov. 27	400	\$13	\$5,200
Aug. 24	50	12	600
Total	450		\$5,800

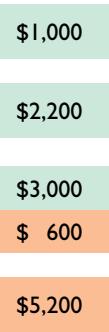

Warehouse

Ending inventory

Cost of goods sold

\$6,200

Another way of thinking about the calculation of FIFO ending inventory is the **LISH assumption**—last in still here.

ILLUSTRATION 6.6

Allocation of costs—FIFO method

HELPFUL HINT

Note the sequencing of the allocation: (1) compute ending inventory, and (2) determine cost of goods sold.

Under FIFO, since it is assumed that the first goods purchased were the first goods sold, ending inventory is based on the prices of the most recent units purchased. That is, **under FIFO, companies obtain the cost of the ending inventory by taking the unit cost**

of the most recent purchase and working backward until all units of inventory have been costed. In this example, Houston Electronics prices the 450 units of ending inventory using the **most recent** prices. The last purchase was 400 units at \$13 on November 27. The remaining 50 units are priced using the unit cost of the second most recent purchase, \$12, on August 24. Next, Houston Electronics calculates cost of goods sold by subtracting the cost of the units **not sold** (ending inventory) from the cost of all goods available for sale.

Illustration 6.7 demonstrates that companies also can calculate cost of goods sold by pricing the 550 units sold using the prices of the first 550 units acquired. Note that of the 300 units purchased on August 24, only 250 units are assumed sold. This agrees with our calculation of the cost of ending inventory, where 50 of these units were assumed unsold and thus included in ending inventory.

ILLUSTRATION 6.7
Proof of cost of goods sold

	Date	Units	Unit Cost	Total Cost
	Jan. 1	100	\$10	\$1,000
	Apr. 15	200	11	2,200
	Aug. 24	250	12	3,000
	Total	550		\$6,200

Last-In, First-Out (LIFO)

The **last-in, first-out (LIFO) method** assumes that the **latest goods** purchased are the first to be sold. LIFO seldom coincides with the actual physical flow of inventory. (Exceptions include goods stored in piles, such as coal or hay, where goods are removed from the top of the pile as they are sold.) Under the LIFO method, the **costs** of the latest goods purchased are the first to be recognized in determining cost of goods sold. **Illustration 6.8** shows the allocation of the cost of goods available for sale at Houston Electronics under LIFO.

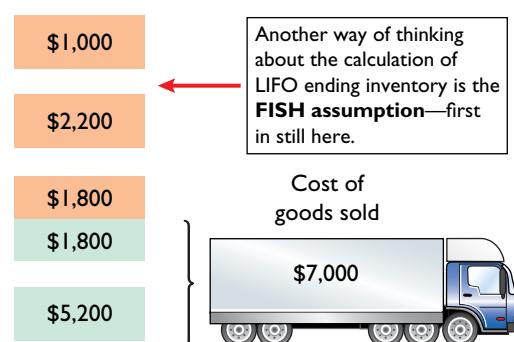

ILLUSTRATION 6.8
Allocation of costs—LIFO method

COST OF GOODS AVAILABLE FOR SALE				
Date	Explanation	Units	Unit Cost	Total Cost
Jan. 1	Beginning inventory	100	\$10	\$ 1,000
Apr. 15	Purchase	200	11	2,200
Aug. 24	Purchase	300	12	3,600
Nov. 27	Purchase	400	13	5,200
	Total	1,000		\$12,000

STEP 1: ENDING INVENTORY				STEP 2: COST OF GOODS SOLD	
Date	Units	Unit Cost	Total Cost		
Jan. 1	100	\$10	\$1,000	Cost of goods available for sale	\$12,000
Apr. 15	200	11	2,200	Less: Ending inventory	5,000
Aug. 24	150	12	1,800	Cost of goods sold	\$ 7,000
Total	450		\$5,000		

Ending inventory

Under LIFO, since it is assumed that the first goods sold were those that were most recently purchased, ending inventory is based on the prices of the oldest units purchased. That is, **under LIFO, companies obtain the cost of the ending inventory by taking the unit cost of the earliest goods available for sale and working forward until all units of inventory have been costed.** In this example, Houston Electronics prices the 450 units of ending inventory using the **earliest** prices. The first purchase was 100 units at \$10 in the January 1 beginning inventory. Then, 200 units were purchased at \$11. The remaining 150 units needed are priced at \$12 per unit (August 24 purchase). Next, Houston Electronics calculates cost of goods sold by subtracting the cost of the units **not sold** (ending inventory) from the cost of all goods available for sale.

Illustration 6.9 demonstrates that companies also can calculate cost of goods sold by pricing the 550 units sold using the prices of the last 550 units acquired. Note that of the 300 units purchased on August 24, only 150 units are assumed sold. This agrees with our calculation of the cost of ending inventory, where 150 of these units were assumed unsold and thus included in ending inventory.

Date	Units	Unit Cost	Total Cost
Nov. 27	400	\$13	\$5,200
Aug. 24	150	12	1,800
Total	550		\$7,000

ILLUSTRATION 6.9**Proof of cost of goods sold**

Under a periodic inventory system, which we are using here, **all goods purchased during the period are assumed to be available for the first sale, regardless of the date of purchase.**

Average-Cost

The **average-cost method** allocates the cost of goods available for sale on the basis of the **weighted-average unit cost** incurred. The average-cost method assumes that goods are similar in nature. **Illustration 6.10** presents the formula and a sample computation of the weighted-average unit cost.

Cost of Goods Available for Sale	÷	Total Units Available for Sale	=	Weighted-Average Unit Cost
\$12,000	÷	1,000	=	\$12

ILLUSTRATION 6.10**Formula for weighted-average unit cost**

The company then applies the weighted-average unit cost to the units on hand to determine the cost of the ending inventory. **Illustration 6.11** shows the allocation of the cost of goods available for sale at Houston Electronics using average-cost.

COST OF GOODS AVAILABLE FOR SALE				
Date	Explanation	Units	Unit Cost	Total Cost
Jan. 1	Beginning inventory	100	\$10	\$ 1,000
Apr. 15	Purchase	200	11	2,200
Aug. 24	Purchase	300	12	3,600
Nov. 27	Purchase	400	13	5,200
	Total	1,000		\$12,000

ILLUSTRATION 6.11**Allocation of costs—average-cost method**

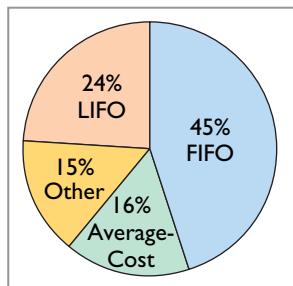

ILLUSTRATION 6.11

(Continued)

STEP 1: ENDING INVENTORY				STEP 2: COST OF GOODS SOLD	
\$12,000	÷	1,000	=	\$12	Cost of goods available for sale
Units		Unit Cost	Total Cost		Less: Ending inventory
450		\$12	<u><u>\$5,400</u></u>		Cost of goods sold
					<u><u>\$ 6,600</u></u>

We can verify the cost of goods sold under this method by multiplying the units sold times the weighted-average unit cost ($550 \times \$12 = \$6,600$). Note that this method does **not** use the average of the unit costs. That average is $\$11.50$ ($\$10 + \$11 + \$12 + \$13 = \$46; \$46 \div 4$). The average-cost method instead uses the average **weighted** by the quantities purchased at each unit cost.

Financial Statement and Tax Effects of Cost Flow Methods

**ILLUSTRATION 6.12**

Use of cost flow methods in major U.S. companies

Each of the three assumed cost flow methods is acceptable for use. For example, **Reebok International Ltd.** and **Wendy's International** currently use the FIFO method of inventory costing. **Campbell Soup Company**, **Kroger**, and **Walgreen Drugs** use LIFO for part or all of their inventory. **Bristol-Myers Squibb**, **Starbucks**, and **Motorola** use the average-cost method. In fact, a company may also use more than one cost flow method at the same time. **Stanley Black & Decker Manufacturing Company**, for example, uses LIFO for domestic inventories and FIFO for foreign inventories. **Illustration 6.12** shows the use of the three cost flow methods in 500 large U.S. companies.

The reasons companies adopt different inventory cost flow methods are varied, but they usually involve one of three factors: (1) income statement effects, (2) balance sheet effects, or (3) tax effects.

Income Statement Effects

To understand why companies might choose a particular cost flow method, let's examine the effects of the different cost flow assumptions on the financial statements of Houston Electronics. The condensed income statements in **Illustration 6.13** assume that Houston sold its 550 units for \$18,500, had operating expenses of \$9,000, and is subject to an income tax rate of 30%.

Note the cost of goods available for sale (\$12,000) is the same under each of the three inventory cost flow methods. However, the ending inventories and the costs of goods sold are different. This difference is due to the unit costs that the company allocated to cost of goods sold and to ending inventory. Each dollar of difference in ending inventory results in a corresponding dollar difference in income before income taxes. For Houston, an \$800 difference exists between FIFO and LIFO cost of goods sold.

Houston Electronics Condensed Income Statements			
	FIFO	LIFO	Average-Cost
Sales revenue	\$18,500	\$18,500	\$18,500
Beginning inventory	1,000	1,000	1,000
Purchases	11,000	11,000	11,000
Cost of goods available for sale	12,000	12,000	12,000
Ending inventory	5,800	5,000	5,400
Cost of goods sold	6,200	7,000	6,600
Gross profit	12,300	11,500	11,900
Operating expenses	9,000	9,000	9,000
Income before income taxes*	3,300	2,500	2,900
Income tax expense (30%)	990	750	870
Net income	\$ 2,310	\$ 1,750	\$ 2,030

*We are assuming that Houston Electronics is a corporation, and corporations are required to pay income taxes.

ILLUSTRATION 6.13

Comparative effects of cost flow methods

In periods of changing prices, the cost flow assumption can have significant impacts both on income and on evaluations of income, such as the following.

1. In a period of inflation, FIFO produces a higher net income because lower unit costs of the first units purchased are matched against revenue.
2. In a period of inflation, LIFO produces a lower net income because higher unit costs of the last goods purchased are matched against revenue.
3. If prices are falling, the results from the use of FIFO and LIFO are reversed. FIFO will report the lowest net income and LIFO the highest.
4. Regardless of whether prices are rising or falling, average-cost produces net income between FIFO and LIFO.

As shown in the Houston example (Illustration 6.13), in a period of rising prices FIFO reports the highest net income (\$2,310) and LIFO the lowest (\$1,750); average-cost falls between these two amounts (\$2,030).

To management, higher net income is an advantage. It causes external users to view the company more favorably. In addition, management bonuses, if based on net income, will be higher. Therefore, when prices are rising (which is usually the case), companies tend to prefer FIFO because it results in higher net income.

Others believe that LIFO presents a more realistic net income number. That is, LIFO matches the more recent costs against current revenues to provide a better measure of net income. During periods of inflation, many challenge the quality of non-LIFO earnings, noting that failing to match current costs against current revenues leads to an understatement of cost of goods sold and an overstatement of net income. As some indicate, net income computed using FIFO creates “paper or phantom profits”—that is, earnings that do not really exist.

Balance Sheet Effects

A major advantage of the FIFO method is that in a period of inflation, the costs allocated to ending inventory will approximate their current cost. For example, for Houston Electronics, 400 of the 450 units in the ending inventory are costed under FIFO at the higher November 27 unit cost of \$13.

Conversely, a major shortcoming of the LIFO method is that in a period of inflation, the costs allocated to ending inventory may be significantly understated in terms of current cost. The understatement becomes greater over prolonged periods of inflation if the inventory includes goods purchased in one or more prior accounting periods. For example, **Caterpillar** has used LIFO for more than 50 years. Its balance sheet shows

ending inventory of \$9,700 million. But the inventory's actual current cost if FIFO had been used is \$12,189 million.

Tax Effects

HELPFUL HINT

A tax rule, often referred to as the LIFO conformity rule, requires that if companies use LIFO for tax purposes they must also use it for financial reporting purposes. This means that if a company chooses the LIFO method to reduce its tax bills, it will also have to report lower net income in its financial statements.

We have seen that both inventory on the balance sheet and net income on the income statement are higher when companies use FIFO in a period of inflation. Yet, many companies have selected LIFO. Why? The reason is that LIFO results in the lowest income taxes (because of lower net income) during times of rising prices (see **Helpful Hint**). For example, at Houston Electronics, income taxes are \$750 under LIFO, compared to \$990 under FIFO. The tax savings of \$240 makes more cash available for use in the business.

Using Inventory Cost Flow Methods Consistently

Whatever cost flow method a company chooses, it should use that method consistently from one accounting period to another. This approach is often referred to as the **consistency concept**, which means that a company uses the same accounting principles and methods from year to year. Consistent application enhances the comparability of financial statements over successive time periods. In contrast, using the FIFO method one year and the LIFO method the next year would make it difficult to compare the net incomes of the two years.

Although consistent application is preferred, it does not mean that a company may never change its inventory costing method. When a company adopts a different method, it should disclose in the financial statements the change and its effects on net income. **Illustration 6.14** shows a typical disclosure, using information from recent financial statements of **Quaker Oats** (now a unit of **PepsiCo**).

ILLUSTRATION 6.14

Disclosure of change in cost flow method

Real World	Quaker Oats Notes to the Financial Statements
Note 1: Effective July 1, the Company adopted the LIFO cost flow assumption for valuing the majority of U.S. Grocery Products inventories. The Company believes that the use of the LIFO method better matches current costs with current revenues. The effect of this change on the current year was to decrease net income by \$16.0 million.	

International Insight ExxonMobil Corporation

Bloomberg/Getty Images

Is LIFO Fair?

ExxonMobil Corporation, like many U.S. companies, uses LIFO to value its inventory for financial reporting and tax purposes. In one year, this resulted in a cost of goods sold figure that was \$5.6 billion higher than under FIFO. By increasing cost of goods sold, ExxonMobil reduces net income, which reduces taxes. Critics say that LIFO provides an unfair "tax dodge." As Congress looks for more sources of tax revenue, some lawmakers favor the

elimination of LIFO. Supporters of LIFO argue that the method is conceptually sound because it matches current costs with current revenues. In addition, they point out that this matching provides protection against inflation.

International accounting standards do not allow the use of LIFO. Because of this, the net income of foreign oil companies such as **BP** and **Royal Dutch Shell** are not directly comparable to U.S. companies, which can make analysis difficult.

Source: David Reilly, "Big Oil's Accounting Methods Fuel Criticism," *Wall Street Journal* (August 8, 2006), p. C1.

What are the arguments for and against the use of LIFO? (Go to WileyPLUS for this answer and additional questions.)

DO IT! 2 | Cost Flow Methods

The accounting records of Shumway Ag Implements show the following data.

Beginning inventory	4,000 units at \$ 3
Purchases	6,000 units at \$ 4
Sales	7,000 units at \$12

Determine the cost of goods sold during the period under a periodic inventory system using (a) the FIFO method, (b) the LIFO method, and (c) the average-cost method.

Solution

Cost of goods available for sale = $(4,000 \times \$3) + (6,000 \times \$4) = \$36,000$

Ending inventory = $10,000 - 7,000 = 3,000$ units

- a. FIFO: $\$36,000 - (3,000 \times \$4) = \$24,000$
- b. LIFO: $\$36,000 - (3,000 \times \$3) = \$27,000$
- c. Average cost per unit: $[(4,000 @ \$3) + (6,000 @ \$4)] \div 10,000 = \$3.60$
Average-cost: $\$36,000 - (3,000 \times \$3.60) = \$25,200$

Related exercise material: **BE6.3, BE6.4, BE6.5, BE6.6, DO IT! 6.2, E6.4, E6.5, E6.6, E6.7, E6.8, and E6.9.**

ACTION PLAN

- Understand the periodic inventory system.
- Allocate costs between goods sold and goods on hand (ending inventory) for each cost flow method.
- Compute cost of goods sold for each method.

Effects of Inventory Errors

LEARNING OBJECTIVE 3

Indicate the effects of inventory errors on the financial statements.

Unfortunately, errors occasionally occur in accounting for inventory. In some cases, errors are caused by failure to count or price the inventory correctly. In other cases, errors occur because companies do not properly recognize the transfer of legal title to goods that are in transit. When errors occur, they affect both the income statement and the balance sheet.

Income Statement Effects

The ending inventory of one period automatically becomes the beginning inventory of the next period. Thus, inventory errors affect the computation of cost of goods sold and net income in two periods.

The effects on cost of goods sold can be computed by first entering incorrect data in the formula in **Illustration 6.15** and then substituting the correct data.

$$\text{Beginning Inventory} + \text{Cost of Goods Purchased} - \text{Ending Inventory} = \text{Cost of Goods Sold}$$

ILLUSTRATION 6.15

Formula for cost of goods sold

If **beginning** inventory is understated, cost of goods sold will be understated. If **ending** inventory is understated, cost of goods sold will be overstated. **Illustration 6.16** shows the effects of inventory errors on the current year's income statement.

ILLUSTRATION 6.16

Effects of inventory errors on current year's income statement

When Inventory Error:	Cost of Goods Sold Is:	Net Income Is:
Understates beginning inventory	Understated	Overstated
Overstates beginning inventory	Overstated	Understated
Understates ending inventory	Overstated	Understated
Overstates ending inventory	Understated	Overstated

ETHICS NOTE

Inventory fraud increases during recessions. Such fraud includes pricing inventory at amounts in excess of its actual value, or claiming to have inventory when no inventory exists. Inventory fraud usually overstates ending inventory, thereby understating cost of goods sold and creating higher income.

An error in the ending inventory of the current period will have a **reverse effect on net income of the next accounting period**. **Illustration 6.17** shows this effect. Note that the understatement of ending inventory in 2019 results in an understatement of beginning inventory in 2020 and an overstatement of net income in 2020.

Over the two years, though, total net income is correct because the errors **offset each other**. Notice that total income using incorrect data is \$35,000 (\$22,000 + \$13,000), which is the same as the total income of \$35,000 (\$25,000 + \$10,000) using correct data. Also note in this example that an error in the beginning inventory does not result in a corresponding error in the ending inventory for that period. The correctness of the ending inventory depends entirely on the accuracy of taking and costing the inventory at the balance sheet date under the periodic inventory system (see **Ethics Note**).

ILLUSTRATION 6.17 Effects of inventory errors on two years' income statements

	Sample Company Condensed Income Statements			
	2019		2020	
	Incorrect	Correct	Incorrect	Correct
Sales revenue	\$80,000	\$80,000	\$90,000	\$90,000
Beginning inventory	\$20,000	\$20,000	\$12,000	\$15,000
Cost of goods purchased	40,000	40,000	68,000	68,000
Cost of goods available for sale	60,000	60,000	80,000	83,000
Ending inventory	12,000	15,000	23,000	23,000
Cost of goods sold	48,000	45,000	57,000	60,000
Gross profit	32,000	35,000	33,000	30,000
Operating expenses	10,000	10,000	20,000	20,000
Net income	\$22,000	\$25,000	\$13,000	\$10,000
	\$3,000		\$3,000	
	Net income understated		Net income overstated	
The errors cancel. Thus, the combined total income for the 2-year period is correct.				

Balance Sheet Effects

Companies can determine the effect of ending inventory errors on the balance sheet by using the basic accounting equation: Assets = Liabilities + Owner's Equity. Errors in the ending inventory have the effects shown in **Illustration 6.18**.

ILLUSTRATION 6.18

Effects of ending inventory errors on balance sheet

Ending Inventory Error	Assets	Liabilities	Owner's Equity
Overstated	Overstated	No effect	Overstated
Understated	Understated	No effect	Understated

The effect of an error in ending inventory on the subsequent period was shown in Illustration 6.17. Note that if the error is not corrected, the combined total net income for the two periods would be correct. Thus, total owner's equity reported on the balance sheet at the end of 2020 will also be correct.

DO IT! 3 | Inventory Errors

Visual Company overstated its 2019 ending inventory by \$22,000. Determine the impact this error has on ending inventory, cost of goods sold, and owner's equity in 2019 and 2020.

Solution

	2019	2020
Ending inventory	\$22,000 overstated	No effect
Cost of goods sold	\$22,000 understated	\$22,000 overstated
Owner's equity	\$22,000 overstated	No effect

Related exercise material: BE6.7, DO IT! 6.3, E6.10, and E6.11.

ACTION PLAN

- An ending inventory error in one period will have an equal and opposite effect on cost of goods sold and net income in the next period.
- After two years, the errors have offset each other.

Inventory Statement Presentation and Analysis

LEARNING OBJECTIVE 4

Explain the statement presentation and analysis of inventory.

Presentation

As indicated in Chapter 5, inventory is classified in the balance sheet as a current asset immediately below receivables. In a multiple-step income statement, cost of goods sold is subtracted from net sales. There also should be disclosure of (1) the major inventory classifications, (2) the basis of accounting (cost, or lower-of-cost-or-net realizable value), and (3) the cost method (FIFO, LIFO, or average-cost).

Lower-of-Cost-or-Net Realizable Value

The value of inventory for companies selling high-technology or fashion goods can drop very quickly due to continual changes in technology or fashions. These circumstances sometimes call for inventory valuation methods other than those presented so far. For example, purchasing managers at **Ford** at one time decided to make a large purchase of palladium, a precious metal used in vehicle emission devices. They made this purchase because they feared a future shortage. The shortage did not materialize, and by the end of the year the price of palladium had plummeted. Ford's inventory was then worth \$1 billion less than its original cost. Do you think Ford's inventory should have been stated at cost, in accordance with the historical cost principle, or at its lower net realizable value?

As you probably reasoned, this situation requires a departure from the cost basis of accounting. When the value of inventory is lower than its cost, companies must "write down" the inventory to its net realizable value. This is done by valuing the inventory at the **lower-of-cost-or-net realizable value (LCNRV)** in the period in which the price decline occurs. LCNRV is an example of the accounting concept of **conservatism**, which means

that the best choice among accounting alternatives is the method that is least likely to overstate assets and net income.

Under the LCNRV basis, **net realizable value** refers to the net amount that a company expects to realize (receive) from the sale of inventory. Specifically, net realizable value is the estimated selling price in the normal course of business, less estimated costs to complete and sell.

Companies apply LCNRV to the items in inventory after they have used one of the inventory costing methods (specific identification, FIFO, or average-cost) to determine cost.² To illustrate the application of LCNRV, assume that Ken Tuckie TV has the following lines of merchandise with costs and net realizable values as indicated. LCNRV produces the results shown in **Illustration 6.19**. Note that the amounts shown in the final column are the lower-of-cost-or-net realizable value amounts for each item.

ILLUSTRATION 6.19

Computation of lower-of-cost-or-net realizable value

	Units	Cost per Unit	Net Realizable Value per Unit	Lower-of-Cost-or-Net Realizable Value
Flat-screen TVs	100	\$600	\$550	\$ 55,000 (\$550 × 100)
Satellite radios	500	90	104	45,000 (\$90 × 500)
DVD recorders	850	50	48	40,800 (\$48 × 850)
DVDs	3,000	5	6	15,000 (\$5 × 3,000)
Total inventory				\$155,800

Analysis

The amount of inventory carried by a company has significant economic consequences. And inventory management is a double-edged sword that requires constant attention. On the one hand, management wants to have a great variety and quantity available so that customers have a wide selection and items are always in stock. But, such a policy may incur high carrying costs (e.g., investment, storage, insurance, obsolescence, and damage). On the other hand, low inventory levels lead to stock-outs and lost sales. Common ratios used to manage and evaluate inventory levels are inventory turnover and a related measure, days in inventory.

Inventory turnover measures the number of times on average the inventory is sold during the period. Its purpose is to measure the liquidity of the inventory. The inventory turnover is computed by dividing cost of goods sold by the average inventory during the period. Unless seasonal factors are significant, average inventory can be computed from the beginning and ending inventory balances. For example, **Wal-Mart** reported in its January 31, 2016, annual report a beginning inventory of \$45,141 million, an ending inventory of \$44,469 million, and cost of goods sold for the year ended January 31, 2016, of \$360,984 million. The inventory turnover formula and computation for Wal-Mart are shown in **Illustration 6.20**.

ILLUSTRATION 6.20

Inventory turnover formula and computation for Wal-Mart

Cost of Goods Sold	÷	Average Inventory	=	Inventory Turnover
\$360,984	÷	$\frac{\$44,469 + \$45,141}{2}$	=	8.1 times

A variant of the inventory turnover is **days in inventory**. This measures the average number of days inventory is held. It is calculated as 365 divided by the inventory turnover. For example, Wal-Mart's inventory turnover of 8.1 times divided into 365 is approximately 45.1 days. This is the approximate time that it takes a company to sell the inventory once it arrives at the store.

²Special rules apply to companies that use LIFO, which are discussed in more advanced courses.

There are typical levels of inventory in every industry. Companies that are able to keep their inventory at lower levels and higher turnovers and still satisfy customer needs are the most successful.

Accounting Across the Organization Sony

© Dmitry Kutlayev/iStockphoto

Too Many TVs or Too Few?

Financial analysts closely monitor the inventory management practices of companies. For example, some analysts following **Sony** expressed concern because the company built up its inventory of televisions in an attempt to sell 25 million liquid crystal display (LCD) TVs—a 60% increase over the prior year. A year earlier, Sony had cut its inventory

levels so that its quarterly days in inventory was down to 38 days, compared to 61 days for the same quarter a year before that. But in the next year, as a result of its inventory build-up, days in inventory rose to 59 days. Management said that it didn't think that Sony's inventory levels were too high. However, analysts were concerned that the company would have to engage in very heavy discounting in order to sell off its inventory. Analysts noted that the losses from discounting can be "punishing."

Source: Daisuke Wakabayashi, "Sony Pledges to Corral Inventory," *Wall Street Journal Online* (November 2, 2010).

For Sony, what are the advantages and disadvantages of having a low days in inventory measure? (Go to WileyPLUS for this answer and additional questions.)

DO IT! 4 | LCNRV and Inventory Turnover

- a. Tracy Company sells three different types of home heating stoves (gas, wood, and pellet). The cost and net realizable value of its inventory of stoves are as follows.

	Cost	Net Realizable Value
Gas	\$ 84,000	\$ 79,000
Wood	250,000	280,000
Pellet	112,000	101,000

Determine the value of the company's inventory under the lower-of-cost-or-net realizable value approach.

Solution

The lowest value for each inventory type is gas \$79,000, wood \$250,000, and pellet \$101,000. The total inventory value is the sum of these amounts, \$430,000.

- b. Early in 2020, Westmoreland Company switched to a just-in-time inventory system. Its sales revenue, cost of goods sold, and inventory amounts for 2019 and 2020 are shown below.

	2019	2020
Sales revenue	\$2,000,000	\$1,800,000
Cost of goods sold	1,000,000	910,000
Beginning inventory	290,000	210,000
Ending inventory	210,000	50,000

Determine the inventory turnover and days in inventory for 2019 and 2020. Discuss the changes in the amount of inventory, the inventory turnover and days in inventory, and the amount of sales across the two years.

ACTION PLAN

- Determine whether cost or net realizable value is lower for each inventory type.
- Sum the lowest value of each inventory type to determine the total value of inventory.

ACTION PLAN

- To find the inventory turnover, divide cost of goods sold by average inventory.
- To determine days in inventory, divide 365 days by the inventory turnover.

Solution

	2019	2020
Inventory turnover	$\frac{\$1,000,000}{(\$290,000 + \$210,000)/2} = 4$	$\frac{\$910,000}{(\$210,000 + \$50,000)/2} = 7$
Days in inventory	$365 \div 4 = 91.3$ days	$365 \div 7 = 52.1$ days

The company experienced a very significant decline in its ending inventory as a result of the just-in-time inventory. This decline improved its inventory turnover and its days in inventory. However, its sales declined by 10%. It is possible that this decline was caused by the dramatic reduction in the amount of inventory that was on hand, which increased the likelihood of “stock-outs.” To determine the optimal inventory level, management must weigh the benefits of reduced inventory against the potential lost sales caused by stock-outs.

Related exercise material: **BE6.8, BE6.9, DO IT! 6.4, E6.12, E6.13, E6.14, and E6.15.**

ACTION PLAN (CONT.)

- Just-in-time inventory reduces the amount of inventory on hand, which reduces carrying costs. Reducing inventory levels by too much has potential negative implications for sales.

Appendix 6A**Inventory Methods and the Perpetual System****LEARNING OBJECTIVE *5**

Apply the inventory cost flow methods to perpetual inventory records.

What inventory cost flow methods can companies employ if they use a perpetual inventory system? Simple—they can use any of the inventory cost flow methods described in the chapter. To illustrate the application of the three assumed cost flow methods (FIFO, LIFO, and average-cost), we will use the data shown in **Illustration 6A.1** and in this chapter for Houston Electronics’ Astro condensers.

ILLUSTRATION 6A.1**Inventoriable units and costs**

Houston Electronics					
Astro Condensers					
Date	Explanation	Units	Unit Cost	Total Cost	Balance in Units
1/1	Beginning inventory	100	\$10	\$ 1,000	100
4/15	Purchases	200	11	2,200	300
8/24	Purchases	300	12	3,600	600
9/10	Sale	550			50
11/27	Purchases	400	13	5,200	450
					<u>\$12,000</u>

First-In, First-Out (FIFO)

Under perpetual FIFO, the company charges to cost of goods sold the cost of the earliest goods on hand **prior to each sale**. Therefore, the cost of goods sold on September 10 consists of the units on hand January 1 and the units purchased April 15 and August 24. **Illustration 6A.2** shows the inventory under a FIFO method perpetual system.

Date	Purchases	Cost of Goods Sold	Balance (in units and cost)	ILLUSTRATION 6A.2
January 1			(100 @ \$10) \$1,000	Perpetual system—FIFO
April 15	(200 @ \$11) \$2,200		(100 @ \$10) { \$3,200	
August 24	(300 @ \$12) \$3,600		(200 @ \$11) { \$6,800	
September 10		(100 @ \$10) (200 @ \$11) <u>(250 @ \$12)</u> <u>\$6,200</u>	(100 @ \$10) { \$6,800 (200 @ \$11) { \$5,800	Cost of goods sold
November 27	(400 @ \$13) \$5,200		(50 @ \$12) \$600 (400 @ \$13) { \$5,800	Ending inventory

The ending inventory in this situation is \$5,800, and the cost of goods sold is \$6,200 [(100 @ \$10) + (200 @ \$11) + (250 @ \$12)].

Compare Illustrations 6.6 and 6A.2. You can see that the results under FIFO in a perpetual system are the **same as in a periodic system**. In both cases, the ending inventory is \$5,800 and cost of goods sold is \$6,200. Regardless of the system, the first costs in are the costs assigned to cost of goods sold.

Last-In, First-Out (LIFO)

Under the LIFO method using a perpetual system, the company charges to cost of goods sold the cost of the most recent purchase prior to sale. Therefore, the cost of the goods sold on September 10 consists of all the units from the August 24 and April 15 purchases plus 50 of the units in beginning inventory. **Illustration 6A.3** shows the computation of the ending inventory under the LIFO method.

Date	Purchases	Cost of Goods Sold	Balance (in units and cost)	ILLUSTRATION 6A.3
January 1			(100 @ \$10) \$1,000	Perpetual system—LIFO
April 15	(200 @ \$11) \$2,200		(100 @ \$10) { \$3,200	
August 24	(300 @ \$12) \$3,600		(200 @ \$11) { \$6,800	
September 10		(300 @ \$12) (200 @ \$11) <u>(50 @ \$10)</u> <u>\$6,300</u>	(50 @ \$10) \$500	Cost of goods sold
November 27	(400 @ \$13) \$5,200		(50 @ \$10) { \$5,700 (400 @ \$13) { \$5,700	Ending inventory

The use of LIFO in a perpetual system will usually produce cost allocations that differ from those using LIFO in a periodic system. In a perpetual system, the latest units purchased **prior to each sale** are allocated to cost of goods sold. In contrast, in a periodic system, the latest units purchased **during the period** are allocated to cost of goods sold. Thus, when a purchase is made after the last sale, the LIFO periodic system will apply this purchase to the previous sale.

See Illustration 6.9, which shows the proof that the 400 units at \$13 purchased on November 27 applied to the sale of 550 units on September 10.

Under the LIFO perpetual system in Illustration 6A.3, the 400 units at \$13 purchased on November 27 are all applied to the ending inventory. The ending inventory in this LIFO perpetual illustration is \$5,700, and cost of goods sold is \$6,300, as compared to the LIFO periodic Illustration 6.8 where the ending inventory is \$5,000 and cost of goods sold is \$7,000.

Average-Cost

The average-cost method in a perpetual inventory system is called the **moving-average method**. Under this method, the company computes a new average **after each purchase**, by dividing the cost of goods available for sale by the units on hand. The average cost is then applied to (1) the units sold, to determine the cost of goods sold, and (2) the remaining units on hand, to determine the ending inventory amount. **Illustration 6A.4** shows the application of the moving-average cost method by Houston Electronics (computations of the moving-average unit cost are shown after Illustration 6A.4).

ILLUSTRATION 6A.4

**Perpetual system—
moving-average method**

	Date	Purchases	Cost of Goods Sold	Balance (in units and cost)
Cost of goods sold	January 1			(100 @ \$10) \$1,000
	April 15	(200 @ \$11) \$2,200		(300 @ \$10.667) \$3,200
	August 24	(300 @ \$12) \$3,600		(600 @ \$11.333) \$6,800
	September 10		(550 @ \$11.333)	(50 @ \$11.333) \$ 567
			\$6,233	
Ending inventory	November 27	(400 @ \$13) \$5,200		(450 @ \$12.816) \$5,767

As indicated, Houston Electronics computes **a new average each time it makes a purchase**.

1. On April 15, after Houston buys 200 units for \$2,200, a total of 300 units costing \$3,200 (\$1,000 + \$2,200) are on hand. The average unit cost is \$10.667 (\$3,200 ÷ 300).
2. On August 24, after Houston buys 300 units for \$3,600, a total of 600 units costing \$6,800 (\$1,000 + \$2,200 + \$3,600) are on hand. The average cost per unit is \$11.333 (\$6,800 ÷ 600).
3. On September 10, to compute cost of goods sold, Houston uses this unit cost of \$11.333 until it makes another purchase, when the company computes a new unit cost. Accordingly, the unit cost of the 550 units sold on September 10 is \$11.333, and the total cost of goods sold is \$6,233.
4. On November 27, following the purchase of 400 units for \$5,200, there are 450 units on hand costing \$5,767 (\$567 + \$5,200) with a new average cost of \$12.816 (\$5,767 ÷ 450).

Compare this moving-average cost under the perpetual inventory system to Illustration 6.11, which shows the average-cost method under a periodic inventory system.

Appendix 6B

Estimating Inventories

LEARNING OBJECTIVE *6

Describe the two methods of estimating inventories.

In the chapter, we assumed that a company would be able to physically count its inventory. What if it cannot? What if the inventory were destroyed by fire or flood, for example? In that case, the company would use an estimate.

Two circumstances explain why companies sometimes estimate inventories. First, a casualty such as fire, flood, or earthquake may make it impossible to take a physical inventory. Second, managers may want monthly or quarterly financial statements, but a physical inventory is taken only annually. The need for estimating inventories occurs primarily with a periodic inventory system because of the absence of perpetual inventory records.

There are two widely used methods of estimating inventories: (1) the gross profit method, and (2) the retail inventory method.

Gross Profit Method

The **gross profit method** estimates the cost of ending inventory by applying a gross profit rate to net sales. This method is relatively simple but effective. Accountants, auditors, and managers frequently use the gross profit method to test the reasonableness of the ending inventory amount. It will detect large errors.

To use this method, a company needs to know its net sales, cost of goods available for sale, and gross profit rate. The company then can estimate its gross profit for the period. **Illustration 6B.1** shows the formulas for using the gross profit method.

Step 1:	Net Sales	–	Estimated Gross Profit	=	Estimated Cost of Goods Sold
Step 2:	Cost of Goods Available for Sale	–	Estimated Cost of Goods Sold	=	Estimated Cost of Ending Inventory

ILLUSTRATION 6B.1

Gross profit method formulas

To illustrate, assume that Kishwaukee Company wishes to prepare an income statement for the month of January. Its records show net sales of \$200,000, beginning inventory \$40,000, and cost of goods purchased \$120,000. In the preceding year, the company realized a 30% gross profit rate. It expects to earn the same rate this year. Given these facts and assumptions, Kishwaukee can compute the estimated cost of the ending inventory at January 31 under the gross profit method as shown in **Illustration 6B.2**.

Step 1:				
Net sales		\$ 200,000		
Less: Estimated gross profit ($30\% \times \$200,000$)		60,000		
Estimated cost of goods sold		<u><u>\$ 140,000</u></u>		
Step 2:				
Beginning inventory		\$ 40,000		
Cost of goods purchased		120,000		
Cost of goods available for sale		160,000		
Less: Estimated cost of goods sold		140,000		
Estimated cost of ending inventory		<u><u>\$ 20,000</u></u>		

ILLUSTRATION 6B.2

Example of gross profit method

The gross profit method is based on the assumption that the gross profit rate will remain constant. But, it may not remain constant, due to a change in merchandising policies or in market conditions. In such cases, the company should adjust the rate to reflect current operating conditions. In some cases, companies can obtain a more accurate estimate by applying this method on a department or product-line basis.

Note that companies should not use the gross profit method to prepare financial statements at the end of the year. These statements should be based on a physical inventory count.

Retail Inventory Method

A retail store such as **Home Depot**, **Ace Hardware**, or **Walmart** has thousands of different types of merchandise at low unit costs. In such cases, it is difficult and time-consuming to apply unit costs to inventory quantities. An alternative is to use the **retail inventory method** to estimate the cost of inventory. Most retail companies can establish a relationship between cost and sales price. The company then applies the cost-to-retail percentage to the ending inventory at retail prices to determine inventory at cost.

Under the retail inventory method, a company's records must show both the cost and retail value of the goods available for sale. **Illustration 6B.3** presents the formulas for using the retail inventory method.

ILLUSTRATION 6B.3

Retail inventory method formulas

Step 1: Goods Available for Sale at Retail	$-$	Net Sales	$=$	Ending Inventory at Retail
Step 2: Goods Available for Sale at Cost	\div	Goods Available for Sale at Retail	$=$	Cost-to-Retail Ratio
Step 3: Ending Inventory at Retail	\times	Cost-to-Retail Ratio	$=$	Estimated Cost of Ending Inventory

We can demonstrate the logic of the retail method by using unit-cost data. Assume that Ortiz Inc. has marked 10 units purchased at \$7 to sell for \$10 per unit. Thus, the cost-to-retail ratio is 70% ($\$70 \div \100). If four units remain unsold, their retail value is \$40 ($4 \times \10), and their cost is \$28 ($\$40 \times 70\%$). This amount agrees with the total cost of goods on hand on a per unit basis ($4 \times \$7$).

Illustration 6B.4 shows application of the retail method for Valley West. Note that it is not necessary to take a physical inventory to determine the estimated cost of goods on hand at any given time.

ILLUSTRATION 6B.4

Application of retail inventory method

	At Cost	At Retail
Beginning inventory	\$14,000	\$ 21,500
Goods purchased	<u>61,000</u>	<u>78,500</u>
Goods available for sale	<u>\$75,000</u>	<u>100,000</u>
Less: Net sales		<u>70,000</u>
Step (1) Ending inventory at retail =		\$ 30,000
Step (2) Cost-to-retail ratio = $\\$75,000 \div \\$100,000 = 75\%$		
Step (3) Estimated cost of ending inventory = $\\$30,000 \times 75\% = \\$22,500$		

HELPFUL HINT

In determining inventory at retail, companies use selling prices of the units.

The retail inventory method also facilitates taking a physical inventory at the end of the year. Valley West can value the goods on hand at the prices marked on the merchandise, and then apply the cost-to-retail ratio to the goods on hand at retail to determine the ending inventory at cost (see **Helpful Hint**).

The major disadvantage of the retail method is that it is an averaging technique. Thus, it may produce an incorrect inventory valuation if the mix of the ending inventory is not representative of the mix in the goods available for sale. Assume, for example, that the cost-to-retail ratio of 75% for Valley West consists of equal proportions of inventory items that have cost-to-retail ratios of 70%, 75%, and 80%. If the ending inventory contains only items with a 70% ratio, an incorrect inventory cost will result. Companies can minimize this problem by applying the retail method on a department or product-line basis.

Review and Practice

Learning Objectives Review

1 Discuss how to classify and determine inventory.

Merchandisers need only one inventory classification, merchandise inventory, to describe the different items that make up total inventory. Manufacturers, on the other hand, usually classify inventory into three categories: finished goods, work in process, and raw materials. To determine inventory quantities, manufacturers (1) take a physical inventory of goods on hand and (2) determine the ownership of goods in transit or on consignment.

2 Apply inventory cost flow methods and discuss their financial effects.

The primary basis of accounting for inventories is cost. Cost of goods available for sale includes (a) cost of beginning inventory and (b) cost of goods purchased. The inventory cost flow methods are specific identification and three assumed cost flow methods—FIFO, LIFO, and average-cost.

When prices are rising, the first-in, first-out (FIFO) method results in lower cost of goods sold and higher net income than the other methods. The last-in, first-out (LIFO) method results in the lowest income taxes. The reverse is true when prices are falling. In the balance sheet, FIFO results in an ending inventory that is closest to current value. Inventory under LIFO is the farthest from current value.

3 Indicate the effects of inventory errors on the financial statements.

In the income statement of the current year: (a) If beginning inventory is understated, net income is overstated. The reverse occurs if beginning inventory is overstated. (b) If ending inventory is overstated, net income is overstated. If ending inventory is understated, net income is understated. In the following period, its effect on net income for that period is reversed, and total net income for the two years will be correct.

In the balance sheet: Ending inventory errors will have the same effect on total assets and total owner's equity and no effect on liabilities.

4 Explain the statement presentation and analysis of inventory.

Inventory is classified in the balance sheet as a current asset immediately below receivables. There also should be disclosure of (1) the major inventory classifications, (2) the basis of accounting, and (3) the cost method.

Companies use the lower-of-cost-or-net realizable value (LCNRV) basis when the net realizable value is less than cost. Under LCNRV, companies recognize the loss in the period in which the price decline occurs.

The inventory turnover is cost of goods sold divided by average inventory. To convert it to average days in inventory, divide 365 days by the inventory turnover.

***5 Apply the inventory cost flow methods to perpetual inventory records.**

Under FIFO and a perpetual inventory system, companies charge to cost of goods sold the cost of the earliest goods on hand prior to each sale. Under LIFO and a perpetual system, companies charge to cost of goods sold the cost of the most recent purchase prior to sale. Under the moving-average (average-cost) method and a perpetual system, companies compute a new average cost after each purchase.

***6 Describe the two methods of estimating inventories.**

The two methods of estimating inventories are the gross profit method and the retail inventory method. Under the gross profit method, companies apply a gross profit rate to net sales to determine estimated gross profit and cost of goods sold. They then subtract estimated cost of goods sold from cost of goods available for sale to determine the estimated cost of the ending inventory.

Under the retail inventory method, companies compute a cost-to-retail ratio by dividing the cost of goods available for sale by the retail value of the goods available for sale. They then apply this ratio to the ending inventory at retail to determine the estimated cost of the ending inventory.

Glossary Review

Average-cost method Inventory costing method that uses the weighted-average unit cost to allocate to ending inventory and cost of goods sold the cost of goods available for sale. (p. 6-11).

Consigned goods Goods held for sale by one party although ownership of the goods is retained by another party. (p. 6-6).

Consistency concept Dictates that a company use the same accounting principles and methods from year to year. (p. 6-14).

Days in inventory Measure of the average number of days inventory is held; calculated as 365 divided by inventory turnover. (p. 6-18).

Finished goods inventory Manufactured items that are completed and ready for sale. (p. 6-3).

First-in, first-out (FIFO) method Inventory costing method that assumes that the costs of the earliest goods purchased are the first to be recognized as cost of goods sold. (p. 6-9).

FOB (free on board) destination Freight terms indicating that ownership of the goods remains with the seller until the goods reach the buyer. (p. 6-5).

FOB (free on board) shipping point Freight terms indicating that ownership of the goods passes to the buyer when the public carrier accepts the goods from the seller. (p. 6-5).

***Gross profit method** A method for estimating the cost of the ending inventory by applying a gross profit rate to net sales and subtracting estimated cost of goods sold from cost of goods available for sale. (p. 6-23).

Inventory turnover A ratio that measures the number of times on average the inventory sold during the period; computed by dividing cost of goods sold by the average inventory during the period. (p. 6-18).

Just-in-time (JIT) inventory Inventory system in which companies manufacture or purchase goods only when needed for use. (p. 6-3).

Last-in, first-out (LIFO) method Inventory costing method that assumes the costs of the latest units purchased are the first to be allocated to cost of goods sold. (p. 6-10).

Lower-of-cost-or-net realizable value (LCNRV) basis A basis whereby inventory is stated at the lower of either its cost or its net realizable value. (p. 6-17).

***Moving-average method** A new average is computed after each purchase, by dividing the cost of goods available for sale by the units on hand. (p. 6-22).

Net realizable value Net amount that a company expects to realize (receive) from the sale of inventory. Specifically, it is the estimated selling price in the normal course of business, less estimated costs to complete and sell. (p. 6-18)

Raw materials Basic goods that will be used in production but have not yet been placed into production. (p. 6-3).

***Retail inventory method** A method for estimating the cost of the ending inventory by applying a cost-to-retail ratio to the ending inventory at retail. (p. 6-24).

Specific identification method An actual physical flow costing method in which items still in inventory are specifically costed to arrive at the total cost of the ending inventory. (p. 6-7).

Weighted-average unit cost Average cost that is weighted by the number of units purchased at each unit cost. (p. 6-11).

Work in process That portion of manufactured inventory that has been placed into the production process but is not yet complete. (p. 6-3).

Practice Multiple-Choice Questions

1. (LO 1) When is a physical inventory usually taken?

- a. When the company has its greatest amount of inventory.
- b. When a limited number of goods are being sold or received.
- c. At the end of the company's fiscal year.
- d. Both (b) and (c).

2. (LO 1) Which of the following should **not** be included in the physical inventory of a company?

- a. Goods held on consignment from another company.
- b. Goods shipped on consignment to another company.
- c. Goods in transit from another company shipped FOB shipping point.
- d. None of the above.

3. (LO 1) As a result of a thorough physical inventory, Railway Company determined that it had inventory worth \$180,000 at December 31, 2020. This count did not take into consideration the following facts: Rogers Consignment store currently has goods worth \$35,000 on its sales floor that belong to Railway but are being sold on consignment by Rogers. The selling price of these goods is \$50,000. Railway purchased \$13,000 of goods that were shipped on December 27, FOB destination, that will be received by Railway on January 3. Determine the correct amount of inventory that Railway should report.

- a. \$230,000.
- c. \$228,000.
- b. \$215,000.
- d. \$193,000.

4. (LO 2) Cost of goods available for sale consists of two elements: beginning inventory and

- a. ending inventory.
- b. cost of goods purchased.
- c. cost of goods sold.
- d. All of the answer choices are correct.

5. (LO 2) Poppins Company has the following:

	Units	Unit Cost
Inventory, Jan. 1	8,000	\$11
Purchase, June 19	13,000	12
Purchase, Nov. 8	5,000	13

If 9,000 units are on hand at December 31, the cost of the ending inventory under FIFO is:

- a. \$99,000.
- c. \$113,000.
- b. \$108,000.
- d. \$117,000.

6. (LO 2) Using the data in Question 5, the cost of the ending inventory under LIFO is:

- a. \$113,000.
- c. \$99,000.
- b. \$108,000.
- d. \$100,000.

7. (LO 2) Hansel Electronics has the following:

	Units	Unit Cost
Inventory, Jan. 1	5,000	\$ 8
Purchase, April 2	15,000	\$10
Purchase, Aug. 28	20,000	\$12

If Hansel has 7,000 units on hand at December 31, the cost of ending inventory under the average-cost method is:

- a. \$84,000.
- c. \$56,000.
- b. \$70,000.
- d. \$75,250.

8. (LO 2) In periods of rising prices, LIFO will produce:

- a. higher net income than FIFO.
- b. the same net income as FIFO.
- c. lower net income than FIFO.
- d. higher net income than average-cost.

9. (LO 2) Considerations that affect the selection of an inventory costing method do **not** include:

- a. tax effects.
- b. balance sheet effects.
- c. income statement effects.
- d. perpetual vs. periodic inventory system.

10. (LO 3) Falk Company's ending inventory is understated \$4,000. The effects of this error on the current year's cost of goods sold and net income, respectively, are:

- a. understated, overstated.
- b. overstated, understated.

- c. overstated, overstated.
d. understated, understated.
- 11. (LO 3)** Pauline Company overstated its inventory by \$15,000 at December 31, 2019. It did not correct the error in 2019 or 2020. As a result, Pauline's owner's equity was:
- overstated at December 31, 2019, and understated at December 31, 2020.
 - overstated at December 31, 2019, and properly stated at December 31, 2020.
 - understated at December 31, 2019, and understated at December 31, 2020.
 - overstated at December 31, 2019, and overstated at December 31, 2020.
- 12. (LO 4)** The lower-of-cost-or-net realizable value rule for inventory is an example of the application of:
- the conservatism convention.
 - the historical cost principle.
 - the materiality concept.
 - the economics entity assumption.
- 13. (LO 4)** Norton Company purchased 1,000 widgets and has 200 widgets in its ending inventory at a cost of \$91 each and a net realizable value of \$80 each. The ending inventory under lower-of-cost-or-net realizable value is:
- \$91,000.
 - \$80,000.
 - \$18,200.
 - \$16,000.
- 14. (LO 4)** Santana Company had beginning inventory of \$80,000, ending inventory of \$110,000, cost of goods sold of \$285,000, and sales of \$475,000. Santana's days in inventory is:
- 73 days.
 - 121.7 days.
 - 102.5 days.
 - 84.5 days.
- 15. (LO 4)** Which of these would cause the inventory turnover to increase the most?
- Increasing the amount of inventory on hand.
 - Keeping the amount of inventory on hand constant but increasing sales.
 - Keeping the amount of inventory on hand constant but decreasing sales.
 - Decreasing the amount of inventory on hand and increasing sales.
- *16. (LO 5)** In a perpetual inventory system:
- LIFO cost of goods sold will be the same as in a periodic inventory system.
 - average costs are a simple average of unit costs incurred.
 - a new average is computed under the average-cost method after each sale.
 - FIFO cost of goods sold will be the same as in a periodic inventory system.
- *17. (LO 6)** King Company has sales of \$150,000 and cost of goods available for sale of \$135,000. If the gross profit rate is 30%, the estimated cost of the ending inventory under the gross profit method is:
- \$15,000.
 - \$30,000.
 - \$45,000.
 - \$75,000.

Solutions

- 1. d.** A physical inventory is usually taken when a limited number of goods are being sold or received, and at the end of the company's fiscal year. Choice (a) is incorrect because a physical inventory count is usually taken when the company has the least, not greatest, amount of inventory. Choices (b) and (c) are correct, but (d) is the better answer.
- 2. a.** Goods held on consignment should not be included because another company has title (ownership) to the goods. The other choices are incorrect because (b) goods shipped on consignment to another company and (c) goods in transit from another company shipped FOB shipping point should be included in a company's ending inventory. Choice (d) is incorrect because (a) is not included in the physical inventory.
- 3. b.** The inventory held on consignment by Rogers should be included in Railway's inventory balance at cost (\$35,000). The purchased goods of \$13,000 should not be included in inventory until January 3 because the goods are shipped FOB destination. Therefore, the correct amount of inventory is \$215,000 (\$180,000 + \$35,000), not (a) \$230,000, (c) \$228,000, or (d) \$193,000.
- 4. b.** Cost of goods available for sale consists of beginning inventory and cost of goods purchased, not (a) ending inventory or (c) cost of goods sold. Therefore, choice (d) All of the above is also incorrect.
- 5. c.** Under FIFO, ending inventory will consist of 5,000 units from the Nov. 8 purchase and 4,000 units from the June 19 purchase. Therefore, ending inventory is $(5,000 \times \$13) + (4,000 \times \$12) = \$113,000$, not (a) \$99,000, (b) \$108,000, or (d) \$117,000.
- 6. d.** Under LIFO, ending inventory will consist of 8,000 units from the inventory at Jan. 1 and 1,000 units from the June 19 purchase. Therefore, ending inventory is $(8,000 \times \$11) + (1,000 \times \$12) = \$100,000$, not (a) \$113,000, (b) \$108,000, or (c) \$99,000.
- 7. d.** Under the average-cost method, total cost of goods available for sale needs to be calculated in order to determine average cost per unit. The total cost of goods available is $\$430,000 = (5,000 \times \$8) + (15,000 \times \$10) + (20,000 \times \$12)$. The average cost per unit = $(\$430,000 / 40,000 \text{ total units available for sale}) = \10.75 . Therefore, ending inventory is $(\$10.75 \times 7,000) = \$75,250$, not (a) \$84,000, (b) \$70,000, or (c) \$56,000.
- 8. c.** In periods of rising prices, LIFO will produce lower net income than FIFO, not (a) higher than FIFO or (b) the same as FIFO. Choice (d) is incorrect because in periods of rising prices, LIFO will produce lower net income than average-cost. LIFO therefore charges the highest inventory cost against revenues in a period of rising prices.
- 9. d.** Perpetual vs. periodic inventory system is not one of the factors that affect the selection of an inventory costing method. The other choices are incorrect because (a) tax effects, (b) balance sheet effects, and (c) income statement effects all affect the selection of an inventory costing method.
- 10. b.** Because ending inventory is too low, cost of goods sold will be too high (overstated) and since cost of goods sold (an expense) is too high, net income will be too low (understated). Therefore, the other choices are incorrect.

11. b. Owner's equity is overstated by \$15,000 at December 31, 2019, and is properly stated at December 31, 2020. An ending inventory error in one period will have an equal and opposite effect on cost of goods sold and net income in the next period; after two years, the errors have offset each other. The other choices are incorrect because owner's equity (a) is properly stated, not understated, at December 31, 2020; (c) is overstated, not understated, by \$15,000 at December 31, 2019, and is properly stated, not understated, at December 31, 2020; and (d) is properly stated at December 31, 2020, not overstated.

12. a. Conservatism means to use the lowest value for assets and revenues when in doubt. The other choices are incorrect because (b) historical cost means that companies value assets at the original cost, (c) materiality means that an amount is large enough to affect a decision-maker, and (d) economic entity means to keep the company's transactions separate from the transactions of other entities.

13. d. Under the LCNRV basis, net realizable value is defined as the estimated selling price in the normal course of business, less estimated costs to complete and sell. Therefore, ending inventory would be valued at $200 \text{ widgets} \times \$80 \text{ each} = \$16,000$ not (a) \$91,000, (b) \$80,000, or (c) \$18,200.

14. b. Santana's days in inventory = $365/\text{Inventory turnover} = 365/[\$285,000/(\$80,000 + \$10,000/2)] = 121.7$ days, not (a) 73 days, (c) 102.5 days, or (d) 84.5 days.

15. d. Decreasing the amount of inventory on hand will cause the denominator to decrease, causing inventory turnover to increase.

Increasing sales will cause the numerator of the ratio to increase (higher sales means higher COGS), thus causing inventory turnover to increase even more. The other choices are incorrect because (a) increasing the amount of inventory on hand causes the denominator of the ratio to increase while the numerator stays the same, causing inventory turnover to decrease; (b) keeping the amount of inventory on hand constant but increasing sales will cause inventory turnover to increase because the numerator of the ratio will increase (higher sales means higher COGS) while the denominator stays the same, which will result in a lesser inventory increase than decreasing amount of inventory on hand and increasing sales; and (c) keeping the amount of inventory on hand constant but decreasing sales will cause inventory turnover to decrease because the numerator of the ratio will decrease (lower sales means lower COGS) while the denominator stays the same.

***16. d.** FIFO cost of goods sold is the same under both a periodic and a perpetual inventory system. The other choices are incorrect because (a) LIFO cost of goods sold is not the same under a periodic and a perpetual inventory system; (b) average costs are based on a moving average of unit costs, not an average of unit costs; and (c) a new average is computed under the average-cost method after each purchase, not sale.

***17. b.** $\text{COGS} = \text{Sales} (\$150,000) - \text{Gross profit} (\$150,000 \times 30\%) = \$105,000$. $\text{Ending inventory} = \text{Cost of goods available for sale} (\$135,000) - \text{COGS} (\$105,000) = \$30,000$, not (a) \$15,000, (c) \$45,000, or (d) \$75,000.

Practice Brief Exercises

Compute ending inventory using FIFO and LIFO.

- 1. (LO 2)** In its first month of operations, Moncada Company made three purchases of merchandise in the following sequence: (1) 200 units at \$7, (2) 300 units at \$8, and (3) 150 units at \$9. Assuming there are 220 units on hand, compute the cost of the ending inventory under the (a) FIFO method and (b) LIFO method. Moncada uses a periodic inventory system.

Solution

- 1. a.** The ending inventory under FIFO consists of (150 units at \$9) + (70 units at \$8) for a total allocation of \$1,910 (\$1,350 + \$560).
- b.** The ending inventory under LIFO consists of (200 units at \$7) + (20 units at \$8) for a total allocation of \$1,560 (\$1,400 + \$160).

Determine correct income statement amounts.

- 2. (LO 3) Financial Statement** Avisail Company reports net income of \$80,000 in 2020. However, ending inventory was overstated \$9,000. What is the correct net income for 2020? What effect, if any, will this error have on total assets as reported in the balance sheet at December 31, 2020?

Solution

- 2.** The overstatement of ending inventory caused cost of goods sold to be understated \$9,000 and net income to be overstated \$9,000. The correct net income for 2020 is \$71,000 (\$80,000 – \$9,000). Total assets in the balance sheet will be overstated by the amount that ending inventory is overstated, \$9,000.

Compute inventory turnover and days in inventory.

- 3. (LO 4)** At December 31, 2020, the following information was available for Garcia Company: ending inventory \$30,000, beginning inventory \$42,000, cost of goods sold \$240,000, and sales revenue \$400,000. Calculate inventory turnover and days in inventory for Garcia Company.

Solution

$$3. \text{ Inventory turnover: } \frac{\$240,000}{(\$30,000 + \$42,000)/2} = \frac{\$240,000}{\$36,000} = 6.67$$

$$\text{Days in inventory: } \frac{365}{6.67} = 54.7 \text{ days}$$

Practice Exercises

- 1. (LO 1)** Matt Clark, an auditor with Grant CPAs, is performing a review of Parson Company's inventory account. Parson did not have a good year and top management is under pressure to boost reported income. According to its records, the inventory balance at year-end was \$600,000. However, the following information was not considered when determining that amount.

Determine the correct inventory amount.

1. The physical count did not include goods purchased by Parson with a cost of \$30,000 that were shipped FOB destination on December 28 and did not arrive at Parson's warehouse until January 3.
2. Included in the company's count were goods with a cost of \$150,000 that the company is holding on consignment. The goods belong to Alvarez Corporation.
3. Included in the inventory account was \$21,000 of office supplies that were stored in the warehouse and were to be used by the company's supervisors and managers during the coming year.
4. The company received an order on December 28 that was boxed and was sitting on the loading dock awaiting pick-up on December 31. The shipper picked up the goods on January 1 and delivered them on January 6. The shipping terms were FOB shipping point. The goods had a selling price of \$29,000 and a cost of \$19,000. The goods were not included in the count because they were sitting on the dock.
5. On December 29, Parson shipped goods with a selling price of \$56,000 and a cost of \$40,000 to Decco Corporation FOB shipping point. The goods arrived on January 3. Decco had only ordered goods with a selling price of \$10,000 and a cost of \$6,000. However, a Parson's sales manager had authorized the shipment and said that if Decco wanted to ship the goods back next week, it could.
6. Included in the count was \$27,000 of goods that were parts for a machine that the company no longer made. Given the high-tech nature of Parson's products, it was unlikely that these obsolete parts had any other use. However, management would prefer to keep them on the books at cost, "since that is what we paid for them, after all."

Instructions

Prepare a schedule to determine the correct inventory amount. Provide explanations for each item above, saying why you did or did not make an adjustment for each item.

Solution

1. Ending inventory—as reported	\$600,000
1. No effect—title does not pass to Parson until goods are received (Jan. 3).	0
2. Subtract from inventory: The goods belong to Alvarez Corporation. Parson is merely holding them for Alvarez.	(150,000)
3. Subtract from inventory: Office supplies should be carried in a separate account. They are not considered inventory held for resale.	(21,000)
4. Add to inventory: The goods belong to Parson until they are shipped (Jan. 1).	19,000
5. Add to inventory: Decco ordered goods with a cost of \$6,000. Parson should record the corresponding sales revenue of \$10,000. Parson's decision to ship extra "unordered" goods does not constitute a sale. The manager's statement that Decco could ship the goods back indicates that Parson knows this overshipment is not a legitimate sale. The manager acted unethically in an attempt to improve Parson's reported income by overshipping.	34,000
6. Subtract from inventory: GAAP require that inventory be valued at the lower-of-cost-or-net realizable value. Obsolete parts should be adjusted from cost to zero if they have no other use.	(27,000)
Correct inventory	<u><u>\$455,000</u></u>

Determine effects of inventory errors.

2. (LO 3) Rhode Software reported cost of goods sold as follows.

	2019	2020
Beginning inventory	\$ 27,000	\$ 40,000
Cost of goods purchased	<u>200,000</u>	<u>235,000</u>
Cost of goods available for sale	227,000	275,000
Ending inventory	40,000	45,000
Cost of goods sold	<u>\$187,000</u>	<u>\$230,000</u>

Rhode made two errors: (1) 2019 ending inventory was overstated \$4,000, and (2) 2020 ending inventory was understated \$9,000.

Instructions

Compute the correct cost of goods sold for each year.

Solution

2.	2019	2020
Beginning inventory	\$ 27,000	\$ 36,000
Cost of goods purchased	<u>200,000</u>	<u>235,000</u>
Cost of goods available for sale	227,000	271,000
Corrected ending inventory	<u>(36,000)^a</u>	<u>(54,000)^b</u>
Cost of goods sold	<u>\$191,000</u>	<u>\$217,000</u>

^a\$40,000 – \$4,000 = \$36,000; ^b\$45,000 + \$9,000 = \$54,000

Determine LCNRV valuation.

3. (LO 4) Creve Couer Camera uses the lower-of-cost-or-net realizable value basis for its inventory. The following data are available at December 31.

	Units	Cost per Unit	Net Realizable Value per Unit
Cameras:			
Minolta	5	\$160	\$156
Canon	7	145	153
Light Meters:			
Vivitar	12	120	114
Kodak	10	130	142

Instructions

What amount should be reported on Creve Couer Camera's financial statements, assuming the lower-of-cost-or-net realizable value rule is applied?

Solution

- 3.

	Cost per Unit	Net Realizable Value per Unit	Lower-of-Cost or-Net Realizable Value	Units	Inventory at Lower-of-Cost-or-Net Realizable Value
Cameras:					
Minolta	\$160	\$156	\$156	5	\$ 780
Canon	145	153	145	7	1,015
Light Meters:					
Vivitar	120	114	114	12	1,368
Kodak	130	142	130	10	1,300
Total					<u>\$4,463</u>

Practice Problems

- 1. (LO 2)** Englehart Company has the following inventory, purchases, and sales data for the month of March.

Inventory:	March 1	200 units @ \$4.00	\$ 800
Purchases:	March 10	500 units @ \$4.50	2,250
	March 20	400 units @ \$4.75	1,900
	March 30	300 units @ \$5.00	1,500
Sales:	March 15	500 units	
	March 25	400 units	

Compute inventory and cost of goods sold using three cost flow methods in a periodic inventory system.

The physical inventory count on March 31 shows 500 units on hand.

Instructions

Under a **periodic inventory system**, determine the cost of inventory on hand at March 31 and the cost of goods sold for March under (a) FIFO, (b) LIFO, and (c) average-cost. (For average-cost, carry cost per unit to three decimal places.)

Solution

1. The cost of goods available for sale is \$6,450, as follows.

Inventory:	200 units @ \$4.00	\$ 800
Purchases:	March 10 500 units @ \$4.50	2,250
	March 20 400 units @ \$4.75	1,900
	March 30 300 units @ \$5.00	1,500
Total goods available for sale		<u><u>\$6,450</u></u>

a.

FIFO Method

Ending inventory:

Date	Units	Unit Cost	Total Cost
March 30	300	\$5.00	\$1,500
March 20	200	4.75	950
Cost of goods sold: \$6,450 – \$2,450 =			<u><u>\$4,000</u></u>

b.

LIFO Method

Ending inventory:

Date	Units	Unit Cost	Total Cost
March 1	200	\$4.00	\$ 800
March 10	300	4.50	1,350
Cost of goods sold: \$6,450 – \$2,150 =			<u><u>\$4,300</u></u>

c.

Average-Cost Method

Average unit cost: $\$6,450 \div 1,400 = \4.607

Ending inventory: $500 \times \$4.607 =$ \$2,303.50

Cost of goods sold: $\$6,450 – \$2,303.50 =$ \$4,146.50

- *2. (LO 5) Practice Problem 1 showed cost of goods sold computations under a periodic inventory system. Now let's assume that Englehart Company uses a perpetual inventory system. The company has the same inventory, purchases, and sales data for the month of March as shown earlier:

Inventory:	March 1	200 units @ \$4.00	\$ 800
Purchases:	March 10	500 units @ \$4.50	2,250
	March 20	400 units @ \$4.75	1,900
	March 30	300 units @ \$5.00	1,500
Sales:	March 15	500 units	
	March 25	400 units	

Compute inventory and cost of goods sold using three cost flow methods in a perpetual inventory system.

The physical inventory count on March 31 shows 500 units on hand.

Instructions

Under a **perpetual inventory system**, determine the cost of inventory on hand at March 31 and the cost of goods sold for March under (a) FIFO, (b) LIFO, and (c) moving-average cost.

Solution

2. The cost of goods available for sale is \$6,450, as follows.

Inventory:	200 units @ \$4.00	\$ 800
Purchases:		
March 10	500 units @ \$4.50	2,250
March 20	400 units @ \$4.75	1,900
March 30	300 units @ \$5.00	1,500
Total:		<u>\$6,450</u>

Under a **perpetual inventory system**, the cost of goods sold under each cost flow method is as follows.

a.

FIFO Method			
Date	Purchases	Cost of Goods Sold	Balance
March 1			(200 @ \$4.00) \$ 800
March 10	(500 @ \$4.50) \$2,250		(200 @ \$4.00) } \$3,050 (500 @ \$4.50)
March 15		(200 @ \$4.00) (300 @ \$4.50)	(200 @ \$4.50) \$ 900
March 20	(400 @ \$4.75) \$1,900		(200 @ \$4.50) } \$2,800 (400 @ \$4.75)
March 25		(200 @ \$4.50) (200 @ \$4.75)	(200 @ \$4.75) \$ 950
March 30	(300 @ \$5.00) \$1,500		(200 @ \$4.75) } \$2,450 (300 @ \$5.00)
Ending inventory	<u>\$2,450</u>	Cost of goods sold: \$2,150 + \$1,850 = <u>\$4,000</u>	

b.

LIFO Method			
Date	Purchases	Cost of Goods Sold	Balance
March 1			(200 @ \$4.00) \$ 800
March 10	(500 @ \$4.50) \$2,250		(200 @ \$4.00) } \$3,050 (500 @ \$4.50)
March 15		(500 @ \$4.50) \$2,250	(200 @ \$4.00) \$ 800
March 20	(400 @ \$4.75) \$1,900		(200 @ \$4.00) } \$2,700 (400 @ \$4.75)
March 25		(400 @ \$4.75) \$1,900	(200 @ \$4.00) \$ 800
March 30	(300 @ \$5.00) \$1,500		(200 @ \$4.00) } \$2,300 (300 @ \$5.00)
Ending inventory	<u>\$2,300</u>	Cost of goods sold: \$2,250 + \$1,900 = <u>\$4,150</u>	

c.

Moving-Average Cost Method			
Date	Purchases	Cost of Goods Sold	Balance
March 1			(200 @ \$4.00) \$ 800
March 10	(500 @ \$4.50) \$2,250		(700 @ \$4.357) \$3,050
March 15		(500 @ \$4.357) \$2,179	(200 @ \$4.357) \$ 871
March 20	(400 @ \$4.75) \$1,900		(600 @ \$4.618) \$2,771
March 25		(400 @ \$4.618) \$1,847	(200 @ \$4.618) \$ 924
March 30	(300 @ \$5.00) \$1,500		(500 @ \$4.848) \$2,424
Ending inventory	<u>\$2,424</u>	Cost of goods sold: \$2,179 + \$1,847 = <u>\$4,026</u>	

WileyPLUS

Brief Exercises, DO IT! Exercises, Exercises, Problems, and many additional resources are available for practice in WileyPLUS.

Note: All asterisked Questions, Exercises, and Problems relate to material in the appendices to the chapter.

Questions

1. “The key to successful business operations is effective inventory management.” Do you agree? Explain.
2. An item must possess two characteristics to be classified as inventory by a merchandiser. What are these two characteristics?
3. Your friend Ben Johnson has been hired to help take the physical inventory in Pearson Hardware Store. Explain to Ben what this job will entail.
4. a. Jovad Company ships merchandise to Martin Company on December 30. The merchandise reaches the buyer on January 6. Indicate the terms of sale that will result in the goods being included in (1) Jovad’s December 31 inventory, and (2) Martin’s December 31 inventory.
b. Under what circumstances should Jovad Company include consigned goods in its inventory?
5. Topp Hat Shop received a shipment of hats for which it paid the wholesaler \$2,970. The price of the hats was \$3,000 but Topp was given a \$30 cash discount and required to pay freight charges of \$50. What amount will Topp record for inventory? Why?
6. Explain the difference between the terms FOB shipping point and FOB destination.
7. Leah Clement believes that the allocation of cost of goods available for sale should be based on the actual physical flow of the goods. Explain to Leah why this may be both impractical and inappropriate.
8. What is the major advantage and the major disadvantage of the specific identification method of inventory costing?
9. “The selection of an inventory cost flow method is a decision made by accountants.” Do you agree? Explain. Once a method has been selected, what accounting requirement applies?
10. Which assumed inventory cost flow method:
 - a. usually parallels the actual physical flow of merchandise?
 - b. divides cost of goods available by total units available for sale to determine a unit cost?
 - c. assumes that the latest units purchased are the first to be sold?
11. In a period of rising prices, the inventory reported in Bert Company’s balance sheet is close to the current cost of the inventory, whereas Ernie Company’s inventory is considerably below its current cost. Identify the inventory cost flow method being used by each company. Which company probably has been reporting the higher gross profit?
12. Oscar Company has been using the FIFO cost flow method during a prolonged period of inflation. During the same time period, Oscar has been paying out all of its net income as dividends. What adverse effects may result from this policy?
13. Kyle Adams is studying for the next accounting mid-term examination. What should Kyle know about (a) departing from the cost basis of accounting for inventories and (b) the meaning of “net realizable value” in the lower-of-cost-or-net realizable value method?
14. Hendrix Entertainment Center has 5 TVs on hand at the balance sheet date that cost \$400 each. The net realizable value is \$380 per unit. Under the lower-of-cost-or-net realizable value basis of accounting for inventories, what value should Hendrix report for the TVs on the balance sheet? Why?
15. Warnke Stores has 20 toasters on hand at the balance sheet date. Each costs \$27. The net realizable value is \$30 per unit. Under the lower-of-cost-or-net realizable value basis of accounting for inventories, what value should Warnke report for the toasters on the balance sheet? Why?
16. Sayaovang Company discovers in 2020 that its ending inventory at December 31, 2019, was \$7,000 understated. What effect will this error have on (a) 2019 net income, (b) 2020 net income, and (c) the combined net income for the 2 years?
17. Dreher Company’s balance sheet shows Inventory \$162,800. What additional disclosures should be made?
18. Under what circumstances might inventory turnover be too high? That is, what possible negative consequences might occur?
19. What inventory cost flow does **Apple** use for its inventories? (*Hint:* You will need to examine the notes for Apple’s financial statements.)
- *20. “When perpetual inventory records are kept, the results under the FIFO and LIFO methods are the same as they would be in a periodic inventory system.” Do you agree? Explain.
- *21. How does the average-cost method of inventory costing differ between a perpetual inventory system and a periodic inventory system?
- *22. When is it necessary to estimate inventories?
- *23. Both the gross profit method and the retail inventory method are based on averages. For each method, indicate the average used, how it is determined, and how it is applied.
- *24. Pawlowski Company has net sales of \$400,000 and cost of goods available for sale of \$300,000. If the gross profit rate is 35%, what is the estimated cost of the ending inventory? Show computations.
- *25. Cinderella Shoe Shop had goods available for sale in 2020 with a retail price of \$120,000. The cost of these goods was \$84,000. If sales during the period were \$80,000, what is the ending inventory at cost using the retail inventory method?

Brief Exercises

Identify items to be included in taking a physical inventory.

BE6.1 (LO 1) Peosta Company identifies the following items for possible inclusion in the taking of a physical inventory. Indicate whether each item should be included or excluded from the inventory taking.

- Goods shipped on consignment by Peosta to another company.
- Goods in transit from a supplier shipped FOB destination.
- Goods held on consignment from another company.

Determine ending inventory amount.

BE6.2 (LO 1) Stallman Company took a physical inventory on December 31 and determined that goods costing \$200,000 were on hand. Not included in the physical count were \$25,000 of goods purchased from Pelzer Corporation, FOB shipping point, and \$22,000 of goods sold to Alvarez Company for \$30,000, FOB destination. Both the Pelzer purchase and the Alvarez sale were in transit at year-end. What amount should Stallman report as its December 31 inventory?

Compute ending inventory using FIFO and LIFO.

BE6.3 (LO 2) In its first month of operations, Weatherall Company made three purchases of merchandise in the following sequence: (1) 300 units at \$6, (2) 400 units at \$7, and (3) 200 units at \$8. Assuming there are 380 units on hand, compute the cost of the ending inventory under the (a) FIFO method and (b) LIFO method. Weatherall uses a periodic inventory system.

Compute the ending inventory using average-cost.

BE6.4 (LO 2) Data for Weatherall Company are presented in BE6.3. Compute the cost of the ending inventory under the average-cost method, assuming there are 380 units on hand.

Explain the financial statement effect of inventory cost flow assumptions.

BE6.5 (LO 2) Financial Statement The management of Mastronardo Corp. is considering the effects of inventory-costing methods on its financial statements and its income tax expense. Assuming that the price the company pays for inventory is increasing, which method will:

- Provide the highest net income?
- Provide the highest ending inventory?
- Result in the lowest income tax expense?
- Result in the most stable earnings over a number of years?

Explain the financial statement effect of inventory cost flow assumptions.

BE6.6 (LO 2) Financial Statement In its first month of operation, Hoffman Company purchased 100 units of inventory for \$6, then 200 units for \$7, and finally 140 units for \$8. At the end of the month, 180 units remained. Compute the amount of phantom profit that would result if the company used FIFO rather than LIFO. Explain why this amount is referred to as phantom profit. The company uses the periodic method.

Determine correct income statement amounts.

BE6.7 (LO 3) Larkin Company reports net income of \$90,000 in 2020. However, ending inventory was understated \$7,000. What is the correct net income for 2020? What effect, if any, will this error have on total assets as reported in the balance sheet at December 31, 2020?

Determine the LCNRV valuation using inventory categories.

BE6.8 (LO 4) Cruz Video Center accumulates the following cost and net realizable data at December 31.

Inventory Categories	Cost Data	Net Realizable Data
Cameras	\$12,000	\$12,300
Camcorders	9,500	9,700
Blu-ray players	14,000	12,900

Compute the lower-of-cost-or-net realizable value valuation for the company's total inventory.

Compute inventory turnover and days in inventory.

BE6.9 (LO 4) At December 31, 2020, the following information was available for E. Hetzel Company: ending inventory \$40,000, beginning inventory \$56,000, cost of goods sold \$270,000, and sales revenue \$380,000. Calculate inventory turnover and days in inventory for E. Hetzel Company.

Apply cost flow methods to perpetual inventory records.

***BE6.10 (LO 5)** Rosario Department Store uses a perpetual inventory system. Data for product E2-D2 include the following purchases.

Date	Number of Units	Unit Price
May 7	50	\$10
July 28	30	13

On June 1, Rosario sold 26 units, and on August 27, 40 more units. Prepare the perpetual inventory schedule for the above transactions using (a) FIFO, (b) LIFO, and (c) moving-average cost. (Round average cost per unit to nearest cent.)

***BE6.11 (LO 6)** At May 31, Brunet Company has net sales of \$340,000 and cost of goods available for sale of \$230,000. Compute the estimated cost of the ending inventory, assuming the gross profit rate is 35%.

Apply the gross profit method.

***BE6.12 (LO 6)** On June 30, Joanna Fabrics has the following data pertaining to the retail inventory method. Goods available for sale: at cost \$38,000; at retail \$50,000; net sales \$40,000; and ending inventory at retail \$10,000. Compute the estimated cost of the ending inventory using the retail inventory method.

Apply the retail inventory method.

DO IT! Exercises

DO IT! 6.1 (LO 1) Gresa Company just took its physical inventory. The count of inventory items on hand at the company's business locations resulted in a total inventory cost of \$300,000. In reviewing the details of the count and related inventory transactions, you have discovered the following.

1. Gresa has sent inventory costing \$26,000 on consignment to Alissa Company. All of this inventory was at Alissa's showrooms on December 31.
2. The company did not include in the count inventory (cost, \$20,000) that was sold on December 28, terms FOB shipping point. The goods were in transit on December 31.
3. The company did not include in the count inventory (cost, \$14,000) that was purchased with terms of FOB shipping point. The goods were in transit on December 31.

Apply rules of ownership to determine inventory cost.

Compute the correct December 31 inventory.

DO IT! 6.2 (LO 2) The accounting records of Americo Electronics show the following data.

Beginning inventory	3,000 units at \$5
Purchases	8,000 units at \$7
Sales	9,400 units at \$10

Compute cost of goods sold under different cost flow methods.

Determine cost of goods sold during the period under a periodic inventory system using (a) the FIFO method, (b) the LIFO method, and (c) the average-cost method. (Round unit cost to nearest tenth of a cent.)

DO IT! 6.3 (LO 3) Vanida Company understated its 2019 ending inventory by \$27,000. Determine the impact this error has on ending inventory, cost of goods sold, and owner's equity in 2019 and 2020.

Determine effect of inventory error.

DO IT! 6.4a (LO 4) Cody Company sells three different categories of tools (small, medium, and large). The cost and net realizable value of its inventory of tools are as follows.

	Cost	Net Realizable Value
Small	\$ 64,000	\$ 73,000
Medium	290,000	260,000
Large	152,000	171,000

Compute inventory value under LCNRV.

Determine the value of the company's inventory under the lower-of-cost-or-net realizable value approach.

DO IT! 6.4b (LO 4) Early in 2020, Yeng Company switched to a just-in-time inventory system. Its sales revenue, cost of goods sold, and inventory amounts for 2019 and 2020 are shown below.

	2019	2020
Sales	\$3,120,000	\$3,713,000
Cost of goods sold	1,200,000	1,425,000
Beginning inventory	180,000	220,000
Ending inventory	220,000	100,000

Compute inventory turnover and assess inventory level.

Determine the inventory turnover and days in inventory for 2019 and 2020. Discuss the changes in the amount of inventory, the inventory turnover and days in inventory, and the amount of sales across the two years.

Exercises

Determine the correct inventory amount.

E6.1 (LO 1) Tri-State Bank and Trust is considering giving Wilfred Company a loan. Before doing so, management decides that further discussions with Wilfred's accountant may be desirable. One area of particular concern is the inventory account, which has a year-end balance of \$297,000. Discussions with the accountant reveal the following.

1. Wilfred shipped goods costing \$38,000 to Lilja Company, FOB shipping point, on December 28. The goods are not expected to arrive at Lilja until January 12. The goods were not included in the physical inventory because they were not in the warehouse.
2. The physical count of the inventory did not include goods costing \$95,000 that were shipped to Wilfred FOB destination on December 27 and were still in transit at year-end.
3. Wilfred received goods costing \$22,000 on January 2. The goods were shipped FOB shipping point on December 26 by Brent Co. The goods were not included in the physical count.
4. Wilfred shipped goods costing \$35,000 to Jesse Co., FOB destination, on December 30. The goods were received at Jesse on January 8. They were not included in Wilfred's physical inventory.
5. Wilfred received goods costing \$44,000 on January 2 that were shipped FOB destination on December 29. The shipment was a rush order that was supposed to arrive December 31. This purchase was included in the ending inventory of \$297,000.

Instructions

Determine the correct inventory amount on December 31.

Determine the correct inventory amount.

E6.2 (LO 1) Kari Downs, an auditor with Wheeler CPAs, is performing a review of Depue Company's inventory account. Depue did not have a good year, and top management is under pressure to boost reported income. According to its records, the inventory balance at year-end was \$740,000. However, the following information was not considered when determining that amount.

1. Included in the company's count were goods with a cost of \$250,000 that the company is holding on consignment. The goods belong to Kroeger Corporation.
2. The physical count did not include goods purchased by Depue with a cost of \$40,000 that were shipped FOB destination on December 28 and did not arrive at Depue warehouse until January 3.
3. Included in the inventory account was \$14,000 of office supplies that were stored in the warehouse and were to be used by the company's supervisors and managers during the coming year.
4. The company received an order on December 29 that was boxed and sitting on the loading dock awaiting pick-up on December 31. The shipper picked up the goods on January 1 and delivered them on January 6. The shipping terms were FOB shipping point. The goods had a selling price of \$40,000 and a cost of \$28,000. The goods were not included in the count because they were sitting on the dock.
5. On December 29, Depue shipped goods with a selling price of \$80,000 and a cost of \$60,000 to Macchia Sales Corporation FOB shipping point. The goods arrived on January 3. Macchia had only ordered goods with a selling price of \$10,000 and a cost of \$8,000. However, a sales manager at Depue had authorized the shipment and said that if Macchia wanted to ship the goods back next week, it could.
6. Included in the count was \$40,000 of goods that were parts for a machine that the company no longer made. Given the high-tech nature of Depue's products, it was unlikely that these obsolete parts had any other use. However, management would prefer to keep them on the books at cost, "since that is what we paid for them, after all."

Instructions

Prepare a schedule to determine the correct inventory amount. Provide explanations for each item above, saying why you did or did not make an adjustment for each item.

Identify items in inventory.

E6.3 (LO 1) Gato Inc. had the following inventory situations to consider at January 31, its year-end.

- a. Goods held on consignment for Steele Corp. since December 12.
- b. Goods shipped on consignment to Logan Holdings Inc. on January 5.
- c. Goods shipped to a customer, FOB destination, on January 29 that are still in transit.
- d. Goods shipped to a customer, FOB shipping point, on January 29 that are still in transit.
- e. Goods purchased FOB destination from a supplier on January 25 that are still in transit.

- f. Goods purchased FOB shipping point from a supplier on January 25 that are still in transit.
 g. Office supplies on hand at January 31.

Instructions

Identify which of the preceding items should be included in inventory. If the item should not be included in inventory, state in what account, if any, it should have been recorded.

- E6.4 (LO 2)** On December 1, Kiyak Electronics Ltd. has three DVD players left in stock. All are identical, all are priced to sell at \$150. One of the three DVD players left in stock, with serial #1012, was purchased on June 1 at a cost of \$100. Another, with serial #1045, was purchased on November 1 for \$88. The last player, serial #1056, was purchased on November 30 for \$80.

Calculate cost of goods sold using specific identification and FIFO.

Instructions

- Calculate the cost of goods sold using the FIFO periodic inventory method assuming that two of the three players were sold by the end of December, Kiyak Electronics' year-end.
- If Kiyak Electronics used the specific identification method instead of the FIFO method, how might it alter its earnings by "selectively choosing" which particular players to sell to the two customers? What would Kiyak's cost of goods sold be if the company wished to minimize earnings? Maximize earnings?
- Which of the two inventory methods do you recommend that Kiyak use? Explain why.

- E6.5 (LO 2)** Elsa's Boards sells a snowboard, Xpert, that is popular with snowboard enthusiasts. Information relating to Elsa's purchases of Xpert snowboards during September is shown below. During the same month, 121 Xpert snowboards were sold. Elsa's uses a periodic inventory system.

Compute inventory and cost of goods sold using FIFO and LIFO.

Date	Explanation	Units	Unit Cost	Total Cost
Sept. 1	Inventory	26	\$ 97	\$ 2,522
Sept. 12	Purchases	45	102	4,590
Sept. 19	Purchases	20	104	2,080
Sept. 26	Purchases	50	105	5,250
	Totals	141		\$14,442
		<u><u> </u></u>	<u><u> </u></u>	<u><u> </u></u>

Instructions

- Compute the ending inventory at September 30 and cost of goods sold using the FIFO and LIFO methods. Prove the amount allocated to cost of goods sold under each method.
- For both FIFO and LIFO, calculate the sum of ending inventory and cost of goods sold. What do you notice about the answers you found for each method?

- E6.6 (LO 2)** Ballas Co. uses a periodic inventory system. Its records show the following for the month of May, in which 68 units were sold.

Compute inventory and cost of goods sold using FIFO and LIFO.

		Units	Unit Cost	Total Cost
May 1	Inventory	30	\$ 8	\$240
15	Purchases	25	11	275
24	Purchases	35	12	420
	Totals	90		\$935
		<u><u> </u></u>	<u><u> </u></u>	<u><u> </u></u>

Instructions

Compute the ending inventory at May 31 and cost of goods sold using the FIFO and LIFO methods. Prove the amount allocated to cost of goods sold under each method.

- E6.7 (LO 2)** Moath Company reports the following for the month of June.

Compute inventory and cost of goods sold using FIFO and LIFO.

		Units	Unit Cost	Total Cost
June 1	Inventory	200	\$5	\$1,000
12	Purchase	400	6	2,400
23	Purchase	300	7	2,100
30	Inventory	100		

Instructions

- Compute the cost of the ending inventory and the cost of goods sold under (1) FIFO and (2) LIFO.
- Which costing method gives the higher ending inventory? Why?
- Which method results in the higher cost of goods sold? Why?

Compute inventory under FIFO, LIFO, and average-cost.

E6.8 (LO 2) Shawn Company had 100 units in beginning inventory at a total cost of \$10,000. The company purchased 200 units at a total cost of \$26,000. At the end of the year, Shawn had 75 units in ending inventory.

Instructions

- Compute the cost of the ending inventory and the cost of goods sold under (1) FIFO, (2) LIFO, and (3) average-cost.
- Which cost flow method would result in the highest net income?
- Which cost flow method would result in inventories approximating current cost in the balance sheet?
- Which cost flow method would result in Shawn paying the least taxes in the first year?

Compute inventory and cost of goods sold using average-cost.

E6.9 (LO 2) Inventory data for Moath Company are presented in E6.7.

Instructions

- Compute the cost of the ending inventory and the cost of goods sold using the average-cost method.
- Will the results in (a) be higher or lower than the results under (1) FIFO and (2) LIFO?
- Why is the average unit cost not \$6?

Determine effects of inventory errors.

E6.10 (LO 3) Elliott's Hardware reported cost of goods sold as follows.

	2019	2020
Beginning inventory	\$ 20,000	\$ 30,000
Cost of goods purchased	<u>150,000</u>	<u>175,000</u>
Cost of goods available for sale	170,000	205,000
Ending inventory	<u>30,000</u>	<u>35,000</u>
Cost of goods sold	<u>\$140,000</u>	<u>\$170,000</u>

Elliott's made two errors: (1) 2019 ending inventory was overstated \$3,000, and (2) 2020 ending inventory was understated \$5,000.

Instructions

Compute the correct cost of goods sold for each year.

Prepare correct income statements.

E6.11 (LO 3) Financial Statement Writing Smart Watch Company reported the following income statement data for a 2-year period.

	2019	2020
Sales revenue	\$220,000	\$250,000
Cost of goods sold		
Beginning inventory	32,000	44,000
Cost of goods purchased	<u>173,000</u>	<u>202,000</u>
Cost of goods available for sale	205,000	246,000
Ending inventory	<u>44,000</u>	<u>52,000</u>
Cost of goods sold	<u>161,000</u>	<u>194,000</u>
Gross profit	<u>\$ 59,000</u>	<u>\$ 56,000</u>

Smart uses a periodic inventory system. The inventories at January 1, 2019, and December 31, 2020, are correct. However, the ending inventory at December 31, 2019, was overstated \$6,000.

Instructions

- Prepare correct income statement data for the 2 years.
- What is the cumulative effect of the inventory error on total gross profit for the 2 years?
- Explain in a letter to the president of Smart Watch Company what has happened, i.e., the nature of the error and its effect on the financial statements.

Determine ending inventory under LCNRV.

E6.12 (LO 4) Freeze Frame Camera Shop uses the lower-of-cost-or-net realizable value basis for its inventory. The following data are available at December 31.

<u>Item</u>	<u>Units</u>	<u>Unit Cost</u>	<u>Net Realizable Value</u>
Cameras:			
Minolta	5	\$170	\$156
Canon	6	150	152
Light meters:			
Vivitar	10	125	115
Kodak	14	120	135

Instructions

Determine the amount of the ending inventory by applying the lower-of-cost-or-net realizable value basis.

E6.13 (LO 4) Charapata Company applied FIFO to its inventory and got the following results for its ending inventory.

Compute lower-of-cost-or-net realizable value.

Cameras	100 units at a cost per unit of \$65
Blu-ray players	150 units at a cost per unit of \$75
iPods	125 units at a cost per unit of \$80

The net realizable value at year-end was cameras \$71, Blu-ray players \$67, and iPods \$78.

Instructions

Determine the amount of ending inventory at lower-of-cost-or-net realizable value.

E6.14 (LO 4) This information is available for Abdullah's Photo Corporation for 2018, 2019, and 2020.

Compute inventory turnover, days in inventory, and gross profit rate.

	<u>2018</u>	<u>2019</u>	<u>2020</u>
Beginning inventory	\$ 100,000	\$ 300,000	\$ 400,000
Ending inventory	300,000	400,000	480,000
Cost of goods sold	900,000	1,152,000	1,300,000
Sales revenue	1,200,000	1,600,000	1,900,000

Instructions

Calculate inventory turnover (round to two decimal places), days in inventory (round to one decimal place), and gross profit rate (from Chapter 5, round to nearest percentage) for Abdullah's Photo Corporation for 2018, 2019, and 2020. Comment on any trends.

E6.15 (LO 4) The cost of goods sold computations for Sooner Company and Later Company are shown below.

Compute inventory turnover and days in inventory.

	<u>Sooner Company</u>	<u>Later Company</u>
Beginning inventory	\$ 45,000	\$ 71,000
Cost of goods purchased	200,000	290,000
Cost of goods available for sale	245,000	361,000
Ending inventory	55,000	69,000
Cost of goods sold	<u>\$190,000</u>	<u>\$292,000</u>

Instructions

- Compute inventory turnover (round to two decimal places) and days in inventory (round to nearest day) for each company.
- Which company moves its inventory more quickly?

***E6.16 (LO 5)** Ehrhart Appliance uses a perpetual inventory system. For its flat-screen television sets, the January 1 inventory was 3 sets at \$600 each. On January 10, Ehrhart purchased 6 units at \$660 each. The company sold 2 units on January 8 and 5 units on January 15.

Apply cost flow methods to perpetual records.

Instructions

Compute the ending inventory under (a) FIFO, (b) LIFO, and (c) moving-average cost.

***E6.17 (LO 5)** Moath Company reports the following for the month of June.

Calculate inventory and cost of goods sold using three cost flow methods in a perpetual inventory system.

<u>Date</u>	<u>Explanation</u>	<u>Units</u>	<u>Unit Cost</u>	<u>Total Cost</u>
June 1	Inventory	200	\$5	\$1,000
12	Purchase	400	6	2,400
23	Purchase	300	7	2,100
30	Inventory	100		

Instructions

- Calculate the cost of the ending inventory and the cost of goods sold for each cost flow assumption, using a perpetual inventory system. Assume a sale of 440 units occurred on June 15 for a selling price of \$8 and a sale of 360 units on June 27 for \$9.
- How do the results differ from the answers to E6.7 and E6.9?
- Why is the average unit cost not $\$6 [(\$5 + \$6 + \$7) \div 3 = \$6]$?

Apply cost flow methods to perpetual records.

***E6.18 (LO 5)** Information about Elsa's Boards is presented in E6.5. Additional data regarding Elsa's sales of Xpert snowboards are provided below. Assume that Elsa's uses a perpetual inventory system.

Date	Units	Unit Price	Total Revenue
Sept. 5	12	\$199	\$ 2,388
Sept. 16	50	199	9,950
Sept. 29	59	209	12,331
Totals	121		\$24,669

Instructions

- Compute ending inventory at September 30 using FIFO, LIFO, and moving-average cost.
- Compare ending inventory using a perpetual inventory system to ending inventory using a periodic inventory system (from E6.5).
- Which inventory cost flow method (FIFO, LIFO) gives the same ending inventory value under both periodic and perpetual? Which method gives different ending inventory values?

Use the gross profit method to estimate inventory.

***E6.19 (LO 6)** Shereen Company reported the following information for November and December 2020.

	November	December
Cost of goods purchased	\$536,000	\$ 610,000
Inventory, beginning-of-month	130,000	120,000
Inventory, end-of-month	120,000	?
Sales revenue	840,000	1,000,000

Shereen's ending inventory at December 31 was destroyed in a fire.

Instructions

- Compute the gross profit rate for November.
- Using the gross profit rate for November, determine the estimated cost of inventory lost in the fire.

Determine merchandise lost using the gross profit method of estimating inventory.

***E6.20 (LO 6)** The inventory of Hang Company was destroyed by fire on March 1. From an examination of the accounting records, the following data for the first 2 months of the year are obtained: Sales Revenue \$51,000, Sales Returns and Allowances \$1,000, Purchases \$31,200, Freight-In \$1,200, and Purchase Returns and Allowances \$1,400.

Instructions

Determine the merchandise lost by fire, assuming:

- A beginning inventory of \$20,000 and a gross profit rate of 30% on net sales.
- A beginning inventory of \$30,000 and a gross profit rate of 40% on net sales.

Determine ending inventory at cost using retail method.

***E6.21 (LO 6)** Kicks Shoe Store uses the retail inventory method for its two departments, Women's Shoes and Men's Shoes. The following information for each department is obtained.

Item	Women's Shoes	Men's Shoes
Beginning inventory at cost	\$ 25,000	\$ 45,000
Cost of goods purchased at cost	110,000	136,300
Net sales	178,000	185,000
Beginning inventory at retail	46,000	60,000
Cost of goods purchased at retail	179,000	185,000

Instructions

Compute the estimated cost of the ending inventory for each department under the retail inventory method.

Problems: Set A

P6.1A (LO 1) Houghton Limited is trying to determine the value of its ending inventory as of February 28, 2020, the company's year-end. The following transactions occurred, and the accountant asked your help in determining whether they should be recorded or not.

Determine items and amounts to be recorded in inventory.

- a. On February 26, Houghton shipped goods costing \$800 to a customer and charged the customer \$1,000. The goods were shipped with terms FOB shipping point and the receiving report indicates that the customer received the goods on March 2.
- b. On February 26, Crain Inc. shipped goods to Houghton under terms FOB shipping point. The invoice price was \$450 plus \$30 for freight. The receiving report indicates that the goods were received by Houghton on March 2.
- c. Houghton had \$720 of inventory isolated in the warehouse. The inventory is designated for a customer who has requested that the goods be shipped on March 10.
- d. Also included in Houghton's warehouse is \$700 of inventory that Korenic Producers shipped to Houghton on consignment.
- e. On February 26, Houghton issued a purchase order to acquire goods costing \$900. The goods were shipped with terms FOB destination on February 27. Houghton received the goods on March 2.
- f. On February 26, Houghton shipped goods to a customer under terms FOB destination. The invoice price was \$390; the cost of the items was \$240. The receiving report indicates that the goods were received by the customer on March 2.
- g. Houghton had damaged goods set aside in the warehouse because they are no longer saleable. These goods originally cost \$400, and Houghton had expected to sell these items for \$600.

Instructions

For each of the preceding transactions, specify whether the item in question should be included in ending inventory, and if so, at what amount. For each item that is not included in ending inventory, indicate who owns it and in what account, if any, it should have been recorded.

P6.2A (LO 2) Glee Distribution markets CDs of the performing artist Unique. At the beginning of October, Glee had in beginning inventory 2,000 of Unique's CDs with a unit cost of \$7. During October, Glee made the following purchases of Unique's CDs.

Determine cost of goods sold and ending inventory using FIFO, LIFO, and average-cost with analysis.

Oct. 3	2,500 @ \$8	Oct. 19	3,000 @ \$10
Oct. 9	3,500 @ \$9	Oct. 25	4,000 @ \$11

During October, 10,900 units were sold. Glee uses a periodic inventory system.

Instructions

- a. Determine the cost of goods available for sale.
- b. Determine (1) the ending inventory and (2) the cost of goods sold under each of the assumed cost flow methods (FIFO, LIFO, and average-cost). Prove the accuracy of the cost of goods sold under the FIFO and LIFO methods.
- c. Which cost flow method results in (1) the highest inventory amount for the balance sheet and (2) the highest cost of goods sold for the income statement?

b. (2) Cost of goods sold:

FIFO	\$ 94,500
LIFO	\$108,700
Average	\$101,370

P6.3A (LO 2) Financial Statement Sekhon Company had a beginning inventory on January 1 of 160 units of Product 4-18-15 at a cost of \$20 per unit. During the year, the following purchases were made.

Determine cost of goods sold and ending inventory, using FIFO, LIFO, and average-cost with analysis.

Mar. 15	400 units at \$23	Sept. 4	330 units at \$26
July 20	250 units at \$24	Dec. 2	100 units at \$29

1,000 units were sold. Sekhon Company uses a periodic inventory system.

Instructions

- a. Determine the cost of goods available for sale.
- b. Determine (1) the ending inventory, and (2) the cost of goods sold under each of the assumed cost flow methods (FIFO, LIFO, and average-cost). Prove the accuracy of the cost of goods sold under the FIFO and LIFO methods.
- c. Which cost flow method results in (1) the highest inventory amount for the balance sheet, and (2) the highest cost of goods sold for the income statement?

b. (2) Cost of goods sold:

FIFO	\$23,340
LIFO	\$24,840
Average	\$24,097

Compute ending inventory, prepare income statements, and answer questions using FIFO and LIFO.

P6.4A (LO 2) Financial Statement Writing The management of Gresa Inc. is reevaluating the appropriateness of using its present inventory cost flow method, which is average-cost. The company requests your help in determining the results of operations for 2020 if either the FIFO or the LIFO method had been used. For 2020, the accounting records show these data:

Inventories		Purchases and Sales	
Beginning (7,000 units)	\$14,000	Total net sales (180,000 units)	\$747,000
Ending (17,000 units)		Total cost of goods purchased (190,000 units)	466,000

Purchases were made quarterly as follows.

Quarter	Units	Unit Cost	Total Cost
1	50,000	\$2.20	\$110,000
2	40,000	2.35	94,000
3	40,000	2.50	100,000
4	60,000	2.70	162,000
	<u>190,000</u>		<u>\$466,000</u>

Operating expenses were \$130,000, and the company's income tax rate is 40%.

Instructions

- a. Gross profit:
 FIFO \$312,900
 LIFO \$303,000

- a. Prepare comparative condensed income statements for 2020 under FIFO and LIFO. (Show computations of ending inventory.)
- b. Answer the following questions for management.
- Which cost flow method (FIFO or LIFO) produces the more meaningful inventory amount for the balance sheet? Why?
 - Which cost flow method (FIFO or LIFO) produces the more meaningful net income? Why?
 - Which cost flow method (FIFO or LIFO) is more likely to approximate the actual physical flow of goods? Why?
 - How much more cash will be available for management under LIFO than under FIFO? Why?
 - Will gross profit under the average-cost method be higher or lower than FIFO? Than LIFO? (Note: It is not necessary to quantify your answer.)

Calculate ending inventory, cost of goods sold, gross profit, and gross profit rate under periodic method; compare results.

P6.5A (LO 2) You are provided with the following information for Koetteritz Inc. for the month ended June 30, 2020. Koetteritz uses the periodic method for inventory.

Date	Description	Quantity	Unit Cost or Selling Price
June 1	Beginning inventory	40	\$40
June 4	Purchase	135	43
June 10	Sale	110	70
June 11	Sale return	15	70
June 18	Purchase	55	46
June 18	Purchase return	10	46
June 25	Sale	65	76
June 28	Purchase	35	50

Instructions

- a. (iii) Gross profit:
 LIFO \$4,330
 FIFO \$4,830
 Average \$4,546.90

- a. Calculate (i) ending inventory, (ii) cost of goods sold, (iii) gross profit, and (iv) gross profit rate under each of the following methods.
 (1) LIFO. (2) FIFO. (3) Average-cost.
- b. Compare results for the three cost flow assumptions.

Compare specific identification, FIFO, and LIFO under periodic method; use cost flow assumption to justify price increase.

P6.6A (LO 2) Financial Statement You are provided with the following information for Gobler Inc. Gobler Inc. uses the periodic method of accounting for its inventory transactions.

- March 1 Beginning inventory 2,000 liters at a cost of 60¢ per liter.
- March 3 Purchased 2,500 liters at a cost of 65¢ per liter.
- March 5 Sold 2,300 liters for \$1.05 per liter.
- March 10 Purchased 4,000 liters at a cost of 72¢ per liter.
- March 20 Purchased 2,500 liters at a cost of 80¢ per liter.
- March 30 Sold 5,200 liters for \$1.25 per liter.

Instructions

- a. Prepare partial income statements for 2020 through gross profit, and calculate the value of ending inventory that would be reported on the balance sheet, under each of the following cost flow assumptions. (Round ending inventory and cost of goods sold to the nearest dollar.)

1. Specific identification method assuming:

- (i) The March 5 sale consisted of 1,000 liters from the March 1 beginning inventory and 1,300 liters from the March 3 purchase; and
- (ii) The March 30 sale consisted of the following number of units sold from beginning inventory and each purchase: 450 liters from March 1; 550 liters from March 3; 2,900 liters from March 10; 1,300 liters from March 20.

2. FIFO.

3. LIFO.

- b. How can companies use a cost flow method to justify price increases? Which cost flow method would best support an argument to increase prices?

P6.7A (LO 2) Financial Statement Writing The management of Danica Co. asks your help in determining the comparative effects of the FIFO and LIFO inventory cost flow methods. For 2020, the accounting records provide the following data.

Inventory, January 1 (10,000 units)	\$ 47,000
Cost of 100,000 units purchased	532,000
Selling price of 84,000 units sold	735,000
Operating expenses	140,000

Units purchased consisted of 35,000 units at \$5.10 on May 10; 35,000 units at \$5.30 on August 15; and 30,000 units at \$5.60 on November 20. Income taxes are 30%.

Instructions

- a. Prepare comparative condensed income statements for 2020 under FIFO and LIFO. (Show computations of ending inventory.)

- b. Answer the following questions for management.

1. Which inventory cost flow method produces the most meaningful inventory amount for the balance sheet? Why?
2. Which inventory cost flow method produces the most meaningful net income? Why?
3. Which inventory cost flow method is most likely to approximate actual physical flow of the goods? Why?
4. How much additional cash will be available for management under LIFO than under FIFO? Why?
5. How much of the gross profit under FIFO is illusory in comparison with the gross profit under LIFO?

***P6.8A (LO 5)** Dempsey Inc. is a retailer operating in British Columbia. Dempsey uses the perpetual inventory method. All sales returns from customers result in the goods being returned to inventory; the inventory is not damaged. Assume that there are no credit transactions; all amounts are settled in cash. You are provided with the following information for Dempsey Inc. for the month of January 2020.

Date	Description	Quantity	Unit Cost or Selling Price
January 1	Beginning inventory	100	\$15
January 5	Purchase	140	18
January 8	Sale	110	28
January 10	Sale return	10	28
January 15	Purchase	55	20
January 16	Purchase return	5	20
January 20	Sale	90	32
January 25	Purchase	20	22

Instructions

- a. For each of the following cost flow assumptions, calculate (i) cost of goods sold, (ii) ending inventory, and (iii) gross profit.

1. LIFO.

2. FIFO.

3. Moving-average cost. (Round cost per unit to three decimal places.)

- b. Compare results for the three cost flow assumptions.

a. Gross profit:

1. Specific identification	\$3,715
----------------------------	---------

2. FIFO	\$3,930
---------	---------

3. LIFO	\$3,385
---------	---------

Compute ending inventory, prepare income statements, and answer questions using FIFO and LIFO.

a. Net income

FIFO	\$113,120
LIFO	\$101,220

Calculate cost of goods sold and ending inventory under LIFO, FIFO, and moving-average cost under the perpetual system; compare gross profit under each assumption.

a. (iii) Gross profit:

LIFO	\$2,160
FIFO	\$2,560
Average	\$2,421

Determine ending inventory under a perpetual inventory system.

***P6.9A (LO 5)** Wittmann Co. began operations on July 1. It uses a perpetual inventory system. During July, the company had the following purchases and sales.

Purchases			
Date	Units	Unit Cost	Sales Units
July 1	5	\$122	
July 6			3
July 11	7	\$136	
July 14			5
July 21	8	\$147	
July 27			5

Instructions

- a. Ending inventory
 FIFO \$1,029
 Avg. \$996
 LIFO \$957

Compute gross profit rate and inventory loss using gross profit method.

- a. Determine the ending inventory under a perpetual inventory system using (1) FIFO, (2) moving-average cost, and (3) LIFO.
 b. Which costing method produces the highest ending inventory valuation?

***P6.10A (LO 6)** Bao Company lost all of its inventory in a fire on December 26, 2020. The accounting records showed the following gross profit data for November and December.

	November	December (to 12/26)
Net sales	\$600,000	\$700,000
Beginning inventory	32,000	36,000
Purchases	389,000	420,000
Purchase returns and allowances	13,300	14,900
Purchase discounts	8,500	9,500
Freight-in	8,800	9,900
Ending inventory	36,000	?

Bao is fully insured for fire losses but must prepare a report for the insurance company.

Instructions

- a. Gross profit rate 38%
 a. Compute the gross profit rate for November.
 b. Using the gross profit rate for November, determine the estimated cost of the inventory lost in the fire.

Compute ending inventory using retail method.

***P6.11A (LO 6)** Rayre Books uses the retail inventory method to estimate its monthly ending inventories. The following information is available for two of its departments at October 31, 2020.

	Hardcovers		Paperbacks	
	Cost	Retail	Cost	Retail
Beginning inventory	\$ 420,000	\$ 640,000	\$ 280,000	\$ 360,000
Purchases	2,135,000	3,200,000	1,155,000	1,540,000
Freight-in	24,000		12,000	
Purchase discounts	44,000		22,000	
Net sales		3,100,000		1,570,000

At December 31, Rayre Books takes a physical inventory at retail. The actual retail values of the inventories in each department are Hardcovers \$744,000 and Paperbacks \$335,000.

Instructions

- a. Hardcovers: End. Inv. \$488,400
 a. Determine the estimated cost of the ending inventory for each department at **October 31**, 2020, using the retail inventory method.
 b. Compute the ending inventory at cost for each department at **December 31**, assuming the cost-to-retail ratios for the year are 65% for Hardcovers and 75% for Paperbacks.

Continuing Case

Cookie Creations

(Note: This is a continuation of the Cookie Creations case from Chapters 1 through 5.)

CC6 Natalie is busy establishing both divisions of her business (cookie classes and mixer sales) and completing her business degree. Her goals for the next 11 months are to sell one mixer per month and to give two to three classes per week.

The cost of the fine European mixers is expected to increase. Natalie has just negotiated new terms with Kzinski that include shipping costs in the negotiated purchase price (mixers will be shipped FOB destination). Natalie must choose a cost flow assumption for her mixer inventory.

Go to WileyPLUS for complete case details and instructions.

Shutterstock

Ethics Case

EC6 R. J. Graziano Wholesale Corp. uses the LIFO method of inventory costing. In the current year, profit at R. J. Graziano is running unusually high. The corporate tax rate is also high this year, but it is scheduled to decline significantly next year. In an effort to lower the current year's net income and to take advantage of the changing income tax rate, the president of R. J. Graziano Wholesale instructs the plant accountant to recommend to the purchasing department a large purchase of inventory for delivery 3 days before the end of the year. The price of the inventory to be purchased has doubled during the year, and the purchase will represent a major portion of the ending inventory value.

Instructions

- What is the effect of this transaction on this year's and next year's income statement and income tax expense? Why?
- If R. J. Graziano Wholesale had been using the FIFO method of inventory costing, would the president give the same directive?
- Should the plant accountant order the inventory purchase to lower income? What are the ethical implications of this order?

Comprehensive Accounting Cycle Review

ACR6 Financial Statement On December 1, 2020, Annalise Company had the account balances shown below.

	Debit		Credit
Cash	\$ 4,800	Accumulated Depreciation—Equipment	\$ 1,500
Accounts Receivable	3,900	Accounts Payable	3,000
Inventory	1,800*	Owner's Capital	27,000
Equipment	21,000		<u><u>\$31,500</u></u>
	<u><u>\$31,500</u></u>		

*(3,000 × \$0.60)

The following transactions occurred during December.

- Dec. 3 Purchased 4,000 units of inventory on account at a cost of \$0.74 per unit.
- 5 Sold 4,400 units of inventory on account for \$0.90 per unit. (Annalise sold 3,000 of the \$0.60 units and 1,400 of the \$0.74.)
- 7 Granted the December 5 customer \$180 credit for 200 units of inventory returned costing \$120. These units were returned to inventory.
- 17 Purchased 2,200 units of inventory for cash at \$0.80 each.
- 22 Sold 2,100 units of inventory on account for \$0.95 per unit. (Annalise sold 2,100 of the \$0.74 units.)

Adjustment data:

1. Accrued salaries payable \$400.
2. Depreciation \$200 per month.

Instructions

- a. Journalize the December transactions and adjusting entries, assuming Annalise uses the perpetual inventory method.
- b. Enter the December 1 balances in the ledger T-accounts and post the December transactions. In addition to the accounts mentioned above, use the following additional accounts: Cost of Goods Sold, Depreciation Expense, Salaries and Wages Expense, Salaries and Wages Payable, Sales Revenue, and Sales Returns and Allowances.
- c. Prepare an adjusted trial balance as of December 31, 2020.
- d. Prepare an income statement for December 2020 and a classified balance sheet at December 31, 2020.
- e. Compute ending inventory and cost of goods sold under FIFO, assuming Annalise Company uses the periodic inventory system.
- f. Compute ending inventory and cost of goods sold under LIFO, assuming Annalise Company uses the periodic inventory system.

Expand Your Critical Thinking**Financial Reporting Problem: Apple Inc.**

CT6.1 The notes that accompany a company's financial statements provide informative details that would clutter the amounts and descriptions presented in the statements. Refer to the financial statements of **Apple Inc.** in Appendix A as well as its annual report. The complete annual report, including the notes to the financial statements, is available at the company's website.

Instructions

Answer the following questions. Complete the requirements in millions of dollars, as shown in Apple's annual report.

- a. What did Apple report for the amount of inventories in its consolidated balance sheet at September 27, 2014? At September 26, 2015?
- b. Compute the dollar amount of change and the percentage change in inventories between 2014 and 2015. Compute inventory as a percentage of current assets at September 26, 2015.
- c. How does Apple value its inventories? Which inventory cost flow method does Apple use? (See Notes to the Financial Statements.)
- d. What is the cost of sales (cost of goods sold) reported by Apple for 2015, 2014, and 2013? Compute the percentage of cost of sales to net sales in 2015.

Comparative Analysis Problem: PepsiCo, Inc. vs. The Coca-Cola Company

CT6.2 **PepsiCo**'s financial statements are presented in Appendix B. Financial statements of **The Coca-Cola Company** are presented in Appendix C. The complete annual reports of PepsiCo and Coca-Cola, including the notes to the financial statements, are available at each company's respective website.

Instructions

- a. Based on the information contained in these financial statements, compute the following 2015 ratios for each company.
 1. Inventory turnover.
 2. Days in inventory.
- b. What conclusions concerning the management of the inventory can you draw from these data?

Comparative Analysis Problem: Amazon.com, Inc. vs. Wal-Mart Stores, Inc.

CT6.3 **Amazon.com, Inc.**'s financial statements are presented in Appendix D. Financial statements of **Wal-Mart Stores, Inc.** are presented in Appendix E. The complete annual reports of Amazon and Wal-Mart, including the notes to the financial statements, are available at each company's respective website.

Instructions

- a. Based on the information contained in these financial statements, compute the following 2015 ratios for each company.
 1. Inventory turnover.
 2. Days in inventory.
- b. What conclusions concerning the management of the inventory can you draw from these data?

Real-World Focus

CT6.4 A company's annual report usually will identify the inventory method used. Knowing that, you can analyze the effects of the inventory method on the income statement and balance sheet.

Instructions

Answer the following questions based on **Cisco**'s current year's annual report (available on the company's website).

- a. At Cisco's fiscal year-end, what was the inventory on the balance sheet?
- b. How has this changed from the previous fiscal year-end?
- c. How much of the inventory was finished goods?

Decision-Making Across the Organization

CT6.5 On April 10, 2020, fire damaged the office and warehouse of Corvet Company. Most of the accounting records were destroyed, but the following account balances were determined as of March 31, 2020: Inventory (January 1, 2020), \$80,000; Sales Revenue (January 1–March 31, 2020), \$180,000; Purchases (January 1–March 31, 2020), \$94,000.

The company's fiscal year ends on December 31. It uses a periodic inventory system.

From an analysis of the April bank statement, you discover cancelled checks of \$4,200 for cash purchases during the period April 1–10. Deposits during the same period totaled \$18,500. Of that amount, 60% were collections on accounts receivable, and the balance was cash sales.

Correspondence with the company's principal suppliers revealed \$12,400 of purchases on account from April 1 to April 10. Of that amount, \$1,600 was for merchandise in transit on April 10 that was shipped FOB destination.

Correspondence with the company's principal customers produced acknowledgments of credit sales totaling \$37,000 from April 1 to April 10. It was estimated that \$5,600 of credit sales will never be acknowledged or recovered from customers.

Corvet Company reached an agreement with the insurance company that its fire-loss claim should be based on the average of the gross profit rates for the preceding 2 years. The financial statements for 2018 and 2019 showed the following data.

	2019	2018
Net sales	\$600,000	\$480,000
Cost of goods purchased	404,000	356,000
Beginning inventory	60,000	40,000
Ending inventory	80,000	60,000

Inventory with a cost of \$17,000 was salvaged from the fire.

Instructions

With the class divided into groups, answer the following.

- a. Determine the balances in (1) Sales Revenue and (2) Purchases at April 10.
- *b. Determine the average gross profit rate for the years 2018 and 2019. (*Hint:* Find the gross profit rate for each year and divide the sum by 2.)
- *c. Determine the inventory loss as a result of the fire, using the gross profit method.

Communication Activity

CT6.6 You are the controller of Small Toys Inc. Pamela Bames, the president, recently mentioned to you that she found an error in the 2019 financial statements which she believes has corrected itself. She determined, in discussions with the Purchasing Department, that 2019 ending inventory was overstated by \$1 million. Pamela says that the 2020 ending inventory is correct. Thus, she assumes that 2020 income is correct. Pamela says to you, "What happened has happened—there's no point in worrying about it anymore."

Instructions

You conclude that Pamela is incorrect. Write a brief, tactful memo to Pamela, clarifying the situation.

All About You

CT6.7 Some of the largest business frauds ever perpetrated have involved the misstatement of inventory. Two classics were at **Leslie Fay** and **McKesson Corporation**.

Instructions

There is considerable information regarding inventory frauds available on the Internet. Search for information about one of the two cases mentioned above, or inventory fraud at any other company, and prepare a short explanation of the nature of the inventory fraud.

FASB Codification Activity

CT6.8 If your school has a subscription to the FASB Codification, log in and prepare responses to the following.

Instructions

- a. The primary basis for accounting for inventories is cost. How is cost defined in the Codification?
- b. What does the Codification state regarding the use of consistency in the selection or employment of a basis for inventory?

A Look at IFRS

LEARNING OBJECTIVE 7

Compare the accounting for inventories under GAAP and IFRS.

The major IFRS requirements related to accounting and reporting for inventories are the same as GAAP. The major difference is that IFRS prohibits the use of the LIFO cost flow assumption.

Key Points

Following are the key similarities and differences between GAAP and IFRS related to inventories.

Similarities

- IFRS and GAAP account for inventory acquisitions at historical cost and value inventory at the lower-of-cost-or-net realizable value subsequent to acquisition.
- Who owns the goods—goods in transit or consigned goods—as well as the costs to include in inventory are essentially accounted for the same under IFRS and GAAP.

Differences

- The requirements for accounting for and reporting inventories are more principles-based under IFRS. That is, GAAP provides more detailed guidelines in inventory accounting.
- A major difference between IFRS and GAAP relates to the LIFO cost flow assumption. GAAP permits the use of LIFO for inventory valuation. IFRS prohibits its use. FIFO and average-cost are the only two acceptable cost flow assumptions permitted under IFRS. Both sets of standards permit specific identification where appropriate.

Looking to the Future

One convergence issue that will be difficult to resolve relates to the use of the LIFO cost flow assumption. As indicated, IFRS specifically prohibits its use. Conversely, the LIFO cost flow assumption is widely used in the United States because of its favorable tax advantages. In addition, many argue that LIFO from a financial reporting point of view provides a better matching of current costs against revenue and, therefore, enables companies to compute a more realistic income.

IFRS Practice

IFRS Self-Test Questions

1. Which of the following should **not** be included in the inventory of a company using IFRS?
 - a. Goods held on consignment from another company.
 - b. Goods shipped on consignment to another company.
 - c. Goods in transit from another company shipped FOB shipping point.
 - d. All of the above are included in inventory.
2. Which method of inventory costing is prohibited under IFRS?
 - a. Specific identification.
 - b. LIFO.
 - c. FIFO.
 - d. Average-cost.

IFRS Exercises

IFRS6.1 Briefly describe some of the similarities and differences between GAAP and IFRS with respect to the accounting for inventories.

IFRS6.2 LaTour Inc. is based in France and prepares its financial statements (in euros) in accordance with IFRS. In 2020, it reported cost of goods sold of €578 million and average inventory of €154 million. Briefly discuss how analysis of LaTour's inventory turnover (and comparisons to a company using GAAP) might be affected by differences in inventory accounting between IFRS and GAAP.

International Financial Reporting Problem: Louis Vuitton

IFRS6.3 The financial statements of **Louis Vuitton** are presented in Appendix F. The complete annual report, including the notes to its financial statements, is available at the company's website.

Instructions

Using the notes to the company's financial statements, answer the following questions.

- a. What cost flow assumption does the company use to value inventory other than wine?
- b. What amount of goods purchased for retail and finished products did the company report at December 31, 2015?

Answers to IFRS Self-Test Questions

Accounting Information Systems

Chapter Preview

As the following Feature Story demonstrates, a reliable information system is a necessity for any company. Whether companies use pen, pencil, or computers in maintaining accounting records, certain principles and procedures apply. The purpose of this chapter is to explain and illustrate these features.

Feature Story

QuickBooks® Helps This Retailer Sell Guitars

Starting a small business requires many decisions. For example, you have to decide where to locate, how much space you need, how much inventory to have, how many employees to hire, and where to advertise. Small business owners are typically so concerned about the product and sales side of their business that they often do not give enough thought to something that is also critical to their success—how to keep track of financial results.

Small business owners today can choose either manual or computerized accounting systems. For example, Paul and Laura West were the owners of the first independent dealership of

Carvin guitars and professional audio equipment. When they founded their company in Sacramento, California, they decided to purchase a computerized accounting system that would integrate many aspects of their retail operations. They wanted to use their accounting software to manage their inventory of guitars and amplifiers, enter sales, record and report financial data, and process credit card and debit card transactions. They evaluated a number of options and chose QuickBooks® by **Intuit Inc.**

QuickBooks®, like most other popular software packages, has programs designed for the needs of a specific type of business, which in this case is retailing. This QuickBooks® retailing package automatically collects sales information from its point-of-sale scanning devices. It also keeps track of inventory levels and automatically generates purchase orders for popular

items when re-order points are reached. It even supports specialized advertising campaigns.

For example, QuickBooks® compiled a customer database from which the Wests sent out targeted direct mailings to potential customers. The computerized system also enabled data files to be emailed to the company's accountant. This kept down costs and made it easier and more efficient for the

Wests to generate financial reports as needed. The Wests believed that the investment in the computerized system saved them time and money, and allowed them to spend more time on other aspects of their business.

Overview of Accounting Information Systems

LEARNING OBJECTIVE 1

Explain the basic concepts of an accounting information system.

The **accounting information system** collects and processes transaction data and communicates financial information to decision-makers. It includes each of the steps in the accounting cycle that you studied in earlier chapters. It also includes the documents that provide evidence of the transactions, and the records, trial balances, worksheets, and financial statements that result. An **accounting system** may be either manual or computerized. Most businesses use some sort of computerized accounting system, whether it is an off-the-shelf system for small businesses, like QuickBooks® or Sage 50, or a more complex custom-made system.

Efficient and effective accounting information systems are based on certain basic principles. These principles, as described in **Illustration 7.1**, are (1) cost-effectiveness, (2) usefulness, and (3) flexibility. If the accounting system is cost-effective, provides useful output, and

has the flexibility to meet future needs, it can contribute to both individual and organizational goals.

Cost-Effectiveness

The accounting system must be cost-effective. Benefits of information must outweigh the costs of providing it.

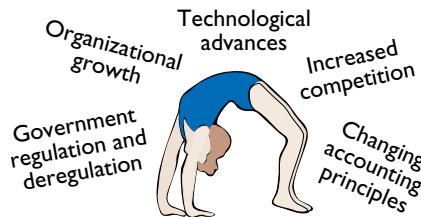

Useful Output

To be useful, information must be understandable, relevant, reliable, timely, and accurate. Designers of accounting systems must consider the needs and knowledge of various users.

Flexibility

The accounting system should accommodate a variety of users and changing information needs. The system should be sufficiently flexible to meet the resulting changes in the demands made upon it.

Computerized Accounting Systems

Many small businesses use a computerized general ledger accounting system. **General ledger accounting systems** are software programs that integrate the various accounting functions related to sales, purchases, receivables, payables, cash receipts and disbursements, and payroll. They also generate financial statements. Computerized systems have a number of advantages over manual systems. First, the company typically enters data only once in a computerized system. Second, because the computer does most steps automatically, it eliminates many errors resulting from human intervention in a manual system, such as errors in posting or preparation of financial statements. Computerized systems also provide up-to-the-minute information. More timely information often results in better business decisions. Many different general ledger software packages are available.

Choosing a Software Package

To identify the right software for your business, you must understand your company's operations. For example, consider its needs with regard to inventory, billing, payroll, and cash management. In addition, the company might have specific needs that are not supported by all software systems. For example, you might want to track employees' hours on individual jobs or to extract information for determining sales commissions. Choosing the right system is critical because installation of even a basic system is time-consuming, and learning a new system will require many hours of employee time.

Entry-Level Software

Software publishers tend to classify businesses into groups based on revenue and the number of employees. Companies with revenues of less than \$5 million and up to 20 employees generally

ILLUSTRATION 7.1

Principles of an efficient and effective accounting information system

use **entry-level programs**. The two leading entry-level programs are **Intuit's QuickBooks®** and **The Sage Group's Sage 50**. These programs control more than 90% of the market. Each of these entry-level programs comes in many different industry-specific versions. For example, some are designed for very specific industry applications such as restaurants, retailing, construction, manufacturing, or nonprofit.

Quality entry-level packages typically involve more than recording transactions and preparing financial statements. Here are some common features and benefits:

- **Easy data access and report preparation.** Users can easily access information related to specific customers or suppliers. For example, you can view all transactions, invoices, payments, as well as contact information for a specific client.
- **Audit trail.** As a result of the Sarbanes-Oxley Act, companies are now far more concerned that their accounting system minimizes opportunities for fraud. Many programs provide an “audit trail” that enables the tracking of all transactions.
- **Internal controls.** Some systems have an internal accounting review that identifies suspicious transactions or likely mistakes such as wrong account numbers or duplicate transactions (see **Ethics Note**).
- **Customization.** This feature enables the company to create data fields specific to the needs of its business.
- **Network-compatibility.** Multiple users in the company can access the system at the same time.

ETHICS NOTE

Entire books and movies have used cyber attacks as a major theme. Most programmers would agree that ensuring cyber security is the most difficult and time-consuming phase of their jobs.

Enterprise Resource Planning Systems

Enterprise resource planning (ERP) systems are typically used by manufacturing companies with more than 500 employees and \$500 million in sales. The best-known of these systems are **SAP AG's SAP ERP** (the most widely used) and **Oracle's ERP**. ERP systems go far beyond the functions of an entry-level general ledger package. They integrate all aspects of the organization, including accounting, sales, human resource management, and manufacturing. Because of the complexity of an ERP system, implementation can take three years and cost five times as much as the purchase price of the system. Purchase and implementation of ERP systems can cost from \$250,000 to as much as \$50 million for the largest multinational corporations.

Curbing Fraudulent Activity with Software

The Sarbanes-Oxley Act (SOX) requires that companies demonstrate that they have adequate controls in place to detect significant fraudulent behavior by employees. The SOX requirements have created a huge market for software that can monitor and trace every recorded transaction and adjusting entry. This enables companies to pinpoint who used the accounting system and when they used it. These systems also require “electronic signatures” by employees for all significant transactions. Such signatures verify that employees

have followed all required procedures, and that all actions are properly authorized. One firm that specializes in compliance software had 10 clients prior to SOX and 250 after SOX.

Note that small businesses have no standards like SOX and often do not have the resources to implement a fraud-prevention system. As a result, small businesses lose nearly \$630 billion to fraud each year. To address this problem, more sophisticated software is being designed for small business fraud prevention.

Sources: W. M. Bulkeley and C. Forelle, “Anti-Crime Program: How Corporate Scandals Gave Tech Firms a New Business Line,” *Wall Street Journal* (December 9, 2005), p. A1; and “New Software Fights Small Business Fraud,” *FOX Business* (August 9, 2013).

Why might this software help reduce fraudulent activity by employees? (Go to WileyPLUS for this answer and additional questions.)

Manual Accounting Systems

In **manual accounting systems**, someone performs each of the steps in the accounting cycle by hand. For example, someone manually enters each accounting transaction in the journal and manually posts each to the ledger. Other manual computations must be made to obtain ledger account balances and to prepare a trial balance and financial statements. In the remainder of this chapter, we illustrate the use of a manual system.

You might be wondering, “Why cover manual accounting systems if the real world uses computerized systems?” First, small businesses still abound. Most of them begin operations with manual accounting systems and convert to computerized systems as the business grows. You may work in a small business or start your own someday, so it is useful to know how a manual system works. Second, to understand what computerized accounting systems do, you also need to understand manual accounting systems.

The manual accounting system represented in the first six chapters of this textbook is satisfactory in a company with a low volume of transactions. However, in most companies, it is necessary to add additional ledgers and journals to the accounting system to record transaction data efficiently.

DO IT! 1 | Basic AIS Concepts

Indicate whether the following statements are true or false. If false, indicate how to correct the statement.

1. An accounting information system collects and processes transaction data and communicates financial information to decision-makers.
2. A company typically enters data only once in a manual accounting system.
3. Enterprise resource planning (ERP) systems are typically used by companies with revenues of less than \$5 million and up to 20 employees.

ACTION PLAN

- Understand the principles of an effective accounting information system.
- Recognize the types of available general ledger software packages.

Solution

1. True.
2. False. A company typically enters data only once in a computerized accounting system.
3. False. Enterprise resource planning (ERP) systems are typically used by manufacturing companies with more than 500 employees and \$500 million in sales.

Subsidiary Ledgers

LEARNING OBJECTIVE 2

Describe the nature and purpose of a subsidiary ledger.

Imagine a business that has several thousand charge (credit) customers and shows the transactions with these customers in only one general ledger account—Accounts Receivable. It would be nearly impossible to determine the balance owed by an individual customer at any specific time. Similarly, the amount payable to one creditor would be difficult to locate quickly from a single Accounts Payable account in the general ledger.

Instead, companies use subsidiary ledgers to keep track of individual balances. A **subsidiary ledger** is a group of accounts with a common characteristic (for example, all accounts receivable). It is an addition to and an expansion of the general ledger. The subsidiary ledger frees the general ledger from the details of individual balances.

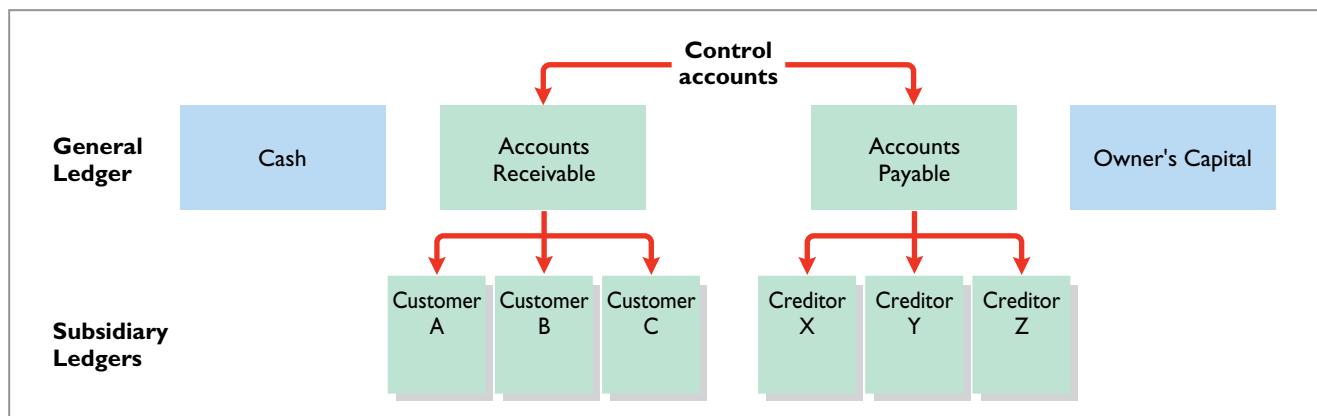

Two common subsidiary ledgers are as follows.

1. The **accounts receivable** (or **customers'**) **subsidiary ledger**, which collects transaction data of individual customers.
2. The **accounts payable** (or **creditors'**) **subsidiary ledger**, which collects transaction data of individual creditors.

In each of these subsidiary ledgers, companies usually arrange individual accounts in alphabetical order.

A general ledger account summarizes the detailed data from a subsidiary ledger. For example, the detailed data from the accounts receivable subsidiary ledger are summarized in Accounts Receivable in the general ledger. The general ledger account that summarizes subsidiary ledger data is called a **control account**. **Illustration 7.2** presents an overview of the relationship of subsidiary ledgers to the general ledger. There, the general ledger control accounts and subsidiary ledger accounts are in green. Note that Cash and Owner's Capital in this illustration are not control accounts because there are no subsidiary ledger accounts related to these accounts.

ILLUSTRATION 7.2 Relationship of general ledger and subsidiary ledgers

At the end of an accounting period, each general ledger control account balance must equal the composite balance of the individual accounts in the related subsidiary ledger. For example, the balance in Accounts Payable in Illustration 7.2 must equal the total of the subsidiary balances of Creditors X + Y + Z.

Subsidiary Ledger Example

Illustration 7.3 lists credit sales and collections on account for Pujols Company.

ILLUSTRATION 7.3

Sales and collection transactions

Credit Sales			Collections on Account		
Jan. 10	Aaron Co.	\$ 6,000	Jan. 19	Aaron Co.	\$4,000
12	Branden Inc.	3,000	21	Branden Inc.	3,000
20	Caron Co.	3,000	29	Caron Co.	1,000
			\$12,000		
			\$8,000		

Illustration 7.4 provides an example of a control account and subsidiary ledger for Pujols Company. (Due to space considerations, the explanation column in these accounts is not

ILLUSTRATION 7.4 Relationship between general and subsidiary ledgers

The screenshot shows a software interface for managing ledgers. At the top, there's a menu bar with File, Edit, View, Go, Bookmarks, Tools, and Help. Below the menu is a toolbar with Problem, Entries, Post, Closing, Reports, Tools, and Help buttons.

ACCOUNTS RECEIVABLE SUBSIDIARY LEDGER

Date	Ref.	Debit	Credit	Balance
2020				
Jan 31		12,000		12,000
31			8,000	4,000

Annotations:

- The subsidiary ledger is separate from the general ledger.
- Accounts Receivable is a control account.

shown in this and subsequent illustrations.) Illustration 7.4 is based on the transactions listed in Illustration 7.3.

Pujols can reconcile the total debits (\$12,000) and credits (\$8,000) in Accounts Receivable in the general ledger to the detailed debits and credits in the subsidiary accounts. Also, the balance of \$4,000 in the control account agrees with the total of the balances in the individual accounts (Aaron Co. \$2,000 + Branden Inc. \$0 + Caron Co. \$2,000) in the subsidiary ledger.

As Illustration 7.4 shows, companies make monthly postings to the control accounts in the general ledger. This practice allows them to prepare monthly financial statements. Companies post to the individual accounts in the subsidiary ledger daily. Daily posting ensures that account information is current. This enables the company to monitor credit limits, bill customers, and answer inquiries from customers about their account balances.

Advantages of Subsidiary Ledgers

Subsidiary ledgers have several advantages:

1. **They show in a single account transactions affecting one customer or one creditor,** thus providing up-to-date information on specific account balances.
2. **They free the general ledger of excessive details.** As a result, a trial balance of the general ledger does not contain vast numbers of individual account balances.
3. **They help locate errors in individual accounts** by reducing the number of accounts in one ledger and by using control accounts.
4. **They make possible a division of labor** in posting. One employee can post to the general ledger while someone else posts to the subsidiary ledgers.

Accounting Across the Organization

© Niels Laan/iStockphoto

Rather than relying on customer or creditor names in a subsidiary ledger, a computerized system expands the account number of the control account in a prespecified manner. For example, if the control account Accounts Receivable was numbered 10010, the first account in the accounts

receivable subsidiary ledger might be numbered 10010-0001. Most systems allow inquiries about specific accounts in the subsidiary ledger (by account number) or about the control account. With the latter, the system would automatically total all the subsidiary accounts whenever an inquiry to the control account was made.

Why use numbers to identify names in a computerized system? (Go to WileyPLUS for this answer and additional questions.)

DO IT! 2 | Subsidiary Ledgers

Presented below is information related to Sims Company for its first month of operations. Determine the balances that appear in the accounts payable subsidiary ledger. What Accounts Payable balance appears in the general ledger at the end of January?

Credit Purchases			Cash Paid		
Jan. 5	Devon Co.	\$11,000	Jan. 9	Devon Co.	\$7,000
11	Shelby Co.	7,000	14	Shelby Co.	2,000
22	Taylor Co.	14,000	27	Taylor Co.	9,000

ACTION PLAN

- Subtract cash paid from credit purchases to determine the balances in the accounts payable subsidiary ledger.
- Sum the individual balances to determine the Accounts Payable balance.

Solution

Subsidiary ledger balances:

Devon Co.: \$4,000 (\$11,000 – \$7,000)

Shelby Co.: \$5,000 (\$7,000 – \$2,000)

Taylor Co.: \$5,000 (\$14,000 – \$9,000)

General ledger Accounts Payable balance: \$14,000 (\$4,000 + \$5,000 + \$5,000)

Related exercise material: **BE7.4, BE7.5, DO IT! 7.2, E7.1, E7.2, E7.3, E7.4, and E7.5.**

Special Journals

LEARNING OBJECTIVE 3

Record transactions in special journals.

So far, you have learned to journalize transactions in a two-column general journal and post each entry to the general ledger. This procedure is satisfactory in only very small companies. To expedite journalizing and posting, most companies use special journals **in addition to the general journal**.

Companies use **special journals** to record similar types of transactions. Examples are all sales of merchandise on account or all cash receipts. The types of transactions

that occur frequently in a company determine what special journals the company uses. Most merchandising companies record daily transactions using the journals shown in **Illustration 7.5**.

ILLUSTRATION 7.5 Use of special journals and the general journal

Sales Journal	Cash Receipts Journal	Purchases Journal	Cash Payments Journal	General Journal
<u>Used for:</u> All sales of merchandise on account	<u>Used for:</u> All cash received (including cash sales)	<u>Used for:</u> All purchases of merchandise on account	<u>Used for:</u> All cash paid (including cash purchases)	<u>Used for:</u> Transactions that cannot be entered in a special journal, including correcting, adjusting, and closing entries

If a transaction cannot be recorded in a special journal, the company records it in the general journal. For example, if a company had special journals for only the four types of transactions listed above, it would record purchase returns and allowances that do not affect cash in the general journal. Similarly, **correcting, adjusting, and closing entries are recorded in the general journal**. In some situations, companies might use special journals other than those listed above. For example, when sales returns and allowances that do not affect cash are frequent, a company might use a special journal to record these transactions.

Special journals **permit greater division of labor** because several people can record entries in different journals at the same time. For example, one employee may journalize all cash receipts, and another may journalize all credit sales. Also, the use of special journals **reduces the time needed to complete the posting process**. With special journals, companies may post some accounts monthly instead of daily, as we will illustrate later in the chapter (see **Helpful Hint**). On the following pages, we discuss the four special journals shown in Illustration 7.5.

HELPFUL HINT

Postings are also made daily to individual ledger accounts in the inventory subsidiary ledger to maintain a perpetual inventory.

Sales Journal

In the **sales journal**, companies record **sales of merchandise on account**. Cash sales of merchandise go in the cash receipts journal. Credit sales of assets other than merchandise go in the general journal.

Journalizing Credit Sales

To demonstrate use of a sales journal, we will use data for Karns Wholesale Supply, which uses a **perpetual inventory system**. Under this system, each entry in the sales journal results in one entry **at selling price** and another entry **at cost**. The entry at selling price is a debit to Accounts Receivable (a control account) and a credit of equal amount to Sales Revenue. The entry at cost is a debit to Cost of Goods Sold and a credit of equal amount to Inventory (a control account). Using a sales journal with two amount columns, the company can show on only one line a sales transaction at both selling price and cost. **Illustration 7.6** shows this two-column sales journal of Karns Wholesale Supply, using assumed credit sales transactions (for sales invoices 101–107).

ILLUSTRATION 7.6 Journalizing the sales journal—perpetual inventory system

Date	Account Debited	Invoice No.	Ref.	Accts. Receivable Dr. Sales Revenue Cr.	Cost of Goods Sold Dr. Inventory Cr.
2020					
May 3	Abbot Sisters	101		10,600	6,360
7	Babson Co.	102		11,350	7,370
14	Carson Bros.	103		7,800	5,070
19	Deli Co.	104		9,300	6,510
21	Abbot Sisters	105		15,400	10,780
24	Deli Co.	106		21,210	15,900
27	Babson Co.	107		14,570	10,200
				<u>90,230</u>	<u>62,190</u>

Note that, unlike the general journal, an explanation is not required for each entry in a special journal. Also, the use of prenumbered invoices ensures that all invoices are journalized and no invoices are duplicated. Finally, the reference (Ref.) column is not used in journalizing. It is used in posting the sales journal, as explained in the next section.

Posting the Sales Journal

Companies make daily postings from the sales journal **to the individual accounts receivable** in the subsidiary ledger. Posting **to the general ledger** is done **monthly**. **Illustration 7.7** shows both the daily and monthly postings.

A check mark (✓) is inserted in the reference column to indicate that the daily posting to the customer's account has been made. If the subsidiary ledger accounts were numbered, the account number would be entered in place of the check mark. At the end of the month, Karns posts the column totals of the sales journal to the general ledger. Here, the column totals are as follows: From the selling-price column, a debit of \$90,230 to Accounts Receivable (account No. 112) and a credit of \$90,230 to Sales Revenue (account No. 401); from the cost column, a debit of \$62,190 to Cost of Goods Sold (account No. 505) and a credit of \$62,190 to Inventory (account No. 120). Karns inserts the account numbers below the column totals to indicate that the postings have been made. In both the general ledger and subsidiary ledger accounts, the reference **S1** indicates that the posting came from page 1 of the sales journal.

Proving the Ledgers

The next step is to “prove” the ledgers. To do so, Karns must determine two things: (1) The total of the general ledger debit balances must equal the total of the general ledger credit balances. (2) The sum of the subsidiary ledger balances must equal the balance in the control account. **Illustration 7.8** shows the proof of the postings from the sales journal to the general and subsidiary ledgers.

Advantages of the Sales Journal

The use of a special journal to record sales on account has a number of advantages. First, the one-line entry for each sales transaction saves time. In the sales journal, it is not necessary to write out the four account titles for each transaction. Second, only totals, rather than individual entries, are posted to the general ledger. This saves posting time and reduces the possibilities

Accounts Receivable	<u>Debits</u>	62,190	Deli Co.
Cost of Goods Sold	<u>\$152,420</u>		
		<u>\$90,230</u>	

other possibilities exist, such as receipt of money from bank loans and cash proceeds from disposal of equipment. A one- or two-column cash receipts journal would not have space enough for all possible cash receipt transactions. Therefore, companies use a multiple-column cash receipts journal.

Generally, a cash receipts journal includes the following columns: debit columns for Cash and Sales Discounts, and credit columns for Accounts Receivable, Sales Revenue, and “Other Accounts.” Companies use the Other Accounts category when the cash receipt does not involve a cash sale or a collection of accounts receivable. Under a perpetual inventory system, each sales entry also is accompanied by an entry that debits Cost of Goods Sold and credits Inventory for the cost of the merchandise sold. **Illustration 7.9** shows a six-column cash receipts journal.

Companies may use additional credit columns if these columns significantly reduce postings to a specific account. For example, a loan company such as **Household International** receives thousands of cash collections from customers. Using separate credit columns for Loans Receivable and Interest Revenue, rather than the Other Accounts credit column, would reduce postings.

Journalizing Cash Receipts Transactions

To illustrate the journalizing of cash receipts transactions, we will continue with the May transactions of Karns Wholesale Supply. Collections from customers relate to the entries recorded in the sales journal in Illustration 7.6. The entries in the cash receipts journal are based on the following cash receipts.

- May 1 D. A. Karns makes an investment of \$5,000 in the business.
- 7 Cash sales of merchandise total \$1,900 (cost, \$1,240).
- 10 Received a check for \$10,388 from Abbot Sisters in payment of invoice No. 101 for \$10,600 less a 2% discount.
- 12 Cash sales of merchandise total \$2,600 (cost, \$1,690).
- 17 Received a check for \$11,123 from Babson Co. in payment of invoice No. 102 for \$11,350 less a 2% discount.
- 22 Received cash by signing a note for \$6,000.
- 23 Received a check for \$7,644 from Carson Bros. in full for invoice No. 103 for \$7,800 less a 2% discount.
- 28 Received a check for \$9,114 from Deli Co. in full for invoice No. 104 for \$9,300 less a 2% discount.

The following discussion provides further information about the columns in the cash receipts journal.

Debit Columns:

- Cash.** Karns enters in this column the amount of cash actually received in each transaction. The column total indicates the total cash receipts for the month.

ILLUSTRATION 7.9 Journalizing and posting the cash receipts journal

General Ledger Software for Accounting

The subsidiary ledger is separate from the general ledger.

Accounts Receivable is a control account.

start General Ledger General Jrn General Jrn Sales Jrn Cash Receipts Jrn Purchases Jrn

HELPFUL HINT

A *subsidiary ledger* account is credited when the entry involves a collection of accounts receivable. A *general ledger* account is credited when the account is not shown in a special column (and an amount must be entered in the Other Accounts column). Otherwise, no account is shown in the “Account Credited” column.

- Sales Discounts.** Karns includes a Sales Discounts column in its cash receipts journal. By doing so, it does not need to enter sales discount items in the general journal. As a result, the cash receipts journal shows on one line the collection of an account receivable within the discount period.

Credit Columns:

- Accounts Receivable.** Karns uses the Accounts Receivable column to record cash collections on account (see **Helpful Hint**). The amount entered here is the amount to be credited to the individual customer’s account.
- Sales Revenue.** The Sales Revenue column records all cash sales of merchandise. Cash sales of other assets (plant assets, for example) are not reported in this column.
- Other Accounts.** Karns uses the Other Accounts column whenever the credit is other than to Accounts Receivable or Sales Revenue. For example, in the first entry, Karns enters \$5,000 as a credit to Owner’s Capital. This column is often referred to as the sundry accounts column.

Debit and Credit Column:

- Cost of Goods Sold and Inventory.** This column records debits to Cost of Goods Sold and credits to Inventory.

In a multi-column journal, generally only one line is needed for each entry. Debit and credit amounts for each line must be equal. When Karns journalizes the collection from Abbot Sisters on May 10, for example, three amounts are indicated. Note also that the Account Credited column identifies both general ledger and subsidiary ledger account titles. General ledger accounts are illustrated in the May 1 and May 22 entries. A subsidiary account is illustrated in the May 10 entry for the collection from Abbot Sisters.

When Karns has finished journalizing a multi-column journal, it totals the amount columns and compares the totals to prove the equality of debits and credits. **Illustration 7.10** shows the proof of the equality of Karns’s cash receipts journal.

ILLUSTRATION 7.10

Proving the equality of the cash receipts journal

<u>Debits</u>	<u>Credits</u>
Cash	\$39,050
Sales Discounts	4,500
Cost of Goods Sold	11,000
	<u>\$57,480</u>
	<u>\$57,480</u>

Totaling the columns of a journal and proving the equality of the totals is called **footing** and **cross-footing** a journal.

Posting the Cash Receipts Journal

Posting a multi-column journal (Illustration 7.9) involves the following steps.

- At the end of the month**, the company posts all column totals, except for the Other Accounts total, to the account title(s) specified in the column heading (such as Cash or Accounts Receivable). The company then enters account numbers below the column totals to show that they have been posted. For example, Karns has posted Cash to account No. 101, Accounts Receivable to account No. 112, Inventory to account No. 120, Sales Revenue to account No. 401, Sales Discounts to account No. 414, and Cost of Goods Sold to account No. 505.
- The company separately posts the individual amounts comprising the Other Accounts total** to the general ledger accounts specified in the Account Credited column. See, for

example, the credit posting to Owner's Capital. The total amount of this column has not been posted. The symbol (X) is inserted below the total to this column to indicate that the amount has not been posted.

- The individual amounts in a column, posted in total to a control account (Accounts Receivable, in this case), are posted **daily to the subsidiary ledger** account specified in the Account Credited column. See, for example, the credit posting of \$10,600 to Abbot Sisters.

The symbol **CR**, used in both the subsidiary and general ledgers, identifies postings from the cash receipts journal.

Proving the Ledgers

After posting of the cash receipts journal is completed, Karns proves the ledgers. As shown in **Illustration 7.11**, the general ledger totals agree. Also, the sum of the subsidiary ledger balances equals the control account balance.

Schedule of Accounts Receivable
(from accounts receivable subsidiary ledger)

Abbot Sisters	\$15,400
Babson Co.	14,570
Deli Co.	21,210
	<u><u>\$51,180</u></u>

Notes Payable		
Owner's Capital		
Sales Revenue		
Inventory		

ILLUSTRATION 7.11

Proving the ledgers after posting the sales and the cash receipts journals

Purchases Journal

In the **purchases journal**, companies record all purchases of merchandise on account. Each entry in this journal results in a debit to Inventory and a credit to Accounts Payable (see **Helpful Hint**). For example, consider the following credit purchase transactions for Karns Wholesale Supply in **Illustration 7.12**.

Date	Supplier	Amount
5/6	Jasper Manufacturing Inc.	\$11,000
5/10	Eaton and Howe Inc.	7,200
5/14	Fabor and Son	6,900
5/19	Jasper Manufacturing Inc.	17,500
5/26	Fabor and Son	8,700
5/29	Eaton and Howe Inc.	12,600

HELPFUL HINT

A single-column purchases journal needs only to be footed to prove the equality of debits and credits.

ILLUSTRATION 7.12

Credit purchase transactions

Illustration 7.13 shows the purchases journal for Karns Wholesale Supply. When using a one-column purchases journal (as in Illustration 7.13), a company cannot journalize other types of purchases on account or cash purchases in it. For example, if the company used the purchases journal in Illustration 7.13, Karns would have to record credit purchases of equipment or supplies in the general journal. Likewise, all cash purchases would be entered in the cash payments journal.

ILLUSTRATION 7.13 Journalizing and posting the purchases journal

The screenshot illustrates the accounting process for journalizing and posting purchases. It shows three windows:

- PURCHASES JOURNAL**: A table with columns for Date, Account Credited, Terms, Ref., Inventory Dr. (Accounts Payable Cr.), and a summary row. The summary row shows debits of 63,900 and credits of (120)/(201). Red arrows point from the individual entries in the journal to their corresponding debit amounts in the subsidiary ledgers.
- ACCOUNTS PAYABLE SUBSIDIARY LEDGER**: Three tables for Eaton and Howe Inc., Fabor and Son, and Jasper Manufacturing Inc. Each table has columns for Date, Ref., Debit, Credit, and Balance. Red arrows point from the debit amounts in the purchases journal to the debit columns in these subsidiary ledgers.
- GENERAL LEDGER**: Two tables, one for Inventory (No. 120) and one for Accounts Payable (No. 201). Both show a debit of 63,900. Red arrows point from the credit amount in the purchases journal to the credit column in the Accounts Payable table.

Annotations provide additional context:

- "The company posts individual amounts to the subsidiary ledger daily."
- "At the end of the accounting period, the company posts totals to the general ledger."
- "The subsidiary ledger is separate from the general ledger."
- "Accounts Payable is a control account."

Journalizing Credit Purchases of Merchandise

The journalizing procedure is similar to that for a sales journal. Companies make entries in the purchases journal from purchase invoices. In contrast to the sales journal, the purchases journal may not have an invoice number column because invoices received from different suppliers will not be in numerical sequence. To ensure that they record all purchase invoices, some companies consecutively number each invoice upon receipt and then use an internal document number column in the purchases journal. The entries for Karns Wholesale Supply are based on the assumed credit purchases listed in Illustration 7.12.

HELPFUL HINT

Postings to subsidiary ledger accounts are done daily because it is often necessary to know a current balance for the subsidiary accounts.

Posting the Purchases Journal

The procedures for posting the purchases journal are similar to those for the sales journal. In this case, Karns makes **daily** postings to the **accounts payable ledger** (see **Helpful Hint**).

It makes **monthly** postings to Inventory and Accounts Payable in the general ledger. In both ledgers, Karns uses **P1** in the reference column to show that the postings are from page 1 of the purchases journal.

Proof of the equality of the postings from the purchases journal to both ledgers is shown in **Illustration 7.14**.

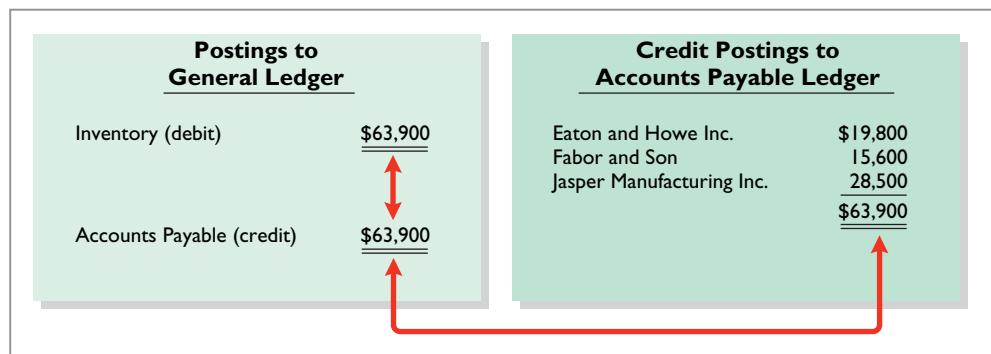

ILLUSTRATION 7.14

Proving the equality of the purchases journal

Expanding the Purchases Journal

Some companies expand the purchases journal to include all types of purchases on account, not just merchandise. Instead of one column for inventory and accounts payable, they use a multiple-column format. This format usually includes a credit column for Accounts Payable and debit columns for purchases of Inventory, Supplies, and Other Accounts. **Illustration 7.15** shows a multi-column purchases journal for Hanover Co. The posting procedures are similar to those shown earlier for posting the cash receipts journal. *For homework problems, assume the use of a single-column purchases journal unless instructed otherwise.*

ILLUSTRATION 7.15 Multi-column purchases journal

The screenshot shows a software interface titled "General Ledger Software for Accounting". The main window is titled "PURCHASES JOURNAL" and displays a table with the following data:

Date	Account Credited	Ref.	Accounts Payable Cr.	Inventory Dr.		Other Accounts Dr.		
				Inventory Dr.	Supplies Dr.	Account	Ref.	Amount
2020								
June 1	Signe Audio	✓	2,000		2,000			
3	Wight Co.	✓	1,500	1,500				
5	Orange Tree Co.	✓	2,600			Equipment	I57	2,600
30	Sue's Business Forms	✓	800		800			
			56,600	43,000	8,700			4,900

The software interface includes a menu bar (File, Edit, View, Go, Bookmarks, Tools, Help) and a toolbar with buttons for Problem, Entries, Post, Closing, Reports, Tools, and Help. The bottom navigation bar includes links for start, General Ledger, General Jrn1, Sales Jrn1, Cash Receipts Jrn1, Purchases Jrn1, and other journal tabs.

Cash Payments Journal

In a **cash payments (cash disbursements) journal**, companies record all disbursements of cash. Entries are made from prenumbered checks. Because companies make cash payments for various purposes, the cash payments journal has multiple columns. **Illustration 7.16** shows a four-column journal.

ILLUSTRATION 7.16 Journalizing and posting the cash payments journal

Journalizing Cash Payments Transactions

The procedures for journalizing transactions in this journal are similar to those for the cash receipts journal. Karns records each transaction on one line, and for each line there must be equal debit and credit amounts. The entries in the cash payments journal in Illustration 7.16 are based on the following transactions for Karns Wholesale Supply.

- May 1 Issued check No. 101 for \$1,200 for the annual premium on a fire insurance policy.
 3 Issued check No. 102 for \$100 in payment of freight when terms were FOB shipping point.
 8 Issued check No. 103 for \$4,400 for the purchase of merchandise.
 10 Sent check No. 104 for \$10,780 to Jasper Manufacturing Inc. in payment of May 6 invoice for \$11,000 less a 2% discount.
 19 Mailed check No. 105 for \$6,984 to Eaton and Howe Inc. in payment of May 10 invoice for \$7,200 less a 3% discount.
 23 Sent check No. 106 for \$6,831 to Fabor and Son in payment of May 14 invoice for \$6,900 less a 1% discount.
 28 Sent check No. 107 for \$17,150 to Jasper Manufacturing Inc. in payment of May 19 invoice for \$17,500 less a 2% discount.
 30 Issued check No. 108 for \$500 to D. A. Karns as a cash withdrawal for personal use.

Note that whenever Karns enters an amount in the Other Accounts column, it must identify a specific general ledger account in the Account Debited column. The entries for checks No. 101, 102, 103, and 108 illustrate this situation. Similarly, Karns must identify a subsidiary account in the Account Debited column whenever it enters an amount in the Accounts Payable column. See, for example, the entry for check No. 104.

After Karns journalizes the cash payments journal, it totals the columns. The totals are then balanced to prove the equality of debits and credits.

Posting the Cash Payments Journal

The procedures for posting the cash payments journal are similar to those for the cash receipts journal. Karns posts the amounts recorded in the Accounts Payable column individually to the subsidiary ledger and in total to the control account. It posts Inventory and Cash only in total at the end of the month. Transactions in the Other Accounts column are posted individually to the appropriate account(s) affected. The company does not post totals for the Other Accounts column.

Illustration 7.16 shows the posting of the cash payments journal. Note that Karns uses the symbol **CP** as the posting reference. After postings are completed, the company proves the equality of the debit and credit balances in the general ledger. In addition, the control account balances should agree with the subsidiary ledger total balance. **Illustration 7.17** shows the agreement of these balances.

Schedule of Accounts Payable (from accounts payable subsidiary ledger)		General Ledger	
Eaton and Howe Inc.	\$12,600	Cash	\$ 5,824
Fabor and Son	8,700	Accounts Receivable	51,180
	<u>\$21,300</u>	Inventory	2,425
		Prepaid Insurance	1,200
		Owner's Drawings	500
		Sales Discounts	781
		Cost of Goods Sold	65,120
			<u>\$127,030</u>
		Debits	
		Notes Payable	\$ 6,000
		Accounts Payable	21,300
		Owner's Capital	5,000
		Sales Revenue	94,730
			<u>\$127,030</u>
		Credits	

ILLUSTRATION 7.17

Proving the ledgers after postings from the sales, cash receipts, purchases, and cash payments journals

Effects of Special Journals on the General Journal

Special journals for sales, purchases, and cash substantially reduce the number of entries that companies make in the general journal. **Only transactions that cannot be entered in a special journal are recorded in the general journal.** For example, a company may use the general journal to record such transactions as granting of credit to a customer for a sales return or allowance, granting of credit from a supplier for purchases returned, acceptance of a note receivable from a customer, and purchase of equipment by issuing a note payable. Also, **correcting, adjusting, and closing entries are made in the general journal.**

The general journal has columns for date, account title and explanation, reference, and debit and credit amounts. When control and subsidiary accounts are not involved, the procedures for journalizing and posting of transactions are the same as those described in earlier chapters. When control and subsidiary accounts are involved, companies make two changes from the earlier procedures:

1. In **journalizing**, they identify both the control and the subsidiary accounts.
2. In **posting**, there must be a **dual posting**: once to the control account and once to the subsidiary account.

To illustrate, assume that on May 31, Karns Wholesale Supply returns \$500 of merchandise for credit to Fabor and Son. **Illustration 7.18** shows the entry in the general journal and the posting of the entry.

ILLUSTRATION 7.18 Journalizing and posting the general journal

The screenshot displays three windows of a General Ledger software:

- GENERAL JOURNAL** (Top Window): Shows a journal entry for May 31. Debit 500 is posted to Accounts Payable-Fabor and Son (Ref. 201/✓) and to Inventory (Ref. 120). Credit 500 is posted to (Received credit for returned goods).
- ACCOUNTS PAYABLE SUBSIDIARY LEDGER** (Bottom Left Window): Shows the Fabor and Son subsidiary ledger. A debit of 500 is posted on May 31 under Ref. GI, increasing the balance to 8,200.
- GENERAL LEDGER** (Bottom Right Window): Shows the main general ledger. A debit of 500 is posted on May 31 under Ref. GI to the Inventory account (No. 120), and a credit of 500 is posted to the Accounts Payable-Fabor and Son account (No. 201), both increasing their respective balances.

Red arrows indicate the flow of the dual posting process from the general journal to the subsidiary ledger and then to the main general ledger.

Note that the general journal indicates two accounts (Accounts Payable, and Fabor and Son) for the debit, and two postings ("201/✓") in the reference column. One debit is posted to the control account and another debit is posted to the creditor's account in the subsidiary

ledger. If Karns receives cash instead of credit on this return, then it would record the transaction in the cash receipts journal.

Cyber Security: A Final Comment

Have you ever been hacked? With the increasing use of cell phones, tablets, and other social media outlets, a real risk exists that your confidential information may be stolen and used illegally. Companies, individuals, and even nations have all been victims of **cybercrime**—a crime that involves the Internet, a computer system, or computer technology.

For companies, cybercrime is clearly a major threat as the hacking of employees' or customers' records related to cybercrime can cost millions of dollars. Unfortunately, the numbers of security breaches are increasing. A security breach at **Target**, for example, cost the company a minimum of \$20 million, the CEO lost his job, and sales plummeted.

Here are three reasons for the rise in the successful hacks of corporate computer records.

1. Companies and their employees continue to increase their activity on the Internet, primarily due to the use of mobile devices and cloud computing.
2. Companies today collect and store unprecedented amounts of personal data on customers and employees.
3. Companies often take measures to protect themselves from cyber security attacks but then fail to check if employees are carrying out the proper security guidelines.

Note that cyber security risks extend far beyond company operations and compliance. Many hackers target highly sensitive intellectual information or other strategic assets. **Illustration 7.19** highlights the type of hackers and their motives, targets and impacts.

ILLUSTRATION 7.19 Profiles of hackers

Malicious Actors	Motives	Targets	Impacts
Nation-state	<ul style="list-style-type: none"> • Economic, political, and/or military advantage 	<ul style="list-style-type: none"> • Trade secrets • Sensitive business information • Emerging technologies • Critical infrastructure 	<ul style="list-style-type: none"> • Loss of competitive advantage • Disruption to critical infrastructure
Organized crime	<ul style="list-style-type: none"> • Immediate financial gain • Collect information for future financial gains 	<ul style="list-style-type: none"> • Financial/payment systems • Personally identifiable information • Payment card information • Protected health information 	<ul style="list-style-type: none"> • Costly regulatory inquiries and penalties • Consumer and shareholder lawsuits • Loss of consumer confidence
Hacktivists	<ul style="list-style-type: none"> • Influence political and/or social change • Pressure businesses to change their practices 	<ul style="list-style-type: none"> • Corporate secrets • Sensitive business information • Information related to key executives, employees, customers, and business partners 	<ul style="list-style-type: none"> • Disruption of business activities • Harm to brand and reputation • Loss of consumer confidence
Insiders	<ul style="list-style-type: none"> • Personal advantage, monetary gain • Professional revenge • Patriotism 	<ul style="list-style-type: none"> • Sales, deals, market strategies • Corporate secrets, intellectual property • Business operations • Personnel information 	<ul style="list-style-type: none"> • Trade secret disclosure • Operational disruption • Harm to brand and reputation • National security impact

Source: PriceWaterhouseCoopers, "Answering Your Cybersecurity Questions" (January 2014).

Companies now recognize that cyber security systems that protect confidential data must be implemented. It follows that companies (and nations and individuals) must continually verify that their cyber security defenses are sound and uncompromised.

DO IT! 3 | Special Journals

Swisher Company had the following transactions during March.

1. Collected cash on account from Oakland Company.
2. Purchased equipment by signing a note payable.
3. Sold merchandise on account.
4. Purchased merchandise on account.
5. Paid \$2,400 for a 2-year insurance policy.

Identify the journal in which each of the transactions above is recorded. The company uses the special journals described in the chapter plus a general journal.

Solution

- | | |
|--|-----------------------|
| 1. Collected cash on account from Oakland Company. | Cash receipts journal |
| 2. Purchased equipment by signing a note payable. | General journal |
| 3. Sold merchandise on account. | Sales journal |
| 4. Purchased merchandise on account. | Purchases journal |
| 5. Paid \$2,400 for a 2-year insurance policy. | Cash payments journal |

Related exercise material: BE7.6, BE7.7, BE7.8, BE7.9, BE7.10, DO IT! 7.3, E7.6, E7.7, E7.8, and E7.10.

ACTION PLAN

- Determine if the transaction involves the receipt of cash (cash receipts journal) or the payment of cash (cash payments journal).
- Determine if the transaction is a sale of merchandise on account (sales journal) or a purchase of merchandise on account (purchases journal).
- All other transactions are recorded in the general journal.

Review and Practice

Learning Objectives Review

1 Explain the basic concepts of an accounting information system.

The basic principles in developing an accounting information system are cost-effectiveness, useful output, and flexibility. Most companies use a computerized accounting system. Smaller companies use entry-level software such as QuickBooks® or Sage 50. Larger companies use custom-made software packages, which often integrate all aspects of the organization.

2 Describe the nature and purpose of a subsidiary ledger.

A subsidiary ledger is a group of accounts with a common characteristic. It facilitates the recording process by freeing the general ledger from details of individual balances.

3 Record transactions in special journals.

Companies use special journals to group similar types of transactions. In a special journal, generally only one line is used to record a complete transaction.

Glossary Review

Accounting information system A system that collects and processes transaction data and communicates financial information to decision-makers. (p. 7-2).

Accounts payable (creditors') subsidiary ledger A subsidiary ledger that collects transaction data of individual creditors. (p. 7-6).

Accounts receivable (customers') subsidiary ledger A subsidiary ledger that collects transaction data of individual customers. (p. 7-6).

Cash payments (cash disbursements) journal A special journal that records all disbursements of cash. (p. 7-17).

Cash receipts journal A special journal that records all cash received. (p. 7-11).

Control account An account in the general ledger that summarizes subsidiary ledger data. (p. 7-6).

Cybercrime A crime that involves the Internet, a computer system, or computer technology. (p. 7-21).

Manual accounting system A system in which someone performs each of the steps in the accounting cycle by hand. (p. 7-5).

Purchases journal A special journal that records all purchases of merchandise on account. (p. 7-15).

Sales journal A special journal that records all sales of merchandise on account. (p. 7-9).

Special journals Journals that record similar types of transactions, such as all credit sales. (p. 7-8).

Subsidiary ledger A group of accounts with a common characteristic. (p. 7-5).

Practice Multiple-Choice Questions

1. **(LO 1)** The basic principles of an accounting information system include all of the following **except**:
 - a. cost-effectiveness.
 - b. flexibility.
 - c. useful output.
 - d. periodicity.
2. **(LO 1)** Which of the following is **not** an advantage of computerized accounting systems?
 - a. Data is entered only once in computerized accounting systems.
 - b. Computerized accounting systems provide up-to-date information.
 - c. Computerized accounting systems eliminate entering of transaction information.
 - d. Computerized accounting systems eliminate many errors resulting from human intervention.
3. **(LO 2)** Which of the following is **incorrect** concerning subsidiary ledgers?
 - a. The purchases ledger is a common subsidiary ledger for creditor accounts.
 - b. The accounts receivable ledger is a subsidiary ledger.
 - c. A subsidiary ledger is a group of accounts with a common characteristic.
 - d. An advantage of the subsidiary ledger is that it permits a division of labor in posting.
4. **(LO 2)** Two common subsidiary ledgers are:
 - a. accounts receivable and cash receipts.
 - b. accounts payable and cash payments.
 - c. accounts receivable and accounts payable.
 - d. sales and cost of goods sold.
5. **(LO 2)** At the beginning of the month, the accounts receivable subsidiary ledger showed balances for Apple Company \$5,000 and Berry Company \$7,000. During the month, credit sales were made to Apple \$6,000, Berry \$4,500, and Cantaloupe \$8,500. Cash was collected on account from Berry \$11,500 and Cantaloupe \$3,000. At the end of the month, the control account Accounts Receivable in the general ledger should have a balance of:
 - a. \$11,000.
 - b. \$12,000.
 - c. \$16,500.
 - d. \$31,000.
6. **(LO 3)** A sales journal will be used for:

Credit Sales	Cash Sales	Sales Discounts
a. no	yes	yes
b. yes	no	yes
c. yes	no	no
d. yes	yes	no
7. **(LO 3)** A purchase of equipment on account is recorded in the:
 - a. cash receipts journal.
 - b. purchases journal.
 - c. cash payments journal.
 - d. general journal.
8. **(LO 3)** A purchase of equipment using cash is recorded in the:
 - a. cash receipts journal.
 - b. purchases journal.
 - c. cash payments journal.
 - d. general journal.
9. **(LO 3)** Which of the following statements is **correct**?
 - a. The sales discount column is included in the cash receipts journal.
 - b. The purchases journal records all purchases of merchandise whether for cash or on account.
 - c. The cash receipts journal records sales on account.
 - d. Merchandise returned by the buyer is recorded by the seller in the purchases journal.
10. **(LO 3)** Dotel Company's cash receipts journal includes an Accounts Receivable column and an Other Accounts column. At the end of the month, these columns are posted to the general ledger as:

Accounts Receivable	Other Accounts
a. a column total	a column total
b. individual amounts	a column total
c. individual amounts	individual amounts
d. a column total	individual amounts
11. **(LO 3)** Which of the following is **incorrect** concerning the posting of the cash receipts journal?
 - a. The total of the Other Accounts column is not posted.
 - b. All column totals except the total for the Other Accounts column are posted once at the end of the month to the account title(s) specified in the column heading.
 - c. The totals of all columns are posted daily to the accounts specified in the column heading.
 - d. The individual amounts in a column posted in total to a control account are posted daily to the subsidiary ledger account specified in the Account Credited column.
12. **(LO 3)** Postings from the purchases journal to the subsidiary ledger are generally made:
 - a. yearly.
 - b. monthly.
 - c. weekly.
 - d. daily.
13. **(LO 3)** Which statement is **incorrect** regarding the general journal?
 - a. Only transactions that cannot be entered in a special journal are recorded in the general journal.

- b. Dual postings are always required in the general journal.
 - c. The general journal may be used to record acceptance of a note receivable in payment of an account receivable.
 - d. Correcting, adjusting, and closing entries are made in the general journal.
- 14. (LO 3)** When companies use special journals:
- a. they record all purchase transactions in the purchases journal.
 - b. they record all cash received, except from cash sales, in the cash receipts journal.
- 15. (LO 3)** If a customer returns goods for credit, the selling company normally makes an entry in the:
- a. cash payments journal.
 - b. sales journal.
 - c. general journal.
 - d. cash receipts journal.

Solutions

- 1. d.** Periodicity is not one of the basic principles of accounting information systems. The other choices are true statements.
- 2. c.** Computerized accounting systems do not eliminate the entering of transaction information. The other choices are advantages of computerized accounting systems.
- 3. a.** The accounts payable ledger, not the purchases ledger, is a common subsidiary ledger for creditor accounts. The other choices are true statements.
- 4. c.** Accounts receivable and accounts payable are two common subsidiary ledgers. The other choices are incorrect because (a) cash receipts, (b) cash payments, and (d) sales revenue and cost of goods sold are not subsidiary ledgers.
- 5. c.** The accounts receivable subsidiary ledger balances are the following: Apple Company \$11,000 (beginning balance \$5,000 + credit sales \$6,000), Berry Company \$0 (beginning balance \$7,000 + credit sales \$4,500 – cash collected on account \$11,500), and Cantaloupe \$5,500 (credit sales \$8,500 – cash collected on account \$3,000). The Accounts Receivable control account in the general ledger therefore has a balance of \$16,500 (\$11,000 + \$0 + \$5,500), not (a) \$11,000, (b) \$12,000, or (d) \$31,000.
- 6. c.** The sales journal is used for credit sales. The cash receipts journal is used for cash sales and sales discounts. Therefore, choices (a), (b), and (d) are incorrect.
- 7. d.** Unless the company uses a multi-column purchases journal, the general journal is used to record the purchase of equipment **on account**. The other choices are incorrect because (a) the cash receipts journal would be used only if cash is received, (b) a one-column purchases journal cannot be used to record a purchase of equipment on account, and (c) the cash payments journal would be used only if this is a cash purchase.
- 8. c.** The cash payments journal includes all cash paid, including all **cash** purchases. The other choices are incorrect because (a) the cash receipts journal includes all cash received, including cash sales, not cash purchases; (b) the purchases journal includes only purchases of
- 9. a.** they record all cash disbursements in the cash payments journal.
- 10. d.** they record all cash collections in the cash collections journal.
- 11. c.** The totals of all columns are not posted daily to the accounts specified in the column heading. Instead, all column totals except the total for the Other Accounts column (which is never posted) are posted once at the end of the month to the account title(s) specified in the column heading. The other choices are true statements.
- 12. d.** Postings from the purchases journal to the subsidiary ledger are usually made daily, not (a) yearly, (b) monthly, or (c) weekly.
- 13. b.** Dual postings are not always required in the general journal. Only when control and subsidiary accounts are involved are companies required to dual post: once to the control account and once to the subsidiary account. The other choices are true statements.
- 14. c.** When special journals are used, companies record all cash disbursements in the cash payments journal. The other choices are incorrect because when special journals are used, (a) companies record only purchases of inventory on account in the purchases journal; (b) companies record all cash receipts, including cash sales, in the cash receipts journal; and (d) a general journal is still needed.
- 15. c.** When a customer returns goods for **credit** (i.e., no cash is involved), the selling company records the transaction in the general journal, not the (a) cash payments journal, (b) sales journal, or (d) cash receipts journal.

Practice Brief Exercises

Identify subsidiary ledger balances.

- 1. (LO 2)** The following information is related to Garcia Company for its first month of operations. Identify the balances that appear in the accounts receivable subsidiary ledger and the accounts receivable balance that appears in the general ledger at the end of January.

Credit Sales			Cash Collections		
Jan. 7	Rodan Co.	\$11,000	Jan. 17	Rodan Co.	\$6,000
15	Lawry Co.	7,000	24	Lawry Co.	5,000
23	Anderson Co.	10,000	29	Anderson Co.	8,000

Solution**1.****Accounts Receivable Subsidiary Ledger**

Rodan Co.				
Date	Ref.	Debit	Credit	Balance
Jan. 7		11,000		11,000
17			6,000	5,000

Lawry Co.

Date	Ref.	Debit	Credit	Balance
Jan. 15		7,000		7,000
24			5,000	2,000

Anderson Co.

Date	Ref.	Debit	Credit	Balance
Jan. 23		10,000		10,000
29			8,000	2,000

General Ledger

Accounts Receivable				
Date	Ref.	Debit	Credit	Balance
Jan. 31		28,000		28,000
31			19,000	9,000

- 2. (LO 2)** Presented below is information related to Garcia Company for its first month of operations. Identify the balances that appear in the accounts payable subsidiary ledger and the accounts payable balance that appears in the general ledger at the end of January.

Identify subsidiary ledger balances.

Credit Purchases		
Jan. 4	Jones Co.	\$22,000
12	Holland Co.	14,000
19	Geovany Co.	20,000

Cash Payments		
Jan. 13	Jones Co.	\$13,000
20	Holland Co.	11,000
25	Geovany Co.	17,000

Solution**2.****Accounts Payable Subsidiary Ledger**

Jones Co.				
Date	Ref.	Debit	Credit	Balance
Jan. 4			22,000	22,000
13		13,000		9,000

General Ledger

Accounts Payable				
Date	Ref.	Debit	Credit	Balance
Jan. 31			56,000	56,000
31		41,000		15,000

Holland Co.

Date	Ref.	Debit	Credit	Balance
Jan. 12			14,000	14,000
20		11,000		3,000

Geovany Co.

Date	Ref.	Debit	Credit	Balance
Jan. 19			20,000	20,000
25		17,000		3,000

- 3. (LO 3)** Soto Company has the following selected transactions during March.

- Mar. 2 Purchased equipment costing \$9,400 from Jennings Company on account.
 5 Received credit of \$630 from May Company for merchandise damaged in shipment to Soto.
 7 Issued credit of \$500 to Morneau Company for merchandise the customer returned. The returned merchandise had a cost of \$300.

Journalize transactions in general journal.

Soto Company uses a one-column purchases journal, a sales journal, the columnar cash journals used in the text, and a general journal. Journalize the transactions in the general journal.

Solution**3.**

Mar. 2	Equipment	9,400	
	Accounts Payable		9,400
5	Accounts Payable	630	
	Inventory		630
7	Sales Returns and Allowances	500	
	Accounts Receivable		500
	Inventory	300	
	Cost of Goods Sold		300

Practice Exercises

Post various journals to control and subsidiary accounts.

1. (LO 2, 3) On June 1, the balance of the Accounts Receivable control account in the general ledger of Rath Company was \$13,620. The customers' subsidiary ledger contained account balances as follows: Wilson \$2,000, Sanchez \$3,140, Roberts \$2,560, and Marks \$5,920. At the end of June, the various journals contained the following information.

Sales journal: Sales to Roberts \$900, to Wilson \$1,400, to Hardy \$1,500, and to Marks \$1,200.

Cash receipts journal: Cash received from Roberts \$1,610, from Marks \$2,600, from Hardy \$580, from Sanchez \$2,100, and from Wilson \$1,540.

General journal: An allowance is granted to Marks \$325.

Instructions

- Set up control and subsidiary accounts and enter the beginning balances. Do not construct the journals.
- Post the various journals. Post the items as individual items or as totals, whichever would be the appropriate procedure. (No sales discounts given.)
- Prepare a schedule of accounts receivable and prove the agreement of the control account with the subsidiary ledger at June 30, 2020.

Solution**1. a. and b.****GENERAL LEDGER**

Accounts Receivable					
Date	Explanation	Ref.	Debit	Credit	Balance
June 1	Balance	✓			13,620
		S	5,000		18,620
		CR		8,430	10,190

Sanchez	1,040
Wilson	1,860
Total	<u>\$9,865</u>
Accounts Receivable	<u>\$9,865</u>

2. (LO 3) Below are some typical transactions incurred by Brimmer Company.

Indicate use of special journals.

1. Received credit for merchandise purchased on credit.
2. Payment of employee wages.
3. Sales discount taken on goods sold.
4. Income summary closed to owner's capital.
5. Purchase of office supplies for cash.
6. Depreciation on building.
7. Purchase of merchandise on account.
8. Return of merchandise sold for credit.
9. Payment of creditors on account.
10. Collection on account from customers.
11. Sale of merchandise on account.
12. Sale of land for cash.
13. Sale of merchandise for cash.

Instructions

For each transaction, indicate whether it would normally be recorded in a cash receipts journal, cash payments journal, sales journal, single-column purchases journal, or general journal.

Solution

- | | |
|--------------------------|---------------------------|
| 2. 1. General journal | 8. General journal |
| 2. Cash payments journal | 9. Cash payments journal |
| 3. Cash receipts journal | 10. Cash receipts journal |
| 4. General journal | 11. Sales journal |
| 5. Cash payments journal | 12. Cash receipts journal |
| 6. General journal | 13. Cash receipts journal |
| 7. Purchases journal | |

Practice Problem

- (LO 3) Cassandra Wilson Company uses a six-column cash receipts journal with the following columns.

Journalize transactions in cash receipts journal and explain posting procedure.

Cash (Dr.)	Other Accounts (Cr.)
Sales Discounts (Dr.)	Cost of Goods Sold (Dr.) and
Accounts Receivable (Cr.)	Inventory (Cr.)
Sales Revenue (Cr.)	

Cash receipts transactions for the month of July 2020 are as follows.

- July 3 Cash sales total \$5,800 (cost, \$3,480).
 5 Received a check for \$6,370 from Jeltz Company in payment of an invoice dated June 26 for \$6,500, terms 2/10, n/30.

- 9 Cassandra Wilson, the proprietor, made an additional investment of \$5,000 in cash in the business.
- 10 Cash sales total \$12,519 (cost, \$7,511).
- 12 Received a check for \$7,275 from R. Eliot & Co. in payment of a \$7,500 invoice dated July 3, terms 3/10, n/30.
- 15 Received an advance of \$700 cash for future services.
- 20 Cash sales total \$15,472 (cost, \$9,283).
- 22 Received a check for \$5,880 from Beck Company in payment of \$6,000 invoice dated July 13, terms 2/10, n/30.
- 29 Cash sales total \$17,660 (cost, \$10,596).
- 31 Received cash of \$200 for interest earned for July.

Instructions

- a. Journalize the transactions in the cash receipts journal.
- b. Contrast the posting of the Accounts Receivable and Other Accounts columns.

Solution

a.

**CASSANDRA WILSON COMPANY
Cash Receipts Journal**

CR1

Date	Account Credited	Ref.	Cash Dr.	Sales Discounts Dr.	Accounts Receivable Cr.	Sales Revenue Cr.	Other Accounts Cr.	Cost of Goods Sold Dr. Inventory Cr.
2020								
7/3	Jeltz Company		5,800			5,800		3,480
5	Owner's Capital		6,370	130	6,500		5,000	
9			5,000					
10	R. Eliot & Co.		12,519			12,519		7,511
12			7,275	225	7,500		700	
15	Unearned Service Revenue		700					
20			15,472			15,472		9,283
22	Beck Company		5,880	120	6,000			
29			17,660			17,660		10,596
31	Interest Revenue		200				200	
			<u>76,876</u>	<u>475</u>	<u>20,000</u>	<u>51,451</u>	<u>5,900</u>	<u>30,870</u>

- b. The Accounts Receivable column total is posted as a credit to Accounts Receivable. The individual amounts are credited to the customers' accounts identified in the Account Credited column, which are maintained in the accounts receivable subsidiary ledger. The amounts in the Other Accounts column are posted individually. They are credited to the account titles identified in the Account Credited column.

Brief Exercises, DO IT! Exercises, Exercises, Problems, and many additional resources are available for practice in WileyPLUS.

Questions

1. (a) What is an accounting information system? (b) "An accounting information system applies only to a manual system." Do you agree? Explain.
2. Certain principles should be followed in the development of an accounting information system. Identify and explain each of the principles.
3. What are common features of computerized accounting packages beyond recording transactions and preparing financial statements?
4. How does an enterprise resource planning (ERP) system differ from an entry-level computerized accounting system?
5. What are the advantages of using subsidiary ledgers?

- 6.** (a) When do companies normally post to (1) the subsidiary accounts and (2) the general ledger control accounts? (b) Describe the relationship between a control account and a subsidiary ledger.
- 7.** Identify and explain the four special journals discussed in the chapter. List an advantage of using each of these journals rather than using only a general journal.
- 8.** Kensington Company uses special journals. It recorded in a sales journal a sale made on account to R. Stiner for \$435. A few days later, R. Stiner returns \$70 worth of merchandise for credit. Where should Kensington Company record the sales return? Why?
- 9.** A \$500 purchase of merchandise on account from Lore Company was properly recorded in the purchases journal. When posted, however, the amount recorded in the subsidiary ledger was \$50. How might this error be discovered?
- 10.** Why would special journals used in different businesses not be identical in format? What type of business would maintain a cash receipts journal but not include a column for accounts receivable?
- 11.** The cash and the accounts receivable columns in the cash receipts journal were mistakenly over-added by \$4,000 at the end of the month. (a) Will the customers' ledger agree with the Accounts Receivable control account? (b) Assuming no other errors, will the trial balance totals be equal?
- 12.** One column total of a special journal is posted at month-end to only two general ledger accounts. One of these two accounts is Accounts Receivable. What is the name of this special journal? What is the other general ledger account to which that same month-end total is posted?
- 13.** In what journal would the following transactions be recorded? (Assume that a two-column sales journal and a single-column purchases journal are used.)
- a.** Recording of depreciation expense for the year.
b. Credit given to a customer for merchandise purchased on credit and returned.
c. Sales of merchandise for cash.
d. Sales of merchandise on account.
e. Collection of cash on account from a customer.
f. Purchase of office supplies on account.
- 14.** In what journal would the following transactions be recorded? (Assume that a two-column sales journal and a single-column purchases journal are used.)
- a.** Cash received from signing a note payable.
b. Investment of cash by the owner of the business.
c. Closing of the expense accounts at the end of the year.
d. Purchase of merchandise on account.
e. Credit received for merchandise purchased and returned to supplier.
f. Payment of cash on account due a supplier.
- 15.** What transactions might be included in a multiple-column purchases journal that would not be included in a single-column purchases journal?
- 16.** Give an example of a transaction in the general journal that causes an entry to be posted twice (i.e., to two accounts), one in the general ledger, the other in the subsidiary ledger. Does this affect the debit/credit equality of the general ledger?
- 17.** Give some examples of appropriate general journal transactions for an organization using special journals.

Brief Exercises

BE7.1 (LO 1) Indicate whether each of the following statements is true or false.

- When designing an accounting system, we need to think about the needs and knowledge of both the top managers and various other users.
- When the environment changes as a result of technological advances, increased competition, or government regulation, an accounting system does not have to be sufficiently flexible to meet the changes in order to save money.
- In developing an accounting system, cost is relevant. The benefits obtained from the information disseminated must outweigh the cost of providing it.

Explain basic concepts of an accounting information system.

BE7.2 (LO 1) Here is a list of words or phrases related to computerized accounting systems.

- | | |
|--|----------------------|
| 1. Entry-level software. | 4. Audit trail. |
| 2. Enterprise resource planning systems. | 5. Internal control. |
| 3. Network-compatible. | |

Explain basic concepts of an accounting information system.

Instructions

Match each word or phrase with the best description of it.

- _____ a. Allows multiple users to access the system at the same time.
 _____ b. Enables the tracking of all transactions.
 _____ c. Identifies suspicious transactions or likely mistakes such as wrong account numbers or duplicate transactions.
 _____ d. Large-scale computer systems that integrate all aspects of the organization including accounting, sales, human resource management, and manufacturing.
 _____ e. System for companies with revenues of less than \$5 million and up to 20 employees.

Explain basic concepts of an accounting information system.

BE7.3 (LO 1) Benji Borke has prepared the following list of statements about accounting information systems.

1. The accounting information system includes each of the steps of the accounting cycle, the documents that provide evidence of transactions that have occurred, and the accounting records.
2. The benefits obtained from information provided by the accounting information system need not outweigh the cost of providing that information.
3. Designers of accounting systems must consider the needs and knowledge of various users.
4. If an accounting information system is cost-effective and provides useful output, it does not need to be flexible.

Instructions

Identify each statement as true or false. If false, indicate how to correct the statement.

Identify subsidiary ledger balances.

BE7.4 (LO 2) Presented below is information related to Gantner Company for its first month of operations. Identify the balances that appear in the accounts receivable subsidiary ledger and the accounts receivable balance that appears in the general ledger at the end of January.

Credit Sales			Cash Collections		
Jan. 7	Austin Co.	\$10,000	Jan. 17	Austin Co.	\$7,000
15	Diaz Co.	8,000	24	Diaz Co.	4,000
23	Noble Co.	9,000	29	Noble Co.	9,000

Identify subsidiary ledger accounts.

BE7.5 (LO 2) Identify in what ledger (general or subsidiary) each of the following accounts is shown.

- a. Rent Expense.
- b. Accounts Receivable—Cabreria.
- c. Notes Payable.
- d. Accounts Payable—Pacheco.

Identify special journals.

BE7.6 (LO 3) Identify the journal in which each of the following transactions is recorded.

- a. Cash sales.
- b. Owner withdrawal of cash.
- c. Cash purchase of land.
- d. Credit sales.
- e. Purchase of merchandise on account.
- f. Receipt of cash for services performed.

Identify entries to cash receipts journal.

BE7.7 (LO 3) Indicate whether each of the following debits and credits is included in the cash receipts journal. (Use “Yes” or “No” to answer this question.)

- a. Debit to Sales Revenue.
- b. Credit to Inventory.
- c. Credit to Accounts Receivable.
- d. Debit to Accounts Payable.

Identify transactions for special journals.

BE7.8 (LO 3) Villar Co. uses special journals and a general journal. Identify the journal in which each of the following transactions is recorded.

- a. Purchased equipment on account.
- b. Purchased merchandise on account.
- c. Paid utility expense in cash.
- d. Sold merchandise on account.

Identify transactions for special journals.

BE7.9 (LO 3) Identify the special journal(s) in which the following column headings appear.

- a. Sales Discounts Dr.
- b. Accounts Receivable Cr.
- c. Cash Dr.
- d. Sales Revenue Cr.
- e. Inventory Dr.

Indicate postings for cash receipts journal.

BE7.10 (LO 3) Rauch Computer Components Inc. uses a multi-column cash receipts journal. Indicate which column(s) is/are posted only in total, only daily, or both in total and daily.

- a. Accounts Receivable.
- b. Sales Discounts.
- c. Cash.
- d. Other Accounts.

DO IT! Exercises

DO IT! 7.1 (LO 1) Indicate whether the following statements are true or false. If false, indicate how to correct the statement.

1. A computerized accounting system must be customized to meet a company's needs.
2. Companies with revenues of less than \$5 million and up to 20 employees generally use entry-level programs rather than ERP systems.
3. A manual accounting system provides more timely financial information than a computerized system.

Explain basic concepts of an accounting information system.

DO IT! 7.2 (LO 2) Presented below is information related to Rizzo Company for its first month of operations. Determine the balances that appear in the accounts payable subsidiary ledger. What Accounts Payable balance appears in the general ledger at the end of January?

Determine subsidiary and general ledger balances.

Credit Purchases			Cash Paid		
Jan. 6	Gorst Company	\$11,000	Jan. 11	Gorst Company	\$ 6,500
Jan. 10	Tian Company	12,000	Jan. 16	Tian Company	12,000
Jan. 23	Maddox Company	10,000	Jan. 29	Maddox Company	7,700

DO IT! 7.3 (LO 3) Hinske Company had the following transactions during April.

Identify special journals.

1. Sold merchandise on account.
2. Purchased merchandise on account.
3. Collected cash from a sale to Renfro Company.
4. Recorded accrued interest on a note payable.
5. Paid \$2,000 for supplies.

Identify the journal in which each of the transactions above is recorded.

Exercises

E7.1 (LO 2, 3) Nex Company uses both special journals and a general journal as described in this chapter. On June 30, after all monthly postings had been completed, the Accounts Receivable control account in the general ledger had a debit balance of \$340,000; the Accounts Payable control account had a credit balance of \$77,000.

Determine control account balances, and explain posting of special journals.

The July transactions recorded in the special journals are summarized below. No entries affecting accounts receivable and accounts payable were recorded in the general journal for July.

Sales journal	Total sales \$161,400
Purchases journal	Total purchases \$66,400
Cash receipts journal	Accounts receivable column total \$131,000
Cash payments journal	Accounts payable column total \$47,500

Instructions

- a. What is the balance of the Accounts Receivable control account after the monthly postings on July 31?
- b. What is the balance of the Accounts Payable control account after the monthly postings on July 31?
- c. To what account(s) is the column total of \$161,400 in the sales journal posted?
- d. To what account(s) is the accounts receivable column total of \$131,000 in the cash receipts journal posted?

E7.2 (LO 2) Writing Presented below is the subsidiary accounts receivable account of Jill Longley.

Explain postings to subsidiary ledger.

Date	Ref.	Debit	Credit	Balance
2020				
Sept. 2	S31	61,000		61,000
9	G4		14,000	47,000
27	CR8		47,000	—

Instructions

Write a memo to Sara Fogelman, chief financial officer, that explains each transaction.

Post various journals to control and subsidiary accounts.

E7.3 (LO 2, 3) On September 1, the balance of the Accounts Receivable control account in the general ledger of Montgomery Company was \$10,960. The customers' subsidiary ledger contained account balances as follows: Hurley \$1,440, Andino \$2,640, Fowler \$2,060, and Sogard \$4,820. At the end of September, the various journals contained the following information.

Sales journal: Sales to Sogard \$800, to Hurley \$1,260, to Giambi \$1,330, and to Fowler \$1,600.

Cash receipts journal: Cash received from Fowler \$1,310, from Sogard \$3,300, from Giambi \$380, from Andino \$1,800, and from Hurley \$1,240.

General journal: An allowance is granted to Sogard \$220.

Instructions

- a. Set up control and subsidiary accounts and enter the beginning balances. Do not construct the journals.
- b. Post the various journals. Post the items as individual items or as totals, whichever would be the appropriate procedure. (No sales discounts given.)
- c. Prepare a schedule of accounts receivable and prove the agreement of the controlling account with the subsidiary ledger at September 30, 2020.

Determine control and subsidiary ledger balances for accounts receivable.

E7.4 (LO 2) Kieschnick Company has a balance in its Accounts Receivable control account of \$10,000 on January 1, 2020. The subsidiary ledger contains three accounts: Bixler Company, balance \$4,000; Cuddyer Company, balance \$2,500; and Freeze Company. During January, the following receivable-related transactions occurred.

	<u>Credit Sales</u>	<u>Collections</u>	<u>Returns</u>
Bixler Company	\$9,000	\$8,000	\$ -0-
Cuddyer Company	7,000	2,500	3,000
Freeze Company	8,500	9,000	-0-

Instructions

- a. What is the January 1 balance in the Freeze Company subsidiary account?
- b. What is the January 31 balance in the control account?
- c. Compute the balances in the subsidiary accounts at the end of the month.
- d. Which January transaction would not be recorded in a special journal?

Determine control and subsidiary ledger balances for accounts payable.

E7.5 (LO 2) Pennington Company has a balance in its Accounts Payable control account of \$9,250 on January 1, 2020. The subsidiary ledger contains three accounts: Hale Company, balance \$3,000; Janish Company, balance \$1,875; and Valdez Company. During January, the following payable-related transactions occurred.

	<u>Purchases</u>	<u>Payments</u>	<u>Returns</u>
Hale Company	\$6,750	\$6,000	\$ -0-
Janish Company	5,250	1,875	2,250
Valdez Company	6,375	6,750	-0-

Instructions

- a. What is the January 1 balance in the Valdez Company subsidiary account?
- b. What is the January 31 balance in the control account?
- c. Compute the balances in the subsidiary accounts at the end of the month.
- d. Which January transaction would not be recorded in a special journal?

Record transactions in sales and purchases journal.

E7.6 (LO 3) Gomes Company uses special journals and a general journal. The following transactions occurred during September 2020.

- Sept. 2 Sold merchandise on account to H. Drew, invoice no. 101, \$620, terms n/30. The cost of the merchandise sold was \$420.
- 10 Purchased merchandise on account from A. Pagan \$650, terms 2/10, n/30.
- 12 Purchased office equipment on account from R. Cairo \$6,500.
- 21 Sold merchandise on account to G. Holliday, invoice no. 102 for \$800, terms 2/10, n/30. The cost of the merchandise sold was \$480.

- 25 Purchased merchandise on account from D. Downs \$860, terms n/30.
 27 Sold merchandise to S. Miller for \$700 cash. The cost of the merchandise sold was \$400.

Instructions

- Prepare a sales journal (see Illustration 7.7) and a single-column purchases journal (see Illustration 7.13). (Use page 1 for each journal.)
- Record the transaction(s) for September that should be journalized in the sales journal and the purchases journal.

E7.7 (LO 3) R. Santiago Co. uses special journals and a general journal. The following transactions occurred during May 2020.

- May 1 R. Santiago invested \$40,000 cash in the business.
 2 Sold merchandise to Lawrie Co. for \$6,300 cash. The cost of the merchandise sold was \$4,200.
 3 Purchased merchandise for \$7,700 from J. Moskos using check no. 101.
 14 Paid salary to H. Rivera \$700 by issuing check no. 102.
 16 Sold merchandise on account to K. Stanton for \$900, terms n/30. The cost of the merchandise sold was \$630.
 22 A check of \$9,000 is received from M. Mangini in full for invoice 101; no discount given.

Record transactions in cash receipts and cash payments journal.

Instructions

- Prepare a multiple-column cash receipts journal (see Illustration 7.9) and a multiple-column cash payments journal (see Illustration 7.16). (Use page 1 for each journal.)
- Record the transaction(s) for May that should be journalized in the cash receipts journal and cash payments journal.

E7.8 (LO 3) Francisco Company uses the columnar cash journals illustrated in the textbook. In April, the following selected cash transactions occurred.

Explain journalizing in cash journals.

- Made a refund to a customer as an allowance for damaged goods.
- Received collection from customer within the 3% discount period.
- Purchased merchandise for cash.
- Paid a creditor within the 3% discount period.
- Received collection from customer after the 3% discount period had expired.
- Paid freight on merchandise purchased.
- Paid cash for office equipment.
- Received cash refund from supplier for merchandise returned.
- Withdrew cash for personal use of owner.
- Made cash sales.

Instructions

Indicate (a) the journal, and (b) the columns in the journal that should be used in recording each transaction.

E7.9 (LO 3) Writing Hasselback Company has the following selected transactions during March.

Journalize transactions in general journal and explain postings.

- Mar. 2 Purchased equipment costing \$7,400 from Bole Company on account.
 5 Received credit of \$410 from Carwell Company for merchandise damaged in shipment to Hasselback.
 7 Issued credit of \$400 to Dempsey Company for merchandise the customer returned. The returned merchandise had a cost of \$260.

Hasselback Company uses a one-column purchases journal, a sales journal, the columnar cash journals used in the text, and a general journal.

Instructions

- Journalize the transactions in the general journal.
- In a brief memo to the president of Hasselback Company, explain the postings to the control and subsidiary accounts from each type of journal.

E7.10 (LO 3) The following are some typical transactions incurred by Ricketts Company.

Indicate journalizing in special journals.

- Payment of creditors on account.
- Return of merchandise sold for credit.

3. Collection on account from customers.
4. Sale of land for cash.
5. Sale of merchandise on account.
6. Sale of merchandise for cash.
7. Received credit for merchandise purchased on credit.
8. Sales discount taken on goods sold.
9. Payment of employee wages.
10. Income summary closed to owner's capital.
11. Depreciation on building.
12. Purchase of office supplies for cash.
13. Purchase of merchandise on account.

Instructions

For each transaction, indicate whether it would normally be recorded in a cash receipts journal, cash payments journal, sales journal, single-column purchases journal, or general journal.

Explain posting to control account and subsidiary ledger.

E7.11 (LO 2, 3) The general ledger of Hensley Company contained the following Accounts Payable control account (in T-account form). Also shown is the related subsidiary ledger.

GENERAL LEDGER					
Accounts Payable					
Feb. 15	General journal	1,400	Feb. 1	Balance	26,025
28	?	?	5	General journal	265

ACCOUNTS PAYABLE LEDGER					
Benton			Parks		
	Feb. 28	Bal. 4,600		Feb. 28	Bal. ?
Dooley					
			Feb. 28 Bal. 2,300		

Instructions

- Indicate the missing posting reference and amount in the control account, and the missing ending balance in the subsidiary ledger.
- Indicate the amounts in the control account that were dual-posted (i.e., posted to the control account and the subsidiary accounts).

Prepare purchases and general journals.

E7.12 (LO 2, 3) Selected accounts from the ledgers of Youngblood Company at July 31 showed the following.

GENERAL LEDGER							
Equipment			No. 157	Inventory			No. 120
Date	Explanation	Ref.	Debit	Credit	Balance	Date	Explanation
July 1		G1	3,900		3,900	July 15

Instructions

Determine the correct amount of the end-of-month posting from the sales journal to the Accounts Receivable control account.

E7.14 (LO 3) Selected account balances for Hulse Company at January 1, 2020, are presented below.

Compute balances in various accounts.

Accounts Payable	\$14,000
Accounts Receivable	22,000
Cash	17,000
Inventory	13,500

Hulse's sales journal for January shows a total of \$110,000 in the selling-price column, and its one-column purchases journal for January shows a total of \$77,000.

The column totals in Hulse's cash receipts journal are Cash Dr. \$61,000, Sales Discounts Dr. \$1,100, Accounts Receivable Cr. \$45,000, Sales Revenue Cr. \$6,000, and Other Accounts Cr. \$11,100.

The column totals in Hulse's cash payments journal for January are Cash Cr. \$55,000, Inventory Cr. \$1,000, Accounts Payable Dr. \$46,000, and Other Accounts Dr. \$10,000. Hulse's total cost of goods sold for January is \$63,600.

Accounts Payable, Accounts Receivable, Cash, Inventory, and Sales Revenue are not involved in the Other Accounts column in either the cash receipts or cash payments journal, and are not involved in any general journal entries.

Instructions

Compute the January 31 balance for Hulse in the following accounts.

- a. Accounts Payable.
- b. Accounts Receivable.
- c. Cash.
- d. Inventory.
- e. Sales Revenue.

Problems: Set A

Journalize transactions in cash receipts journal; post to control account and subsidiary ledger.

P7.1A (LO 2, 3) Kozma Company's chart of accounts includes the following selected accounts.

101	Cash	401	Sales Revenue
112	Accounts Receivable	414	Sales Discounts
120	Inventory	505	Cost of Goods Sold
301	Owner's Capital		

On April 1, the accounts receivable ledger of Kozma Company showed the following balances: Morrow \$1,550, Rose \$1,200, Jennings Co. \$2,900, and Dent \$2,200. The April transactions involving the receipt of cash were as follows.

- Apr. 1 The owner, T. Kozma, invested additional cash in the business \$7,200.
- 4 Received check for payment of account from Dent less 2% cash discount.
- 5 Received check for \$920 in payment of invoice no. 307 from Jennings Co.
- 8 Made cash sales of merchandise totaling \$7,245. The cost of the merchandise sold was \$4,347.
- 10 Received check for \$600 in payment of invoice no. 309 from Morrow.
- 11 Received cash refund from a supplier for damaged merchandise \$740.
- 23 Received check for \$1,000 in payment of invoice no. 310 from Jennings Co.
- 29 Received check for payment of account from Rose (no cash discount allowed).

Instructions

a. Balancing totals \$25,452

c. Accounts Receivable \$1,930

Journalize transactions in cash payments journal; post to control account and subsidiary ledgers.

P7.2A (LO 2, 3) Reineke Company's chart of accounts includes the following selected accounts.

101	Cash	201	Accounts Payable
120	Inventory	306	Owner's Drawings
130	Prepaid Insurance	505	Cost of Goods Sold
157	Equipment		

On October 1, the accounts payable ledger of Reineke Company showed the following balances: Uggla Company \$2,700, Orr Co. \$2,500, Rosenthal Co. \$1,800, and Clevenger Company \$3,700. The October transactions involving the payment of cash were as follows.

- Oct. 1 Purchased merchandise, check no. 63, \$300.
- 3 Purchased equipment, check no. 64, \$800.
- 5 Paid Uggla Company balance due of \$2,700, less 2% discount, check no. 65, \$2,646.
- 10 Purchased merchandise, check no. 66, \$2,550.
- 15 Paid Rosenthal Co. balance due of \$1,800, check no. 67.
- 16 C. Reineke, the owner, pays his personal insurance premium of \$400, check no. 68.
- 19 Paid Orr Co. in full for invoice no. 610, \$2,000 less 2% cash discount, check no. 69, \$1,960.
- 29 Paid Clevenger Company in full for invoice no. 264, \$2,500, check no. 70.

Instructions

a. Balancing totals \$13,050

c. Accounts Payable \$1,700

Journalize transactions in multi-column purchases journal and sales journal; post to the general and subsidiary ledgers.

P7.3A (LO 2, 3) The chart of accounts of LR Company includes the following selected accounts.

112	Accounts Receivable	401	Sales Revenue
120	Inventory	412	Sales Returns and Allowances
126	Supplies	505	Cost of Goods Sold
157	Equipment	610	Advertising Expense
201	Accounts Payable		

In July, the following transactions were completed. All purchases and sales were on account. The cost of all merchandise sold was 70% of the sales price.

- July 1 Purchased merchandise from Eby Company \$8,000.
 2 Received freight bill from Shaw Shipping on Eby purchase \$400.
 3 Made sales to Fort Company \$1,300 and to Hefner Bros. \$1,500.
 5 Purchased merchandise from Getz Company \$3,200.
 8 Received credit on merchandise returned to Getz Company \$300.
 13 Purchased store supplies from Dayne Supply \$720.
 15 Purchased merchandise from Eby Company \$3,600 and from Bosco Company \$4,300.
 16 Made sales to Aybar Company \$3,450 and to Hefner Bros. \$1,870.
 18 Received bill for advertising from Welton Advertisements \$600.
 21 Sales were made to Fort Company \$310 and to Duncan Company \$2,800.
 22 Granted allowance to Fort Company for merchandise damaged in shipment \$40.
 24 Purchased merchandise from Getz Company \$3,000.
 26 Purchased equipment from Dayne Supply \$900.
 28 Received freight bill from Shaw Shipping on Getz purchase of July 24, \$380.
 30 Sales were made to Aybar Company \$5,600.

Instructions

- a. Journalize the transactions above in a purchases journal, a sales journal, and a general journal. The purchases journal should have the following column headings: Date, Account Credited (Debited), Ref., Accounts Payable Cr., Inventory Dr., and Other Accounts Dr.
- b. Post to both the general and subsidiary ledger accounts. (Assume that all accounts have zero beginning balances.)
- c. Prove the agreement of the control and subsidiary accounts.

P7.4A (LO 2, 3) Selected accounts from the chart of accounts of Mercer Company are shown below.

101	Cash	401	Sales Revenue
112	Accounts Receivable	412	Sales Returns and Allowances
120	Inventory	414	Sales Discounts
126	Supplies	505	Cost of Goods Sold
157	Equipment	726	Salaries and Wages Expense
201	Accounts Payable		

The cost of all merchandise sold was 60% of the sales price. During January, Mercer completed the following transactions.

- Jan. 3 Purchased merchandise on account from Gallagher Co. \$9,000.
 4 Purchased supplies for cash \$80.
 4 Sold merchandise on account to Wheeler \$5,250, invoice no. 371, terms 1/10, n/30.
 5 Returned \$300 worth of damaged goods purchased on account from Gallagher Co. on January 3.
 6 Made cash sales for the week totaling \$3,150.
 8 Purchased merchandise on account from Phegley Co. \$4,500.
 9 Sold merchandise on account to Linton Corp. \$5,400, invoice no. 372, terms 1/10, n/30.
 11 Purchased merchandise on account from Cora Co. \$3,700.
 13 Paid in full Gallagher Co. on account less a 2% discount.
 13 Made cash sales for the week totaling \$6,260.
 15 Received payment from Linton Corp. for invoice no. 372.
 15 Paid semi-monthly salaries of \$14,300 to employees.
 17 Received payment from Wheeler for invoice no. 371.
 17 Sold merchandise on account to Delaney Co. \$1,200, invoice no. 373, terms 1/10, n/30.
 19 Purchased equipment on account from Dozier Corp. \$5,500.
 20 Cash sales for the week totaled \$3,200.
 20 Paid in full Phegley Co. on account less a 2% discount.
 23 Purchased merchandise on account from Gallagher Co. \$7,800.
 24 Purchased merchandise on account from Atchison Corp. \$5,100.
 27 Made cash sales for the week totaling \$4,230.
 30 Received payment from Delaney Co. for invoice no. 373.
 31 Paid semi-monthly salaries of \$13,200 to employees.
 31 Sold merchandise on account to Wheeler \$9,330, invoice no. 374, terms 1/10, n/30.

Mercer Company uses the following journals.

1. Sales journal.
2. Single-column purchases journal.
3. Cash receipts journal with columns for Cash Dr., Sales Discounts Dr., Accounts Receivable Cr., Sales Revenue Cr., Other Accounts Cr., and Cost of Goods Sold Dr./Inventory Cr.

- a. Purchases journal—
Accounts Payable \$25,100
Sales journal—Sales
Revenue \$16,830
- c. Accounts Receivable \$16,790
Accounts Payable \$24,800

Journalize transactions in special journals.

4. Cash payments journal with columns for Other Accounts Dr., Accounts Payable Dr., Inventory Cr., and Cash Cr.
5. General journal.

Instructions

- a. Sales journal \$21,180
 Purchases journal \$30,100
 Cash receipts journal
 balancing total \$38,794
 Cash payments journal
 balancing total \$40,780

Journalize in sales and cash receipts journals; post; prepare a trial balance; prove control to subsidiary; prepare adjusting entries; prepare an adjusted trial balance.

Using the selected accounts provided:

- a. Record the January transactions in the appropriate journal noted.
- b. Foot and cross-foot all special journals.
- c. Show how postings would be made by placing ledger account numbers and checkmarks as needed in the journals. (Actual posting to ledger accounts is not required.)

P7.5A (LO 2, 3) Presented below are the purchases and cash payments journals for Fornelli Co. for its first month of operations.

PURCHASES JOURNAL			P1
Date	Account Credited	Ref.	Inventory Dr. Accounts Payable Cr.
July 4	N. Alvarado		6,800
5	F. Rees		8,100

			<u>15,147</u>
			<u>39,066</u>

In addition, the following transactions have not been journalized for July. The cost of all merchandise sold was 65% of the sales price.

- July 1 The founder, N. Fornelli, invests \$80,000 in cash.
 6 Sell merchandise on account to Dow Co. \$6,200 terms 1/10, n/30.
 7 Make cash sales totaling \$8,000.
 8 Sell merchandise on account to S. Goebel \$4,600, terms 1/10, n/30.
 10 Sell merchandise on account to W. Leiss \$4,900, terms 1/10, n/30.
 13 Receive payment in full from S. Goebel.
 16 Receive payment in full from W. Leiss.
 20 Receive payment in full from Dow Co.
 21 Sell merchandise on account to H. Kenney \$5,000, terms 1/10, n/30.
 29 Returned damaged goods to N. Alvarado and received cash refund of \$420.

Instructions

- a. Open the following accounts in the general ledger.

101	Cash	306	Owner's Drawings
112	Accounts Receivable	401	Sales Revenue
120	Inventory	414	Sales Discounts
126	Supplies	505	Cost of Goods Sold
131	Prepaid Rent	631	Supplies Expense
201	Accounts Payable	729	Rent Expense
301	Owner's Capital		

- b. Sales journal total \$20,700
 Cash receipts journal
 balancing total \$109,320

- b. Journalize the transactions that have not been journalized in the sales journal and the cash receipts journal (see Illustration 7.9).

- c. Post to the accounts receivable and accounts payable subsidiary ledgers. Follow the sequence of transactions as shown in the problem.
 - d. Post the individual entries and totals to the general ledger.
 - e. Prepare a trial balance at July 31, 2020.
 - f. Determine whether the subsidiary ledgers agree with the control accounts in the general ledger.
 - g. The following adjustments at the end of July are necessary.
 - 1. A count of supplies indicates that \$140 is still on hand.
 - 2. Recognize rent expense for July, \$500.
 - h. Prepare an adjusted trial balance at July 31, 2020.
- Prepare the necessary entries in the general journal. Post the entries to the general ledger.

P7.6A (LO 2, 3) The post-closing trial balance for Horner Co. is shown below.

Horner Co.
Post-Closing Trial Balance
December 31, 2020

	Debit	Credit
Cash	\$ 41,500	
Accounts Receivable	15,000	
Notes Receivable	45,000	
Inventory	23,000

Accumulated Depreciation—Equipment	\$ 1,500	
Accounts Payable	43,000	
Owner's Capital	86,450	
	<u>\$130,950</u>	<u>\$130,950</u>

The subsidiary ledgers contain the following information: (1) accounts receivable—B. Hannigan \$2,500, I. Kirk \$7,500, and T. Hodges \$5,000; (2) accounts payable—T. Igawa \$12,000, D. Danford \$18,000, and K. Thayer \$13,000. The cost of all merchandise sold was 60% of the sales price.

The transactions for January 2021 are as follows.

- Jan. 3 Sell merchandise to M. Ziesmer \$8,000, terms 2/10, n/30.
- 5 Purchase merchandise from E. Pheatt \$2,000, terms 2/10, n/30.
- 7 Receive a check from T. Hodges \$3,500.
- 11 Pay freight on merchandise purchased \$300.
- 12 Pay rent of \$1,000 for January.
- 13 Receive payment in full from M. Ziesmer.
- 14 Post all entries to the subsidiary ledgers. Issued credit of \$300 to B. Hannigan for returned merchandise.
- 15 Send K. Thayer a check for \$12,870 in full payment of account, discount \$130.
- 17 Purchase merchandise from G. Roland \$1,600, terms 2/10, n/30.
- 18 Pay sales salaries of \$2,800 and office salaries \$2,000.
- 20 Give D. Danford a 60-day note for \$18,000 in full payment of account payable.
- 23 Total cash sales amount to \$9,100.
- 24 Post all entries to the subsidiary ledgers. Sell merchandise on account to I. Kirk \$7,400, terms 1/10, n/30.
- 27 Send E. Pheatt a check for \$950.
- 29 Receive payment on a note of \$40,000 from B. Stout.
- 30 Post all entries to the subsidiary ledgers. Return merchandise of \$300 to G. Roland for credit.

Instructions

- a. Open general and subsidiary ledger accounts for the following.

101	Cash	301	Owner's Capital
112	Accounts Receivable	401	Sales Revenue
115	Notes Receivable	412	Sales Returns and Allowances
120	Inventory	414	Sales Discounts
157	Equipment	505	Cost of Goods Sold
158	Accumulated Depreciation—Equipment	726	Salaries and Wages Expense
200	Notes Payable	729	Rent Expense
201	Accounts Payable		

e. Totals \$122,520

f. Accounts Receivable \$5,000
Accounts Payable \$13,820

h. Totals \$122,520

Journalize in special journals; post; prepare a trial balance.

- b. Sales journal \$15,400
 Purchases journal \$3,600
 Cash receipts journal
 (balancing) \$66,060
 Cash payments journal
 (balancing) \$20,050
- d. Totals \$144,800
- e. Accounts Receivable \$18,600
 Accounts Payable \$14,350
- b. Record the January transactions in a sales journal, a single-column purchases journal, a cash receipts journal (see Illustration 7.9), a cash payments journal (see Illustration 7.16), and a general journal.
- c. Post the appropriate amounts to the general ledger.
- d. Prepare a trial balance at January 31, 2021.
- e. Determine whether the subsidiary ledgers agree with controlling accounts in the general ledger.

Ethics Case

EC7 Wiemers Products Company operates three divisions, each with its own manufacturing plant and marketing/sales force. The corporate headquarters and central accounting office are in Wiemers, and the plants are in Freeport, Rockport, and Bayport, all within 50 miles of Wiemers. Corporate management treats each division as an independent profit center and encourages competition among them. They each have similar but different product lines. As a competitive incentive, bonuses are awarded each year to the employees of the fastest-growing and most-profitable division.

Indy Grover is the manager of Wiemers's centralized computerized accounting operation that enters the sales transactions and maintains the accounts receivable for all three divisions. Indy came up in the accounting ranks from the Bayport division where his wife, several relatives, and many friends still work.

As sales documents are entered into the computer, the originating division is identified by code. Most sales documents (95%) are coded, but some (5%) are not coded or are coded incorrectly. As the manager, Indy has instructed the data-entry personnel to assign the Bayport code to all uncoded and incorrectly coded sales documents. This is done, he says, "in order to expedite processing and to keep the computer files current since they are updated daily." All receivables and cash collections for all three divisions are handled by Wiemers as one subsidiary accounts receivable ledger.

Instructions

- Who are the stakeholders in this situation?
- What are the ethical issues in this case?
- How might the system be improved to prevent this situation?

Comprehensive Accounting Cycle Review

ACR7.1 (Perpetual Method) Jeter Co. uses a perpetual inventory system and both an accounts receivable and an accounts payable subsidiary ledger. Balances related to both the general ledger and the subsidiary ledgers for Jeter are indicated in the working papers presented below. Also following are a series of transactions for Jeter Co. for the month of January. Credit sales terms are 2/10, n/30. The cost of all merchandise sold was 60% of the sales price.

GENERAL LEDGER

Account Number	Account Title	January 1 Opening Balance
101	Cash	\$35,750
112	Accounts Receivable	13,000
115	Notes Receivable	39,000
120	Inventory	18,000
126	Supplies	1,000
130	Prepaid Insurance	2,000
157	Equipment	6,450
158	Accumulated Depreciation—Equip.	1,500
201	Accounts Payable	35,000
301	Owner's Capital	78,700

Schedule of Accounts Receivable (from accounts receivable subsidiary ledger)		Schedule of Accounts Payable (from accounts payable subsidiary ledger)	
Customer	January 1 Opening Balance	Creditor	January 1 Opening Balance
R. Beltre	\$1,500	S. Meek	\$ 9,000
B. Santos	7,500	R. Moses	15,000
S. Mahay	4,000	D. Saito	11,000

- Jan. 3 Sell merchandise on account to B. Corpas \$3,600, invoice no. 510, and to J. Revere \$1,800, invoice no. 511.
- 5 Purchase merchandise from S. Gamel \$5,000 and D. Posey \$2,200, terms n/30.
- 7 Receive checks from S. Mahay \$4,000 and B. Santos \$2,000 after discount period has lapsed.
- 8 Pay freight on merchandise purchased \$235.
- 9 Send checks to S. Meek for \$9,000 less 2% cash discount, and to D. Saito for \$11,000 less 1% cash discount.
- 9 Issue credit of \$300 to J. Revere for merchandise returned.
- 10 Daily cash sales from January 1 to January 10 total \$15,500. Make one journal entry for these sales.
- 11 Sell merchandise on account to R. Beltre \$1,600, invoice no. 512, and to S. Mahay \$900, invoice no. 513.
- 12 Pay rent of \$1,000 for January.
- 13 Receive payment in full from B. Corpas and J. Revere less cash discounts.
- 15 Withdraw \$800 cash by M. Jeter for personal use.
- 15 Post all entries to the subsidiary ledgers.
- 16 Purchase merchandise from D. Saito \$15,000, terms 1/10, n/30; S. Meek \$14,200, terms 2/10, n/30; and S. Gamel \$1,500, terms n/30.
- 17 Pay \$400 cash for office supplies.
- 18 Return \$200 of merchandise to S. Meek and receive credit.
- 20 Daily cash sales from January 11 to January 20 total \$20,100. Make one journal entry for these sales.
- 21 Issue \$15,000 note, maturing in 90 days, to R. Moses in payment of balance due.
- 21 Receive payment in full from S. Mahay less cash discount.
- 22 Sell merchandise on account to B. Corpas \$2,700, invoice no. 514, and to R. Beltre \$2,300, invoice no. 515.
- 22 Post all entries to the subsidiary ledgers.
- 23 Send checks to D. Saito and S. Meek for full payment less cash discounts.
- 25 Sell merchandise on account to B. Santos \$3,500, invoice no. 516, and to J. Revere \$6,100, invoice no. 517.
- 27 Purchase merchandise from D. Saito \$14,500, terms 1/10, n/30; D. Posey \$3,200, terms n/30; and S. Gamel \$5,400, terms n/30.
- 27 Post all entries to the subsidiary ledgers.
- 28 Pay \$200 cash for office supplies.
- 31 Daily cash sales from January 21 to January 31 total \$21,300. Make one journal entry for these sales.
- 31 Pay sales salaries \$4,300 and office salaries \$3,800.

Instructions

- Record the January transactions in a sales journal, a single-column purchases journal, a cash receipts journal as shown in Illustration 7.9, a cash payments journal as shown in Illustration 7.16, and a two-column general journal.
- Post the journals to the general ledger.
- Prepare a trial balance at January 31, 2020, in the trial balance columns of the worksheet. Complete the worksheet using the following additional information.
 - Office supplies at January 31 total \$900.
 - Insurance coverage expires on October 31, 2020.
 - Annual depreciation on the equipment is \$1,500.
 - Interest of \$50 has accrued on the note payable.
- Prepare a multiple-step income statement and an owner's equity statement for January and a classified balance sheet at the end of January.
- Prepare and post adjusting and closing entries.

- f. Prepare a post-closing trial balance, and determine whether the subsidiary ledgers agree with the control accounts in the general ledger.

ACR7.2 (Periodic Inventory) McBride Company has the following opening account balances in its general and subsidiary ledgers on January 1 and uses the periodic inventory system. All accounts have normal debit and credit balances.

GENERAL LEDGER

Account Number	Account Title	January 1 Opening Balance
101	Cash	\$33,750
112	Accounts Receivable	13,000
115	Notes Receivable	39,000
120	Inventory	20,000
126	Supplies	1,000
130	Prepaid Insurance	2,000
157	Equipment	6,450
158	Accumulated Depreciation—Equip.	1,500
201	Accounts Payable	35,000
301	Owner's Capital	78,700

Schedule of Accounts Receivable

(from accounts receivable subsidiary ledger)

Schedule of Accounts Payable

(from accounts payable subsidiary ledger)

Customer	January 1 Opening Balance	Creditor	January 1 Opening Balance
R. Kotsay	\$1,500	S. Otero	\$ 9,000
B. Boxberger	7,500	R. Rasmus	15,000
S. Andrus	4,000	D. Baroni	11,000

In addition, the following transactions have not been journalized for January 2020.

- Jan. 3 Sell merchandise on account to B. Berg \$3,600, invoice no. 510, and J. Lutz \$1,800, invoice no. 511.
 5 Purchase merchandise on account from S. Colt \$5,000 and D. Kahn \$2,700.
 7 Receive checks for \$4,000 from S. Andrus and \$2,000 from B. Boxberger.
 8 Pay freight on merchandise purchased \$180.
 9 Send checks to S. Otero for \$9,000 and D. Baroni for \$11,000.
 9 Issue credit of \$300 to J. Lutz for merchandise returned.
 10 Cash sales from January 1 to January 10 total \$15,500. Make one journal entry for these sales.
 11 Sell merchandise on account to R. Kotsay for \$2,900, invoice no. 512, and to S. Andrus \$900, invoice no. 513.
 Post all entries to the subsidiary ledgers.
 12 Pay rent of \$1,000 for January.
 13 Receive payment in full from B. Berg and J. Lutz.
 15 Withdraw \$800 cash by I. McBride for personal use.
 16 Purchase merchandise on account from D. Baroni for \$12,000, from S. Otero for \$13,900, and from S. Colt for \$1,500.
 17 Pay \$400 cash for supplies.
 18 Return \$200 of merchandise to S. Otero and receive credit.
 20 Cash sales from January 11 to January 20 total \$17,500. Make one journal entry for these sales.
 21 Issue \$15,000 note to R. Rasmus in payment of balance due.
 21 Receive payment in full from S. Andrus.
 Post all entries to the subsidiary ledgers.
 22 Sell merchandise on account to B. Berg for \$3,700, invoice no. 514, and to R. Kotsay for \$800, invoice no. 515.
 23 Send checks to D. Baroni and S. Otero in full payment.
 25 Sell merchandise on account to B. Boxberger for \$3,500, invoice no. 516, and to J. Lutz for \$6,100, invoice no. 517.
 27 Purchase merchandise on account from D. Baroni for \$12,500, from D. Kahn for \$1,200, and from S. Colt for \$2,800.
 28 Pay \$200 cash for office supplies.
 31 Cash sales from January 21 to January 31 total \$22,920. Make one journal entry for these sales.
 31 Pay sales salaries of \$4,300 and office salaries of \$3,600.

Instructions

- a. Record the January transactions in the appropriate journal—sales, purchases, cash receipts, cash payments, and general.
- b. Post the journals to the general and subsidiary ledgers. Add and number new accounts in an orderly fashion as needed.
- c. Prepare a trial balance at January 31, 2020, using a worksheet. Complete the worksheet using the following additional information.
 1. Supplies at January 31 total \$700.
 2. Insurance coverage expires on October 31, 2020.
 3. Annual depreciation on the equipment is \$1,500.
 4. Interest of \$30 has accrued on the note payable.
 5. Inventory at January 31 is \$15,000.
- d. Prepare a multiple-step income statement and an owner's equity statement for January and a classified balance sheet at the end of January.
- e. Prepare and post the adjusting and closing entries.
- f. Prepare a post-closing trial balance, and determine whether the subsidiary ledgers agree with the control accounts in the general ledger.

Expand Your Critical Thinking

Real-World Focus

CT7.1 Sage 50 provides some of the leading accounting software packages. Information related to its products is found at its website.

Instructions

Review the features related to its products and then be ready to discuss them with the class.

Decision-Making Across the Organization

CT7.2 Ermler & Trump is a wholesaler of small appliances and parts. Ermler & Trump is operated by two owners, Jack Ermler and Andrea Trump. In addition, the company has one employee, a repair specialist, who is on a fixed salary. Revenues are earned through the sale of appliances to retailers (approximately 75% of total revenues), appliance parts to do-it-yourselfers (10%), and the repair of appliances brought to the store (15%). Appliance sales are made on both a credit and cash basis. Customers are billed on pre-numbered sales invoices. Credit terms are always net/30 days. All parts sales and repair work are cash only.

Merchandise is purchased on account from the manufacturers of both the appliances and the parts. Practically all suppliers offer cash discounts for prompt payments, and it is company policy to take all discounts. Most cash payments are made by check. Checks are most frequently issued to suppliers, to trucking companies for freight on merchandise purchases, and to newspapers, radio, and TV stations for advertising. All advertising bills are paid as received. Jack and Andrea each make a monthly drawing in cash for personal living expenses. The salaried repairman is paid twice monthly. Ermler & Trump currently has a manual accounting system.

Instructions

With the class divided into groups, answer the following.

- a. Identify the special journals that Ermler & Trump should have in its manual accounting system. List the column headings appropriate for each of the special journals.
- b. What control and subsidiary accounts should be included in Ermler & Trump's manual accounting system? Why?

Communication Activity

CT7.3 Jill Loey, a classmate, has a part-time bookkeeping job. She is concerned about the inefficiencies in journalizing and posting transactions. Ben Newell is the owner of the company where Jill works. In response to numerous complaints from Jill and others, Ben hired two additional bookkeepers a month ago. However, the inefficiencies have continued at an even higher rate. The accounting information system for the company has only a general journal and a general ledger. Ben refuses to install a computerized accounting system.

Instructions

Now that Jill is an expert in manual accounting information systems, she decides to send a letter to Ben Newell explaining (1) why the additional personnel did not help and (2) what changes should be made to improve the efficiency of the accounting department. Write the letter that you think Jill should send.

All About You

CT7.4 In this chapter, you learned about a basic manual accounting information system. Computerized accounting systems range from the very basic and inexpensive to the very elaborate and expensive. However, even the most sophisticated systems are based on the fundamental structures and relationships that you learned in this chapter.

Instructions

Go to WileyPLUS and review the demonstration that is provided for the general ledger software package that is used with this textbook. Prepare a brief explanation of how the general ledger system works—that is, how it is used and what information it provides.

A Look at IFRS

LEARNING OBJECTIVE 4

Compare accounting information systems under GAAP and IFRS.

As discussed in Chapter 1, IFRS is growing in acceptance around the world. For example, recent statistics indicate a substantial number of the Global Fortune 500 companies use IFRS. And the chairman of the IASB predicts that IFRS adoption will grow from its current level of 115 countries to nearly 150 countries in the near future.

When countries accept IFRS for use as accepted accounting policies, companies need guidance to ensure that their first IFRS financial statements contain high-quality information. Specifically, *IFRS 1* requires that information in a company's first IFRS statements (1) be transparent, (2) provide a suitable starting point, and (3) have a cost that does not exceed the benefits.

Key Points

Following are the key similarities and differences between GAAP and IFRS related to accounting information systems.

Similarities

- The basic concepts related to an accounting information system are the same under GAAP and IFRS.
- The use of subsidiary ledgers and control accounts, as well as the system used for recording transactions, are the same under GAAP and IFRS.

Differences

- Many companies will be going through a substantial conversion process to switch from their current reporting standards to IFRS.
- Upon first-time adoption of IFRS, a company must present at least one year of comparative information under IFRS.

Looking to the Future

The basic recording process shown in this textbook is followed by companies around the globe. It is unlikely to change in the future. The definitional structure of assets, liabilities, equity, revenues, and expenses may change over time as the IASB and FASB evaluate their overall conceptual framework for establishing accounting standards. In addition, high-quality international accounting requires both high-quality accounting standards and high-quality auditing. Similar to the convergence of GAAP and IFRS, there is a movement to improve international auditing standards.

Fraud, Internal Control, and Cash

Chapter Preview

As the following Feature Story about recording cash sales at **Barriques** indicates, control of cash is important to ensure that fraud does not occur. Companies also need controls to safeguard other types of assets. For example, Barriques undoubtedly has controls to prevent the theft of food and supplies, and controls to prevent the theft of tableware and dishes from its kitchen.

In this chapter, we explain the essential features of an internal control system and how it prevents fraud. We also describe how those controls apply to a specific asset—cash. The applications include some controls with which you may be already familiar, such as the use of a bank.

Feature Story

Minding the Money in Madison

For many years, **Barriques** in Madison, Wisconsin, has been named the city's favorite coffeehouse. Barriques not only does a booming business in coffee but also has wonderful baked goods, delicious sandwiches, and a fine selection of wines.

"Our customer base ranges from college students to neighborhood residents as well as visitors to our capital city," says

bookkeeper Kerry Stoppleworth, who joined the company shortly after it was founded in 1998. "We are unique because we have customers who come in early on their way to work for a cup of coffee and then will stop back after work to pick up a bottle of wine for dinner. We stay very busy throughout all three parts of the day."

Like most businesses where purchases are low-cost and high-volume, cash control has to be simple. "We use a computerized point-of-sale (POS) system to keep track of our inventory and allow us to efficiently ring through an order for a customer," explains Stoppleworth. "You can either scan

a barcode for an item or enter in a code for items that don't have a barcode such as cups of coffee or bakery items." The POS system also automatically tracks sales by department and maintains an electronic journal of all the sales transactions that occur during the day.

"There are two POS stations at each store, and throughout the day any of the staff may operate them," says Stoppleworth. At the end of the day, each POS station is reconciled separately. The staff counts the cash in the drawer and enters this amount into the closing totals in the POS system. The POS system then compares the cash and credit amounts, less the cash being carried forward to the next day (the float), to the

shift total in the electronic journal. If there are discrepancies, a recount is done and the journal is reviewed transaction by transaction to identify the problem. The staff then creates a deposit ticket for the cash less the float and puts this in a drop safe with the electronic journal summary report for the manager to review and take to the bank the next day. Ultimately, the bookkeeper reviews all of these documents as well as the deposit receipt that the bank produces to make sure they are all in agreement.

As Stoppleworth concludes, "We keep the closing process and accounting simple so that our staff can concentrate on taking care of our customers and making great coffee and food."

Chapter Outline

LEARNING OBJECTIVES

LO 1 Define fraud and the principles of internal control.

- Fraud
- The Sarbanes-Oxley Act
- Internal control
- Principles of internal control activities
- Limitations of internal control

DO IT! 1 Control Activities

LO 2 Apply internal control principles to cash.

- Cash receipts controls
- Cash disbursements controls
- Petty cash fund

DO IT! 2a Control over Cash Receipts

DO IT! 2b Petty Cash Fund

LO 3 Identify the control features of a bank account.

- Making bank deposits
- Writing checks
- EFT system
- Bank statements
- Reconciling the bank account

DO IT! 3 Bank Reconciliation

LO 4 Explain the reporting of cash.

- Cash equivalents
- Restricted cash

DO IT! 4 Reporting Cash

Go to the Review and Practice section at the end of the chapter for a review of key concepts and practice applications with solutions.

Visit WileyPLUS with ORION for additional tutorials and practice opportunities.

Fraud and Internal Control

LEARNING OBJECTIVE 1

Define fraud and the principles of internal control.

The Feature Story describes many of the internal control procedures used by **Barriques**. These procedures are necessary to discourage employees from fraudulent activities.

Fraud

A **fraud** is a dishonest act by an employee that results in personal benefit to the employee at a cost to the employer. Examples of fraud reported in the financial press include the following.

- A bookkeeper in a small company diverted \$750,000 of bill payments to a personal bank account over a three-year period.
- A shipping clerk with 28 years of service shipped \$125,000 of merchandise to himself.
- A computer operator embezzled \$21 million from **Wells Fargo Bank** over a two-year period.
- A church treasurer “borrowed” \$150,000 of church funds to finance a friend’s business dealings.

Why does fraud occur? The three main factors that contribute to fraudulent activity are depicted by the **fraud triangle** in **Illustration 8.1**.

The most important element of the fraud triangle is **opportunity**. For an employee to commit fraud, the workplace environment must provide opportunities that an employee can take advantage of. Opportunities occur when the workplace lacks sufficient controls to deter and detect fraud. For example, inadequate monitoring of employee actions can create opportunities for theft and can embolden employees because they believe they will not be caught.

A second factor that contributes to fraud is **financial pressure**. Employees sometimes commit fraud because of personal financial problems caused by too much debt. Or, they might commit fraud because they want to lead a lifestyle that they cannot afford on their current salary.

The third factor that contributes to fraud is **rationalization**. In order to justify their fraud, employees rationalize their dishonest actions. For example, employees sometimes justify fraud because they believe they are underpaid while the employer is making lots of money. Employees feel justified in stealing because they believe they deserve to be paid more.

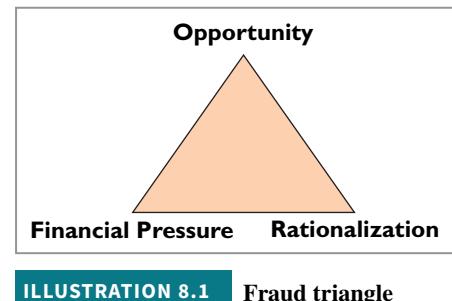

ILLUSTRATION 8.1 Fraud triangle

The Sarbanes-Oxley Act

What can be done to prevent or to detect fraud? After numerous corporate scandals came to light in the early 2000s, Congress addressed this issue by passing the **Sarbanes-Oxley Act (SOX)**. Under SOX, all publicly traded U.S. corporations are required to maintain an adequate system of internal control. Corporate executives and boards of directors must ensure that these controls are reliable and effective. In addition, independent outside auditors must attest to the adequacy of the internal control system. Companies that fail to comply are subject to fines, and company officers can be imprisoned. SOX also created the Public Company Accounting Oversight Board (PCAOB) to establish auditing standards and regulate auditor activity.

One poll found that 60% of investors believe that SOX helps safeguard their stock investments. Many say they would be unlikely to invest in a company that fails to follow SOX requirements. Although some corporate executives have criticized the time and expense involved in following SOX requirements, SOX appears to be working well. For example, the

chief accounting officer of **Eli Lily** noted that SOX triggered a comprehensive review of how the company documents its controls. This review uncovered redundancies and pointed out controls that needed to be added. In short, it added up to time and money well spent.

Internal Control

Internal control is a process designed to provide reasonable assurance regarding the achievement of company objectives related to operations, reporting, and compliance. In more detail, the purposes of internal control are to safeguard assets, enhance the reliability of accounting records, increase efficiency of operations, and ensure compliance with laws and regulations. Internal control systems have five primary components as listed below.¹

- **A control environment.** It is the responsibility of top management to make it clear that the organization values integrity and that unethical activity will not be tolerated. This component is often referred to as the “tone at the top.”
- **Risk assessment.** Companies must identify and analyze the various factors that create risk for the business and must determine how to manage these risks.
- **Control activities.** To reduce the occurrence of fraud, management must design policies and procedures to address the specific risks faced by the company.
- **Information and communication.** The internal control system must capture and communicate all pertinent information both down and up the organization, as well as communicate information to appropriate external parties.
- **Monitoring.** Internal control systems must be monitored periodically for their adequacy. Significant deficiencies need to be reported to top management and/or the board of directors.

People, Planet, and Profit Insight

© Karl Dolenc/iStockphoto

And the Controls Are . . .

Internal controls are important for an effective financial reporting system. The same is true for sustainability reporting. An effective system of internal controls for sustainability reporting will help in the following ways: (1) prevent the unauthorized use of data; (2) provide reasonable assurance that the information is accurate, valid, and complete; and (3) report information that is consistent

with overall sustainability accounting policies. With these types of controls, users will have the confidence that they can use the sustainability information effectively.

Some regulators are calling for even more assurance through audits of this information. Companies that potentially can cause environmental damage through greenhouse gases, as well as companies in the mining and extractive industries, are subject to reporting requirements. And, as demand for more information in the sustainability area expands, the need for audits of this information will grow.

Why is sustainability information important to investors? (Go to WileyPLUS for this answer and additional questions.)

Principles of Internal Control Activities

Each of the five components of an internal control system is important. Here, we will focus on one component, the control activities. The reason? These activities are the backbone of the company's efforts to address the risks it faces, such as fraud. The specific control activities used by a company will vary, depending on management's assessment of the risks faced. This assessment is heavily influenced by the size and nature of the company.

¹The Committee of Sponsoring Organizations of the Treadway Commission, “Internal Control—Integrated Framework,” www.coso.org/documents/990025P_executive_summary_final_May20_e.pdf; and Stephan J. McNally, “The 2013 COSO Framework and SOX Compliance,” *Strategic Finance* (June 2013).

The six principles of control activities are as follows.

- Establishment of responsibility
- Segregation of duties
- Documentation procedures
- Physical controls
- Independent internal verification
- Human resource controls

We explain these principles in the following sections. You should recognize that they apply to most companies and are relevant to both manual and computerized accounting systems.

Establishment of Responsibility

An essential principle of internal control is to assign responsibility to specific employees. **Control is most effective when only one person is responsible for a given task.**

To illustrate, assume that the cash on hand at the end of the day in a **Safeway** supermarket is \$10 short of the cash entered in the cash register. If only one person has operated the register, the shift manager can quickly determine responsibility for the shortage. If two or more individuals have worked the register, it may be impossible to determine who is responsible for the error.

Many retailers solve this problem by having registers with multiple drawers. This makes it possible for more than one person to operate a register but still allows identification of a particular employee with a specific drawer. Only the signed-in cashier has access to his or her drawer.

Establishing responsibility often requires limiting access only to authorized personnel, and then identifying those personnel. For example, the automated systems used by many companies have mechanisms such as identifying passcodes that keep track of who made a journal entry, who entered a sale, or who went into an inventory storeroom at a particular time. Use of identifying passcodes enables the company to establish responsibility by identifying the particular employee who carried out the activity.

Anatomy of a Fraud

Maureen Frugali was a training supervisor for claims processing at Colossal Healthcare. As a standard part of the claims-processing training program, Maureen created fictitious claims for use by trainees. These fictitious claims were then sent to the accounts payable department. After the training claims had been processed, she was to notify Accounts Payable of all fictitious claims, so that they would not be paid. However, she did not inform Accounts Payable about every fictitious claim. She created some fictitious claims for entities that she controlled (that is, she would receive the payment), and she let Accounts Payable pay her.

Total take: \$11 million

The Missing Control

Establishment of responsibility. The healthcare company did not adequately restrict the responsibility for authorizing and approving claims transactions. The training supervisor should not have been authorized to create claims in the company's "live" system.

Source: Adapted from Wells, *Fraud Casebook* (2007), pp. 61–70.

Segregation of Duties

Segregation of duties is indispensable in an internal control system. There are two common applications of this principle:

1. Different individuals should be responsible for related activities.
2. The responsibility for recordkeeping for an asset should be separate from the physical custody of that asset.

The rationale for segregation of duties is this: **The work of one employee should, without a duplication of effort, provide a reliable basis for evaluating the work of another employee.** For example, the personnel that design and program computerized systems should

not be assigned duties related to day-to-day use of the system. Otherwise, they could design the system to benefit them personally and conceal the fraud through day-to-day use.

Segregation of Related Activities. Making one individual responsible for related activities increases the potential for errors and irregularities.

Purchasing Activities. Companies should, for example, assign related **purchasing activities** to different individuals. Related purchasing activities include ordering merchandise, approving orders, receiving goods, authorizing payment, and paying for goods or services. Various frauds are possible when one person handles related purchasing activities:

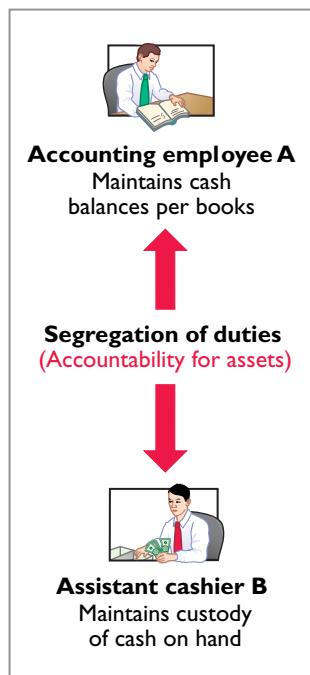

- If a purchasing agent is allowed to order goods without obtaining supervisory approval, the likelihood of the purchasing agent receiving kickbacks from suppliers increases.
- If an employee who orders goods also handles the invoice and receipt of the goods, as well as payment authorization, he or she might authorize payment for a fictitious invoice.

These abuses are less likely to occur when companies divide the purchasing tasks.

Sales Activities. Similarly, companies should assign related **sales activities** to different individuals. Related selling activities include making a sale, shipping (or delivering) the goods to the customer, billing the customer, and receiving payment. Various frauds are possible when one person handles related sales activities:

- If a salesperson can make a sale without obtaining supervisory approval, he or she might make sales at unauthorized prices to increase sales commissions.
- A shipping clerk who also has access to accounting records could ship goods to himself.
- A billing clerk who handles billing and receipt could understate the amount billed for sales made to friends and relatives.

These abuses are less likely to occur when companies divide the sales tasks. The salespeople make the sale, the shipping department ships the goods on the basis of the sales order, and the billing department prepares the sales invoice after comparing the sales order with the report of goods shipped.

Anatomy of a Fraud

Lawrence Fairbanks, the assistant vice-chancellor of communications at Aesop University, was allowed to make purchases of under \$2,500 for his department without external approval. Unfortunately, he also sometimes bought items for himself, such as expensive antiques and other collectibles. How did he do it? He replaced the vendor invoices he received with fake vendor invoices that he created. The fake invoices had descriptions that were more consistent with the communications department's purchases. He submitted these fake invoices to the accounting department as the basis for their journal entries and to the accounts payable department as the basis for payment.

Total take: \$475,000

The Missing Control

Segregation of duties. The university had not properly segregated related purchasing activities. Lawrence was ordering items, receiving the items, and receiving the invoice. By receiving the invoice, he had control over the documents that were used to account for the purchase and thus was able to substitute a fake invoice.

Source: Adapted from Wells, *Fraud Casebook* (2007), pp. 3–15.

Segregation of Recordkeeping from Physical Custody. The accountant should have neither physical custody of the asset nor access to it. Likewise, the custodian of the asset should not maintain or have access to the accounting records. **The custodian of the asset is not likely to convert the asset to personal use when one employee maintains the record of the asset, and a different employee has physical custody of the asset.** The separation of accounting responsibility from the custody of assets is especially important for cash and inventories because these assets are very vulnerable to fraud.

Anatomy of a Fraud

Angela Bauer was an accounts payable clerk for Aggasiz Construction Company. Angela prepared and issued checks to vendors and reconciled bank statements. She perpetrated a fraud in this way: She wrote checks for costs that the company had not actually incurred (e.g., fake taxes). A supervisor then approved and signed the checks. Before issuing the check, though, Angela would “white-out” the payee line on the check and change it to personal accounts that she controlled. She was able to conceal the theft because she also reconciled the bank account. That is, nobody else ever saw that the checks had been altered.

Total take: \$570,000

The Missing Control

Segregation of duties. Aggasiz Construction Company did not properly segregate recordkeeping from physical custody. Angela had physical custody of the checks, which essentially was control of the cash. She also had recordkeeping responsibility because she prepared the bank reconciliation.

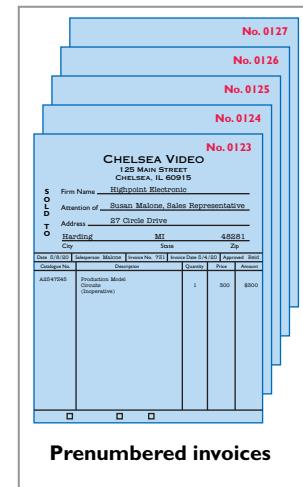

Source: Adapted from Wells, *Fraud Casebook* (2007), pp. 100–107.

Documentation Procedures

Documents provide evidence that transactions and events have occurred. For example, point-of-sale terminals are networked with a company’s computing and accounting records, which results in direct documentation.

Similarly, a shipping document indicates that the goods have been shipped, and a sales invoice indicates that the company has billed the customer for the goods. By requiring signatures (or initials) on the documents, the company can identify the individual(s) responsible for the transaction or event. Companies should document transactions when they occur.

Companies should establish procedures for documents. First, whenever possible, companies should use **prenumbered documents, and all documents should be accounted for**. Prenumbering helps to prevent a transaction from being recorded more than once, or conversely, from not being recorded at all. Second, the control system should require that employees **promptly forward source documents for accounting entries to the accounting department. This control measure helps to ensure timely recording of the transaction** and contributes directly to the accuracy and reliability of the accounting records.

Anatomy of a Fraud

To support their reimbursement requests for travel costs incurred, employees at Mod Fashions Corporation’s design center were required to submit receipts. The receipts could include the detailed bill provided for a meal, the credit card receipt provided when the credit card payment is made, or a copy of the employee’s monthly credit card bill that listed the item. A number of the designers who frequently traveled together came up with a fraud scheme: They submitted claims for the same expenses. For example, if they had a meal together that cost \$200, one person submitted the detailed meal bill, another submitted the credit card receipt, and a third submitted a monthly credit card bill showing the meal as a line item. Thus, all three received a \$200 reimbursement.

Total take: \$75,000

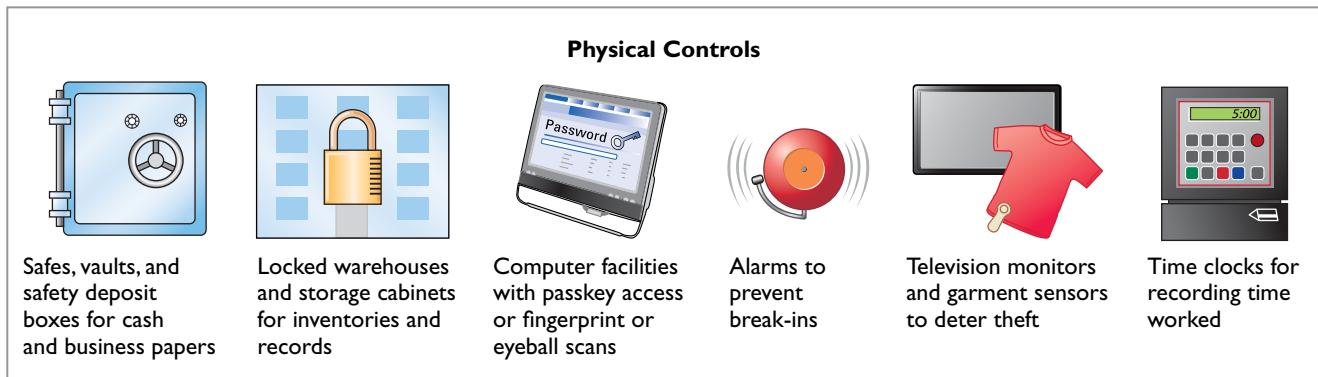

The Missing Control

Documentation procedures. Mod Fashions should require the original, detailed receipt. It should not accept photocopies, and it should not accept credit card statements. In addition, documentation procedures could be further improved by requiring the use of a corporate credit card (rather than a personal credit card) for all business expenses.

Source: Adapted from Wells, *Fraud Casebook* (2007), pp. 79–90.

Physical Controls

Use of physical controls is essential. **Physical controls** relate to the safeguarding of assets and enhance the accuracy and reliability of the accounting records. **Illustration 8.2** shows examples of these controls.

ILLUSTRATION 8.2 Physical controls

Anatomy of a Fraud

At Centerstone Health, a large insurance company, the mailroom each day received insurance applications from prospective customers. Mailroom employees scanned the applications into electronic documents before the applications were processed. Once the applications were scanned, they could be accessed online by authorized employees.

Insurance agents at Centerstone Health earn commissions based upon successful applications. The sales agent's name is listed on the application. However, roughly 15% of the applications are from customers who did not work with a sales agent. Two friends—Alex, an employee in recordkeeping, and Parviz, a sales agent—thought up a way to perpetrate a fraud. Alex identified scanned applications that did not list a sales agent. After business hours, he entered the mailroom and found the hard-copy applications that did not show a sales agent. He wrote in Parviz's name as the sales agent and then rescanned the application for processing. Parviz received the commission, which the friends then split.

Total take: \$240,000

The Missing Control

Physical controls. Centerstone Health lacked two basic physical controls that could have prevented this fraud. First, the mailroom should have been locked during nonbusiness hours, and access during business hours should have been tightly controlled. Second, the scanned applications supposedly could be accessed only by authorized employees using their passwords. However, the password for each employee was the same as the employee's user ID. Since employee user-ID numbers were available to all other employees, all employees knew each other's passwords. Thus, Alex could enter the system using another employee's password and access the scanned applications.

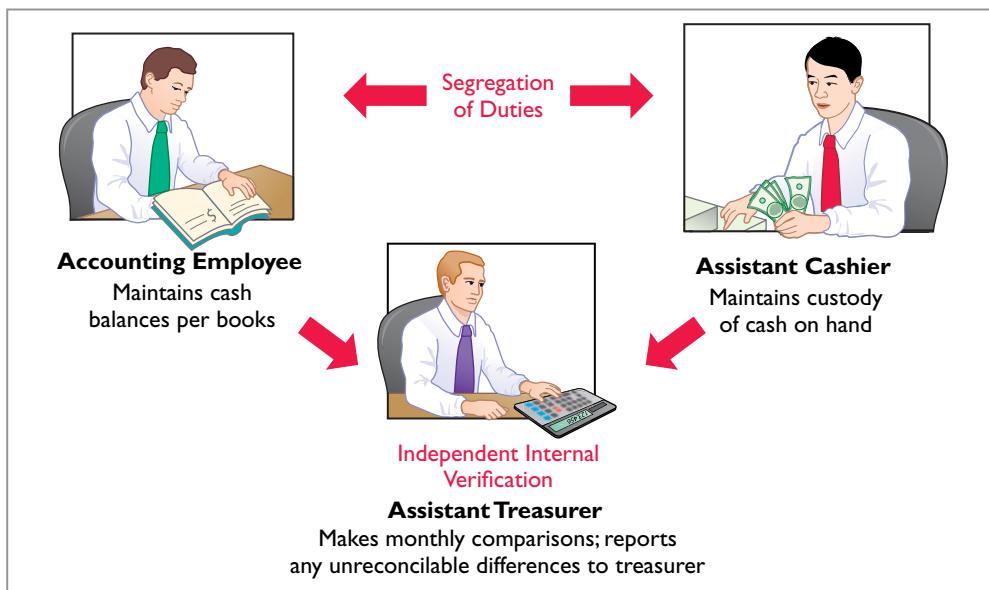

Source: Adapted from Wells, *Fraud Casebook* (2007), pp. 316–326.

Independent Internal Verification

Most internal control systems provide for **independent internal verification**. This principle involves the review of data prepared by employees. To obtain maximum benefit from independent internal verification:

1. Companies should verify records periodically or on a surprise basis.
2. An employee who is independent of the personnel responsible for the information should make the verification.
3. Discrepancies and exceptions should be reported to a management level that can take appropriate corrective action.

Independent internal verification is especially useful in comparing recorded accountability with existing assets. The reconciliation of the electronic journal with the cash in the point-of-sale terminal at **Barriques** is an example of this internal control principle. Other common examples are the reconciliation of a company's cash balance per books with the cash balance per bank, and the verification of the perpetual inventory records through a count of physical inventory. **Illustration 8.3** shows the relationship between this principle and the segregation of duties principle.

**ILLUSTRATION 8.3**

Comparison of segregation of duties principle with independent internal verification principle

Anatomy of a Fraud

Bobbi Jean Donnelly, the office manager for Mod Fashions Corporation's design center, was responsible for preparing the design center budget and reviewing expense reports submitted by design center employees. Her desire to upgrade her wardrobe got the better of her, and she enacted a fraud that involved filing expense-reimbursement requests for her own personal clothing purchases. Bobbi Jean was able to conceal the fraud because she was responsible for reviewing all expense reports, including her own. In addition, she sometimes was given ultimate responsibility for signing off on the expense reports when her boss was "too busy." Also, because she controlled the budget, when she submitted her expenses, she coded them to budget items that she knew were running under budget, so that they would not catch anyone's attention.

Total take: \$275,000

The Missing Control

Independent internal verification. Bobbi Jean's boss should have verified her expense reports. When asked what he thought her expenses for a year were, the boss said about \$10,000. At \$115,000 per year, her actual expenses were more than 10 times what would have been expected. However, because he was "too busy" to verify her expense reports or to review the budget, he never noticed.

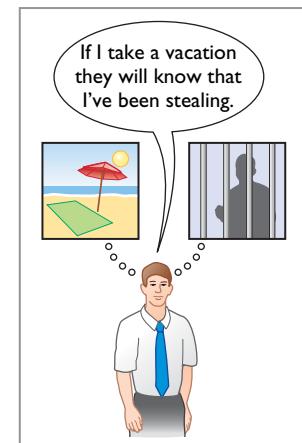

Source: Adapted from Wells, *Fraud Casebook* (2007), pp. 79–90.

Large companies often assign independent internal verification to internal auditors. **Internal auditors** are company employees who continuously evaluate the effectiveness of the company's internal control systems. They review the activities of departments and individuals to determine whether prescribed internal controls are being followed. They also recommend improvements when needed. For example, **WorldCom** was at one time the second largest U.S. telecommunications company. The fraud that caused its bankruptcy (the largest ever when it occurred) involved billions of dollars. It was uncovered by an internal auditor.

Human Resource Controls

Human resource control activities include the following.

- Bond employees who handle cash.** **Bonding** involves obtaining insurance protection against theft by employees. It contributes to the safeguarding of cash in two ways. First, the insurance company carefully screens all individuals before adding them to the policy and may reject risky applicants. Second, bonded employees know that the insurance company will vigorously prosecute all offenders.
- Rotate employees' duties and require employees to take vacations.** These measures deter employees from attempting thefts since they will not be able to permanently conceal their improper actions. Many banks, for example, have discovered employee thefts when the employee was on vacation or assigned to a new position.

3. **Conduct thorough background checks.** Many believe that the most important and inexpensive measure any business can take to reduce employee theft and fraud is for the human resource department to conduct thorough background checks. Two tips: (1) Check to see whether job applicants actually graduated from the schools they list. (2) Never use telephone numbers for previous employers provided by the applicant. Always look them up yourself.

Anatomy of a Fraud

Ellen Lowry was the desk manager and Josephine Rodriguez was the head of housekeeping at the Excelsior Inn, a luxury hotel. The two best friends were so dedicated to their jobs that they never took vacations, and they frequently filled in for other employees. In fact, Ms. Rodriguez, whose job as head of housekeeping did not include cleaning rooms, often cleaned rooms herself, “just to help the staff keep up.” These two “dedicated” employees, working as a team, found a way to earn a little more cash. Ellen, the desk manager, provided significant discounts to guests who paid with cash. She kept the cash and did not register the guests in the hotel’s computerized system. Instead, she took the room out of circulation “due to routine maintenance.” Because the room did not show up as being used, it did not receive a normal housekeeping assignment. Instead, Josephine, the head of housekeeping, cleaned the rooms during the guests’ stay.

Total take: \$95,000

The Missing Control

Human resource controls. Ellen, the desk manager, had been fired by a previous employer after being accused of fraud. If the Excelsior Inn had conducted a thorough background check, it would not have hired her. The hotel fraud was detected when Ellen missed work for a few days due to illness. A system of mandatory vacations and rotating days off would have increased the chances of detecting the fraud before it became so large.

Accounting Across the Organization

SOX Boosts the Role of Human Resources

Under SOX, a company needs to keep track of employees’ degrees and certifications to ensure that employees continue to meet the specified requirements of a job. Also, to ensure proper employee supervision and proper separation of duties, companies must develop and monitor an organizational chart. When one corporation went through this exercise, it found that out of 17,000 employees, there were 400 people who did not report to anyone. The corporation also had 35 people who reported to each other. In addition, if

an employee complains of an unfair firing and mentions financial issues at the company, the human resource department must refer the case to the company audit committee and possibly to its legal counsel.

Why would unsupervised employees or employees who report to each other represent potential internal control threats? (Go to WileyPLUS for this answer and additional questions.)

Stockbyte/Getty Images, Inc.

Limitations of Internal Control

HELPFUL HINT

Controls may vary with the risk level of the activity. For example, management may consider cash to be high risk and maintaining inventories in the stockroom as low risk. Thus, management would have stricter controls for cash.

Companies generally design their systems of internal control to provide **reasonable assurance** of proper safeguarding of assets and reliability of the accounting records. The concept of reasonable assurance rests on the premise that the costs of establishing control procedures should not exceed their expected benefit (see **Helpful Hint**).

To illustrate, consider shoplifting losses in retail stores. Stores could eliminate such losses by having a security guard stop and search customers as they leave the store. But store managers have concluded that the negative effects of such a procedure cannot be justified. Instead, they have attempted to control shoplifting losses by less costly procedures. They post signs saying, “We reserve the right to inspect all packages” and “All shoplifters will be prosecuted.”

They use hidden cameras and store detectives to monitor customer activity, and they install sensor equipment at exits.

The **human element** is an important factor in every system of internal control. A good system can become ineffective as a result of employee fatigue, carelessness, or indifference. For example, a receiving clerk may not bother to count goods received and may just “fudge” the counts. Occasionally, two or more individuals may work together to get around prescribed controls. Such **collusion** can significantly reduce the effectiveness of a system, eliminating the protection offered by segregation of duties. No system of internal control is perfect.

The **size of the business** also may impose limitations on internal control. Small companies often find it difficult to segregate duties or to provide for independent internal verification. A study by the Association of Certified Fraud Examiners (*2014 Report to the Nation on Occupational Fraud and Abuse*) indicates that businesses with fewer than 100 employees are most at risk for employee theft. In fact, 29% of frauds occurred at companies with fewer than 100 employees. The median loss at small companies was \$154,000, which was nearly as high as the median fraud at companies with more than 10,000 employees (\$160,000). A \$154,000 loss can threaten the very existence of a small company.

DO IT! 1 | Control Activities

Identify which control activity is violated in each of the following situations, and explain how the situation creates an opportunity for a fraud.

1. The person with primary responsibility for reconciling the bank account and making all bank deposits is also the company's accountant.
2. Wellstone Company's treasurer received an award for distinguished service because he had not taken a vacation in 30 years.
3. In order to save money spent on order slips and to reduce time spent keeping track of order slips, a local bar/restaurant does not buy prenumbered order slips.

ACTION PLAN

- Familiarize yourself with each of the control activities.
- Understand the nature of the frauds that each control activity is intended to address.

Solution

1. Violates the control activity of segregation of duties. Recordkeeping should be separate from physical custody. As a consequence, the employee could embezzle cash and make journal entries to hide the theft.
2. Violates the control activity of human resource controls. Key employees must take vacations. Otherwise, the treasurer, who manages the company's cash, might embezzle cash and use his position to conceal the theft.
3. Violates the control activity of documentation procedures. If prenumbered documents are not used, then it is virtually impossible to account for the documents. As a consequence, an employee could write up a dinner sale, receive the cash from the customer, and then throw away the order slip and keep the cash.

Cash Controls

LEARNING OBJECTIVE 2

Apply internal control principles to cash.

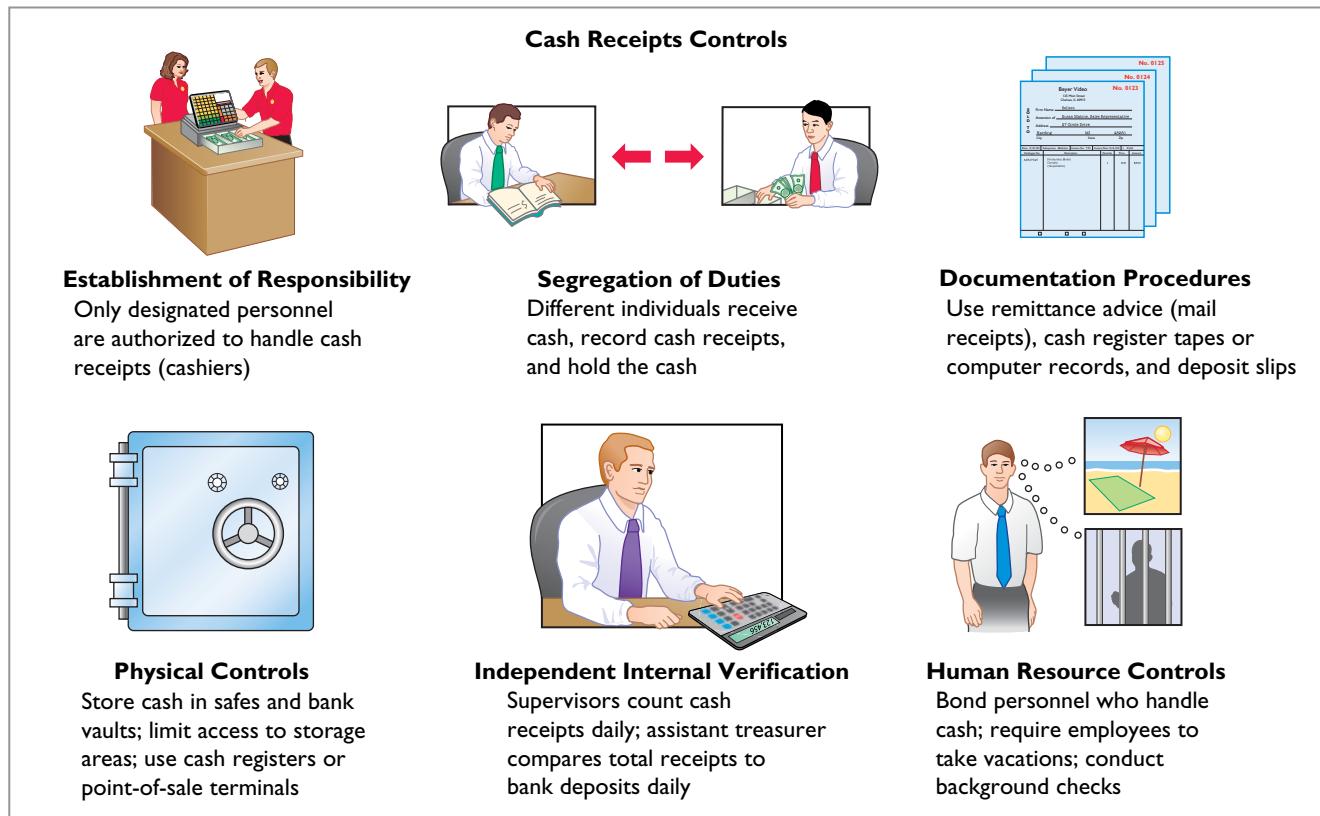

Cash is the one asset that is readily convertible into any other type of asset. It also is easily concealed and transported, and is highly desired. Because of these characteristics, **cash is the asset most susceptible to fraudulent activities**. In addition, because of the large volume of

cash transactions, numerous errors may occur in executing and recording them. To safeguard cash and to ensure the accuracy of the accounting records for cash, effective internal control over cash is critical.

Cash Receipts Controls

Illustration 8.4 shows how the internal control principles explained earlier apply to cash receipts transactions. As you might expect, companies vary considerably in how they apply these principles. To illustrate internal control over cash receipts, we will examine control activities for a retail store with both over-the-counter and mail receipts.

ILLUSTRATION 8.4 Application of internal control principles to cash receipts

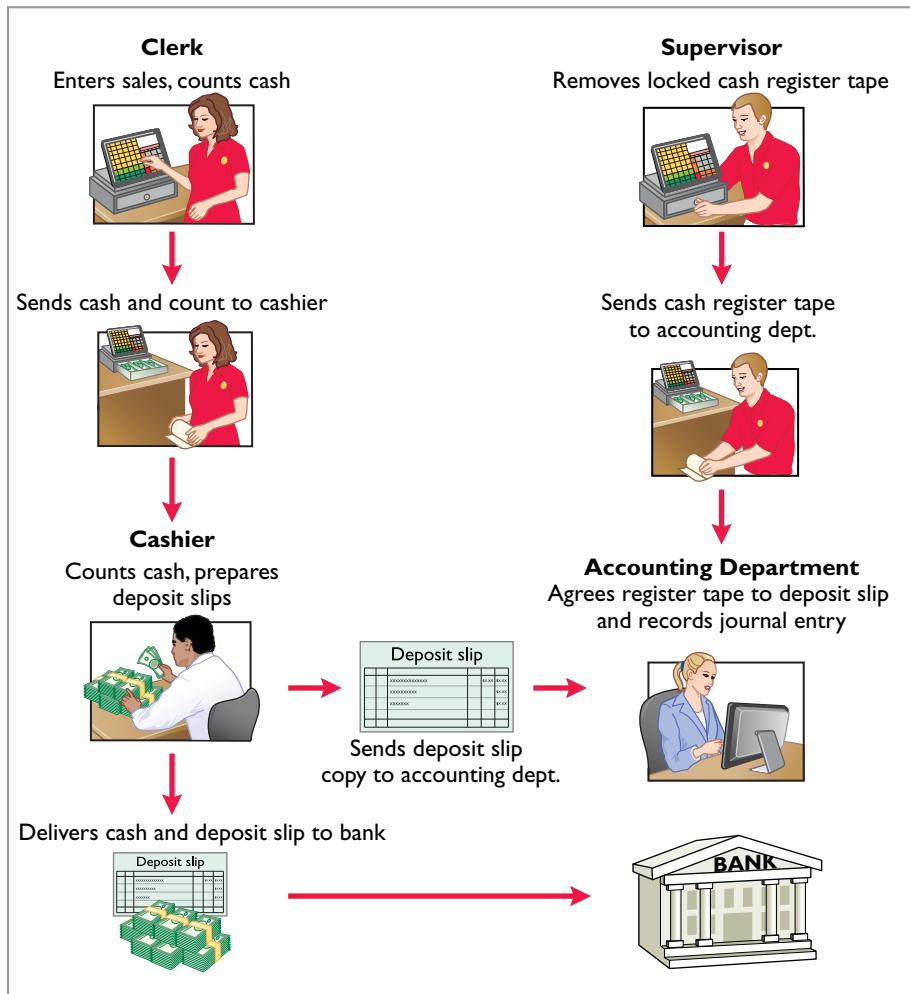

Over-the-Counter Receipts

In retail businesses, control of over-the-counter receipts centers on cash registers that are visible to customers. A cash sale is entered in a cash register (or point-of-sale terminal), with the amount clearly visible to the customer. This activity prevents the sales clerk from entering a lower amount and pocketing the difference. The customer receives an itemized cash register receipt and is expected to count the change received. (One weakness at **Barriques** in the Feature Story is that customers are only given a receipt if requested.) The cash register's tape is locked in the register until a supervisor removes it. This tape accumulates the daily transactions and totals.

At the end of the clerk's shift, the clerk counts the cash and sends the cash and the count to the cashier. The cashier counts the cash, prepares a deposit slip, and deposits the cash at the bank. The cashier also sends a duplicate of the deposit slip to the accounting department to indicate cash received. The supervisor removes the cash register tape and sends it to the accounting department as the basis for a journal entry to record the cash received.

(For point-of-sale systems, the accounting department receives information on daily transactions and totals through the computer network.) **Illustration 8.5** summarizes this process (see **Helpful Hint**).

**ILLUSTRATION 8.5****Control of over-the-counter receipts****HELPFUL HINT**

Flowcharts such as this one enhance the understanding of the flow of documents, the processing steps, and the internal control procedures.

This system for handling cash receipts uses an important internal control principle—segregation of recordkeeping from physical custody. The supervisor has access to the cash register tape but **not** to the cash. The clerk and the cashier have access to the cash but **not** to the register tape. In addition, the cash register tape provides documentation and enables independent internal verification. Use of these three principles of internal control (segregation of recordkeeping from physical custody, documentation, and independent internal verification) provides an effective system of internal control. Any attempt at fraudulent activity should be detected unless there is collusion among the employees.

In some instances, the amount deposited at the bank will not agree with the cash recorded in the accounting records based on the cash register tape. These differences often result because the clerk hands incorrect change back to the retail customer. In this case, the difference between the actual cash and the amount reported on the cash register tape is reported in a Cash Over and Short account. For example, suppose that the cash register tape indicated sales of \$6,956.20 but the amount of cash was only \$6,946.10. A cash shortfall of \$10.10 exists. To account for this cash shortfall and related cash, the company makes the following entry.

Cash
Cash Over and Short
Sales Revenue
(To record cash shortfall)

	6,946.10	10.10	6,956.20
--	----------	-------	----------

A	=	L	+	OE
		+6,946.10		-10.10
				+6,956.20
Cash Flows				
+6,946.10				

Cash Over and Short is an income statement item. It is reported as miscellaneous expense when there is a cash shortfall, and as miscellaneous revenue when there is an overage. Clearly, the amount should be small. Any material amounts in this account should be investigated.

Mail Receipts

All mail receipts should be opened in the presence of at least two mail clerks. These receipts are generally in the form of checks. A mail clerk should endorse each check “For Deposit Only.” This restrictive endorsement reduces the likelihood that someone could divert the check to personal use. Banks will not give an individual cash when presented with a check that has this type of endorsement.

The mail clerks prepare, in triplicate, a list of the checks received each day. This list shows the name of the check issuer, the purpose of the payment, and the amount of the check. Each mail clerk signs the list to establish responsibility for the data. The original copy of the list, along with the checks, is then sent to the cashier’s department. A copy of the list is sent to the accounting department for recording in the accounting records. The clerks also keep a copy.

This process provides excellent internal control for the company. By employing two clerks, the chance of fraud is reduced. Each clerk knows he or she is being observed by the other clerk(s). To engage in fraud, they would have to collude. The customers who submit payments also provide control because they will contact the company with a complaint if they are not properly credited for payment. Because the cashier has access to cash but not the records, and the accounting department has access to records but not cash, neither can engage in undetected fraud.

DO IT! 2a | Control over Cash Receipts

L. R. Cortez is concerned about the control over cash receipts in his fast-food restaurant, Big Cheese. The restaurant has two cash registers. At no time do more than two employees take customer orders and enter sales. Work shifts for employees range from 4 to 8 hours. Cortez asks your help in installing a good system of internal control over cash receipts.

Solution

Cortez should assign a separate cash register drawer to each employee at the start of each work shift, with register totals set at zero. Each employee should have access to only the assigned register drawer to enter all sales. Each customer should be given a receipt. At the end of the shift, the employee should do a cash count. A separate employee should compare the cash count with the register tape (or point-of-sale records) to be sure they agree. In addition, Cortez should install an automated point-of-sale system that would enable the company to compare orders entered in the register to orders processed by the kitchen.

Related exercise material: **BE8.5, BE8.6, BE8.7, BE8.8, DO IT! 8.2a, E8.2, and E8.3.**

ACTION PLAN

- Differentiate among the internal control principles of (1) establishing responsibility, (2) using physical controls, and (3) independent internal verification.
- Design an effective system of internal control over cash receipts.

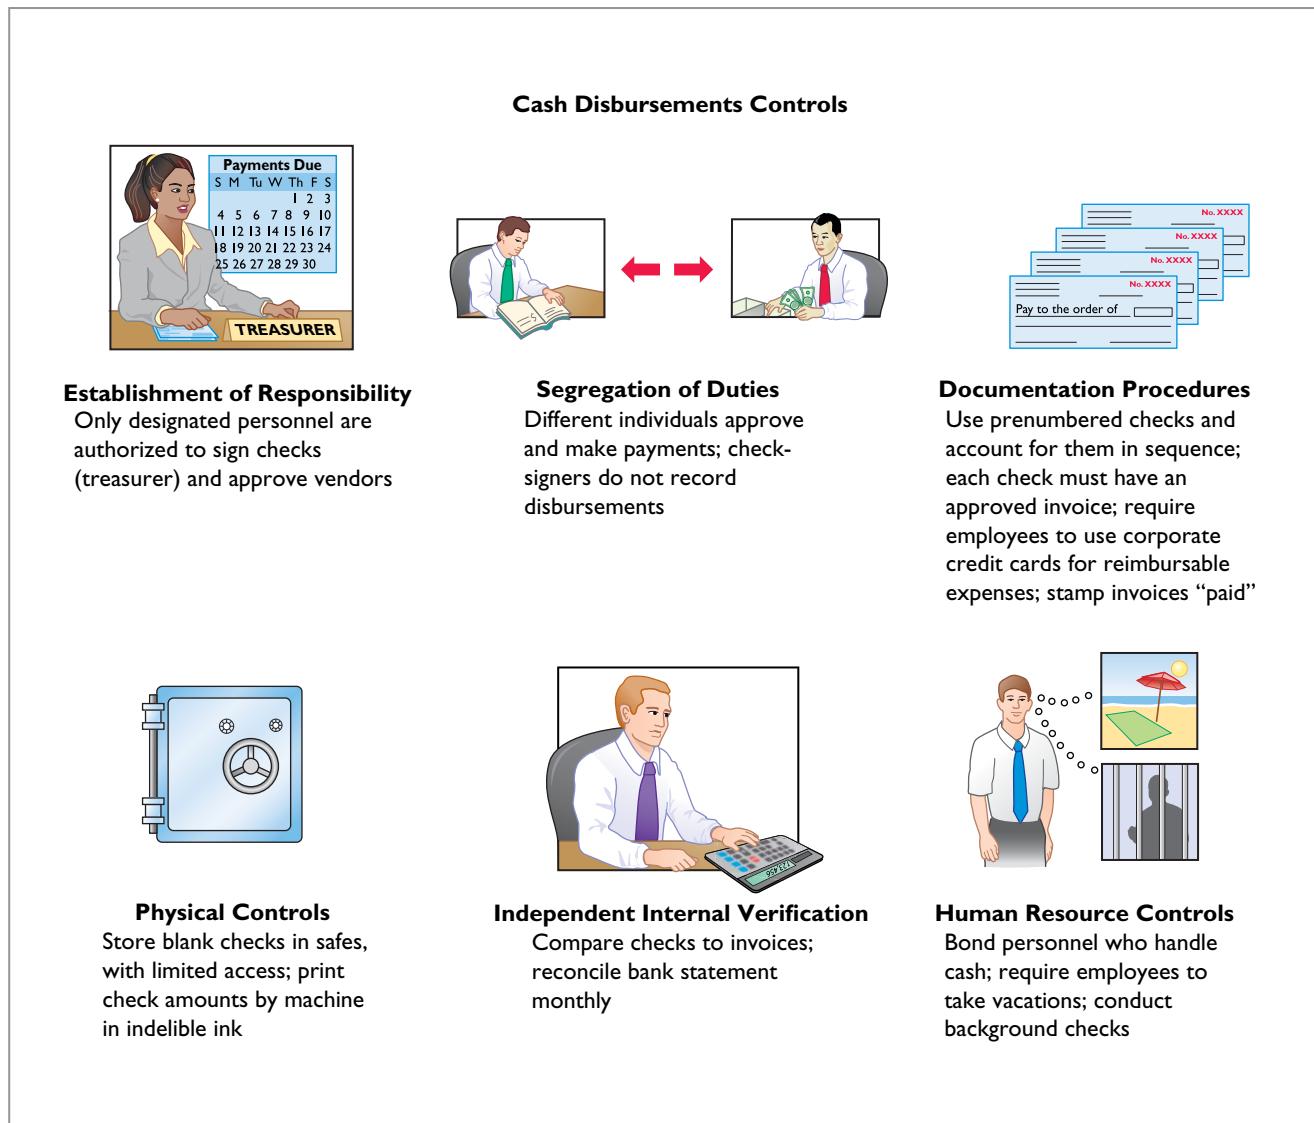

Cash Disbursements Controls

Companies disburse cash for a variety of reasons, such as to pay expenses and liabilities or to purchase assets. Generally, internal control over cash disbursements is more effective when companies pay by check or electronic funds transfer (EFT) rather than by cash. One exception is payments for incidental amounts that are paid out of petty cash.²

²We explain the operation of a petty cash fund in the next section.

Companies generally issue checks only after following specified control procedures. **Illustration 8.6** shows how principles of internal control apply to cash disbursements.

ILLUSTRATION 8.6 Application of internal control principles to cash disbursements

Voucher System Controls

Most medium and large companies use vouchers as part of their internal control over cash disbursements. A **voucher system** is a network of approvals by authorized individuals, acting independently, to ensure that all disbursements by check are proper.

The system begins with the authorization to incur a cost or expense. It ends with the issuance of a check for the liability incurred. A **voucher** is an authorization form prepared for each expenditure. Companies require vouchers for all types of cash disbursements except those from petty cash.

The starting point in preparing a voucher is to fill in the appropriate information about the liability on the face of the voucher. The vendor's invoice provides most of the needed information. Then, an employee in accounts payable records the voucher (in a journal called a **voucher register**) and files it according to the date on which it is to be paid. The company issues and sends a check on that date, and stamps the voucher "paid." The paid voucher is sent to the accounting department for recording (in a journal called the **check register**). A voucher

system involves two journal entries, one to record the liability when the voucher is issued and a second to pay the liability that relates to the voucher.

The use of a voucher system, whether done manually or electronically, improves internal control over cash disbursements. First, the authorization process inherent in a voucher system establishes responsibility. Each individual has responsibility to review the underlying documentation to ensure that it is correct. In addition, the voucher system keeps track of the documents that back up each transaction. By keeping these documents in one place, a supervisor can independently verify the authenticity of each transaction. Consider, for example, the case of Aesop University presented in the “Anatomy of a Fraud” box earlier in the chapter. Aesop did not use a voucher system for transactions under \$2,500. As a consequence, there was no independent verification of the documents, which enabled the employee to submit fake invoices to hide his unauthorized purchases.

Petty Cash Fund

ETHICS NOTE

Petty cash funds are authorized and legitimate. In contrast, “slush” funds are unauthorized and hidden (under the table).

As you just learned, better internal control over cash disbursements is possible when companies make payments by check. However, using checks to pay small amounts is both impractical and a nuisance. For instance, a company would not want to write checks to pay for postage due, working lunches, or taxi fares. A common way of handling such payments, while maintaining satisfactory control, is to use a **petty cash fund** to pay relatively small amounts (see **Ethics Note**). The operation of a petty cash fund, often called an **imprest system**, involves (1) establishing the fund, (2) making payments from the fund, and (3) replenishing the fund.³

Establishing the Petty Cash Fund

Two essential steps in establishing a petty cash fund are (1) appointing a petty cash custodian who will be responsible for the fund, and (2) determining the size of the fund. Ordinarily, a company expects the amount in the fund to cover anticipated disbursements for a three- to four-week period.

To establish the fund, a company issues a check payable to the petty cash custodian for the stipulated amount. For example, if Laird Company decides to establish a \$100 fund on March 1, the general journal entry is as follows.

A	=	L	+	OE
+100				
-100				

Cash Flows
no effect

Mar. 1	Petty Cash	100
	Cash	
	(To establish a petty cash fund)	100

The fund custodian cashes the check and places the proceeds in a locked petty cash box or drawer. Most petty cash funds are established on a fixed-amount basis. The company will make no additional entries to the Petty Cash account unless management changes the stipulated amount of the fund. For example, if Laird decides on July 1 to increase the size of the fund to \$250, it would debit Petty Cash \$150 and credit Cash \$150.

Making Payments from the Petty Cash Fund

The petty cash custodian has the authority to make payments from the fund that conform to prescribed management policies. Usually, management limits the size of expenditures that come from petty cash. Likewise, it may not permit use of the fund for certain types of transactions (such as making short-term loans to employees).

Each payment from the fund must be documented on a prenumbered petty cash receipt (or petty cash voucher), as shown in **Illustration 8.7** (see **Helpful Hint**). The signatures of both the fund custodian and the person receiving payment are required on the receipt. If other supporting documents such as a freight bill or invoice are available, they should be attached to the petty cash receipt.

³The term “imprest” means an advance of money for a designated purpose.

HELPFUL HINT

The petty cash receipt satisfies two internal control principles: (1) establishment of responsibility (signature of custodian), and (2) documentation procedures.

ILLUSTRATION 8.7**Petty cash receipt**

No. 7	LAIRD COMPANY Petty Cash Receipt
Paid to <u>Acme Express Agency</u>	Date <u>3/6/20</u>
For <u>Collect Express Charges</u>	Amount <u>\$18.00</u>
CHARGE TO <u>Freight-In</u>	
Approved <u>L. A. Bird</u>	Received Payment <u>R. Meins</u>
Custodian	

The petty cash custodian keeps the receipts in the petty cash box until the fund is replenished. The sum of the petty cash receipts and the money in the fund should equal the established total at all times. Management can (and should) make surprise counts at any time (or use an independent person, such as an internal auditor) to determine the correctness of the fund.

The company does not make an accounting entry to record a payment when it is made from petty cash. It is considered both inexpedient and unnecessary to do so. Instead, the company recognizes the accounting effects of each payment when it replenishes the fund.

Replenishing the Petty Cash Fund

When the money in the petty cash fund reaches a minimum level, the company replenishes the fund (see **Helpful Hint**). The petty cash custodian initiates a request for reimbursement. The individual prepares a schedule (or summary) of the payments that have been made and sends the schedule, supported by petty cash receipts and other documentation, to the treasurer's office. The treasurer's office examines the receipts and supporting documents to verify that proper payments from the fund were made. The treasurer then approves the request and issues a check to restore the fund to its established amount. At the same time, all supporting documentation is stamped "paid" so that it cannot be submitted again for payment.

To illustrate, assume that on March 15 Laird's petty cash custodian requests a check for \$87. The fund contains \$13 cash and petty cash receipts for postage \$44, freight-out \$38, and miscellaneous expenses \$5. The general journal entry to record the check is as follows.

Mar. 15	Postage Expense	44	
	Freight-Out	38	
	Miscellaneous Expense	5	
	Cash		87
	(To replenish petty cash fund)		

Note that the reimbursement entry does not affect the Petty Cash account. Replenishment changes the composition of the fund by replacing the petty cash receipts with cash. It does not change the balance in the fund.

Occasionally, in replenishing a petty cash fund, the company may need to recognize a cash shortage or overage (see **Helpful Hint**). This results when the total of the cash plus receipts in the petty cash box does not equal the established amount of the petty cash fund. To illustrate, assume that Laird's petty cash custodian has only \$12 in cash in the fund plus the receipts as listed. The request for reimbursement would therefore be for \$88, and Laird would make the following entry.

Mar. 15	Postage Expense	44	
	Freight-Out	38	
	Miscellaneous Expense	5	
	Cash Over and Short	1	
	Cash		88
	(To replenish petty cash fund)		

HELPFUL HINT

Replenishing the petty cash fund involves three internal control procedures:

1. segregation of duties,
2. documentation procedures, and
3. independent internal verification.

A	=	L	+	OE
				-44 Exp.
				-38 Exp.
-87				-5 Exp.

Cash Flows
-87

HELPFUL HINT

Cash over and short situations result from mathematical errors or from failure to keep accurate records.

A	=	L	+	OE
				-44 Exp.
				-38 Exp.
				-5 Exp.
-88				-1 Exp.

Cash Flows
-88

Conversely, if the custodian has \$14 in cash, the reimbursement request would be for \$86. The company would credit Cash Over and Short for \$1 (overage). A company reports a debit balance in Cash Over and Short in the income statement as miscellaneous expense. It reports a credit balance in the account as miscellaneous revenue. The company closes Cash Over and Short to Income Summary at the end of the year.

Companies should replenish a petty cash fund **at the end of the accounting period, regardless of the cash in the fund**. Replenishment at this time is necessary in order to recognize the effects of the petty cash payments on the financial statements.

Internal control over a petty cash fund is strengthened by (1) having a supervisor make surprise counts of the fund to ascertain whether the paid petty cash receipts and fund cash equal the designated amount, and (2) cancelling or mutilating the paid petty cash receipts so they cannot be resubmitted for reimbursement.

How Employees Steal

Occupational fraud is using your own occupation for personal gain through the misuse or misapplication of the company's resources or assets. This type of fraud is one of three types:

- 1. Asset misappropriation**, such as theft of cash on hand, fraudulent disbursements, false refunds, ghost employees, personal purchases, and fictitious employees. This fraud is the most common but the least costly.

- 2. Corruption**, such as bribery, illegal gratuities, and economic extortion. This fraud generally falls in the middle between asset misappropriation and financial statement fraud as regards frequency and cost.
- 3. Financial statement fraud**, such as fictitious revenues, concealed liabilities and expenses, improper disclosures, and improper asset values. This fraud occurs less frequently than other types of fraud but it is the most costly.

The graph below shows the frequency and the median loss for each type of occupational fraud. (Note that the sum of percentages exceeds 100% because some cases of fraud involved more than one type.)

How can companies reduce the likelihood of occupational fraud? (Go to WileyPLUS for this answer and additional questions.)

DO IT! 2b | Petty Cash Fund

Bateer Company established a \$50 petty cash fund on July 1. On July 30, the fund had \$12 cash remaining and petty cash receipts for postage \$14, office supplies \$10, and delivery expense \$15. Prepare journal entries to establish the fund on July 1 and to replenish the fund on July 30.

Solution

July 1	Petty Cash Cash (To establish petty cash fund)	50	50
30	Postage Expense Supplies Delivery Expense Cash Over and Short Cash (\$50 – \$12) (To replenish petty cash)	14 10 15 1 38	

Related exercise material: BE8.9, DO IT! 8.2b, E8.7 and E8.8.

ACTION PLAN

- To establish the fund, set up a separate general ledger account.
- Determine how much cash is needed to replenish the fund: subtract the cash remaining from the petty cash fund balance.
- Total the petty cash receipts. Determine any cash over or short—the difference between the cash needed to replenish the fund and the total of the petty cash receipts.
- Record the expenses incurred according to the petty cash receipts when replenishing the fund.

Control Features of a Bank Account

LEARNING OBJECTIVE 3

Identify the control features of a bank account.

The use of a bank contributes significantly to good internal control over cash. A company safeguards its cash by using a bank as a depository and clearinghouse for checks received and checks written. The use of a bank checking account minimizes the amount of currency that must be kept on hand. It also facilitates control of cash because a double record is maintained of all bank transactions—one by the business and the other by the bank. The asset account Cash maintained by the company is the “flipside” of the bank’s liability account for that company. A **bank reconciliation** is the process of comparing the bank’s balance with the company’s balance, and explaining the differences to make them agree.

Many companies have more than one bank account. For efficiency of operations and better control, national retailers like **Wal-Mart** and **Target** often have regional bank accounts. Similarly, a company such as **ExxonMobil** with more than 100,000 employees may have a payroll bank account as well as one or more general bank accounts. In addition, a company may maintain several bank accounts in order to have more than one source for short-term loans.

Making Bank Deposits

An authorized employee, such as the head cashier, should make a company’s bank deposits. Each deposit must be documented by a deposit slip (ticket), as shown in **Illustration 8.8**.

Deposit slips are prepared in duplicate. The bank retains the original; the depositor keeps the duplicate, machine-stamped by the bank to establish its authenticity.

ILLUSTRATION 8.8**Deposit slip**

Writing Checks

A **check** is a written order signed by the depositor directing the bank to pay a specified sum of money to a designated recipient. There are three parties to a check: (1) the **maker** (or drawer) who issues the check, (2) the **bank** (or payer) on which the check is drawn, and (3) the **payee** to whom the check is payable. A check is a **negotiable instrument** that one party can transfer to another party by endorsement. Each check should be accompanied by an explanation of its purpose. In many companies, a remittance advice attached to the check, as shown in **Illustration 8.9**, explains the check's purpose.

ILLUSTRATION 8.9**Check with remittance advice**

Electronic Funds Transfer (EFT) System

It is not surprising that companies and banks have developed approaches to transfer funds among parties without the use of paper (deposit tickets, checks, etc.). Such procedures, called **electronic funds transfers (EFT)**, are disbursement systems that use wire, telephone, or computers to transfer cash balances from one location to another. Use of EFT is quite common. For example, many employees receive no formal payroll checks from their employers. Instead, employers send electronic payroll data to the appropriate banks. Also, companies now frequently make regular payments such as those for utilities, rent, and insurance by EFT.

EFT transactions normally result in better internal control since no cash or checks are handled by company employees. This does not mean that opportunities for fraud are eliminated. In fact, the same basic principles related to internal control apply to EFT transfers. For example, without proper segregation of duties and authorizations, an employee might be able to redirect electronic payments into a personal bank account and conceal the theft with fraudulent accounting entries.

Bank Statements

Each month, the company receives from the bank a **bank statement** showing its bank transactions and balances.⁴ For example, the statement for Laird Company in **Illustration 8.10** shows the following: (1) checks paid and other debits (such as debit card transactions or electronic

ILLUSTRATION 8.10

⁴Our presentation assumes that a company makes all adjustments at the end of the month. In practice, a company may also make journal entries during the month as it reviews information from the bank regarding its account.

HELPFUL HINT

Essentially, the bank statement is a copy of the bank's records sent to the customer or made available online for review.

funds transfers for bill payments) that reduce the balance in the depositor's account, (2) deposits (by direct deposit, automated teller machine, or electronic funds transfer) and other credits that increase the balance in the depositor's account, and (3) the account balance after each day's transactions (see **Helpful Hint**).

Remember that **bank statements are prepared from the bank's perspective**. For example, **every deposit the bank receives is an increase in the bank's liabilities (an account payable to the depositor)**. Therefore, in Illustration 8.10, National Bank and Trust **credits** to Laird Company every deposit it received from Laird. The reverse occurs when the bank "pays" a check issued by Laird Company on its checking account balance: Payment reduces the bank's liability and is therefore **debited** to Laird's account with the bank.

The bank statement lists in numerical sequence all paid checks along with the date the check was paid and its amount. Upon paying a check, the bank stamps the check "paid"; a paid check is sometimes referred to as a **canceled** check. In addition, the bank includes with the bank statement memoranda explaining other debits and credits it made to the depositor's account.

A check that is not paid by a bank because of insufficient funds in a bank account is called an **NSF check** (not sufficient funds). The bank uses a debit memorandum when a previously deposited customer's check "bounces" because of insufficient funds. In such a case, the customer's bank marks the check NSF (not sufficient funds) and returns it to the depositor's bank. The bank then debits (decreases) the depositor's account, as shown by the symbol NSF in Illustration 8.10, and sends the NSF check and debit memorandum to the depositor as notification of the charge. The NSF check creates an account receivable for the depositor and reduces cash in the bank account.

Reconciling the Bank Account

Because the bank and the company maintain independent records of the company's checking account, you might assume that the respective balances will always agree. In fact, the two balances are seldom the same at any given time, and both balances differ from the "correct or true" balance. Therefore, it is necessary to make the balance per books and the balance per bank agree with the correct or true amount—a process called **reconciling the bank account**. The need for reconciliation has two causes:

1. **Time lags** that prevent one of the parties from recording the transaction in the same period.
2. **Errors** by either party in recording transactions.

Time lags occur frequently. For example, several days may elapse between the time a company pays by check and the date the bank pays the check. Similarly, when a company uses the bank's night depository to make its deposits, there will be a difference of one day between the time the company records the receipts and the time the bank does so. A time lag also occurs whenever the bank mails a debit or credit memorandum to the company.

You might think that if a company never writes checks (for example, if a small company uses only a debit card or electronic funds transfers), it does not need to reconcile its account. However, **the possibility of errors or fraud still necessitates periodic reconciliation**. The incidence of errors or fraud depends on the effectiveness of the internal controls maintained by the company and the bank. Bank errors are infrequent. However, either party could accidentally record a \$450 check as \$45 or \$540. In addition, the bank might mistakenly charge a check drawn by C. D. Berg to the account of C. D. Burg.

Reconciliation Procedure

In reconciling the bank account, it is customary to reconcile the balance per books and balance per bank to their adjusted (correct or true) cash balances. **To obtain maximum benefit from a bank reconciliation, an employee who has no other responsibilities related to cash should prepare the reconciliation**. When companies do not follow the internal control principle of independent internal verification in preparing the reconciliation, cash embezzlements may escape unnoticed. For example, in the "Anatomy of a Fraud" box about Angela Bauer, a bank reconciliation might have exposed her embezzlement.

Illustration 8.11 shows the reconciliation process. The starting point in preparing the reconciliation is to enter the balance per bank statement and balance per books on a schedule (see **Helpful Hint**). The following steps should reveal all the reconciling items that cause the difference between the two balances.

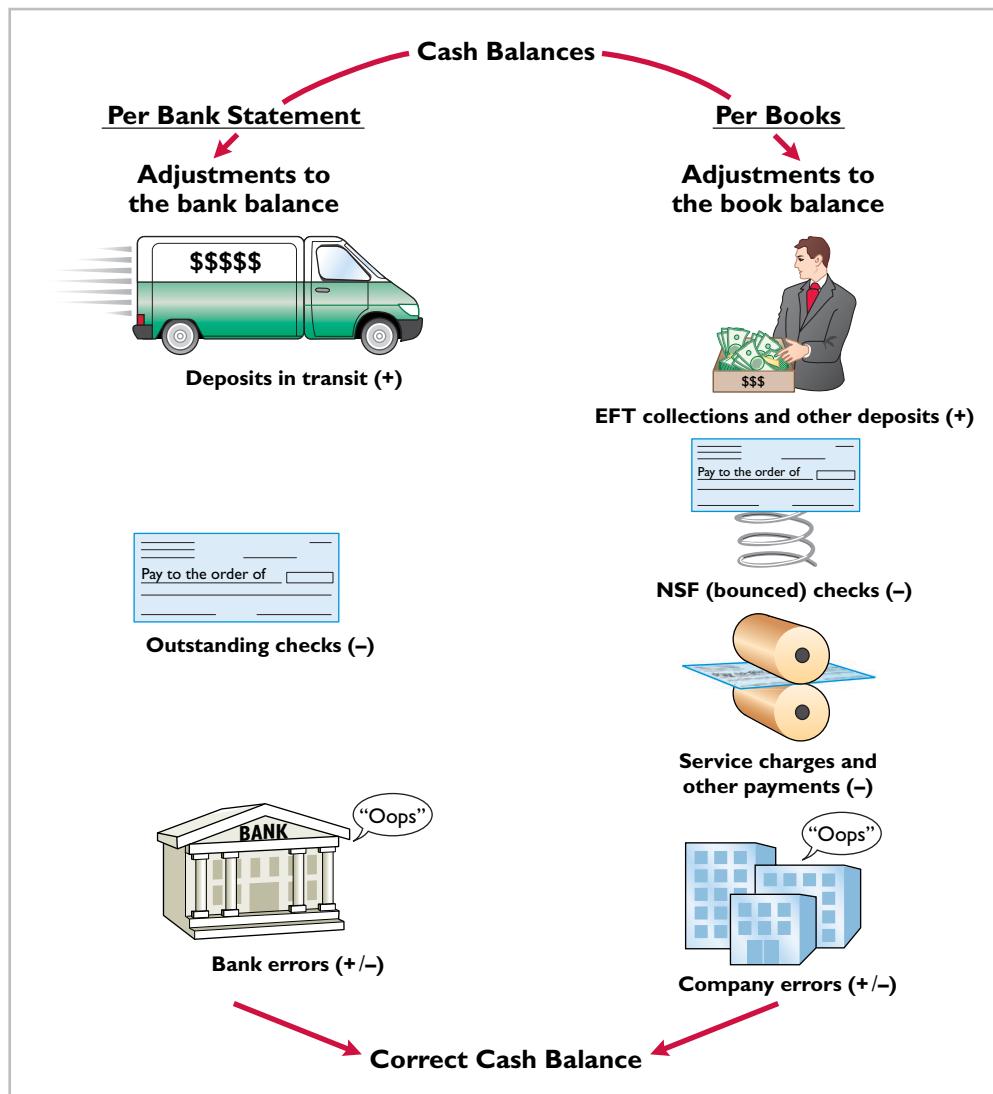

ILLUSTRATION 8.11
Bank reconciliation
adjustments

HELPFUL HINT

Deposits in transit and outstanding checks are reconciling items because of time lags.

Reconciling Items per Bank. On the bank side of the reconciliation, the items to reconcile are deposits in transit (amounts added), outstanding checks (amounts deducted), and bank errors (if any). By adjusting the bank balance for these items, a company brings that balance up to date.

- Step 1. Deposits in transit (+).** Compare the individual deposits on the bank statement with the deposits in transit from the preceding bank reconciliation and with the deposits per company records or copies of duplicate deposit slips. Deposits recorded by the depositor that have not been recorded by the bank represent **deposits in transit**. Add these deposits to the balance per bank.
- Step 2. Outstanding checks (-).** Compare the paid checks shown on the bank statement or the paid checks returned with the bank statement with (a) checks outstanding from the preceding bank reconciliation, and (b) checks issued by the company recorded as cash payments. Issued checks recorded by the company that have not been paid by the bank represent **outstanding checks**. Deduct outstanding checks from the balance per bank.
- Step 3. Bank errors (+/-).** Note any errors made by the bank that were discovered in the previous steps. For example, if the bank processed a deposit of \$1,693 as \$1,639 in error, the difference of \$54 (\$1,693 – \$1,639) is added to the balance per bank.

on the bank reconciliation. All errors made by the bank are reconciling items in determining the adjusted cash balance per the bank.

Reconciling Items Per Books. Reconciling items on the book side relate to amounts not yet recorded on the company's books and include adjustments from deposits and other amounts added, payments and other amounts deducted, and company errors (if any).

Step 1. Other deposits (+). Compare the other deposits on the bank statement with the company records. Any unrecorded amounts should be added to the balance per books. For example, if the bank statement shows electronic funds transfers from customers paying their accounts online, these amounts should be added to the balance per books on the bank reconciliation to update the company's records unless they had previously been recorded by the company.

Step 2. Other payments (-). Similarly, any unrecorded other payments should be deducted from the balance per books. For example, if the bank statement shows service charges (such as debit and credit card fees and other bank service charges), this amount is deducted from the balance per books on the bank reconciliation to make the company's records agree with the bank's records. **Normally, the company will already have recorded electronic payments.** However, if this has not been the case then these payments must be deducted from the balance per books on the bank reconciliation to make the company's records agree with the bank's records.

Step 3. Book errors (+/-). Note any errors made by the depositor that have been discovered in the previous steps. For example, say a company wrote check No. 443 to a supplier in the amount of \$1,226 on April 12, but the accounting clerk recorded the check amount as \$1,262. The error of \$36 (\$1,262 – \$1,226) is added to the balance per books because the company reduced the balance per books by \$36 too much when it recorded the check as \$1,262 instead of \$1,226. Only errors made by the company, not the bank, are included as reconciling items in determining the adjusted cash balance per books.

HELPFUL HINT

Note in the bank statement in Illustration 8.10 that the bank has paid checks No. 459 and 461, but check No. 460 is not listed. Thus, this check is outstanding. If a complete bank statement were provided, checks No. 453 and 457 also would not be listed. Laird obtains the amounts for these three checks from its cash payments records.

Bank Reconciliation Illustrated

Illustration 8.10 presented the bank statement for Laird Company which the company accessed online (see **Helpful Hint**). It shows a balance per bank of \$15,907.45 on April 30, 2020. On this date the balance of cash per books is \$11,709.45.

From the foregoing steps, Laird determines the following reconciling items for the bank.

Step 1. Deposits in transit (+): April 30 deposit (received by bank on May 1). \$2,201.40

Step 2. Outstanding checks (-): No. 453, \$3,000.00; No. 457, \$1,401.30; No. 460, \$1,502.70. 5,904.00

Step 3. Bank errors (+/-): None.

Reconciling items per books are as follows:

Step 1. Other deposits (+): Unrecorded electronic receipt from customer on account on April 9 determined from the bank statement. \$1,035.00

Step 2. Other payments (-): The electronic payments on April 3 and 7 were previously recorded by the company when they were initiated. Unrecorded charges determined from the bank statement are as follows:

Returned NSF check on April 29	425.60
Debit and credit card fees on April 30	120.00
Bank service charges on April 30	30.00

Step 3. Company errors (+): Check No. 443 was correctly written by Laird for \$1,226 and was correctly paid by the bank on April 12. However, it was recorded as \$1,262 on Laird's books. 36.00

Illustration 8.12 shows Laird's bank reconciliation (see **Alternative Terminology**).

Bank reconciliation

ALTERNATIVE TERMINOLOGY

The terms *adjusted cash balance*, *true cash balance*, and *correct cash balance* are used interchangeably.

Entries from Bank Reconciliation

The depositor (that is, the company) next must record each reconciling item used to determine the **adjusted cash balance per books**. If the company does not journalize and post these items, the Cash account will not show the correct balance. The adjusting entries for the Laird Company bank reconciliation on April 30 are as follows (see **Helpful Hint**).

Collection of Electronic Funds Transfer. A payment of an account by a customer is recorded in the same way, whether the cash is received through the mail or electronically. The entry is as follows.

Apr. 30	Cash	1,035	
	Accounts Receivable		1,035
	(To record receipt of electronic funds transfer)		

Book Error. An examination of the cash disbursements journal shows that check No. 443 was a payment on account to Andrea Company, a supplier. The correcting entry is as follows.

Apr. 30	Cash	36	
	Accounts Payable		36
	(To correct error in recording check No. 443)		

NSF Check. As indicated earlier, an NSF check becomes an accounts receivable to the depositor. The entry is as follows.

Apr. 30	Accounts Receivable	425.60	
	Cash		425.60
	(To record NSF check)		

Bank Charge Expense. Fees for processing debit and credit card transactions are normally debited to the Bank Charge Expense account, as are bank service charges. We have chosen to combine and record these in one journal entry, as shown below, although they also could be journalized separately.

Apr. 30	Bank Charge Expense	150	
	Cash		150
	(To record charges for debit and credit card fees of \$120 and bank service charges of \$30)		

HELPFUL HINT

These entries are adjusting entries. In prior chapters, we considered Cash an account that did not require adjustment because we had not yet explained a bank reconciliation.

After Laird posts the entries, the Cash account will appear as in **Illustration 8.13**. The adjusted cash balance in the ledger should agree with the adjusted cash balance per books in the bank reconciliation in Illustration 8.12.

ILLUSTRATION 8.13**Adjusted balance in Cash account**

Cash			
Apr. 30 Bal.	11,709.45	Apr. 30	425.60
30	1,035.00	30	150.00
30	36.00		
Apr. 30 Bal.	12,204.85		

What entries does the bank make? If the company discovers any bank errors in preparing the reconciliation, it should notify the bank so the bank can make the necessary corrections on its records. The bank does not make any entries for deposits in transit or outstanding checks. Only when these items reach the bank will the bank record these items.

Investor Insight

Mary Altaffer/©AP/Wide World Photos

Madoff's Ponzi Scheme

No recent fraud has generated more interest and rage than the one perpetrated by Bernard Madoff. Madoff was an elite New York investment fund manager who was highly regarded by securities regulators. Investors flocked to him because he delivered very steady returns of between 10% and 15%, no matter whether the market was going up or going down. However, for many years, Madoff did not actually invest the cash that people gave

to him. Instead, he was running a Ponzi scheme: He paid returns to existing investors using cash received from new investors. As long as the size of his investment fund continued to grow from new investments at a rate that exceeded the amounts that he needed to pay out in returns, Madoff was able to operate his fraud smoothly.

To conceal his misdeeds, Madoff fabricated false investment statements that were provided to investors. In addition, Madoff hired an auditor that never verified the accuracy of the investment records but automatically issued unqualified opinions each year. A competing fund manager warned the SEC a number of times over a nearly 10-year period that he thought Madoff was engaged in fraud. The SEC never aggressively investigated the allegations. Investors, many of which were charitable organizations, lost more than \$18 billion. Madoff was sentenced to a jail term of 150 years.

How was Madoff able to conceal such a giant fraud? (Go to WileyPLUS for this answer and additional questions.)

DO IT! 3 | Bank Reconciliation

Sally Kist owns Linen Kist Fabrics. Sally asks you to explain how she should treat the following reconciling items when reconciling the company's bank account: (1) a debit memorandum for an NSF check, (2) a credit memorandum received by the bank for an electronic funds transfer from one of the company's customers, (3) outstanding checks, and (4) a deposit in transit.

Solution

Sally should treat the reconciling items as follows.

1. NSF check: Deduct from balance per books.
2. Electronic funds transfer received by bank: Add to balance per books.
3. Outstanding checks: Deduct from balance per bank.
4. Deposit in transit: Add to balance per bank.

Related exercise material: **BE8.10, BE8.11, BE8.12, BE8.13, BE8.14, BE8.15, DO IT! 8.3, E8.9, E8.10, E8.11, E8.12, and E8.13.**

ACTION PLAN

- Understand the purpose of a bank reconciliation.
- Identify time lags and explain how they cause reconciling items.

Reporting Cash

LEARNING OBJECTIVE 4

Explain the reporting of cash.

Cash consists of coins, currency (paper money), checks, money orders, and money on hand or on deposit in a bank or similar depository. Companies report cash in two different statements: the balance sheet and the statement of cash flows. The balance sheet reports the amount of cash available at a given point in time. The statement of cash flows shows the sources and uses of cash during a period of time. The statement of cash flows was introduced in Chapter 1 and will be discussed in much detail in Chapter 17. In this section, we discuss some important points regarding the presentation of cash in the balance sheet.

When presented in a balance sheet, cash on hand, cash in banks, and petty cash are often combined and reported simply as **Cash**. Because it is the most liquid asset owned by the company, cash is listed first in the current assets section of the balance sheet.

Cash Equivalents

Many companies use the designation “Cash and cash equivalents” in reporting cash. (See **Illustration 8.14** for an example.) **Cash equivalents** are short-term, highly liquid investments that are both:

1. Readily convertible to known amounts of cash, and
2. So near their maturity that their market value is relatively insensitive to changes in interest rates. (Generally, only investments with original maturities of three months or less qualify under this definition.)

Real World

Delta Air Lines, Inc.	
Balance Sheet (partial, in millions)	
<u>Assets</u>	
Current assets	
Cash and cash equivalents	\$2,844
Short-term investments	959
Restricted cash	122

ILLUSTRATION 8.14

Balance sheet presentation of cash

Examples of cash equivalents are Treasury bills, commercial paper (short-term corporate notes), and money market funds. All typically are purchased with cash that is in excess of immediate needs (see **Ethics Note**).

Occasionally, a company will have a net negative balance in its bank account. In this case, the company should report the negative balance among current liabilities. For example, farm equipment manufacturer **Ag-Chem** at one time reported “Checks outstanding in excess of cash balances” of \$2,145,000 among its current liabilities.

Restricted Cash

A company may have **restricted cash**, cash that is not available for general use but rather is restricted for a special purpose. For example, landfill companies are often required to maintain

ETHICS NOTE

Recently, some companies were forced to restate their financial statements because they had too broadly interpreted which types of investments could be treated as cash equivalents. By reporting these items as cash equivalents, the companies made themselves look more liquid.

a fund of restricted cash to ensure they will have adequate resources to cover closing and clean-up costs at the end of a landfill site's useful life. **McKesson Corp.** recently reported restricted cash of \$962 million to be paid out as the result of investor lawsuits.

Cash restricted in use should be reported separately on the balance sheet as restricted cash. If the company expects to use the restricted cash within the next year, it reports the amount as a current asset. When this is not the case, it reports the restricted funds as a noncurrent asset.

Illustration 8.14 shows restricted cash reported in the financial statements of **Delta Air Lines**. The company is required to maintain restricted cash as collateral to support insurance obligations related to workers' compensation claims. Delta does not have access to these funds for general use, and so it must report them separately, rather than as part of cash and cash equivalents.

DO IT! 4 | Reporting Cash

Indicate whether each of the following statements is true or false. If false, indicate how to correct the statement.

1. Cash and cash equivalents are comprised of coins, currency (paper money), money orders, and NSF checks.
2. Restricted cash is classified as either a current asset or noncurrent asset, depending on the circumstances.
3. A company may have a negative balance in its bank account. In this case, it should offset this negative balance against cash and cash equivalents on the balance sheet.
4. Because cash and cash equivalents often includes short-term investments, accounts receivable should be reported as the first item on the balance sheet.

ACTION PLAN

- Understand how companies present cash and restricted cash on the balance sheet.
- Review the designations of cash equivalents and restricted cash, and how companies typically handle them.

Solution

1. False. NSF checks should be reported as receivables, not cash and cash equivalents.
2. True.
3. False. Companies that have a negative balance in their bank accounts should report the negative balance as a current liability.
4. False. Cash equivalents are readily convertible to known amounts of cash, and so near maturity (less than 3 months) that they are considered more liquid than accounts receivable and therefore are reported before accounts receivable on the balance sheet.

Related exercise material: **BE8.16, DO IT! 8.4, E8.14, and E8.15.**

Review and Practice

Learning Objectives Review

1 Define fraud and the principles of internal control.

A fraud is a dishonest act by an employee that results in personal benefit to the employee at a cost to the employer. The fraud triangle refers to the three factors that contribute to fraudulent activity by employees: opportunity, financial pressure, and rationalization. Internal control consists of all the related methods and measures adopted within an organization to safeguard its assets, enhance the reliability of its accounting records, increase efficiency of operations, and ensure compliance with laws and regulations.

The principles of internal control are establishment of responsibility, segregation of duties, documentation procedures, physical controls, independent internal verification, and human resource controls such as bonding and requiring employees to take vacations.

2 Apply internal control principles to cash.

Internal controls over cash receipts include (a) designating specific personnel to handle cash; (b) assigning different individuals to receive

cash, record cash, and maintain custody of cash; (c) using remittance advices for mail receipts, cash register tapes for over-the-counter receipts, and deposit slips for bank deposits; (d) using company safes and bank vaults to store cash with access limited to authorized personnel, and using cash registers or point-of-sale terminals in executing over-the-counter receipts; (e) making independent daily counts of register receipts and daily comparison of total receipts with total deposits; and (f) bonding personnel that handle cash and requiring them to take vacations.

Internal controls over cash disbursements include (a) having specific individuals such as the treasurer authorized to sign checks and approve vendors; (b) assigning different individuals to approve items for payment, make the payment, and record the payment; (c) using prenumbered checks and accounting for all checks, with each check supported by an approved invoice; (d) storing blank checks in a safe or vault with access restricted to authorized personnel, and using a check-writing machine to imprint amounts on checks; (e) comparing each check with the approved invoice before issuing the check, and making monthly reconciliations of bank and book balances; and (f) bonding personnel who handle cash, requiring employees to take vacations, and conducting background checks.

Companies operate a petty cash fund to pay relatively small amounts of cash. They must establish the fund, make payments from

the fund, and replenish the fund when the cash in the fund reaches a minimum level.

3 Identify the control features of a bank account.

A bank account contributes to good internal control by providing physical controls for the storage of cash. It minimizes the amount of currency that a company must keep on hand, and it creates a double record of a depositor's bank transactions. It is customary to reconcile the balance per books and balance per bank to their adjusted balances. The steps in the reconciling process are to determine deposits in transit and electronic funds transfers received by bank, outstanding checks, errors by the depositor or the bank, and unrecorded bank memoranda.

4 Explain the reporting of cash.

Companies list cash first in the current assets section of the balance sheet. In some cases, they report cash together with cash equivalents. Cash restricted for a special purpose is reported separately as a current asset or as a noncurrent asset, depending on when the cash is expected to be used.

Glossary Review

Bank reconciliation The process of comparing the bank's balance of an account with the company's balance and explaining any differences to make them agree. (p. 8-19).

Bank statement A monthly statement from the bank that shows the depositor's bank transactions and balances. (p. 8-21).

Bonding Obtaining insurance protection against theft by employees. (p. 8-9).

Cash Resources that consist of coins, currency, checks, money orders, and money on hand or on deposit in a bank or similar depository. (p. 8-27).

Cash equivalents Short-term, highly liquid investments that can be converted to a specific amount of cash. (p. 8-27).

Check A written order signed by a bank depositor, directing the bank to pay a specified sum of money to a designated recipient. (p. 8-20).

Deposits in transit Deposits recorded by the depositor but not yet recorded by the bank. (p. 8-23).

Electronic funds transfer (EFT) A disbursement system that uses wire, telephone, or computers to transfer funds from one location to another. (p. 8-21).

Fraud A dishonest act by an employee that results in personal benefit to the employee at a cost to the employer. (p. 8-3).

Fraud triangle The three factors that contribute to fraudulent activity by employees: opportunity, financial pressure, and rationalization. (p. 8-3).

Internal auditors Company employees who continuously evaluate the effectiveness of the company's internal control system. (p. 8-9).

Internal control A process designed to provide reasonable assurance regarding the achievement of company objectives related to operations, reporting, and compliance. (p. 8-4).

NSF check A check that is not paid by a bank because of insufficient funds in a customer's bank account. (p. 8-22).

Outstanding checks Checks issued and recorded by a company but not yet paid by the bank. (p. 8-23).

Petty cash fund A cash fund used to pay relatively small amounts. (p. 8-16).

Restricted cash Cash that must be used for a special purpose. (p. 8-27).

Sarbanes-Oxley Act (SOX) Regulations passed by Congress to try to reduce unethical corporate behavior. (p. 8-3).

Voucher An authorization form prepared for each payment in a voucher system. (p. 8-15).

Voucher system A network of approvals by authorized individuals acting independently to ensure that all disbursements by check are proper. (p. 8-15).

Practice Multiple-Choice Questions

1. **(LO 1)** Which of the following is **not** an element of the fraud triangle?

- a. Rationalization.
- b. Financial pressure.
- c. Segregation of duties.
- d. Opportunity.

2. **(LO 1)** An organization uses internal control to enhance the accuracy and reliability of accounting records and to:

- a. safeguard assets.
- b. prevent fraud.
- c. produce correct financial statements.
- d. deter employee dishonesty.

- 3. (LO 1)** Which of the following was **not** a result of the Sarbanes-Oxley Act?
- Companies must file financial statements with the Internal Revenue Service.
 - All publicly traded companies must maintain adequate internal controls.
 - The Public Company Accounting Oversight Board was created to establish auditing standards and regulate auditor activity.
 - Corporate executives and board of directors must ensure that controls are reliable and effective, and they can be fined or imprisoned for failure to do so.
- 4. (LO 1)** The principles of internal control do **not** include:
- establishment of responsibility.
 - documentation procedures.
 - management responsibility.
 - independent internal verification.
- 5. (LO 1)** Physical controls do **not** include:
- safes and vaults to store cash.
 - independent bank reconciliations.
 - locked warehouses for inventories.
 - bank safety deposit boxes for important papers.
- 6. (LO 1)** Which of the following control activities is **not** relevant when a company uses a computerized (rather than manual) accounting system?
- Establishment of responsibility.
 - Segregation of duties.
 - Independent internal verification.
 - All of these control activities are relevant to a computerized system.
- 7. (LO 2)** Permitting only designated personnel to handle cash receipts is an application of the principle of:
- segregation of duties.
 - establishment of responsibility.
 - independent internal verification.
 - human resource controls.
- 8. (LO 2)** The use of prenumbered checks in disbursing cash is an application of the principle of:
- establishment of responsibility.
- b. segregation of duties.**
- c. physical controls.**
- d. documentation procedures.**
- 9. (LO 2)** A company writes a check to replenish a \$100 petty cash fund when the fund contains receipts of \$94 and \$4 in cash. In recording the check, the company should:
- debit Cash Over and Short for \$2.
 - debit Petty Cash for \$94.
 - credit Cash for \$94.
 - credit Petty Cash for \$2.
- 10. (LO 3)** The control features of a bank account do **not** include:
- having bank auditors verify the correctness of the bank balance per books.
 - minimizing the amount of cash that must be kept on hand.
 - providing a double record of all bank transactions.
 - safeguarding cash by using a bank as a depository.
- 11. (LO 3)** In a bank reconciliation, deposits in transit are:
- deducted from the book balance.
 - added to the book balance.
 - added to the bank balance.
 - deducted from the bank balance.
- 12. (LO 3)** The reconciling item in a bank reconciliation that will result in an adjusting entry by the depositor is:
- outstanding checks.
 - deposit in transit.
 - a bank error.
 - bank service charges.
- 13. (LO 4)** Which of the following items in a cash drawer at November 30 is **not** cash?
- Money orders.
 - Coins and currency.
 - An NSF check.
 - A customer check dated November 28.
- 14. (LO 4)** Which of the following statements correctly describes the reporting of cash?
- Cash cannot be combined with cash equivalents.
 - Restricted cash funds may be combined with cash.
 - Cash is listed first in the current assets section.
 - Restricted cash funds cannot be reported as a current asset.

Solutions

- 1. c.** Segregation of duties is not an element of the fraud triangle. The other choices are fraud triangle elements.
- 2. a.** Safeguarding assets is one of the purposes of using internal control. The other choices are incorrect because while internal control can help to (b) prevent fraud, (c) produce correct financial statements, and (d) deter employee dishonesty, these are not the main purposes of using it.
- 3. a.** Filing financial statements with the IRS is not a result of the Sarbanes-Oxley Act (SOX); SOX focuses on the prevention or detection of fraud. The other choices are results of SOX.
- 4. c.** Management responsibility is not one of the principles of internal control. The other choices are true statements.
- 5. b.** Independent bank reconciliations are not a physical control. The other choices are true statements.
- 6. d.** Establishment of responsibility, segregation of duties and independent internal verification are all relevant to a computerized system.
- 7. b.** Permitting only designated personnel to handle cash receipts is an application of the principle of establishment of responsibility, not (a) segregation of duties, (c) independent internal verification, or (d) human resource controls.
- 8. d.** The use of prenumbered checks in disbursing cash is an application of the principle of documentation procedures, not (a) establishment of responsibility, (b) segregation of duties, or (c) physical controls.

9. a. When this check is recorded, the company should debit Cash Over and Short for the shortage of \$2 (total of the receipts plus cash in the drawer (\$98) versus \$100), not (b) debit Petty Cash for \$94, (c) credit Cash for \$94, or (d) credit Petty Cash for \$2.

10. a. Having bank auditors verify the correctness of the bank balance per books is not one of the control features of a bank account. The other choices are true statements.

11. c. Deposits in transit are added to the bank balance on a bank reconciliation, not (a) deducted from the book balance, (b) added to the book balance, or (d) deducted from the bank balance.

12. d. Because the depositor does not know the amount of the bank service charges until the bank statements is received, an adjusting entry must be made when the statement is received. The other choices are incorrect because (a) outstanding checks do not require

an adjusting entry by the depositor because the checks have already been recorded in the depositor's books, (b) deposits in transit do not require an adjusting entry by the depositor because the deposits have already been recorded in the depositor's books, and (c) bank errors do not require an adjusting entry by the depositor, but the depositor does need to inform the bank of the error so it can be corrected.

13. c. An NSF check should not be considered cash. The other choices are true statements.

14. c. Cash is listed first in the current assets section. The other choices are incorrect because (a) cash and cash equivalents can be appropriately combined when reporting cash on the balance sheet, (b) restricted cash is not to be combined with cash when reporting cash on the balance sheet, and (d) restricted funds can be reported as current assets if they will be used within one year.

Practice Brief Exercises

- 1. (LO 2)** On May 31, Tyler's petty cash fund of \$200 is replenished when the fund contains \$7 in cash and receipts for postage \$105, freight-out \$49, and miscellaneous expense \$40. Prepare the journal entry to record the replenishment of the petty cash fund.

Prepare entry to replenish a petty cash fund.

Solution

1. Mar. 20	Postage Expense	105	
	Freight-Out	49	
	Miscellaneous Expense	40	
	Cash		193
	Cash Over and Short		1

- 2. (LO 3)** At August 31, Saladino Company has the following bank information: cash balance per bank \$5,200, outstanding checks \$1,462, deposits in transit \$1,211, and a bank debit memo \$110. Determine the adjusted cash balance per bank at July 31.

Prepare partial bank reconciliation.

Solution

2.	Cash balance per bank	\$5,200	
	Add: Deposits in transit	1,211	
		<hr/>	
		6,411	
	Less: Outstanding checks	1,462	
	Adjusted cash balance per bank	<hr/> \$4,949	

- 3. (LO 4) Financial Statement** Zian Company has the following cash balances: Cash in Bank \$18,762, Payroll Bank Account \$8,000, Petty Cash \$150, and Plant Expansion Fund Cash \$30,000 to be used 2 years from now. Explain how each balance should be reported on the balance sheet.

Explain the statement presentation of cash balances.

Solution

- 3.** Zian Company should report Cash in Bank, Payroll Bank Account, and Petty Cash as current assets (usually combined as one Cash amount). Plant Expansion Fund Cash should be reported as a noncurrent asset, assuming the fund is not expected to be used during the next year.

Practice Exercises

- 1. (LO 1, 2)** Listed below are five procedures followed by Viel Company.

Indicate good or weak internal control procedures.

- Total cash receipts are compared to bank deposits daily by Vonda Marshall, who receives cash over the counter.

2. Employees write down hours worked and turn in the sheet to the cashier's office.
3. As a cost-saving measure, employees do not take vacations.
4. Only the sales manager can approve credit sales.
5. Three different employees are assigned one task each related to inventory: ship goods to customers, bill customers, and receive payment from customers.

Instructions

Indicate whether each procedure is an example of good internal control or of weak internal control. If it is an example of good internal control, indicate which internal control principle is being followed. If it is an example of weak internal control, indicate which internal control principles is violated. Use the table below.

Procedure	IC Good or Weak?	Related Internal Control Principle
1.		
2.		
3.		
4.		
5.		

Solution

1. Procedure	IC Good or Weak?	Related Internal Control Principle
1.	Weak	Independent internal verification
2.	Weak	Physical controls
3.	Weak	Human resource controls
4.	Good	Establishment of responsibility
5.	Good	Segregation of duties

Prepare bank reconciliation and adjusting entries.

2. (LO 3) The information below relates to the Cash account in the ledger of Hillfarms Company.

Balance June 1—\$9,947; Cash deposited—\$37,120.
Balance June 30—\$10,094; Checks written—\$36,973.

The June bank statement shows a balance of \$9,525 on June 30 and the following memoranda.

Credits	Debits	
Collection of electronic funds transfer	\$884	NSF check: R. Doll
Interest earned on checking accounts	\$26	Safety deposit box rent

At June 30, deposits in transit were \$2,581, and outstanding checks totaled \$1,382.

Instructions

- a. Prepare the bank reconciliation at June 30.
- b. Prepare the adjusting entries at June 30, assuming the NSF check was from a customer on account.

Solution

2. a.

**Hillfarms Company
Bank Reconciliation
June 30**

Cash balance per bank statement	\$ 9,525
Add: Deposits in transit	2,581
	<hr/>
	12,106
Less: Outstanding checks	1,382
	<hr/>
Adjusted cash balance per bank	\$10,724

Cash balance per books		\$10,094
Add: Electronic funds transfer received	\$884	
Interest earned	26	910
		11,004
Less: NSF check	245	
Safety deposit box rent	35	280
Adjusted cash balance per books		<u><u>\$10,724</u></u>

b.	June 30	Cash	884	
		Accounts Receivable		884
	30	Cash	26	
		Interest Revenue		26
	30	Bank Charge Expense	35	
		Cash		35
	30	Accounts Receivable (R. Doll)	245	
		Cash		245

Practice Problem

(LO 3) Poorten Company's bank statement for May 2020 shows the following data.

Prepare bank reconciliation and journalize entries.

Balance 5/1	\$12,650	Balance 5/31	\$14,280
Debit memorandum:		Credit memorandum:	
NSF check	\$175	Collection of electronic funds transfer	\$505

The cash balance per books at May 31 is \$13,319. Your review of the data reveals the following.

1. The NSF check was from Copple Co., a customer.
2. Outstanding checks at May 31 total \$2,410.
3. Deposits in transit at May 31 total \$1,752.
4. A Poorten Company check for \$352, dated May 10, cleared the bank on May 25. The company recorded this check, which was a payment on account, for \$325.

Instructions

- a. Prepare a bank reconciliation at May 31.
- b. Journalize the entries required by the reconciliation.

Solution

Poorten Company Bank Reconciliation May 31, 2020		
Cash balance per bank statement		\$14,280
Add: Deposits in transit		1,752
		16,032
Less: Outstanding checks		2,410
Adjusted cash balance per bank		<u><u>\$13,622</u></u>
Cash balance per books		\$13,319
Add: Electronic funds transfer received		505
		13,824
Less: NSF check	\$175	
Error in recording check (\$352 – \$325)	27	202
Adjusted cash balance per books		<u><u>\$13,622</u></u>

b.				
	May 31	Cash		505
		Accounts Receivable		505
		(To record receipt of electronic funds transfer)		
	31	Accounts Receivable		175
		Cash		175
		(To record NSF check)		
	31	Accounts Payable		27
		Cash		27
		(To correct error in recording check)		

WileyPLUS

Brief Exercises, DO IT! Exercises, Exercises, Problems, and many additional resources are available for practice in WileyPLUS.

Questions

1. A local bank reported that it lost \$150,000 as the result of an employee fraud. Edward Jasso is not clear on what is meant by an “employee fraud.” Explain the meaning of fraud to Edward and give an example of frauds that might occur at a bank.
2. Fraud experts often say that there are three primary factors that contribute to employee fraud. Identify the three factors and explain what is meant by each.
3. Identify the five components of a good internal control system.
4. “Internal control is concerned only with enhancing the accuracy of the accounting records.” Do you agree? Explain.
5. Discuss how the Sarbanes-Oxley Act has increased the importance of internal control to top managers of a company.
6. What principles of internal control apply to most organizations?
7. In the corner grocery store, all sales clerks make change out of one cash register drawer. Is this a violation of internal control? Why?
8. Liz Kelso is reviewing the principle of segregation of duties. What are the two common applications of this principle?
9. How do documentation procedures contribute to good internal control?
10. What internal control objectives are met by physical controls?
11. (a) Explain the control principle of independent internal verification. (b) What practices are important in applying this principle?
12. As the company accountant, the management of Nickle Company asks you to explain (a) the concept of reasonable assurance in internal control and (b) the importance of the human factor in internal control.
13. What principle(s) of internal control is (are) involved in making daily cash counts of over-the-counter receipts?
14. Assume that **Kohl's** installed new electronic cash registers in its department stores. How do cash registers improve internal control over cash receipts?
15. At Kellum Wholesale Company, two mail clerks open all mail receipts. How does this strengthen internal control?
16. “To have maximum effective internal control over cash disbursements, all payments should be made by check.” Is this true? Explain.
17. Ken Deangelo Company’s internal controls over cash disbursements provide for the treasurer to sign checks imprinted by a check-writing machine in indelible ink after comparing the check with the approved invoice. Identify the internal control principles that are present in these controls.
18. Explain how these principles apply to cash disbursements: (a) physical controls and (b) human resource controls.
19. (a) What is a voucher system? (b) What principles of internal control apply to a voucher system?
20. What is the essential feature of an electronic funds transfer (EFT) procedure?
21. (a) Identify the three activities that pertain to a petty cash fund and indicate an internal control principle that is applicable to each activity. (b) When are journal entries required in the operation of a petty cash fund?
22. “The use of a bank contributes significantly to good internal control over cash.” Is this true? Why or why not?
23. Anna Korte is confused about the lack of agreement between the cash balance per books and the balance per bank. Explain the causes for the lack of agreement to Anna, and give an example of each cause.
24. Heather Kemp asks your help concerning an NSF check. Explain to Heather (a) what an NSF check is, (b) how it is treated in a bank reconciliation, and (c) whether it will require an adjusting entry.
25. (a) “Cash equivalents are the same as cash.” Do you agree? Explain. (b) How should restricted cash funds be reported on the balance sheet?
26. Riverside Fertilizer Co. owns the following assets at the balance sheet date.

Cash in bank savings account	\$ 8,000
Cash on hand	850
Cash refund due from the IRS	1,000
Checking account balance	14,000
Postdated checks	500

What amount should Riverside report as cash in the balance sheet?

27. At what amount does **Apple** report cash and cash equivalents in its 2015 consolidated balance sheet?

Brief Exercises

BE8.1 (LO 1) Match each situation with the fraud triangle factor—opportunity, financial pressure, or rationalization—that best describes it.

- a. An employee's monthly credit card payments are nearly 75% of his or her monthly earnings.
- b. An employee earns minimum wage at a firm that has reported record earnings for each of the last five years.
- c. An employee has an expensive gambling habit.
- d. An employee has check-writing and signing responsibilities for a small company, as well as reconciling the bank account.

Identify fraud triangle concepts.

BE8.2 (LO 1) Shelly Eckert has prepared the following list of statements about internal control.

- a. One of the objectives of internal control is to safeguard assets from employee theft, robbery, and unauthorized use.
- b. One of the objectives of internal control is to enhance the accuracy and reliability of the accounting records.
- c. No laws require U.S. corporations to maintain an adequate system of internal control.

Identify each statement as true or false. If false, indicate how to correct the statement.

Indicate internal control concepts.

BE8.3 (LO 1) Jessica Mahan is the new owner of Penny Parking. She has heard about internal control but is not clear about its importance for her business. Explain to Jessica the four purposes of internal control and give her one application of each purpose for Penny Parking.

Explain the importance of internal control.

BE8.4 (LO 1) The internal control procedures in Valentine Company result in the following provisions. Identify the principles of internal control that are being followed in each case.

- a. Employees who have physical custody of assets do not have access to the accounting records.
- b. Each month, the assets on hand are compared to the accounting records by an internal auditor.
- c. A prenumbered shipping document is prepared for each shipment of goods to customers.

Identify internal control principles.

BE8.5 (LO 2) Rosenquist Company has the following internal control procedures over cash receipts. Identify the internal control principle that is applicable to each procedure.

Identify the internal control principles applicable to cash receipts.

- a. All over-the-counter receipts are entered in cash registers.
- b. All cashiers are bonded.
- c. Daily cash counts are made by cashier department supervisors.
- d. The duties of receiving cash, recording cash, and custody of cash are assigned to different individuals.
- e. Only cashiers may operate cash registers.

BE8.6 (LO 2) The cash register tape for Bluestem Industries reported sales of \$6,871.50. Record the journal entry that would be necessary for each of the following situations. (a) Cash to be accounted for exceeds cash on hand by \$50.75. (b) Cash on hand exceeds cash to be accounted for by \$28.32.

Make journal entries for cash overage and shortfall.

BE8.7 (LO 2) While examining cash receipts information, the accounting department determined the following information: opening cash balance \$160, cash on hand \$1,125.74, and cash sales per register tape \$980.83. Prepare the required journal entry based upon the cash count sheet.

Make journal entry using cash count sheet.

BE8.8 (LO 2) Pennington Company has the following internal control procedures over cash disbursements. Identify the internal control principle that is applicable to each procedure.

Identify the internal control principles applicable to cash disbursements.

- a. Company checks are prenumbered.
- b. The bank statement is reconciled monthly by an internal auditor.

- c. Blank checks are stored in a safe in the treasurer's office.
- d. Only the treasurer or assistant treasurer may sign checks.
- e. Check-signers are not allowed to record cash disbursement transactions.

Prepare entry to replenish a petty cash fund.

BE8.9 (LO 2) On March 20, Dody's petty cash fund of \$100 is replenished when the fund contains \$9 in cash and receipts for postage \$52, freight-out \$26, and travel expense \$10. Prepare the journal entry to record the replenishment of the petty cash fund.

Identify the control features of a bank account.

BE8.10 (LO 3) Lance Bachman is uncertain about the control features of a bank account. Explain the control benefits of (a) a check and (b) a bank statement.

Indicate location of reconciling items in a bank reconciliation.

BE8.11 (LO 3) The following reconciling items are applicable to the bank reconciliation for Ellington Company. Indicate how each item should be shown on a bank reconciliation: (a) outstanding checks, (b) bank debit memorandum for service charge, (c) bank credit memorandum for collecting a note for the depositor, and (d) deposits in transit.

Identify reconciling items that require adjusting entries.

BE8.12 (LO 3) Using the data in BE8.11, indicate (a) the items that will result in an adjustment to the depositor's records and (b) why the other items do not require adjustment.

Prepare partial bank reconciliation.

BE8.13 (LO 3) At July 31, Ramirez Company has the following bank information: cash balance per bank \$7,420, outstanding checks \$762, deposits in transit \$1,620, and a bank service charge \$20. Determine the adjusted cash balance per bank at July 31.

Prepare partial bank reconciliation.

BE8.14 (LO 3) At August 31, Pratt Company has a cash balance per books of \$9,500 and the following additional data from the bank statement: charge for printing Pratt Company checks \$35, interest earned on checking account balance \$40, and outstanding checks \$800. Determine the adjusted cash balance per books at August 31.

Compute outstanding checks.

BE8.15 (LO 3) In the month of November, Fiesta Company Inc. wrote checks in the amount of \$9,750. In December, checks in the amount of \$11,762 were written. In November, \$8,800 of these checks were presented to the bank for payment, and \$10,889 in December. What is the amount of outstanding checks at the end of November? At the end of December?

Explain the statement presentation of cash balances.

BE8.16 (LO 4) Financial Statement Zhang Company has the following cash balances: Cash in Bank \$15,742, Payroll Bank Account \$6,000, and Plant Expansion Fund Cash \$25,000 to be used two years from now. Explain how each balance should be reported on the balance sheet.

DO IT! Exercises

Identify violations of control activities.

DO IT! 8.1 (LO 1) Identify which control activity is violated in each of the following situations, and explain how the situation creates an opportunity for fraud or inappropriate accounting practices.

1. Once a month, the sales department sends sales invoices to the accounting department to be recorded.
2. Leah Hutcherson orders merchandise for Rice Lake Company; she also receives merchandise and authorizes payment for merchandise.
3. Several clerks at Great Foods use the same cash register drawer.

Design system of internal control over cash receipts.

DO IT! 8.2a (LO 2) Gary Stanton is concerned with control over mail receipts at Gary's Sporting Goods. All mail receipts are opened by Al Krane. Al sends the checks to the accounting department, where they are stamped "For Deposit Only." The accounting department records and deposits the mail receipts weekly. Gary asks for your help in installing a good system of internal control over mail receipts.

Make journal entries for petty cash fund.

DO IT! 8.2b (LO 2) Wilkinson Company established a \$100 petty cash fund on August 1. On August 31, the fund had \$7 cash remaining and petty cash receipts for postage \$31, office supplies \$42, and miscellaneous expense \$16. Prepare journal entries to establish the fund on August 1 and replenish the fund on August 31.

Explain treatment of items in bank reconciliation.

DO IT! 8.3 (LO 3) Roger Richman owns Richman Blankets. He asks you to explain how he should treat the following reconciling items when reconciling the company's bank account.

1. Outstanding checks.
2. A deposit in transit.

3. The bank charged to the company account a check written by another company.
4. A debit memorandum for a bank service charge.

DO IT! 8.4 (LO 4) Indicate whether each of the following statements is true or false.

1. A company has the following assets at the end of the year: cash on hand \$40,000, cash refund due from customer \$30,000, and checking account balance \$22,000. Cash and cash equivalents is therefore \$62,000.
2. A company that has received NSF checks should report these checks as a current liability on the balance sheet.
3. Restricted cash that is a current asset is reported as part of cash and cash equivalents.
4. A company has cash in the bank of \$50,000, petty cash of \$400, and stock investments of \$100,000. Total cash and cash equivalents is therefore \$50,400.

Analyze statements about the reporting of cash.

Exercises

E8.1 (LO 1) Eve Herschel is the owner of Herschel's Pizza. Herschel's is operated strictly on a carryout basis. Customers pick up their orders at a counter where a clerk exchanges the pizza for cash. While at the counter, the customer can see other employees making the pizzas and the large ovens in which the pizzas are baked.

Identify the principles of internal control.

Instructions

Identify the six principles of internal control and give an example of each principle that you might observe when picking up your pizza. (*Note:* It may not be possible to observe all the principles.)

E8.2 (LO 1, 2) The following control procedures are used at Torres Company for over-the-counter cash receipts.

Identify internal control weaknesses over cash receipts and suggest improvements.

1. To minimize the risk of robbery, cash in excess of \$100 is stored in an unlocked briefcase in the stock room until it is deposited in the bank.
2. All over-the-counter receipts are processed by three clerks who use a cash register with a single cash drawer.
3. The company accountant makes the bank deposit and then records the day's receipts.
4. At the end of each day, the total receipts are counted by the cashier on duty and reconciled to the cash register total.
5. Cashiers are experienced; they are not bonded.

Instructions

- a. For each procedure, explain the weakness in internal control, and identify the control principle that is violated.
- b. For each weakness, suggest a change in procedure that will result in good internal control.

E8.3 (LO 1, 2) The following control procedures are used in Mendy Lang's Boutique Shoppe for cash disbursements.

Identify internal control weaknesses over cash disbursements and suggest improvements.

1. The company accountant prepares the bank reconciliation and reports any discrepancies to the owner.
2. The store manager personally approves all payments before signing and issuing checks.
3. Each week, 100 company checks are left in an unmarked envelope on a shelf behind the cash register.
4. After payment, bills are filed in a paid invoice folder.
5. The company checks are unnumbered.

Instructions

- a. For each procedure, explain the weakness in internal control, and identify the internal control principle that is violated.
- b. For each weakness, suggest a change in the procedure that will result in good internal control.

Identify internal control weaknesses for cash disbursements and suggest improvements.

E8.4 (LO 2) Writing At Danner Company, checks are not prenumbered because both the purchasing agent and the treasurer are authorized to issue checks. Each signer has access to unissued checks kept in an unlocked file cabinet. The purchasing agent pays all bills pertaining to goods purchased for resale. Prior to payment, the purchasing agent determines that the goods have been received and verifies the mathematical accuracy of the vendor's invoice. After payment, the invoice is filed by the vendor name, and the purchasing agent records the payment. The treasurer pays all other bills following approval by authorized employees. After payment, the treasurer stamps all bills PAID, files them by payment date, and records the checks in the cash disbursements journal. Danner Company maintains one checking account that is reconciled by the treasurer.

Instructions

- a. List the weaknesses in internal control over cash disbursements.
- b. Write a memo to the company treasurer indicating your recommendations for improvement.

Indicate whether procedure is good or weak internal control.

E8.5 (LO 1, 2) Listed below are five procedures followed by Eikenberry Company.

1. Several individuals operate the cash register using the same register drawer.
2. A monthly bank reconciliation is prepared by someone who has no other cash responsibilities.
3. Joe Cockrell writes checks and also records cash payment entries.
4. One individual orders inventory, while a different individual authorizes payments.
5. Unnumbered sales invoices from credit sales are forwarded to the accounting department every four weeks for recording.

Instructions

Indicate whether each procedure is an example of good internal control or of weak internal control. If it is an example of good internal control, indicate which internal control principle is being followed. If it is an example of weak internal control, indicate which internal control principle is violated. Use the table below.

<u>Procedure</u>	<u>IC Good or Weak?</u>	<u>Related Internal Control Principle</u>
1.		
2.		
3.		
4.		
5.		

Indicate whether procedure is good or weak internal control.

E8.6 (LO 1, 2) Listed below are five procedures followed by Gilmore Company.

1. Employees are required to take vacations.
2. Any member of the sales department can approve credit sales.
3. Paul Jaggard ships goods to customers, bills customers, and receives payment from customers.
4. Total cash receipts are compared to bank deposits daily by someone who has no other cash responsibilities.
5. Time clocks are used for recording time worked by employees.

Instructions

Indicate whether each procedure is an example of good internal control or of weak internal control. If it is an example of good internal control, indicate which internal control principle is being followed. If it is an example of weak internal control, indicate which internal control principle is violated. Use the table below.

<u>Procedure</u>	<u>IC Good or Weak?</u>	<u>Related Internal Control Principle</u>

2.		
3.		
4.		
5.		

Prepare journal entries for a petty cash fund.

E8.7 (LO 2) Setterstrom Company established a petty cash fund on May 1, cashing a check for \$100. The company reimbursed the fund on June 1 and July 1 with the following results.

June 1: Cash in fund \$1.75. Receipts: delivery expense \$31.25, postage expense \$39.00, and miscellaneous expense \$25.00.

July 1: Cash in fund \$3.25. Receipts: delivery expense \$21.00, entertainment expense \$51.00, and miscellaneous expense \$24.75.

On July 10, Setterstrom increased the fund from \$100 to \$130.

Instructions

Prepare journal entries for Setterstrom Company for May 1, June 1, July 1, and July 10.

E8.8 (LO 2) Horvath Company uses an imprest petty cash system. The fund was established on March 1 with a balance of \$100. During March, the following petty cash receipts were found in the petty cash box.

Prepare journal entries for a petty cash fund.

Receipt			
Date	No.	For	Amount
3/5	1	Stamp Inventory	\$39
7	2	Freight-Out	21
9	3	Miscellaneous Expense	6
11	4	Travel Expense	24
14	5	Miscellaneous Expense	5

The fund was replenished on March 15 when the fund contained \$2 in cash. On March 20, the amount in the fund was increased to \$175.

Instructions

Journalize the entries in March that pertain to the operation of the petty cash fund.

E8.9 (LO 3) Don Wyatt is unable to reconcile the bank balance at January 31. Don's reconciliation is as follows.

Prepare bank reconciliation and adjusting entries.

Cash balance per bank	\$3,560.20
Add: NSF check	490.00
Less: Bank service charge	25.00
Adjusted balance per bank	<u><u>\$4,025.20</u></u>
Cash balance per books	\$3,875.20
Less: Deposits in transit	530.00
Add: Outstanding checks	730.00
Adjusted balance per books	<u><u>\$4,075.20</u></u>

Instructions

- a. Prepare a correct bank reconciliation.
- b. Journalize the entries required by the reconciliation.

E8.10 (LO 3) On April 30, the bank reconciliation of Westbrook Company shows three outstanding checks: no. 254, \$650; no. 255, \$620; and no. 257, \$410. The May bank statement and the May cash payments journal show the following.

Determine outstanding checks.

Bank Statement			Cash Payments Journal		
Checks Paid			Checks Issued		
Date	Check No.	Amount	Date	Check No.	Amount
5/4	254	\$650	5/2	258	\$159
5/2	257	410	5/5	259	275
5/17	258	159	5/10	260	890
5/12	259	275	5/15	261	500
5/20	261	500	5/22	262	750
5/29	263	480	5/24	263	480
5/30	262	750	5/29	264	560

Instructions

Using Step 2 in the reconciliation procedure, list the outstanding checks at May 31.

E8.11 (LO 3) The following information pertains to Crane Video Company.

Prepare bank reconciliation and adjusting entries.

1. Cash balance per bank, July 31, \$7,263.
2. July bank service charge not recorded by the depositor \$28.
3. Cash balance per books, July 31, \$7,284.

4. Deposits in transit, July 31, \$1,300.
5. Bank collected \$700 note for Crane in July, plus interest \$36, less fee \$20. The collection has not been recorded by Crane, and no interest has been accrued.
6. Outstanding checks, July 31, \$591.

Instructions

- a. Prepare a bank reconciliation at July 31.
- b. Journalize the adjusting entries at July 31 on the books of Crane Video Company.

Prepare bank reconciliation and adjusting entries.

E8.12 (LO 3) The information below relates to the Cash account in the ledger of Minton Company.

Balance September 1—\$17,150; Cash deposited—\$64,000.
Balance September 30—\$17,404; Checks written—\$63,746.

The September bank statement shows a balance of \$16,422 on September 30 and the following memoranda.

Credits	Debits
Collection of \$2,500 note plus interest \$30	\$2,530
Interest earned on checking account	\$45

At September 30, deposits in transit were \$5,450, and outstanding checks totaled \$2,383.

Instructions

- a. Prepare the bank reconciliation at September 30.
- b. Prepare the adjusting entries at September 30, assuming (1) the NSF check was from a customer on account, and (2) no interest had been accrued on the note.

Compute deposits in transit and outstanding checks for two bank reconciliations.

E8.13 (LO 3) The cash records of Dawes Company show the following four situations.

For July:

1. The June 30 bank reconciliation indicated that deposits in transit total \$920. During July, the general ledger account Cash shows deposits of \$15,750, but the bank statement indicates that only \$15,600 in deposits were received during the month.
2. The June 30 bank reconciliation also reported outstanding checks of \$680. During the month of July, Dawes Company's books show that \$17,200 of checks were issued. The bank statement showed that \$16,400 of checks cleared the bank in July.

For September:

3. In September, deposits per the bank statement totaled \$26,700, deposits per books were \$26,400, and deposits in transit at September 30 were \$2,100.
4. In September, cash disbursements per books were \$23,700, checks clearing the bank were \$25,000, and outstanding checks at September 30 were \$2,100.

There were no bank debit or credit memoranda. No errors were made by either the bank or Dawes Company.

Instructions

Answer the following questions.

- a. In situation (1), what were the deposits in transit at July 31?
- b. In situation (2), what were the outstanding checks at July 31?
- c. In situation (3), what were the deposits in transit at August 31?
- d. In situation (4), what were the outstanding checks at August 31?

Show presentation of cash in financial statements.

E8.14 (LO 4) Financial Statement Wynn Company has recorded the following items in its financial records.

Cash in bank	\$ 42,000
Cash in plant expansion fund	100,000
Cash on hand	12,000
Highly liquid investments	34,000
Petty cash	500
Receivables from customers	89,000
Stock investments	61,000

The highly liquid investments had maturities of 3 months or less when they were purchased. The stock investments will be sold in the next 6 to 12 months. The plant expansion project will begin in 3 years.

Instructions

- a. What amount should Wynn report as “Cash and cash equivalents” on its balance sheet?
- b. Where should the items not included in part (a) be reported on the balance sheet?

E8.15 (LO 4) A new accountant at Wyne Inc. is trying to identify which of the amounts shown below should be reported as the current asset “Cash and cash equivalents” in the year-end balance sheet, as of April 30, 2020.

Identify reporting of cash.

1. \$60 of currency and coin in a locked box used for incidental cash transactions.
2. A \$10,000 U.S. Treasury bill, due May 31, 2020.
3. \$260 of April-dated checks that Wyne has received from customers but not yet deposited.
4. An \$85 check received from a customer in payment of its April account, but postdated to May 1.
5. \$2,500 in the company’s checking account.
6. \$4,800 in its savings account.
7. \$75 of prepaid postage in its postage meter.
8. A \$25 IOU from the company receptionist.

Instructions

- a. What balance should Wyne report as its “Cash and cash equivalents” balance at April 30, 2020?
- b. In what account(s) and in what financial statement(s) should the items not included in “Cash and cash equivalents” be reported?

Problems: Set A

P8.1A (LO 1, 2) Bolz Office Supply Company recently changed its system of internal control over cash disbursements. The system includes the following features.

Identify internal control principles over cash disbursements.

Instead of being unnumbered and manually prepared, all checks must now be prenumbered and prepared by using the new accounts payable software purchased by the company. Before a check can be issued, each invoice must have the approval of Kathy Moon, the purchasing agent, and Robin Self, the receiving department supervisor. Checks must be signed by either Jennifer Edwards, the treasurer, or Rich Woodruff, the assistant treasurer. Before signing a check, the signer is expected to compare the amount of the check with the amount on the invoice.

After signing a check, the signer stamps the invoice PAID and inserts within the stamp, the date, check number, and amount of the check. The “paid” invoice is then sent to the accounting department for recording.

Blank checks are stored in a safe in the treasurer’s office. The combination to the safe is known only by the treasurer and assistant treasurer. Each month, the bank statement is reconciled with the bank balance per books by the assistant chief accountant. All employees who handle or account for cash are bonded.

Instructions

Identify the internal control principles and their application to cash disbursements of Bolz Office Supply Company.

P8.2A (LO 1, 2) Rondelli Middle School wants to raise money for a new sound system for its auditorium. The primary fund-raising event is a dance at which the famous disc jockey D.J. Sound will play classic and not-so-classic dance tunes. Matt Ballester, the music and theater instructor, has been given the responsibility for coordinating the fund-raising efforts. This is Matt’s first experience with fund-raising. He decides to put the eighth-grade choir in charge of the event; he will be a relatively passive observer.

Identify internal control weaknesses in cash receipts and cash disbursements.

Matt had 500 unnumbered tickets printed for the dance. He left the tickets in a box on his desk and told the choir students to take as many tickets as they thought they could sell for \$5 each. In order to

ensure that no extra tickets would be floating around, he told them to dispose of any unsold tickets. When the students received payment for the tickets, they were to bring the cash back to Matt and he would put it in a locked box in his desk drawer.

Some of the students were responsible for decorating the gymnasium for the dance. Matt gave each of them a key to the money box and told them that if they took money out to purchase materials, they should put a note in the box saying how much they took and what it was used for. After 2 weeks the money box appeared to be getting full, so Matt asked Jeff Kenney to count the money, prepare a deposit slip, and deposit the money in a bank account Matt had opened.

The day of the dance, Matt wrote a check from the account to pay the DJ. D.J. Sound, however, said that he accepted only cash and did not give receipts. So Matt took \$200 out of the cash box and gave it to D.J. At the dance, Matt had Sam Copper working at the entrance to the gymnasium, collecting tickets from students, and selling tickets to those who had not prepurchased them. Matt estimated that 400 students attended the dance.

The following day, Matt closed out the bank account, which had \$250 in it, and gave that amount plus the \$180 in the cash box to Principal Finke. Principal Finke seemed surprised that, after generating roughly \$2,000 in sales, the dance netted only \$430 in cash. Matt did not know how to respond.

Instructions

Identify as many internal control weaknesses as you can in this scenario, and suggest how each could be addressed.

Journalize and post petty cash fund transactions.

P8.3A (LO 2) Kael Company maintains a petty cash fund for small expenditures. These transactions occurred during the month of August.

- | | |
|--------|--|
| Aug. 1 | Established the petty cash fund by writing a check payable to the petty cash custodian for \$200. |
| 15 | Replenished the petty cash fund by writing a check for \$175. On this date, the fund consisted of \$25 in cash and these petty cash receipts: freight-out \$74.40, entertainment expense \$36, postage expense \$33.70, and miscellaneous expense \$27.50. |
| 16 | Increased the amount of the petty cash fund to \$400 by writing a check for \$200. |
| 31 | Replenished the petty cash fund by writing a check for \$283. On this date, the fund consisted of \$117 in cash and these petty cash receipts: postage expense \$145, entertainment expense \$90.60, and freight-out \$46.40. |

Instructions

- Journalize the petty cash transactions.
- Post to the Petty Cash account.
- What internal control features exist in a petty cash fund?

Prepare a bank reconciliation and adjusting entries.

P8.4A (LO 3) On July 31, 2020, Keeds Company had a cash balance per books of \$6,140. The statement from Dakota State Bank on that date showed a balance of \$7,690.80. A comparison of the bank statement with the Cash account revealed the following facts.

- The bank service charge for July was \$25.
- The bank collected \$1,520 for Keeds Company through electronic funds transfer.
- The July 31 receipts of \$1,193.30 were not included in the bank deposits for July. These receipts were deposited by the company in a night deposit vault on July 31.
- Company check No. 2480 issued to L. Taylor, a creditor, for \$384 that cleared the bank in July was incorrectly entered as a cash payment on July 10 for \$348.
- Checks outstanding on July 31 totaled \$1,860.10.
- On July 31, the bank statement showed an NSF charge of \$575 for a check received by the company from W. Krueger, a customer, on account.

Instructions

- Adjusted cash bal. \$7,024.00
- Prepare the bank reconciliation as of July 31.
- Prepare the necessary adjusting entries at July 31.

P8.5A (LO 3) The bank portion of the bank reconciliation for Langer Company at November 30, 2020, was as follows.

Prepare a bank reconciliation and adjusting entries from detailed data.

Langer Company		
Bank Reconciliation		
November 30, 2020		
Cash balance per bank		\$14,367.90
Add: Deposits in transit		<u>2,530.20</u>
		<u>16,898.10</u>
Less: Outstanding checks		
Check Number	Check Amount	
3451	\$2,260.40	
3470	720.10	
3471	844.50	
3472	1,426.80	
3474	<u>1,050.00</u>	<u>6,301.80</u>
Adjusted cash balance per bank		<u><u>\$10,596.30</u></u>

The adjusted cash balance per bank agreed with the cash balance per books at November 30.

The December bank statement showed the following checks and deposits.

Bank Statement				
Checks			Deposits	
Date	Number	Amount	Date	Amount
12-1	3451	\$ 2,260.40	12-1	\$ 2,530.20
12-2	3471	844.50	12-4	1,211.60
12-7	3472	1,426.80	12-8	2,365.10
12-4	3475	1,640.70	12-16	2,672.70
12-8	3476	1,300.00	12-21	2,945.00
12-10	3477	2,130.00	12-26	2,567.30
12-15	3479	3,080.00	12-29	2,836.00
12-27	3480	600.00	12-30	<u>1,025.00</u>
12-30	3482	475.50	Total	<u>\$18,152.90</u>
12-29	3483	1,140.00		
12-31	3485	540.80		
	Total	<u><u>\$15,438.70</u></u>		

The cash records per books for December showed the following.

Cash Payments Journal					
Date	Number	Amount	Date	Number	Amount
12-1	3475	\$1,640.70	12-20	3482	\$ 475.50
12-2	3476	1,300.00	12-22	3483	1,140.00
12-2	3477	2,130.00	12-23	3484	798.00

Cash Receipts Journal	
Date	Amount
12-3	\$ 1,211.60
12-7	2,365.10
12-15	2,672.70
12-20	2,954.00
12-25	2,567.30
12-28	2,836.00
12-30	1,025.00
12-31	1,690.40
Total	<u><u>\$17,322.10</u></u>

The bank statement contained two memoranda:

1. A credit of \$2,242 for the collection of Langer Company of an electronic funds transfer.
2. A debit for the printing of additional company checks \$85.

At December 31, the cash balance per books was \$13,985.20, and the cash balance per the bank statement was \$19,239.10. The bank did not make any errors, but **Langer Company made two errors**.

Instructions

- a. Adjusted balance per books
\$16,043.20

Prepare a bank reconciliation and adjusting entries.

- Using the steps in the reconciliation procedure described in the chapter, prepare a bank reconciliation at December 31, 2020.
- Prepare the adjusting entries based on the reconciliation. (*Hint:* The correction of any errors pertaining to recording checks should be made to Accounts Payable. The correction of any errors relating to recording cash receipts should be made to Accounts Receivable.)

P8.6A (LO 3) Timmins Company of Emporia, Kansas, spreads herbicides and applies liquid fertilizer for local farmers. On May 31, 2020, the company's Cash account per its general ledger showed a balance of \$6,738.90.

The bank statement from Emporia State Bank on that date showed the following balance.

Emporia State Bank		
Checks and Debits	Deposits and Credits	Daily Balance
XXX	XXX	5-31 6,968.00

A comparison of the details on the bank statement with the details in the Cash account revealed the following facts.

- The statement included a debit memo of \$40 for the printing of additional company checks.
- Cash sales of \$883.15 on May 12 were deposited in the bank. The cash receipts entry and the deposit slip were incorrectly made for \$933.15. The bank credited Timmins Company for the correct amount.
- Outstanding checks at May 31 totaled \$276.25, and deposits in transit were \$1,880.15.
- On May 18, the company issued check No. 1181 for \$685 to H. Moses, on account. The check, which cleared the bank in May, was incorrectly journalized and posted by Timmins Company for \$658.
- \$2,690 was collected by the bank for Timmins Company on May 31 through electronic funds transfer.
- Included with the canceled checks was a check issued by Tomins Company to C. Pernod for \$360 that was incorrectly charged to Timmins Company by the bank.
- On May 31, the bank statement showed an NSF charge of \$380 for a check issued by Sara Ballard, a customer, to Timmins Company on account.

Instructions

- a. Adjusted cash bal. \$8,931.90

Prepare a comprehensive bank reconciliation with theft and internal control deficiencies.

- a. Prepare the bank reconciliation at May 31, 2020.

- b. Prepare the necessary adjusting entries for Timmins Company at May 31, 2020.

P8.7A (LO 1, 2, 3) Daisey Company is a very profitable small business. It has not, however, given much consideration to internal control. For example, in an attempt to keep clerical and office expenses to a minimum, the company has combined the jobs of cashier and bookkeeper. As a result, Bret Turrin handles all cash receipts, keeps the accounting records, and prepares the monthly bank reconciliations.

The balance per the bank statement on October 31, 2020, was \$18,380. Outstanding checks were No. 62 for \$140.75, No. 183 for \$180, No. 284 for \$253.25, No. 862 for \$190.71, No. 863 for \$226.80, and No. 864 for \$165.28. Included with the statement was a credit memorandum of \$185 indicating the collection of a note receivable for Daisey Company by the bank on October 25. This memorandum has not been recorded by Daisey.

The company's ledger showed one Cash account with a balance of \$21,877.72. The balance included undeposited cash on hand. Because of the lack of internal controls, Bret took for personal use all of the undeposited receipts in excess of \$3,795.51. He then prepared the following bank reconciliation in an effort to conceal his theft of cash.

Cash balance per books, October 31		\$21,877.72
Add: Outstanding checks		
No. 862	\$190.71	
No. 863	226.80	
No. 864	165.28	482.79
		22,360.51
Less: Undeposited receipts		3,795.51
Unadjusted balance per bank, October 31		18,565.00
Less: Bank credit memorandum		185.00
Cash balance per bank statement, October 31		\$18,380.00

Instructions

- a. Prepare a correct bank reconciliation. (*Hint:* Deduct the amount of the theft from the adjusted balance per books.)
 - b. Indicate the three ways that Bret attempted to conceal the theft and the dollar amount involved in each method.
 - c. What principles of internal control were violated in this case?
- a. Adjusted cash bal. \$21,018.72

Continuing Case

Cookie Creations

(*Note:* This is a continuation of the Cookie Creations case from Chapters 1 through 6.)

CC8 Part 1 Natalie is struggling to keep up with the recording of her accounting transactions. She is spending a lot of time marketing and selling mixers and giving her cookie classes. Her friend John is an accounting student who runs his own accounting service. He has asked Natalie if she would like to have him do her accounting. John and Natalie meet and discuss her business.

Part 2 Natalie decides that she cannot afford to hire John to do her accounting. One way that she can ensure that her cash account does not have any errors and is accurate and up-to-date is to prepare a bank reconciliation at the end of each month. Natalie would like you to help her.

Go to **WileyPLUS** for complete case details and instructions.

Shutterstock

Ethics Case

EC8 You are the assistant controller in charge of general ledger accounting at Linbarger Bottling Company. Your company has a large loan from an insurance company. The loan agreement requires that the company's cash account balance be maintained at \$200,000 or more, as reported monthly.

At June 30, the cash balance is \$80,000, which you report to Lisa Infante, the financial vice president. Lisa excitedly instructs you to keep the cash receipts book open for one additional day for purposes of the June 30 report to the insurance company. Lisa says, "If we don't get that cash balance over \$200,000, we'll default on our loan agreement. They could close us down, put us all out of our jobs!" Lisa continues, "I talked to Oconto Distributors (one of Linbarger's largest customers) this morning. They said they sent us a check for \$150,000 yesterday. We should receive it tomorrow. If we include just that one check in our cash balance, we'll be in the clear. It's in the mail!"

Instructions

- a. Who will suffer negative effects if you do not comply with Lisa Infante's instructions? Who will suffer if you do comply?
- b. What are the ethical considerations in this case?
- c. What alternatives do you have?

Comprehensive Accounting Cycle Review

ACR8 On December 1, 2020, Fullerton Company had the following account balances.

	<u>Debit</u>		<u>Credit</u>
Cash	\$18,200	Accumulated Depreciation—	
Notes Receivable	2,200	Equipment	\$ 3,000
Accounts Receivable	7,500	Accounts Payable	6,100
Inventory	16,000	Owner's Capital	64,400
Prepaid Insurance	1,600		
Equipment	28,000		<u>\$73,500</u>
	<u>\$73,500</u>		

During December, the company completed the following transactions.

- Dec. 7 Received \$3,600 cash from customers in payment of account (no discount allowed).
 12 Purchased merchandise on account from Vance Co. \$12,000, terms 1/10, n/30.
 17 Sold merchandise on account \$16,000, terms 2/10, n/30. The cost of the merchandise sold was \$10,000.
 19 Paid salaries \$2,200.
 22 Paid Vance Co. in full, less discount.
 26 Received collections in full, less discounts, from customers billed on December 17.
 31 Received \$2,700 cash from customers in payment of account (no discount allowed).

Adjustment data:

1. Depreciation \$200 per month.
2. Insurance expired \$400.

Instructions

- a. Journalize the December transactions. (Assume a perpetual inventory system.)
- b. Enter the December 1 balances in the ledger T-accounts and post the December transactions. Use Cost of Goods Sold, Depreciation Expense, Insurance Expense, Salaries and Wages Expense, Sales Revenue, and Sales Discounts.
- c. The statement from Jackson County Bank on December 31 showed a balance of \$26,130. A comparison of the bank statement with the Cash account revealed the following facts.
 1. The bank collected a note receivable of \$2,200 for Fullerton Company on December 15.
 2. The December 31 receipts were deposited in a night deposit vault on December 31. These deposits were recorded by the bank in January.
 3. Checks outstanding on December 31 totaled \$1,210.
 4. On December 31, the bank statement showed an NSF charge of \$680 for a check received by the company from L. Bryan, a customer, on account.
- d. Prepare a bank reconciliation as of December 31 based on the available information. (*Hint:* The cash balance per books is \$26,100. This can be proven by finding the balance in the Cash account from parts (a) and (b).)
- e. Journalize the adjusting entries resulting from the bank reconciliation and adjustment data.
- f. Post the adjusting entries to the ledger T-accounts.
- g. Prepare an adjusted trial balance.
- h. Prepare an income statement for December and a classified balance sheet at December 31.

Expand Your Critical Thinking

Financial Reporting Problem: Apple Inc.

CT8.1 The financial statements of **Apple Inc.** are presented in Appendix A at the end of this textbook. The complete annual report, including the notes to the financial statements, is available at the company's website.

Instructions

- a. What comments, if any, are made about cash in the "Report of the Independent Registered Public Accounting Firm"?
- b. What data about cash and cash equivalents are shown in the consolidated balance sheet?
- c. In its notes to Consolidated Financial Statements, how does Apple define cash equivalents?
- d. In "Management's Annual Report on Internal Control over Financial Reporting," what does Apple's management say about internal control?

Comparative Analysis Problem: PepsiCo, Inc. vs. The Coca-Cola Company

CT8.2 **PepsiCo's** financial statements are presented in Appendix B. Financial statements of **The Coca-Cola Company** are presented in Appendix C. The complete annual reports of PepsiCo and Coca-Cola, including the notes to the financial statements, are available at each company's respective website.

Instructions

- a. Based on the information contained in these financial statements, determine each of the following for each company:
 1. Cash and cash equivalents balance at December 26, 2015, for PepsiCo and at December 31, 2015, for Coca-Cola.
 2. Increase (decrease) in cash and cash equivalents from 2014 to 2015.
 3. Cash provided by operating activities during the year ended December 2015 (from statement of cash flows).
- b. What conclusions concerning the management of cash can be drawn from these data?

Comparative Analysis Problem: Amazon.com, Inc. vs. Wal-Mart Stores, Inc.

CT8.3 **Amazon.com, Inc.**'s financial statements are presented in Appendix D. Financial statements of **Wal-Mart Stores, Inc.** are presented in Appendix E. The complete annual reports of Amazon and Wal-Mart, including the notes to the financial statements, are available at each company's respective website.

Instructions

- a. Based on the information contained in these financial statements, determine each of the following for each company:
 1. Cash and cash equivalents balance at December 31, 2015, for Amazon and at January 31, 2016, for Wal-Mart.
 2. Increase (decrease) in cash and cash equivalents from 2014 to 2015.
 3. Net cash provided by operating activities during the year ended December 31, 2015, for Amazon and January 31, 2016, for Wal-Mart from statement of cash flows.
- b. What conclusions concerning the management of cash can be drawn from these data?

Real-World Focus

CT8.4 All organizations should have systems of internal control to combat fraud.

Instructions

Go to the **Association of Certified Fraud Examiner (ACFE)** website, search “Report to the Nations on Occupational Fraud and Abuse,” click **Costs**, and then answer the following questions.

- a. What is the percent of annual revenues lost to fraud?
- b. What is the median loss for the United States due to occupational fraud?
- c. What happens when organizations lack anti-fraud controls?

Decision-Making Across the Organization

CT8.5 The board of trustees of a local church is concerned about the internal accounting controls for the offering collections made at weekly services. The trustees ask you to serve on a three-person audit team with the internal auditor of a local college and a CPA who has just joined the church.

At a meeting of the audit team and the board of trustees you learn the following.

1. The church's board of trustees has delegated responsibility for the financial management and audit of the financial records to the finance committee. This group prepares the annual budget and approves major disbursements. It is not involved in collections or recordkeeping. No audit has been made in recent years because the same trusted employee has kept church records and served as financial secretary for 15 years. The church does not carry any fidelity insurance.
2. The collection at the weekly service is taken by a team of ushers who volunteer to serve one month. The ushers take the collection plates to a basement office at the rear of the church. They hand their plates to the head usher and return to the church service. After all plates have been turned in, the head usher counts the cash received. The head usher then places the cash in the church safe along with a notation of the amount counted. The head usher volunteers to serve for 3 months.
3. The next morning the financial secretary opens the safe and recounts the collection. The secretary withdraws \$150–\$200 in cash, depending on the cash expenditures expected for the week, and deposits the remainder of the collections in the bank. To facilitate the deposit, church members who contribute by check are asked to make their checks payable to “Cash.”

- 4.** Each month, the financial secretary reconciles the bank statement and submits a copy of the reconciliation to the board of trustees. The reconciliations have rarely contained any bank errors and have never shown any errors per books.

Instructions

With the class divided into groups, answer the following.

- a. Indicate the weaknesses in internal accounting control over the handling of collections.
- b. List the improvements in internal control procedures that you plan to make at the next meeting of the audit team for (1) the ushers, (2) the head usher, (3) the financial secretary, and (4) the finance committee.
- c. What church policies should be changed to improve internal control?

Communication Activity

CT8.6 As a new auditor for the CPA firm of Eaton, Quayle, and Hale, you have been assigned to review the internal controls over mail cash receipts of Pritchard Company. Your review reveals the following. Checks are promptly endorsed “For Deposit Only,” but no list of the checks is prepared by the person opening the mail. The mail is opened either by the cashier or by the employee who maintains the accounts receivable records. Mail receipts are deposited in the bank weekly by the cashier.

Instructions

Write a letter to Danny Peak, owner of Pritchard Company, explaining the weaknesses in internal control and your recommendations for improving the system.

All About You

CT8.7 The print and electronic media are full of stories about potential security risks that may arise from your computer or smartphone. It is important to keep in mind, however, that there are also many other ways that your identity can be stolen. The federal government provides many resources to help protect you from identity thieves.

Instructions

Search the Internet for and then go to the federal government website on identity theft, and then identify five signs of identity theft.

FASB Codification Activity

CT8.8 If your school has a subscription to the FASB Codification, log in and prepare responses to the following.

- a. How is cash defined in the Codification?
- b. How are cash equivalents defined in the Codification?
- c. What are the disclosure requirements related to cash and cash equivalents?

A Look at IFRS

LEARNING OBJECTIVE 5

Compare the accounting for fraud, internal control, and cash under GAAP and IFRS.

Fraud can occur anywhere. Because the three main factors that contribute to fraud are universal in nature, the principles of internal control activities are used globally by companies. While Sarbanes-Oxley

(SOX) does not apply to international companies, most large international companies have internal controls similar to those indicated in the chapter. IFRS and GAAP are also very similar in accounting for cash. *IAS No. 1 (revised)*, “Presentation of Financial Statements,” is the only standard that discusses issues specifically related to cash.

Key Points

Following are the key similarities and differences between GAAP and IFRS related to fraud, internal control, and cash.

Similarities

- The fraud triangle discussed in this chapter is applicable to all international companies. Some of the major frauds on an international basis are **Parmalat** (Italy), **Royal Ahold** (the Netherlands), and **Satyam Computer Services** (India).
- Rising economic crime poses a growing threat to companies, with nearly one-third of all organizations worldwide being victims of fraud in a recent 12-month period.
- Accounting scandals both in the United States and internationally have re-ignited the debate over the relative merits of GAAP, which takes a “rules-based” approach to accounting, versus IFRS, which takes a “principles-based” approach. The FASB announced that it intends to introduce more principles-based standards.
- On a lighter note, at one time the Ig Nobel Prize in Economics went to the CEOs of those companies involved in the corporate accounting scandals of that year for “adapting the mathematical concept of imaginary numbers for use in the business world.” A parody of the Nobel Prizes, the Ig Nobel Prizes (read Ignoble, as not noble) are given each year in early October for 10 achievements that “first make people laugh, and then make them think.” Organized by the scientific humor magazine *Annals of Improbable Research (AIR)*, they are presented by a group that includes genuine Nobel laureates at a ceremony at Harvard University’s Sanders Theater.
- Internal controls are a system of checks and balances designed to prevent and detect fraud and errors. While most companies have these systems in place, many have never completely documented them, nor had an independent auditor attest to their effectiveness. Both of these actions are required under SOX.
- Companies find that internal control review is a costly process but badly needed. One study estimates the cost of SOX compliance for U.S. companies at over \$35 billion, with audit fees doubling in the first year of compliance. At the same time, examination of internal controls indicates lingering problems in the way companies operate. One study of first compliance with the internal-control testing provisions documented material weaknesses for about 13% of companies reporting in a two-year period (*PricewaterhouseCoopers’ Global Economic Crime Survey*, 2005).
- The accounting and internal control procedures related to cash are essentially the same under both IFRS and this textbook. In addition, the definition used for cash equivalents is the same.
- Most companies report cash and cash equivalents together under IFRS, as shown in this textbook. In addition, IFRS follows the same accounting policies related to the reporting of restricted cash.

Differences

- The SOX internal control standards apply only to companies listed on U.S. exchanges. There is continuing debate over whether foreign issuers should have to comply with this extra layer of regulation.

Looking to the Future

Ethics has become a very important aspect of reporting. Different cultures have different perspectives on bribery and other questionable activities, and consequently penalties for engaging in such activities vary considerably across countries.

High-quality international accounting requires both high-quality accounting standards and high-quality auditing. Similar to the convergence of GAAP and IFRS, there is movement to improve international auditing standards. The International Auditing and Assurance Standards Board (IAASB) functions as an independent standard-setting body. It works to establish high-quality auditing and assurance and quality-control standards throughout the world. Whether the IAASB adopts internal control provisions similar to those in SOX remains to be seen. You can follow developments in the international audit arena at the IAASB website.

IFRS Practice

IFRS Self-Test Questions

1. Non-U.S companies that follow IFRS:
 - a. do not normally use the principles of internal control activities described in this textbook.
 - b. often offset cash with accounts payable on the balance sheet.
 - c. are not required to follow SOX.
 - d. None of the above.
2. The Sarbanes-Oxley Act applies to:
 - a. all U.S. companies listed on U.S. exchanges.
 - b. all companies that list stock on any stock exchange in any country.
3. High-quality international accounting requires both high-quality accounting standards and:
 - a. a reconsideration of SOX to make it less onerous.
 - b. high-quality auditing standards.
 - c. government intervention to ensure that the public interest is protected.
 - d. the development of new principles of internal control activities.

IFRS Exercise

IFRS8.1 Some people argue that the internal control requirements of the Sarbanes-Oxley Act (SOX) put U.S. companies at a competitive disadvantage to companies outside the United States. Discuss the competitive implications (both pros and cons) of SOX.

International Financial Reporting Problem: Louis Vuitton

IFRS8.2 The financial statements of **Louis Vuitton** are presented in Appendix F. The complete annual report, including the notes to its financial statements, is available at the company's website.

Instructions

Using the notes to the company's financial statements, what are Louis Vuitton's accounting policies related to cash and cash equivalents?

Answers to IFRS Self-Test Questions

Accounting for Receivables

Chapter Preview

As indicated in the following Feature Story, receivables are a significant asset for many pharmaceutical companies. Because a large portion of sales in the United States are credit sales, receivables are important to companies in other industries as well. As a consequence, companies must pay close attention to their receivables and manage them carefully. In this chapter, you will learn what journal entries companies make when they sell products, when they collect cash from those sales, and when they write off accounts they cannot collect.

Feature Story

A Dose of Careful Management Keeps Receivables Healthy

“Sometimes you have to know when to be very tough, and sometimes you can give them a bit of a break,” said Vivi Su. She wasn’t talking about her children but about the customers of a subsidiary of former pharmaceutical company **Whitehall-Robins**, where she worked as supervisor of credit and collections.

For example, while the company’s regular terms were 1/15, n/30 (1% discount if paid within 15 days), a customer

might have asked for and received a few days of grace and still got the discount. Or a customer might have placed orders above its credit limit, in which case, depending on its payment history and the circumstances, Ms. Su might have authorized shipment of the goods anyway.

“It’s not about drawing a line in the sand, and that’s all,” she explained. “You want a good relationship with your customers—but you also need to bring in the money.”

“The money,” in Whitehall-Robins’ case, amounted to some \$170 million in sales a year. Nearly all of it came in through the credit accounts Ms. Su managed. The process started with the decision to grant a customer an account in the

first place. The sales rep gave the customer a credit application. “My department reviews this application very carefully; a customer needs to supply three good references, and we also run a check with a credit firm like **Equifax**. If we accept them, then based on their size and history, we assign a credit limit,” Ms. Su explained.

Once accounts were established, “I get an aging report every single day,” said Ms. Su. “The rule of thumb is that we should always have at least 85% of receivables current—meaning they were billed less than 30 days ago,” she continued. “But we try to do even better than that—I like to see 90%.”

At 15 days overdue, Whitehall-Robins phoned the client. After 45 days, Ms. Su noted, “I send a letter. Then a second

notice is sent in writing. After the third and final notice, the client has 10 days to pay, and then I hand it over to a collection agency, and it’s out of my hands.”

Ms. Su’s boss, Terry Norton, recorded an estimate for bad debts every year, based on a percentage of receivables. The percentage depended on the current aging history. He also calculated and monitored the company’s accounts receivable turnover, which the company reported in its financial statements.

Ms. Su knew that she and Mr. Norton were crucial to the profitability of Whitehall-Robins. “Receivables are generally the second-largest asset of any company (after its capital assets),” she pointed out. “So it’s no wonder we keep a very close eye on them.”

Recognition of Accounts Receivable

LEARNING OBJECTIVE 1

Explain how companies recognize accounts receivable.

The term **receivables** refers to amounts due from individuals and companies. Receivables are claims that are expected to be collected in cash. The management of receivables is a very important activity for any company that sells goods or services on credit.

Receivables are important because they represent one of a company’s most liquid assets. For many companies, receivables are also one of the largest assets. For example, receivables represent 13.7% of the current assets of pharmaceutical giant **Rite Aid**. **Illustration 9.1** lists receivables as a percentage of total assets for five other well-known companies in a recent year.

Company	Receivables as a Percentage of Total Assets
Ford Motor Company	43.2%
General Electric	41.5
Minnesota Mining and Manufacturing Company (3M)	12.7
DuPont Co.	11.7
Intel Corporation	3.9

ILLUSTRATION 9.1

Receivables as a percentage of assets

Types of Receivables

The relative significance of a company's receivables as a percentage of its assets depends on various factors: its industry, the time of year, whether it extends long-term financing, and its credit policies. To reflect important differences among receivables, they are frequently classified as (1) accounts receivable, (2) notes receivable, and (3) other receivables.

Accounts receivable are amounts customers owe on account. They result from the sale of goods and services. Companies generally expect to collect accounts receivable within 30 to 60 days. They are usually the most significant type of claim held by a company.

Notes receivable are a written promise (as evidenced by a formal instrument) for amounts to be received. The note normally requires the collection of interest and extends for time periods of 60–90 days or longer. Notes and accounts receivable that result from sales transactions are often called **trade receivables**.

Other receivables include nontrade receivables such as interest receivable, loans to company officers, advances to employees, and income taxes refundable (see **Ethics Note**). These do not generally result from the operations of the business. Therefore, they are generally classified and reported as separate items in the balance sheet.

Recognizing Accounts Receivable

Recognizing accounts receivable is relatively straightforward. A service organization records a receivable when it performs service on account. A merchandiser records accounts receivable at the point of sale of merchandise on account. When a merchandiser sells goods, it increases (debits) Accounts Receivable and increases (credits) Sales Revenue.

The seller may offer terms that encourage early payment by providing a discount. Sales returns also reduce receivables. The buyer might find some of the goods unacceptable and choose to return the unwanted goods.

To review, assume that Jordache Co. on July 1, 2020, sells merchandise on account to Polo Company for \$1,000, terms 2/10, n/30. On July 5, Polo returns merchandise with a sales price of \$100 to Jordache Co. On July 11, Jordache receives payment from Polo Company for the balance due. The journal entries to record these transactions on the books of Jordache Co. are as follows (see **Helpful Hint**). (**Cost of goods sold entries are omitted.**)

July 1	Accounts Receivable Sales Revenue (To record sales on account)	1,000	1,000
July 5	Sales Returns and Allowances Accounts Receivable (To record merchandise returned)	100	100
July 11	Cash (\$900 – \$18) Sales Discounts (\$900 × .02) Accounts Receivable (To record collection of accounts receivable)	882 18 900	

ETHICS NOTE

Companies report receivables from employees separately in the financial statements. The reason: Sometimes these receivables are not the result of an "arm's-length" transaction.

HELPFUL HINT

These entries are the same as those described in Chapter 5. For simplicity, we have omitted inventory and cost of goods sold from this set of journal entries and from end-of-chapter material.

Some retailers issue their own credit cards. When you use a retailer's credit card (**JCPenney**, for example), the retailer charges interest on the balance due if not paid within a specified period (usually 25–30 days).

To illustrate, assume that you use your JCPenney Company credit card to purchase clothing with a sales price of \$300 on June 1, 2020. JCPenney will increase (debit) Accounts Receivable for \$300 and increase (credit) Sales Revenue for \$300 (cost of goods sold entry omitted) as follows.

A	=	L	+	OE
+300				
+300 Rev				
Cash Flows				
no effect				

June 1	Accounts Receivable Sales Revenue (To record sale of merchandise)	300	300
--------	---	-----	-----

A	=	L	+	OE
+4.50				
+4.50 Rev				
Cash Flows				
no effect				

Assuming that you owe \$300 at the end of the month and JCPenney charges 1.5% per month on the balance due, the adjusting entry that JCPenney makes to record interest revenue of \$4.50 ($\$300 \times 1.5\%$) on June 30 is as follows.

June 30	Accounts Receivable Interest Revenue (To record interest on amount due)	4.50	4.50
---------	---	------	------

Interest revenue is often substantial for many retailers.

Anatomy of a Fraud

Tasanee was the accounts receivable clerk for a large nonprofit foundation that provided performance and exhibition space for the performing and visual arts. Her responsibilities included activities normally assigned to an accounts receivable clerk, such as recording revenues from various sources (donations, facility rental fees, ticket revenue, and bar receipts). However, she was also responsible for handling all cash and checks from the time they were received until the time she deposited them, as well as preparing the bank reconciliation. Tasanee took advantage of her situation by falsifying bank deposits and bank reconciliations so that she could steal cash from the bar receipts. Since nobody else logged the donations or matched the donation receipts to pledges prior to Tasanee receiving them, she was able to offset the cash that was stolen against donations that she received but didn't record. Her crime was made easier by the fact that her boss, the company's controller, only did a very superficial review of the bank reconciliation and thus didn't

notice that some numbers had been cut out from other documents and taped onto the bank reconciliation.

Total take: \$1.5 million

The Missing Controls

Segregation of duties. The foundation should not have allowed an accounts receivable clerk, whose job was to record receivables, to also handle cash, record cash, make deposits, and especially prepare the bank reconciliation.

Independent internal verification. The controller was supposed to perform a thorough review of the bank reconciliation. Because he did not, he was terminated from his position.

Source: Adapted from Wells, *Fraud Casebook* (2007), pp. 183–194.

DO IT! 1 | Recognizing Accounts Receivable

On May 1, Wilton sold merchandise on account to Bates for \$50,000, terms 3/15, net 45. On May 4, Bates returns merchandise with a sales price of \$2,000. On May 16, Wilton receives payment from Bates for the balance due. Prepare journal entries to record the May transactions on Wilton's books. (You may ignore cost of goods sold entries and explanations.)

Solution

May 1	Accounts Receivable Sales Revenue	50,000	50,000
May 4	Sales Returns and Allowances Accounts Receivable	2,000	2,000
May 16	Cash (\$48,000 – \$1,440) Sales Discounts (\$48,000 × .03) Accounts Receivable	46,560 1,440 48,000	

ACTION PLAN

- Prepare entry to record the receivable and related return.
- Compute the sales discount and related entry.

Valuation and Disposition of Accounts Receivable

LEARNING OBJECTIVE 2

Describe how companies value accounts receivable and record their disposition.

Valuing Accounts Receivable

Once companies record receivables in the accounts, the next question is: How should they report receivables in the financial statements? Companies report accounts receivable on the balance sheet as an asset. But determining the **amount** to report is sometimes difficult because some receivables will become uncollectible.

Each customer must satisfy the credit requirements of the seller before the credit sale is approved. Inevitably, though, some accounts receivable become uncollectible. For example, a customer may not be able to pay because of a decline in its sales revenue due to a downturn in the economy. Similarly, individuals may be laid off from their jobs or faced with unexpected hospital bills. Companies record credit losses as **Bad Debt Expense** (or Uncollectible Accounts Expense) (see **Alternative Terminology**). Such losses are a normal and necessary risk of doing business on a credit basis.

When U.S. home prices fell, home foreclosures rose, and the economy slowed as a result of the financial crises of 2008, lenders experienced huge increases in their bad debt expense. For example, during one quarter **Wachovia** (a large U.S. bank now owned by **Wells Fargo**) increased bad debt expense from \$108 million to \$408 million. Similarly, **American Express** increased its bad debt expense by 70%.

Two methods are used in accounting for uncollectible accounts: (1) the direct write-off method and (2) the allowance method. The following sections explain these methods.

Direct Write-Off Method For Uncollectible Accounts

Under the **direct write-off method**, when a company determines a particular account to be uncollectible, it charges the loss to Bad Debt Expense. Assume, for example, that Warden Co. writes off as uncollectible M. E. Doran's \$200 balance on December 12. Warden's entry is as follows.

Dec. 12	Bad Debt Expense		200	
	Accounts Receivable			200
	(To record write-off of M. E. Doran account)			

ALTERNATIVE TERMINOLOGY

You will sometimes see **Bad Debt Expense** called **Uncollectible Accounts Expense**.

$$\begin{array}{r} A = L + OE \\ -200 \\ \hline \end{array}$$

Cash Flows
no effect

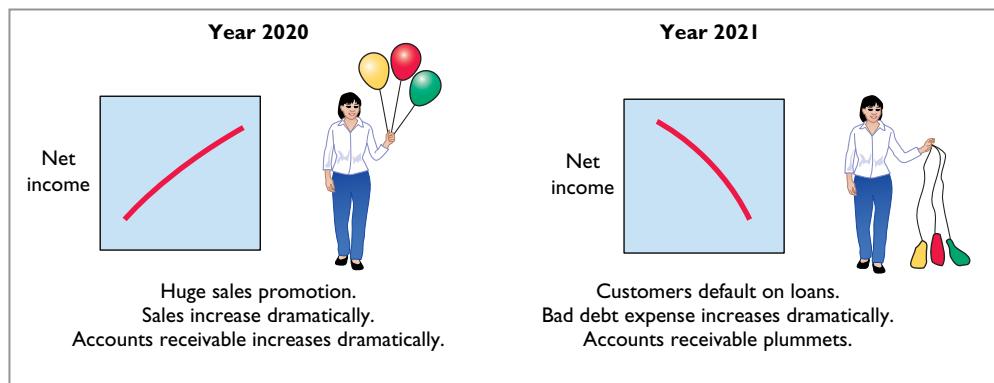

Under this method, Bad Debt Expense will show only **actual losses** from uncollectibles. The company will report accounts receivable at its gross amount.

Use of the direct write-off method can reduce the relevance of both the income statement and the balance sheet. Consider the following example. In 2020, Quick Buck Computer Company decided it could increase its revenues by offering computers to college students without requiring any money down and with no credit-approval process. On campuses across the country, it sold one million computers with a selling price of \$800 each. This increased Quick Buck's revenues and receivables by \$800 million. The promotion was a huge success! The 2020 balance sheet and income statement looked great. Unfortunately, during 2021, nearly 40% of the customers defaulted on their loans. This made the 2021 income statement and balance sheet look terrible. **Illustration 9.2** shows the effect of these events on the financial statements if the direct write-off method is used.

Under the direct write-off method, companies often record bad debt expense in a period different from the period in which they record the revenue. The method does not attempt to match bad debt expense to sales revenue in the income statement. Nor does the direct write-off method show accounts receivable in the balance sheet at the amount the company actually expects to receive. **Consequently, unless bad debt losses are insignificant, the direct write-off method is not acceptable for financial reporting purposes.**

ILLUSTRATION 9.2

Effects of direct write-off method

Allowance Method For Uncollectible Accounts

The **allowance method** of accounting for bad debts involves estimating uncollectible accounts at the end of each period. This provides better matching of expenses with revenues on the income statement. It also ensures that companies state receivables on the balance sheet at their cash (net) realizable value. **Cash (net) realizable value** is the net amount the company expects to receive in cash. It excludes amounts that the company estimates it will not collect. Thus, this method reduces receivables in the balance sheet by the amount of estimated uncollectible receivables.

HELPFUL HINT

In this context, *material* means significant or important to financial statement users.

Companies must use the allowance method for financial reporting purposes when bad debts are material in amount (see **Helpful Hint**). This method has three essential features:

1. Companies **estimate** uncollectible accounts receivable. They match this estimated expense **against revenues** in the same accounting period in which they record the revenues.
2. Companies debit estimated uncollectibles to **Bad Debt Expense** and credit them to **Allowance for Doubtful Accounts** through an adjusting entry at the end of each period. **Allowance for Doubtful Accounts** is a contra account to **Accounts Receivable**.
3. When companies write off a specific account, they debit actual uncollectibles to **Allowance for Doubtful Accounts** and credit that amount to **Accounts Receivable**.

Recording Estimated Uncollectibles. To illustrate the allowance method, assume that Hampson Furniture has credit sales of \$1,200,000 in 2020. Of this amount, \$200,000 of receivables remains uncollected at December 31. The credit manager estimates that \$12,000 of these receivables will be uncollectible. The adjusting entry to record the estimated uncollectibles increases (debits) **Bad Debt Expense** and increases (credits) **Allowance for Doubtful Accounts**, as follows.

A	=	L	+	OE
				-12,000 Exp

Cash Flows
no effect

Dec. 31	Bad Debt Expense Allowance for Doubtful Accounts (To record estimate of uncollectible accounts)	12,000	12,000
---------	--	--------	--------

Hampson reports **Bad Debt Expense** in the income statement as an operating expense. Thus, the estimated uncollectibles are matched with sales in 2020. Hampson records the expense in the same year it made the sales.

Allowance for Doubtful Accounts shows the estimated amount of claims on customers that the company expects will become uncollectible in the future. Companies use a contra account instead of a direct credit to **Accounts Receivable** because they do not know which customers will not pay. The credit balance in the allowance account will absorb the specific write-offs when they occur. As **Illustration 9.3** shows, the company deducts the allowance account from accounts receivable in the current assets section of the balance sheet.

The amount of \$188,000 in Illustration 9.3 represents the expected **cash realizable value** of the accounts receivable at the statement date (see **Helpful Hint**). **Companies do not close Allowance for Doubtful Accounts at the end of the fiscal year.**

HELPFUL HINT

Cash realizable value is sometimes referred to as *accounts receivable (net)*.

Hampson Furniture Balance Sheet (partial)

Current assets			
Cash		\$ 14,800	
Accounts receivable	\$200,000		
Less: Allowance for doubtful accounts	12,000	188,000	
Inventory		310,000	
Supplies		25,000	
Total current assets		\$537,800	

ILLUSTRATION 9.3

Presentation of allowance for doubtful accounts

Recording the Write-Off of an Uncollectible Account. As described in the Feature Story, companies use various methods of collecting past-due accounts, such as letters, calls, and legal action. When they have exhausted all means of collecting a past-due account and collection appears impossible, the company writes off the account. In the credit card industry, for example, it is standard practice to write off accounts that are 210 days past due. To prevent premature or unauthorized write-offs, authorized management personnel should formally approve each write-off. **To maintain segregation of duties, the employee authorized to write off accounts should not have daily responsibilities related to cash or receivables.**

To illustrate a receivables write-off, assume that the financial vice president of Hampson Furniture authorizes a write-off of the \$500 balance owed by R. A. Ware on March 1, 2021. The entry to record the write-off is as follows.

Mar. 1	Allowance for Doubtful Accounts	500	
	Accounts Receivable		500
	(Write-off of R. A. Ware account)		

A	=	L	+	OE
+500				
-500				

Cash Flows
no effect

The company does not increase bad debt expense when the write-off occurs. **Under the allowance method, companies debit every bad debt write-off to the allowance account rather than to Bad Debt Expense.** A debit to Bad Debt Expense would be incorrect because the company has already recognized the expense when it made the adjusting entry for estimated bad debts. Instead, the entry to record the write-off of an uncollectible account reduces both Accounts Receivable and Allowance for Doubtful Accounts. After posting, the general ledger accounts appear as shown in **Illustration 9.4**.

Accounts Receivable		Allowance for Doubtful Accounts	
Jan. 1 Bal.	200,000	Mar. 1	500
Mar. 1 Bal.	199,500	Mar. 1	500
		Jan. 1 Bal.	12,000
		Mar. 1 Bal.	11,500

ILLUSTRATION 9.4

General ledger balances after write-off

A write-off affects **only balance sheet accounts**—not income statement accounts. The write-off of the account reduces both Accounts Receivable and Allowance for Doubtful Accounts. Cash realizable value in the balance sheet, therefore, remains the same, as **Illustration 9.5** shows.

	Before Write-Off	After Write-Off
Accounts receivable	\$200,000	\$199,500
Allowance for doubtful accounts	12,000	11,500
Cash realizable value	\$188,000	\$188,000

ILLUSTRATION 9.5

Cash realizable value comparison

Recovery of an Uncollectible Account. Occasionally, a company collects from a customer after it has written off the account as uncollectible. The company makes two entries to record the recovery of a bad debt. (1) It reverses the entry made in writing off the account. This reinstates the customer's account. (2) It journalizes the collection in the usual manner.

To illustrate, assume that on July 1, R. A. Ware pays the \$500 amount that Hampson had written off on March 1. Hampson makes the following entries.

A	=	L	+	OE
+500				
-500				

Cash Flows
no effect

A	=	L	+	OE
+500				
-500				

Cash Flows
+500 

(1)			
July 1	Accounts Receivable		500
	Allowance for Doubtful Accounts		
	(To reverse write-off of R. A. Ware account)		500
(2)			
July 1	Cash	500	
	Accounts Receivable		
	(To record collection from R. A. Ware)		500

Note that the recovery of a bad debt, like the write-off of a bad debt, affects **only balance sheet accounts**. The net effect of the two entries above is a debit to Cash and a credit to Allowance for Doubtful Accounts for \$500. Accounts Receivable and Allowance for Doubtful Accounts both increase in entry (1) for two reasons. First, the company made an error in judgment when it wrote off the account receivable. Second, after R. A. Ware did pay, Accounts Receivable in the general ledger and Ware's account in the subsidiary ledger should show the collection for possible future credit purposes.

Estimating the Allowance. For Hampson Furniture in Illustration 9.3, the amount of the expected uncollectibles was given. However, in "real life," companies must estimate the amount of expected uncollectible accounts if they use the allowance method. **Illustration 9.6** shows an excerpt from the notes to Nike's financial statements discussing its use of the allowance method.

ILLUSTRATION 9.6

Nike's allowance method disclosure

Real World

Nike, Inc. Notes to the Financial Statements

Allowance for Uncollectible Accounts Receivable

We make ongoing estimates relating to the ability to collect our accounts receivable and maintain an allowance for estimated losses resulting from the inability of our customers to make required payments. In determining the amount of the allowance, we consider our historical level of credit losses and make judgments about the creditworthiness of significant customers based on ongoing credit evaluations. Since we cannot predict future changes in the financial stability of our customers, actual future losses from uncollectible accounts may differ from our estimates.

HELPFUL HINT

Where appropriate, the percentage-of-receivables basis may use only a single percentage rate.

Allowance for Doubtful Accounts		
Dec. 31 Unadj.	Bal.	1,500
Dec. 31 Adj.		8,500
Dec. 31 Bal.		10,000

Frequently, companies estimate the allowance as a percentage of the outstanding receivables. Under the **percentage-of-receivables basis**, management establishes a percentage relationship between the amount of receivables and expected losses from uncollectible accounts (see **Helpful Hint**). For example, suppose Steffen Company has an ending balance in Accounts Receivable of \$200,000 and an unadjusted credit balance in Allowance for Doubtful Accounts of \$1,500. It estimates that 5% of its accounts receivable will eventually be uncollectible. It should report a balance in Allowance for Doubtful Accounts of \$10,000 ($.05 \times \$200,000$). To increase the balance in Allowance for Doubtful Accounts from \$1,500 to \$10,000, the company debits (increases) Bad Debt Expense and credits (increases) Allowance for Doubtful Accounts by \$8,500 ($\$10,000 - \$1,500$).

To more accurately estimate the ending balance in the allowance account, a company often prepares a schedule, called **aging the accounts receivable**. This schedule classifies customer balances by the length of time they have been unpaid.

After the company arranges the accounts by age, it determines the expected bad debt losses by applying percentages, based on past experience, to the totals of each category. The longer a receivable is past due, the less likely it is to be collected. As a result, the estimated percentage of uncollectible debts increases as the number of days past due increases (see **Helpful Hint**). **Illustration 9.7** shows an aging schedule for Dart Company. Note the increasing uncollectible percentages from 2% to 40%.

Worksheet						
	A	B	C	D	E	F
1			Not Yet Due	Number of Days Past Due		
2	Customer	Total		1–30	31–60	61–90
3						Over 90
4	T. E. Adert	\$ 600		\$ 300		\$ 200 \$ 100
5	R. C. Bortz	300	\$ 300			
6	B. A. Carl	450		200	\$ 250	
7	O. L. Diker	700	500			200
8	T. O. Ebbet	600			300	300
9	Others	36,950	26,200	5,200	2,450	1,600 1,500
10		\$39,600	\$27,000	\$5,700	\$3,000	\$2,000 \$1,900
11	Estimated percentage uncollectible		2%	4%	10%	20% 40%
12	Total estimated uncollectible accounts	\$ 2,228	\$ 540	\$ 228	\$ 300	\$ 400 \$ 760
13						

ILLUSTRATION 9.7**Aging schedule****HELPFUL HINT**

The older categories have higher percentages because the longer an account is past due, the less likely it is to be collected.

Total estimated uncollectible accounts for Dart Company (\$2,228) represent the existing customer claims expected to become uncollectible in the future. Thus, this amount represents the **required balance** in Allowance for Doubtful Accounts at the balance sheet date. Accordingly, the amount of bad debt expense that should be recorded in the adjusting entry is the difference between the required balance and the existing balance in the allowance account. The existing, unadjusted balance in Allowance for Doubtful Accounts is the net result of the beginning balance (a normal credit balance) less the write-offs of specific accounts during the year (debits to the allowance account).

For example, if the unadjusted trial balance shows Allowance for Doubtful Accounts with a credit balance of \$528, then an adjusting entry for \$1,700 (\$2,228 – \$528) is necessary:

Dec. 31	Bad Debt Expense		1,700	
	Allowance for Doubtful Accounts			1,700
	(To adjust allowance account to total estimated uncollectibles)			

$$\begin{array}{r}
 \text{A} = \text{L} + \text{OE} \\
 -1,700 \text{ Exp} \\
 \hline
 \text{Cash Flows} \\
 \text{no effect}
 \end{array}$$

After Dart posts the adjusting entry, its accounts appear as shown in **Illustration 9.8**.

Bad Debt Expense		Allowance for Doubtful Accounts	
Dec. 31 Adj. 1,700			Dec. 31 Unadj. Bal. 528

Dec. 31 Adj. 1,700
Dec. 31 Bal. 2,228

ILLUSTRATION 9.8**Bad debt accounts after posting**

An important aspect of accounts receivable management is simply maintaining a close watch on the accounts. Studies have shown that accounts more than 60 days past due lose approximately 50% of their value if no payment activity occurs within the next 30 days. For each additional 30 days that pass, the collectible value halves once again.

Occasionally, the allowance account will have a **debit balance** prior to adjustment. This occurs because the debits to the allowance account from write-offs during the year **exceeded** the beginning balance in the account which was based on previous estimates for bad debts. In such a case, the company **adds the debit balance to the required balance** when it makes the adjusting entry. Thus, if there was a \$500 debit balance in the allowance account before

A	=	L	+	OE
-2,728				-2,728 Exp
Cash Flows				no effect

adjustment, the adjusting entry would be for \$2,728 (\$2,228 + \$500) to arrive at a credit balance of \$2,228 as shown below.

Dec. 31	Bad Debt Expense Allowance for Doubtful Accounts (To adjust allowance account to total estimated uncollectibles)	2,728	2,728
---------	--	-------	-------

After Dart posts the adjusting entry, its accounts appear as shown in **Illustration 9.9**.

ILLUSTRATION 9.9

Bad debt accounts after posting

Bad Debt Expense		Allowance for Doubtful Accounts	
Dec. 31	Adj. 2,728	Dec. 31 Unadj.	Dec. 31 Adj. 2,728
			Dec. 31 Bal. 2,228

The percentage-of-receivables basis provides an estimate of the cash realizable value of the receivables. It also provides a reasonable matching of expenses to revenue.

The note regarding accounts receivable shown in **Illustration 9.10** comes from the annual report of the shoe company **Skechers USA**.

ILLUSTRATION 9.10

Skechers USA's note disclosure of accounts receivable

Real World	Skechers USA Notes to the Financial Statements
<p>The likelihood of a material loss on an uncollectible account would be mainly dependent on deterioration in the overall economic conditions in a particular country or region. Reserves are fully provided for all probable losses of this nature. For receivables that are not specifically identified as high risk, we provide a reserve based upon our historical loss rate as a percentage of sales. Gross trade accounts receivable were \$293.1 million and \$241.9 million, and the allowance for bad debts, returns, sales allowances and customer chargebacks were \$21.0 million and \$15.9 million, at December 31, 2014 and 2013, respectively. Our credit losses charged to expense for the years ended December 31, 2014, 2013 and 2012 were \$11.8 million, \$2.6 million and \$1.5 million, respectively. In addition, we recorded sales return and allowance expense (recoveries) for the years ended December 31, 2014, 2013 and 2012 of \$2.3 million, \$0.2 million and \$(0.4) million, respectively.</p>

Cookie Jar Allowances

There are many pressures on companies to achieve earnings targets. For managers, poor earnings can lead to dismissal or lack of promotion. It is not surprising then that management may be tempted to look for ways to boost their earnings number.

One way a company can achieve greater earnings is to lower its estimate of what is needed in its Allowance for Doubtful Accounts (sometimes referred to as “tapping the cookie jar”). For example, suppose a company has an Allowance for Doubtful Accounts of \$10 million

and decides to reduce this balance to \$9 million. As a result of this change, Bad Debt Expense decreases by \$1 million and earnings increase by \$1 million.

Large banks such as **JP Morgan Chase**, **Wells Fargo**, and **Bank of America** recently decreased their Allowance for Doubtful Accounts by over \$4 billion. These reductions came at a time when these big banks were still suffering from lower mortgage lending and trading activity, both of which lead to lower earnings. They justified these reductions in the allowance balances by noting that credit quality and economic conditions had improved. This may be so, but it sure is great to have a cookie jar that might be tapped when a boost in earnings is needed.

How might investors determine that a company is managing its earnings? (Go to WileyPLUS for this answer and additional questions.)

DO IT! 2a | Bad Debt Expense

Brule Corporation has been in business for 5 years. The unadjusted trial balance at the end of the current year shows Accounts Receivable \$30,000, Sales Revenue \$180,000, and Allowance for Doubtful Accounts with a debit balance of \$2,000. Brule estimates bad debts to be 10% of accounts receivable. Prepare the entry necessary to adjust Allowance for Doubtful Accounts.

Solution

Brule should make the following entry to bring the debit balance in Allowance for Doubtful Accounts up to a normal, credit balance of \$3,000 ($10\% \times \$30,000$):

Bad Debt Expense [$(10\% \times \$30,000) + \$2,000$]	5,000	
Allowance for Doubtful Accounts		5,000
(To record estimate of uncollectible accounts)		

Related exercise material: BE9.3, BE9.6, DO IT! 9.2a, E9.4, E9.5, E9.6, E9.7, and E9.8.

ACTION PLAN

- Estimate the amount the company does not expect to collect.
- Consider the existing balance in the allowance account when using the percentage-of-receivables basis.
- Report receivables at their cash (net) realizable value—that is, the amount the company expects to collect in cash.

Disposing of Accounts Receivable

In the normal course of events, companies collect accounts receivable in cash and remove the receivables from the books. However, as credit sales and receivables have grown in significance, the “normal course of events” has changed. Companies now frequently sell their receivables to another company for cash, thereby shortening the cash-to-cash operating cycle.

Companies sell receivables for two major reasons. First, **they may be the only reasonable source of cash**. When money is tight, companies may not be able to borrow money in the usual credit markets. Or if money is available, the cost of borrowing may be prohibitive.

A second reason for selling receivables is that **billing and collection are often time-consuming and costly**. It is often easier for a retailer to sell the receivables to another party with expertise in billing and collection matters. Credit card companies such as **MasterCard**, **Visa**, and **Discover** specialize in billing and collecting accounts receivable.

Sale of Receivables to a Factor

A common sale of receivables is a sale to a factor. A **factor** is a finance company or bank that buys receivables from businesses and then collects the payments directly from the customers. Factoring is a multibillion dollar business.

Factoring arrangements vary widely. Typically, the factor charges a commission to the company that is selling the receivables. This fee often ranges from 1–3% of the amount of receivables purchased. To illustrate, assume that Hendredon Furniture factors \$600,000 of receivables to Federal Factors. Federal Factors assesses a service charge of 2% of the amount of receivables sold. The journal entry to record the sale by Hendredon Furniture on April 2, 2020, is as follows.

Apr. 2	Cash	588,000	
	Service Charge Expense ($2\% \times \$600,000$)	12,000	
	Accounts Receivable		600,000
	(To record the sale of accounts receivable)		

If Hendredon often sells its receivables, it records the service charge expense as an operating expense. If the company infrequently sells receivables, it may report this amount in the “Other expenses and losses” section of the income statement.

A	=	L	+	OE
+588,000				-12,000 Exp
-600,000				
Cash Flows				+588,000

ETHICS NOTE

In exchange for lower interest rates, some companies have eliminated the 25-day grace period before finance charges kick in. Be sure you read the fine print in any credit agreement you sign.

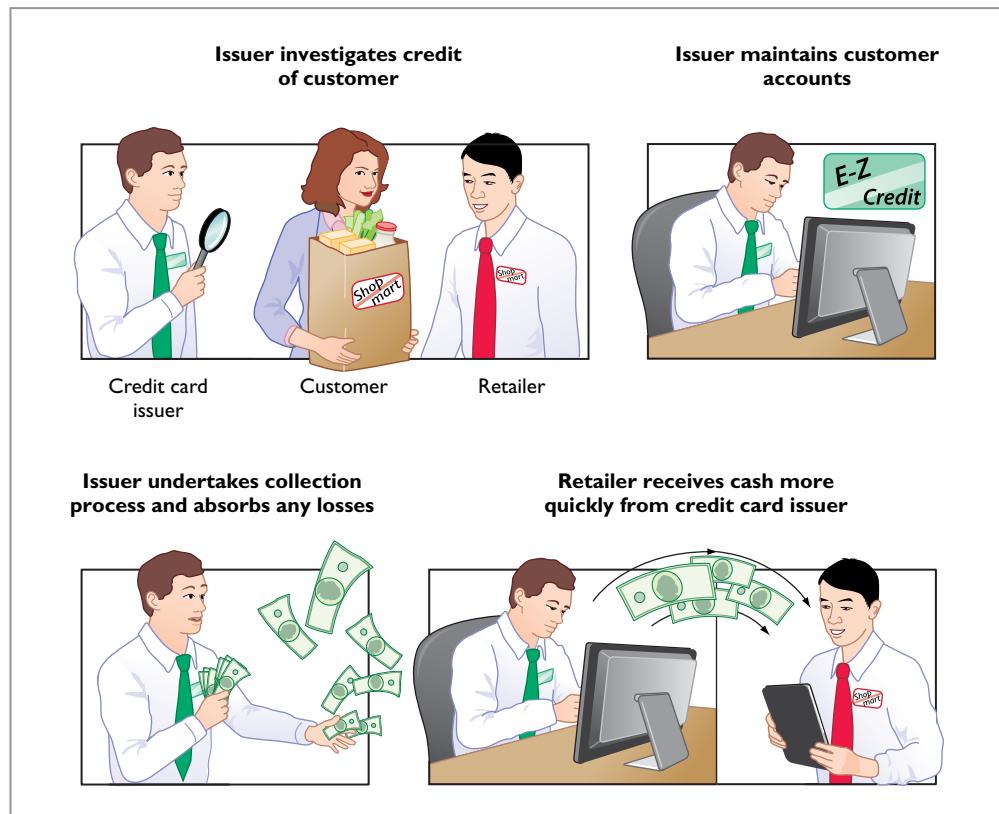

National Credit Card Sales

Over one billion credit cards are in use in the United States—more than three credit cards for every man, woman, and child in this country. **Visa**, **MasterCard**, and **American Express** are the national credit cards that most individuals use. Three parties are involved when national credit cards are used in retail sales: (1) the credit card issuer, who is independent of the retailer; (2) the retailer; and (3) the customer. **A retailer's acceptance of a national credit card is another form of selling (factoring) the receivable.**

Illustration 9.11 shows the major advantages of national credit cards to the retailer. In exchange for these advantages, the retailer pays the credit card issuer a fee of 2–4% of the invoice price for its services (see **Ethics Note**).

ILLUSTRATION 9.11

Advantages of credit cards to the retailer

Accounting for Credit Card Sales. The retailer generally considers sales from the use of national credit card sales as **cash sales**. The retailer must pay to the bank that issues the card a fee for processing the transactions. The retailer records the credit card slips in a similar manner as checks deposited from a cash sale.

To illustrate, Anita Ferreri purchases \$1,000 of compact discs for her restaurant from Karen Kerr Music Co., using her Visa First Bank Card. First Bank charges a service fee of 3%. The entry to record this transaction by Karen Kerr Music on March 22, 2020, is as follows.

A	=	L	+ OE
+970			
<hr/>			
Cash Flows	-30 Exp		970
+970	+1,000 Rev	30	1,000

Mar. 22	Cash Service Charge Expense Sales Revenue (To record Visa credit card sales)	970 30 1,000
---------	---	--------------------

Accounting Across the Organization Nordstrom

© Michael Braun/iStockphoto

How Does a Credit Card Work?

Most of you know how to use a credit card, but do you know what happens in the transaction and how the transaction is processed? Suppose that you use a **Visa** card to purchase some new ties at **Nordstrom**. The

customer swipes the credit card (or inserts it if it is a chip card), which allows the information to be read. The salesperson enters the amount of the purchase. The machine contacts the Visa computer, which routes the call back to the bank that issued your Visa card. The issuing bank verifies that the account exists, that the card is not stolen, and that you have not exceeded your credit limit. At this point, the slip is printed, which you sign.

Visa acts as the clearing agent for the transaction. It transfers funds from the issuing bank to Nordstrom's bank account. Generally this transfer of funds, from sale to the receipt of funds in the merchant's account, takes two to three days.

In the meantime, Visa puts a pending charge on your account for the amount of the tie purchase; that amount counts immediately against your available credit limit. At the end of the billing period, Visa sends you an invoice (your credit card bill) which shows the various charges you made, and the amounts that Visa expended on your behalf, for the month. You then must "pay the piper" for your stylish new ties.

Assume that Nordstrom prepares a bank reconciliation at the end of each month. If some credit card sales have not been processed by the bank, how should Nordstrom treat these transactions on its bank reconciliation? (Go to WileyPLUS for this answer and additional questions.)

DO IT! 2b | Factoring

Peter M. Kell Wholesalers Co. needs to raise \$120,000 in cash to safely cover next Friday's employee payroll. Kell has reached its debt ceiling. Kell's present balance of outstanding receivables totals \$750,000. Kell decides to factor \$125,000 of its receivables on September 7, 2020, to alleviate this cash crunch. Record the entry that Kell would make when it raises the needed cash. (Assume a 1% service charge.)

Solution

Assuming that Kell Co. factors \$125,000 of its accounts receivable at a 1% service charge, it would make this entry:

Sept. 7	Cash Service Charge Expense (1% × \$125,000) Accounts Receivable (To record sale of receivables to factor)	123,750 1,250 125,000
---------	---	-----------------------------

Related exercise material: BE9.7, DO IT! 9.2b, E9.9, E9.10, and E9.11.

ACTION PLAN

- Consider sale of receivables to a factor.
- Weigh cost of factoring against benefit of having cash in hand.

Notes Receivable

LEARNING OBJECTIVE 3

Explain how companies recognize, value, and dispose of notes receivable.

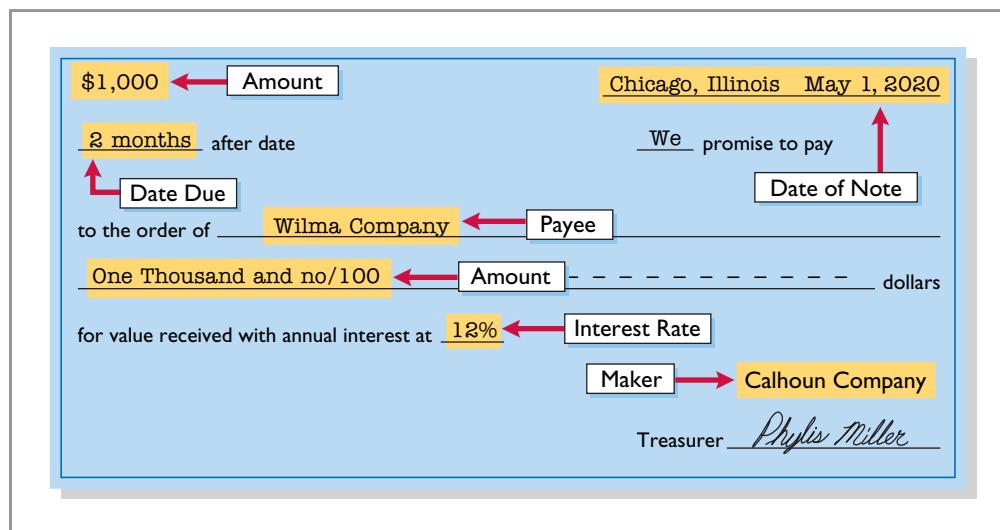

Companies may also grant credit in exchange for a formal credit instrument known as a promissory note. A **promissory note** is a written promise to pay a specified amount of money on demand or at a definite time. Promissory notes may be used (1) when individuals and companies lend or borrow money, (2) when the amount of the transaction and the credit period exceed normal limits, or (3) in settlement of accounts receivable.

In a promissory note, the party making the promise to pay is called the **maker**. The party to whom payment is to be made is called the **payee**. The note may specifically identify the payee by name or may designate the payee simply as the bearer of the note.

In the note shown in **Illustration 9.12**, Calhoun Company is the maker and Wilma Company is the payee. To Wilma Company, the promissory note is a note receivable. To Calhoun Company, it is a note payable (see **Helpful Hint**).

ILLUSTRATION 9.12**Promissory note****HELPFUL HINT**

For this note, the maker, Calhoun Company, debits Cash and credits Notes Payable. The payee, Wilma Company, debits Notes Receivable and credits Cash.

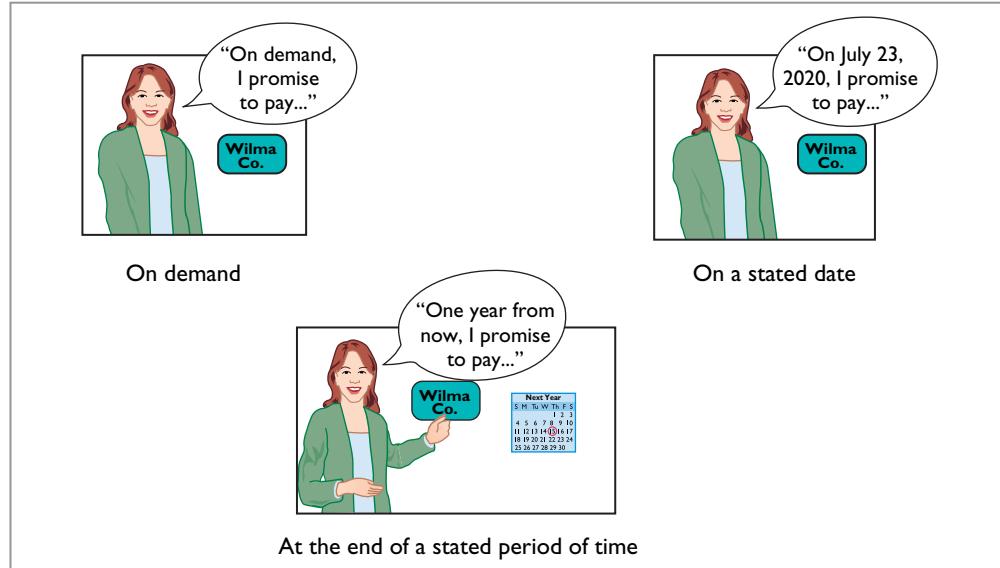

Notes receivable give the holder a stronger legal claim to assets than do accounts receivable. Like accounts receivable, notes receivable can be readily sold to another party. Promissory notes are negotiable instruments (as are checks), which means that they can be transferred to another party by endorsement.

Companies frequently accept notes receivable from customers who need to extend the payment of an outstanding account receivable. They often require such notes from high-risk customers. In some industries (such as the pleasure and sport boat industry), all credit sales are supported by notes. The majority of notes, however, originate from lending transactions.

The basic issues in accounting for notes receivable are the same as those for accounts receivable. On the following pages, we look at these issues. Before we do, however, we need to consider two issues that do not apply to accounts receivable: determining the maturity date and computing interest.

Determining the Maturity Date

Illustration 9.13 shows three ways of stating the maturity date of a promissory note.

ILLUSTRATION 9.13**Maturity date of different notes**

When the life of a note is expressed in terms of months, you find the date when it matures by counting the months from the date of issue. For example, the maturity date of a three-month note dated May 1 is August 1. A note drawn on the last day of a month matures on the last day of a subsequent month. That is, a July 31 note due in two months matures on September 30.

When the due date is stated in terms of days, you need to count the exact number of days to determine the maturity date. In counting, **omit the date the note is issued but include the due date**. For example, the maturity date of a 60-day note dated July 17 is September 15, computed as shown in **Illustration 9.14**.

Term of note		60 days
July (31–17)	14	
August	<u>31</u>	<u>45</u>
Maturity date: September		15

ILLUSTRATION 9.14**Computation of maturity date**

Computing Interest

Illustration 9.15 gives the basic formula for computing interest on an interest-bearing note.

$$\text{Face Value of Note} \times \text{Annual Interest Rate} \times \text{Time in Terms of One Year} = \text{Interest}$$

ILLUSTRATION 9.15**Formula for computing interest**

The interest rate specified in a note is an **annual** rate of interest (see **Helpful Hint**). The time factor in the formula in Illustration 9.15 expresses the fraction of a year that the note is outstanding. When the maturity date is stated in days, the time factor is often the number of days divided by 360. Remember that when counting days, omit the date that the note is issued but include the due date. When the due date is stated in months, the time factor is the number of months divided by 12. **Illustration 9.16** shows computation of interest for various time periods.

HELPFUL HINT

The interest rate specified is the **annual** rate.

Terms of Note	Interest Computation			
\$ 730, 12%, 120 days	Face	×	Rate	× Time = Interest
\$1,000, 9%, 6 months	\$ 730	×	12%	× 120/360 = \$ 29.20
\$2,000, 6%, 1 year	\$1,000	×	9%	× 6/12 = \$ 45.00
	\$2,000	×	6%	× 1/1 = \$120.00

ILLUSTRATION 9.16**Computation of interest**

There are different ways to calculate interest. For example, the computation in Illustration 9.16 assumes 360 days for the length of the year. Most financial institutions use 365 days to compute interest. *For homework problems, assume 360 days to simplify computations.*

Recognizing Notes Receivable

To illustrate the basic entry for notes receivable, we will use Calhoun Company's \$1,000, two-month, 12% promissory note dated May 1. Assuming that Calhoun Company wrote the

A	=	L	+	OE
+1,000				
-1,000				
Cash Flows				
no effect				

note to settle an open account, Wilma Company makes the following entry for the receipt of the note.

May 1	Notes Receivable Accounts Receivable (To record acceptance of Calhoun Company note)	1,000	1,000
-------	--	-------	-------

The company records the note receivable at its **face value**, the value shown on the face of the note. No interest revenue is reported when the note is accepted because the revenue recognition principle does not recognize revenue until the performance obligation is satisfied. Interest is earned (accrued) as time passes.

If a company issues cash in exchange for a note, the entry is a debit to Notes Receivable and a credit to Cash in the amount of the loan.

Valuing Notes Receivable

Valuing short-term notes receivable is the same as valuing accounts receivable. Like accounts receivable, companies report short-term notes receivable at their **cash (net) realizable value**. The notes receivable allowance account is Allowance for Doubtful Accounts. The estimations involved in determining cash realizable value and in recording bad debt expense and the related allowance are done similarly to accounts receivable.

Disposing of Notes Receivable

Notes may be held to their maturity date, at which time the face value plus accrued interest is due. In some situations, the maker of the note defaults, and the payee must make an appropriate adjustment. In other situations, similar to accounts receivable, the holder of the note speeds up the conversion to cash by selling the receivables (as described earlier in this chapter).

Honor of Notes Receivable

A note is **honored** when its maker pays in full at its maturity date. For each interest-bearing note, the **amount due at maturity** is the face value of the note plus interest for the length of time specified on the note.

To illustrate, assume that Wolder Co. lends Higley Co. \$10,000 on June 1, accepting a five-month, 9% interest note. In this situation, interest is \$375 ($\$10,000 \times 9\% \times \frac{5}{12}$). The amount due, the **maturity value**, is \$10,375 ($\$10,000 + \375). To obtain payment, Wolder (the payee) must present the note either to Higley Co. (the maker) or to the maker's agent, such as a bank. If Wolder presents the note to Higley Co. on November 1, the maturity date, Wolder's entry to record the collection is as follows.

A	=	L	+	OE
+10,375				
-10,000				
Cash Flows				
+10,375				

Nov. 1	Cash Notes Receivable Interest Revenue ($\$10,000 \times 9\% \times \frac{5}{12}$) (To record collection of Higley note and interest)	10,375	10,000	375
--------	---	--------	--------	-----

Accrual of Interest Receivable

Suppose instead that Wolder Co. prepares financial statements as of September 30. The timeline in **Illustration 9.17** presents this situation.

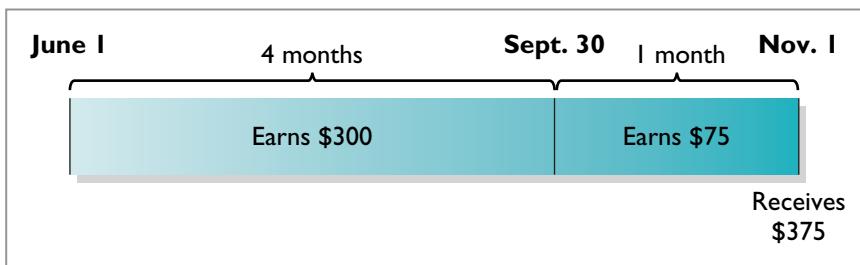

ILLUSTRATION 9.17
Timeline of interest earned

To reflect interest earned but not yet received, Wolder must accrue interest on September 30. In this case, the adjusting entry by Wolder is for four months of interest, or \$300, as shown below.

Sept. 30	Interest Receivable ($\$10,000 \times 9\% \times \frac{4}{12}$) Interest Revenue (To accrue 4 months' interest on Higley note)	300	300
----------	--	-----	-----

A	=	L	+ OE
+300			+300 Rev
Cash Flows			
no effect			

At the note's maturity on November 1, Wolder receives \$10,375. This amount represents repayment of the \$10,000 note as well as five months of interest, or \$375, as shown below. The \$375 is comprised of the \$300 Interest Receivable accrued on September 30 plus \$75 earned during October. Wolder's entry to record the honoring of the Higley note on November 1 is as follows.

Nov. 1	Cash [$\$10,000 + (\$10,000 \times 9\% \times \frac{5}{12})$] Notes Receivable Interest Receivable Interest Revenue ($\$10,000 \times 9\% \times \frac{1}{12}$) (To record collection of Higley note and interest)	10,375	10,000 300 75
--------	--	--------	---------------------

A	=	L	+ OE
+10,375			-10,000
-10,000			-300
			+75 Rev
Cash Flows			
+10,375			

In this case, Wolder credits Interest Receivable because the receivable was established in the adjusting entry on September 30.

Dishonor of Notes Receivable

A **dishonored (defaulted) note** is a note that is not paid in full at maturity. A dishonored note receivable is no longer negotiable. However, the payee still has a claim against the maker of the note for both the note and the interest. Therefore, the note holder usually transfers the Notes Receivable account to an Accounts Receivable account.

To illustrate, assume that Higley Co. on November 1 indicates that it cannot pay at the present time. The entry to record the dishonor of the note depends on whether Wolder Co. expects eventual collection. If it does expect eventual collection, Wolder Co. debits the amount due (face value and interest) on the note to Accounts Receivable. It would make the following entry at the time the note is dishonored (assuming no previous accrual of interest).

Nov. 1	Accounts Receivable Notes Receivable Interest Revenue (To record the dishonor of Higley note)	10,375	10,000 375
--------	--	--------	---------------

A	=	L	+ OE
+10,375			-10,000
-10,000			+375 Rev
Cash Flows			
no effect			

If instead on November 1 there is no hope of collection, the note holder would write off the face value of the note by debiting Allowance for Doubtful Accounts. No interest revenue would be recorded because collection will not occur.

Accounting Across the Organization Countrywide Financial Corporation

© Andy Dean/iStockphoto

Bad Information Can Lead to Bad Loans

Many factors have contributed to the financial crisis of 2008. One significant factor that resulted in many bad loans was a failure by lenders to investigate loan customers sufficiently. For example, **Countrywide Financial Corporation** wrote many loans under its “Fast and Easy” loan program. That program allowed borrowers to provide little or no documentation for their income or their assets. Other

lenders had similar programs, which earned the nickname “liars’ loans.” One study found that in these situations, 60% of applicants overstated their incomes by more than 50% in order to qualify for a loan. Critics of the banking industry say that because loan officers were compensated for loan volume and because banks were selling the loans to investors rather than holding them, the lenders had little incentive to investigate the borrowers’ creditworthiness.

Sources: Glenn R. Simpson and James R. Hagerty, “Countrywide Loss Focuses Attention on Underwriting,” *Wall Street Journal* (April 30, 2008), p. B1; and Michael Corkery, “Fraud Seen as Driver in Wave of Foreclosures,” *Wall Street Journal* (December 21, 2007), p. A1.

What steps should the banks have taken to ensure the accuracy of financial information provided on loan applications? (Go to WileyPLUS for this answer and additional questions.)

DO IT! 3 | Recognizing Notes Receivable

Gambit Stores accepts from Leonard Co. a \$3,400, 90-day, 6% note dated May 10 in settlement of Leonard’s overdue account. (a) What is the maturity date of the note? (b) What is the interest payable at the maturity date? (c) What entry does Gambit make at the maturity date, assuming Leonard pays the note and interest in full at that time?

Solution

- a. The maturity date is August 8, computed as follows.

Term of note:		90 days
May (31–10)	21	
June	30	
July	31	82
Maturity date: August		8

- b. The interest payable at the maturity date is \$51, computed as follows.

$$\begin{array}{rccccc} \text{Face} & \times & \text{Rate} & \times & \text{Time} & = & \text{Interest} \\ \$3,400 & \times & 6\% & \times & 90/360 & = & \$51 \end{array}$$

- c. Gambit Stores records this entry at the maturity date:

Cash		3,451	
Notes Receivable			3,400
Interest Revenue			51
(To record collection of Leonard note and interest)			

ACTION PLAN

- Count the exact number of days to determine the maturity date. Omit the date the note is issued, but include the due date.
- Compute the accrued interest.
- Prepare the entry for payment of the note and the interest.

Presentation and Analysis

LEARNING OBJECTIVE 4

Describe the statement presentation and analysis of receivables.

If a company has significant receivables, analysts carefully review the company’s financial statement disclosures to evaluate how well the company is managing its receivables.

Presentation

Companies should identify in the balance sheet or in the notes to the financial statements each of the major types of receivables. Short-term receivables appear in the current assets section of the balance sheet. Short-term investments appear before short-term receivables because these investments are more liquid (nearer to cash). Companies report both the gross amount of receivables and the allowance for doubtful accounts.

In the income statement, companies report bad debt expense and service charge expense as operating expenses. Interest revenue appears under “Other revenues and gains” in the non-operating activities section of the income statement.

Presented below are examples of different types of information provided to help users understand the issues related to receivables. **Illustration 9.18**, for example, shows the composition of **Deere & Company**'s net receivables. Given that receivables represent 60% of the total assets of this heavy equipment manufacturer, investors are interested in the types of receivables and their significance.

Real World

Deere & Company
Balance Sheet (partial)
(in millions)

Receivables	
Receivables from unconsolidated subsidiaries	\$ 30
Trade accounts and notes receivable	3,278
Financing receivables	27,583
Restricted financing receivables	4,616
Other receivables	1,500
	<hr/>
Total receivables	37,007
Less: Allowance for doubtful trade receivables	175
	<hr/>
Net receivables	\$36,832

ILLUSTRATION 9.18

Balance sheet presentation of receivables

Illustration 9.19 contains an excerpt from the notes to the financial statements of **Skechers**, discussing how it monitors receivables.

Real World

Skechers USA
Notes to the Financial Statements

To minimize the likelihood of uncollectability, customers' credit-worthiness is reviewed periodically based on external credit reporting services, financial statements issued by the customer and our experience with the account, and it is adjusted accordingly. When a customer's account becomes significantly past due, we generally place a hold on the account and discontinue further shipments to that customer, minimizing further risk of loss.

ILLUSTRATION 9.19

Note on monitoring Skechers' receivables

If a company has significant concentrations of credit risk, it must discuss this risk in the notes to its financial statements. A **concentration of credit risk** is a threat of nonpayment from a single large customer or class of customers that could adversely affect the financial health of the company. **Illustration 9.20** shows an excerpt from the credit risk note from Skechers' 2015 annual report. The company reports that its five largest customers account for 14.6% of its net sales.

ILLUSTRATION 9.20

Excerpt from Skechers' note on concentration of credit risk

Real World**Skechers USA****Notes to the Financial Statements**

During 2015, 2014 and 2013, no customer accounted for 10.0% or more of net sales. As of December 31, 2015, one customer accounted for 10.6% of gross trade receivables. No other customer accounted for more than 10% of net trade receivables at December 31, 2015 or 2014. During 2015, 2014 and 2013, net sales to the five largest customers were approximately 14.6%, 15.7% and 18.1%, respectively.

This note to Skechers' financial statements indicates it has a relatively high concentration of credit risk. A default by any of these large customers could have a significant negative impact on its financial performance.

Analysis

Investors and corporate managers compute financial ratios to evaluate the liquidity of a company's accounts receivable. They use the **accounts receivable turnover** to assess the liquidity of the receivables. This ratio measures the number of times, on average, the company collects accounts receivable during the period. It is computed by dividing net credit sales (net sales less cash sales) by the average net accounts receivable during the year. Unless seasonal factors are significant, average net accounts receivable outstanding can be computed from the beginning and ending balances of net accounts receivable.

For example, **Cisco Systems** had net sales of \$37,750 million in a recent year. It had a beginning accounts receivable (net) balance of \$5,157 million and an ending accounts receivable (net) balance of \$5,344 million. Assuming that Cisco's sales were all on credit, its accounts receivable turnover is computed as shown in **Illustration 9.21**.

ILLUSTRATION 9.21

Accounts receivable turnover and computation

Net Credit Sales	÷	Average Net Accounts Receivable	=	Accounts Receivable Turnover
\$37,750	÷	$\frac{\$5,157 + \$5,344}{2}$	=	7.2 times

The result indicates an accounts receivable turnover of 7.2 times per year. The higher the turnover, the more liquid the company's receivables.

A variant of the accounts receivable turnover that makes the liquidity even more evident is its conversion into an **average collection period** in terms of days. This is done by dividing the accounts receivable turnover into 365 days. For example, Cisco's turnover of 7.2 times is divided into 365 days, as shown in **Illustration 9.22**, to obtain approximately 51 days. This means that it takes Cisco 51 days to collect its accounts receivable.

ILLUSTRATION 9.22

Average collection period for receivables formula and computation

Days in Year	÷	Accounts Receivable Turnover	=	Average Collection Period in Days
365 days	÷	7.2 times	=	51 days

Companies frequently use the average collection period to assess the effectiveness of a company's credit and collection policies. The general rule is that the collection period should not greatly exceed the credit term period (that is, the time allowed for payment).

DO IT! 4 | Analysis of Receivables

In 2020, Phil Mickelson Company has net credit sales of \$923,795 for the year. It had a beginning accounts receivable (net) balance of \$38,275 and an ending accounts receivable (net) balance of \$35,988. Compute Phil Mickelson Company's (a) accounts receivable turnover and (b) average collection period in days.

Solution

a.	Net credit sales	\div	Average net accounts receivable	$=$	Accounts receivable turnover
	\$923,795	\div	$\frac{\$38,275 + \$35,988}{2}$	$=$	24.9 times
b.	Days in year	\div	Accounts receivable turnover	$=$	Average collection period in days
	365	\div	24.9 times	$=$	14.7 days

Related exercise material: BE9.12, DO IT! 9.4, and E9.17.

ACTION PLAN

- Review the formula to compute the accounts receivable turnover.
- Make sure that both the beginning and ending accounts receivable balances are considered in the computation.
- Review the formula to compute the average collection period in days.

Review and Practice

Learning Objectives Review

1 Explain how companies recognize accounts receivable.

Receivables are frequently classified as (1) accounts, (2) notes, and (3) other. Accounts receivable are amounts customers owe on account. Notes receivable are claims for which lenders issue formal instruments of credit as proof of the debt. Other receivables include nontrade receivables such as interest receivable, loans to company officers, advances to employees, and income taxes refundable.

Companies record accounts receivable when they perform a service on account or at the point of sale of merchandise on account. Accounts receivable are reduced by sales returns and allowances. Cash discounts reduce the amount received on accounts receivable. When interest is charged on a past due receivable, the company adds this interest to the accounts receivable balance and recognizes it as interest revenue.

2 Describe how companies value accounts receivable and record their disposition.

There are two methods of accounting for uncollectible accounts: the allowance method and the direct write-off method. Companies use the percentage-of-receivables basis to estimate uncollectible accounts using the allowance method. The percentage-of-receivables basis emphasizes the cash realizable value of the accounts receivable. An aging schedule is often used with this basis.

When a company collects an account receivable, it credits Accounts Receivable. When a company sells (factors) an account receivable, a service charge expense reduces the amount received.

3 Explain how companies recognize, value, and dispose of notes receivable.

For a note stated in months, the maturity date is found by counting the months from the date of issue. For a note stated in days, the number of days is counted, omitting the issue date and counting the due date. The formula for computing interest is Face value \times Interest rate \times Time.

Companies record notes receivable at face value. In some cases, it is necessary to accrue interest prior to maturity. In this case, companies debit Interest Receivable and credit Interest Revenue.

Notes can be held to maturity. At that time the face value plus accrued interest is due, and the note is removed from the accounts. In many cases, the holder of the note speeds up the conversion by selling the receivable to another party (a factor). In some situations, the maker of the note dishonors the note (defaults), in which case the company transfers the note and accrued interest to an account receivable or writes off the note.

4 Describe the statement presentation and analysis of receivables.

As with accounts receivable, companies report notes receivable at their cash (net) realizable value. The notes receivable allowance account is Allowance for Doubtful Accounts. The computation and estimations involved in valuing notes receivable at cash realizable value, and in recording the proper amount of bad debt expense and the related allowance, are similar to those for accounts receivable.

Companies should identify in the balance sheet or in the notes to the financial statements each major type of receivable. Short-term

receivables are considered current assets. Companies report the gross amount of receivables and the allowance for doubtful accounts. They report bad debt and service charge expenses in the multiple-step income statement as operating (selling) expenses. Interest revenue

appears under other revenues and gains in the nonoperating activities section of the statement. Managers and investors evaluate accounts receivable for liquidity by computing a turnover ratio and an average collection period.

Glossary Review

Accounts receivable Amounts owed by customers on account. (p. 9-3).

Accounts receivable turnover A measure of the liquidity of accounts receivable; computed by dividing net credit sales by average net accounts receivable. (p. 9-20).

Aging the accounts receivable The analysis of customer balances by the length of time they have been unpaid. (p. 9-8).

Allowance method A method of accounting for bad debts that involves estimating uncollectible accounts at the end of each period. (p. 9-6).

Average collection period The average amount of time that a receivable is outstanding; calculated by dividing 365 days by the accounts receivable turnover. (p. 9-20).

Bad Debt Expense An expense account to record uncollectible receivables. (p. 9-5).

Cash (net) realizable value The net amount a company expects to receive in cash. (p. 9-6).

Direct write-off method A method of accounting for bad debts that involves expensing accounts at the time they are determined to be uncollectible. (p. 9-5).

Dishonored (defaulted) note A note that is not paid in full at maturity. (p. 9-17).

Factor A finance company or bank that buys receivables from businesses and then collects the payments directly from the customers. (p. 9-11).

Maker The party in a promissory note who is making the promise to pay. (p. 9-13).

Notes receivable Written promise (as evidenced by a formal instrument) for amounts to be received. (p. 9-3).

Other receivables Various forms of nontrade receivables, such as interest receivable and income taxes refundable. (p. 9-3).

Payee The party to whom payment of a promissory note is to be made. (p. 9-13).

Percentage-of-receivables basis Management estimates what percentage of receivables will result in losses from uncollectible accounts. (p. 9-8).

Promissory note A written promise to pay a specified amount of money on demand or at a definite time. (p. 9-13).

Receivables Amounts due from individuals and other companies. (p. 9-2).

Trade receivables Notes and accounts receivable that result from sales transactions. (p. 9-3).

Practice Multiple-Choice Questions

1. (LO 1) Receivables are frequently classified as:

- a. accounts receivable, company receivables, and other receivables.
- b. accounts receivable, notes receivable, and employee receivables.
- c. accounts receivable and general receivables.
- d. accounts receivable, notes receivable, and other receivables.

2. (LO 1) Buehler Company on June 15 sells merchandise on account to Chaz Co. for \$1,000, terms 2/10, n/30. On June 20, Chaz Co. returns merchandise worth \$300 to Buehler Company. On June 24, payment is received from Chaz Co. for the balance due. What is the amount of cash received?

- a. \$700.
- b. \$680.
- c. \$686.
- d. None of the above.

3. (LO 2) Hughes Company has a credit balance of \$5,000 in its Allowance for Doubtful Accounts before any adjustments are made at the end of the year. Based on review and aging of its accounts receivable at the end of the year, Hughes estimates that \$60,000 of its

receivables are uncollectible. The amount of bad debt expense which should be reported for the year is:

- | | |
|--------------|--------------|
| a. \$5,000. | c. \$60,000. |
| b. \$55,000. | d. \$65,000. |

4. (LO 2) Use the same information as in Question 3, except that Hughes has a debit balance of \$5,000 in its Allowance for Doubtful Accounts before any adjustments are made at the end of the year. In this situation, the amount of bad debt expense that should be reported for the year is:

- | | |
|--------------|--------------|
| a. \$5,000. | c. \$60,000. |
| b. \$55,000. | d. \$65,000. |

5. (LO 2) Accounts receivable at the end of the month are \$800,000. Bad debts are expected to be 1.5% of accounts receivable. If Allowance for Doubtful Accounts has a credit balance of \$1,000 before adjustment, what is the balance after adjustment?

- | | |
|--------------|--------------|
| a. \$7,000. | c. \$12,000. |
| b. \$11,000. | d. \$13,000. |

6. (LO 2) At December 31, 2020, Roso Carlson Company had accounts receivable of \$750,000. On January 1, 2020, Allowance for Doubtful Accounts had a credit balance of \$18,000. During 2020, \$30,000 of uncollectible accounts receivable were written off. Past experience indicates that 3% of accounts receivable become uncollectible. What should be the bad debt expense for 2020?

- a. \$10,500.
- b. \$22,500.
- c. \$30,000.
- d. \$34,500.

7. (LO 2) An analysis and aging of the accounts receivable of Prince Company at December 31 reveals the following data.

Accounts receivable	\$800,000
Allowance for doubtful accounts per books before adjustment	50,000
Amounts expected to become uncollectible	65,000

The cash realizable value of the accounts receivable at December 31, after adjustment, is:

- a. \$685,000.
- b. \$750,000.
- c. \$800,000.
- d. \$735,000.

8. (LO 2) Which of the following statements about Visa credit card sales is **incorrect**?

- a. The credit card issuer makes the credit investigation of the customer.
- b. The retailer is not involved in the collection process.
- c. Two parties are involved.
- d. The retailer receives cash more quickly than it would from individual customers on account.

9. (LO 2) Blinka Retailers accepted \$50,000 of Citibank Visa credit card charges for merchandise sold on July 1. Citibank charges 4% for its credit card use. The entry to record this transaction by Blinka Retailers will include a credit to Sales Revenue of \$50,000 and a debit(s) to:

a. Cash and Service Charge Expense	\$48,000 \$2,000
b. Accounts Receivable and Service Charge Expense	\$48,000 \$2,000
c. Cash	\$50,000
d. Accounts Receivable	\$50,000

10. (LO 3) One of the following statements about promissory notes is incorrect. The **incorrect** statement is:

- a. The party making the promise to pay is called the maker.

- b. The party to whom payment is to be made is called the payee.
- c. A promissory note is not a negotiable instrument.
- d. A promissory note is often required from high-risk customers.

11. (LO 3) Foti Co. accepts a \$1,000, 3-month, 6% promissory note in settlement of an account with Bartelt Co. The entry to record this transaction is as follows.

a. Notes Receivable	1,015	1,015
Accounts Receivable		
b. Notes Receivable	1,000	1,000
Accounts Receivable		
c. Notes Receivable	1,000	1,000
Sales Revenue		
d. Notes Receivable	1,030	1,030
Accounts Receivable		

12. (LO 3) Ginter Co. holds Kolar Inc.'s \$10,000, 120-day, 9% note. The entry made by Ginter Co. when the note is collected, assuming no interest has been previously accrued, is:

a. Cash	10,300	10,300
Notes Receivable		
b. Cash	10,000	10,000
Notes Receivable		
c. Accounts Receivable	10,300	10,000
Notes Receivable		
Interest Revenue		300
d. Cash	10,300	10,000
Notes Receivable		
Interest Revenue		300

13. (LO 4) Accounts and notes receivable are reported in the current assets section of the balance sheet at:

- a. cash (net) realizable value.
- b. net book value.
- c. lower-of-cost-or-net realizable value.
- d. invoice cost.

14. (LO 4) Oliveras Company had net credit sales during the year of \$800,000 and cost of goods sold of \$500,000. The balance in accounts receivable at the beginning of the year was \$100,000, and the end of the year it was \$150,000. What were the accounts receivable turnover and the average collection period in days?

- a. 4.0 and 91.3 days.
- b. 5.3 and 68.9 days.
- c. 6.4 and 57 days.
- d. 8.0 and 45.6 days.

Solutions

1. d. Receivables are frequently classified as accounts receivable, notes receivable, and other receivables. The other choices are incorrect because receivables are not frequently classified as (a) company receivables, (b), employee receivables, or (c) general receivables.

2. c. Because payment is received within 10 days of the purchase, the cash received is \$686 $\{[\$1,000 - \$300] - [(\$1,000 - \$300) \times 2\%]\}$. The other choices are incorrect because (a) \$700 does not consider the 2% discount; (b) the amount of the discount is based upon the amount after the return is granted ($\$700 \times 2\%$), not the

amount before the return of merchandise ($\$1,000 \times 2\%$); and (d) there is a correct answer.

3. b. By crediting Allowance for Doubtful Accounts for \$55,000, the new balance will be the required balance of \$60,000. This adjusting entry debits Bad Debt Expense for \$55,000 and credits Allowance for Doubtful Accounts for \$55,000, not (a) \$5,000, (c) \$60,000, or (d) \$65,000.

4. d. By crediting Allowance for Doubtful Accounts for \$65,000, the new balance will be the required balance of \$60,000. This adjusting entry debits Bad Debt Expense for \$65,000 and credits

Allowance for Doubtful Accounts for \$65,000, not (a) \$5,000, (b) \$55,000, or (c) \$60,000.

5. b. Accounts receivable times the percentage expected to default equals \$12,000 ($\$800,000 \times 1.5\%$). Because the balance in Allowance for Doubtful Accounts is presently \$1,000, the adjusting entry debits Bad Debt Expense for \$11,000 ($\$12,000 - \$1,000$) and credits Allowance for Doubtful Accounts for \$11,000, not (a) \$7,000, (c) \$12,000, or (d) \$13,000.

6. d. The accounts written off during the year will result in a debit balance in Allowance for Doubtful Accounts of \$12,000 ($\$30,000 - \$18,000$) at the end of the year. As indicated, 3% of accounts receivable are uncollectible, or \$22,500 ($\$750,000 \times 3\%$). Given a debit balance of \$12,000 in Allowance for Doubtful Accounts at the end of the year, the adjusting entry at the end of the year is a debit to Bad Debt Expense of \$34,500 ($\$22,500 + \$12,000$) and a credit to Allowance for Doubtful Accounts of \$34,500 not (a) \$10,500, (b) \$22,500, or (c) \$30,000.

7. d. Accounts Receivable less the expected uncollectible amount equals the cash realizable value of \$735,000 ($\$800,000 - \$65,000$), not (a) \$685,000, (b) \$750,000, or (c) \$800,000.

8. c. There are three parties, not two, involved in Visa credit card sales: the credit card company, the retailer, and the customer. The other choices are true statements.

9. a. Credit card sales are considered cash sales. Cash is debited \$48,000 for the net amount received ($\$50,000 - \$2,000$ for credit card use fee), and Service Charge Expense is debited \$2,000 for the 4% credit card use fee ($\$50,000 \times 4\%$). The other choices are therefore incorrect.

10. c. A promissory note is a negotiable instrument. The other choices are true statements.

11. b. Notes Receivable is recorded at face value (\$1,000). No interest on the note is recorded until it is earned. Accounts Receivable is credited because no new sales have been made. The other choices are therefore incorrect.

12. d. Cash is debited for its maturity value [$\$10,000 + \text{interest earned } (\$10,000 \times 1/3 \times 9\%)$], Notes Receivable credited for its face value, and Interest Revenue credited for the amount of interest earned. The other choices are therefore incorrect.

13. a. Accounts Receivable is reported in the current assets section of the balance sheet at the gross amount less the allowance for doubtful accounts, not at (b) net book value, (c) lower-of-cost-or-net realizable value, or (d) invoice cost.

14. c. The accounts receivable turnover is 6.4 [$\$800,000 / (\$100,000 + \$150,000 / 2)$]. The average collection period in days is 57 days (365/6.4). The other choices are therefore incorrect.

Practice Brief Exercises

Record basic accounts receivable transactions.

1. (LO 1) Record the following transactions on the books of Gonzalez Co.

- On August 1, Gonzalez Co. sold merchandise on account to Miguel Inc. for \$15,500, terms 1/10, n/30.
- On August 8, Miguel Inc. returned merchandise worth \$3,100 to Gonzalez Co.
- On August 11, Miguel Inc. paid for the merchandise.

Solution

1. a. Accounts Receivable		15,500	
Sales Revenue			15,500
b. Sales Returns and Allowances		3,100	
Accounts Receivable			3,100
c. Cash (\$12,400 – \$124)		12,276	
Sales Discounts ($\$12,400 \times 1\%$)			124
Accounts Receivable (\$15,500 – \$3,100)			12,400

Prepare entry using percentage-of-receivables method.

2. (LO 2) Sanchez Co. uses the percentage-of-receivables basis in 2020 to record bad debt expense. It estimates that 3% of accounts receivable will become uncollectible. Sales revenues are \$900,000 for 2020, and sales returns and allowances are \$50,000 at December 31, 2020. Accounts receivable has a balance of \$139,000, and the allowance for doubtful accounts has a credit balance of \$3,000. Prepare the adjusting entry to record bad debt expense in 2020.

Solution

2. Bad Debt Expense [$(\$139,000 \times 3\%) - \$3,000$]		1,170	
Allowance for Doubtful Accounts			1,170

Prepare entry for notes receivable exchanged for account receivable.

3. (LO 3) On January 20, 2020, Carlos Co. sold merchandise on account to Carson Co. for \$20,000, n/30. On February 19, Carson Co. gave Carlos Co. an 8% promissory note in settlement of this account. Prepare the journal entry to record the sale and the settlement of the account receivable.

Solution

Jan. 20	Accounts Receivable Sales Revenue	20,000	20,000
Feb. 19	Notes Receivable Accounts Receivable	20,000	20,000

Practice Exercises

- 1. (LO 2)** The ledger of Nuro Company at the end of the current year shows Accounts Receivable \$180,000, Sales Revenue \$1,800,000, and Sales Returns and Allowances \$60,000.

Journalize entries to record allowance for doubtful accounts using two different bases.

Instructions

- a. If Nuro uses the direct write-off method to account for uncollectible accounts, journalize the adjusting entry at December 31, assuming Nuro determines that \$2,900 of the Accounts Receivable balance is uncollectible.
- b. If Allowance for Doubtful Accounts has a credit balance of \$4,300 in the trial balance, journalize the adjusting entry at December 31, assuming bad debts are expected to be 10% of accounts receivable.
- c. If Allowance for Doubtful Accounts has a debit balance of \$410 in the trial balance, journalize the adjusting entry at December 31, assuming bad debts are expected to be 6% of accounts receivable.

Solution

1. a. Dec. 31	Bad Debt Expense Accounts Receivable	2,900	2,900
b. Dec. 31	Bad Debt Expense Allowance for Doubtful Accounts $([\$180,000 \times 10\%]) - \$4,300]$	13,700	13,700
c. Dec. 31	Bad Debt Expense Allowance for Doubtful Accounts $([\$180,000 \times 6\%]) + \$410]$	11,210	11,210

- 2. (LO 3)** Sargeant Supply Co. has the following transactions related to notes receivable during the last 2 months of 2020.

Journalize entries for notes receivable transactions.

- Nov. 1 Loaned \$20,000 cash to Mary Hawkins on a 1-year, 12% note.
- Dec. 11 Sold goods to Eminem, Inc., receiving a \$9,000, 90-day, 8% note.
- 16 Received a \$8,000, 6-month, 9% note in exchange for Rick DeLong's outstanding accounts receivable.
- 31 Accrued interest revenue on all notes receivable.

Instructions

- a. Journalize the transactions for Sargeant Supply Co.
- b. Record the collection of the Hawkins note at its maturity in 2021.

Solution

2. a.	2020
Nov. 1 Notes Receivable Cash	20,000 20,000

Dec. 11	Notes Receivable Sales Revenue	9,000	9,000
16	Notes Receivable Accounts Receivable	8,000	8,000
31	Interest Receivable Interest Revenue*	470	470

*Calculation of interest revenue:

$$\begin{array}{ll}
 \text{Hawkins' note:} & \$20,000 \times 12\% \times \frac{2}{12} = \$400 \\
 \text{Eminem's note:} & 9,000 \times 8\% \times \frac{20}{360} = 40 \\
 \text{DeLong's note:} & 8,000 \times 9\% \times \frac{15}{360} = 30 \\
 \text{Total accrued interest} & \underline{\underline{\$470}}
 \end{array}$$

b.

2021

Nov. 1	Cash Interest Receivable Interest Revenue** Notes Receivable	22,400 400 2,000 20,000
--------	---	----------------------------------

**(\$20,000 × 12% × 10/12)

Practice Problem

Prepare entries for various receivables transactions.

(LO 1, 2, 3) The following selected transactions relate to Dylan Company.

- Mar. 1 Sold \$20,000 of merchandise to Potter Company, terms 2/10, n/30.
 11 Received payment in full from Potter Company for balance due on existing accounts receivable.
 12 Accepted Juno Company's \$20,000, 6-month, 12% note for balance due.
 13 Made Dylan Company credit card sales for \$13,200.
 15 Made Visa credit card sales totaling \$6,700. A 3% service fee is charged by Visa.
 Apr. 11 Sold accounts receivable of \$8,000 to Harcot Factor. Harcot Factor assesses a service charge of 2% of the amount of receivables sold.
 13 Received collections of \$8,200 on Dylan Company credit card sales and added finance charges of 1.5% to the remaining balances.
 May 10 Dylan uses the percentage-of-receivables basis to estimate bad debts.
 June 30 Accounts receivable total \$2,000,000. The bad debt percentage is 1% of accounts receivable. At June 30, the balance in the allowance account is \$3,500 before adjustment.
 July 16 One of the accounts receivable written off in May was from J. Simon, who pays the amount due, \$4,000, in full.

Instructions

Prepare the journal entries for the transactions. (Ignore entries for cost of goods sold.)

Solution

Mar. 1	Accounts Receivable Sales Revenue (To record sales on account)	20,000	20,000
11	Cash Sales Discounts (2% × \$20,000) Accounts Receivable (To record collection of accounts receivable)	19,600 400 20,000	
12	Notes Receivable Accounts Receivable (To record acceptance of Juno Company note)	20,000	20,000
13	Accounts Receivable Sales Revenue (To record company credit card sales)	13,200	13,200

15	Cash Service Charge Expense ($3\% \times \$6,700$) Sales Revenue (To record credit card sales)	6,499 201	6,700
Apr. 11	Cash Service Charge Expense ($2\% \times \$8,000$) Accounts Receivable (To record sale of receivables to factor)	7,840 160	8,000
13	Cash Accounts Receivable (To record collection of accounts receivable) Accounts Receivable [$(\$13,200 - \$8,200) \times 1.5\%$] Interest Revenue (To record interest on amount due)	8,200 75	8,200 75
May 10	Allowance for Doubtful Accounts Accounts Receivable (To record write-off of accounts receivable)	16,000	16,000
June 30	Bad Debt Expense [$(\$2,000,000 \times 1\%) - \$3,500$] Allowance for Doubtful Accounts (To record estimate of uncollectible accounts)	16,500	16,500
July 16	Accounts Receivable Allowance for Doubtful Accounts (To reverse write-off of accounts receivable) Cash Accounts Receivable (To record collection of accounts receivable)	4,000 4,000	4,000 4,000

WileyPLUS

Brief Exercises, Exercises, DO IT! Exercises, Problems, and many additional resources are available for practice in WileyPLUS.

Questions

- What is the difference between an account receivable and a note receivable?
- What are some common types of receivables other than accounts receivable and notes receivable?
- Texaco Oil Company** issues its own credit cards. Assume that Texaco charges you \$40 interest on an unpaid balance. Prepare the journal entry that Texaco makes to record this revenue.
- What are the essential features of the allowance method of accounting for bad debts?
- Roger Holloway cannot understand why cash realizable value does not decrease when an uncollectible account is written off under the allowance method. Clarify this point for Roger.
- What types of receivables does **Apple** report on its balance sheet? Does it use the allowance method or the direct write-off method to account for uncollectibles?
- Borke Company has a credit balance of \$3,000 in Allowance for Doubtful Accounts before adjustment. The total estimated uncollectibles under the percentage-of-receivables basis is \$5,800. Prepare the adjusting entry to record bad debt expense.
- How are bad debts accounted for under the direct write-off method? What are the disadvantages of this method?
- Regina Golden, the vice president of sales for Tropical Pools and Spas, wants the company's credit department to be less restrictive in granting credit. "How can we sell anything when you guys won't approve anybody?" she asks. Discuss the pros and cons of easy credit. What are the accounting implications?
- JCPenney Company** accepts both its own credit cards and national credit cards. What are the advantages of accepting both types of cards?

11. An article recently appeared in the *Wall Street Journal* indicating that companies are selling their receivables at a record rate. Why are companies selling their receivables?

12. Westside Textiles decides to sell \$800,000 of its accounts receivable to First Factors Inc. First Factors assesses a service charge of 3% of the amount of receivables sold. Prepare the journal entry that Westside Textiles makes to record this sale.

13. Your roommate is uncertain about the advantages of a promissory note. Compare the advantages of a note receivable with those of an account receivable.

14. How may the maturity date of a promissory note be stated?

15. Indicate the maturity date of each of the following promissory notes:

Date of Note	Terms
a. March 13	one year after date of note
b. May 4	3 months after date
c. June 20	30 days after date
d. July 1	60 days after date

16. Compute the missing amounts for each of the following notes.

Principal	Annual Interest Rate	Time	Total Interest
a. ?	9%	120 days	\$ 450
b. \$30,000	10%	3 years	?
c. \$60,000	?	5 months	\$1,500
d. \$45,000	8%	?	\$1,200

17. Jana Company dishonors a note at maturity. What are the options available to the lender?

18. **General Motors Corporation** has accounts receivable and notes receivable. How should the receivables be reported on the balance sheet?

19. The accounts receivable turnover is 8.14, and average net receivables during the period are \$400,000. What is the amount of net credit sales for the period?

20. What percentage does **Apple's** 2015 allowance for doubtful accounts represent as a percentage of its gross receivables?

Brief Exercises

Identify different types of receivables.

BE9.1 (LO 1) Presented below are three receivables transactions. Indicate whether these receivables are reported as accounts receivable, notes receivable, or other receivables on a balance sheet.

- a. Sold merchandise on account for \$64,000 to a customer.
- b. Received a promissory note of \$57,000 for services performed.
- c. Advanced \$10,000 to an employee.

Record basic accounts receivable transactions.

BE9.2 (LO 1) Record the following transactions on the books of RAS Co.

- a. On July 1, RAS Co. sold merchandise on account to Waegelein Inc. for \$17,200, terms 2/10, n/30.
- b. On July 8, Waegelein Inc. returned merchandise worth \$3,800 to RAS Co.
- c. On July 11, Waegelein Inc. paid for the merchandise.

Prepare entry for allowance method and partial balance sheet.

BE9.3 (LO 2, 4) Financial Statement During its first year of operations, Gavin Company had credit sales of \$3,000,000; \$600,000 remained uncollected at year-end. The credit manager estimates that \$31,000 of these receivables will become uncollectible.

- a. Prepare the journal entry to record the estimated uncollectibles.
- b. Prepare the current assets section of the balance sheet for Gavin Company. Assume that in addition to the receivables it has cash of \$90,000, inventory of \$130,000, and prepaid insurance of \$7,500.

Prepare entry for write-off; determine cash realizable value.

BE9.4 (LO 2) At the end of 2020, Carpenter Co. has accounts receivable of \$700,000 and an allowance for doubtful accounts of \$54,000. On January 24, 2021, the company learns that its receivable from Megan Gray is not collectible, and management authorizes a write-off of \$6,200.

- a. Prepare the journal entry to record the write-off.
- b. What is the cash realizable value of the accounts receivable (1) before the write-off and (2) after the write-off?

Prepare entries for collection of bad debt write-off.

BE9.5 (LO 2) Assume the same information as BE9.4. On March 4, 2021, Carpenter Co. receives payment of \$6,200 in full from Megan Gray. Prepare the journal entries to record this transaction.

Prepare entry using percentage-of-receivables method.

BE9.6 (LO 2) Kingston Co. uses the percentage-of-receivables basis to record bad debt expense. It estimates that 1% of accounts receivable will become uncollectible. Accounts receivable are \$420,000 at the end of the year, and the allowance for doubtful accounts has a credit balance of \$1,500.

- a. Prepare the adjusting journal entry to record bad debt expense for the year.
- b. If the allowance for doubtful accounts had a debit balance of \$800 instead of a credit balance of \$1,500, determine the amount to be reported for bad debt expense.

BE9.7 (LO 2) Presented below are two independent transactions.

- Tony's Restaurant accepted a Visa card in payment of a \$175 lunch bill. The bank charges a 4% fee. What entry should Tony's make?
- Larkin Company sold its accounts receivable of \$60,000. What entry should Larkin make, given a service charge of 3% on the amount of receivables sold?

Prepare entries to dispose of accounts receivable.

BE9.8 (LO 3) Compute interest and find the maturity date for the following notes.

Compute interest and determine maturity dates on notes.

	Date of Note	Principal	Interest Rate (%)	Terms
a.	June 10	\$80,000	6%	60 days
b.	July 14	\$64,000	7%	90 days
c.	April 27	\$12,000	8%	75 days

BE9.9 (LO 3) Presented below are data on three promissory notes. Determine the missing amounts.

Determine maturity dates and compute interest and rates on notes.

	Date of Note	Maturity Date	Principal	Annual Interest Rate	Total Interest
	Terms				
a.	April 1	60 days	?	\$600,000	6%
b.	July 2	30 days	?	90,000	?
c.	March 7	6 months	?	120,000	10%

BE9.10 (LO 3) On January 10, 2020, Perez Co. sold merchandise on account to Robertsen Co. for \$15,600, n/30. On February 9, Robertsen Co. gave Perez Co. a 10% promissory note in settlement of this account. Prepare the journal entry to record the sale and the settlement of the account receivable. (Omit cost of goods sold entries.)

Prepare entry for notes receivable exchanged for account receivable.

BE9.11 (LO 2, 4) Financial Statement During its first year of operations, Fertig Company had credit sales of \$3,000,000, of which \$400,000 remained uncollected at year-end. The credit manager estimates that \$18,000 of these receivables will become uncollectible.

Prepare entry for estimated uncollectibles and classifications, and compute ratios.

- Prepare the journal entry to record the estimated uncollectibles. (Assume an unadjusted balance of zero in Allowance for Doubtful Accounts.)
- Prepare the current assets section of the balance sheet for Fertig Company, assuming that in addition to the receivables it has cash of \$90,000, merchandise inventory of \$180,000, and supplies of \$13,000.
- Calculate the accounts receivable turnover and average collection period. Assume that average net accounts receivable were \$300,000. Explain what these measures tell us.

BE9.12 (LO 4) The financial statements of **Minnesota Mining and Manufacturing Company (3M)** report net sales of \$20.0 billion. Accounts receivable (net) are \$2.7 billion at the beginning of the year and \$2.8 billion at the end of the year. Compute 3M's accounts receivable turnover. Compute 3M's average collection period for accounts receivable in days.

Compute ratios to analyze receivables.

DO IT! Exercises

DO IT! 9.1 (LO 1) On March 1, Lincoln sold merchandise on account to Amelia Company for \$28,000, terms 1/10, net 45. On March 6, Amelia returns merchandise with a sales price of \$1,000. On March 11, Lincoln receives payment from Amelia for the balance due. Prepare journal entries to record the March transactions on Lincoln's books. (You may ignore cost of goods sold entries and explanations.)

Prepare entries to recognize accounts receivable.

DO IT! 9.2a (LO 2) Gonzalez Company has been in business several years. At the end of the current year, the ledger shows the following:

Prepare entry for uncollectible accounts.

Accounts Receivable	\$ 310,000 Dr.
Sales Revenue	2,200,000 Cr.
Allowance for Doubtful Accounts	6,100 Cr.

Bad debts are estimated to be 5% of accounts receivable. Prepare the entry to adjust Allowance for Doubtful Accounts.

Prepare entry for factored accounts.

DO IT! 9.2b (LO 2) Neumann Distributors is a growing company whose ability to raise capital has not been growing as quickly as its expanding assets and sales. Neumann's local banker has indicated that the company cannot increase its borrowing for the foreseeable future. Neumann's suppliers are demanding payment for goods acquired within 30 days of the invoice date, but Neumann's customers are slow in paying for their purchases (60–90 days). As a result, Neumann has a cash flow problem.

Neumann needs \$160,000 to cover next Friday's payroll. Its balance of outstanding accounts receivable totals \$800,000. To alleviate this cash crunch, the company sells \$170,000 of its receivables. Record the entry that Neumann would make. (Assume a 2% service charge.)

Compute maturity date and interest on note.

DO IT! 9.3 (LO 3) Gentry Wholesalers accepts from Benton Stores a \$6,200, 4-month, 9% note dated May 31 in settlement of Benton's overdue account. (a) What is the maturity date of the note? (b) What is the interest payable at the maturity date?

Compute ratios for receivables.

DO IT! 9.4 (LO 4) In 2020, Wainwright Company has net credit sales of \$1,300,000 for the year. It had a beginning accounts receivable (net) balance of \$101,000 and an ending accounts receivable (net) balance of \$107,000. Compute Wainwright Company's (a) accounts receivable turnover and (b) average collection period in days.

Exercises

Prepare entries for recognizing accounts receivable.

E9.1 (LO 1) On January 6, Jacob Co. sells merchandise on account to Harley Inc. for \$9,200, terms 1/10, n/30. On January 16, Harley pays the amount due.

Instructions

Prepare the entries on Jacob Co.'s books to record the sale and related collection. (Omit cost of goods sold entries.)

Journalize entries related to accounts receivable.

E9.2 (LO 1) Presented below are selected transactions of Molina Company. Molina sells in large quantities to other companies and also sells its product in a small retail outlet.

- | | |
|---------|---|
| March 1 | Sold merchandise on account to Dodson Company for \$5,000, terms 2/10, n/30. |
| 3 | Dodson Company returned merchandise worth \$500 to Molina. |
| 9 | Molina collected the amount due from Dodson Company from the March 1 sale. |
| 15 | Molina sold merchandise for \$400 in its retail outlet. The customer used his Molina credit card. |
| 31 | Molina added 1.5% monthly interest to the customer's credit card balance. |

Instructions

Prepare journal entries for the transactions above. (Ignore cost of goods sold entries and explanations.)

Journalize entries for recognizing accounts receivable.

E9.3 (LO 1) Presented below are two independent situations.

Instructions

- On January 6, Brumbaugh Co. sells merchandise on account to Pryor Inc. for \$7,000, terms 2/10, n/30. On January 16, Pryor Inc. pays the amount due. Prepare the entries on Brumbaugh's books to record the sale and related collection. (Omit cost of goods sold entries.)
- On January 10, Andrew Farley uses his Paltrow Co. credit card to purchase merchandise from Paltrow Co. for \$9,000. On February 10, Farley is billed for the amount due of \$9,000. On February 12, Farley pays \$5,000 on the balance due. On March 10, Farley is billed for the amount due, including interest at 1% per month on the unpaid balance as of February 12. Prepare the entries on Paltrow Co.'s books related to the transactions that occurred on January 10, February 12, and March 10. (Omit cost of goods sold entries.)

Journalize receivables transactions.

E9.4 (LO 1, 2) At the beginning of the current period, Rose Corp. had balances in Accounts Receivable of \$200,000 and in Allowance for Doubtful Accounts of \$9,000 (credit). During the period, it had net credit sales of \$800,000 and collections of \$763,000. It wrote off as uncollectible accounts receivable of \$7,300. However, a \$3,100 account previously written off as uncollectible was recovered before the end of the current period. Uncollectible accounts are estimated to total \$25,000 at the end of the period. (Omit cost of goods sold entries.)

Instructions

- a. Prepare the entries to record sales and collections during the period.
- b. Prepare the entry to record the write-off of uncollectible accounts during the period.
- c. Prepare the entries to record the recovery of the uncollectible account during the period.
- d. Prepare the entry to record bad debt expense for the period.
- e. Determine the ending balances in Accounts Receivable and Allowance for Doubtful Accounts.
- f. What is the net realizable value of the receivables at the end of the period?

E9.5 (LO 2) The ledger of Costello Company at the end of the current year shows Accounts Receivable \$110,000, Sales Revenue \$840,000, and Sales Returns and Allowances \$20,000.

Journalize entries to record allowance for doubtful accounts using two different bases.

Instructions

- a. If Costello uses the direct write-off method to account for uncollectible accounts, journalize the adjusting entry at December 31, assuming Costello determines that L. Dole's \$1,400 balance is uncollectible.
- b. If Allowance for Doubtful Accounts has a credit balance of \$2,100 in the trial balance, journalize the adjusting entry at December 31, assuming bad debts are expected to be 10% of accounts receivable.
- c. If Allowance for Doubtful Accounts has a debit balance of \$200 in the trial balance, journalize the adjusting entry at December 31, assuming bad debts are expected to be 6% of accounts receivable.

E9.6 (LO 2) Godfreid Company has accounts receivable of \$95,400 at March 31, 2020. Credit terms are 2/10, n/30. At March 31, 2020, there is a \$2,100 credit balance in Allowance for Doubtful Accounts prior to adjustment. The company uses the percentage-of-receivables basis for estimating uncollectible accounts. The company's estimates of bad debts are as shown below.

Determine bad debt expense, and prepare the adjusting entry.

Age of Accounts	Balance, March 31		Estimated Percentage Uncollectible
	2020	2019	
Current	\$65,000	\$75,000	2%
1–30 days past due	12,900	8,000	5
31–90 days past due	10,100	2,400	30
Over 90 days past due	7,400	1,100	50
	<u>\$95,400</u>	<u>\$86,500</u>	

Instructions

- a. Determine the total estimated uncollectibles.
- b. Prepare the adjusting entry at March 31, 2020, to record bad debt expense.
- c. Discuss the implications of the changes in the aging schedule from 2019 to 2020.

E9.7 (LO 2) At December 31, 2019, Blanda Company had a credit balance of \$15,000 in Allowance for Doubtful Accounts. During 2020, Blanda wrote off accounts totaling \$11,000. One of those accounts (\$1,800) was later collected. At December 31, 2020, an aging schedule indicated that the balance in Allowance for Doubtful Accounts should be \$19,000.

Journalize write-off and recovery.

Instructions

Prepare journal entries to record the 2020 transactions of Blanda Company.

E9.8 (LO 2) On December 31, 2020, Ling Co. estimated that 2% of its net accounts receivable of \$450,000 will become uncollectible. The company recorded this amount as an addition to Allowance for Doubtful Accounts. The allowance account had a zero balance before adjustment at December 31, 2020. On May 11, 2021, Ling Co. determined that the Jeff Shoemaker account was uncollectible and wrote off \$1,100. On June 12, 2021, Shoemaker paid the amount previously written off.

Journalize percentage-of-receivables basis, write-off, recovery.

Instructions

Prepare the journal entries on December 31, 2020, May 11, 2021, and June 12, 2021.

Journalize entries for the sale of accounts receivable.

E9.9 (LO 2) Presented below are two independent situations.

Instructions

- On March 3, Kitselman Appliances sells \$650,000 of its receivables to Ervay Factors Inc. Ervay Factors assesses a finance charge of 3% of the amount of receivables sold. Prepare the entry on Kitselman Appliances' books to record the sale of the receivables.
- On May 10, Fillmore Company sold merchandise for \$3,000 and accepted the customer's America Bank MasterCard. America Bank charges a 4% service charge for credit card sales. Prepare the entry on Fillmore Company's books to record the sale of merchandise.

Journalize entries for credit card sales.

E9.10 (LO 2) Presented below are two independent situations.

Instructions

- On April 2, Jennifer Elston uses her **JCPenney Company** credit card to purchase merchandise from a JCPenney store for \$1,500. On May 1, Elston is billed for the \$1,500 amount due. Elston pays \$500 on the balance due on May 3. Elston receives a bill dated June 1 for the amount due, including interest at 1.0% per month on the unpaid balance as of May 3. Prepare the entries on JCPenney Co.'s books related to the transactions that occurred on April 2, May 3, and June 1.
- On July 4, Spangler's Restaurant accepts a Visa card for a \$200 dinner bill. Visa charges a 2% service fee. Prepare the entry on Spangler's books related to this transaction.

Journalize credit card sales.

E9.11 (LO 2) Colaw Stores accepts both its own and national credit cards. During the year, the following selected summary transactions occurred.

- | | |
|---------|---|
| Jan. 15 | Made Colaw credit card sales totaling \$18,000. (There were no balances prior to January 15.) |
| 20 | Made Visa credit card sales (service charge fee 2%) totaling \$4,500. |
| Feb. 10 | Collected \$10,000 on Colaw credit card sales. |
| 15 | Added finance charges of 1.5% to Colaw credit card account balances. |

Instructions

Journalize the transactions for Colaw Stores.

Journalize entries for notes receivable transactions.

E9.12 (LO 3) Elburn Supply Co. has the following transactions related to notes receivable during the last 2 months of 2020. The company does not make entries to accrue interest except at December 31.

- | | |
|---------|--|
| Nov. 1 | Loaned \$30,000 cash to Manny Lopez on a 12 month, 10% note. |
| Dec. 11 | Sold goods to Ralph Kremer, Inc., receiving a \$6,750, 90-day, 8% note. |
| 16 | Received a \$4,000, 180 day, 9% note in exchange for Joe Fornetti's outstanding accounts receivable. |
| 31 | Accrued interest revenue on all notes receivable. |

Instructions

- Journalize the transactions for Elburn Supply Co. (Ignore entries for cost of goods sold.)
- Record the collection of the Lopez note at its maturity in 2021.

Journalize entries for notes receivable.

E9.13 (LO 3) Record the following transactions for Redecker Co. in the general journal.

2020

- | | |
|---------|--|
| May 1 | Received a \$9,000, 12-month, 10% note in exchange for Mark Chamber's outstanding accounts receivable. |
| Dec. 31 | Accrued interest on the Chamber note. |
| Dec. 31 | Closed the interest revenue account. |

2021

- | | |
|-------|---|
| May 1 | Received principal plus interest on the Chamber note. (No interest has been accrued in 2021.) |
|-------|---|

Prepare entries for note receivable transactions.

E9.14 (LO 3) Vandiver Company had the following select transactions.

- | | |
|---------------|--|
| Apr. 1, 2020 | Accepted Goodwin Company's 12-month, 6% note in settlement of a \$30,000 account receivable. |
| July 1, 2020 | Loaned \$25,000 cash to Thomas Slocombe on a 9-month, 10% note. |
| Dec. 31, 2020 | Accrued interest on all notes receivable. |
| Apr. 1, 2021 | Received principal plus interest on the Goodwin note. |
| Apr. 1, 2021 | Thomas Slocombe dishonored its note; Vandiver expects it will eventually collect. |

Instructions

Prepare journal entries to record the transactions. Vandiver prepares adjusting entries once a year on December 31.

E9.15 (LO 3) On May 2, McLain Company lends \$9,000 to Chang, Inc., issuing a 6-month, 7% note. At the maturity date, November 2, Chang indicates that it cannot pay.

Journalize entries for dishonor of notes receivable.

Instructions

- Prepare the entry to record the issuance of the note.
- Prepare the entry to record the dishonor of the note, assuming that McLain Company expects collection will occur.
- Prepare the entry to record the dishonor of the note, assuming that McLain Company does not expect collection in the future.

E9.16 (LO 4) Eileen Corp. had the following balances in receivable accounts at October 31, 2020 (in thousands): Allowance for Doubtful Accounts \$52, Accounts Receivable \$2,910, Other Receivables \$189, and Notes Receivable \$1,353.

Prepare a balance sheet presentation of receivables.

Instructions

Prepare the balance sheet presentation of Eileen Corp.'s receivables in good form.

E9.17 (LO 4) Kerwick Company had accounts receivable of \$100,000 on January 1, 2020. The only transactions that affected accounts receivable during 2020 were net credit sales of \$1,000,000, cash collections of \$920,000, and accounts written off of \$30,000.

Compute accounts receivable turnover and average collection period.

Instructions

- Compute the ending balance of accounts receivable.
- Compute the accounts receivable turnover for 2020.
- Compute the average collection period in days.

Problems: Set A

P9.1A (LO 1, 2, 4) At December 31, 2019, House Co. reported the following information on its balance sheet.

Accounts receivable	\$960,000
Less: Allowance for doubtful accounts	80,000

Prepare journal entries related to bad debt expense.

During 2020, the company had the following transactions related to receivables.

1. Sales on account	\$3,700,000
2. Sales returns and allowances	50,000
3. Collections of accounts receivable	2,810,000
4. Write-offs of accounts receivable deemed uncollectible	90,000
5. Recovery of bad debts previously written off as uncollectible	29,000

Instructions

- Prepare the journal entries to record each of these five transactions. Assume that no cash discounts were taken on the collections of accounts receivable.
 - Enter the January 1, 2020, balances in Accounts Receivable and Allowance for Doubtful Accounts, post the entries to the two accounts (use T-accounts), and determine the balances.
 - Prepare the journal entry to record bad debt expense for 2020, assuming that an aging of accounts receivable indicates that expected bad debts are \$115,000.
 - Compute the accounts receivable turnover for 2020 assuming the expected bad debt information provided in (c).
- Accounts receivable
\$1,710,000
ADA \$19,000
 - Bad debt expense \$96,000

Compute bad debt amounts.

P9.2A (LO 2) Writing Information related to Mingenback Company for 2020 is summarized below.

Total credit sales	\$2,500,000
Accounts receivable at December 31	875,000
Bad debts written off	33,000

Instructions

- What amount of bad debt expense will Mingenback Company report if it uses the direct write-off method of accounting for bad debts?
- Assume that Mingenback Company estimates its bad debt expense based on 6% of accounts receivable. What amount of bad debt expense will Mingenback record if it has an Allowance for Doubtful Accounts credit balance of \$3,000?
- Assume the same facts as in (b), except that there is a \$3,000 debit balance in Allowance for Doubtful Accounts. What amount of bad debt expense will Mingenback record?
- What is the weakness of the direct write-off method of reporting bad debt expense?

Journalize entries to record transactions related to bad debts.

P9.3A (LO 2) Presented below is an aging schedule for Halleran Company.

Worksheet								
		Number of Days Past Due						
		Customer	Total	Not Yet Due	1–30	31–60	61–90	Over 90
4	Anders	\$ 22,000			\$10,000	\$12,000		
5	Blake	40,000	\$ 40,000					
6	Coulson	57,000	16,000		6,000		\$35,000	
7	Deleon	34,000						\$34,000
8	Others	132,000	96,000		16,000	14,000		6,000
9		\$285,000	\$152,000		\$32,000	\$26,000	\$35,000	\$40,000
10	Estimated Percentage Uncollectible				3%	6%	13%	25%
11	Total Estimated Bad Debts	\$ 38,610	\$ 4,560		\$ 1,920	\$ 3,380	\$ 8,750	\$20,000
12								

At December 31, 2020, the unadjusted balance in Allowance for Doubtful Accounts is a credit of \$12,000.

Instructions

a. Bad debt expense \$26,610

- Journalize and post the adjusting entry for bad debts at December 31, 2020.
- Journalize and post to the allowance account the following events and transactions in the year 2021.
 - On March 31, a \$1,000 customer balance originating in 2020 is judged uncollectible.
 - On May 31, a check for \$1,000 is received from the customer whose account was written off as uncollectible on March 31.
- Journalize the adjusting entry for bad debts on December 31, 2021, assuming that the unadjusted balance in Allowance for Doubtful Accounts is a debit of \$800 and the aging schedule indicates that total estimated bad debts will be \$31,600.

c. Bad debt expense \$32,400

Journalize transactions related to bad debts.

P9.4A (LO 2) Writing Rigney Inc. uses the allowance method to estimate uncollectible accounts receivable. The company produced the following aging of the accounts receivable at year-end.

		Worksheet					
		Number of Days Outstanding					
		Total	0–30	31–60	61–90	91–120	Over 120
4	Accounts receivable	200,000	77,000	46,000	39,000	23,000	15,000
5	% uncollectible		1%	4%	5%	8%	20%
6	Estimated bad debts						
7							

Instructions

- a. Calculate the total estimated bad debts based on the information provided.
- b. Prepare the year-end adjusting journal entry to record the bad debts using the aged uncollectible accounts receivable determined in (a). Assume the current balance in Allowance for Doubtful Accounts is a \$8,000 debit.
- c. Of the above accounts, \$5,000 is determined to be specifically uncollectible. Prepare the journal entry to write off the uncollectible account.
- d. The company collects \$5,000 subsequently on a specific account that had previously been determined to be uncollectible in (c). Prepare the journal entry(ies) necessary to restore the account and record the cash collection.
- e. Comment on how your answers to (a)–(d) would change if Rigney Inc. used 4% of **total** accounts receivable rather than aging the accounts receivable. What are the advantages to the company of aging the accounts receivable rather than applying a percentage to total accounts receivable?

P9.5A (LO 2) Writing At December 31, 2020, the trial balance of Darby Company contained the following amounts before adjustment.

Journalize entries to record transactions related to bad debts.

	<u>Debit</u>	<u>Credit</u>
Accounts Receivable	\$385,000	
Allowance for Doubtful Accounts		\$ 1,000
Sales Revenue		970,000

Instructions

- a. Based on the information given, which method of accounting for bad debts is Darby Company using—the direct write-off method or the allowance method? How can you tell?
- b. Prepare the adjusting entry at December 31, 2020, for bad debt expense, assuming an aging schedule indicates that \$11,750 of accounts receivable will be uncollectible.
- c. Repeat part (b) assuming that instead of a credit balance there is a \$1,000 debit balance in Allowance for Doubtful Accounts.
- d. During the next month, January 2021, a \$3,000 account receivable is written off as uncollectible. Prepare the journal entry to record the write-off.
- e. Repeat part (d) assuming that Darby uses the direct write-off method instead of the allowance method in accounting for uncollectible accounts receivable.
- f. What type of account is Allowance for Doubtful Accounts? How does it affect how accounts receivable is reported on the balance sheet at the end of the accounting period?

b. \$10,750

P9.6A (LO 1, 2, 3, 4) Financial Statement Milton Company closes its books on its July 31 year-end. The company does not make entries to accrue for interest except at its year-end. On June 30, the Notes Receivable account balance is \$23,800. Notes Receivable includes the following.

Prepare entries for various credit card and notes receivable transactions.

Date	Maker	Face Value	Term	Maturity Date	Interest Rate
April 21	Coote Inc.	\$ 6,000	90 days	July 20	8%
May 25	Brady Co.	7,800	60 days	July 24	10%
June 30	BMG Corp.	10,000	6 months	December 31	6%

During July, the following transactions were completed.

- July 5 Made sales of \$4,500 on Milton credit cards.
- 14 Made sales of \$600 on Visa credit cards. The credit card service charge is 3%.
- 20 Received payment in full from Coote Inc. on the amount due.
- 24 Received payment in full from Brady Co. on the amount due.

Instructions

- a. Journalize the July transactions and the July 31 adjusting entry for accrued interest receivable. (Interest is computed using 360 days; omit cost of goods sold entries.)

- b. A/R bal. \$4,500
 c. Tot. receivables \$14,550
- b. Enter the balances at July 1 in the receivable accounts and post the entries to all of the receivable accounts. (Use T-accounts.)
 c. Show the balance sheet presentation of the receivable accounts at July 31.

Prepare entries for various receivable transactions.

P9.7A (LO 1, 2, 3) On January 1, 2020, Harter Company had Accounts Receivable \$139,000, Notes Receivable \$25,000, and Allowance for Doubtful Accounts \$13,200. The note receivable is from Willingham Company. It is a 4-month, 9% note dated December 31, 2019. Harter Company prepares financial statements annually at December 31. During the year, the following selected transactions occurred.

Jan. 5	Sold \$20,000 of merchandise to Sheldon Company, terms n/15.
20	Accepted Sheldon Company's \$20,000, 3-month, 8% note for balance due.
Feb. 18	Sold \$8,000 of merchandise to Patwary Company and accepted Patwary's \$8,000, 6-month, 9% note for the amount due.
Apr. 20	Collected Sheldon Company note in full.
30	Received payment in full from Willingham Company on the amount due.
May 25	Accepted Potter Inc.'s \$6,000, 3-month, 7% note in settlement of a past-due balance on account.
Aug. 18	Received payment in full from Patwary Company on note due.
25	The Potter Inc. note was dishonored. Potter Inc. is not bankrupt; future payment is anticipated.
Sept. 1	Sold \$12,000 of merchandise to Stanbrough Company and accepted a \$12,000, 6-month, 10% note for the amount due.

Instructions

Journalize the transactions. (Omit cost of goods sold entries.)

Calculate and interpret various ratios.

P9.8A (LO 4) Suppose the amounts presented here are basic financial information (in millions) from the 2020 annual reports of **Nike** and **adidas**.

	Nike	adidas
Sales revenue	\$19,176.1	\$10,381
Allowance for doubtful accounts, beginning	78.4	119
Allowance for doubtful accounts, ending	110.8	124
Accounts receivable balance (gross), beginning	2,873.7	1,743
Accounts receivable balance (gross), ending	2,994.7	1,553

Instructions

Calculate the accounts receivable turnover and average collection period for both companies. Comment on the difference in their collection experiences.

Prepare financial statements.

P9.9A (LO 4) Financial Statement The adjusted trial balance of Gibson Company for the year ended December 31, 2020, is as follows:

	Debit	Credit
Cash	\$ 6,400	
Accounts Receivable	2,700	
Notes Receivable	6,300	
Inventory	10,000	
Equipment	7,500	
Allowance for Doubtful Accounts		\$ 300
Accumulated Depreciation—Equipment		1,000
Notes Payable		1,100
Accounts Payable		600
Common Stock		17,000
Retained Earnings		11,000
Dividends	1,000	
Sales Revenue		13,000
Interest Revenue		100
Cost of Goods Sold	8,000	
Salary and Wages Expense	1,400	
Rent Expense	700	
Bad Debt Expense	60	
Service Charge Expense	40	
	<u><u>\$44,100</u></u>	<u><u>\$44,100</u></u>

Instructions

Prepare a multiple-step income statement, retained earnings statement, and a classified balance sheet. The notes payable is due on January 10, 2021.

Retained earnings \$12,900

Continuing Case**Cookie Creations**

(Note: This is a continuation of the Cookie Creations case from Chapters 1 through 8.)

CC9 One of Natalie's friends, Curtis Lesperance, runs a coffee shop where he sells specialty coffees and prepares and sells muffins and cookies. He is eager to buy one of Natalie's fine European mixers, which would enable him to make larger batches of muffins and cookies. However, Curtis cannot afford to pay for the mixer for at least 30 days. He asks Natalie if she would be willing to sell him the mixer on credit. Natalie comes to you for advice.

Go to WileyPLUS for complete case details and instructions.

Shutterstock

Ethics Case

EC9 The controller of Diaz Co. believes that the yearly allowance for doubtful accounts for Diaz Co. should be 2% of its accounts receivable balance at the end of the year. The president of Diaz Co., nervous that the owners might expect the company to sustain its 10% growth rate, suggests that the controller increase the allowance for doubtful accounts to 4%. The president thinks that the lower net income, which reflects a lower growth rate, will be a more sustainable rate for Diaz Co.

Instructions

- Who are the stakeholders in this case?
- Does the president's request pose an ethical dilemma for the controller?
- Should the controller be concerned with Diaz Co.'s growth rate? Explain your answer.

Comprehensive Accounting Cycle Review

ACR9 Financial Statement Winter Company's balance sheet at December 31, 2019, is presented below.

**Winter Company
Balance Sheet
December 31, 2019**

Cash	\$13,100	Accounts payable	\$ 8,750
Accounts receivable	19,780	Owner's capital	32,730
Allowance for doubtful accounts	(800)		<u> </u>
Inventory	9,400		<u> \$41,480 </u>

During January 2020, the following transactions occurred. Winter uses the perpetual inventory method.

- Jan. 1 Winter accepted a 4-month, 8% note from Merando Company in payment of Merando's \$1,200 account.
- 3 Winter wrote off as uncollectible the accounts of Inwood Corporation (\$450) and Goza Company (\$280).
- 8 Winter purchased \$17,200 of inventory on account.
- 11 Winter sold for \$28,000 on account inventory that cost \$19,600.
- 15 Winter sold inventory that cost \$700 to Mark Lauber for \$1,000. Lauber charged this amount on his Visa First Bank card. The service fee charged Winter by First Bank is 3%.
- 17 Winter collected \$22,900 from customers on account.

- 21 Winter paid \$14,300 on accounts payable.
 24 Winter received payment in full (\$280) from Goza Company on the account written off on January 3.
 27 Winter purchased supplies for \$1,400 cash.
 31 Winter paid other operating expenses, \$3,718.

Adjustment data:

1. Interest is recorded for the month on the note from January 1.
2. Bad debts are expected to be 6% of the January 31, 2020, accounts receivable.
3. A count of supplies on January 31, 2020, reveals that \$560 remains unused.

Instructions

(You may want to set up T-accounts to determine ending balances.)

- a. Prepare journal entries for the transactions listed above and adjusting entries. (Include entries for cost of goods sold using the perpetual system.)
 - b. Prepare an adjusted trial balance at January 31, 2020.
 - c. Prepare an income statement and an owner's equity statement for the month ending January 31, 2020, and a classified balance sheet as of January 31, 2020.
- b. Totals \$74,765**
- c. Tot. assets \$47,473**

Expand Your Critical Thinking

Financial Reporting Problem: RLF Company

CT9.1 RLF Company sells office equipment and supplies to many organizations in the city and surrounding area on contract terms of 2/10, n/30. In the past, over 75% of the credit customers have taken advantage of the discount by paying within 10 days of the invoice date.

The number of customers taking the full 30 days to pay has increased within the last year. Current indications are that less than 60% of the customers are now taking the discount. Bad debts as a percentage of gross credit sales have risen from the 2.5% provided in past years to about 4.5% in the current year.

The company's Finance Committee has requested more information on the collections of accounts receivable. The controller responded to this request with the report reproduced below.

**RLF Company
Accounts Receivable Collections
May 31, 2020**

The fact that some credit accounts will prove uncollectible is normal. Annual bad debt write-offs have been 2.5% of gross credit sales over the past 5 years. During the last fiscal year, this percentage increased to slightly less than 4.5%. The current Accounts Receivable balance is \$1,400,000. The condition of this balance in terms of age and probability of collection is as follows.

Proportion of Total	Age Categories	Probability of Collection
60%	not yet due	98%
22%	less than 30 days past due	96%
9%	30 to 60 days past due	94%
5%	61 to 120 days past due	91%
2½%	121 to 180 days past due	75%
1½%	over 180 days past due	30%

Allowance for Doubtful Accounts had a credit balance of \$29,500 on June 1, 2019. RLF has provided for a monthly bad debt expense accrual during the current fiscal year based on the assumption that 4.5% of gross credit sales will be uncollectible. Total gross credit sales for the 2019–2020 fiscal year amounted to \$2,900,000. Write-offs of bad accounts during the year totaled \$102,000.

Instructions

- a. Prepare an accounts receivable aging schedule for RLF Company using the age categories identified in the controller's report to the Finance Committee showing the following.
 1. The amount of accounts receivable outstanding for each age category and in total.

2. The estimated amount that is uncollectible for each category and in total.
- b. Compute the amount of the year-end adjustment necessary to bring Allowance for Doubtful Accounts to the balance indicated by the age analysis. Then prepare the necessary journal entry to adjust the accounting records.
- c. In a recessionary environment with tight credit and high interest rates:
 1. Identify steps RLF Company might consider to improve the accounts receivable situation.
 2. Then evaluate each step identified in terms of the risks and costs involved.

Comparative Analysis Problem: PepsiCo, Inc. vs. The Coca-Cola Company

CT9.2 **PepsiCo, Inc.**'s financial statements are presented in Appendix B. Financial statements of **The Coca-Cola Company** are presented in Appendix C. The complete annual reports of PepsiCo and Coca-Cola, including the notes to the financial statements, are available at each company's respective website.

Instructions

- a. Based on the information in these financial statements, compute the following 2015 ratios for each company. (Assume all sales are credit sales and that PepsiCo's receivables on its balance sheet are all trade receivables.)
 1. Accounts receivable turnover.
 2. Average collection period for receivables.
- b. What conclusions about managing accounts receivable can you draw from these data?

Comparative Analysis Problem: Amazon.com, Inc. vs. Wal-Mart Stores, Inc.

CT9.3 **Amazon.com, Inc.**'s financial statements are presented in Appendix D. Financial statements of **Wal-Mart Stores, Inc.** are presented in Appendix E. The complete annual reports of Amazon and Wal-Mart, including the notes to the financial statements, are available at each company's respective website.

Instructions

- a. Based on the information in these financial statements, compute the following ratios for each company (for the most recent year shown). (Assume all sales are credit sales.)
 1. Accounts receivable turnover.
 2. Average collection period for receivables.
- b. What conclusions about managing accounts receivable can you draw from these data?

Real-World Focus

CT9.4 Purpose: To learn more about factoring.

Instructions

Search the Internet under "commercial capital factoring" and then go to the corresponding **Commercial Capital LLC** website. Click on **Invoice Factoring** and answer the following questions.

- a. What are some of the benefits of factoring?
- b. What is the range of the percentages of the typical discount rate?
- c. If a company factors its receivables, what percentage of the value of the receivables can it expect to receive from the factor in the form of cash, and how quickly will it receive the cash?

Decision-Making Across the Organization

CT9.5 Carol and Sam Foyle own Campus Fashions. From its inception Campus Fashions has sold merchandise on either a cash or credit basis, but no credit cards have been accepted. During the past several months, the Foyle's have begun to question their sales policies. First, they have lost some sales because of refusing to accept credit cards. Second, representatives of two metropolitan banks have been persuasive in almost convincing them to accept their national credit cards. One bank, City National Bank, has stated that its credit card fee is 4%.

The Foyles decide that they should determine the cost of carrying their own credit sales. From the accounting records of the past 3 years, they accumulate the following data.

	2021	2020	2019
Net credit sales	\$500,000	\$550,000	\$400,000
Collection agency fees for slow-paying customers	2,450	2,500	2,300
Salary of part-time accounts receivable clerk	4,100	4,100	4,100

Uncollectible account expense is 1.6% of net credit sales, billing and mailing costs 0.5%, and credit investigation fee on new customers is 0.15%.

Carol and Sam also determine that the average accounts receivable balance outstanding during the year is 5% of net credit sales. The Foyles estimate that they could earn an average of 8% annually on cash invested in other business opportunities.

Instructions

With the class divided into groups, answer the following.

- Prepare a table showing, for each year, total credit and collection expenses in dollars and as a percentage of net credit sales.
- Determine the net credit and collection expense in dollars and as a percentage of sales after considering the revenue not earned from other investment opportunities.
- Discuss both the financial and nonfinancial factors that are relevant to the decision.

Communication Activity

CT9.6 Jill Epp, a friend of yours, overheard a discussion at work about changes her employer wants to make in accounting for uncollectible accounts. Jill knows little about accounting, and she asks you to help make sense of what she heard. Specifically, she asks you to explain the differences between the percentage-of-receivables and the direct write-off methods for uncollectible accounts.

Instructions

In a letter of one page (or less), explain to Jill the two methods of accounting for uncollectibles. Be sure to discuss differences among these methods.

All About You

CT9.7 Credit card usage in the United States is substantial. Many startup companies use credit cards as a way to help meet short-term financial needs. The most common forms of debt for startups are use of credit cards and loans from relatives.

Suppose that you start up Brothers Sandwich Shop. You invested your savings of \$20,000 and borrowed \$70,000 from your relatives. Although sales in the first few months are good, you see that you may not have sufficient cash to pay expenses and maintain your inventory at acceptable levels, at least in the short term. You decide you may need to use one or more credit cards to fund the possible cash shortfall.

Instructions

- Go to the Internet and find two sources that provide insight into how to compare credit card terms.
- Develop a list, in descending order of importance, as to what features are most important to you in selecting a credit card for your business.
- Examine the features of your present credit card. (If you do not have a credit card, select a likely one online for this exercise.) Given your analysis above, what are the three major disadvantages of your present credit card?

FASB Codification Activity

CT9.8 If your school has a subscription to the FASB Codification, log in and prepare responses to the following.

- How are receivables defined in the Codification?
- What are the conditions under which losses from uncollectible receivables (Bad Debt Expense) should be reported?

A Look at IFRS

LEARNING OBJECTIVE 5

Compare the accounting for receivables under GAAP and IFRS.

The basic accounting and reporting issues related to the recognition, measurement, and disposition of receivables are essentially the same between IFRS and GAAP.

Key Points

Following are the key similarities and differences between GAAP and IFRS as related to the accounting for receivables.

Similarities

- The recording of receivables, recognition of sales returns and allowances and sales discounts, and the allowance method to record bad debts are the same between IFRS and GAAP.
- Both IFRS and GAAP often use the term impairment to indicate that a receivable or a percentage of receivables may not be collected.
- The FASB and IASB have worked to implement fair value measurement (the amount they currently could be sold for) for financial instruments, such as receivables. Both Boards have faced bitter opposition from various factions.

Differences

- Although IFRS implies that receivables with different characteristics should be reported separately, there is no standard that mandates this segregation.
- IFRS and GAAP differ in the criteria used to determine how to record a factoring transaction. IFRS uses a combination approach focused on risks and rewards and loss of control. GAAP uses loss of control as the primary criterion. In addition, IFRS permits partial derecognition of receivables; GAAP does not.

Looking to the Future

The question of recording fair values for financial instruments will continue to be an important issue to resolve as the Boards work toward convergence. Both the IASB and the FASB have indicated that they believe that financial statements would be more transparent and understandable if companies recorded and reported all financial instruments at fair value. That said, in *IFRS 9*, which was issued in 2009, the IASB created a split model, where some financial instruments are recorded at fair value, but other financial assets, such as loans and receivables, can be accounted for at amortized cost if certain criteria are met. Critics say that this can result in two companies with identical securities accounting for those securities in different ways. A proposal by the FASB would require that practically all equity instruments be reported at fair value, and that debt instruments may or may not be reported at fair value depending on whether certain criteria are met.

IFRS Practice

IFRS Self-Test Questions

1. Which of the following statements is **false**?
 - a. Receivables include equity securities purchased by the company.
 - b. Receivables include credit card receivables.
 - c. Receivables include amounts owed by employees as a result of company loans to employees.
 - d. Receivables include amounts resulting from transactions with customers.
 2. In recording a factoring transaction:
 - a. IFRS focuses on loss of control.
- b. GAAP focuses on loss of control and risks and rewards.**
 - c. IFRS and GAAP allow partial derecognition.**
 - d. IFRS allows partial derecognition.**
3. Under IFRS:
 - a. the entry to record estimated uncollected accounts is the same as GAAP.
 - b. it is always acceptable to use the direct write-off method.
 - c. all financial instruments are recorded at fair value.
 - d. None of the above.

International Financial Reporting Problem: Louis Vuitton

IFRS9.1 The financial statements of **Louis Vuitton** are presented in Appendix F. The complete annual report, including the notes to its financial statements, is available at the company's website.

Instructions

Use the company's annual report to answer the following questions.

- a. What is the accounting policy related to accounting for trade accounts receivable?
- b. According to the notes to the financial statements, what accounted for the difference between gross trade accounts receivable and net accounts receivable?
- c. According to the notes to the financial statements, what was the major reason why the balance in receivables increased relative to the previous year?
- d. Using information in the notes to the financial statements, determine what percentage the provision for impairment of receivables was as a percentage of total trade receivables for 2015 and 2014. How did the ratio change from 2014 to 2015, and what does this suggest about the company's receivables?

Answers to IFRS Self-Test Questions

Plant Assets, Natural Resources, and Intangible Assets

Chapter Preview

The accounting for long-term assets has important implications for a company's reported results. In this chapter, we explain the application of the historical cost principle of accounting to property, plant, and equipment, such as **Rent-A-Wreck** vehicles, as well as to natural resources and intangible assets, such as the "Rent-A-Wreck" trademark. We also describe the methods that companies may use to allocate an asset's cost over its useful life. In addition, we discuss the accounting for expenditures incurred during the useful life of assets, such as the cost of replacing tires and brake pads on rental cars.

Feature Story

How Much for a Ride to the Beach?

It's spring break. Your plane has landed, you've finally found your bags, and you're dying to hit the beach—but first you need a “vehicular unit” to get you there. As you turn away from baggage claim, you see a long row of rental agency booths. Many

are names that you know—**Hertz**, **Avis**, and **Budget**. But a booth at the far end catches your eye—**Rent-A-Wreck**. Now there's a company making a clear statement!

Any company that relies on equipment to generate revenues must make decisions about what kind of equipment to buy, how long to keep it, and how vigorously to maintain it. Rent-A-Wreck has decided to rent used rather than new cars and trucks. It rents these vehicles across the United States,

Europe, and Asia. While the big-name agencies push vehicles with that “new car smell,” Rent-A-Wreck competes on price.

Rent-A-Wreck’s message is simple: Rent a used car and save some cash. It’s not a message that appeals to everyone. If you’re a marketing executive wanting to impress a big client, you probably don’t want to pull up in a Rent-A-Wreck car. But if you want to get from point A to point B for the minimum cash per mile, then Rent-A-Wreck is playing your tune. The company’s message seems to be getting across to the right clientele. Revenues have increased significantly.

When you rent a car from Rent-A-Wreck, you are renting from an independent businessperson. This owner has paid a “franchise fee” for the right to use the Rent-A-Wreck name. In order to gain a franchise, he or she must meet financial and other criteria, and must agree to run the rental agency according to rules prescribed by Rent-A-Wreck. Some of these rules require that each franchise maintain its cars in a reasonable fashion. This ensures that, though you won’t be cruising down Daytona Beach’s Atlantic Avenue in a Mercedes convertible, you can be reasonably assured that you won’t be calling a tow truck.

Plant Asset Expenditures

LEARNING OBJECTIVE 1

Explain the accounting for plant asset expenditures.

Plant assets are resources that have three characteristics. They have a physical substance (a definite size and shape), are used in the operations of a business, and are not intended for sale to customers. They are also called **property, plant, and equipment; plant and equipment;**

and **fixed assets**. These assets are expected to be of use to the company for a number of years. Except for land, plant assets decline in service potential over their useful lives.

Because plant assets play a key role in ongoing operations, companies keep plant assets in good operating condition. They also replace worn-out or outdated plant assets, and expand productive resources as needed. Many companies have substantial investments in plant assets. **Illustration 10.1** shows the percentages of plant assets in relation to total assets of companies in a number of industries.

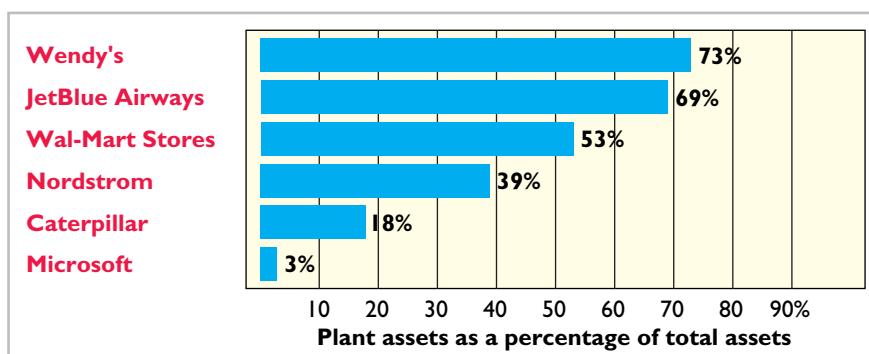

ILLUSTRATION 10.1

Percentages of plant assets in relation to total assets

Determining the Cost of Plant Assets

The historical cost principle requires that companies record plant assets at cost. Thus, **Rent-A-Wreck** records its vehicles at cost. **Cost consists of all expenditures necessary to acquire the asset and make it ready for its intended use.** For example, the cost of factory machinery includes the purchase price, freight costs paid by the purchaser, and installation costs. Once cost is established, the company uses that amount as the basis of accounting for the plant asset over its useful life.

In the following sections, we explain the application of the historical cost principle to each of the major classes of plant assets.

Land

Companies often use **land** as a building site for a manufacturing plant or office building. The cost of land includes (1) the cash purchase price, (2) closing costs such as title and attorney's fees, (3) real estate brokers' commissions, and (4) accrued property taxes and other liens assumed by the purchaser. For example, if the cash price is \$50,000 and the purchaser agrees to pay accrued taxes of \$5,000, the cost of the land is \$55,000.

Companies record as debits (increases) to the Land account all necessary costs incurred to make land **ready for its intended use** (see **Helpful Hint**). When a company acquires vacant land, these costs include expenditures for clearing, draining, filling, and grading. Sometimes the land has a building on it that must be removed before construction of a new building. In this case, the company debits to the Land account all demolition and removal costs, less any proceeds from salvaged materials.

To illustrate, assume that Hayes Company acquires real estate at a cash cost of \$100,000. The property contains an old warehouse that is razed at a net cost of \$6,000 (\$7,500 in costs less \$1,500 proceeds from salvaged materials). Additional expenditures are the attorney's fee, \$1,000, and the real estate broker's commission, \$8,000. The cost of the land is \$115,000, computed as shown in **Illustration 10.2**.

HELPFUL HINT

Management's intended use is important in applying the historical cost principle.

<u>Land</u>	
Cash price of property	\$100,000
Net removal cost of warehouse (\$7,500 – \$1,500)	6,000
Attorney's fee	1,000
Real estate broker's commission	8,000
Cost of land	\$115,000

ILLUSTRATION 10.2

Computation of cost of land

A	=	L	+	OE
+115,000				
-115,000				
Cash Flows				
-115,000				

Cash Flows 

Hayes makes the following entry to record the acquisition of the land.

Land	115,000	
Cash		115,000
(To record purchase of land)		

Land Improvements

Land improvements are structural additions with limited lives that are made to land. Examples are driveways, parking lots, fences, landscaping, and underground sprinklers. The cost of land improvements includes all expenditures necessary to make the improvements ready for their intended use. For example, the cost of a new parking lot for **Home Depot** includes the amount paid for paving, fencing, and lighting. Thus, Home Depot debits to Land Improvements the total of all of these costs.

Land improvements have limited useful lives, and their maintenance and replacement are the responsibility of the company. As a result, companies expense (depreciate) the cost of land improvements over their useful lives.

Buildings

Buildings are facilities used in operations, such as stores, offices, factories, warehouses, and airplane hangars. Companies debit to the Buildings account all necessary expenditures related to the purchase or construction of a building. When a building is **purchased**, such costs include the purchase price, closing costs (attorney's fees, title insurance, etc.), and real estate broker's commission. Costs to make the building ready for its intended use include expenditures for remodeling and replacing or repairing the roof, floors, electrical wiring, and plumbing. When a new building is **constructed**, its cost consists of the contract price plus payments for architects' fees, building permits, and excavation costs.

In addition, companies charge certain interest costs to the Buildings account. Interest costs incurred to finance the project are included in the cost of the building when a significant period of time is required to get the building ready for use. In these circumstances, interest costs are considered as necessary as materials and labor. However, the inclusion of interest costs in the cost of a constructed building is **limited to interest costs incurred during the construction period**. When construction has been completed, the company records subsequent interest payments on funds borrowed to finance the construction as debits (increases) to Interest Expense.

Equipment

Equipment includes assets used in operations, such as store check-out counters, office furniture, factory machinery, delivery trucks, and airplanes. The cost of equipment, such as **Rent-A-Wreck** vehicles, consists of the cash purchase price, sales taxes, freight charges, and insurance during transit paid by the purchaser. It also includes expenditures required in assembling, installing, and testing the unit. However, Rent-A-Wreck does not include motor vehicle licenses and accident insurance on company vehicles in the cost of equipment. These costs represent **annual recurring expenditures and do not benefit future periods**. Thus, they are treated as **expenses** as they are incurred.

To illustrate, assume Merten Company purchases factory machinery at a cash price of \$50,000. Related expenditures are for sales taxes \$3,000, insurance during shipping \$500, and installation and testing \$1,000. The cost of the factory machinery is \$54,500, as computed in **Illustration 10.3**.

ILLUSTRATION 10.3

Computation of cost of factory machinery

Factory Machinery

Cash price	\$50,000
Sales taxes	3,000
Insurance during shipping	500
Installation and testing	1,000
Cost of factory machinery	\$54,500

Merten makes the following summary entry to record the purchase and related expenditures.

Equipment	54,500	
Cash		54,500
(To record purchase of factory machinery)		

A	=	L	+	OE
		+54,500		
		-54,500		
Cash Flows				
		-54,500		

For another example, assume that Lenard Company purchases a delivery truck at a cash price of \$22,000. Related expenditures consist of sales taxes \$1,320, painting and lettering \$500, motor vehicle license \$80, and a three-year accident insurance policy \$1,600. The cost of the delivery truck is \$23,820, computed as shown in **Illustration 10.4**.

Delivery Truck

Cash price	\$22,000
Sales taxes	1,320
Painting and lettering	500
Cost of delivery truck	\$23,820

ILLUSTRATION 10.4

Computation of cost of delivery truck

Lenard treats the cost of the motor vehicle license as an expense and the cost of the insurance policy as a prepaid asset. Thus, Lenard makes the following entry to record the purchase of the truck and related expenditures:

Equipment	23,820	
License Expense	80	
Prepaid Insurance	1,600	
Cash		25,500
(To record purchase of delivery truck and related expenditures)		

A	=	L	+	OE
		+23,820		
		+ 80	-80 Exp	
		+ 1,600		
		-25,500		
Cash Flows				
		-25,500		

Expenditures During Useful Life

During the useful life of a plant asset, a company may incur costs for ordinary repairs, additions, or improvements. **Ordinary repairs** are expenditures to **maintain** the operating efficiency and productive life of the unit. They usually are small amounts that occur frequently. Examples are motor tune-ups and oil changes, the painting of buildings, and the replacing of worn-out gears on machinery. Companies record such repairs as debits to Maintenance and Repairs Expense as they are incurred. Because they are immediately charged as an expense against revenues, these costs are often referred to as **revenue expenditures**.

In contrast, **additions and improvements** are costs incurred to **increase** the operating efficiency, productive capacity, or useful life of a plant asset. They are usually material in amount and occur infrequently. Additions and improvements increase the company's investment in productive facilities. Companies generally debit these amounts to the plant asset affected. They are often referred to as **capital expenditures**.

Companies must use good judgment in deciding between a revenue expenditure and capital expenditure. For example, assume that Rodriguez Co. purchases a number of wastepaper baskets. The proper accounting would appear to be to capitalize and then depreciate these wastepaper baskets over their useful life. However, Rodriguez will generally expense these wastepaper baskets immediately. This practice is justified on the basis of **materiality**. Materiality refers to the impact of an item's size on a company's financial operations. The **materiality concept** states that if an item would not make a difference in decision-making, the company does not have to follow GAAP in reporting that item.

Anatomy of a Fraud

Bernie Ebbers was the founder and CEO of the phone company **WorldCom**. The company engaged in a series of increasingly large, debt-financed acquisitions of other companies. These acquisitions made the company grow quickly, which made the stock price increase dramatically. However, because the acquired companies all had different accounting systems, WorldCom's financial records were a mess. When WorldCom's performance started to flatten out, Bernie coerced WorldCom's accountants to engage in a number of fraudulent activities to make net income look better than it really was and thus prop up the stock price. One of these frauds involved treating \$7 billion of line costs as capital expenditures. The line costs, which were rental fees paid to other phone companies to use their phone lines, had always been properly expensed in previous years.

Capitalization delayed expense recognition to future periods and thus boosted current-period profits.

Total take: \$7 billion

The Missing Controls

Documentation procedures. The company's accounting system was a disorganized collection of non-integrated systems, which resulted from a series of corporate acquisitions. Top management took advantage of this disorganization to conceal its fraudulent activities.

Independent internal verification. A fraud of this size should have been detected by a routine comparison of the actual physical assets with the list of physical assets shown in the accounting records.

Accounting Across the Organization

© Brian Raisbeck/iStockphoto

Many U.S. Firms Use Leases

Leasing is big business for U.S. companies. For example, business investment in equipment in a recent year totaled \$800 billion. Leasing accounted for about 33% of all business investments (\$264 billion).

Who does the most leasing? Interestingly, major banks such as **Continental Bank**, **J.P. Morgan Leasing**, and **US Bancorp Equipment Finance** are the

major lessors. Also, many companies have established separate leasing companies, such as **Boeing Capital Corporation**, **Dell Financial Services**, and **John Deere Capital Corporation**. And, as an excellent example of the magnitude of leasing, leased planes account for nearly 40% of the U.S. fleet of commercial airlines. **Lease Finance Corporation** in Los Angeles owns more planes than any airline in the world. Leasing is also becoming increasingly common in the hotel industry. **Marriott**, **Hilton**, and **InterContinental** are choosing to lease hotels that are owned by someone else.

Why might airline managers choose to lease rather than purchase their planes? (Go to WileyPLUS for this answer and additional questions.)

DO IT! 1 | Cost of Plant Assets

Assume that Drummond Heating and Cooling Co. purchases a delivery truck for \$15,000 cash, plus sales taxes of \$900 and delivery costs of \$500. The buyer also pays \$200 for painting and lettering, \$600 for an annual insurance policy, and \$80 for a motor vehicle license. Explain how each of these costs would be accounted for.

Solution

The first four payments (\$15,000 purchase price, \$900 sales taxes, \$500 delivery costs, and \$200 painting and lettering) are expenditures necessary to make the truck ready for its intended use. Thus, the cost of the truck is \$16,600. The payments for insurance and the license are operating costs incurred annually and therefore are expensed.

ACTION PLAN

- Identify expenditures made in order to get delivery equipment ready for its intended use.
- Treat operating costs as expenses.

Depreciation Methods

LEARNING OBJECTIVE 2

Apply depreciation methods to plant assets.

As explained in Chapter 3, **depreciation** is the process of allocating to expense the cost of a plant asset over its useful (service) life in a rational and systematic manner. Cost allocation enables companies to properly match expenses with revenues in accordance with the expense recognition principle, as shown in **Illustration 10.5**.

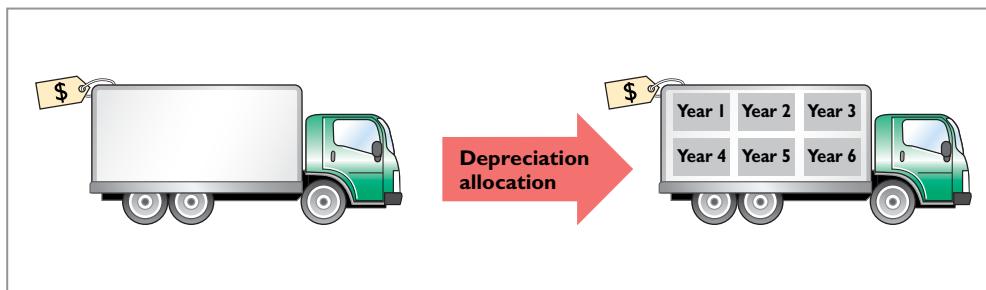

ILLUSTRATION 10.5

Depreciation as a cost allocation concept

It is important to understand that **depreciation is a process of cost allocation**. It is not a process of asset valuation. No attempt is made to measure the change in an asset's fair value during ownership. So, the **book value** (cost less accumulated depreciation) of a plant asset may be quite different from its **fair value**. In fact, if an asset is fully depreciated, it can have a zero book value but still have a fair value (see **Ethics Note**).

Depreciation applies to three classes of plant assets: land improvements, buildings, and equipment. Each asset in these classes is considered to be a **depreciable asset**. Why? Because the usefulness to the company and revenue-producing ability of each asset will decline over the asset's useful life. Depreciation **does not apply to land** because its usefulness and revenue-producing ability generally remain intact over time. In fact, in many cases, the usefulness of land is greater over time because of the scarcity of good land sites. Thus, **land is not a depreciable asset**.

During a depreciable asset's useful life, its revenue-producing ability declines because of **wear and tear**. A delivery truck that has been driven 100,000 miles will be less useful to a company than one driven only 800 miles.

Revenue-producing ability may also decline because of obsolescence. **Obsolescence** is the process of becoming out of date before the asset physically wears out. For example, major airlines moved from Chicago's Midway Airport to Chicago-O'Hare International Airport because Midway's runways were too short for jumbo jets. Similarly, many companies replace their computers long before they originally planned to do so because improvements in new computing technology make the old computers obsolete.

Recognizing depreciation on an asset does not result in an accumulation of cash for replacement of the asset. The balance in Accumulated Depreciation represents the total amount of the asset's cost that the company has charged to expense. **It is not a cash fund.**

Note that the concept of depreciation is consistent with the going concern assumption. The **going concern assumption** states that the company will continue in operation for the foreseeable future. If a company does not use a going concern assumption, then plant assets should be stated at their fair value. In that case, depreciation of these assets is not needed.

ETHICS NOTE

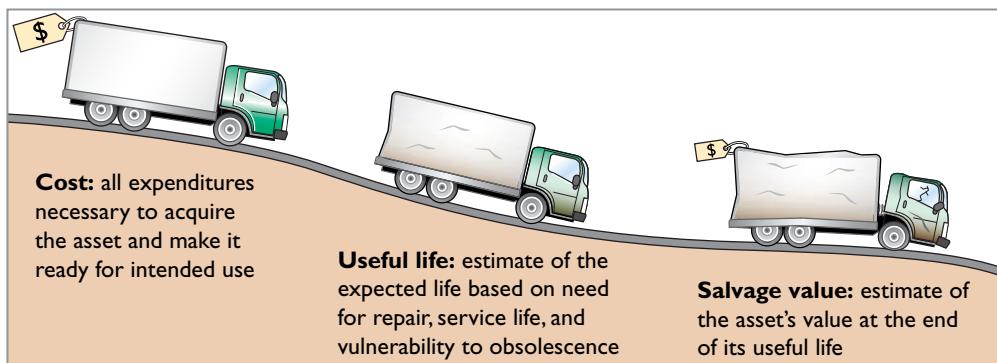

When a business is acquired, proper allocation of the purchase price to various asset classes is important since different depreciation treatments can materially affect income. For example, buildings are depreciated, but land is not.

Factors in Computing Depreciation

Three factors affect the computation of depreciation, as shown in **Illustration 10.6**.

ILLUSTRATION 10.6

Three factors in computing depreciation

- 1. Cost.** Earlier, we explained the issues affecting the cost of a depreciable asset. Recall that companies record plant assets at cost, in accordance with the historical cost principle.
- 2. Useful life.** **Useful life** is an estimate of the expected productive life, also called service life, of the asset for its owner. Useful life may be expressed in terms of time, units of activity (such as machine hours), or units of output. Useful life is an estimate. In making the estimate, management considers such factors as the intended use of the asset, its expected repair and maintenance, and its vulnerability to obsolescence. Past experience with similar assets is often helpful in deciding on expected useful life. We might reasonably expect **Rent-A-Wreck** and **Avis** to use different estimated useful lives for their vehicles.
- 3. Salvage value.** **Salvage value** is an estimate of the asset's value at the end of its useful life (see **Alternative Terminology**). This value may be based on the asset's worth as scrap or on its expected trade-in value. Like useful life, salvage value is an estimate. In making the estimate, management considers how it plans to dispose of the asset and its experience with similar assets.

ALTERNATIVE TERMINOLOGY

Another term sometimes used for salvage value is *residual value*.

Depreciation Methods

Depreciation is generally computed using one of the following methods:

1. Straight-line
2. Units-of-activity
3. Declining-balance

HELPFUL HINT

Depreciation expense is reported on the income statement. Accumulated depreciation is reported on the balance sheet as a deduction from plant assets.

Each method is acceptable under generally accepted accounting principles. Management selects the method(s) it believes to be appropriate. The objective is to select the method that best measures an asset's contribution to revenue over its useful life. Once a company chooses a method, it should apply it consistently over the useful life of the asset. Consistency enhances the comparability of financial statements. Depreciation affects the balance sheet through accumulated depreciation and the income statement through depreciation expense (see **Helpful Hint**).

We will compare the three depreciation methods using the data for a small delivery truck purchased by Barb's Florists on January 1, 2020 (see **Illustration 10.7**).

ILLUSTRATION 10.7

Delivery truck data

Cost	\$ 13,000
Expected salvage value	\$ 1,000
Estimated useful life in years	5
Estimated useful life in miles	100,000

Illustration 10.8 shows the use of the primary depreciation methods in a sample of the largest companies in the United States.

Straight-Line Method

Under the **straight-line method**, companies expense the same amount of depreciation for each year of the asset's useful life. It is measured solely by the passage of time.

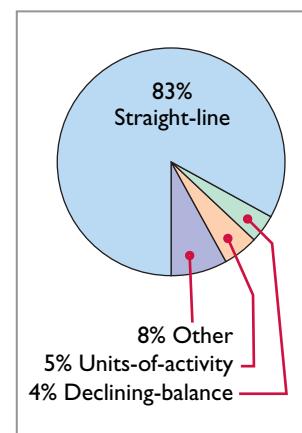

To compute depreciation expense under the straight-line method, companies need to determine depreciable cost. **Depreciable cost** is the cost of the asset less its salvage value. It represents the total amount subject to depreciation. Under the straight-line method, to determine annual depreciation expense, we divide depreciable cost by the asset's useful life. **Illustration 10.9** shows the computation of the first year's depreciation expense for Barb's Florists.

ILLUSTRATION 10.9 Formula for straight-line method

Cost	-	Salvage Value	=	Depreciable Cost
\$13,000	-	\$1,000	=	\$12,000
<hr/>				
Depreciable Cost	÷	Useful Life (in years)	=	Annual Depreciation Expense
\$12,000	÷	5	=	\$2,400

ILLUSTRATION 10.8

Use of depreciation methods in large U.S. companies

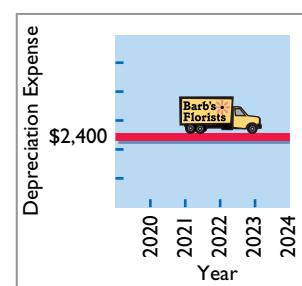

Alternatively, we also can compute an annual **rate** of depreciation. In this case, the rate is 20% ($100\% \div 5$ years). When a company uses an annual straight-line rate, it applies the percentage rate to the depreciable cost of the asset. **Illustration 10.10** shows a **depreciation schedule** using an annual rate.

Barb's Florists							
Year	Computation			End of Year			
	Depreciable Cost	×	Depreciation Rate	=	Annual Depreciation Expense	Accumulated Depreciation	Book Value
2020	\$12,000		20%		\$2,400	\$ 2,400	\$10,600*
2021	12,000		20		2,400	4,800	8,200
2022	12,000		20		2,400	7,200	5,800
2023	12,000		20		2,400	9,600	3,400
2024	12,000		20		2,400	12,000	1,000

*Book value = Cost – Accumulated depreciation = (\$13,000 – \$2,400).

ILLUSTRATION 10.10

Straight-line depreciation schedule

Note that the depreciation expense of \$2,400 is the same each year. The book value (computed as cost minus accumulated depreciation) at the end of the useful life is equal to the expected \$1,000 salvage value.

What happens to these computations for an asset purchased **during** the year, rather than on January 1? In that case, it is necessary to **prorate the annual depreciation** on a time basis. If Barb's Florists had purchased the delivery truck on April 1, 2020, the company would own the truck for nine months of the first year (April–December). Thus, depreciation for 2020 would be \$1,800 ($\$12,000 \times 20\% \times 9/12$ of a year).

The straight-line method predominates in practice. Such large companies as **Campbell Soup, Marriott, and General Mills** use the straight-line method. It is simple to apply, and it matches expenses with revenues when the use of the asset is reasonably uniform throughout the service life.

DO IT! 2a | Straight-Line Depreciation

On January 1, 2020, Iron Mountain Ski Corporation purchased a new snow-grooming machine for \$50,000. The machine is estimated to have a 10-year life with a \$2,000 salvage value. What journal entry would Iron Mountain Ski Corporation make at December 31, 2020, if it uses the straight-line method of depreciation?

ACTION PLAN

- Calculate depreciable cost (Cost – Salvage value).
- Divide the depreciable cost by the asset's estimated useful life.

Solution

$$\text{Depreciation expense} = \frac{\text{Cost} - \text{Salvage value}}{\text{Useful life}} = \frac{\$50,000 - \$2,000}{10} = \$4,800$$

The entry to record the first year's depreciation would be:

Dec. 31	Depreciation Expense Accumulated Depreciation—Equipment (To record annual depreciation on snow-grooming machine)	4,800	4,800
---------	---	-------	-------

Related exercise material: **BE10.4, BE10.5, and DO IT! 10.2a.**

Units-of-Activity Method

ALTERNATIVE TERMINOLOGY

Another term often used is the *units-of-production method*.

HELPFUL HINT

Under any method, depreciation stops when the asset's book value equals expected salvage value.

Under the **units-of-activity method**, useful life is expressed in terms of the total units of production or use expected from the asset, rather than as a time period (see **Alternative Terminology**). The units-of-activity method is ideally suited to factory machinery. Manufacturing companies can measure production in units of output or in machine hours. This method can also be used for such assets as delivery equipment (miles driven) and airplanes (hours in use). The units-of-activity method is generally not suitable for buildings or furniture because depreciation for these assets is more a function of time than of use.

To use this method, companies estimate the total units of activity for the entire useful life, and then divide these units into depreciable cost. The resulting number represents the depreciable cost per unit. The depreciable cost per unit is then applied to the units of activity during the year to determine the annual depreciation expense (see **Helpful Hint**).

To illustrate, assume that Barb's Florists drives its delivery truck 15,000 miles in the first year. **Illustration 10.11** shows the units-of-activity formula and the computation of the first year's depreciation expense.

ILLUSTRATION 10.11

Formula for units-of-activity method

Depreciable Cost	÷	Total Units of Activity	=	Depreciable Cost per Unit
\$12,000	÷	100,000 miles	=	\$0.12
				
Depreciable Cost per Unit	×	Units of Activity during the Year	=	Annual Depreciation Expense
\$0.12	×	15,000 miles	=	\$1,800

Illustration 10.12 presents the units-of-activity depreciation schedule, using assumed mileage.

This method is easy to apply for assets purchased mid-year. In such a case, the company computes the depreciation using the productivity of the asset for the partial year.

The units-of-activity method is not nearly as popular as the straight-line method (see Illustration 10.8) primarily because it is often difficult for companies to reasonably estimate total activity. However, some very large companies, such as **Chevron** and **Boise Cascade** (a forestry company),

Barb's Florists						
Year	Computation		Annual Depreciation Expense	End of Year		
	Units of Activity	× Depreciable Cost/Unit		Accumulated Depreciation	Book Value	
2020	15,000	\$0.12	\$1,800	\$ 1,800	\$11,200*	
2021	30,000	0.12	3,600	5,400	7,600	
2022	20,000	0.12	2,400	7,800	5,200	
2023	25,000	0.12	3,000	10,800	2,200	
2024	10,000	0.12	1,200	12,000	1,000	

*(\$13,000 – \$1,800).

do use this method. When the productivity of an asset varies significantly from one period to another, the units-of-activity method results in the best matching of expenses with revenues.

Declining-Balance Method

The **declining-balance method** produces a decreasing annual depreciation expense over the asset's useful life. The method is so named because the periodic depreciation is based on a **declining book value** (cost less accumulated depreciation) of the asset. With this method, companies compute annual depreciation expense by multiplying the book value at the beginning of the year by the declining-balance depreciation rate. **The depreciation rate remains constant from year to year, but the book value to which the rate is applied declines each year.**

At the beginning of the first year, book value is the cost of the asset. This is because the balance in accumulated depreciation at the beginning of the asset's useful life is zero. In subsequent years, book value is the difference between cost and accumulated depreciation to date. Unlike the other depreciation methods, the declining-balance method does not use depreciable cost in computing annual depreciation expense. That is, **it ignores salvage value in determining the amount to which the declining-balance rate is applied**. Salvage value, however, does limit the total depreciation that can be taken. Depreciation stops when the asset's book value equals expected salvage value.

A common declining-balance rate is double the straight-line rate. The method is often called the **double-declining-balance method**. If Barb's Florists uses the double-declining-balance method, it uses a depreciation rate of 40% ($2 \times$ the straight-line rate of 20%). **Illustration 10.13** shows the declining-balance formula and the computation of the first year's depreciation on the delivery truck.

Book Value at Beginning of Year	× Declining-Balance Rate	= Annual Depreciation Expense
\$13,000	× 40%	= \$5,200

Illustration 10.14 shows the depreciation schedule under this method.

Barb's Florists						
Year	Computation		Annual Depreciation Expense	End of Year		
	Book Value Beginning of Year	× Depreciation Rate		Accumulated Depreciation	Book Value	
2020	\$13,000	40%	\$5,200	\$ 5,200	\$7,800	
2021	7,800	40	3,120	8,320	4,680	
2022	4,680	40	1,872	10,192	2,808	
2023	2,808	40	1,123	11,315	1,685	
2024	1,685	40	685*	12,000	1,000	

*Computation of \$674 (\$1,685 × 40%) is adjusted to \$685 in order for book value to equal salvage value.

ILLUSTRATION 10.12

Units-of-activity depreciation schedule

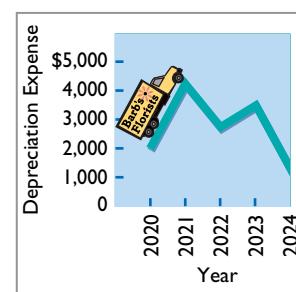

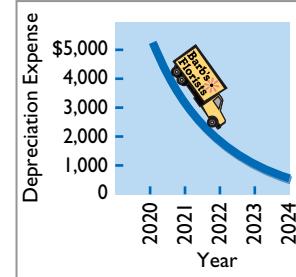

ILLUSTRATION 10.13

Formula for declining-balance method

ILLUSTRATION 10.14

Double-declining-balance depreciation schedule

HELPFUL HINT

The method recommended for an asset that is expected to be significantly more productive in the first half of its useful life is the declining-balance method.

The delivery equipment is 69% depreciated ($\$8,320 \div \$12,000$) at the end of the second year. Under the straight-line method, the truck would be depreciated 40% ($\$4,800 \div \$12,000$) at that time. Because the declining-balance method produces higher depreciation expense in the early years than in the later years, it is considered an **accelerated-depreciation method**. The declining-balance method is compatible with the expense recognition principle. It matches the higher depreciation expense in early years with the higher benefits received in these years. It also recognizes lower depreciation expense in later years, when the asset's contribution to revenue is less. Some assets lose usefulness rapidly because of obsolescence. In these cases, the declining-balance method provides the most appropriate depreciation amount (see **Helpful Hint**).

When a company purchases an asset during the year, it must prorate the first year's declining-balance depreciation on a time basis. For example, if Barb's Florists had purchased the truck on April 1, 2020, depreciation for 2020 would become \$3,900 ($\$13,000 \times 40\% \times \frac{9}{12}$). The book value at the beginning of 2021 is then \$9,100 ($\$13,000 - \$3,900$), and the 2021 depreciation is \$3,640 ($\$9,100 \times 40\%$). Subsequent computations would follow from those amounts.

Comparison of Methods

Illustration 10.15 compares annual and total depreciation expense under each of the three methods for Barb's Florists.

ILLUSTRATION 10.15

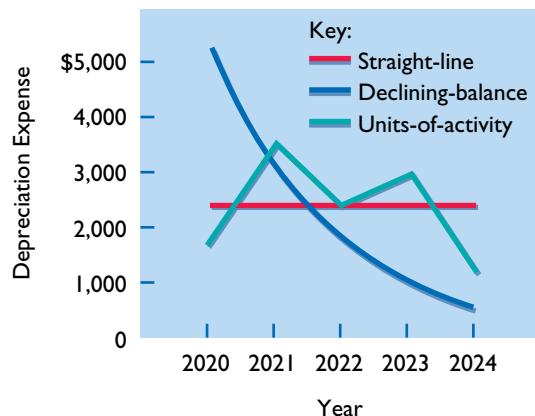

Comparison of depreciation methods

Year	Straight-Line	Units-of-Activity	Declining-Balance
2020	\$ 2,400	\$ 1,800	\$ 5,200
2021	2,400	3,600	3,120
2022	2,400	2,400	1,872
2023	2,400	3,000	1,123
2024	2,400	1,200	685
	\$12,000	\$12,000	\$12,000

Annual depreciation varies considerably among the methods, but **total depreciation expense is the same (\$12,000) for the five-year period** under all three methods. Each method is acceptable in accounting because each recognizes in a rational and systematic manner the decline in service potential of the asset. **Illustration 10.16** graphs the depreciation expense pattern under each method.

ILLUSTRATION 10.16

Patterns of depreciation

Depreciation and Income Taxes

The Internal Revenue Service (IRS) allows taxpayers to deduct depreciation expense when they compute taxable income. However, the IRS does not require taxpayers to use the same depreciation method on the tax return that is used in preparing financial statements.

Many corporations use straight-line in their financial statements to maximize net income. At the same time, they use a special accelerated-depreciation method on their tax returns to minimize their income taxes. Taxpayers must use on their tax returns either the straight-line method or a special accelerated-depreciation method called the **Modified Accelerated Cost Recovery System** (MACRS).

Revising Periodic Depreciation

Depreciation is one example of the use of estimation in the accounting process. Management should periodically review annual depreciation expense. If wear and tear or obsolescence indicate that annual depreciation estimates are inadequate or excessive, the company should change the amount of depreciation expense.

When a change in an estimate is required, the company makes the change in **current and future years**. It does not change depreciation in prior periods. The rationale is that continual restatement of prior periods would adversely affect confidence in financial statements.

To determine the new annual depreciation expense, the company first computes the asset's depreciable cost at the time of the revision. It then allocates the revised depreciable cost to the remaining useful life (see **Helpful Hint**).

To illustrate, assume that Barb's Florists decides on January 1, 2023, to extend the useful life of the truck one year (a total life of six years) and increase its salvage value to \$2,200. The company has used the straight-line method to depreciate the asset to date. Depreciation per year was \$2,400 $[(\$13,000 - \$1,000) \div 5]$. Accumulated depreciation after three years (2020–2022) is \$7,200 ($\$2,400 \times 3$), and book value is \$5,800 ($\$13,000 - \$7,200$). The new annual depreciation is \$1,200, computed as shown in **Illustration 10.17**.

HELPFUL HINT

Use a step-by-step approach:
 (1) determine new depreciable cost; (2) divide by remaining useful life.

ILLUSTRATION 10.17

Revised depreciation computation

Book value, 1/1/23	\$ 5,800
Less: Salvage value	<u>2,200</u>
Depreciable cost	\$ 3,600
Remaining useful life	<u><u>3 years</u></u> (2023–2025)
Revised annual depreciation (\$3,600 ÷ 3)	<u><u>\$ 1,200</u></u>

Barb's Florists makes no entry for the change in estimate. On December 31, 2023, during the preparation of adjusting entries, it records depreciation expense of \$1,200. Companies must describe in the financial statements significant changes in estimates.

Impairments

As noted earlier, the book value of plant assets is rarely the same as the fair value. In instances where the value of a plant asset declines substantially, its fair value might fall materially below book value. This may happen because a machine has become obsolete, or the market for the product made by the machine has dried up or has become very competitive. A **permanent decline** in the fair value of an asset is referred to as an **impairment**. So as not to overstate the asset on the books, the company records a write-down, whereby the asset's cost is reduced to its new fair value during the year in which the decline in value occurs. Recently, **Disney** recorded a \$200 million write-down on its action movie *John Carter*. Disney spent more than \$300 million producing the film.

DO IT! 2b | Revised Depreciation

Chambers Corporation purchased a piece of equipment for \$36,000. It estimated a 6-year life and \$6,000 salvage value. Thus, straight-line depreciation was \$5,000 per year $[(\$36,000 - \$6,000) \div 6]$. At the end of year three (before the depreciation adjustment), it estimated the new total life to be 10 years and the new salvage value to be \$2,000. Compute the revised depreciation.

ACTION PLAN

- Calculate depreciable cost.
- Divide depreciable cost by new remaining life.

Solution

$$\text{Original depreciation expense} = [(\$36,000 - \$6,000) \div 6] = \$5,000$$

$$\text{Accumulated depreciation after 2 years} = 2 \times \$5,000 = \$10,000$$

$$\text{Book value} = \$36,000 - \$10,000 = \$26,000$$

Book value after 2 years of depreciation	\$26,000
Less: New salvage value	<u>2,000</u>
Depreciable cost	<u><u>\$24,000</u></u>
Remaining useful life	<u>8 years</u>
Revised annual depreciation $(\$24,000 \div 8)$	<u><u>\$ 3,000</u></u>

Plant Asset Disposals

LEARNING OBJECTIVE 3

Explain how to account for the disposal of plant assets.

Companies dispose of plant assets that are no longer useful to them. **Illustration 10.18** shows the three ways in which companies make plant asset disposals.

ILLUSTRATION 10.18 Methods of plant asset disposal

HELPFUL HINT

When disposing of a plant asset, a company removes from the accounts all amounts related to the asset. This includes the original cost and the total depreciation to date in the accumulated depreciation account.

Whatever the disposal method, the company must determine the book value of the plant asset at the disposal date to determine the gain or loss. Recall that the book value is the difference between the cost of the plant asset and the accumulated depreciation to date. If the disposal does not occur on the first day of the year, the company must record depreciation for the fraction of the year to the date of disposal. The company then eliminates the book value by reducing (debiting) Accumulated Depreciation for the total depreciation associated with that asset to the date of disposal and reducing (crediting) the asset account for the cost of the asset (see **Helpful Hint**).

In this chapter, we examine the accounting for the retirement and sale of plant assets. In the appendix to the chapter, we discuss and illustrate the accounting for exchanges of plant assets.

Retirement of Plant Assets

To illustrate the retirement of plant assets, assume that Hobart Company retires its computer printers, which cost \$32,000. The accumulated depreciation on these printers is \$32,000. The equipment, therefore, is fully depreciated (zero book value). The entry to record this retirement is as follows.

Accumulated Depreciation—Equipment	32,000	
Equipment		32,000
(To record retirement of fully depreciated equipment)		

A	=	L	+	OE
+32,000				
-32,000				
Cash Flows				
no effect				

What happens if a fully depreciated plant asset is still useful to the company? In this case, the asset and its accumulated depreciation continue to be reported on the balance sheet, without further depreciation adjustment, until the company retires the asset. Reporting the asset and related accumulated depreciation on the balance sheet informs the financial statement reader that the asset is still in use. Once fully depreciated, no additional depreciation should be taken, even if an asset is still being used. In no situation can the accumulated depreciation on a plant asset exceed its cost.

If a company retires a plant asset before it is fully depreciated and no cash is received for scrap or salvage value, a loss on disposal occurs. For example, assume that Sunset Company discards delivery equipment that cost \$18,000 and has accumulated depreciation of \$14,000. The entry is as follows.

Accumulated Depreciation—Equipment	14,000	
Loss on Disposal of Plant Assets	4,000	
Equipment		18,000
(To record retirement of delivery equipment at a loss)		

A	=	L	+	OE
+14,000				
				-4,000 Exp
-18,000				
Cash Flows				
no effect				

Companies report a loss on disposal of plant assets in the “Other expenses and losses” section of the income statement.

Sale of Plant Assets

In a disposal by sale, the company compares the book value of the asset with the proceeds received from the sale. If the proceeds of the sale **exceed** the book value of the plant asset, a **gain on disposal occurs**. If the proceeds of the sale **are less than** the book value of the plant asset sold, a **loss on disposal occurs**.

Only by coincidence will the book value and the fair value of the asset be the same when the asset is sold. Gains and losses on sales of plant assets are therefore quite common. For example, **Delta Airlines** reported a \$94 million gain on the sale of five **Boeing** B727-200 aircraft and five **Lockheed** L-1011-1 aircraft.

Gain on Sale

To illustrate a gain on sale of plant assets, assume that on July 1, 2020, Wright Company sells office furniture for \$16,000 cash. The office furniture originally cost \$60,000. As of January 1, 2020, it had accumulated depreciation of \$41,000. Depreciation for the first six months of 2020 is \$8,000. Wright records depreciation expense and updates accumulated depreciation to July 1 with the following entry.

July 1	Depreciation Expense	8,000	
	Accumulated Depreciation—Equipment		8,000
	(To record depreciation expense for the first 6 months of 2020)		

A	=	L	+	OE
				-8,000 Exp
-8,000				
Cash Flows				
no effect				

After the accumulated depreciation balance is updated, the company computes the gain or loss. The gain or loss is the difference between the proceeds from the sale and the book value at the date of disposal. **Illustration 10.19** shows this computation for Wright Company, which has a gain on disposal of \$5,000.

ILLUSTRATION 10.19
Computation of gain on disposal

Cost of office furniture	\$60,000
Less: Accumulated depreciation (\$41,000 + \$8,000)	49,000
Book value at date of disposal	11,000
Proceeds from sale	16,000
Gain on disposal of plant asset	\$ 5,000

Wright records the sale and the gain on disposal of the plant asset as follows.

A	=	L	+	OE
+16,000				
+49,000				
-60,000				
				+5,000 Rev

Cash Flows  +16,000

July 1	Cash	16,000
	Accumulated Depreciation—Equipment	49,000
	Equipment	
	Gain on Disposal of Plant Assets	
	(To record sale of office furniture at a gain)	
		60,000
		5,000

Companies report a gain on disposal of plant assets in the “Other revenues and gains” section of the income statement.

Loss on Sale

Assume that instead of selling the office furniture for \$16,000, Wright sells it for \$9,000. In this case, Wright computes a loss of \$2,000 as shown in **Illustration 10.20**.

ILLUSTRATION 10.20
Computation of loss on disposal

Cost of office furniture	\$60,000
Less: Accumulated depreciation	49,000
Book value at date of disposal	11,000

Wright records the sale and the loss on disposal of the plant asset as follows.

A	=	L	+	OE
+ 9,000				
+49,000				
				-2,000 Exp
-60,000				

Cash Flows  +9,000

July 1	Cash	9,000
	Accumulated Depreciation—Equipment	49,000
	Loss on Disposal of Plant Assets	2,000
	Equipment	
	(To record sale of office furniture at a loss)	
		60,000

Companies report a loss on disposal of plant assets in the “Other expenses and losses” section of the income statement.

DO IT! 3 | Plant Asset Disposal

Overland Trucking has decided to sell an old truck that cost \$30,000 and which has accumulated depreciation of \$16,000. (a) What entry would Overland Trucking make to record the sale of the truck for \$17,000 cash? (b) What entry would Overland Trucking make to record the sale of the truck for \$10,000 cash?

Solution

- a. Sale of truck for cash at a gain:

Cash	17,000	
Accumulated Depreciation—Equipment	16,000	
Equipment		30,000
Gain on Disposal of Plant Assets		3,000
[\$17,000 – (\$30,000 – \$16,000)]		
(To record sale of truck at a gain)		

- b. Sale of truck for cash at a loss:

Cash	10,000	
Accumulated Depreciation—Equipment	16,000	
Equipment		30,000
Loss on Disposal of Plant Assets		4,000
[\$10,000 – (\$30,000 – \$16,000)]		
(To record sale of truck at a loss)		

Related exercise material: BE10.9, BE10.10, DO IT! 10.3, E10.9, and E10.10.

ACTION PLAN

- At the time of disposal, determine the book value of the asset.
- Compare the asset's book value with the proceeds received to determine whether a gain or loss has occurred.

Natural Resources and Intangible Assets

LEARNING OBJECTIVE 4

Describe how to account for natural resources and intangible assets.

Natural Resources

Natural resources consist of standing timber and underground deposits of oil, gas, and minerals (see **Helpful Hint**). These long-lived productive assets have two distinguishing characteristics: (1) they are physically extracted in operations (such as mining, cutting, or pumping), and (2) they are replaceable only by an act of nature.

The acquisition cost of a natural resource is the price needed to acquire the resource **and** prepare it for its intended use. For an already-discovered resource, such as an existing coal mine, cost is the price paid for the property.

HELPFUL HINT

On a balance sheet, natural resources may be described more specifically as *timberlands*, *mineral deposits*, *oil reserves*, and so on.

Depletion

The allocation of the cost of natural resources in a rational and systematic manner over the resource's useful life is called **depletion**. (That is, depletion is to natural resources as depreciation is to plant assets.) **Companies generally use the units-of-activity method** (learned earlier in the chapter) **to compute depletion**. The reason is that **depletion generally is a function of the units extracted during the year**.

Under the units-of-activity method, companies divide the total cost of the natural resource minus salvage value by the number of units estimated to be in the resource. The result is a

depletion cost per unit. To compute depletion, the cost per unit is then multiplied by the number of units extracted.

To illustrate, assume that Lane Coal Company invests \$5 million in a mine estimated to have 1 million tons of coal and no salvage value. **Illustration 10.21** shows the computation of the depletion cost per unit.

ILLUSTRATION 10.21

Computation of depletion cost per unit

Total Cost – Salvage Value	=	Depletion Cost per Unit
Total Estimated Units Available		
\$5,000,000	=	\$5.00 per ton
1,000,000		

A	=	L	+	OE
+1,250,000				
-1,250,000				

Cash Flows

no effect

ETHICS NOTE

Investors were stunned at news that **Royal Dutch/Shell Group** had significantly overstated its reported oil reserves—and perhaps had done so intentionally.

If Lane extracts 250,000 tons in the first year, then the depletion for the year is \$1,250,000 (250,000 tons \times \$5). It records the depletion as follows.

Inventory (coal) Accumulated Depletion (To record depletion of coal mine)	1,250,000	1,250,000
---	-----------	-----------

Lane debits Inventory for the total depletion for the year and credits Accumulated Depletion to reduce the carrying value of the natural resource. Accumulated Depletion is a contra asset similar to Accumulated Depreciation. Lane credits Inventory when it sells the inventory and debits Cost of Goods Sold. The amount not sold remains in inventory and is reported in the current assets section of the balance sheet (see **Ethics Note**).

Some companies do not use an Accumulated Depletion account. In such cases, the company credits the amount of depletion directly to the natural resources account.

Intangible Assets

Intangible assets are rights, privileges, and competitive advantages that result from the ownership of long-lived assets that do not possess physical substance. Evidence of intangibles may exist in the form of contracts or licenses. Intangibles may arise from the following sources:

1. Government grants, such as patents, copyrights, licenses, trademarks, and trade names.
2. Acquisition of another business, in which the purchase price includes a payment for **goodwill**.
3. Private monopolistic arrangements arising from contractual agreements, such as franchises and leases.

Some widely known intangibles are **Microsoft's** patents, **McDonald's** franchises, **Apple's** trade name iPod, J.K. Rowling's copyrights on the *Harry Potter* books, and the trademark **Rent-A-Wreck** in the Feature Story.

Accounting for Intangible Assets

HELPFUL HINT

Amortization is to intangibles what **depreciation** is to plant assets and **depletion** is to natural resources.

Companies record intangible assets at cost. Intangibles are categorized as having either a limited life or an indefinite life. If an intangible has a **limited life**, the company allocates its cost over the asset's useful life using a process similar to depreciation. The process of allocating the cost of intangibles is referred to as **amortization** (see **Helpful Hint**). The cost of intangible assets with **indefinite lives should not be amortized**.

To record amortization of an intangible asset, a company increases (debits) Amortization Expense, and decreases (credits) the specific intangible asset. Alternatively, some companies choose to credit a contra account, such as Accumulated Amortization. *For homework purposes, you should directly credit the specific intangible asset.*

Intangible assets are typically amortized on a straight-line basis. For example, the legal life of a patent is 20 years. Companies **amortize the cost of a patent over its 20-year life or its useful life, whichever is shorter**. To illustrate the computation of patent amortization, assume that National Labs purchases a patent at a cost of \$60,000. If National estimates the useful life of the patent to be eight years, the annual amortization expense is \$7,500 ($\$60,000 \div 8$). National records the annual amortization as follows.

A	=	L	+	OE
				-7,500 Exp
Dec. 31		7,500		7,500

Amortization Expense
Patents
(To record patent amortization)

Cash Flows
no effect

Companies classify Amortization Expense as an operating expense in the income statement.

There is a difference between intangible assets and plant assets in determining cost. For plant assets, cost includes both the purchase price of the asset and the costs incurred in designing and constructing the asset. In contrast, the initial cost for an intangible asset includes **only the purchase price**. Companies expense any costs incurred in developing an intangible asset.

Patents

A **patent** is an exclusive right issued by the U.S. Patent Office that enables the recipient to manufacture, sell, or otherwise control an invention for a period of 20 years from the date of the grant. A patent is nonrenewable. But, companies can extend the legal life of a patent by obtaining new patents for improvements or other changes in the basic design. **The initial cost of a patent is the cash or cash equivalent price paid to acquire the patent.**

The saying, “A patent is only as good as the money you’re prepared to spend defending it,” is very true. Many patents are subject to litigation by competitors. Any legal costs an owner incurs in successfully defending a patent in an infringement suit are considered necessary to establish the patent’s validity. **The owner adds those costs to the Patents account and amortizes them over the remaining life of the patent.**

The patent holder amortizes the cost of a patent over its 20-year legal life or its useful life, whichever is shorter. Companies consider obsolescence and inadequacy in determining useful life. These factors may cause a patent to become economically ineffective before the end of its legal life.

Copyrights

The federal government grants **copyrights**, which give the owner the exclusive right to reproduce and sell an artistic or published work. Copyrights extend for the life of the creator plus 70 years. The cost of a copyright is the **cost of acquiring and defending it**. The cost may be only the small fee paid to the U.S. Copyright Office. Or, it may amount to much more if a copyright is acquired from another party.

The useful life of a copyright generally is significantly shorter than its legal life. Therefore, copyrights usually are amortized over a relatively short period of time.

Trademarks and Trade Names

A **trademark** or **trade name** is a word, phrase, jingle, or symbol that identifies a particular enterprise or product. Trade names like Wheaties, Monopoly, Big Mac, Kleenex, Coca-Cola, and Jeep create immediate product identification. They also generally enhance the sale of the product. The creator or original user may obtain exclusive legal right to the trademark or trade name by registering it with the U.S. Patent Office. Such registration provides 20 years of protection. The registration may be renewed indefinitely as long as the trademark or trade name is in use.

If a company purchases the trademark or trade name, its cost is the purchase price. If a company develops and maintains the trademark or trade name, any costs related to these activities are expensed as incurred. Because trademarks and trade names have indefinite lives, they are not amortized.

Accounting Across the Organization Google

© Hattanas Kumchai/Shutterstock

We Want to Own Glass

Google, which has trademarked the term “Google Glass,” now wants to trademark the term “Glass.” Why? Because the simple word Glass has marketing advantages over the term Google Glass. It is easy to remember and is more universal. Regulators, however, are balking at Google’s request.

They say that the possible trademark is too similar to other existing or pending software trademarks that contain the word “glass.” Also, regulators suggest that the term Glass is merely descriptive and therefore lacks trademark protection. For example, regulators

note that a company that makes salsa could not trademark the term “Spicy Salsa.”

BorderStyle LLC, which developed a Web-browser extension called Write on Glass, has filed a notice of opposition to Google’s request. Google is fighting back and has sent the trademark examiner a 1,928-page application defense.

Source: Jacob Gershman, “Google Wants to Own ‘Glass,’” *Wall Street Journal* (April 4, 2014), p. B5.

If Google is successful in registering the term Glass, where will this trademark be reported on its financial statements? (Go to WileyPLUS for this answer and additional questions.)

Franchises

When you fill up your tank at the corner **Shell** station, eat lunch at **Subway**, or rent a car from **Rent-A-Wreck**, you are dealing with franchises. A **franchise** is a contractual arrangement between a franchisor and a franchisee. The franchisor grants the franchisee the right to sell certain products, perform specific services, or use certain trademarks or trade names, usually within a designated geographic area.

Another type of franchise is a **license**. A license granted by a governmental body permits a company to use public property in performing its services. Examples are the use of city streets for a bus line or taxi service, the use of public land for telephone and electric lines, and the use of airwaves for radio or TV broadcasting. In a recent license agreement, **FOX**, **CBS**, and **NBC** agreed to pay \$27.9 billion for the right to broadcast **NFL** football games over an eight-year period. Franchises and licenses may be granted for a definite period of time, an indefinite period, or perpetually.

When a company can identify costs with the purchase of a franchise or license, it should recognize an intangible asset. Companies should amortize the cost of a limited-life franchise (or license) over its useful life. If the life is indefinite, the cost is not amortized. Annual payments made under a franchise agreement are recorded as **operating expenses** in the period in which they are incurred.

Goodwill

Usually, the largest intangible asset that appears on a company’s balance sheet is **goodwill**. **Goodwill** represents the value of all favorable attributes that relate to a company that are not attributable to any other specific asset. These include exceptional management, desirable location, good customer relations, skilled employees, high-quality products, and harmonious relations with labor unions. Goodwill is unique. Unlike assets such as investments and plant assets, which can be sold **individually** in the marketplace, goodwill can be identified only with the business **as a whole**.

If goodwill can be identified only with the business as a whole, how can its amount be determined? One could try to put a dollar value on the factors listed above (exceptional management, desirable location, and so on). But, the results would be very subjective, and such subjective valuations would not contribute to the reliability of financial statements. **Therefore, companies record goodwill only when an entire business is purchased. In that case, goodwill is the excess of cost over the fair value of the net assets (assets less liabilities) acquired.**

In recording the purchase of a business, the company debits (increases) the identifiable acquired assets, credits liabilities at their fair values, credits cash for the purchase price, and records the difference as goodwill. **Goodwill is not amortized** because it is considered to have an indefinite life. However, goodwill must be written down if a company determines that its value has been permanently impaired. Companies report goodwill in the balance sheet under intangible assets.

Research and Development Costs

Research and development costs are expenditures that may lead to patents, copyrights, new processes, and new products (see **Helpful Hint**). Many companies spend considerable sums of money on research and development (R&D). For example, in a recent year, **Google** spent over \$9.8 billion on R&D.

Research and development costs present accounting problems. For one thing, it is sometimes difficult to assign the costs to specific projects. Also, there are uncertainties in identifying the extent and timing of future benefits. As a result, companies usually record R&D costs as **an expense when incurred**, whether the research and development is successful or not.

To illustrate, assume that Laser Scanner Company spent \$3 million on R&D that resulted in two highly successful patents. It spent \$20,000 on legal fees for the patents. The company would add the lawyers' fees to the Patents account. The R&D costs, however, cannot be included in the cost of the patents. Instead, the company would record the R&D costs as an expense when incurred.

Many disagree with this accounting approach. They argue that expensing R&D costs leads to understated assets and net income. Others, however, argue that capitalizing these costs will lead to highly speculative assets on the balance sheet. Who is right is difficult to determine.

HELPFUL HINT

Research and development (R&D) costs are not intangible assets. But because they may lead to patents and copyrights, we discuss them in this section.

DO IT! 4 | Classification Concepts

Match the statement with the term most directly associated with it.

Copyrights	Depletion
Intangible assets	Franchises
Research and development costs	

1. _____ The allocation of the cost of a natural resource to expense in a rational and systematic manner.
2. _____ Rights, privileges, and competitive advantages that result from the ownership of long-lived assets that do not possess physical substance.
3. _____ An exclusive right granted by the federal government to reproduce and sell an artistic or published work.
4. _____ A right to sell certain products or services or to use certain trademarks or trade names within a designated geographic area.
5. _____ Costs incurred by a company that often lead to patents or new products. These costs must be expensed as incurred.

ACTION PLAN

- Know that the accounting for intangibles often depends on whether the item has a finite or indefinite life.
- Recognize the many similarities and differences between the accounting for natural resources, plant assets, and intangible assets.

Solution

- | | |
|----------------------|-----------------------------------|
| 1. Depletion | 4. Franchises |
| 2. Intangible assets | 5. Research and development costs |
| 3. Copyrights | |

Statement Presentation and Analysis

LEARNING OBJECTIVE 5

Discuss how plant assets, natural resources, and intangible assets are reported and analyzed.

Presentation

Usually, companies combine plant assets and natural resources under "Property, plant, and equipment" in the balance sheet. They show intangible assets separately. **Illustration 10.22**

shows the assets section from the balance sheet of Artex Company, with emphasis on the reporting of plant assets.

ILLUSTRATION 10.22

Presentation of property, plant, and equipment, and intangible assets

Artex Company Balance Sheet (partial) (in thousands)			
Current assets			
Cash		\$ 430	
Accounts receivable		100	
Inventory		910	
	Total current assets		\$ 1,440
Property, plant, and equipment			
Gold mine	\$ 530		
Less: Accumulated depletion	210	320	
Land		600	
Buildings	7,600		
Less: Accumulated depreciation—buildings	500	7,100	
Equipment	3,870		
Less: Accumulated depreciation—equipment	620	3,250	
	Total property, plant, and equipment		11,270
Intangible assets			
Patents		440	
Trademarks		180	
Goodwill		900	
	Total assets		<u>\$14,230</u>

Companies may disclose in the balance sheet or the notes to the financial statements the major classes of assets such as land, land improvements, buildings and equipment, and accumulated depreciation (by major classes or in total). In addition, they should describe the depreciation and amortization methods that were used, as well as disclose the amount of depreciation and amortization expense for the period. *For homework purposes, use the format in Illustration 10.22 for preparing balance sheet information.*

Analysis

Using ratios, we can analyze how efficiently a company uses its assets to generate sales. The **asset turnover** analyzes the productivity of a company's assets. It tells us how many dollars of sales a company generates for each dollar invested in assets. This ratio is computed by dividing net sales by average total assets for the period. **Illustration 10.23** shows the computation of the asset turnover for **The Procter & Gamble Company**. P&G's net sales for 2015 were \$76,279 million. Its total ending assets were \$129,495 million, and beginning assets were \$144,266 million.

ILLUSTRATION 10.23

Asset turnover formula and computation

Net Sales	÷	Average Total Assets	=	Asset Turnover
\$76,279	÷	<u>$\frac{\\$144,266 + \\$129,495}{2}$</u>	=	.56 times

Thus, each dollar invested in assets produced \$0.56 in sales for P&G. If a company is using its assets efficiently, each dollar of assets will create a high amount of sales. This ratio varies greatly among different industries—from those that are asset-intensive (utilities) to those that are not (services).

People, Planet, and Profit Insight BHP Billiton

© Christian Uhrig/iStockphoto

Sustainability Report Please

Sustainability reports identify how the company is meeting its corporate social responsibilities. Many companies, both large and small, are now issuing

these reports. For example, companies such as **Disney**, **Best Buy**, **Microsoft**, **Ford**, and **ConocoPhilips** issue these reports. Presented below is an adapted section of a recent **BHP Billiton** (a global mining, oil, and gas company) sustainability report on its environmental policies. These policies are to (1) take action to address the challenges of climate change, (2) set and achieve targets that reduce pollution, and (3) enhance biodiversity by assessing and considering ecological values and land-use aspects. Here is how BHP Billiton measures the success or failure of some of these policies:

Environment	Commentary	Target Date
We will maintain total greenhouse gas emissions below FY2006 levels.	FY2013 greenhouse gas emissions were lower than the FY2006 baseline.	30 June 2017
All operations to offset impacts to biodiversity and the related benefits derived from ecosystems.	Land and Biodiversity Management Plans were developed at all our operations.	Annual
We will finance the conservation and continuing management of areas of high biodiversity and ecosystem value.	Two projects of international conservation significance were established—the Five Rivers Conservation Project, in Australia, and the Valdivian Coastal Reserve Conservation Project, in Chile.	30 June 2017

In addition to the environment, BHP Billiton has sections in its sustainability report which discuss people, safety, health, and community.

Why do you believe companies issue sustainability reports? (Go to WileyPLUS for this answer and additional questions.)

DO IT! 5 | Asset Turnover

Paramour Company reported net income of \$180,000, net sales of \$420,000, and had total assets of \$460,000 on January 1, 2020, and total assets on December 31, 2020, of \$540,000 billion. Determine Paramour's asset turnover for 2020.

Solution

The asset turnover for Paramour Company is computed as follows.

$$\text{Net Sales} \div \text{Average Total Assets} = \text{Asset Turnover}$$

$$\$420,000 \div \frac{\$460,000 + \$540,000}{2} = .84 \text{ times}$$

Related Exercise material: **BE10.14**, **DO IT! 10.5**, and **E10.14**.

ACTION PLAN

- Recognize that the asset turnover analyzes the productivity of a company's assets.
- Know the formula: $\text{Net sales} \div \text{Average total assets} = \text{Asset turnover}$.

Appendix 10A

Exchange of Plant Assets

LEARNING OBJECTIVE *6

Explain how to account for the exchange of plant assets.

Ordinarily, companies record a gain or loss on the exchange of plant assets. The rationale for recognizing a gain or loss is that most exchanges have **commercial substance**. An exchange has commercial substance if the future cash flows change as a result of the exchange.

To illustrate, Ramos Co. exchanges some of its equipment for land held by Brodhead Inc. It is likely that the timing and amount of the cash flows arising from the land will differ significantly from the cash flows arising from the equipment. As a result, both Ramos and Brodhead are in different economic positions. Therefore, the exchange has commercial substance, and the companies recognize a gain or loss in the exchange. Because most exchanges have commercial substance (even when similar assets are exchanged), we illustrate only this type of situation for both a loss and a gain.

Loss Treatment

To illustrate an exchange that results in a loss, assume that Roland Company exchanged a set of used trucks plus cash for a new semi-truck. The used trucks have a combined book value of \$42,000 (cost \$64,000 less \$22,000 accumulated depreciation). Roland's purchasing agent, experienced in the secondhand market, indicates that the used trucks have a fair value of \$26,000. In addition to the trucks, Roland must pay \$17,000 for the semi-truck. Roland computes the cost of the semi-truck as shown in **Illustration 10A.1**.

ILLUSTRATION 10A.1

Cost of semi-truck

Fair value of used trucks	\$26,000
Cash paid	17,000
Cost of semi-truck	<u><u>\$43,000</u></u>

ILLUSTRATION 10A.2
Computation of loss on disposal

Book value of used trucks (\$64,000 – \$22,000)	\$42,000
Fair value of used trucks	26,000
Loss on disposal of plant assets	<u><u>\$16,000</u></u>

In recording an exchange at a loss, four steps are required: (1) eliminate the book value of the asset given up, (2) record the cost of the asset acquired, (3) recognize the loss on disposal of plant assets, and (4) record cash paid or received. Roland Company thus records the exchange on the loss as follows.

A	=	L	+	OE
+43,000				
+22,000				
		-16,000	Exp	
-64,000				
-17,000				
Cash Flows				
-17,000				

Equipment (new)	43,000
Accumulated Depreciation—Equipment	22,000
Loss on Disposal of Plant Assets	16,000
Equipment (old)	
Cash	
(To record exchange of used trucks for semi-truck)	

Gain Treatment

To illustrate a gain situation, assume that Mark Express Delivery decides to exchange its old delivery equipment plus cash of \$3,000 for new delivery equipment. The book value of the old delivery equipment is \$12,000 (cost \$40,000 less accumulated depreciation \$28,000). The fair value of the old delivery equipment is \$19,000.

The cost of the new asset is the fair value of the old asset exchanged plus any cash paid (or other consideration given up). The cost of the new delivery equipment is \$22,000, computed as shown in **Illustration 10A.3**.

Fair value of old delivery equipment	\$19,000
Cash paid	3,000
Cost of new delivery equipment	\$22,000

ILLUSTRATION 10A.3**Cost of new delivery equipment**

A gain results when the fair value of the old delivery equipment is greater than its book value. For Mark Express, there is a gain of \$7,000 on disposal of plant assets, computed as shown in **Illustration 10A.4**.

Fair value of old delivery equipment	\$19,000
Book value of old delivery equipment (\$40,000 – \$28,000)	12,000
Gain on disposal of plant assets	\$ 7,000

ILLUSTRATION 10A.4**Computation of gain on disposal**

Mark Express Delivery records the exchange as follows.

Equipment (new)	22,000	A =	L + OE
Accumulated Depreciation—Equipment (old)	28,000	+22,000	
Equipment (old)		+28,000	
Gain on Disposal of Plant Assets		-40,000	
Cash		+7,000 Rev	
(To record exchange of old delivery equipment for new delivery equipment)		– 3,000	
			Cash Flows

In recording an exchange at a gain, the following four steps are involved: (1) eliminate the book value of the asset given up, (2) record the cost of the asset acquired, (3) recognize the gain on disposal of plant assets, and (4) record cash paid or received. Accounting for exchanges of plant assets becomes more complex if the transaction does not have commercial substance. This issue is discussed in more advanced accounting classes.

Review and Practice

Learning Objectives Review

1 Explain the accounting for plant asset expenditures.

The cost of plant assets includes all expenditures necessary to acquire the asset and make it ready for its intended use. Once cost is established, the company uses that amount as the basis of accounting for the plant assets over its useful life.

Companies incur revenue expenditures to maintain the operating efficiency and productive life of an asset. They debit these expenditures to Maintenance and Repairs Expense as incurred. Capital expenditures increase the operating efficiency, productive capacity, or expected useful life of the asset. Companies generally debit these expenditures to the plant asset affected.

2 Apply depreciation methods to plant assets.

Depreciation is the allocation of the cost of a plant asset to expense over its useful (service) life in a rational and systematic manner.

Depreciation is not a process of valuation, nor is it a process that results in an accumulation of cash.

Three depreciation methods are:

Method	Effect on Annual Depreciation	Formula
Straight-line	Constant amount	Depreciable cost ÷ Useful life (in years)
Units-of-activity	Varying amount	Depreciable cost per unit × Units of activity during the year
Declining-balance	Decreasing amount	Book value at beginning of year × Declining-balance rate

Companies make revisions of periodic depreciation in present and future periods, not retroactively. They determine the new annual depreciation by dividing the depreciable cost at the time of the revision by the remaining useful life.

3 Explain how to account for the disposal of plant assets.

The accounting for disposal of a plant asset through retirement or sale is as follows. (a) Eliminate the book value of the plant asset at the date of disposal. (b) Record cash proceeds, if any. (c) Account for the difference between the book value and the cash proceeds as a gain or loss on disposal (d) Record the cash paid or received.

4 Describe how to account for natural resources and intangible assets.

Companies compute depletion cost per unit by dividing the total cost of the natural resource minus salvage value by the number of units estimated to be in the resource. They then multiply the depletion cost per unit by the number of units extracted.

The process of allocating the cost of an intangible asset is referred to as amortization. The cost of intangible assets with indefinite lives is not amortized. Companies normally use the straight-line method for amortizing intangible assets.

5 Discuss how plant assets, natural resources, and intangible assets are reported and analyzed.

Companies usually combine plant assets and natural resources under property, plant, and equipment. They show intangibles separately under intangible assets. Either within the balance sheet or in the notes, companies should disclose the balances of the major classes of assets, such as land, buildings, and equipment, and accumulated depreciation by major classes or in total. They also should describe the depreciation and amortization methods used, and should disclose the amount of depreciation and amortization expense for the period. The asset turnover measures the productivity of a company's assets in generating sales.

***6 Explain how to account for the exchange of plant assets.**

Ordinarily, companies record a gain or loss on the exchange of plant assets. The rationale for recognizing a gain or loss is that most exchanges have commercial substance. An exchange has commercial substance if the future cash flows change as a result of the exchange.

Glossary Review

Accelerated-depreciation method Depreciation method that produces higher depreciation expense in the early years than in the later years. (p. 10-12).

Additions and improvements Costs incurred to increase the operating efficiency, productive capacity, or useful life of a plant asset. (p. 10-5).

Amortization The allocation of the cost of an intangible asset to expense over its useful life in a systematic and rational manner. (p. 10-18).

Asset turnover A measure of how efficiently a company uses its assets to generate sales; calculated as net sales divided by average total assets. (p. 10-22).

Capital expenditures Expenditures that increase the company's investment in productive facilities. (p. 10-5).

Copyrights Exclusive grant from the federal government that allows the owner to reproduce and sell an artistic or published work. (p. 10-19).

Declining-balance method Depreciation method that applies a constant rate to the declining book value of the asset and produces a decreasing annual depreciation expense over the useful life of the asset. (p. 10-11).

Depletion The allocation of the cost of a natural resource to expense in a rational and systematic manner over the resource's useful life. (p. 10-17).

Depreciation The process of allocating to expense the cost of a plant asset over its useful (service) life in a rational and systematic manner. (p. 10-7).

Franchise (license) A contractual arrangement under which the franchisor grants the franchisee the right to sell certain products, perform specific services, or use certain trademarks or trade names, usually within a designated geographic area. (p. 10-20).

Going concern assumption States that the company will continue in operation for the foreseeable future. (p. 10-7).

Goodwill The value of all favorable attributes that relate to a company that is not attributable to any other specific asset. (p. 10-20).

Impairment A permanent decline in the fair value of an asset. (p. 10-13).

Intangible assets Rights, privileges, and competitive advantages that result from the ownership of long-lived assets that do not possess physical substance. (p. 10-18).

Materiality concept If an item would not make a difference in decision-making, a company does not have to follow GAAP in reporting it. (p. 10-5).

Natural resources Assets that consist of standing timber and underground deposits of oil, gas, and minerals. (p. 10-17).

Ordinary repairs Expenditures to maintain the operating efficiency and productive life of the unit. (p. 10-5).

Patent An exclusive right issued by the U.S. Patent Office that enables the recipient to manufacture, sell, or otherwise control an invention for a period of 20 years from the date of the grant. (p. 10-19).

Plant assets Tangible resources that are used in the operations of the business and are not intended for sale to customers. (p. 10-2).

Research and development (R&D) costs Expenditures that may lead to patents, copyrights, new processes, or new products. (p. 10-21).

Revenue expenditures Expenditures that are immediately charged against revenues as an expense. (p. 10-5).

Salvage value An estimate of an asset's value at the end of its useful life. (p. 10-8).

Straight-line method Depreciation method in which periodic depreciation is the same for each year of the asset's useful life. (p. 10-9).

Trademark (trade name) A word, phrase, jingle, or symbol that identifies a particular enterprise or product. (p. 10-19).

Units-of-activity method Depreciation method in which useful life is expressed in terms of the total units of production or use expected from an asset. (p. 10-10).

Useful life An estimate of the expected productive life, also called service life, of an asset. (p. 10-8).

Practice Multiple-Choice Questions

- 1. (LO 1)** Erin Danielle Company purchased equipment and incurred the following costs.

Cash price	\$24,000
Sales taxes	1,200
Insurance during transit	200
Installation and testing	400
Total costs	<u><u>\$25,800</u></u>

What amount should be recorded as the cost of the equipment?

- a. \$24,000.
 - c. \$25,400.
 - b. \$25,200.
 - d. \$25,800.
- 2. (LO 1)** Additions to plant assets are:
- a. revenue expenditures.
 - b. debited to the Maintenance and Repairs Expense account.
 - c. debited to the Purchases account.
 - d. capital expenditures.
- 3. (LO 2)** Depreciation is a process of:
- a. valuation.
 - c. cash accumulation.
 - b. cost allocation.
 - d. appraisal.
- 4. (LO 2)** Micah Bartlett Company purchased equipment on January 1, 2019, at a total invoice cost of \$400,000. The equipment has an estimated salvage value of \$10,000 and an estimated useful life of 5 years. The amount of accumulated depreciation at December 31, 2020, if the straight-line method of depreciation is used, is:
- a. \$80,000.
 - c. \$78,000.
 - b. \$160,000.
 - d. \$156,000.
- 5. (LO 2)** Ann Torbert purchased a truck for \$11,000 on January 1, 2019. The truck will have an estimated salvage value of \$1,000 at the end of 5 years. Using the units-of-activity method, the balance in accumulated depreciation at December 31, 2020, can be computed by the following formula:
- a. $(\$11,000 \div \text{Total estimated activity}) \times \text{Units of activity for 2020}$.
 - b. $(\$10,000 \div \text{Total estimated activity}) \times \text{Units of activity for 2020}$.
 - c. $(\$11,000 \div \text{Total estimated activity}) \times \text{Units of activity for 2019 and 2020}$.
 - d. $(\$10,000 \div \text{Total estimated activity}) \times \text{Units of activity for 2019 and 2020}$.
- 6. (LO 2)** Jefferson Company purchased a piece of equipment on January 1, 2020. The equipment cost \$60,000 and has an estimated life of 8 years and a salvage value of \$8,000. What was the depreciation expense for the asset for 2021 under the double-declining-balance method?
- a. \$6,500.
 - c. \$15,000.
 - b. \$11,250.
 - d. \$6,562.
- 7. (LO 2)** When there is a change in estimated depreciation:
- a. previous depreciation should be corrected.
 - b. current and future years' depreciation should be revised.
 - c. only future years' depreciation should be revised.
 - d. None of the above.

- 8. (LO 2)** Able Towing Company purchased a tow truck for \$60,000 on January 1, 2018. It was originally depreciated on a straight-line basis over 10 years with an assumed salvage value of \$12,000. On December 31, 2020, before adjusting entries had been made, the company decided to change the remaining estimated life to 4 years (including 2020) and the salvage value to \$2,000. What was the depreciation expense for 2020?

- a. \$6,000.
- c. \$15,000.
- b. \$4,800.
- d. \$12,100.

- 9. (LO 3)** Bennie Razor Company has decided to sell one of its old manufacturing machines on June 30, 2020. The machine was purchased for \$80,000 on January 1, 2016, and was depreciated on a straight-line basis for 10 years assuming no salvage value. If the machine was sold for \$26,000, what was the amount of the gain or loss recorded at the time of the sale?

- a. \$18,000.
- c. \$22,000.
- b. \$54,000.
- d. \$46,000.

- 10. (LO 4)** Maggie Sharer Company expects to extract 20 million tons of coal from a mine that cost \$12 million. If no salvage value is expected and 2 million tons are mined in the first year, the entry to record depletion will include a:

- a. debit to Accumulated Depletion of \$2,000,000.
- b. credit to Depletion Expense of \$1,200,000.
- c. debit to Inventory of \$1,200,000.
- d. credit to Accumulated Depletion of \$2,000,000.

- 11. (LO 4)** Which of the following statements is **false**?

- a. If an intangible asset has a finite life, it should be amortized.
- b. The amortization period of an intangible asset can exceed 20 years.
- c. Goodwill is recorded only when a business is purchased.
- d. Research and development costs are expensed when incurred, except when the research and development expenditures result in a successful patent.

- 12. (LO 4)** Martha Beyerlein Company incurred \$150,000 of research and development costs in its laboratory to develop a patent granted on January 2, 2020. On July 31, 2020, Beyerlein paid \$35,000 for legal fees in a successful defense of the patent. The total amount debited to Patents through July 31, 2020, should be:

- a. \$150,000.
- c. \$185,000.
- b. \$35,000.
- d. \$170,000.

- 13. (LO 5)** Indicate which of the following statements is **true**.

- a. Since intangible assets lack physical substance, they need be disclosed only in the notes to the financial statements.
- b. Goodwill should be reported as a contra account in the owner's equity section.
- c. Totals of major classes of assets can be shown in the balance sheet, with asset details disclosed in the notes to the financial statements.
- d. Intangible assets are typically combined with plant assets and natural resources and shown in the property, plant, and equipment section.

14. (LO 5) Lake Coffee Company reported net sales of \$180,000, net income of \$54,000, beginning total assets of \$200,000, and ending total assets of \$300,000. What was the company's asset turnover?

- a. 0.90.
- c. 0.72.
- b. 0.20.
- d. 1.39.

***15. (LO 6)** Schopenhauer Company exchanged an old machine, with a book value of \$39,000 and a fair value of \$35,000, and paid \$10,000 cash for a similar new machine. The transaction has commercial substance. At what amount should the machine acquired in the exchange be recorded on Schopenhauer's books?

- a. \$45,000.
- c. \$49,000.
- b. \$46,000.
- d. \$50,000.

***16. (LO 6)** In exchanges of assets in which the exchange has commercial substance:

- a. neither gains nor losses are recognized immediately.
- b. gains, but not losses, are recognized immediately.
- c. losses, but not gains, are recognized immediately.
- d. both gains and losses are recognized immediately.

Solutions

1. d. All of the costs (\$1,200 + \$200 + \$400) in addition to the cash price (\$24,000) should be included in the cost of the equipment because they were necessary expenditures to acquire the asset and make it ready for its intended use. The other choices are therefore incorrect.

2. d. When an addition is made to plant assets, it is intended to increase productive capacity, increase the assets' useful life, or increase the efficiency of the assets. This is called a capital expenditure. The other choices are incorrect because (a) additions to plant assets are not revenue expenditures because the additions will have a long-term useful life whereas revenue expenditures are minor repairs and maintenance that do not prolong the life of the assets; (b) additions to plant assets are debited to Plant Assets, not Maintenance and Repairs Expense, because the Maintenance and Repairs Expense account is used to record expenditures not intended to increase the life of the assets; and (c) additions to plant assets are debited to Plant Assets, not Purchases, because the Purchases account is used to record assets intended for resale (inventory).

3. b. Depreciation is a process of allocating the cost of an asset over its useful life, not a process of (a) valuation, (c) cash accumulation, or (d) appraisal.

4. d. Accumulated depreciation will be the sum of 2 years of depreciation expense. Annual depreciation for this asset is $(\$400,000 - \$10,000)/5 = \$78,000$. The sum of 2 years' depreciation is therefore $\$156,000 (\$78,000 + \$78,000)$, not (a) \$80,000, (b) \$160,000, or (c) \$78,000.

5. d. The units-of-activity method takes salvage value into consideration; therefore, the depreciable cost is \$10,000. This amount is divided by total estimated activity. The resulting number is multiplied by the units of activity used in 2019 and 2020 to compute the accumulated depreciation at the end of 2020, the second year of the asset's use. The other choices are therefore incorrect.

6. b. For the double-declining method, the depreciation rate would be 25% or $(1/8 \times 2)$. For 2020, annual depreciation expense is $\$15,000 (\$60,000 \text{ book value} \times 25\%)$; for 2021, annual depreciation expense is $\$11,250 [(\$60,000 - \$15,000) \times 25\%]$, not (a) \$6,500, (c) \$15,000, or (d) \$6,562.

7. b. When there is a change in estimated depreciation, the current and future years' depreciation computation should reflect the new estimates. The other choices are incorrect because (a) previous years' depreciation should not be adjusted when new estimates are made for depreciation, and (c) when there is a change in estimated depreciation, the current and future years' depreciation computation

should reflect the new estimates. Choice (d) is wrong because there is a correct answer.

8. d. First, calculate accumulated depreciation from January 1, 2018, through December 31, 2019, which is $\$9,600 \{[(\$60,000 - \$12,000)/10 \text{ years}] \times 2 \text{ years}\}$. Next, calculate the revised depreciable cost, which is $\$48,400 (\$60,000 - \$9,600 - \$2,000)$. Thus, the depreciation expense for 2020 is $\$12,100 (\$48,400/4)$, not (a) \$6,000, (b) \$4,800, or (c) \$15,000.

9. a. First, the book value needs to be determined. The accumulated depreciation as of June 30, 2020, is $\$36,000 [(\$80,000/10) \times 4.5 \text{ years}]$. Thus, the cost of the machine less accumulated depreciation equals $\$44,000 (\$80,000 - \$36,000)$. The loss recorded at the time of sale is $\$18,000 (\$26,000 - \$44,000)$, not (b) \$54,000, (c) \$22,000, or (d) \$46,000.

10. c. The amount of depletion is determined by computing the depletion per unit ($\$12 \text{ million}/20 \text{ million tons} = \0.60 per ton) and then multiplying that amount times the number of units extracted during the year ($2 \text{ million tons} \times \$0.60 = \$1,200,000$). This amount is debited to Inventory and credited to Accumulated Depletion. The other choices are therefore incorrect.

11. d. Research and development (R&D) costs are expensed when incurred, regardless of whether the research and development expenditures result in a successful patent or not. The other choices are true statements.

12. b. Because the \$150,000 was spent developing the patent rather than buying it from another firm, it is debited to Research and Development Expense. Only the \$35,000 spent on the successful defense can be debited to Patents, not (a) \$150,000, (c) \$185,000, or (d) \$170,000.

13. c. Reporting only totals of major classes of assets in the balance sheet is appropriate. Additional details can be shown in the notes to the financial statements. The other choices are false statements.

14. c. Asset turnover = Net sales (\$180,000)/Average total assets $[(\$200,000 + \$300,000)/2] = 0.72 \text{ times}$, not (a) 0.90, (b) 0.20, or (d) 1.39 times.

***15. a.** When an exchange has commercial substance, the debit to the new asset is equal to the fair value of the old asset plus the cash paid ($\$35,000 + \$10,000 = \$45,000$), not (b) \$46,000, (c) \$49,000, or (d) \$50,000.

***16. d.** Both gains and losses are recognized immediately when an exchange of assets has commercial substance. The other choices are therefore incorrect.

Practice Brief Exercises

- 1. (LO 2)** Fulmer Company acquires a delivery truck at a cost of \$50,000. The truck is expected to have a salvage value of \$5,000 at the end of its 5-year useful life. Compute annual depreciation expense for the first and second years using (a) the straight-line method and (b) double-declining balance.

Compute straight-line and declining-balance depreciation.

Solution

- 1. a.** Depreciable cost of \$45,000, $(\$50,000 - \$5,000)$. With a 5-year useful life, annual depreciation is \$9,000, $(\$45,000 \div 5)$. Under the straight-line method, depreciation is the same each year. Thus, depreciation is \$9,000 for both the first and second years.

b. The declining-balance rate is 40% $(20\% \times 2)$, which is applied to book value at the beginning of the year. The computations are:

	<u>Book Value</u>	\times	<u>Rate</u>	=	<u>Depreciation</u>
Year 1	\$50,000		40%		\$20,000
Year 2	$(\$50,000 - \$20,000)$		40%		\$12,000

- 2. (LO 3)** Giolito Company sells equipment on August 31, 2020, for \$20,000 cash. The equipment originally cost \$60,000 and as of January 1, 2020, had accumulated depreciation of \$38,000. Depreciation for the first 8 months of 2020 is \$6,000. Prepare the journal entries to (a) update depreciation to August 31, 2020 and (b) record the sale of the equipment.

Prepare entries for disposal by sale.

Solution

- | | | | |
|-----------|------------------------------------|------------------------|--------|
| a. | Depreciation Expense | 6,000 | |
| | Accumulated Depreciation—Equipment | | 6,000 |
| b. | Cash | 20,000 | |
| | Accumulated Depreciation—Equipment | 44,000 | |
| | Equipment | | 60,000 |
| | Gain on Disposal of Plant Assets | | 4,000 |
| | Cost of equipment | \$60,000 | |
| | Less: Accumulated depreciation | 44,000* | |
| | Book value at date of disposal | <u>16,000</u> | |
| | Proceeds from sale | <u>20,000</u> | |
| | Gain on disposal | <u><u>\$ 4,000</u></u> | |

*\$38,000 + \$6,000

- 3. (LO 4) Financial Statement** Lucas Company acquires a limited-life franchise for \$200,000 on January 2, 2020. Its estimated useful life is 10 years. (a) Prepare the journal entry to record amortization expense for the first year. (b) Show how this franchise is reported on the balance sheet at the end of the first year.

Prepare amortization expense entry and balance sheet presentation for intangibles.

Solution

- | | | |
|---|--------|------------------|
| 3. a. Amortization Expense ($\$200,000 \div 10$)
Franchises | 20,000 | |
| b. Intangible assets
Franchises | | \$180,000 |

Practice Exercises

- 1. (LO 2)** Numo Company purchased a new machine on October 1, 2020, at a cost of \$145,000. The company estimated that the machine will have a salvage value of \$25,000. The machine is expected to be used for 20,000 working hours during its 5-year life.

Determine depreciation for partial periods

Instructions

Compute the depreciation expense under the following methods for the year indicated.

- Straight-line for 2020.
- Units-of-activity for 2020, assuming machine usage was 3,400 hours.
- Declining-balance using double the straight-line rate for 2020 and 2021.

Solution

- 1. a.** Straight-line method:

$$\left(\frac{\$145,000 - \$25,000}{5} \right) = \$24,000 \text{ per year}$$

$$2020 \text{ depreciation} = \$24,000 \times 3/12 = \underline{\underline{\$6,000}}$$

- b.** Units-of-activity method:

$$\left(\frac{\$145,000 - \$25,000}{20,000} \right) = \$6.00 \text{ per hour}$$

$$2020 \text{ depreciation} = 3,400 \text{ hours} \times \$6.00 = \underline{\underline{\$20,400}}$$

- c.** Declining-balance method:

$$2020 \text{ depreciation} = \$145,000 \times 40\% \times 3/12 = \underline{\underline{\$14,500}}$$

$$\text{Book value January 1, 2021} = \$145,000 - \$14,500 = \underline{\underline{\$130,500}}$$

$$2021 \text{ depreciation} = \$130,500 \times 40\% = \underline{\underline{\$52,200}}$$

Prepare entries to set up appropriate accounts for different intangibles; amortize intangible assets.

- 2. (LO 4)** Henning Company, organized in 2020, has the following transactions related to intangible assets.

1/2/20	Purchased patent (7-year life)	\$840,000
4/1/20	Goodwill purchased (indefinite life)	450,000
7/1/20	10-year franchise: expiration date 7/1/2030	330,000
9/1/20	Research and development costs	210,000

Instructions

Prepare the necessary entries to record these intangibles. All costs incurred were for cash. Make the adjusting entries as of December 31, 2020, recording any necessary amortization and reflecting all balances accurately as of that date.

Solution

2.	1/2/20	Patents Cash	840,000	840,000
	4/1/20	Goodwill Cash (Part of the entry to record purchase of another company)	450,000	450,000
	7/1/20	Franchises Cash	330,000	330,000
	9/1/20	Research and Development Expense Cash	210,000	210,000
	12/31/20	Amortization Expense (\$840,000 ÷ 7) + [(\$330,000 ÷ 10) × 1/2] Patents Franchises	136,500	120,000 16,500

Ending balances, 12/31/20:

$$\text{Patents} = \$720,000 (\$840,000 - \$120,000)$$

$$\text{Goodwill} = \$450,000$$

$$\text{Franchises} = \$313,500 (\$330,000 - \$16,500)$$

$$\text{R&D expense} = \$210,000$$

Practice Problems

- 1. (LO 2)** DuPage Company purchases a factory machine at a cost of \$18,000 on January 1, 2020. DuPage expects the machine to have a salvage value of \$2,000 at the end of its 4-year useful life.

During its useful life, the machine is expected to be used 160,000 hours. Actual annual hourly use was 2020, 40,000; 2021, 60,000; 2022, 35,000; and 2023, 25,000.

Compute depreciation under different methods.

Instructions

Prepare depreciation schedules for the following methods: (a) straight-line, (b) units-of-activity, and (c) declining-balance using double the straight-line rate.

Solution

- 1. a.**

Straight-Line Method

Year	Computation			Annual Depreciation Expense	End of Year	
	Depreciable Cost*	×	Depreciation Rate		Accumulated Depreciation	Book Value
2020	\$16,000		25%	\$4,000	\$ 4,000	\$14,000**
2021	16,000		25%	4,000	8,000	10,000
2022	16,000		25%	4,000	12,000	6,000
2023	16,000		25%	4,000	16,000	2,000

*\$18,000 – \$2,000.

**\$18,000 – \$4,000.

- b.**

Units-of-Activity Method

Year	Computation			Annual Depreciation Expense	End of Year	
	Units of Activity	×	Depreciable Cost/Unit		Accumulated Depreciation	Book Value
2020	40,000		\$0.10*	\$4,000	\$ 4,000	\$14,000
2021	60,000		0.10	6,000	10,000	8,000
2022	35,000		0.10	3,500	13,500	4,500
2023	25,000		0.10	2,500	16,000	2,000

*(\$18,000 – \$2,000) ÷ 160,000.

- c.**

Declining-Balance Method

Year	Computation			Annual Depreciation Expense	End of Year	
	Book Value Beginning of Year	×	Depreciation Rate*		Accumulated Depreciation	Book Value
2020	\$18,000		50%	\$9,000	\$ 9,000	\$9,000
2021	9,000		50%	4,500	13,500	4,500
2022	4,500		50%	2,250	15,750	2,250
2023	2,250		50%	250**	16,000	2,000

* $\frac{1}{4} \times 2$.

**Adjusted to \$250 because ending book value should not be less than expected salvage value.

- 2. (LO 3)** On January 1, 2020, Skyline Limousine Co. purchased a limo at an acquisition cost of \$28,000. The vehicle has been depreciated by the straight-line method using a 4-year service life and a \$4,000 salvage value. The company's fiscal year ends on December 31.

Record disposal of plant asset.

Instructions

Prepare the journal entry or entries to record the disposal of the limousine assuming that it was:

- Retired and scrapped on January 1, 2024.
- Sold for \$5,000 on July 1, 2023.

Solution

2. a. 1/1/24	Accumulated Depreciation—Equipment Loss on Disposal of Plant Assets Equipment (To record retirement of limousine)	24,000 4,000 28,000
b. 7/1/23	Depreciation Expense* Accumulated Depreciation—Equipment (To record depreciation to date of disposal)	3,000 3,000
	Cash Accumulated Depreciation—Equipment** Loss on Disposal of Plant Assets Equipment (To record sale of limousine)	5,000 21,000 2,000 28,000

* $[(\$28,000 - \$4,000) \div 4] \times \frac{1}{2}$.

** $[(\$28,000 - \$4,000) \div 4] \times 3 = \$18,000$; $\$18,000 + \$3,000$.

WileyPLUS

Brief Exercises, DO IT! Exercises, Exercises, Problems, and many additional resources are available for practice in WileyPLUS.

Note: All asterisked Questions, Exercises, and Problems relate to material in the appendix to the chapter.

Questions

1. Sid Watney is uncertain about the applicability of the historical cost principle to plant assets. Explain the principle to Sid.
2. What are some examples of land improvements?
3. Lynn Company acquires the land and building owned by Noble Company. What types of costs may be incurred to make the asset ready for its intended use if Lynn Company wants to use (a) only the land, and (b) both the land and the building?
4. In a recent newspaper release, the president of Downs Company asserted that something has to be done about depreciation. The president said, “Depreciation does not come close to accumulating the cash needed to replace the asset at the end of its useful life.” What is your response to the president?
5. Andrew is studying for the next accounting examination. He asks your help on two questions: (a) What is salvage value? (b) Is salvage value used in determining periodic depreciation under each depreciation method? Answer Andrew’s questions.
6. Contrast the straight-line method and the units-of-activity method as to (a) useful life, and (b) the pattern of periodic depreciation over useful life.
7. Contrast the effects of the three depreciation methods on annual depreciation expense.
8. In the fourth year of an asset’s 5-year useful life, the company decides that the asset will have a 6-year service life. How should the revision of depreciation be recorded? Why?
9. Distinguish between revenue expenditures and capital expenditures during useful life.
10. How is a gain or loss on the sale of a plant asset computed?
11. Romero Corporation owns a machine that is fully depreciated but is still being used. How should Romero account for this asset and report it in the financial statements?
12. What are natural resources, and what are their distinguishing characteristics?
13. Explain the concept of depletion and how it is computed.
14. What are the similarities and differences between the terms depreciation, depletion, and amortization?
15. Rowand Company hires an accounting intern who says that intangible assets should always be amortized over their legal lives. Is the intern correct? Explain.
16. Goodwill has been defined as the value of all favorable attributes that relate to a business. What types of attributes could result in goodwill?
17. Jimmy West, a business major, is working on a case problem for one of his classes. In the case problem, the company needs to raise cash to market a new product it developed. Ron Thayer, an engineering major, takes one look at the company’s balance sheet and says, “This company has an awful lot of goodwill. Why don’t you recommend that they sell some of it to raise cash?” How should Jimmy respond to Ron?
18. Under what conditions is goodwill recorded?
19. Often, research and development costs provide companies with benefits that last a number of years. (For example, these costs can lead to the development of a patent that will increase the company’s income for many years.) However, generally accepted accounting principles require that such costs be recorded as an expense when incurred. Why?

20. McDonald's Corporation reports total average assets of \$28.9 billion and net sales of \$20.5 billion. What is the company's asset turnover?

21. Stark Corporation and Zuber Corporation operate in the same industry. Stark uses the straight-line method to account for depreciation; Zuber uses an accelerated method. Explain what complications might arise in trying to compare the results of these two companies.

22. Gomez Corporation uses straight-line depreciation for financial reporting purposes but an accelerated method for tax purposes. Is it acceptable to use different methods for the two purposes? What is Gomez's motivation for doing this?

23. You are comparing two companies in the same industry. You have determined that Ace Corp. depreciates its plant assets over a 40-year life, whereas Liu Corp. depreciates its plant assets over a 20-year

life. Discuss the implications this has for comparing the results of the two companies.

24. Sosa Company is doing significant work to revitalize its warehouses. It is not sure whether it should capitalize these costs or expense them. What are the implications for current-year net income and future net income of expensing versus capitalizing these costs?

***25.** When assets are exchanged in a transaction involving commercial substance, how is the gain or loss on disposal of plant assets computed?

***26.** Unruh Refrigeration Company trades in an old machine on a new model when the fair value of the old machine is greater than its book value. The transaction has commercial substance. Should Unruh recognize a gain on disposal of plant assets? If the fair value of the old machine is less than its book value, should Unruh recognize a loss on disposal of plant assets?

Brief Exercises

BE10.1 (LO 1) The following expenditures were incurred by McCoy Company in purchasing land: cash price \$50,000, accrued taxes \$3,000, attorneys' fees \$2,500, real estate broker's commission \$2,000, and clearing and grading \$3,500. What is the cost of the land?

Determine the cost of land.

BE10.2 (LO 1) Rich Castillo Company incurs the following expenditures in purchasing a truck: cash price \$30,000, accident insurance \$2,000, sales taxes \$2,100, motor vehicle license \$100, and painting and lettering \$400. What is the cost of the truck?

Determine the cost of a truck.

BE10.3 (LO 1) Flaherty Company had the following two transactions related to its delivery truck.

Prepare entries for delivery truck costs.

1. Paid \$45 for an oil change.
2. Paid \$400 to install special gear unit, which increases the operating efficiency of the truck.

Prepare Flaherty's journal entries to record these two transactions.

BE10.4 (LO 2) Corales Company acquires a delivery truck at a cost of \$38,000. The truck is expected to have a salvage value of \$6,000 at the end of its 4-year useful life. Compute annual depreciation expense for the first and second years using the straight-line method.

Compute straight-line depreciation.

BE10.5 (LO 2) Chisenhall Company purchased land and a building on January 1, 2020. Management's best estimate of the value of the land was \$100,000 and of the building \$200,000. However, management told the accounting department to record the land at \$220,000 and the building at \$80,000. The building is being depreciated on a straight-line basis over 15 years with no salvage value. Why do you suppose management requested this accounting treatment? Is it ethical?

Compute depreciation and evaluate treatment.

BE10.6 (LO 2) Depreciation information for Corales Company is given in BE10.4. Assuming the declining-balance depreciation rate is double the straight-line rate, compute annual depreciation for the first and second years under the declining-balance method.

Compute declining-balance depreciation.

BE10.7 (LO 2) Rosco Taxi Service uses the units-of-activity method in computing depreciation on its taxicabs. Each cab is expected to be driven 150,000 miles. Taxi no. 10 cost \$39,500 and is expected to have a salvage value of \$500. Taxi no. 10 is driven 30,000 miles in year 1 and 20,000 miles in year 2. Compute the depreciation for each year.

Compute depreciation using the units-of-activity method.

BE10.8 (LO 2) On January 1, 2020, the Morgantown Company ledger shows Equipment \$32,000 and Accumulated Depreciation—Equipment \$9,000. The depreciation resulted from using the straight-line method with a useful life of 10 years and salvage value of \$2,000. On this date, the company concludes that the equipment has a remaining useful life of only 4 years with the same salvage value. Compute the revised annual depreciation.

Compute revised depreciation.

BE10.9 (LO 3) Prepare journal entries to record the following.

Prepare entries for disposal by retirement.

- a. Sound Tracker Company retires its delivery equipment, which cost \$41,000. Accumulated depreciation is also \$41,000 on this delivery equipment. No salvage value is received.

- b.** Assume the same information as (a), except that accumulated depreciation is \$37,000, instead of \$41,000, on the delivery equipment.

Prepare entries for disposal by sale.

Prepare depletion entry and balance sheet presentation for natural resources.

Prepare amortization expense entry and balance sheet presentation for intangibles.

Classify long-lived assets on balance sheet.

Calculate asset turnover.

Prepare entry for disposal by exchange.

Prepare entry for disposal by exchange.

BE10.10 (LO 3) Gunkelson Company sells equipment on September 30, 2020, for \$18,000 cash. The equipment originally cost \$72,000 and as of January 1, 2020, had accumulated depreciation of \$42,000. Depreciation for the first 9 months of 2020 is \$5,250. Prepare the journal entries to (a) update depreciation to September 30, 2020, and (b) record the sale of the equipment.

BE10.11 (LO 4) Financial Statement Franceour Mining Co. purchased for \$7 million a mine that is estimated to have 35 million tons of ore and no salvage value. In the first year, 5 million tons of ore are extracted.

- Prepare the journal entry to record depletion for the first year.
- Show how this mine is reported on the balance sheet at the end of the first year.

BE10.12 (LO 4) Financial Statement Campanez Company purchases a patent for \$140,000 on January 2, 2020. Its estimated useful life is 10 years.

- Prepare the journal entry to record amortization expense for the first year.
- Show how this patent is reported on the balance sheet at the end of the first year.

BE10.13 (LO 5) Financial Statement Information related to plant assets, natural resources, and intangibles at the end of 2020 for Dent Company is as follows: buildings \$1,100,000, accumulated depreciation—buildings \$600,000, goodwill \$410,000, coal mine \$500,000, and accumulated depletion—coal mine \$108,000. Prepare a partial balance sheet of Dent Company for these items.

BE10.14 (LO 5) In a recent annual report, **Target** reported beginning total assets of \$44.1 billion, ending total assets of \$44.5 billion, and net sales of \$63.4 billion. Compute Target's asset turnover.

***BE10.15 (LO 6)** Olathe Company exchanges old delivery equipment for new delivery equipment. The book value of the old delivery equipment is \$31,000 (cost \$61,000 less accumulated depreciation \$30,000). Its fair value is \$24,000, and cash of \$5,000 is paid. Prepare the entry to record the exchange, assuming the transaction has commercial substance.

***BE10.16 (LO 6)** Assume the same information as BE10.15, except that the fair value of the old delivery equipment is \$33,000. Prepare the entry to record the exchange.

DO IT! Exercises

Explain accounting for cost of plant assets.

DO IT! 10.1 (LO 1) Lofton Company purchased a delivery truck. The total cash payment was \$27,900, including the following items.

Negotiated purchase price	\$24,000
Installation of special shelving	1,100
Painting and lettering	900
Motor vehicle license	100
Annual insurance policy	500
Sales tax	1,300
Total paid	<u><u>\$27,900</u></u>

Explain how each of these costs would be accounted for.

DO IT! 10.2a (LO 2) On January 1, 2020, Emporia Country Club purchased a new riding mower for \$15,000. The mower is expected to have an 8-year life with a \$3,000 salvage value. What journal entry would Emporia make at December 31, 2020, if it uses straight-line depreciation?

DO IT! 10.2b (LO 2) Pinewood Corporation purchased a piece of equipment for \$70,000. It estimated an 8-year life and \$2,000 salvage value. At the end of year four (before the depreciation adjustment), it estimated the new total life to be 10 years and the new salvage value to be \$6,000. Compute the revised depreciation.

DO IT! 10.3 (LO 3) Napoli Manufacturing has old equipment that cost \$52,000. The equipment has accumulated depreciation of \$28,000. Napoli has decided to sell the equipment.

Calculate depreciation expense and make journal entry.

Calculate revised depreciation

Make journal entries to record plant asset disposal.

- a. What entry would Napoli make to record the sale of the equipment for \$26,000 cash?
 b. What entry would Napoli make to record the sale of the equipment for \$15,000 cash?

DO IT! 10.4 (LO 4) Match the statement with the term most directly associated with it.

Goodwill	Amortization
Intangible assets	Franchises
Research and development costs	

- _____ Rights, privileges, and competitive advantages that result from the ownership of long-lived assets that do not possess physical substance.
- _____ The allocation of the cost of an intangible asset to expense in a rational and systematic manner.
- _____ A right to sell certain products or services, or use certain trademarks or trade names, within a designated geographic area.
- _____ Costs incurred by a company that often lead to patents or new products. These costs must be expensed as incurred.
- _____ The excess of the cost of a company over the fair value of the net assets acquired.

DO IT! 10.5 (LO 5) For 2020, Sale Company reported beginning total assets of \$300,000 and ending total assets of \$340,000. Its net income for this period was \$50,000, and its net sales were \$400,000. Compute the company's asset turnover for 2020.

Match intangibles classifications concepts.

Calculate asset turnover.

Exercises

E10.1 (LO 1) Writing The following expenditures relating to plant assets were made by Prather Company during the first 2 months of 2020.

Determine cost of plant acquisitions.

- Paid \$5,000 of accrued taxes at time plant site was acquired.
- Paid \$200 insurance to cover possible accident loss on new factory machinery while the machinery was in transit.
- Paid \$850 sales taxes on new delivery truck.
- Paid \$17,500 for parking lots and driveways on new plant site.
- Paid \$250 to have company name and advertising slogan painted on new delivery truck.
- Paid \$8,000 for installation of new factory machinery.
- Paid \$900 for one-year accident insurance policy on new delivery truck.
- Paid \$75 motor vehicle license fee on the new truck.

Instructions

- Explain the application of the historical cost principle in determining the acquisition cost of plant assets.
- List the numbers of the foregoing transactions, and opposite each indicate the account title to which each expenditure should be debited.

E10.2 (LO 1) Benedict Company incurred the following costs.

Determine property, plant, and equipment costs.

1. Sales tax on factory machinery purchased	\$ 5,000
2. Painting of and lettering on truck immediately upon purchase	700
3. Installation and testing of factory machinery	2,000
4. Real estate broker's commission on land purchased	3,500
5. Insurance premium paid for first year's insurance on new truck	880
6. Cost of landscaping on property purchased	7,200
7. Cost of paving parking lot for new building constructed	17,900
8. Cost of clearing, draining, and filling land	13,300
9. Architect's fees on self-constructed building	10,000

Instructions

Indicate to which account Benedict would debit each of the costs.

Determine acquisition costs of land.

E10.3 (LO 1) On March 1, 2020, Westmorlan Company acquired real estate on which it planned to construct a small office building. The company paid \$75,000 in cash. An old warehouse on the property was razed at a cost of \$8,600; the salvaged materials were sold for \$1,700. Additional expenditures before construction began included \$1,100 attorney's fee for work concerning the land purchase, \$5,000 real estate broker's fee, \$7,800 architect's fee, and \$14,000 to put in driveways and a parking lot.

Instructions

- Determine the amount to be reported as the cost of the land.
- For each cost not used in part (a), indicate the account to be debited.

Understand depreciation concepts.

E10.4 (LO 2) Tom Parkey has prepared the following list of statements about depreciation.

- Depreciation is a process of asset valuation, not cost allocation.
- Depreciation provides for the proper matching of expenses with revenues.
- The book value of a plant asset should approximate its fair value.
- Depreciation applies to three classes of plant assets: land, buildings, and equipment.
- Depreciation does not apply to a building because its usefulness and revenue-producing ability generally remain intact over time.
- The revenue-producing ability of a depreciable asset will decline due to wear and tear and to obsolescence.
- Recognizing depreciation on an asset results in an accumulation of cash for replacement of the asset.
- The balance in accumulated depreciation represents the total cost that has been charged to expense.
- Depreciation expense and accumulated depreciation are reported on the income statement.
- Four factors affect the computation of depreciation: cost, useful life, salvage value, and residual value.

Instructions

Identify each statement as true or false. If false, indicate how to correct the statement.

Compute depreciation under units-of-activity method.

E10.5 (LO 2) Yello Bus Lines uses the units-of-activity method in depreciating its buses. One bus was purchased on January 1, 2020, at a cost of \$148,000. Over its 4-year useful life, the bus is expected to be driven 100,000 miles. Salvage value is expected to be \$8,000.

Instructions

- Compute the depreciable cost per unit.
- Prepare a depreciation schedule assuming actual mileage was: 2020, 26,000; 2021, 32,000; 2022, 25,000; and 2023, 17,000.

Determine depreciation for partial periods.

E10.6 (LO 2) Rottino Company purchased a new machine on October 1, 2020, at a cost of \$150,000. The company estimated that the machine will have a salvage value of \$12,000. The machine is expected to be used for 10,000 working hours during its 5-year life.

Instructions

Compute the depreciation expense under the following methods for the year indicated.

- Straight-line for 2020.
- Units-of-activity for 2020, assuming machine usage was 1,700 hours.
- Declining-balance using double the straight-line rate for 2020 and 2021.

Compute depreciation using different methods.

E10.7 (LO 2) Financial Statement Linton Company purchased a delivery truck for \$34,000 on January 1, 2020. The truck has an expected salvage value of \$2,000, and is expected to be driven 100,000 miles over its estimated useful life of 8 years. Actual miles driven were 15,000 in 2020 and 12,000 in 2021.

Instructions

- Compute depreciation expense for 2020 and 2021 using (1) the straight-line method, (2) the units-of-activity method, and (3) the double-declining-balance method.
- Assume that Linton uses the straight-line method.
 - Prepare the journal entry to record 2020 depreciation.
 - Show how the truck would be reported in the December 31, 2020, balance sheet.

E10.8 (LO 2) Terry Wade, the new controller of Hellickson Company, has reviewed the expected useful lives and salvage values of selected depreciable assets at the beginning of 2020. His findings are as follows.

Type of Asset	Date Acquired	Cost	Accumulated Depreciation 1/1/20	Useful Life in Years		Salvage Value	
				Old	Proposed	Old	Proposed
Building	1/1/14	\$800,000	\$114,000	40	50	\$40,000	\$26,000
Warehouse	1/1/15	100,000	19,000	25	20	5,000	6,000

All assets are depreciated by the straight-line method. Hellickson Company uses a calendar year in preparing annual financial statements. After discussion, management has agreed to accept Terry's proposed changes.

Instructions

- a. Compute the revised annual depreciation on each asset in 2020. (Show computations.)
- b. Prepare the entry (or entries) to record depreciation on the building in 2020.

E10.9 (LO 3) Presented below are selected transactions at Ridge Company for 2020.

- Jan. 1 Retired a piece of machinery that was purchased on January 1, 2010. The machine cost \$62,000 on that date. It had a useful life of 10 years with no salvage value.
- June 30 Sold a computer that was purchased on January 1, 2017. The computer cost \$45,000. It had a useful life of 5 years with no salvage value. The computer was sold for \$14,000.
- Dec. 31 Discarded a delivery truck that was purchased on January 1, 2016. The truck cost \$33,000. It was depreciated based on a 6-year useful life with a \$3,000 salvage value.

Journalize entries for disposal of plant assets.

Instructions

Journalize all entries required on the above dates, including entries to update depreciation, where applicable, on assets disposed of. Ridge Company uses straight-line depreciation. (Assume depreciation is up to date as of December 31, 2019.)

E10.10 (LO 3) Pryce Company owns equipment that cost \$65,000 when purchased on January 1, 2017. It has been depreciated using the straight-line method based on estimated salvage value of \$5,000 and an estimated useful life of 5 years.

Journalize entries for disposal of equipment.

Instructions

Prepare Pryce Company's journal entries to record the sale of the equipment in these four independent situations.

- a. Sold for \$31,000 on January 1, 2020.
- b. Sold for \$31,000 on May 1, 2020.
- c. Sold for \$11,000 on January 1, 2020.
- d. Sold for \$11,000 on October 1, 2020.

E10.11 (LO 4) On July 1, 2020, Friedman Inc. invested \$720,000 in a mine estimated to have 900,000 tons of ore of uniform grade. During the last 6 months of 2020, 100,000 tons of ore were mined.

Journalize entries for natural resources depletion.

Instructions

- a. Prepare the journal entry to record depletion.
- b. Assume that the 100,000 tons of ore were mined, but only 80,000 units were sold. How are the costs applicable to the 20,000 unsold units reported?

E10.12 (LO 4) The following are selected 2020 transactions of Pedigo Corporation.

- Jan. 1 Purchased a small company and recorded goodwill of \$150,000. Its useful life is indefinite.
- May 1 Purchased for \$75,000 a patent with an estimated useful life of 5 years and a legal life of 20 years.

Prepare adjusting entries for amortization.

Instructions

Prepare necessary adjusting entries at December 31 to record amortization required by the events above.

Prepare entries to set up appropriate accounts for different intangibles; amortize intangible assets.

E10.13 (LO 4) Gill Company, organized in 2020, has the following transactions related to intangible assets.

1/2/20	Purchased patent (7-year life)	\$595,000
4/1/20	Goodwill purchased (indefinite life)	360,000
7/1/20	10-year franchise; expiration date 7/1/2030	480,000
9/1/20	Research and development costs	185,000

Instructions

Prepare the necessary entries to record these intangibles. All costs incurred were for cash. Make the adjusting entries as of December 31, 2020, recording any necessary amortization and reflecting all balances accurately as of that date.

Calculate asset turnover.

E10.14 (LO 5) During 2020, Paola Corporation reported net sales of \$3,500,000 and net income of \$1,500,000. Its balance sheet reported average total assets of \$1,400,000.

Instructions

Calculate the asset turnover.

Journalize entries for exchanges.

***E10.15 (LO 6)** Presented below are two independent transactions. Both transactions have commercial substance.

1. Mercy Co. exchanged old trucks (cost \$64,000 less \$22,000 accumulated depreciation) plus cash of \$17,000 for new trucks. The old trucks had a fair value of \$38,000.
2. Pence Inc. trades its used machine (cost \$12,000 less \$4,000 accumulated depreciation) for a new machine. In addition to exchanging the old machine (which had a fair value of \$11,000), Pence also paid cash of \$3,000.

Instructions

- a. Prepare the entry to record the exchange of assets by Mercy Co.
- b. Prepare the entry to record the exchange of assets by Pence Inc.

Journalize entries for the exchange of plant assets.

***E10.16 (LO 6)** Rizzo's Delivery Company and Overland's Express Delivery exchanged delivery trucks on January 1, 2020. Rizzo's truck cost \$22,000. It has accumulated depreciation of \$15,000 and a fair value of \$3,000. Overland's truck cost \$10,000. It has accumulated depreciation of \$8,000 and a fair value of \$3,000. The transaction has commercial substance.

Instructions

- a. Journalize the exchange for Rizzo's Delivery Company.
- b. Journalize the exchange for Overland's Express Delivery.

Problems: Set A

Determine acquisition costs of land and building.

P10.1A (LO 1) Venable Company was organized on January 1. During the first year of operations, the following plant asset expenditures and receipts were recorded in random order.

	<u>Debit</u>
1. Cost of filling and grading the land	\$ 4,000
2. Full payment to building contractor	690,000
3. Real estate taxes on land paid for the current year	5,000
4. Cost of real estate purchased as a plant site (land \$100,000 and building \$45,000)	145,000
5. Excavation costs for new building	35,000
6. Architect's fees on building plans	10,000
7. Accrued real estate taxes paid at time of purchase of real estate	2,000
8. Cost of parking lots and driveways	14,000
9. Cost of demolishing building to make land suitable for construction of new building	25,000
	<u><u>\$930,000</u></u>

	<u>Credit</u>
10. Proceeds from salvage of demolished building	<u>\$ 3,500</u>

Instructions

Analyze the foregoing transactions using the following column headings. Insert the number of each transaction in the Item space, and insert the amounts in the appropriate columns. For amounts entered in the Other Accounts column, also indicate the account titles.

<u>Totals</u>	
Land	\$172,500
Buildings	\$735,000

Item	Land	Buildings	Other Accounts
------	------	-----------	----------------

P10.2A (LO 2) In recent years, Avery Transportation purchased three used buses. Because of frequent turnover in the accounting department, a different accountant selected the depreciation method for each bus, and various methods were selected. Information concerning the buses is summarized as follows.

Bus	Acquired	Cost	Salvage Value	Useful Life in Years	Depreciation Method
1	1/1/18	\$ 96,000	\$ 6,000	5	Straight-line
2	1/1/18	110,000	10,000	4	Declining-balance
3	1/1/19	92,000	8,000	5	Units-of-activity

For the declining-balance method, the company uses the double-declining rate. For the units-of-activity method, total miles are expected to be 120,000. Actual miles of use in the first 3 years were 2019, 24,000; 2020, 34,000; and 2021, 30,000.

Compute depreciation under different methods.

Instructions

- a. Compute the amount of accumulated depreciation on each bus at December 31, 2020.
- b. If Bus 2 was purchased on April 1 instead of January 1, what is the depreciation expense for this bus in (1) 2018 and (2) 2019?

a. Bus 2, 12/31/19, \$82,500

P10.3A (LO 2) On January 1, 2020, Evers Company purchased the following two machines for use in its production process.

Compute depreciation under different methods.

Machine A: The cash price of this machine was \$48,000. Related expenditures included: sales tax \$1,700, shipping costs \$150, insurance during shipping \$80, installation and testing costs \$70, and \$100 of oil and lubricants to be used with the machinery during its first year of operations. Evers estimates that the useful life of the machine is 5 years with a \$5,000 salvage value remaining at the end of that time period. Assume that the straight-line method of depreciation is used.

Machine B: The recorded cost of this machine was \$180,000. Evers estimates that the useful life of the machine is 4 years with a \$10,000 salvage value remaining at the end of that time period.

Instructions

- a. Prepare the following for Machine A.
 - 1. The journal entry to record its purchase on January 1, 2020.
 - 2. The journal entry to record annual depreciation at December 31, 2020.
- b. Calculate the amount of depreciation expense that Evers should record for Machine B each year of its useful life under the following assumptions.
 - 1. Evers uses the straight-line method of depreciation.
 - 2. Evers uses the declining-balance method. The rate used is twice the straight-line rate.
 - 3. Evers uses the units-of-activity method and estimates that the useful life of the machine is 125,000 units. Actual usage is as follows: 2020, 45,000 units; 2021, 35,000 units; 2022, 25,000 units; 2023, 20,000 units.
- c. Which method used to calculate depreciation on Machine B reports the highest amount of depreciation expense in year 1 (2020)? The highest amount in year 4 (2023)? The highest total amount over the 4-year period?

b. (2) 2020 DDB depreciation
\$90,000

P10.4A (LO 2) At the beginning of 2018, Mazzaro Company acquired equipment costing \$120,000. It was estimated that this equipment would have a useful life of 6 years and a salvage value of \$12,000 at that time. The straight-line method of depreciation was considered the most appropriate to use with this type of equipment. Depreciation is to be recorded at the end of each year.

Calculate revisions to depreciation expense.

During 2020 (the third year of the equipment's life), the company's engineers reconsidered their expectations, and estimated that the equipment's useful life would probably be 7 years (in total) instead of 6 years. The estimated salvage value was not changed at that time. However, during 2023 the estimated salvage value was reduced to \$5,000.

Instructions

Indicate how much depreciation expense should be recorded each year for this equipment, by completing the following table.

	<u>Year</u>	<u>Depreciation Expense</u>	<u>Accumulated Depreciation</u>
2024 depreciation expense	2018		
\$17,900	2019		
	2020		
	2021		
	2022		
	2023		
	2024		

Journalize a series of equipment transactions related to purchase, sale, retirement, and depreciation.

P10.5A (LO 2, 3, 5) Financial Statement At December 31, 2020, Grand Company reported the following as plant assets.

Land		\$ 4,000,000
Buildings	\$28,500,000	
Less: Accumulated depreciation—buildings	<u>12,100,000</u>	16,400,000
Equipment	48,000,000	
Less: Accumulated depreciation—equipment	<u>5,000,000</u>	43,000,000
Total plant assets		<u><u>\$63,400,000</u></u>

During 2021, the following selected cash transactions occurred.

- April 1 Purchased land for \$2,130,000.
- May 1 Sold equipment that cost \$750,000 when purchased on January 1, 2017. The equipment was sold for \$450,000.
- June 1 Sold land purchased on June 1, 2011 for \$1,500,000. The land cost \$400,000.
- July 1 Purchased equipment for \$2,500,000.
- Dec. 31 Retired equipment that cost \$500,000 when purchased on December 31, 2011. The company received no proceeds related to salvage.

Instructions

- b. Depreciation Expense—Buildings \$570,000; Equipment \$4,800,000
- c. Total plant assets \$61,760,000

Record disposals.

P10.6A (LO 3) Ceda Co. has equipment that cost \$80,000 and that has been depreciated \$50,000.

Instructions

Record the disposal under the following assumptions.

- b. \$9,000 loss

- a. It was scrapped as having no value.
- b. It was sold for \$21,000.
- c. It was sold for \$31,000.

Prepare entries to record transactions related to acquisition and amortization of intangibles; prepare the intangible assets section.

P10.7A (LO 4, 5) Financial Statement The intangible assets section of Sappelt Company at December 31, 2020, is presented below.

Patents (\$70,000 cost less \$7,000 amortization)	\$63,000
Franchises (\$48,000 cost less \$19,200 amortization)	<u>28,800</u>
Total	<u><u>\$91,800</u></u>

The patent was acquired in January 2020 and has a useful life of 10 years. The franchise was acquired in January 2017 and also has a useful life of 10 years. The following cash transactions may have affected intangible assets during 2021.

- Jan. 2 Paid \$27,000 legal costs to successfully defend the patent against infringement by another company.
- Jan.–June Developed a new product, incurring \$140,000 in research and development costs. A patent was granted for the product on July 1. Its useful life is equal to its legal life.
- Sept. 1 Paid \$50,000 to an extremely large defensive lineman to appear in commercials advertising the company's products. The commercials will air in September and October.
- Oct. 1 Acquired a franchise for \$140,000. The franchise has a useful life of 50 years.

Instructions

- a. Prepare journal entries to record the transactions above.
- b. Prepare journal entries to record the 2021 amortization expense.
- c. Prepare the intangible assets section of the balance sheet at December 31, 2021.

P10.8A (LO 4) Due to rapid turnover in the accounting department, a number of transactions involving intangible assets were improperly recorded by Goins Company in 2020.

1. Goins developed a new manufacturing process, incurring research and development costs of \$136,000. The company also purchased a patent for \$60,000. In early January, Goins capitalized \$196,000 as the cost of the patents. Patent amortization expense of \$19,600 was recorded based on a 10-year useful life.
2. On July 1, 2020, Goins purchased a small company and as a result acquired goodwill of \$92,000. Goins recorded a half-year's amortization in 2020, based on a 50-year life (\$920 amortization). The goodwill has an indefinite life.

- b. Amortization Expense (patents) \$10,000
- Amortization Expense (franchises) \$5,500
- c. Total intangible assets \$243,300

Prepare entries to correct errors made in recording and amortizing intangible assets.

Instructions

Prepare all journal entries necessary to correct any errors made during 2020. Assume the books have not yet been closed for 2020.

1. R&D Exp. \$136,000

P10.9A (LO 5) Writing LaPorta Company and Lott Corporation, two corporations of roughly the same size, are both involved in the manufacture of in-line skates. Each company depreciates its plant assets using the straight-line approach. An investigation of their financial statements reveals the following information.

Calculate and comment on asset turnover.

	LaPorta Co.	Lott Corp.
Net income	\$ 800,000	\$1,000,000
Sales revenue	1,300,000	1,180,000
Average total assets	2,500,000	2,000,000
Average plant assets	1,800,000	1,000,000

Instructions

- a. For each company, calculate the asset turnover.
- b. Based on your calculations in part (a), comment on the relative effectiveness of the two companies in using their assets to generate sales and produce net income.

P10.10A (LO 5) Financial Statement The adjusted trial balance of Feagler Company for the year ended December 31, 2020, is as follows.

Prepare financial statements.

	Debit	Credit
Cash	\$ 5,500	
Accounts Receivable	3,100	
Note Receivable (due February 20, 2021)	2,000	
Inventory	6,000	
Timberland	21,000	
Land	14,000	
Equipment	35,400	
Patents	11,000	
Accumulated Depletion		\$ 3,900
Allowance for Doubtful Accounts		1,000

	<u>Debit</u>	<u>Credit</u>
Accumulated Depreciation—Equipment		\$ 8,300
Notes Payable (due January 15, 2021)		4,600
Accounts Payable		2,300
Owner's Capital		68,500
Sales Revenue		52,000
Interest Revenue		400
Cost of Goods Sold	\$ 23,000	
Salaries and Wages Expense	11,400	
Depreciation Expense	2,100	
Amortization Expense	1,600	
Research and Development Expense	1,300	
Bad Debt Expense	500	
License Expense	300	
Interest Expense	800	
Loss on Disposal of Plant Assets	2,000	
Total	<u><u>\$141,000</u></u>	<u><u>\$141,000</u></u>

Instructions

Net income \$9,400

Prepare a multiple-step income statement and retained earnings statement for 2020, and a classified balance sheet as of December 31, 2020.

Continuing Case

Cookie Creations

(Note: This is a continuation of the Cookie Creations case from Chapters 1 through 9.)

CC10 Natalie is also thinking of buying a van that will be used only for business. Natalie is concerned about the impact of the van's cost on her income statement and balance sheet. She has come to you for advice on calculating the van's depreciation.

Go to WileyPLUS for complete case details and instructions.

Ethics Case

EC10 Turner Container Company is suffering declining sales of its principal product, nonbiodegradable plastic cartons. The president, Robert Griffin, instructs his controller, Alexis Landrum, to lengthen asset lives to reduce depreciation expense. A processing line of automated plastic extruding equipment, purchased for \$3.5 million in January 2020, was originally estimated to have a useful life of 8 years and a salvage value of \$300,000. Depreciation has been recorded for 2 years on that basis. Robert wants the estimated life changed to 12 years total, and the straight-line method continued. Alexis is hesitant to make the change, believing it is unethical to increase net income in this manner. Robert says, "Hey, the life is only an estimate, and I've heard that our competition uses a 12-year life on their production equipment."

Instructions

- Who are the stakeholders in this situation?
- Is the change in asset life unethical, or is it simply a good business practice by an astute president?
- What is the effect of Robert Griffin's proposed change on income before taxes in the year of change?

Comprehensive Accounting Cycle Review

ACR10 Hassellhouf Company's trial balance at December 31, 2020, is as follows. All 2020 transactions have been recorded except for the items described following the trial balance.

	<u>Debit</u>	<u>Credit</u>
Cash	\$ 28,000	
Accounts Receivable	36,800	
Notes Receivable	10,000	
Interest Receivable	-0-	
Inventory	36,200	
Prepaid Insurance	3,600	
Land	20,000	
Buildings	150,000	
Equipment	60,000	
Patents	9,000	
Allowance for Doubtful Accounts		\$ 500
Accumulated Depreciation—Buildings		50,000
Accumulated Depreciation—Equipment		24,000
Accounts Payable		27,300
Salaries and Wages Payable		-0-
Unearned Rent Revenue		6,000
Notes Payable (due in 2021)		11,000
Interest Payable		-0-
Notes Payable (due after 2021)		30,000
Owner's Capital		113,600
Owner's Drawings	12,000	
Sales Revenue		905,000
Interest Revenue		-0-
Rent Revenue		-0-
Gain on Disposal of Plant Assets		-0-
Bad Debt Expense	-0-	
Cost of Goods Sold	630,000	
Depreciation Expense	-0-	
Insurance Expense	-0-	
Interest Expense	-0-	
Other Operating Expenses	61,800	
Amortization Expense	-0-	
Salaries and Wages Expense	110,000	
Total	<u>\$1,167,400</u>	<u>\$1,167,400</u>

Unrecorded transactions:

- On May 1, 2020, Hassellhouf purchased equipment for \$21,200 plus sales taxes of \$1,600 (all paid in cash).
- On July 1, 2020, Hassellhouf sold for \$3,500 equipment which originally cost \$5,000. Accumulated depreciation on this equipment at January 1, 2020, was \$1,800; 2020 depreciation prior to the sale of the equipment was \$450.
- On December 31, 2020, Hassellhouf sold on account \$9,000 of inventory that cost \$6,300.
- Hassellhouf estimates that uncollectible accounts receivable at year-end is \$3,500.
- The note receivable is a one-year, 8% note dated April 1, 2020. No interest has been recorded.
- The balance in prepaid insurance represents payment of a \$3,600 6-month premium on September 1, 2020.
- The building is being depreciated using the straight-line method over 30 years. The salvage value is \$30,000.
- The equipment owned prior to this year is being depreciated using the straight-line method over 5 years. The salvage value is 10% of cost.
- The equipment purchased on May 1, 2020, is being depreciated using the straight-line method over 5 years, with a salvage value of \$1,800.
- The patent was acquired on January 1, 2020, and has a useful life of 10 years from that date.
- Unpaid salaries and wages at December 31, 2020, total \$5,200.
- The unearned rent revenue of \$6,000 was received on December 1, 2020, for 3 months' rent.
- Both the short-term and long-term notes payable are dated January 1, 2020, and carry a 9% interest rate. All interest is payable in the next 12 months.

Instructions

- b. **Totals**
\$1,205,040
- d. **Total assets**
\$259,200
- a. Prepare journal entries for the transactions listed above.
 - b. Prepare an updated December 31, 2020, trial balance.
 - c. Prepare a 2020 income statement and an owner's equity statement.
 - d. Prepare a December 31, 2020, classified balance sheet.

Expand Your Critical Thinking**Financial Reporting Problem: Apple Inc.**

CT10.1 The financial statements of **Apple Inc.** are presented in Appendix A. The complete annual report, including the notes to the financial statements, is available at the company's website.

Instructions

Refer to Apple's financial statements and answer the following questions.

- a. What was the total cost and book value of property, plant, and equipment at September 26, 2015?
- b. What was the amount of depreciation and amortization expense for each of the three years 2013–2015?
- c. Using the statement of cash flows, what is the amount of capital spending in 2015 and 2014? (Ignore business acquisitions and intangible assets.)
- d. Where does the company disclose its intangible assets, and what types of intangibles did it have at September 26, 2015?

Comparative Analysis Problem: PepsiCo, Inc. vs. The Coca-Cola Company

CT10.2 **PepsiCo, Inc.**'s financial statements are presented in Appendix B. Financial statements of **The Coca-Cola Company** are presented in Appendix C. The complete annual reports of PepsiCo and Coca-Cola, including the notes to the financial statements, are available at each company's respective website.

Instructions

- a. Compute the asset turnover for each company for 2015.
- b. What conclusions concerning the efficiency of assets can be drawn from these data?

Comparative Analysis Problem: Amazon.com, Inc. vs. Wal-Mart Stores, Inc.

CT10.3 **Amazon.com, Inc.**'s financial statements are presented in Appendix D. Financial statements of **Wal-Mart Stores, Inc.** are presented in Appendix E. The complete annual reports of Amazon and Wal-Mart, including the notes to the financial statements, are available at each company's respective website.

Instructions

- a. Compute the asset turnover for each company using the financial statements in Appendices D and E.
- b. What conclusions concerning the efficiency of assets can be drawn from these data?

Real-World Focus

CT10.4 A company's annual report identifies the amount of its plant assets and the depreciation method used.

Instructions

Search the Internet for the annual report of a company of your choice and then answer the following questions.

- a. What is the name of the company?
- b. What is the Internet address of the annual report?
- c. At fiscal year-end, what is the net amount of its plant assets?
- d. What is the accumulated depreciation?
- e. Which method of depreciation does the company use?

Decision-Making Across the Organization

CT10.5 Pinson Company and Estes Company are two proprietorships that are similar in many respects. One difference is that Pinson Company uses the straight-line method and Estes Company uses the declining-balance method at double the straight-line rate. On January 2, 2018, both companies acquired the depreciable assets shown below.

Asset	Cost	Salvage Value	Useful Life
Buildings	\$360,000	\$20,000	40 years
Equipment	130,000	10,000	10 years

Including the appropriate depreciation charges, annual net income for the companies in the years 2018, 2019, and 2020 and total income for the 3 years were as follows.

	2018	2019	2020	Total
Pinson Company	\$84,000	\$88,400	\$90,000	\$262,400
Estes Company	68,000	76,000	85,000	229,000

At December 31, 2020, the balance sheets of the two companies are similar except that Estes Company has more cash than Pinson Company.

Lynda Peace is interested in buying one of the companies. She comes to you for advice.

Instructions

With the class divided into groups, answer the following.

- Determine the annual and total depreciation recorded by each company during the 3 years.
- Assuming that Estes Company also uses the straight-line method of depreciation instead of the declining-balance method as in (a), prepare comparative income data for the 3 years.
- Which company should Lynda Peace buy? Why?

Communication Activity

CT10.6 The chapter presented some concerns regarding the current accounting standards for research and development expenditures.

Instructions

Assume that you are either (a) the president of a company that is very dependent on ongoing research and development, writing a memo to the FASB complaining about the current accounting standards regarding research and development, or (b) the FASB member defending the current standards regarding research and development. Your memo should address the following questions.

- By requiring expensing of R&D, do you think companies will spend less on R&D? Why or why not? What are the possible implications for the competitiveness of U.S. companies?
- If a company makes a commitment to spend money for R&D, it must believe it has future benefits. Shouldn't these costs therefore be capitalized just like the purchase of any long-lived asset that is believed to have future benefits?

All About You

CT10.7 The Feature Story at the beginning of the chapter discussed the company **Rent-A-Wreck**. Note that the trade name Rent-A-Wreck is a very important asset to the company, as it creates immediate product identification. As indicated in the chapter, companies invest substantial sums to ensure that their product is well-known to the consumer. Test your knowledge of who owns some famous brands and their impact on the financial statements.

Instructions

- Provide an answer to the four multiple-choice questions below.
- Which company owns both Taco Bell and Pizza Hut?
 - McDonald's.
 - Yum Brands.
 - CKE.
 - Wendy's.

2. Dairy Queen belongs to:
 - a. Breyer.
 - b. Berkshire Hathaway.
 - c. GE.
 - d. The Coca-Cola Company.
 3. Philip Morris, the cigarette maker, is owned by:
 - a. Altria.
 - b. GE.
 - c. Boeing.
 - d. ExxonMobil.
 4. AOL, a major Internet provider, belongs to:
 - a. Microsoft.
 - b. Cisco.
 - c. NBC.
 - d. Time Warner.
- b. How do you think the value of these brands is reported on the appropriate company's balance sheet?

FASB Codification Activity

CT10.8 If your school has a subscription to the FASB Codification, log in and prepare responses to the following.

- a. What does it mean to capitalize an item?
- b. What is the definition provided for an intangible asset?
- c. Your great-uncle, who is a CPA, is impressed that you are taking an accounting class. Based on his experience, he believes that depreciation is something that companies do based on past practice, not on the basis of authoritative guidance. Provide the authoritative literature to support the practice of fixed-asset depreciation.

A Look at IFRS

LEARNING OBJECTIVE 7

Compare the accounting for long-lived assets under GAAP and IFRS.

IFRS follows most of the same principles as GAAP in the accounting for property, plant, and equipment. There are, however, some significant differences in the implementation. IFRS allows the use of revaluation of property, plant, and equipment, and it also requires the use of component depreciation. In addition, there are some significant differences in the accounting for both intangible assets and impairments.

Key Points

The following are the key similarities and differences between GAAP and IFRS as related to the recording process for long-lived assets.

Similarities

- The definition for plant assets for both IFRS and GAAP is essentially the same.
- Both IFRS and GAAP follow the historical cost principle when accounting for property, plant, and equipment at date of acquisition. Cost consists of all expenditures necessary to acquire the asset and make it ready for its intended use.
- Under both IFRS and GAAP, interest costs incurred during construction are capitalized. Recently, IFRS converged to GAAP requirements in this area.
- IFRS also views depreciation as an allocation of cost over an asset's useful life. IFRS permits the same depreciation methods (e.g., straight-line, accelerated, and units-of-activity) as GAAP.
- Under both GAAP and IFRS, changes in the depreciation method used and changes in useful life are handled in current and future periods. Prior periods are not affected. GAAP recently conformed to international standards in the accounting for changes in depreciation methods.
- The accounting for subsequent expenditures (such as ordinary repairs and additions) are essentially the same under IFRS and GAAP.
- The accounting for plant asset disposals is essentially the same under IFRS and GAAP.

- Initial costs to acquire natural resources are recorded in essentially the same manner under IFRS and GAAP.
- The definition of intangible assets is essentially the same under IFRS and GAAP.
- The accounting for exchanges of nonmonetary assets has recently converged between IFRS and GAAP. GAAP now requires that gains on exchanges of nonmonetary assets be recognized if the exchange has commercial substance. This is the same framework used in IFRS.

Differences

- IFRS uses the term **residual value** rather than salvage value to refer to an owner's estimate of an asset's value at the end of its useful life for that owner.
- IFRS allows companies to revalue plant assets to fair value at the reporting date. Companies that choose to use the revaluation framework must follow revaluation procedures. If revaluation is used, it must be applied to all assets in a class of assets. Assets that are experiencing rapid price changes must be revalued on an annual basis, otherwise less frequent revaluation is acceptable.
- IFRS requires component depreciation. **Component depreciation** specifies that any significant parts of a depreciable asset that have different estimated useful lives should be separately depreciated. Component depreciation is allowed under GAAP but is seldom used.
- As in GAAP, under IFRS the costs associated with research and development are segregated into the two components. Costs in the research phase are always expensed under both IFRS and GAAP. Under IFRS, however, costs in the development phase are capitalized as Development Costs once technological feasibility is achieved.
- IFRS permits revaluation of intangible assets (except for goodwill). GAAP prohibits revaluation of intangible assets.

Looking to the Future

The IASB and FASB have identified a project that would consider expanded recognition of internally generated intangible assets. IFRS permits more recognition of intangibles compared to GAAP.

IFRS Practice

IFRS Self-Test Questions

- Which of the following statements is **correct**?
 - Both IFRS and GAAP permit revaluation of property, plant, and equipment and intangible assets (except for goodwill).
 - IFRS permits revaluation of property, plant, and equipment and intangible assets (except for goodwill).
 - Both IFRS and GAAP permit revaluation of property, plant, and equipment but not intangible assets.
 - GAAP permits revaluation of property, plant, and equipment but not intangible assets.
- Research and development costs are:
 - expensed under GAAP.
 - expensed under IFRS.
 - expensed under both GAAP and IFRS.
 - None of the above.

IFRS Exercises

IFRS10.1 What is component depreciation, and when must it be used?

IFRS10.2 What is revaluation of plant assets? When should revaluation be applied?

IFRS10.3 Some product development expenditures are recorded as development expenses and others as development costs. Explain the difference between these accounts and how a company decides which classification is appropriate.

International Financial Statement Analysis: Louis Vuitton

IFRS10.4 The financial statements of **Louis Vuitton** are presented in Appendix F. The complete annual report, including the notes to its financial statements, is available at the company's website.

Instructions

Use the company's annual report to answer the following questions.

- a. According to the notes to the financial statements, what method or methods does the company use to depreciate "property, plant, and equipment?" What useful lives does it use to depreciate property, plant, and equipment?
- b. Using the notes to the financial statements, explain how the company accounted for its intangible assets with indefinite lives.
- c. Using the notes to the financial statements, determine (1) the balance in Accumulated Amortization and Impairment for intangible assets (other than goodwill), and (2) the balance in Depreciation (and impairment) for property, plant, and equipment.

Answers to IFRS Self-Test Questions

1. b
2. a

Current Liabilities and Payroll Accounting

Chapter Preview

Inventor-entrepreneur Wilbert Murdock, as the following Feature Story notes, had to use multiple credit cards to finance his business ventures. Murdock's credit card debts would be classified as **current liabilities** because they are due every month. Yet, by making minimal payments and paying high interest each month, Murdock used this credit source long-term. Some credit card balances remain outstanding for years as they accumulate interest.

Feature Story

Financing His Dreams

What would you do if you had a great idea for a new product but couldn't come up with the cash to get the business off the ground? Small businesses often cannot attract investors. Nor can they obtain traditional debt financing through bank loans or bond issuances. Instead, they often resort to unusual, and costly, forms of nontraditional financing.

Such was the case for Wilbert Murdock. Murdock grew up in a New York housing project and always had great ambitions. His entrepreneurial spirit led him into some business ventures that failed: a medical diagnostic tool, a device to eliminate carpal tunnel syndrome, custom-designed sneakers, and a device to keep people from falling asleep while driving.

Another idea was computerized golf clubs that analyze a golfer's swing and provide immediate feedback. Murdock saw great potential in the idea. Many golfers are willing to shell out considerable sums of money for devices that might improve

their game. But Murdock had no cash to develop his product, and banks and other lenders had shied away. Rather than give up, Murdock resorted to credit cards—in a big way. He quickly owed \$25,000 to credit card companies.

While funding a business with credit cards might sound unusual, it isn't. A recent study found that one-third of businesses with fewer than 20 employees financed at least part of their operations with credit cards. As Murdock explained, credit cards are an appealing way to finance a start-up because “credit-card companies don't care how the money is spent.” However, they do care how they are paid. And so Murdock faced high interest charges and a barrage of credit card collection letters.

Murdock's debt forced him to sacrifice nearly everything in order to keep his business afloat. His car stopped running, he barely had enough money to buy food, and he lived and worked out of a dimly lit apartment in his mother's basement. Through it all he tried to maintain a positive spirit, joking that, if he becomes successful, he might some day get to appear in an **American Express** commercial.

Accounting for Current Liabilities

LEARNING OBJECTIVE 1

Explain how to account for current liabilities.

What Is a Current Liability?

You have learned that liabilities are defined as “creditors' claims on total assets” and as “existing debts and obligations.” Companies must settle or pay these claims, debts, and obligations at some time in the future by transferring assets or services. The future date on which they are due or payable (the maturity date) is a significant feature of liabilities.

As explained in Chapter 4, a **current liability** is a debt that a company expects to pay within one year or the operating cycle, whichever is longer. Debts that do not meet this criterion are **long-term liabilities**.

Financial statement users want to know whether a company's obligations are current or long-term. A company that has more current liabilities than current assets often lacks liquidity, or short-term debt-paying ability. In addition, users want to know the types of liabilities a company has. If a company declares bankruptcy, a specific, predetermined order of payment to creditors exists. Thus, the amount and type of liabilities are of critical importance.

The different types of current liabilities include notes payable, accounts payable, unearned revenues, and accrued liabilities such as taxes, salaries and wages, and interest payable (see **Helpful Hint**). In the sections that follow, we discuss common types of current liabilities.

HELPFUL HINT

In previous chapters, we explained the entries for accounts payable and the adjusting entries for some current liabilities.

Notes Payable

Companies record obligations in the form of written notes as **notes payable**. Notes payable are often used instead of accounts payable because they give the lender formal proof of the obligation in case legal remedies are needed to collect the debt. Companies frequently issue notes payable to meet short-term financing needs. Notes payable usually require the borrower to pay interest.

Notes are issued for varying periods of time. **Those due for payment within one year of the balance sheet date are usually classified as current liabilities.**

To illustrate the accounting for notes payable, assume that First National Bank agrees to lend \$100,000 on September 1, 2020, if Cole Williams Co. signs a \$100,000, 12%, four-month note maturing on January 1. When a company issues an interest-bearing note, the amount of assets it receives upon issuance of the note generally equals the note's face value. Cole Williams therefore will receive \$100,000 cash and will make the following journal entry.

Sept. 1	Cash Notes Payable (To record issuance of 12%, 4-month note to First National Bank)	100,000	100,000
---------	--	---------	---------

A	=	L	+ OE
+100,000			+100,000
<hr/>			
Cash Flows			
+100,000			

Interest accrues over the life of the note, and the company must periodically record that accrual. If Cole Williams prepares financial statements annually, it makes an adjusting entry at December 31 to recognize interest expense and interest payable of \$4,000 ($\$100,000 \times 12\% \times 4/12$). **Illustration 11.1** shows the formula for computing interest and its application to Cole Williams' note.

Face Value of Note	×	Annual Interest Rate	×	Time in Terms of One Year	=	Interest
\$100,000	×	12%	×	4/12	=	\$4,000

ILLUSTRATION 11.1

Formula for computing interest

Cole Williams makes an adjusting entry as follows.

Dec. 31	Interest Expense Interest Payable (To accrue interest for 4 months on First National Bank note)	4,000	4,000
---------	--	-------	-------

A	=	L	+ OE
			-4,000 Exp
<hr/>			
Cash Flows			+4,000
no effect			

In the December 31 financial statements, the current liabilities section of the balance sheet will show notes payable \$100,000 and interest payable \$4,000. In addition, the company will report interest expense of \$4,000 under "Other expenses and losses" in the income statement. If Cole Williams prepared financial statements monthly, the adjusting entry at the end of each month would be \$1,000 ($\$100,000 \times 12\% \times 1/12$).

At maturity (January 1, 2021), Cole Williams must pay the face value of the note (\$100,000) plus \$4,000 interest ($\$100,000 \times 12\% \times 4/12$). It records payment of the note and accrued interest as follows.

A	=	L	+	OE
		-100,000		
		-4,000		

Cash Flows
-104,000

Jan. 1	Notes Payable	100,000	
	Interest Payable	4,000	
	Cash		104,000
	(To record payment of First National Bank interest-bearing note and accrued interest at maturity)		

Sales Taxes Payable

Many of the products we purchase at retail stores are subject to sales taxes. Many states also are now collecting sales taxes on purchases made on the Internet as well. Sales taxes are expressed as a percentage of the sales price. The selling company collects the tax from the customer when the sale occurs. Periodically (usually monthly), the retailer remits the collections to the state's department of revenue. Collecting sales taxes is important. For example, the State of New York recently sued **Sprint Corporation** for \$300 million for its alleged failure to collect sales taxes on phone calls.

Under most state sales tax laws, the selling company must enter separately in the cash register the amount of the sale and the amount of the sales tax collected. (Gasoline sales are a major exception.) The company then uses the cash register readings to credit Sales Revenue and Sales Taxes Payable. For example, if the March 25 cash register reading for Cooley Grocery shows sales of \$10,000 and sales taxes of \$600 (sales tax rate of 6%), the journal entry is as follows.

A	=	L	+	OE
+10,600				
		+10,000 Rev		

Cash Flows
+10,600

Mar. 25	Cash	10,600	
	Sales Revenue	10,000	
	Sales Taxes Payable	600	
	(To record daily sales and sales taxes)		

When the company remits the taxes to the taxing agency, it debits Sales Taxes Payable and credits Cash. The company does not report sales taxes as an expense. It simply forwards to the government the amount paid by the customers. Thus, Cooley Grocery serves only as a **collection agent** for the taxing authority.

Sometimes companies do not enter sales taxes separately in the cash register. To determine the amount of sales in such cases, divide total receipts by 100% plus the sales tax percentage. For example, assume that Cooley Grocery enters total receipts of \$10,600. The receipts from the sales are equal to the sales price (100%) plus the tax percentage (6% of sales), or 1.06 times the sales total. We can compute the sales amount as follows.

$$\$10,600 \div 1.06 = \$10,000$$

Thus, we can find the sales tax amount of \$600 by either (1) subtracting sales from total receipts ($\$10,600 - \$10,000$) or (2) multiplying sales by the sales tax rate ($\$10,000 \times 6\%$).

Unearned Revenues

A magazine publisher, such as **Sports Illustrated**, receives customers' checks when they order magazines. An airline company, such as **American Airlines**, often receives cash when it sells tickets for future flights. Season tickets for concerts, sporting events, and theater programs are also paid for in advance. How do companies account for unearned revenues that are received before goods are delivered or services are performed?

1. When a company receives the advance payment, it debits Cash and credits a current liability account identifying the source of the unearned revenue.
2. When the company recognizes revenue, it debits an unearned revenue account and credits a revenue account.

To illustrate, assume that Superior University sells 10,000 season football tickets at \$50 each for its five-game home schedule. The university makes the following entry for the sale of season tickets.

Aug. 6	Cash (10,000 × \$50) Unearned Ticket Revenue (To record sale of 10,000 season tickets)	500,000	500,000
--------	--	---------	---------

As each game is completed, Superior records the recognition of revenue with the following entry.

Sept. 7	Unearned Ticket Revenue Ticket Revenue (\$500,000 ÷ 5) (To record football ticket revenue)	100,000	100,000
---------	--	---------	---------

The account Unearned Ticket Revenue represents unearned revenue, and Superior reports it as a current liability. As the school recognizes revenue, it reclassifies the amount from unearned revenue to Ticket Revenue. Unearned revenue is material for some companies. In the airline industry, for example, tickets sold for future flights represent almost 50% of total current liabilities. At **United Air Lines**, unearned ticket revenue is its largest current liability, recently amounting to over \$1 billion.

Illustration 11.2 shows specific unearned revenue and revenue accounts used in selected types of businesses.

Magazine publisher	Unearned Rent Revenue	Rent Revenue
Hotel		

ILLUSTRATION 11.2

Unearned revenue and revenue accounts

Current Maturities of Long-Term Debt

Companies often have a portion of long-term debt that comes due in the current year. That amount is considered a current liability. As an example, assume that Wendy Construction issues a five-year, interest-bearing \$25,000 note on January 1, 2019. This note specifies that each January 1, starting January 1, 2020, Wendy should pay \$5,000 of the note. When the company prepares financial statements on December 31, 2019, it should report \$5,000 as a current liability and \$20,000 as a long-term liability. (The \$5,000 amount is the portion of the note that is due to be paid within the next 12 months.) Companies often identify current maturities of long-term debt on the balance sheet as **long-term debt due within one year**. In a recent year, **General Motors** had \$724 million of such debt.

It is not necessary to prepare an adjusting entry to recognize the current maturity of long-term debt. At the balance sheet date, all obligations due within one year are classified as current, and all other obligations as long-term.

DO IT! 1 | Current Liabilities

You and several classmates are studying for the next accounting exam. They ask you to answer the following questions.

1. If cash is borrowed on a \$50,000, 6-month, 12% note on September 1, how much interest expense would be incurred by December 31?
2. How is the sales tax amount determined when the cash register total includes sales taxes?
3. If \$15,000 is collected in advance on November 1 for 3 months' rent, what amount of rent revenue should be recognized by December 31?

ACTION PLAN

- Use the interest formula: Face value of note × Annual interest rate × Time in terms of one year.
- Divide total receipts by 100% plus the tax rate to determine sales revenue, then subtract sales revenue from the total receipts.

Solution

1. $\$50,000 \times 12\% \times 4/12 = \$2,000$
2. First, divide the total cash register receipts by 100% plus the sales tax percentage to find the sales revenue amount. Second, subtract the sales revenue amount from the total cash register receipts to determine the sales taxes.
3. $\$15,000 \times 2/3 = \$10,000$

ACTION PLAN (CONT.)

- Determine what fraction of the total unearned rent should be recognized this year.

Reporting and Analyzing Current Liabilities

LEARNING OBJECTIVE 2

Discuss how current liabilities are reported and analyzed.

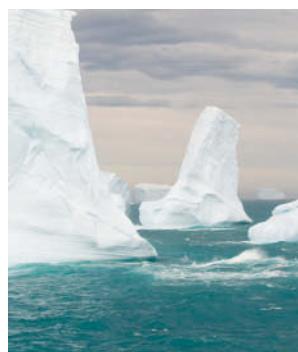

Reporting Uncertainty

With notes payable, interest payable, accounts payable, and sales taxes payable, we know that an obligation to make a payment exists. But, suppose that your company is involved in a dispute with the Internal Revenue Service (IRS) over the amount of its income tax liability. Should you report the disputed amount as a liability on the balance sheet? Or, suppose your company is involved in a lawsuit which, if you lose, might result in bankruptcy. How should you report this major contingency? The answers to these questions are difficult because these liabilities are dependent—contingent—upon some future event. In other words, a **contingent liability** is a potential liability that may become an actual liability in the future.

How should companies report contingent liabilities? They use the following guidelines:

1. If the contingency is **probable** (if it is *likely* to occur) and the amount can be **reasonably estimated**, the liability should be recorded in the accounts.
2. If the contingency is only **reasonably possible** (if it *could* happen), then it needs to be disclosed only in the notes that accompany the financial statements.
3. If the contingency is **remote** (if it is *unlikely* to occur), it need not be recorded or disclosed.

Accounting Across the Organization Manville Corp.

Jeffrey Layton/iStockphoto

Contingencies: How Big Are They?

Contingent liabilities abound in the real world. Consider **Manville Corp.**, which filed for bankruptcy when it was hit by billions of dollars in asbestos product-liability claims. Companies having multiple toxic waste sites are faced with cleanup costs that average \$10 to \$30 million and can reach as high as \$500 million

depending on the type of waste. For life and health insurance companies and their stockholders, the cost of diseases such as diabetes, Alzheimer's, and AIDS is like an iceberg: Everyone wonders how big such costs really are and what damage they might do in the future. And frequent-flyer programs are so popular that airlines at one time owed participants more than 3 million round-trip domestic tickets. That's enough to fly at least 5.4 billion miles—free for the passengers, but at what future cost to the airlines?

Why do you think most companies disclose, but do not record, contingent liabilities? (Go to WileyPLUS for this answer and additional questions.)

Reporting a Contingent Liability

Product warranties are an example of a contingent liability that companies should record in the accounts. Warranty contracts result in future costs that companies may incur in replacing defective units or repairing malfunctioning units. Generally, a manufacturer, such as **Stanley Black & Decker**, knows that it will incur some warranty costs. From prior experience with the product, the company usually can reasonably estimate the anticipated cost of servicing (honoring) the warranty.

The accounting for warranty costs is based on the expense recognition principle. **The estimated cost of honoring product warranty contracts should be recognized as an expense in the period in which the sale occurs.** To illustrate, assume that in 2020 Denson Manufacturing Company sells 10,000 washers and dryers at an average price of \$600 each. The selling price includes a one-year warranty on parts. Denson expects that 500 units (5%) will be defective and that warranty repair costs will average \$80 per unit. In 2020, the company honors warranty contracts on 300 units, at a total cost of \$24,000.

Denson records those repair costs incurred in 2020 to honor warranty contracts on 2020 sales as shown below.

Jan. 1–	Warranty Expense Repair Parts (To record honoring of 300 warranty contracts on 2020 sales)	24,000	24,000
Dec. 31			

A	=	L	+ OE
		-24,000	
		-24,000	
			Cash Flows
			no effect

At December 31, to accrue the estimated warranty costs on the 2020 sales, less the amount already honored in 2020 of \$24,000, Denson computes the warranty liability as shown in **Illustration 11.3**.

Number of units sold	10,000
Estimated rate of defective units	$\times 5\%$
Total estimated defective units	500
Average warranty repair cost	$\times \$80$
	\$40,000
Less: Warranty claims honored	24,000
Warranty liability at December 31, 2020	\$16,000

ILLUSTRATION 11.3

Computation of estimated warranty liability

The company makes the following adjusting entry for \$16,000 after it adjusts for \$24,000 of warranty claims honored during 2020.

Dec. 31	Warranty Expense Warranty Liability (To accrue estimated warranty costs)	16,000	16,000

A	=	L	+ OE
		-16,000 Exp	
		+16,000	
			Cash Flows
			no effect

The company reports warranty expense of \$40,000 under selling expenses in the income statement. It classifies warranty liability of \$16,000 (\$40,000 – \$24,000) as a current liability on the balance sheet, assuming the warranty is estimated to be honored in the next year.

In the following year, Denson should debit to Warranty Liability all expenses incurred in honoring warranty contracts on 2020 sales. To illustrate, assume that the company replaces 20 defective units in January 2021, at an average cost of \$80 in parts and labor. The summary entry for the month of January 2021 is as follows.

Jan. 31	Warranty Liability Repair Parts (To record honoring of 20 warranty contracts on 2020 sales)	1,600	1,600

A	=	L	+ OE
		-1,600	
		-1,600	
			Cash Flows
			no effect

Reporting of Current Liabilities

Current liabilities are the first category under liabilities on the balance sheet. Companies list each of the principal types of current liabilities separately within the category. In addition, companies disclose the terms of notes payable and other key information about the individual items in the notes to the financial statements.

Companies seldom list current liabilities in the order of liquidity. The reason is that varying maturity dates may exist for specific obligations such as notes payable. Or, as a matter of custom, many companies show notes payable first and then accounts payable, regardless of amount. Then, the remaining current liabilities are listed by magnitude. (*Use this approach in your homework.*) **Illustration 11.4** provides an excerpt from Evan Company's balance sheet, which is a common order of presentation among companies (see **Helpful Hint**).

ILLUSTRATION 11.4**Balance sheet reporting of current liabilities**

Evan Company Balance Sheet December 31, 2020		
Assets		
Current assets		\$ 500,000
Property, plant and equipment (net)		150,000
Other long-term assets		520,000

Owner's equity		190,000
Total liabilities and owner's equity		<u><u>\$1,170,000</u></u>

HELPFUL HINT

For examples of real-world current liabilities sections, refer to the **PepsiCo** and **Coca-Cola** balance sheets in Appendices B and C.

Analysis of Current Liabilities

Use of current and noncurrent classifications makes it possible to analyze a company's liquidity. **Liquidity** refers to the ability to pay maturing obligations and meet unexpected needs for cash. The relationship of current assets to current liabilities is critical in analyzing liquidity. We can express this relationship as a dollar amount (working capital) and as a ratio (the current ratio).

The excess of current assets over current liabilities is **working capital**. **Illustration 11.5** shows the formula for the computation of Evan Company's working capital.

ILLUSTRATION 11.5**Working capital formula and computation**

Current Assets	–	Current Liabilities	=	Working Capital
\$500,000	–	\$360,000	=	\$140,000

As an absolute dollar amount, working capital offers limited informational value. For example, \$1 million of working capital may be more than needed for a small company but inadequate for a large corporation. Also, \$1 million of working capital may be adequate for a company at one time but inadequate at another time.

The **current ratio** permits us to compare the liquidity of different-sized companies and of a single company at different times. The current ratio is calculated as current assets divided by current liabilities. **Illustration 11.6** shows the formula for this ratio, along with its computation using Evan's current asset and current liability data.

Current Assets	÷	Current Liabilities	=	Current Ratio
\$500,000	÷	\$360,000	=	1.39:1

ILLUSTRATION 11.6
Current ratio formula
and computation

Historically, companies and analysts considered a current ratio of 2:1 to be the standard for a good credit rating. In recent years, however, many healthy companies have maintained ratios well below 2:1 by improving management of their current assets and liabilities. Evan's ratio of 1.39:1 is adequate but certainly below the standard of 2:1.

DO IT! 2 | Reporting and Analyzing

Lepid Company has the following account balances at December 31, 2020.

Notes payable (\$80,000 due after 12/31/21)	\$200,000
Unearned service revenue	75,000
Other long-term debt (\$30,000 due in 2021)	150,000
Salaries and wages payable	22,000
Other accrued expenses	15,000
Accounts payable	100,000

In addition, Lepid is involved in a lawsuit. Legal counsel feels it is probable Lepid will pay damages of \$38,000 in 2021.

- Prepare the current liabilities section of Lepid's December 31, 2020, balance sheet.
- Lepid's current assets are \$504,000. Compute Lepid's working capital and current ratio.

Solution

a. Current liabilities

Notes payable (\$200,000 – \$80,000)	\$120,000
Accounts payable	100,000
Unearned service revenue	75,000
Lawsuit liability	38,000
Long-term debt due within one year	30,000
Salaries and wages payable	22,000
Other accrued expenses	15,000
Total current liabilities	\$400,000

- Working capital = Current assets – Current liabilities = \$504,000 – \$400,000 = \$104,000
Current ratio = Current assets ÷ Current liabilities = \$504,000 ÷ \$400,000 = 1.26:1

Related exercise material: BE11.5, DO IT! 11.2, E11.7, and E11.8.

ACTION PLAN

- Determine which liabilities will be paid within one year or the operating cycle and include those as current liabilities.
- If the contingent liability is probable and reasonably estimable, include it as a current liability.
- Use the formula for working capital: Current assets – Current liabilities.
- Use the formula for the current ratio: Current assets ÷ Current liabilities.

Accounting for Payroll

LEARNING OBJECTIVE 3

Explain how to account for payroll.

Payroll and related fringe benefits often make up a large percentage of current liabilities. Employee compensation is often the most significant expense that a company incurs.

Payroll accounting involves more than paying employees' wages. Companies are required by law to maintain payroll records for each employee, to file and pay payroll taxes, and to comply with state and federal tax laws related to employee compensation.

The term “payroll” **pertains to both salaries and wages of employees**. Managerial, administrative, and sales personnel are generally paid **salaries**. Salaries are often expressed in terms of a specified amount per month or per year rather than an hourly rate. Store clerks, factory employees, and manual laborers are normally paid **wages**. Wages are based on a rate per hour or on a piecework basis (such as per unit of product). Frequently, people use the terms “salaries” and “wages” interchangeably.

The term “payroll” **does not apply to payments made for services of professionals** such as certified public accountants, attorneys, and architects. Such professionals are independent contractors rather than salaried employees. Payments to them are called **fees**. This distinction is important because government regulations relating to the payment and reporting of payroll taxes apply only to employees.

Determining the Payroll

Determining the payroll involves computing three amounts: (1) gross earnings, (2) payroll deductions, and (3) net pay.

Gross Earnings

Gross earnings is the total compensation earned by an employee. It consists of wages or salaries, plus any bonuses and commissions.

Companies determine total **wages** for an employee by multiplying the hours worked by the hourly rate of pay. In addition to the hourly pay rate, most companies are required by law to pay hourly workers a minimum of $1\frac{1}{2}$ times the regular hourly rate for overtime work in excess of eight hours per day or 40 hours per week. In addition, many employers pay overtime rates for work done at night, on weekends, and on holidays.

For example, assume that Michael Jordan, an employee of Academy Company, worked 44 hours for the weekly pay period ending January 14. His regular wage is \$12 per hour. For any hours in excess of 40, the company pays at one-and-a-half times the regular rate. Academy computes Jordan’s gross earnings (total wages) as shown in **Illustration 11.7**.

ILLUSTRATION 11.7

Computation of total wages

Type of Pay	Hours	×	Rate	=	Gross Earnings
Regular	40	×	\$12	=	\$480
Overtime	4	×	18	=	<u>72</u>
Total wages					\$552

ETHICS NOTE

Bonuses often reward outstanding individual performance, but successful corporations also need considerable teamwork. A challenge is to motivate individuals while preventing an unethical employee from taking another’s idea for his or her own advantage.

This computation assumes that Jordan receives $1\frac{1}{2}$ times his regular hourly rate ($\$12 \times 1.5$) for his overtime hours. Union contracts often require that overtime rates be as much as twice the regular rates.

An employee’s **salary** is generally based on a monthly or yearly rate. The company then prorates these rates to its payroll periods (e.g., biweekly or monthly). Most executive and administrative positions are salaried. Federal law does not require overtime pay for employees in such positions.

Many companies have **bonus** agreements for employees (see **Ethics Note**). One survey found that over 94% of the largest U.S. manufacturing companies offer annual bonuses to key executives. Bonus arrangements may be based on such factors as increased sales or net income. Companies may pay bonuses in cash and/or by granting employees the opportunity to acquire shares of company stock at favorable prices (called stock option plans).

Payroll Deductions

As anyone who has received a paycheck knows, gross earnings are usually very different from the amount actually received. The difference is due to **payroll deductions**.

Payroll deductions may be mandatory or voluntary. **Mandatory deductions are required by law and consist of FICA taxes and income taxes**. Voluntary deductions are at the option of the employee. **Illustration 11.8** summarizes common types of payroll deductions. Such deductions

do not result in payroll tax expense to the employer. The employer is merely a collection agent, and subsequently transfers the deducted amounts to the government and designated recipients.

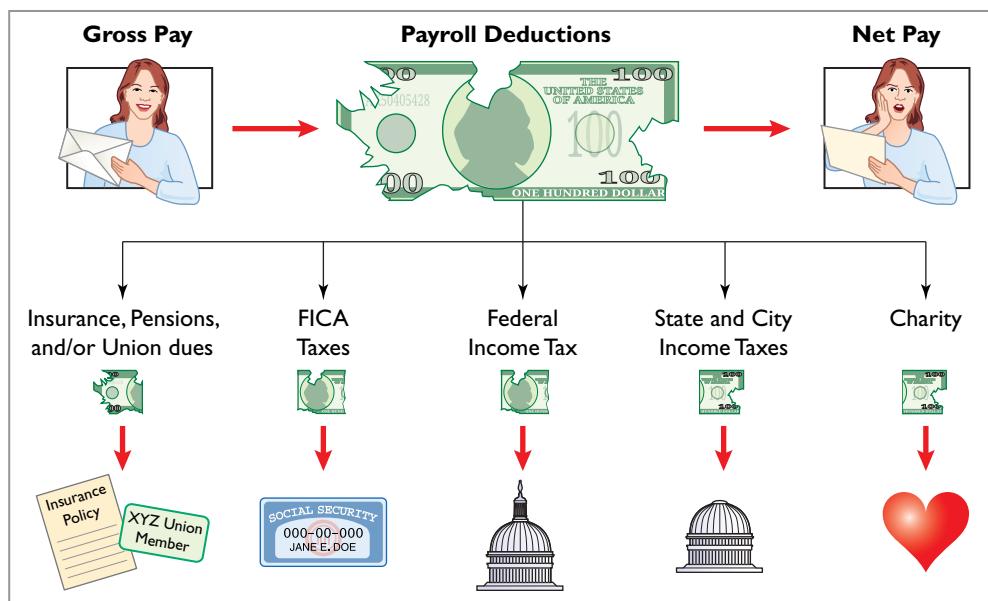

ILLUSTRATION 11.8

Payroll deductions

FICA Taxes. In 1937, Congress enacted the Federal Insurance Contribution Act (FICA). **FICA taxes are designed to provide workers with supplemental retirement, employment disability, and medical benefits.** In 1965, Congress extended benefits to include Medicare for individuals over 65 years of age. The benefits are financed by a tax levied on employees' earnings.

FICA taxes consist of a Social Security tax and a Medicare tax. They are paid by both employee and employer. The FICA tax rate is 7.65% (6.2% Social Security tax up to \$127,200 plus 1.45% Medicare tax) of salary and wages for each employee.¹ In addition, the Medicare tax of 1.45% continues for an employee's salary and wages in excess of \$127,200. These tax rate and tax base requirements are shown in **Illustration 11.9**.

Social Security taxesEmployee and employer **6.2%** on salary and wages up to **\$127,200****Medicare taxes**Employee and employer **1.45%** on all salary and wages without limitation

ILLUSTRATION 11.9

FICA tax rate and tax base

To illustrate the computation of FICA taxes, assume that Mario Ruez has total wages for the year of \$100,000. In this case, Mario pays FICA taxes of \$7,650 ($\$100,000 \times 7.65\%$). If Mario has total wages of \$130,000, Mario pays FICA taxes of \$9,771 (rounded to nearest dollar), as shown in **Illustration 11.10**.

Social Security tax	$(\$127,200 \times 6.2\%)$	\$7,886
Medicare tax	$(\$130,000 \times 1.45\%)$	1,885
Total FICA taxes		\$9,771

ILLUSTRATION 11.10

FICA tax computation

Mario's employer is also required to pay \$9,771.

Income Taxes. Under the U.S. pay-as-you-go system of federal income taxes, employers are required to withhold income taxes from employees each pay period. Four variables determine the amount to be withheld: (1) the employee's gross earnings, (2) marital status, (3) the number

¹The \$127,200 limit is based upon recent guidelines set by the Social Security Administration.

of allowances claimed by the employee, and (4) the length of the pay period. The number of allowances claimed typically includes the employee, his or her spouse, and other dependents.

Withholding tables furnished by the Internal Revenue Service indicate the amount of income tax to be withheld. Withholding amounts are based on gross wages and the number of allowances claimed. Separate tables are provided for weekly, biweekly, semimonthly, and monthly pay periods. **Illustration 11.11** shows the withholding tax table for Michael Jordan (assuming he earns \$552 per week, is married, and claims two allowances). For a weekly salary of \$552 with two allowances, the income tax to be withheld is \$24 (highlighted in red).

600	610	49	38	29	21	14	6	0	0	0	0	0
610	620	50	39	30	22	15	7	0	0	0	0	0
620	630	52	41	31	23	16	8	1	0	0	0	0
630	640	53	42	32	24	17	9	2	0	0	0	0
640	650	55	44	33	25	18	10	3	0	0	0	0
650	660	56	45	34	26	19	11	4	0	0	0	0
660	670	58	47	35	27	20	12	5	0	0	0	0
670	680	59	48	37	28	21	13	6	0	0	0	0
680	690	61	50	38	29	22	14	7	0	0	0	0
690	700	62	51	40	30	23	15	8	0	0	0	0

In addition, most states (and some cities) require **employers** to withhold income taxes from employees' earnings. As a rule, the amounts withheld are a percentage (specified in the state revenue code) of the amount withheld for the federal income tax. Or they may be a specified percentage of the employee's earnings. For the sake of simplicity, we have assumed that Jordan's wages are subject to state income taxes of 2%, or \$11.04 ($2\% \times \552) per week.

There is no limit on the amount of gross earnings subject to income tax withholdings. In fact, under our progressive system of taxation, the higher the earnings, the higher the percentage of income withheld for taxes.

Other Deductions. Employees may voluntarily authorize withholdings for charitable organizations, retirement, and other purposes. All voluntary deductions from gross earnings should be authorized in writing by the employee. The authorization(s) may be made individually or as part of a group plan. Deductions for charitable organizations, such as the **United Fund**, or for financial arrangements, such as U.S. savings bonds and repayment of loans from company credit unions, are made individually. Deductions for union dues, health and life insurance, and pension plans are often made on a group basis. We assume that Jordan has weekly voluntary deductions of \$10 for the United Fund and \$5 for union dues.

ALTERNATIVE TERMINOLOGY

Net pay is also called *take-home pay*.

Net Pay

Academy Company determines **net pay** by subtracting payroll deductions from gross earnings (see **Alternative Terminology**). **Illustration 11.12** shows the computation of Jordan's net pay for the pay period.

Gross earnings	\$552.00
Payroll deductions:	
FICA taxes	\$42.23
Federal income taxes	24.00
State income taxes	11.04
United Fund	10.00
Union dues	5.00
	92.27
Net pay	\$459.73

ILLUSTRATION 11.12
Computation of net pay

Assuming that Michael Jordan's wages for each week during the year are \$552, total wages for the year are \$28,704 ($52 \times \552). Thus, all of Jordan's wages are subject to FICA tax during the year. In comparison, let's assume that Jordan's department head earns \$3,000 per week, or \$156,000 for the year. Since only the first \$127,200 is subject to Social Security taxes, the maximum FICA withholdings on the department head's earnings would be \$10,148 [$(\$127,200 \times 6.2\%) + (\$156,000 \times 1.45\%)$].

Recording the Payroll

Recording the payroll involves maintaining payroll department records, recognizing payroll expenses and liabilities, and recording payment of the payroll.

Maintaining Payroll Department Records

To comply with state and federal laws, an employer must keep a cumulative record of each employee's gross earnings, deductions, and net pay during the year. The record that provides this information is the **employee earnings record**. Illustration 11.13 shows Michael Jordan's employee earnings record.

ILLUSTRATION 11.13 Employee earnings record

Jan. Total		1,920.00	198.00	2,118.00		162.02	86.00	42.36	40.00	20.00	350.38	1,767.62		

Companies keep a separate earnings record for each employee and update these records after each pay period. The employer uses the cumulative payroll data on the earnings record to (1) determine when an employee has earned the maximum earnings subject to FICA taxes, (2) file state and federal payroll tax returns (as explained later), and (3) provide each employee with a statement of gross earnings and tax withholdings for the year. Illustration 11.17 shows this statement.

In addition to employee earnings records, many companies find it useful to prepare a **payroll register**. This record accumulates the gross earnings, deductions, and net pay by employee for each pay period. **Illustration 11.14** presents Academy Company's payroll register. It provides the documentation for preparing a paycheck for each employee. For example, it shows the data for Michael Jordan in the wages section. In this example, Academy's total weekly payroll is \$17,210, as shown in the salaries and wages expense column (column N, row 31).

ILLUSTRATION 11.14 Payroll register

29	Milroy, Lee	43	480.00	54.00		534.00	40.85	46.00	10.68	10.00	5.00	112.53	421.47	1029	534.00	
31	Total					16,200.00	1,010.00	17,210.00	1,316.57	3,490.00	344.20	421.50	115.00	5,687.27	11,522.73	17,210.00

Note that this record is a listing of each employee's payroll data for the pay period. In some companies, a payroll register is a journal or book of original entry. Postings are made from it directly to ledger accounts. In other companies, the payroll register is a memorandum record that provides the data for a general journal entry and subsequent posting to the ledger accounts. Academy follows the latter procedure.

Recognizing Payroll Expenses and Liabilities

From the payroll register in Illustration 11.14, Academy Company makes a journal entry to record the payroll. For the week ending January 14, the entry is as follows.

$$\begin{array}{l}
 A = L + OE \\
 \\
 -17,210.00 \text{ Exp} \\
 +1,316.57 \\
 +3,490.00 \\
 +344.20 \\
 +421.50 \\
 +115.00 \\
 +11,522.73
 \end{array}$$

Cash Flows
no effect

Jan. 14	Salaries and Wages Expense	17,210.00	
	FICA Taxes Payable		1,316.57
	Federal Income Taxes Payable		3,490.00
	State Income Taxes Payable		344.20
	United Fund Payable		421.50
	Union Dues Payable		115.00
	Salaries and Wages Payable		11,522.73
	(To record payroll for the week ending		
	January 14)		

The company credits specific liability accounts for the mandatory and voluntary deductions made during the pay period. In the example, Academy debits Salaries and Wages Expense for the gross earnings of its employees. The amount credited to Salaries and Wages Payable is the sum of the individual checks the employees will receive.

Recording Payment of the Payroll

A company makes payments by check (or electronic funds transfer) either from its regular bank account or a payroll bank account. Each paycheck is usually accompanied by a detachable **statement of earnings** document. This shows the employee's gross earnings, payroll deductions, and net pay, both for the period and for the year-to-date. Academy Company uses its regular bank account for payroll checks. **Illustration 11.15** shows the paycheck and statement of earnings for Michael Jordan (see **Helpful Hint**).

ILLUSTRATION 11.15

Paycheck and statement of earnings

HELPFUL HINT

None of the income tax liabilities result in payroll tax expense for the employer because the employer is acting only as a collection agent for the government.

Following payment of the payroll, the company enters the check numbers in the payroll register. Academy records payment of the payroll as follows.

Jan. 14	Salaries and Wages Payable	11,522.73	11,522.73
	Cash		
	(To record payment of payroll)		

A	=	L	+ OE
			-11,522.73
Cash Flows			-11,522.73
			

Many medium- and large-size companies use a payroll processing center that performs payroll recordkeeping services. Companies send the center payroll information about employee pay rates and hours worked. The center maintains the payroll records and prepares the payroll checks. In most cases, it costs less to process the payroll through the center (outsource) than if the company did so internally.

DO IT! 3a | Payroll

In January, gross earnings in Ramirez Company were \$40,000. All earnings are subject to 7.65% FICA taxes. Federal income tax withheld was \$9,000, and state income tax withheld was \$1,000. (a) Calculate net pay for January, and (b) record the payroll.

Solution

a. Net pay: $\$40,000 - (7.65\% \times \$40,000) - \$9,000 - \$1,000 = \$26,940$

- b. Salaries and Wages Expense
 FICA Taxes Payable
 Federal Income Taxes Payable
 State Income Taxes Payable
 Salaries and Wages Payable
 (To record payroll)

	40,000	
		3,060
		9,000
		1,000
		26,940

ACTION PLAN

- Determine net pay by subtracting payroll deductions from gross earnings.
- Record gross earnings as Salaries and Wages Expense, record payroll deductions as liabilities, and record net pay as Salaries and Wages Payable.

Employer Payroll Taxes

Payroll tax expense for businesses results from three taxes that governmental agencies levy **on employers**. These taxes are (1) FICA, (2) federal unemployment tax, and (3) state unemployment tax. These taxes plus such items as paid vacations and pensions (discussed in the appendix to this chapter) are collectively referred to as **fringe benefits**. As indicated earlier, the cost of fringe benefits in many companies is substantial.

FICA Taxes

Each employee must pay FICA taxes. In addition, employers must match each employee's FICA contribution. This means the employer must remit to the federal government 12.4% of each employee's first \$127,200 of taxable earnings, plus 2.9% of each employee's earnings, regardless of amount. The matching contribution results in **payroll tax expense** to the employer. The employer's tax is subject to the same rate and maximum earnings as the employee's. The company uses the same account, FICA Taxes Payable, to record both the employee's and the employer's FICA contributions. For the January 14 payroll, Academy Company's FICA tax contribution is \$1,316.57 ($\$17,210.00 \times 7.65\%$).

Federal Unemployment Taxes

The Federal Unemployment Tax Act (FUTA) is another feature of the federal Social Security program. **Federal unemployment taxes** provide benefits for a limited period of time to employees who lose their jobs through no fault of their own. The FUTA tax rate is currently 6.2% of taxable wages. The taxable wage base is the first \$7,000 of wages paid to each employee in a calendar year. Employers who pay the state unemployment tax on a timely basis will receive an offset credit of up to 5.4%. Therefore, the net federal tax rate is generally 0.8% (6.2% – 5.4%). This rate would equate to a maximum of \$56 of federal tax per employee per year ($0.8\% \times \$7,000$). State tax rates are based on state law.

The **employer** bears the entire federal unemployment tax (see **Helpful Hint**). There is no deduction or withholding from employees. Companies use the account **Federal Unemployment Taxes Payable** to recognize this liability. The federal unemployment tax for Academy Company for the January 14 payroll is \$137.68 ($\$17,210.00 \times 0.8\%$).

HELPFUL HINT

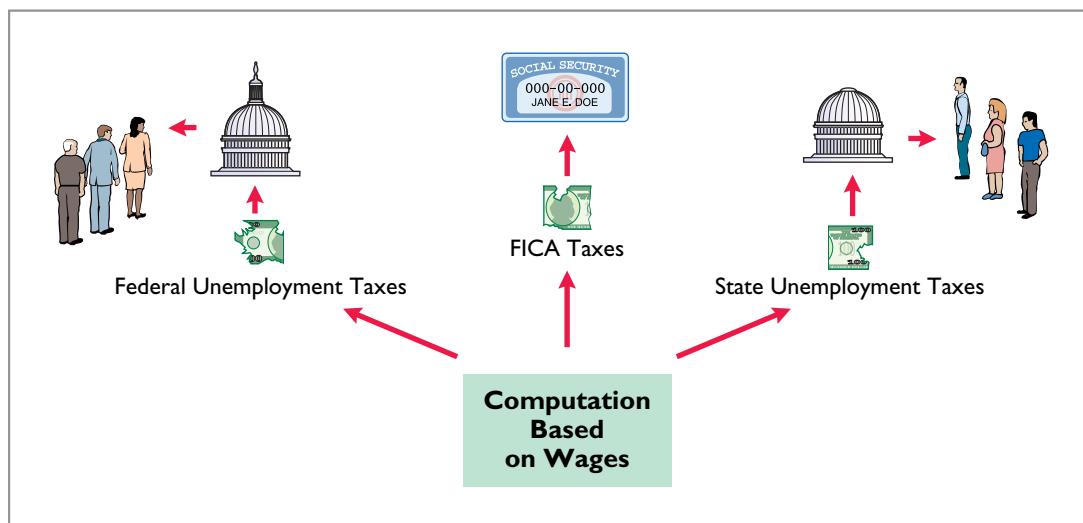

Both the employer and employee pay FICA taxes. Federal unemployment taxes and (in most states) the state unemployment taxes are borne entirely by the employer.

State Unemployment Taxes

All states have unemployment compensation programs under state unemployment tax acts (SUTA). Like federal unemployment taxes, **state unemployment taxes** provide benefits to employees who lose their jobs. These taxes are levied on employers.² The basic rate is usually 5.4% on the first \$7,000 of wages paid to an employee during the year. The state adjusts the basic rate according to the employer's experience rating. Companies with a history of stable employment may pay less than 5.4%. Companies with a history of unstable employment may pay more than the basic rate. Regardless of the rate paid, the company's credit on the federal unemployment tax is still 5.4%.

Companies use the account State Unemployment Taxes Payable for this liability. The state unemployment tax for Academy Company for the January 14 payroll is \$929.34 ($\$17,210.00 \times 5.4\%$). **Illustration 11.16** summarizes the types of employer payroll taxes.

ILLUSTRATION 11.16 Employer payroll taxes

Recording Employer Payroll Taxes

Companies usually record employer payroll taxes at the same time they record the payroll. The entire amount of gross pay (\$17,210.00) shown in the payroll register in Illustration 11.14 is subject to each of the three taxes mentioned above. Accordingly, Academy records the payroll tax expense associated with the January 14 payroll with the following entry.

		A	=	L	+	OE
Jan. 14	Payroll Tax Expense	2,383.59				-2,383.59 Exp
	FICA Taxes Payable	1,316.57				+1,316.57
	Federal Unemployment Taxes Payable	137.68				+137.68
	State Unemployment Taxes Payable	929.34				+929.34
	(To record employer's payroll taxes on January 14 payroll)					
						Cash Flows
						no effect

Note that Academy uses separate liability accounts instead of a single credit to Payroll Taxes Payable. Why? Because these liabilities are payable to different taxing authorities at different dates. Companies classify the liability accounts in the balance sheet as current liabilities since they will be paid within the next year. They classify Payroll Tax Expense on the income statement as an operating expense.

²In a few states, the employee is also required to make a contribution. In this text, including the homework, we will assume that the tax is only on the employer.

Accounting Across the Organization Bogan Communications

© svetikd/iStockphoto

It Costs \$74,000 to Put \$44,000 in Sally's Pocket

Sally works for **Bogan Communications**, a small company in New Jersey that provides audio systems. She makes \$59,000 a year but only nets \$44,000. What happened to the other \$15,000? Well, \$2,376 goes for Sally's share of the medical and dental insurance that Bogan provides, \$126 for state unemployment insurance, \$149 for disability insurance, and \$856 for Medicare. New Jersey takes \$1,893 in income taxes, and the federal government gets \$3,658 for Social Security and another \$6,250 for income tax withholding. All of this adds up to some 22% of Sally's gross pay going to Washington or Trenton.

Employing Sally costs Bogan plenty too. Bogan has to write checks for \$74,000 so Sally can receive her \$59,000 in base pay. Health insurance is the biggest cost. While Sally pays nearly \$2,400 for coverage, Bogan pays the rest—\$9,561. Then, the federal and state governments take \$56 for federal unemployment coverage, \$149 for disability insurance, \$300 for workers' comp, and \$505 for state unemployment insurance. Finally, the government requires Bogan to pay \$856 for Sally's Medicare and \$3,658 for her Social Security.

When you add it all up, it costs \$74,000 to put \$44,000 in Sally's pocket and to give her \$12,000 in benefits.

Source: Michael P. Fleischer, "Why I'm Not Hiring," *Wall Street Journal* (August 9, 2010), p. A17.

How are the Social Security and Medicare taxes computed for Sally's salary? (Go to WileyPLUS for this answer and additional questions.)

Filing and Remitting Payroll Taxes

Preparation of payroll tax returns is the responsibility of the payroll department. The treasurer's department makes the tax payment. Much of the information for the returns is obtained from employee earnings records.

For purposes of reporting and remitting to the IRS, the company combines the FICA taxes and federal income taxes that it withheld. **Companies must report the taxes quarterly**, no later than one month following the close of each quarter. The remitting requirements depend on the amount of taxes withheld and the length of the pay period. Companies remit funds through deposits in either a Federal Reserve bank or an authorized commercial bank.

Companies generally file and remit federal unemployment taxes **annually** on or before January 31 of the subsequent year. Earlier payments are required when the tax exceeds a specified amount. Companies usually must file and pay state unemployment taxes by the **end of the month following each quarter**. When payroll taxes are paid, companies debit payroll liability accounts, and credit Cash.

Anatomy of a Fraud

Art was a custodial supervisor for a large school district. The district was supposed to employ between 35 and 40 regular custodians, as well as 3 or 4 substitute custodians to fill in when regular custodians were absent. Instead, in addition to the regular custodians, Art "hired" 77 substitutes. In fact, almost none of these people worked for the district. Instead, Art submitted time cards for these people, collected their checks at the district office, and personally distributed the checks to the "employees." If a substitute's check was for \$1,200, that person would cash the check, keep \$200, and pay Art \$1,000.

Total take: \$150,000

The Missing Controls

Human resource controls. Thorough background checks should be performed. No employees should begin work un-

til they have been approved by the Board of Education and entered into the payroll system. No employees should be entered into the payroll system until they have been approved by a supervisor. All paychecks should be distributed directly to employees at the official school locations by designated employees or direct-deposited into approved employee bank accounts.

Independent internal verification. Budgets should be reviewed monthly to identify situations where actual costs significantly exceed budgeted amounts.

Source: Adapted from Wells, *Fraud Casebook* (2007), pp. 164–171.

Employers also must provide each employee with a **Wage and Tax Statement (Form W-2)** by January 31 following the end of a calendar year. This statement shows gross earnings, FICA taxes withheld, and income taxes withheld for the year. The required W-2 form for Michael Jordan, using assumed annual data, is shown in **Illustration 11.17**. The employer must send a copy of each employee's Wage and Tax Statement (Form W-2) to the Social Security Administration. This agency subsequently furnishes the Internal Revenue Service with the income data required.

Internal Control for Payroll

Chapter 8 introduced internal control. As applied to payrolls, the objectives of internal control are (1) to safeguard company assets against unauthorized payments of payrolls, and (2) to ensure the accuracy and reliability of the accounting records pertaining to payrolls.

Irregularities often result if internal control is lax. Frauds involving payroll include overstating hours, using unauthorized pay rates, adding fictitious employees to the payroll, continuing terminated employees on the payroll, and distributing duplicate payroll checks. Moreover, inaccurate records will result in incorrect paychecks, financial statements, and payroll tax returns.

Payroll activities involve four functions: hiring employees, timekeeping, preparing the payroll, and paying the payroll. For effective internal control, companies should assign these four functions to different departments or individuals. **Illustration 11.18** highlights these functions and illustrates their internal control features.

ILLUSTRATION 11.18 Internal control for payroll**DO IT! 3b | Employer's Payroll Taxes**

In January, the payroll supervisor determines that gross earnings for Halo Company are \$70,000. All earnings are subject to 7.65% FICA taxes, 5.4% state unemployment taxes, and 0.8% federal unemployment taxes. Halo asks you to record the employer's payroll taxes.

Solution

The entry to record the employer's payroll taxes is:

Payroll Tax Expense	9,695	
FICA Taxes Payable (\$70,000 × 7.65%)	5,355	
Federal Unemployment Taxes Payable (\$70,000 × 0.8%)	560	
State Unemployment Taxes Payable (\$70,000 × 5.4%)	3,780	
(To record employer's payroll taxes on January payroll)		

ACTION PLAN

- Compute the employer's payroll taxes on the period's gross earnings.
- Identify the expense account(s) to be debited.
- Identify the liability account(s) to be credited.

Related exercise material: **BE11.9, DO IT! 11.3b, E11.11, and E11.13.**

Appendix 11A**Additional Fringe Benefits****LEARNING OBJECTIVE *4**

Discuss additional fringe benefits associated with employee compensation.

In addition to the traditional payroll-tax fringe benefits (Social Security taxes, Medicare taxes, and state and federal unemployment taxes), employers incur other substantial fringe benefit costs. Two of the most important are paid absences and postretirement benefits.

Paid Absences

Employees often are given rights to receive compensation for absences when they meet certain conditions of employment. The compensation may be for paid vacations, sick pay benefits, and paid holidays. When the payment for such absences is **probable** and the amount can be **reasonably estimated**, the company should accrue a liability for paid future absences. When the amount cannot be reasonably estimated, the company should instead disclose the potential liability. Ordinarily, vacation pay is the only paid absence that is accrued. The other types of paid absences are only disclosed.

To illustrate, assume that Academy Company employees are entitled to one day's vacation for each month worked. If 30 employees earn an average of \$110 per day in a given month, the accrual for vacation benefits in one month is \$3,300. Academy records the liability at the end of the month by the following adjusting entry.

A	=	L	+ OE
			-3,300 Exp
<hr/>			
+3,300			

Cash Flows
no effect

This accrual is required by the expense recognition principle. Academy would report Vacation Benefits Expense as an operating expense in the income statement, and Vacation Benefits Payable as a current liability in the balance sheet.

Later, when Academy pays vacation benefits, it debits Vacation Benefits Payable and credits Cash. For example, if employees take 10 days of vacation in July, the entry is as follows.

A	=	L	+ OE
			-1,100
<hr/>			
-1,100			

Cash Flows
-1,100 

The magnitude of unpaid absences has gained employers' attention. Consider the case of an assistant superintendent of schools who worked for 20 years and rarely took a vacation or sick day. A month or so before she retired, the school district discovered that she was due nearly \$30,000 in accrued benefits. Yet the school district had never accrued the liability.

Postretirement Benefits

Postretirement benefits are benefits that employers provide to retired employees for (1) pensions and (2) healthcare and life insurance. Companies account for both types of postretirement benefits on the accrual basis. The cost of postretirement benefits is getting steep. For example, states and localities must deal with a \$1 trillion deficit in public employees' retirement benefit funds. This shortfall amounts to more than \$8,800 for every household in the nation.

Average Americans have debt of approximately \$10,000 (not counting the mortgage on their home) and little in the way of savings. What will happen at retirement for these people? The picture is not pretty—people are living longer, the future of Social Security is unclear, and companies are cutting back on postretirement benefits. This situation may lead to one of the great social and moral dilemmas this country faces in the next 40 years. The more you know about postretirement benefits, the better you will understand the issues involved in this dilemma.

Postretirement Healthcare and Life Insurance Benefits

Providing medical and related healthcare benefits for retirees was at one time an inexpensive and highly effective way of generating employee goodwill. This practice has now turned into one of corporate America's most worrisome financial problems. Runaway medical costs, early retirement, and increased longevity are sending the liability for retiree health plans through the roof.

Companies estimate and expense postretirement costs during the working years of the employee because the company benefits from the employee's services during this period. However, the company rarely sets up funds to meet the cost of the future benefits. It follows a pay-as-you-go basis for these costs. The major reason is that the company does not receive a tax deduction until it actually pays the medical bill.

Pension Plans

A **pension plan** is an agreement whereby an employer provides benefits (payments) to employees after they retire. The need for good accounting for pension plans becomes apparent when we consider the size of existing pension funds. Over 50 million workers currently participate in pension plans in the United States. Most pension plans are subject to the provisions of ERISA (Employee Retirement Income Security Act), a law enacted to curb abuses in the administration and funding of such plans.

Three parties are generally involved in a pension plan. The **employer** (company) sponsors the pension plan. The **plan administrator** receives the contributions from the employer, invests the pension assets, and makes the benefit payments to the **pension recipients** (retired employees). **Illustration 11A.1** indicates the flow of cash among the three parties involved in a pension plan.

ILLUSTRATION 11A.1 Parties in a pension plan

An employer-financed pension is part of the employees' compensation. ERISA establishes the minimum contribution that a company must make each year toward employee pensions. The most popular type of pension plan used is the 401(k) plan. A 401(k) plan works as follows. As an employee, you can contribute up to a certain percentage of your pay into a 401(k) plan, and your employer will match a percentage of your contribution. These contributions are then generally invested in stocks and bonds through mutual funds. These funds will grow without being taxed and can be withdrawn beginning at age 59-1/2. If you must access the funds earlier, you may be able to do so, but a penalty usually occurs along with a payment of tax on the proceeds. Any time you have the opportunity to be involved in a 401(k) plan, you should avail yourself of this benefit!

Companies record pension costs as an expense while the employees are working because that is when the company receives benefits from the employees' services. Generally, the pension expense is reported as an operating expense in the company's income statement. Frequently, the amount contributed by the company to the pension plan is different from the amount of the pension expense. A **liability** is recognized when the pension expense to date is **more than** the company's contributions to date. An **asset** is recognized when the pension expense to date is **less than** the company's contributions to date. Further consideration of the accounting for pension plans is left for more advanced courses.

The two most common types of pension arrangements for providing benefits to employees after they retire are defined-contribution plans and defined-benefit plans.

Defined-Contribution Plan. In a **defined-contribution plan**, the plan defines the employer's contribution but not the benefit that the employee will receive at retirement. That is, the employer agrees to contribute a certain sum each period based on a formula. A 401(k) plan is typically a defined-contribution plan.

The accounting for a defined-contribution plan is straightforward. The employer simply makes a contribution each year based on the formula established in the plan. As a result, the employer's obligation is easily determined. It follows that the company reports **the amount of the contribution required each period as pension expense. The employer reports a liability only if it has not made the contribution in full.**

To illustrate, assume that Alba Office Interiors has a defined-contribution plan in which it contributes \$200,000 each year to the pension fund for its employees. The entry to record this transaction is:

A	=	L	+	OE
				-200,000
-200,000				

Cash Flows
-200,000 

To the extent that Alba did not contribute the \$200,000 defined contribution, it would record a liability. Pension payments to retired employees are made from the pension fund by the plan administrator.

Defined-Benefit Plan. In a **defined-benefit plan**, the **benefits** that the employee will receive at the time of retirement are defined by the terms of the plan. Benefits are typically calculated using a formula that considers an employee's compensation level when he or she nears retirement and the employee's years of service. Because the benefits in this plan are defined in terms of uncertain future variables, an appropriate funding pattern is established to ensure that enough funds are available at retirement to meet the benefits promised. This funding level depends on a number of factors such as employee turnover, length of service, mortality, compensation levels, and investment earnings. **The proper accounting for these plans is complex and is considered in more advanced accounting courses.**

Postretirement Benefits as Long-Term Liabilities

While part of the liability associated with (1) postretirement healthcare and life insurance benefits and (2) pension plans is generally a current liability, the greater portion of these liabilities extends many years into the future. Therefore, many companies are required to report significant amounts as long-term liabilities for postretirement benefits.

Review and Practice

Learning Objectives Review

1 Explain how to account for current liabilities.

A current liability is a debt that a company expects to pay within one year or the operating cycle, whichever is longer. The major types of current liabilities are notes payable, accounts payable, sales taxes payable, unearned revenues, and accrued liabilities such as taxes, salaries and wages, and interest payable.

When a promissory note is interest-bearing, the amount of assets received upon the issuance of the note is generally equal to the face value of the note. Interest expense accrues over the life of the note. At maturity, the amount paid equals the face value of the note plus accrued interest.

Companies record sales taxes payable at the time the related sales occur. The company serves as a collection agent for the taxing

authority. Sales taxes are not an expense to the company. Companies initially record unearned revenues in an Unearned Revenue account. As a company recognizes revenue, a transfer from unearned revenue to revenue occurs. Companies report the current maturities of long-term debt as a current liability in the balance sheet.

2 Discuss how current liabilities are reported and analyzed.

With notes payable, interest payable, accounts payable, and sales taxes payable, an obligation to make a payment exists. In some cases, it is difficult to determine whether a liability exists. These situations are called contingent liabilities. If the contingency is **probable** (likely to occur) and the amount is reasonably estimable, the company should record the liability in the accounts. If the contingency is only

reasonably possible (it could happen), then it should be disclosed only in the notes to the financial statements. If the possibility that the contingency will happen is **remote** (unlikely to occur), it need not be recorded or disclosed.

Companies should report the nature and amount of each current liability in the balance sheet or in schedules in the notes accompanying the statements. The liquidity of a company may be analyzed by computing working capital and the current ratio.

3 Explain how to account for payroll.

The computation of the payroll involves gross earnings, payroll deductions, and net pay. In recording the payroll, companies debit Salaries and Wages Expense for gross earnings, credit individual tax and other liability accounts for payroll deductions, and credit Salaries and Wages Payable for net pay. When the payroll is paid, companies debit Salaries and Wages Payable and credit Cash.

Glossary Review

Bonus Compensation to management and other personnel, based on factors such as increased sales or the amount of net income. (p. 11-10).

Contingent liability A potential liability that may become an actual liability in the future. (p. 11-6).

Current ratio A measure of a company's liquidity; computed as current assets divided by current liabilities. (p. 11-8).

***Defined-benefit plan** A pension plan in which the benefits that the employee will receive at retirement are defined by the terms of the plan. (p. 11-23).

***Defined-contribution plan** A pension plan in which the employer's contribution to the plan is defined by the terms of the plan. (p. 11-22).

Employee earnings record A cumulative record of each employee's gross earnings, deductions, and net pay during the year. (p. 11-13).

Federal unemployment taxes Taxes imposed on the employer by the federal government that provide benefits for a limited time period to employees who lose their jobs through no fault of their own. (p. 11-16).

Fees Payments made for the services of professionals. (p. 11-10).

FICA taxes Taxes designed to provide workers with supplemental retirement, employment disability, and medical benefits. (p. 11-11).

Gross earnings Total compensation earned by an employee. (p. 11-10).

Net pay Gross earnings less payroll deductions. (p. 11-12).

Notes payable Obligations in the form of written notes. (p. 11-3).

Employer payroll taxes consist of FICA, federal unemployment taxes, and state unemployment taxes. The taxes are usually accrued at the time the company records the payroll, by debiting Payroll Tax Expense and crediting separate liability accounts for each type of tax.

The objectives of internal control for payroll are (1) to safeguard company assets against unauthorized payments of payrolls, and (2) to ensure the accuracy of the accounting records pertaining to payrolls.

*4 Discuss additional fringe benefits associated with employee compensation.

Additional fringe benefits associated with wages are paid absences (paid vacations, sick pay benefits, and paid holidays), and postretirement benefits (pensions, healthcare, and life insurance). The two most common types of pension arrangements are a defined-contribution plan and a defined-benefit plan.

Payroll deductions Deductions from gross earnings to determine the amount of a paycheck. (p. 11-10).

Payroll register A payroll record that accumulates the gross earnings, deductions, and net pay by employee for each pay period. (p. 11-14).

***Pension plan** An agreement whereby an employer provides benefits to employees after they retire. (p. 11-22).

***Postretirement benefits** Payments by employers to retired employees for healthcare, life insurance, and pensions. (p. 11-21).

Salaries Employee pay based on a specified amount rather than an hourly rate. (p. 11-10).

Statement of earnings A document attached to a paycheck that indicates the employee's gross earnings, payroll deductions, and net pay. (p. 11-15).

State unemployment taxes Taxes imposed on the employer by states that provide benefits to employees who lose their jobs. (p. 11-17).

Wage and Tax Statement (Form W-2) A form showing gross earnings, FICA taxes withheld, and income taxes withheld, prepared annually by an employer for each employee. (p. 11-19).

Wages Amounts paid to employees based on a rate per hour or on a piecework basis. (p. 11-10).

Working capital A measure of a company's liquidity; computed as current assets minus current liabilities. (p. 11-8).

Practice Multiple-Choice Questions

1. (LO 1) The time period for classifying a liability as current is one year or the operating cycle, whichever is:

- a. longer.
- b. shorter.
- c. probable.
- d. possible.

2. (LO 1) To be classified as a current liability, a debt must be expected to be paid within:

- a. one year.
- b. the operating cycle.

- c. 2 years.
- d. (a) or (b), whichever is longer.

3. (LO 1) Maggie Sharre Company borrows \$88,500 on September 1, 2020, from Sandwich State Bank by signing an \$88,500, 12%, one-year note. What is the accrued interest at December 31, 2020?

- a. \$2,655.
- b. \$3,540.
- c. \$4,425.
- d. \$10,620.

- 4. (LO 1)** RS Company borrowed \$70,000 on December 1 on a 6-month, 6% note. At December 31:
- neither the note payable nor the interest payable is a current liability.
 - the note payable is a current liability, but the interest payable is not.
 - the interest payable is a current liability but the note payable is not.
 - both the note payable and the interest payable are current liabilities.
- 5. (LO 1)** Becky Sherrick Company has total proceeds from sales of \$4,515. If the proceeds include sales taxes of 5%, the amount to be credited to Sales Revenue is:
- \$4,000.
 - \$4,300.
 - \$4,289.25.
 - No correct answer given.
- 6. (LO 1)** Sensible Insurance Company collected a premium of \$18,000 for a 1-year insurance policy on April 1. What amount should Sensible report as a current liability for Unearned Service Revenue at December 31?
- \$0.
 - \$4,500.
 - \$13,500.
 - \$18,000.
- 7. (LO 2)** Working capital is calculated as:
- current assets minus current liabilities.
 - total assets minus total liabilities.
 - long-term liabilities minus current liabilities.
 - Both (b) and (c).
- 8. (LO 2)** The current ratio is computed as:
- total assets divided by total liabilities.
 - total assets divided by current liabilities.
 - current assets divided by total liabilities.
 - current assets divided by current liabilities.
- 9. (LO 2)** A contingent liability should be recorded in the accounts when:
- it is probable the contingency will happen, but the amount cannot be reasonably estimated.
 - it is reasonably possible the contingency will happen, and the amount can be reasonably estimated.
 - it is probable the contingency will happen, and the amount can be reasonably estimated.
- 10. (LO 1)** At December 31, Hanes Company prepares an adjusting entry for a product warranty contract. Which of the following accounts is/are included in the entry?
- Miscellaneous Expense.
 - Repair Parts.
 - Warranty Liability.
 - Both (a) and (b).
- 11. (LO 3)** Andy Manion earns \$14 per hour for a 40-hour week and \$21 per hour for any overtime work. If Manion works 45 hours in a week, gross earnings are:
- \$560.
 - \$630.
 - \$650.
 - \$665.
- 12. (LO 3)** When recording payroll:
- gross earnings are recorded as salaries and wages payable.
 - net pay is recorded as salaries and wages expense.
 - payroll deductions are recorded as liabilities.
 - More than one of the above.
- 13. (LO 3)** Employer payroll taxes do **not** include:
- federal unemployment taxes.
 - state unemployment taxes.
 - federal income taxes.
 - FICA taxes.
- 14. (LO 3)** FICA Taxes Payable was credited for \$7,500 in the entry when Antonio Company recorded payroll. When Antonio Company records employer's payroll taxes, FICA Taxes Payable should be credited for:
- \$0.
 - \$7,500.
 - \$15,000.
 - Some other amount.
- 15. (LO 3)** The department that should pay the payroll is the:
- timekeeping department.
 - human resources department.
 - payroll department.
 - treasurer's department.
- *16. (LO 4)** Which of the following is **not** an additional fringe benefit?
- Postretirement pensions.
 - Paid absences.
 - Paid vacations.
 - Salaries.

Solutions

- 1. a.** The time period for classifying a liability as current is one year or the operating cycle, whichever is longer, not (b) shorter, (c) probable, or (d) possible.
- 2. d.** To be classified as a current liability, a debt must be expected to be paid within one year or the operating cycle. Choices (a) and (b) are both correct, but (d) is the better answer. Choice (c) is incorrect.
- 3. b.** Accrued interest at December 31, 2020, is computed as the face value (\$88,500) times the interest rate (12%) times the portion of the year the debt was outstanding (4 months out of 12), or \$3,540 ($\$88,500 \times 12\% \times 4/12$), not (a) \$2,655, (c) \$4,425, or (d) \$10,620.
- 4. d.** Both the note payable and interest payable are current liabilities. Notes due for payment within one year of the balance sheet date are usually classified as current liabilities. The other choices are therefore incorrect.
- 5. b.** Dividing the total proceeds (\$4,515) by one plus the sales tax rate (1.05) will result in the amount of sales to be credited to the Sales Revenue account of \$4,300 ($\$4,515 \div 1.05$). The other choices are therefore incorrect.
- 6. b.** The monthly premium is \$1,500 or \$18,000 divided by 12. Because Sensible has recognized 9 months of insurance revenue (April 1–December 31), 3 months' insurance premium is still unearned. The amount that Sensible should report as Unearned Service Revenue is

therefore \$4,500 ($3 \text{ months} \times \$1,500$), not (a) \$0, (c) \$13,500, or (d) \$18,000.

7. a. Working capital is defined as current assets minus current liabilities. The other choices are therefore incorrect.

8. d. The current ratio is defined as current assets divided by current liabilities. The other choices are therefore incorrect.

9. c. A contingent liability is recorded when the amount can be reasonably estimated and the likelihood of the contingency is probable. The other choices are therefore incorrect.

10. b. The adjusting entry for product warranties includes a debit to Warranty Liability, not (a) Miscellaneous Expense, (c) Repair Parts, or (d) both Miscellaneous Expense and Warranty Liability.

11. d. Gross earnings are computed as $(40 \text{ hours} \times \$14 \text{ per hour}) + (5 \text{ hours} \times \$21 \text{ per hour}) = \$665$, not (a) \$560, (b) \$630, or (c) \$650.

12. c. When recording payroll, payroll deductions are recorded as liabilities. The other choices are incorrect because (a) gross earnings are recorded as salaries and wages expense, (b) net pay is recorded as

salaries and wages payable, and (d) only one of the answer choices is true concerning payroll.

13. c. Federal income taxes are a payroll deduction, not an employer payroll tax. The employer is merely a collection agent. The other choices are all included in employer payroll taxes.

14. b. Each employee pays FICA taxes, but the employer must match each employee's FICA contribution. Because the employer's tax is subject to the same rate and maximum earnings as the employee's, FICA Taxes Payable would also be \$7,500. The other choices are therefore incorrect.

15. d. The treasurer's department pays or distributes the payroll checks. The other choices are incorrect because (a) the timekeeping department monitors hours worked by employees, (b) the human resources department documents and authorizes employment, and (c) the payroll department prepares the payroll checks.

***16. d.** Salaries are not an additional fringe benefit. The other choices are true statements.

Practice Brief Exercises

Compute and record sales taxes payable.

1. (LO 1) Amy Pond Discounts does not segregate sales and sales taxes at the time of sale. The register total for March 17 is \$19,928. All sales are subject to a 6% sales tax. Compute sales taxes payable, and make the entry to record sales taxes payable and sales revenue.

Solution

1. Sales tax payable

$$\text{1. Sales} = \$18,800 (\$19,928 \div 1.06)$$

$$\text{2. Sales taxes payable} = \$1,128 (\$18,800 \times 6\%)$$

Mar. 16	Cash		19,928	
	Sales Revenue			18,800
	Sales Taxes Payable			1,128

Prepare adjusting entry for warranty costs.

2. (LO 2) On October 1, Clara Oswald Company introduces a new product that includes a one-year warranty on parts. By December 31, 2020, 3,000 units are sold. Management believes that 6% of the units will be defective and that the average warranty costs will be \$120 per unit. Prepare the adjusting entry at December 31 to accrue the estimated warranty cost, assuming no warranty claims are honored in 2020.

Solution

2. Dec. 31	Warranty Expense		21,600	
	Warranty Liability $[(3,000 \times 6\%) \times \$120]$			21,600

Compute gross earnings and net pay.

3. (LO 3) Ben Borke's regular hourly wage rate is \$20, and he receives an hourly rate of \$30 for work in excess of 40 hours. During a January pay period, Ben works 46 hours. Ben's federal income tax withholding is \$123, he has no voluntary deductions, and the FICA tax rate is 7.65%. Compute Ben's gross earnings and net pay for the pay period.

Solution

3. Gross earnings:

Regular pay ($40 \times \$20$)	\$800.00	
Overtime pay ($6 \times \$30$)	180.00	<u>\$980.00</u>

Gross earnings

Less: FICA taxes payable ($\$980 \times 7.65\%$)

Federal income taxes payable

Net pay

\$782.03

Practice Exercises

- 1. (LO 1)** On June 1, Streamsong Company borrows \$150,000 from First Bank on a 6-month, \$150,000, 8% note. *Prepare entries for interest-bearing notes.*

Instructions

- Prepare the entry on June 1.
- Prepare the adjusting entry on June 30.
- Prepare the entry at maturity (December 1), assuming monthly adjusting entries have been made through November 30.
- What was the total financing cost (interest expense)?

Solution

1. a. June 1	Cash Notes Payable	150,000	150,000
b. June 30	Interest Expense Interest Payable (\$150,000 × 8% × 1/12)	1,000	1,000
c. Dec. 1	Notes Payable Interest Payable (\$150,000 × 8% × 6/12) Cash	150,000 6,000	156,000
d. \$6,000			

- 2. (LO 2) Financial Statement** Fun App Company has the following liability accounts after posting adjusting entries: Accounts Payable \$77,000, Unearned Ticket Revenue \$36,000, Warranty Liability \$25,000, Interest Payable \$10,000, Mortgage Payable \$150,000, Notes Payable \$100,000, and Sales Taxes Payable \$14,000. Assume the company's operating cycle is less than 1 year, ticket revenue will be recognized within 1 year, warranty costs are expected to be incurred within 1 year, and the notes mature in 3 years.

Prepare current liabilities section of the balance sheet and evaluate liquidity.

Instructions

- Prepare the current liabilities section of the balance sheet, assuming \$40,000 of the mortgage is payable next year.
- Comment on Fun App Company's liquidity, assuming total current assets are \$350,000.

Solution

2. a.

Fun App Company Partial Balance Sheet	
Current liabilities	
Accounts payable	\$ 77,000
Long-term debt due within one year	40,000
Unearned ticket revenue	36,000
Warranty liability	25,000
Sales taxes payable	14,000
Interest payable	10,000
Total current liabilities	<u>\$202,000</u>

- b. Fun App Company's working capital is \$148,000 (\$350,000 – \$202,000), and its current ratio is 1.73:1 (\$350,000 ÷ \$202,000). Although a current ratio of 2:1 has been considered the standard for a good credit rating, many companies operate successfully with a current ratio well below 2:1.

Compute net pay and record pay for one employee.

- 3. (LO 3)** Erin Berge's regular hourly wage rate is \$18, and she receives a wage of 1½ times the regular hourly rate for work in excess of 40 hours. During a March weekly pay period, Erin worked 42 hours. Her gross earnings prior to the current week were \$6,000. Erin is married and claims three withholding allowances. Her only voluntary deduction is for group hospitalization insurance at \$20 per week. Assume federal income tax withheld is \$76.

Instructions

- Compute the following amounts for Erin's wages for the current week.
 - Gross earnings.
 - FICA taxes (based on a 7.65% rate).
 - State income taxes withheld (based on a 3% rate).
 - Net pay.
- Record Erin's pay.

Solution

- 3. a. 1.** Regular 40 hours $\times \$18 = \720
 Overtime 2 hours $\times \$27 = \underline{\quad 54}$
 Gross earnings \$774
- 2.** FICA taxes: $(\$774 \times 7.65\%) = \59.21
3. State income taxes: $(\$774 \times 3\%) = \23.22
4. Net Pay: $(\$774.00 - \$59.21 - \$76.00 - \$23.22 - \$20.00) = \595.57

b. Salaries and Wages Expense	774.00
FICA Taxes Payable	59.21
Federal Income Taxes Payable	76.00
State Income Taxes Payable	23.22
Health Insurance Payable	20.00
Salaries and Wages Payable	595.57

Practice Problem

Indiana Jones Company had the following selected transactions.

- Feb. 1 Signs a \$50,000, 6-month, 9%-interest-bearing note payable to CitiBank and receives \$50,000 in cash.
- 10 Cash register sales total \$43,200, which includes an 8% sales tax.
- 28 The payroll for the month consists of salaries and wages of \$50,000. All wages are subject to 7.65% FICA taxes. A total of \$8,900 federal income taxes are withheld. The salaries are paid on March 1.
- 28 The company develops the following adjustment data.
- Interest expense of \$375 has been incurred on the note.
 - Employer payroll taxes include 7.65% FICA taxes, a 5.4% state unemployment tax, and a 0.8% federal unemployment tax.
 - Some sales were made under warranty. Of the units sold under warranty, 350 are expected to become defective. Repair costs are estimated to be \$40 per unit.

Instructions

- Journalize the February transactions.
- Journalize the adjusting entries at February 28.

Solution

a. Feb. 1	Cash	50,000
	Notes Payable (Issued 6-month, 9%-interest-bearing note to CitiBank)	50,000

10	Cash Sales Revenue ($\$43,200 \div 1.08$) Sales Taxes Payable ($\$40,000 \times 8\%$) (To record sales revenue and sales taxes payable)	43,200 	40,000 3,200
28	Salaries and Wages Expense FICA Taxes Payable ($7.65\% \times \$50,000$) Federal Income Taxes Payable Salaries and Wages Payable (To record February salaries)	50,000 	3,825 8,900 37,275
b. Feb. 28	Interest Expense Interest Payable (To record accrued interest for February)	375 	375
28	Payroll Tax Expense FICA Taxes Payable Federal Unemployment Taxes Payable ($0.8\% \times \$50,000$) State Unemployment Taxes Payable ($5.4\% \times \$50,000$) (To record employer's payroll taxes on February payroll)	6,925 	3,825 400 2,700
28	Warranty Expense ($350 \times \$40$) Warranty Liability (To record estimated warranty liability)	14,000 	14,000

WileyPLUS

Brief Exercises, DO IT! Exercises, Exercises, Problems, and many additional resources are available for practice in WileyPLUS.

Note: All asterisked Questions, Exercises, and Problems relate to material in the appendix to the chapter.

Questions

1. Lori Randle believes a current liability is a debt that can be expected to be paid in one year. Is Lori correct? Explain.
2. Petrocelli Company obtains \$40,000 in cash by signing a 7%, 6-month, \$40,000 note payable to First Bank on July 1. Petrocelli's fiscal year ends on September 30. What information should be reported for the note payable in the annual financial statements?
3. a. Your roommate says, "Sales taxes are reported as an expense in the income statement." Do you agree? Explain.
b. Jensen Company has cash proceeds from sales of \$8,400. This amount includes \$400 of sales taxes. Give the entry to record the proceeds.
4. Ottawa University sold 15,000 season football tickets at \$80 each for its six-game home schedule. What entries should be made (a) when the tickets were sold, and (b) after each game?
5. What is liquidity? What are two measures of liquidity?
6. What is a contingent liability? Give an example of a contingent liability that is usually recorded in the accounts.
7. Under what circumstances is a contingent liability disclosed only in the notes to the financial statements? Under what circumstances is a contingent liability not recorded in the accounts nor disclosed in the notes to the financial statements?
8. What is the difference between gross pay and net pay? Which amount should a company record as wages and salaries expense?
9. Which payroll tax is levied on both employers and employees?
10. Are the federal and state income taxes withheld from employee paychecks a payroll tax expense for the employer? Explain your answer.
11. What do the following acronyms stand for: FICA, FUTA, and SUTA?
12. What information is shown in a W-2 statement?
13. Distinguish between the two types of payroll deductions and give examples of each.
14. What are the primary uses of the employee earnings record?
15. a. Identify the three types of employer payroll taxes.
b. How are tax liability accounts and payroll tax expense accounts classified in the financial statements?
16. You are a newly hired accountant with Nolasco Company. On your first day, the controller asks you to identify the main internal

control objectives related to payroll accounting. How would you respond?

17. What are the four functions associated with payroll activities?

***18.** Identify two additional types of fringe benefits associated with employees' compensation.

***19.** Often during job interviews, the candidate asks the potential employer about the firm's paid absences policy. What are paid absences? How are they accounted for?

***20.** What are two types of postretirement benefits?

***21.** Explain how a 401(k) plan works.

***22.** What is the principal difference between a defined-contribution pension plan and a defined-benefit pension plan?

Brief Exercises

Identify whether obligations are current liabilities.

BE11.1 (LO 1) Jamison Company has the following obligations at December 31: (a) a note payable for \$100,000 due in 2 years, (b) a 10-year mortgage payable of \$300,000 payable in ten \$30,000 annual payments, (c) interest payable of \$15,000 on the mortgage, and (d) accounts payable of \$60,000. For each obligation, indicate whether it should be classified as a current liability. (Assume an operating cycle of less than one year.)

Prepare entries for an interest-bearing note payable.

BE11.2 (LO 1) Peralta Company borrows \$60,000 on July 1 from the bank by signing a \$60,000, 10%, one-year note payable.

- Prepare the journal entry to record the proceeds of the note.
- Prepare the journal entry to record accrued interest at December 31, assuming adjusting entries are made only at the end of the year.

Compute and record sales taxes payable.

BE11.3 (LO 1) Coghlan Auto Supply does not segregate sales and sales taxes at the time of sale. The register total for March 16 is \$16,380. All sales are subject to a 5% sales tax. Compute sales taxes payable, and make the entry to record sales taxes payable and sales revenue.

Prepare entries for unearned revenues.

BE11.4 (LO 1) Derby University sells 4,000 season basketball tickets at \$210 each for its 12-game home schedule. Give the entry to record (a) the sale of the season tickets and (b) the revenue recognized by playing the first home game.

Analyze liquidity.

BE11.5 (LO 2) **Yahoo! Inc.**'s recent financial statements contain the following selected data (in thousands).

Current assets	\$ 4,594,772	Current liabilities	\$1,717,728
Total assets	14,936,030	Total liabilities	2,417,394

Compute (a) working capital and (b) current ratio.

Prepare adjusting entry for warranty costs.

BE11.6 (LO 2) On December 1, Bruney Company introduces a new product that includes a one-year warranty on parts. In December, 1,000 units are sold. Management believes that 5% of the units will be defective and that the average warranty costs will be \$90 per unit. Prepare the adjusting entry at December 31 to accrue the estimated warranty cost, assuming no warranty claims have been honored to date.

Compute gross earnings and net pay.

BE11.7 (LO 3) Beth Corbin's regular hourly wage rate is \$16, and she receives an hourly rate of \$24 for work in excess of 40 hours. During a January pay period, Beth works 45 hours. Beth's federal income tax withholding is \$95, she has no voluntary deductions, and the FICA tax rate is 7.65%. Compute Beth Corbin's gross earnings and net pay for the pay period.

Record a payroll and the payment of wages.

BE11.8 (LO 3) Data for Beth Corbin are presented in BE11.7. Prepare the journal entries to record (a) Beth's pay for the period and (b) the payment of Beth's wages. Use January 15 for the end of the pay period and the payment date.

Record employer payroll taxes.

BE11.9 (LO 3) In January, gross earnings in Lugo Company totaled \$80,000. All earnings are subject to 7.65% FICA taxes, 5.4% state unemployment taxes, and 0.8% federal unemployment taxes. Prepare the entry to record January payroll tax expense.

BE11.10 (LO 3) Swenson Company has the following payroll procedures.

Identify payroll functions.

- a. Supervisor approves overtime work.
- b. The human resources department prepares hiring authorization forms for new hires.
- c. A second payroll department employee verifies payroll calculations.
- d. The treasurer's department pays employees.

Identify the payroll function to which each procedure pertains.

***BE11.11 (LO 4)** At Ward Company, employees are entitled to one day's vacation for each month worked. In January, 70 employees worked the full month. Record the vacation pay liability for January, assuming the average daily pay for each employee is \$120.

Record estimated vacation benefits.

DO IT! Exercises

DO IT! 11.1 (LO 1) You and several classmates are studying for the next accounting exam. They ask you to answer the following questions:

Answer questions about current liabilities.

1. If cash is borrowed on a \$70,000, 9-month, 6% note on August 1, how much interest expense would be incurred by December 31?
2. The cash register total including sales taxes is \$42,000, and the sales tax rate is 5%. What is the sales taxes payable?
3. If \$45,000 is collected in advance on November 1 for 6-month magazine subscriptions, what amount of subscription revenue should be recognized by December 31?

DO IT! 11.2 (LO 2) Financial Statement Medlen Company, has the following account balances at December 31, 2020.

Prepare current liabilities section and compute liquidity measures.

Notes payable (\$60,000 due after 12/31/21)	\$100,000
Unearned service revenue	70,000
Other long-term debt (\$90,000 due in 2021)	250,000
Salaries and wages payable	32,000
Accounts payable	63,000

In addition, Medlen is involved in a lawsuit. Legal counsel feels it is probable Medlen will pay damages of \$25,000 in 2021.

- a. Prepare the current liabilities section of Medlen's December 31, 2020, balance sheet.
- b. Medlen's current assets are \$570,000. Compute Medlen's working capital and current ratio.

DO IT! 11.3a (LO 3) In January, gross earnings in Burrell Company were \$80,000. All earnings are subject to 7.65% FICA taxes. Federal income tax withheld was \$14,000, and state income tax withheld was \$1,600. (a) Calculate net pay for January, and (b) record the payroll.

Calculate net pay and record payroll.

DO IT! 11.3b (LO 3) In January, the payroll supervisor determines that gross earnings for Carlyle Company are \$120,000. All earnings are subject to 7.65% FICA taxes, 5.4% state unemployment taxes, and 0.8% federal unemployment taxes. Record the employer's payroll taxes.

Record employer's payroll taxes.

Exercises

E11.1 (LO 1) C.S. Lewis Company had the following transactions involving notes payable.

Prepare entries for interest-bearing notes.

July 1, 2020	Borrows \$50,000 from First National Bank by signing a 9-month, 8% note.
Nov. 1, 2020	Borrows \$60,000 from Lyon County State Bank by signing a 3-month, 6% note.
Dec. 31, 2020	Prepares adjusting entries.
Feb. 1, 2021	Pays principal and interest to Lyon County State Bank.
Apr. 1, 2021	Pays principal and interest to First National Bank.

Instructions

Prepare journal entries for each of the transactions.

Prepare entries for interest-bearing notes.

E11.2 (LO 1) On June 1, Merando Company borrows \$90,000 from First Bank on a 6-month, 8% note.

Instructions

- Prepare the entry on June 1.
- Prepare the adjusting entry on June 30.
- Prepare the entry at maturity (December 1), assuming monthly adjusting entries have been made through November 30.
- What was the total financing cost (interest expense)?

Journalize sales and related taxes.

E11.3 (LO 1) In performing accounting services for small businesses, you encounter the following situations pertaining to cash sales.

- Poole Company enters sales and sales taxes separately on its cash register. On April 10, the register totals are sales \$30,000 and sales taxes \$1,500.
- Waterman Company does not segregate sales and sales taxes. Its register total for April 15 is \$25,680, which includes a 7% sales tax.

Instructions

Prepare the entry to record the sales transactions and related taxes for each client.

Journalize unearned subscription revenue.

E11.4 (LO 1) Moreno Company publishes a monthly sports magazine, *Fishing Preview*. Subscriptions to the magazine cost \$20 per year. During November 2020, Moreno sells 15,000 subscriptions beginning with the December issue. Moreno prepares financial statements quarterly and recognizes subscription revenue at the end of the quarter. The company uses the accounts Unearned Subscription Revenue and Subscription Revenue.

Instructions

- Prepare the entry in November for the receipt of the subscriptions.
- Prepare the adjusting entry at December 31, 2020, to record sales revenue recognized in December 2020.
- Prepare the adjusting entry at March 31, 2021, to record sales revenue recognized in the first quarter of 2021.

Record estimated liability and expense for warranties.

E11.5 (LO 2) Betancourt Company sells automatic can openers under a 75-day warranty for defective merchandise. Based on past experience, Betancourt estimates that 3% of the units sold will become defective during the warranty period. Management estimates that the average cost of replacing or repairing a defective unit is \$15. The units sold and units defective that occurred during the last 2 months of 2020 are as follows.

<u>Month</u>	<u>Units Sold</u>	<u>Units Defective Prior to December 31</u>
November	30,000	600
December	32,000	400

Instructions

- Prepare the journal entry to record the costs incurred in honoring 1,000 warranty claims. (Assume actual costs of \$15,000.)
- Prepare the journal entry to record the warranty liability at December 31 for the units sold in November and December.
- Give the entry to record the honoring of 500 warranty contracts in January at an average cost of \$15.

Record and disclose contingent liabilities.

E11.6 (LO 2) Gallardo Co. is involved in a lawsuit as a result of an accident that took place September 5, 2020. The lawsuit was filed on November 1, 2020, and claims damages of \$1,000,000.

Instructions

- At December 31, 2020, Gallardo's attorneys feel it is remote that Gallardo will lose the lawsuit. How should the company account for the effects of the lawsuit?
- Assume instead that at December 31, 2020, Gallardo's attorneys feel it is probable that Gallardo will lose the lawsuit and be required to pay \$1,000,000. How should the company account for this lawsuit?

- c. Assume instead that at December 31, 2020, Gallardo's attorneys feel it is reasonably possible that Gallardo could lose the lawsuit and be required to pay \$1,000,000. How should the company account for this lawsuit?

E11.7 (LO 2) Financial Statement Younger Online Company has the following liability accounts after posting adjusting entries: Accounts Payable \$73,000, Unearned Ticket Revenue \$24,000, Warranty Liability \$18,000, Interest Payable \$8,000, Mortgage Payable \$120,000, Notes Payable \$80,000, and Sales Taxes Payable \$10,000. Assume the company's operating cycle is less than 1 year, ticket revenue will be recognized within 1 year, warranty costs are expected to be incurred within 1 year, and the notes mature in 3 years.

Prepare the current liabilities section of the balance sheet.

Instructions

- Prepare the current liabilities section of the balance sheet, assuming \$30,000 of the mortgage is payable next year.
- Comment on Younger Online Company's liquidity, assuming total current assets are \$300,000.

E11.8 (LO 2) Suppose the following financial data were reported by **3M Company** for 2019 and 2020 (dollars in millions).

Calculate current ratio and working capital before and after paying accounts payable.

	2020	2019
Current assets		
Cash and cash equivalents	\$ 3,040	\$1,849
Accounts receivable, net	3,250	3,195
Inventories	2,639	3,013
Other current assets	<u>1,866</u>	<u>1,541</u>
Total current assets	\$10,795	\$9,598
Current liabilities	\$ 4,897	\$5,839

Instructions

- Calculate the current ratio and working capital for 3M for 2019 and 2020.
- Suppose that at the end of 2020, 3M management used \$200 million cash to pay off \$200 million of accounts payable. How would its current ratio and working capital have changed?

E11.9 (LO 3) Maria Garza's regular hourly wage rate is \$16, and she receives a wage of 1½ times the regular hourly rate for work in excess of 40 hours. During a March weekly pay period, Maria worked 42 hours. Her gross earnings prior to the current week were \$6,000. Maria is married and claims three withholding allowances. Her only voluntary deduction is for group hospitalization insurance at \$25 per week.

Compute net pay and record pay for one employee.

Instructions

- Compute the following amounts for Maria's wages for the current week.
 1. Gross earnings.
 2. FICA taxes. (Assume a 7.65% rate on maximum of \$127,200.)
 3. Federal income taxes withheld. (Use the withholding table in Illustration 11.11.)
 4. State income taxes withheld. (Assume a 2.0% rate.)
 5. Net pay.
- Record Maria's pay.

E11.10 (LO 3) Employee earnings records for Slaymaker Company reveal the following gross earnings for four employees through the pay period of December 15.

Compute maximum FICA deductions.

J. Seligman	\$93,500	L. Marshall	\$115,100
R. Eby	\$113,600	T. Olson	\$140,000

For the pay period ending December 31, each employee's gross earnings is \$4,500. The FICA tax rate is 7.65% on gross earnings of \$127,200.

Instructions

Compute the FICA withholdings that should be made for each employee for the December 31 pay period. (Show computations.)

Prepare payroll register and record payroll and payroll tax expense.

E11.11 (LO 3) Ramirez Company has the following data for the weekly payroll ending January 31.

Employee	Hours						Hourly Rate	Federal Income Tax Withholding	Health Insurance
	M	T	W	T	F	S			
L. Helton	8	8	9	8	10	3	\$12	\$34	\$10
R. Kenseth	8	8	8	8	8	2	14	37	25
D. Tavaras	9	10	8	8	9	0	15	58	25

Employees are paid 1½ times the regular hourly rate for all hours worked in excess of 40 hours per week. FICA taxes are 7.65% on the first \$127,200 of gross earnings. Ramirez Company is subject to 5.4% state unemployment taxes and 0.8% federal unemployment taxes on the first \$7,000 of gross earnings.

Instructions

- Prepare the payroll register for the weekly payroll.
- Prepare the journal entries to record the payroll and Ramirez's payroll tax expense.

Compute missing payroll amounts and record payroll.

E11.12 (LO 3) Selected data from a February payroll register for Sutton Company are presented below. Some amounts are intentionally omitted.

Gross earnings:		State income taxes	\$ (3)
Regular	\$9,100	Union dues	100
Overtime	(1)	Total deductions	(4)
Total	(2)	Net pay	\$7,595
Deductions:		Account debited:	
FICA taxes	\$ 765	Salaries and wages expense	(5)
Federal income taxes	1,140		

FICA taxes are 7.65%. State income taxes are 4% of gross earnings.

Instructions

- Fill in the missing amounts.
- Journalize the February payroll and the payment of the payroll.

Determine employer's payroll taxes; record payroll tax expense.

E11.13 (LO 3) According to a payroll register summary of Frederickson Company, the amount of employees' gross pay in December was \$850,000, of which \$80,000 was not subject to Social Security taxes of 6.2% and \$750,000 was not subject to state and federal unemployment taxes.

Instructions

- Determine the employer's payroll tax expense for the month, using the following rates: FICA 7.65%, state unemployment 5.4%, and federal unemployment 0.8%.
- Prepare the journal entry to record December payroll tax expense.

Prepare adjusting entries for fringe benefits.

***E11.14 (LO 4)** Mayberry Company has two fringe benefit plans for its employees:

- It grants employees 2 days' vacation for each month worked. Ten employees worked the entire month of March at an average daily wage of \$140 per employee.
- In its pension plan, the company recognizes 10% of gross earnings as a pension expense. Gross earnings in March were \$40,000. No contribution has been made to the pension fund.

Instructions

Prepare the adjusting entries at March 31.

Prepare journal entries for fringe benefits.

***E11.15 (LO 4)** Podsednik Corporation has 20 employees who each earn \$140 a day. The following information is available.

- At December 31, Podsednik recorded vacation benefits. Each employee earned 5 vacation days during the year.

2. At December 31, Podsednik recorded pension expense of \$100,000, and made a contribution of \$70,000 to the pension plan.
3. In January, 18 employees used one vacation day each.

Instructions

Prepare Podsednik's journal entries to record these transactions.

Problems: Set A

P11.1A (LO 1, 2) Financial Statement On January 1, 2020, the ledger of Accardo Company contains the following liability accounts.

Accounts Payable	\$52,000
Sales Taxes Payable	7,700
Unearned Service Revenue	16,000

Prepare current liability entries, adjusting entries, and current liabilities section.

During January, the following selected transactions occurred.

- Jan. 5 Sold merchandise for cash totaling \$20,520, which includes 8% sales taxes.
- 12 Performed services for customers who had made advance payments of \$10,000. (Credit Service Revenue.)
- 14 Paid state revenue department for sales taxes collected in December 2019 (\$7,700).
- 20 Sold 900 units of a new product on credit at \$50 per unit, plus 8% sales tax. This new product is subject to a 1-year warranty.
- 21 Borrowed \$27,000 from Girard Bank on a 3-month, 8%, \$27,000 note.
- 25 Sold merchandise for cash totaling \$12,420, which includes 8% sales taxes.

Instructions

- a. Journalize the January transactions.
- b. Journalize the adjusting entries at January 31 for (1) the outstanding notes payable, and (2) estimated warranty liability, assuming warranty costs are expected to equal 7% of sales of the new product. (*Hint:* Use one-third of a month for the Girard Bank note.)
- c. Prepare the current liabilities section of the balance sheet at January 31, 2020. Assume no change in accounts payable.
- c. Current liability total \$94,250

P11.2A (LO 1, 2) Financial Statement The following are selected transactions of Blanco Company. Blanco prepares financial statements **quarterly**.

Journalize and post note transactions; show balance sheet presentation.

- Jan. 2 Purchased merchandise on account from Nunez Company, \$30,000, terms 2/10, n/30. (Blanco uses the perpetual inventory system.)
- Feb. 1 Issued a 9%, 2-month, \$30,000 note to Nunez in payment of account.
- Mar. 31 Accrued interest for 2 months on Nunez note.
- Apr. 1 Paid face value and interest on Nunez note.
- July 1 Purchased equipment from Marson Equipment paying \$11,000 in cash and signing a 10%, 3-month, \$60,000 note.
- Sept. 30 Accrued interest for 3 months on Marson note.
- Oct. 1 Paid face value and interest on Marson note.
- Dec. 1 Borrowed \$24,000 from the Paola Bank by issuing a 3-month, 8% note with a face value of \$24,000.
- Dec. 31 Recognized interest expense for 1 month on Paola Bank note.

Instructions

- a. Prepare journal entries for the listed transactions and events.
- b. Post to the accounts Notes Payable, Interest Payable, and Interest Expense.
- c. Show the balance sheet presentation of notes and interest payable at December 31.
- d. What is total interest expense for the year?
- d. \$2,110

Prepare payroll register and payroll entries.

P11.3A (LO 3) Mann Hardware has four employees who are paid on an hourly basis plus time-and-a-half for all hours worked in excess of 40 a week. Payroll data for the week ended March 15, 2020, are presented below.

Employee	Hours Worked	Hourly Rate	Federal Income Tax Withholdings	United Fund
Ben Abel	40	\$15.00	\$?	\$5.00
Rita Hager	42	16.00	?	5.00
Jack Never	44	13.00	60.00	8.00
Sue Perez	46	13.00	61.00	5.00

Abel and Hager are married. They claim 0 and 4 withholding allowances, respectively. The following tax rates are applicable: FICA 7.65%, state income taxes 3%, state unemployment taxes 5.4%, and federal unemployment 0.8%.

Instructions

- a. Net pay \$2,039.30
- b. Payroll tax expense \$349.43
- c. Cash paid \$578.02
- d. Journalize the deposit in a Federal Reserve bank on March 31, 2020, of the FICA and federal income taxes payable to the government.

Journalize payroll transactions and adjusting entries.

P11.4A (LO 3, 4) The following payroll liability accounts are included in the ledger of Harmon Company on January 1, 2020.

FICA Taxes Payable	\$ 760.00
Federal Income Taxes Payable	1,204.60
State Income Taxes Payable	108.95
Federal Unemployment Taxes Payable	288.95
State Unemployment Taxes Payable	1,954.40
Union Dues Payable	870.00
U.S. Savings Bonds Payable	360.00

In January, the following transactions occurred.

- Jan. 10 Sent check for \$870.00 to union treasurer for union dues.
- 12 Remitted check for \$1,964.60 to the Federal Reserve bank for FICA taxes and federal income taxes withheld.
- 15 Purchased U.S. Savings Bonds for employees by writing check for \$360.00.
- 17 Paid state income taxes withheld from employees.
- 20 Paid federal and state unemployment taxes.
- 31 Completed monthly payroll register, which shows salaries and wages \$58,000, FICA taxes withheld \$4,437, federal income taxes payable \$2,158, state income taxes payable \$454, union dues payable \$400, United Fund contributions payable \$1,888, and net pay \$48,663.
- 31 Prepared payroll checks for the net pay and distributed checks to employees.

At January 31, the company also makes the following accrued adjustments pertaining to employee compensation.

1. Employer payroll taxes: FICA taxes 7.65%, federal unemployment taxes 0.8%, and state unemployment taxes 5.4%.
- *2. Vacation pay: 6% of gross earnings.

b. Payroll tax expense \$8,033;
Vacation benefits expense
\$3,480

Instructions

- a. Journalize the January transactions.
- b. Journalize the adjustments pertaining to employee compensation at January 31.

Prepare entries for payroll and payroll taxes; prepare W-2 data.

P11.5A (LO 3) For the year ended December 31, 2020, Denkinger Electrical Repair Company reports the following summary payroll data.

Gross earnings:	
Administrative salaries	\$200,000
Electricians' wages	370,000
Total	<u><u>\$570,000</u></u>
Deductions:	
FICA taxes	\$ 38,645
Federal income taxes withheld	174,400
State income taxes withheld (3%)	17,100
United Fund contributions payable	27,500
Health insurance premiums	17,200
Total	<u><u>\$274,845</u></u>

Denkinger's payroll taxes are Social Security tax 6.2%, Medicare tax 1.45%, state unemployment 2.5% (due to a stable employment record), and 0.8% federal unemployment. Gross earnings subject to Social Security taxes of 6.2% total \$490,000, and gross earnings subject to unemployment taxes total \$135,000. No employee exceeds the \$127,200 limit related to FICA taxes.

Instructions

- a. Prepare a summary journal entry at December 31 for the full year's payroll.
 - b. Journalize the adjusting entry at December 31 to record the employer's payroll taxes.
 - c. The W-2 Wage and Tax Statement requires the following dollar data.
- a. Salaries and wages payable
\$295,155
b. Payroll tax expense \$43,100

<u>Wages, Tips, Other Compensation</u>	<u>Federal Income Tax Withheld</u>	<u>State Income Tax Withheld</u>	<u>FICA Wages</u>	<u>FICA Tax Withheld</u>
--	--	--------------------------------------	-----------------------	------------------------------

Complete the required data for the following employees.

<u>Employee</u>	<u>Gross Earnings</u>	<u>Federal Income Tax Withheld</u>
Maria Sandoval	\$59,000	\$28,500
Jennifer Mingenback	26,000	10,200

Continuing Case

Cookie Creations

(Note: This is a continuation of the Cookie Creations case from Chapters 1 through 10.)

CC11 Recall that Cookie Creations sells fine European mixers that it purchases from Kzinski Supply Co. Kzinski warrants the mixers to be free of defects in material and workmanship for a period of one year from the date of original purchase. If the mixer has such a defect, Kzinski will repair or replace the mixer free of charge for parts and labor.

Go to **WileyPLUS** for complete case details and instructions.

Ethics Case

EC11 Robert Eberle owns and manages Robert's Restaurant, a 24-hour restaurant near the city's medical complex. Robert employs 9 full-time employees and 16 part-time employees. He pays all of the full-time employees by check, the amounts of which are determined by Robert's public accountant, Anne Farr. Robert pays all of his part-time employees in currency. He computes their wages and withdraws the cash directly from his cash register.

Anne has repeatedly urged Robert to pay all employees by check. But as Robert has told his competitor and friend, Danny Gall, who owns the Greasy Diner, "My part-time employees prefer the currency over a check. Also, I don't withhold or pay any taxes or worker's compensation insurance on those cash wages because they go totally unrecorded and unnoticed."

Instructions

- a. Who are the stakeholders in this situation?
- b. What are the legal and ethical considerations regarding Robert's handling of his payroll?
- c. Anne Farr is aware of Robert's payment of the part-time payroll in currency. What are her ethical responsibilities in this case?
- d. What internal control principle is violated in this payroll process?

Comprehensive Accounting Cycle Review

ACR11 Financial Statement Morgan Company's balance sheet at December 31, 2019, is presented below.

Morgan Company Balance Sheet December 31, 2019		
Cash	\$ 30,000	Accounts Payable
Inventory	30,750	Interest Payable
Prepaid Insurance	6,000	Notes Payable
Equipment	<u>38,000</u>	<u>Owner's Capital</u>
	<u><u>\$104,750</u></u>	<u><u>\$104,750</u></u>

During January 2020, the following transactions occurred. (Morgan Company uses the perpetual inventory system.)

1. Morgan paid \$250 interest on the note payable on January 1, 2020. The note is due December 31, 2021.
2. Morgan purchased \$261,100 of inventory on account.
3. Morgan sold for \$440,000 cash, inventory which cost \$265,000. Morgan also collected \$28,600 in sales taxes.
4. Morgan paid \$230,000 in accounts payable.
5. Morgan paid \$17,000 in sales taxes to the state.
6. Paid other operating expenses of \$30,000.
7. On January 31, 2020, the payroll for the month consists of salaries and wages of \$60,000. All salaries and wages are subject to 7.65% FICA taxes. A total of \$8,900 federal income taxes are withheld. The salaries and wages are paid on February 1.

Adjustment data:

8. Interest expense of \$250 has been incurred in January on the notes payable.
9. The insurance for the year 2020 was prepaid on December 31, 2019.
10. The equipment was acquired on December 31, 2019, and will be depreciated on a straight-line basis over 5 years with a \$2,000 salvage value.
11. Employer's payroll taxes include 7.65% FICA taxes, a 5.4% state unemployment tax, and an 0.8% federal unemployment tax.

Instructions

(You may need to set up T-accounts to determine ending balances.)

- a. Prepare journal entries for the transactions listed above and the adjusting entries.
- b. Prepare an adjusted trial balance at January 31, 2020.
- c. Prepare an income statement, an owner's equity statement for the month ending January 31, 2020, and a classified balance sheet as of January 31, 2020.

Expand Your Critical Thinking**Financial Reporting Problem: Apple Inc.**

CT11.1 The financial statements of **Apple Inc.** are presented in Appendix A. The complete annual report, including the notes to the financial statements, is available at the company's website.

Instructions

Refer to Apple's financial statements and answer the following questions about current and contingent liabilities and payroll costs.

- a. What were Apple's total current liabilities at September 26, 2015? What was the increase/decrease in Apple's total current liabilities from the prior year?
- b. In Apple's Note 10, the company explains the nature of its contingencies. Under what conditions does Apple recognize (record and report) liabilities for contingencies?
- c. What were the components of total current liabilities on September 26, 2015?

Comparative Analysis Problem: PepsiCo, Inc. vs. The Coca-Cola Company

CT11.2 **PepsiCo, Inc.**'s financial statements are presented in Appendix B. Financial statements of **The Coca-Cola Company** are presented in Appendix C. The complete annual reports of PepsiCo and Coca-Cola, including the notes to the financial statements, are available at each company's respective website.

Instructions

- a. At December 26, 2015, what was PepsiCo's largest current liability account? What were its total current liabilities? At December 31, 2015, what was Coca-Cola's largest current liability account? What were its total current liabilities?
- b. Based on information contained in those financial statements, compute the following 2015 values for each company:
 1. Working capital.
 2. Current ratio.
- c. What conclusions concerning the relative liquidity of these companies can be drawn from these data?

Comparative Analysis Problem: Amazon.com, Inc. vs. Wal-Mart Stores, Inc.

CT11.3 **Amazon.com Inc.**'s financial statements are presented in Appendix D. Financial statements of **Wal-Mart Stores, Inc.** are presented in Appendix E. The complete annual reports of Amazon and Wal-Mart, including the notes to the financial statements, are available at each company's respective website.

Instructions

- a. At December 31, 2015, what was Amazon's largest current liability account? What were its total current liabilities? At January 31, 2016, what was Wal-Mart's largest current liability account? What were its total current liabilities?
- b. Based on information in these financial statements, compute the following 2015 values for Amazon and 2016 values for Wal-Mart:
 1. Working capital.
 2. Current ratio.
- c. What conclusions concerning the relative liquidity of these companies can be drawn from these data?

Real-World Focus

CT11.4 The **Internal Revenue Service** provides considerable information over the Internet, including answers to payroll tax questions faced by employers.

Instructions

Go to the IRS website and access *Publication 15 (Circular E), Employer's Tax Guide* (available on the Forms & Publications page under the EBooks tab). Answer each of the following questions.

- a. How does the government define "employees"?
- b. What are the special rules for Social Security and Medicare regarding children who are employed by their parents?
- c. How can an employee obtain a Social Security card if he or she doesn't have one?
- d. Must employees report to their employer tips received from customers? If so, how?
- e. Where should the employer deposit Social Security taxes withheld or contributed?

Decision-Making Across the Organization

CT11.5 Cunningham Processing Company performs word-processing services for business clients and students in a university community. The work for business clients is fairly steady throughout the year. The work for students peaks significantly in December and May as a result of term papers, research project reports, and dissertations.

Two years ago, the company attempted to meet the peak demand by hiring part-time help. This led to numerous errors and much customer dissatisfaction. A year ago, the company hired four experienced employees on a permanent basis in place of part-time help. This proved to be much better in terms of productivity and customer satisfaction. But, it has caused an increase in annual payroll costs and a significant decline in annual net income.

Recently, Melissa Braun, a sales representative of Banister Services Inc., has made a proposal to the company. Under her plan, Banister will provide up to four experienced workers at a daily rate of \$80 per person for an 8-hour workday. Banister workers are not available on an hourly basis. Cunningham would have to pay only the daily rate for the workers used.

The owner of Cunningham Processing, Carol Holt, asks you, as the company's accountant, to prepare a report on the expenses that are pertinent to the decision. If the Banister plan is adopted, Carol will terminate the employment of two permanent employees and will keep two permanent employees. At the moment, each employee earns an annual income of \$22,000. Cunningham pays 7.65% FICA taxes, 0.8% federal unemployment taxes, and 5.4% state unemployment taxes. The unemployment taxes apply to only the first \$7,000 of gross earnings. In addition, Cunningham pays \$40 per month for each employee for medical and dental insurance. Carol indicates that if the Banister Services plan is accepted, her needs for temporary workers will be as follows.

Months	Number of Employees	Working Days per Month
January–March	2	20
April–May	3	25
June–October	2	18
November–December	3	23

Instructions

With the class divided into groups, answer the following.

- Prepare a report showing the comparative payroll expense of continuing to employ permanent workers compared to adopting the Banister Services Inc. plan.
- What other factors should Carol consider before finalizing her decision?

Communication Activity

CT11.6 Mike Falcon, president of the Brownlee Company, has recently hired a number of additional employees. He recognizes that additional payroll taxes will be due as a result of this hiring, and that the company will serve as the collection agent for other taxes.

Instructions

In a memorandum to Mike Falcon, explain each of the taxes, and identify the taxes that result in payroll tax expense to Brownlee Company.

All About You

CT11.7 Medical costs are substantial and rising. But will they be the most substantial expense over your lifetime? Not likely. Will it be housing or food? Again, not likely. The answer is taxes. On average, Americans work 107 days to afford their taxes. Companies, too, have large tax burdens. They look very hard at tax issues in deciding where to build their plants and where to locate their administrative headquarters.

Instructions

- Determine what your state income taxes are if your taxable income is \$60,000 and you file as a single taxpayer in the state in which you live.
- Assume that you own a home worth \$200,000 in your community and the tax rate is 2.1%. Compute the property taxes you would pay.
- Assume that the total gasoline bill for your automobile is \$1,200 a year (300 gallons at \$4 per gallon). What are the amounts of state and federal taxes that you pay on the \$1,200?

- d. Assume that your purchases for the year total \$9,000. Of this amount, \$5,000 was for food and prescription drugs. What is the amount of sales tax you would pay on these purchases? (Many states do not levy a sales tax on food or prescription drugs. Does yours?)
- e. Determine what your Social Security taxes are if your income is \$60,000.
- f. Determine what your federal income taxes are if your taxable income is \$60,000 and you file as a single taxpayer.
- g. Determine your total taxes paid based on the above calculations, and determine the percentage of income that you would pay in taxes based on the following formula: Total taxes paid ÷ Total income.

FASB Codification Activity

CT11.8 If your school has a subscription to the FASB Codification, log in and prepare responses to the following.

- a. What is the definition of current liabilities?
- b. What is the definition of a contingent liability?
- c. What guidance does the Codification provide for the disclosure of contingent liabilities?

A Look at IFRS

LEARNING OBJECTIVE 5

Compare the accounting for payroll under GAAP and IFRS.

IFRS and GAAP have similar definitions of liabilities. The general recording procedures for payroll are similar, although differences occur depending on the types of benefits that are provided in different countries. For example, companies in other countries often have different forms of pensions, unemployment benefits, welfare payments, and so on.

Key Points

Following are the key similarities and differences between GAAP and IFRS related to current liabilities and payroll.

Similarities

- The basic definition of a liability under GAAP and IFRS is very similar. In a more technical way, liabilities are defined by the IASB as a present obligation of the entity arising from past events, the settlement of which is expected to result in an outflow from the entity of resources embodying economic benefits.
- The accounting for current liabilities such as notes payable, unearned revenue, and payroll taxes payable are similar between IFRS and GAAP.
- Under IFRS, liabilities are classified as current if they are expected to be paid within 12 months.

Differences

- Companies using IFRS sometimes show liabilities before assets. Also, they will sometimes show long-term liabilities before current liabilities.
- Under IFRS, companies sometimes will net current liabilities against current assets to show working capital on the face of the statement of financial position.
- Under GAAP, some contingent liabilities are recorded in the financial statements, others are disclosed, and in some cases no disclosure is required. Unlike GAAP, IFRS reserves the use of the term **contingent liability** to refer only to possible obligations that are **not** recognized in the financial statements but may be disclosed if certain criteria are met.
- For those items that GAAP would treat as recordable contingent liabilities, IFRS instead uses the term provisions. **Provisions** are defined as liabilities of uncertain timing or amount. Examples of

provisions would be provisions for warranties, employee vacation pay, or anticipated losses. Under IFRS, the measurement of a provision related to an uncertain obligation is based on the best estimate of the expenditure required to settle the obligation.

Looking to the Future

The FASB and IASB are currently involved in two projects, each of which has implications for the accounting for liabilities. One project is investigating approaches to differentiate between debt and equity instruments. The other project, the elements phase of the conceptual framework project, will evaluate the definitions of the fundamental building blocks of accounting. The results of these projects could change the classification of many debt and equity securities.

IFRS Practice

IFRS Self-Test Questions

1. Which of the following is **false**?
 - a. Under IFRS, current liabilities must always be presented before noncurrent liabilities.
 - b. Under IFRS, an item is a current liability if it will be paid within the next 12 months.
 - c. Under IFRS, current liabilities are sometimes netted against current assets on the statement of financial position.
 - d. Under IFRS, a liability is only recognized if it is a present obligation.
2. Under IFRS, a contingent liability is:
 - a. disclosed in the notes if certain criteria are met.
 - b. reported on the face of the financial statements if certain criteria are met.
3. Under IFRS, obligations related to warranties are considered:
 - a. contingent liabilities.
 - b. provisions.
 - c. possible obligations.
 - d. None of these.
4. The joint projects of the FASB and IASB could potentially:
 - a. change the definition of liabilities.
 - b. change the definition of equity.
 - c. change the definition of assets.
 - d. All of the above.

IFRS Exercises

IFRS11.1 Define a provision and give an example.

IFRS11.2 Briefly describe some of the similarities and differences between GAAP and IFRS with respect to the accounting for liabilities.

International Financial Statement Analysis: Louis Vuitton

IFRS11.3 The financial statements of **Louis Vuitton** are presented in Appendix F. The complete annual report, including the notes to the financial statements, is available at the company's website.

Instructions

- a. What were the total current liabilities for the company as of December 31, 2015? What portion of these current liabilities related to provisions?
- b. What is the company's accounting policies related to provisions?

Accounting for Partnerships

Chapter Preview

It is not surprising that when Cliff Chenfeld and Craig Balsam began **Razor & Tie** (see the following Feature Story), they decided to use the partnership form of organization. Both saw the need for hands-on control of their product and its promotion. In this chapter, we discuss reasons why businesses select the partnership form of organization. We also explain the major issues in accounting for partnerships.

Feature Story

From Trials to the Top Ten

In 1990, Cliff Chenfeld and Craig Balsam gave up the razors, ties, and six-figure salaries they had become accustomed to as New York lawyers. Instead, they set up a partnership, **Razor & Tie Music**, in Cliff's living room. Ten years later, it became the only record company in the country that had achieved success in selling music both on television and in stores. Razor & Tie's entertaining and effective TV commercials have yielded unprecedented sales for multi-artist music compilations. At the same time, its hot retail label has been behind some of the

most recent original, progressive releases from artists such as Norma Jean, For Today, Chelsea Grin, and Starset.

Razor & Tie got its start with its first TV release, *Those Fabulous '70s* (100,000 copies sold), followed by *Disco Fever* (over 300,000 sold). After restoring the respectability of the oft-maligned music of the 1970s, the partners forged into the musical '80s with the same zeal that elicited success with their first releases. In 1993, Razor & Tie released *Totally '80s*, a collection of Top-10 singles from the 1980s that has sold over 450,000 units.

In 1995, Razor & Tie broke into the contemporary music world with *Living in the '90s*, the most successful record in the history of the company. Featuring a number of songs that

were still hits on the radio at the time the package initially aired, *Living in the '90s* was a blockbuster. It received Gold certification in less than nine months and rewrote the rules on direct-response albums. For the first time, contemporary music was available through an album offered only through direct-response spots.

In fact, Razor & Tie is now a vertically integrated business that includes a music company with major label distribu-

tion, a music publishing business, a media buying company, a home video company, a direct marketing operation, and a growing database of entertainment consumers.

Razor & Tie has carved out a sizable piece of the market through the complementary talents of the two partners. Their imagination and savvy, along with exciting new releases planned for the coming years, ensure Razor & Tie's continued growth.

Forming a Partnership

LEARNING OBJECTIVE 1

Discuss and account for the formation of a partnership.

A **partnership** is an association of two or more persons to carry on as co-owners of a business for profit. Partnerships are sometimes used in small retail, service, or manufacturing companies. Accountants, lawyers, and doctors also find it desirable to form partnerships with other professionals in the field.

Characteristics of Partnerships

Partnerships are fairly easy to form. People form partnerships simply by a verbal agreement or more formally by written agreement. We explain the principal characteristics of partnerships in the following sections.

Association of Individuals

A partnership is a legal entity. A partnership can own property (land, buildings, equipment) and can sue or be sued. **A partnership also is an accounting entity.** Thus, the personal assets, liabilities, and transactions of the partners are excluded from the accounting records of the partnership, just as they are in a proprietorship.

The net income of a partnership is not taxed as a separate entity. But, a partnership must file an information tax return showing partnership net income and each partner's share of that net income. Each partner's share is taxable at **personal tax rates**, regardless of the amount of net income each withdraws from the business during the year.

Association of Individuals

Mutual Agency

Mutual agency means that each partner acts on behalf of the partnership when engaging in partnership business. The act of any partner is binding on all other partners. This is true even when partners act beyond the scope of their authority, so long as the act appears to be appropriate for the partnership. For example, a partner of a grocery store who purchases a delivery truck creates a binding contract in the name of the partnership, even if the partnership agreement denies this authority. On the other hand, if a partner in a law firm purchased a snowmobile for the partnership, such an act would not be binding on the partnership. The purchase is clearly outside the scope of partnership business.

Mutual Agency

Limited Life

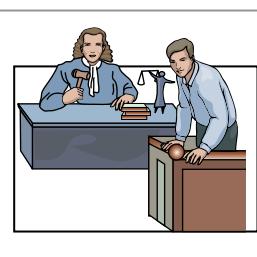

Corporations have unlimited life. Partnerships do not. A partnership may be ended voluntarily at any time through the acceptance of a new partner or the withdrawal of a partner. It may be ended involuntarily by the death or incapacity of a partner. **Partnership dissolution** occurs whenever a partner withdraws or a new partner is admitted. Dissolution does not necessarily mean that the business ends. If the continuing partners agree, operations can continue without interruption by forming a new partnership.

Limited Life

Unlimited Liability

Each partner is **personally and individually liable** for all partnership liabilities. Creditors' claims attach first to partnership assets. If these are insufficient, the claims then attach to the personal resources of any partner, irrespective of that partner's equity in the partnership. Because each partner is responsible for all the debts of the partnership, each partner is said to have **unlimited liability**.

Unlimited Liability

Co-Ownership of Property

Partners jointly own partnership assets. If the partnership is dissolved, each partner has a claim on total assets equal to the balance in his or her respective capital account. This claim does not attach to **specific assets** that an individual partner contributed to the firm. Similarly, if a partner invests a building in the partnership valued at \$100,000 and the building is later sold at a gain of \$20,000, the partners all share in the gain.

Partnership net income (or net loss) is also co-owned. **If the partnership contract does not specify to the contrary, all net income or net loss is shared equally by the partners.** As you will see later, though, partners may agree to unequal sharing of net income or net loss.

Co-Ownership of Property

Organizations with Partnership Characteristics

If you are starting a business with a friend and each of you has little capital and your business is not risky, you probably want to use a partnership. As indicated above, the partnership is

easy to establish and its cost is minimal. These types of partnerships are often called **regular partnerships**. However if your business is risky—say, roof repair or performing some type of professional service—you will want to limit your liability and not use a regular partnership. As a result, special forms of business organizations with partnership characteristics are now often used to provide protection from unlimited liability for people who wish to work together in some activity.

The special partnership forms are limited partnerships, limited liability partnerships, and limited liability companies. These special forms use the same accounting procedures as those described for a regular partnership. In addition, for taxation purposes, all the profits and losses pass through these organizations (similar to the regular partnership) to the owners, who report their share of partnership net income or losses on their personal tax returns.

Limited Partnerships

INTERNATIONAL NOTE

Much of the funding for successful new U.S. businesses comes from “venture capital” firms, which are organized as limited partnerships. To develop its own venture capital industry, China has taken steps to model its partnership laws to allow for limited partnerships like those in the United States.

HELPFUL HINT

In an LLP, *all* partners have limited liability. There are no general partners.

In a **limited partnership**, one or more partners have **unlimited liability** and one or more partners have **limited liability** for the debts of the firm. Those with unlimited liability are **general partners**. Those with limited liability are **limited partners**. Limited partners are responsible for the debts of the partnership up to the limit of their investment in the firm (see **International Note**).

The words “Limited Partnership,” “Ltd.”, or “LP” identify this type of organization. For the privilege of limited liability, the limited partner usually accepts less compensation than a general partner and exercises less influence in the affairs of the firm. If the limited partners get involved in management, they risk their liability protection.

Limited Liability Partnership

Most states allow professionals such as lawyers, doctors, and accountants to form a **limited liability partnership** or “LLP.” The LLP is designed to protect innocent partners from malpractice or negligence claims resulting from the acts of another partner (see **Helpful Hint**). LLPs generally carry large insurance policies as protection against malpractice suits. These professional partnerships vary in size from a medical partnership of three to five doctors, to 150 to 200 partners in a large law firm, to more than 2,000 partners in an international accounting firm.

Limited Liability Companies

A hybrid form of business organization with certain features like a corporation and others like a limited partnership is the **limited liability company** or “LLC.” An LLC usually has a limited life. The owners, called **members**, have limited liability like owners of a corporation. Whereas limited partners do not actively participate in the management of a limited partnership (LP), the members of a limited liability company (LLC) can assume an active management role. For income tax purposes, the IRS usually classifies an LLC as a partnership.

Accounting Across the Organization

Limited Liability Companies Gain in Popularity

The proprietorship form of business organization is still the most popular, followed by the corporate form. But whenever a group of individuals wants to form a partnership, the limited liability company is usually the popular choice.

One other form of business organization is a **subchapter S corporation**. A subchapter S corporation has many of the characteristics of a partnership—especially taxation as a partnership—but it is losing its popularity. The reason: It involves more paperwork and expense than a limited liability company, which in most cases offers similar advantages.

Why do you think that the use of the limited liability company is gaining in popularity? (Go to WileyPLUS for this answer and additional questions.)

Illustration 12.1 summarizes different forms of organizations that have partnership characteristics.

	Major Advantages	Major Disadvantages
Regular Partnership 	Simple and inexpensive to create and operate.	Owners (partners) personally liable for business debts.
Limited Partnership 	Limited partners have limited personal liability for business debts as long as they do not participate in management. General partners can raise cash without involving outside investors in management of business.	General partners personally liable for business debts. More expensive to create than regular partnership. Suitable mainly for companies that invest in real estate.
Limited Liability Partnership 	Mostly of interest to partners in old-line professions such as law, medicine, and accounting. Owners (partners) are not personally liable for the malpractice of other partners.	Unlike a limited liability company, owners (partners) remain personally liable for many types of obligations owed to business creditors, lenders, and landlords. Often limited to a short list of professions.
Limited Liability Company 	Owners have limited personal liability for business debts even if they participate in management.	More expensive to create than regular partnership.

ILLUSTRATION 12.1

Different forms of organizations with partnership characteristics

Advantages and Disadvantages of Partnerships

Why do people choose partnerships? One major advantage of a partnership is to combine the skills and resources of two or more individuals. In addition, partnerships are easily formed and are relatively free from government regulations and restrictions. A partnership does not have to contend with the “red tape” that a corporation must face. Also, partners generally can make decisions quickly on substantive business matters without having to consult a board of directors.

On the other hand, partnerships also have some major disadvantages. **Unlimited liability** is particularly troublesome. Many individuals fear they may lose not only their initial investment but also their personal assets if those assets are needed to pay partnership creditors.

Illustration 12.2 summarizes the advantages and disadvantages of the regular partnership form of business organization. As indicated previously, different types of partnership forms have evolved to reduce some of the disadvantages.

ILLUSTRATION 12.2**Advantages and disadvantages of a partnership**

Advantages	Disadvantages
Combining skills and resources of two or more individuals Ease of formation Freedom from governmental regulations and restrictions Ease of decision-making	Mutual agency Limited life Unlimited liability

The Partnership Agreement

Ideally, the agreement of two or more individuals to form a partnership should be expressed in a written contract, called the **partnership agreement** or **articles of co-partnership**. The partnership agreement contains such basic information as the name and principal location of the firm, the purpose of the business, and date of inception. In addition, it should specify relationships among the partners, such as:

1. Names and capital contributions of partners.
2. Rights and duties of partners.
3. Basis for sharing net income or net loss.
4. Provision for withdrawals of assets.
5. Procedures for submitting disputes to arbitration.
6. Procedures for the withdrawal or addition of a partner.
7. Rights and duties of surviving partners in the event of a partner's death.

We cannot overemphasize the importance of a written contract. The agreement should attempt to anticipate all possible situations, contingencies, and disagreements (see **Ethics Note**). The help of a lawyer is highly desirable in preparing the agreement.

ETHICS NOTE

A well-developed partnership agreement specifies in clear and concise language the process by which the partners will resolve ethical and legal problems. This issue is especially significant when the partnership experiences financial distress.

Accounting Across the Organization

Dividing Up the Pie

What should you do when you and your business partner disagree to the point where you are no longer on speaking terms? Given how heated business situations can get, this is not an unusual occurrence. Unfortunately, in many instances the partners

do everything they can to undermine each other, eventually destroying the business. In some cases, people even steal from the partnership because they either feel that they "deserve it" or they assume that the other partners are stealing from them.

It would be much better to follow the example of Jennifer Appel and her partner. They found that after opening a successful bakery and writing a cookbook, they couldn't agree on how the business should be run. The other partner bought out Ms. Appel's share of the business. Ms. Appel went on to start her own style of bakery, which she ultimately franchised.

Source: Paulette Thomas, "As Partnership Sours, Parting Is Sweet," *Wall Street Journal*, (July 6, 2004), p. A20.

How can partnership conflicts be minimized and more easily resolved? (Go to WileyPLUS for this answer and additional questions.)

Accounting for a Partnership Formation

We now turn to the basic accounting for partnerships. The major accounting issues relate to forming the partnership, dividing income or loss, and preparing financial statements.

When forming a partnership, each partner's initial investment in a partnership is entered in the partnership records. The partnership should record these investments at the **fair value**.

of the assets at the date of their transfer to the partnership. All partners must agree to the values assigned.

To illustrate, assume that A. Rolfe and T. Shea combine their proprietorships to start a partnership named U.S. Software. The firm will specialize in developing financial modeling software. Rolfe and Shea have the assets listed in **Illustration 12.3** prior to the formation of the partnership.

	Book Value		Fair Value	
	A. Rolfe	T. Shea	A. Rolfe	T. Shea
Cash	\$ 8,000	\$ 9,000	\$ 8,000	\$ 9,000
Equipment	5,000		4,000	
Accumulated depreciation—equipment	(2,000)			
Accounts receivable		4,000		4,000
Allowance for doubtful accounts		(700)		(1,000)
	<u>\$11,000</u>	<u>\$12,300</u>	<u>\$12,000</u>	<u>\$12,000</u>

ILLUSTRATION 12.3

Book and fair values of assets invested

Items under owners' equity (OE) in the accounting equation analyses are not labeled in this partnership chapter. Nearly all affect partners' capital accounts.

The partnership records the investments as follows.

A	=	L	+	OE
+8,000				
+4,000				
				+12,000

Cash Flows
+8,000 

A	=	L	+	OE
+9,000				
+4,000				
-1,000				
				+12,000

Cash Flows
+9,000 

Investment of A. Rolfe		
Cash	8,000	
Equipment	4,000	
A. Rolfe, Capital (To record investment of Rolfe)		12,000

A	=	L	+	OE
+9,000				
+4,000				
-1,000				
				+12,000

Cash Flows
+9,000 

Investment of T. Shea		
Cash	9,000	
Accounts Receivable	4,000	
Allowance for Doubtful Accounts		1,000
T. Shea, Capital (To record investment of Shea)		12,000

Note that the partnership records neither the original cost of the equipment (\$5,000) nor its book value (\$5,000 – \$2,000). It records the equipment at its fair value, \$4,000. The partnership does not carry forward any accumulated depreciation from the books of previous entities (in this case, the two proprietorships).

In contrast, the gross claims on customers (\$4,000) are carried forward to the partnership. The partnership adjusts the allowance for doubtful accounts to \$1,000, to arrive at a cash (net) realizable value of \$3,000. A partnership may start with an allowance for doubtful accounts because it will continue to collect existing accounts receivable, some of which are expected to be uncollectible. In addition, this procedure maintains the control and subsidiary relationship between Accounts Receivable and the accounts receivable subsidiary ledger.

After formation of the partnership, the accounting for transactions is similar to any other type of business organization. For example, the partners record all transactions with outside parties, such as the purchase or sale of inventory and the payment or receipt of cash, the same as would a sole proprietor.

The steps in the accounting cycle described in Chapter 4 for a proprietorship also apply to a partnership. For example, the partnership prepares a trial balance and journalizes and posts adjusting entries. A worksheet may be used. There are minor differences in journalizing and posting closing entries and in preparing financial statements, as we explain in the following sections. The differences occur because there is more than one owner.

DO IT! 1 | Partnership Organization

Indicate whether each of the following statements is true or false. If false, indicate how to correct the statement.

1. Partnerships have unlimited life. Corporations do not.
2. Partners jointly own partnership assets. A partner's claim on partnership assets does not attach to specific assets.
3. In a limited partnership, the general partners have unlimited liability.
4. The members of a limited liability company have limited liability, like shareholders of a corporation, and they are taxed like corporate shareholders.
5. Because of mutual agency, the act of any partner is binding on all other partners.

ACTION PLAN

- When forming a business, carefully consider what type of organization would best suit the needs of the business.
- Keep in mind the new, "hybrid" organizational forms that have many of the best characteristics of partnerships and corporations.

Solution

1. False. Corporations have unlimited life. Partnerships do not. 2. True. 3. True. 4. False. The members of a limited liability company are taxed like partners in a partnership. 5. True.

Related exercise material: **DO IT! 12.1 and E12.1.**

Accounting for Net Income or Net Loss

LEARNING OBJECTIVE 2

Explain how to account for net income or net loss of a partnership.

Dividing Net Income or Net Loss

Partners equally share partnership net income or net loss unless the partnership contract indicates otherwise. The same basis of division usually applies to both net income and net loss. It is customary to refer to this basis as the **income ratio**, the **income and loss ratio**, or the **profit and loss (P&L) ratio**. Because of its wide acceptance, we use the term **income ratio** to identify the basis for dividing net income and net loss. The partnership recognizes a partner's share of net income or net loss in the accounts through closing entries.

Closing Entries

As in the case of a proprietorship, a partnership must make four entries in preparing closing entries. The entries are:

1. Debit each revenue account for its balance, and credit Income Summary for total revenues.
2. Debit Income Summary for total expenses, and credit each expense account for its balance.
3. Debit Income Summary for its balance, and credit each partner's capital account for his or her share of net income. Or, credit Income Summary, and debit each partner's capital account for his or her share of net loss.
4. Debit each partner's capital account for the balance in that partner's drawings account, and credit each partner's drawings account for the same amount.

The first two entries are the same as in a proprietorship. The last two entries are different because (1) there are two or more owners' capital and drawings accounts, and (2) it is necessary to divide net income (or net loss) among the partners.

To illustrate the last two closing entries, assume that AB Company has net income of \$32,000 for 2020. The partners, L. Arbor and D. Barnett, share net income and net loss equally. Drawings for the year were Arbor \$8,000 and Barnett \$6,000. The last two closing entries are as follows.

			A	=	L	+ OE
Dec. 31	Income Summary		32,000		−32,000	
	L. Arbor, Capital (\$32,000 × 50%)		16,000		+16,000	
	D. Barnett, Capital (\$32,000 × 50%)		16,000		+16,000	
	(To transfer net income to partners' capital accounts)					
Dec. 31	L. Arbor, Capital		8,000		−8,000	
	D. Barnett, Capital		6,000		−6,000	
	L. Arbor, Drawings			8,000	+8,000	
	D. Barnett, Drawings			6,000	+6,000	
	(To close drawings accounts to capital accounts)					

Assume that the beginning capital balance is \$47,000 for Arbor and \$36,000 for Barnett. After posting the closing entries, the capital and drawings accounts will appear as shown in **Illustration 12.4**.

L. Arbor, Capital			D. Barnett, Capital			
12/31 Clos.	8,000	1/1 Bal.	47,000	12/31 Clos.	6,000	
		12/31 Clos.	16,000		12/31 Clos.	16,000
		12/31 Bal.	55,000		12/31 Bal.	46,000
L. Arbor, Drawings			D. Barnett, Drawings			
12/31 Bal.	8,000	12/31 Clos.	8,000	12/31 Bal.	6,000	
		12/31 Clos.	6,000		12/31 Clos.	6,000

ILLUSTRATION 12.4

Partners' capital and drawings accounts after closing

As in a proprietorship, the partners' capital accounts are permanent accounts. Their drawings accounts are temporary accounts. Normally, the capital accounts will have credit balances, and the drawings accounts will have debit balances. Drawings accounts are debited when partners withdraw cash or other assets from the partnership for personal use.

Income Ratios

As noted earlier, the partnership agreement should specify the basis for sharing net income or net loss. The following are typical income ratios.

1. A fixed ratio, expressed as a proportion (6:4), a percentage (70% and 30%), or a fraction (2/3 and 1/3) (see **Helpful Hint**).
2. A ratio based either on capital balances at the beginning of the year or on average capital balances during the year.
3. Salaries to partners and the remainder on a fixed ratio.
4. Interest on partners' capital balances and the remainder on a fixed ratio.
5. Salaries to partners, interest on partners' capital, and the remainder on a fixed ratio.

HELPFUL HINT

A proportion such as 4:4:2 has a denominator of 10 (4 + 4 + 2). Thus, the basis for sharing net income or loss is 4/10, 4/10, and 2/10.

The objective is to settle on a basis that will equitably reflect the partners' capital investment and service to the partnership.

A **fixed ratio** is easy to apply, and it may be an equitable basis in some circumstances. Assume, for example, that Hughes and Lane are partners. Each contributes the same amount of capital, but Hughes expects to work full-time in the partnership and Lane expects to work only half-time. Accordingly, the partners agree to a fixed ratio of 2/3 to Hughes and 1/3 to Lane.

A **ratio based on capital balances** may be appropriate when the funds invested in the partnership are considered the critical factor. Capital ratios may also be equitable when the partners hire a manager to run the business and do not plan to take an active role in daily operations.

The three remaining ratios (items 3, 4, and 5) give specific recognition to differences among partners. These ratios provide salary allowances for time worked and interest allowances for capital invested. Then, the partnership allocates any remaining net income or net loss on a fixed ratio.

Salaries to partners and interest on partners' capital are not expenses of the partnership. Therefore, these items do not enter into the matching of expenses with revenues and the determination of net income or net loss. For a partnership, as for other entities, salaries and wages expense pertains to the cost of services performed by employees. Likewise, interest expense relates to the cost of borrowing from creditors. But partners, as owners, are not considered either **employees** or **creditors**. When the partnership agreement permits the partners to make monthly withdrawals of cash based on their "salary," the partnership debits these withdrawals to the partner's drawings account.

Salaries, Interest, and Remainder on a Fixed Ratio

Under income ratio (5) in the list above, the partnership must apply salaries and interest **before** it allocates the remainder on the specified fixed ratio. **This is true even if the provisions exceed net income. It is also true even if the partnership has suffered a net loss for the year.** The partnership's income statement should show, below net income, detailed information concerning the division of net income or net loss.

To illustrate, assume that Sara King and Ray Lee are co-partners in the Kingslee Company. The partnership agreement provides for (1) salary allowances of \$8,400 to King and \$6,000 to Lee, (2) interest allowances of 10% on capital balances at the beginning of the year, and (3) the remaining income to be divided equally. Capital balances on January 1 were King \$28,000, and Lee \$24,000. In 2020, partnership net income is \$22,000. The division of net income is as shown in **Illustration 12.5**.

ILLUSTRATION 12.5

Division of net income schedule

Kingslee Company Division of Net Income For the Year Ended December 31, 2020			
	Net income	\$ 22,000	
	<u>Division of Net Income</u>		
	Sara King	Ray Lee	Total
Salary allowance	\$ 8,400	\$6,000	\$14,400
Interest allowance on partners' capital			
Sara King (\$28,000 × 10%)	2,800		
Ray Lee (\$24,000 × 10%)		2,400	
Total interest allowance			5,200
Total salaries and interest	11,200	8,400	19,600
Remaining income, \$2,400			
(\$22,000 – \$19,600)			
Sara King (\$2,400 × 50%)	1,200		
Ray Lee (\$2,400 × 50%)		1,200	
Total remainder			2,400
Total division of net income	\$12,400	\$9,600	\$22,000

A	=	L	+	OE
		-22,000		
		+12,000		
		+9,600		

Cash Flows
no effect

Kingslee records the division of net income as follows.

Dec. 31	Income Summary	22,000
	Sara King, Capital	
	Ray Lee, Capital	
	(To close net income to partners' capital)	9,600

Now let's look at a situation in which the salary and interest allowances **exceed** net income. Assume that Kingslee Company's net income is only \$18,000. In this case, the salary

and interest allowances will create a deficiency of \$1,600 ($\$18,000 - \$19,600$). The computations of the allowances are the same as those in the preceding example. Beginning with total salaries and interest, we complete the division of net income as shown in **Illustration 12.6**.

	Sara King	Ray Lee	Total
Total salaries and interest	\$11,200	\$8,400	\$19,600
Remaining deficiency (\$1,600)			
(\$18,000 – \$19,600)			
Sara King ($\$1,600 \times 50\%$)	(800)		
Ray Lee ($\$1,600 \times 50\%$)		(800)	
Total remainder			(1,600)
Total division	\$10,400	\$7,600	\$18,000

ILLUSTRATION 12.6
**Division of net income—
income deficiency**

Partnership Financial Statements

The financial statements of a partnership are similar to those of a proprietorship. The differences are due to the number of owners involved. The income statement for a partnership is identical to the income statement for a proprietorship except for the division of net income, as shown earlier.

The owners' equity statement for a partnership is called the **partners' capital statement**. It explains the changes in each partner's capital account and in total partnership capital during the year. **Illustration 12.7** shows the partners' capital statement for Kingslee Company. It is based on the division of \$22,000 of net income in Illustration 12.5. The statement includes assumed data for the additional investment and drawings. The partnership prepares the partners' capital statement from the income statement and the partners' capital and drawings accounts (see **Helpful Hint**).

Kingslee Company Partners' Capital Statement For the Year Ended December 31, 2020			
	Sara King	Ray Lee	Total
Capital, January 1	\$28,000	\$24,000	\$52,000
Add: Additional investment	2,000		2,000
Net income	<u>12,400</u>	<u>9,600</u>	<u>22,000</u>
	42,400	33,600	76,000
Less: Drawings	7,000	5,000	12,000
Capital, December 31	\$35,400	\$28,600	\$64,000

ILLUSTRATION 12.7
Partners' capital statement

The balance sheet for a partnership is the same as for a proprietorship except for the owners' equity section. For a partnership, the balance sheet shows the capital balances of each partner. **Illustration 12.8** shows the owners' equity section for Kingslee Company.

Kingslee Company Balance Sheet (partial) December 31, 2020		
Total liabilities (assumed amount)		\$115,000
Owners' equity		
Sara King, capital	\$35,400	
Ray Lee, capital	<u>28,600</u>	
Total owners' equity		64,000
Total liabilities and owners' equity		<u>\$179,000</u>

HELPFUL HINT
As in a proprietorship, partners' capital may change due to (1) additional investment, (2) drawings, and (3) net income or net loss.

ILLUSTRATION 12.8
**Owners' equity section of a
partnership balance sheet**

DO IT! 2 | Division of Net Income

LeeMay Company reports net income of \$57,000. The partnership agreement provides for salaries of \$15,000 to L. Lee and \$12,000 to R. May. They will share the remainder on a 60:40 basis (60% to Lee). L. Lee asks your help to divide the net income between the partners and to prepare the closing entry.

Solution

The division of net income is as follows.

	L. Lee	R. May	Total
Salary allowance	\$15,000	\$12,000	\$27,000
Remaining income \$30,000 (\$57,000 – \$27,000)			
L. Lee (60% × \$30,000)	18,000		
R. May (40% × \$30,000)		12,000	
Total remaining income			30,000
Total division of net income	<u><u>\$33,000</u></u>	<u><u>\$24,000</u></u>	<u><u>\$57,000</u></u>

The closing entry for net income therefore is:

Income Summary L. Lee, Capital R. May, Capital (To close net income to partners' capital accounts)	 57,000	 33,000
		 24,000

Related exercise material: **BE12.3, BE12.4, BE12.5, DO IT! 12.2, E12.4, and E12.5.**

ACTION PLAN

- Compute net income exclusive of any salaries to partners and interest on partners' capital.
- Deduct salaries to partners from net income.
- Apply the partners' income ratios to the remaining net income.
- Prepare the closing entry distributing net income or net loss among the partners' capital accounts.

Liquidation of a Partnership

LEARNING OBJECTIVE 3

Explain how to account for the liquidation of a partnership.

Liquidation of a business involves selling the assets of the firm, paying liabilities, and distributing any remaining assets. Liquidation may result from the sale of the business by mutual agreement of the partners, from the death of a partner, or from bankruptcy. **Partnership liquidation** ends both the legal and economic life of the entity.

From an accounting standpoint, the partnership should complete the accounting cycle for the final operating period prior to liquidation. This includes preparing adjusting entries and financial statements. It also involves preparing closing entries and a post-closing trial balance. Thus, only balance sheet accounts should be open as the liquidation process begins.

In liquidation, the sale of noncash assets for cash is called **realization**. Any difference between book value and the cash proceeds is called the **gain or loss on realization**. To liquidate a partnership, it is necessary to:

1. Sell noncash assets for cash and recognize a gain or loss on realization.
2. Allocate gain/loss on realization to the partners based on their income ratios.
3. Pay partnership liabilities in cash.
4. Distribute remaining cash to partners on the basis of their **capital balances**.

ETHICS NOTE

The process of selling non-cash assets and then distributing the cash reduces the likelihood of partner disputes. If instead the partnership distributes noncash assets to partners to liquidate the firm, the partners would need to agree on the value of the non-cash assets, which can be very difficult to determine.

Each of the steps must be performed in sequence. The partnership must pay creditors before partners receive any cash distributions. Also, an accounting entry must record each step (see **Ethics Note**).

When a partnership is liquidated, all partners may have credit balances in their capital accounts. This situation is called **no capital deficiency**. Or, one or more partners may have a debit balance in the capital account. This situation is termed a **capital deficiency**. To illustrate each of these conditions, assume that Ace Company is liquidated when its ledger shows the assets, liabilities, and owners' equity accounts presented in **Illustration 12.9**.

Assets	Liabilities and Owners' Equity		
Cash	\$ 5,000	Notes Payable	\$15,000
Accounts Receivable	15,000	Accounts Payable	16,000
Inventory	18,000	R. Arnet, Capital	15,000
Equipment	35,000	P. Carey, Capital	17,800
Accum. Depr.—Equipment	(8,000)	W. Eaton, Capital	1,200
	<u><u>\$65,000</u></u>		<u><u>\$65,000</u></u>

ILLUSTRATION 12.9

Account balances prior to liquidation

No Capital Deficiency

The partners of Ace Company agree to liquidate the partnership on the following terms.

- (1) The partnership will sell its noncash assets to Jackson Enterprises for \$75,000 cash.
- (2) The partnership will pay its partnership liabilities. The income ratios of the partners are 3:2:1, respectively (see **Helpful Hint**). The steps in the liquidation process are as follows.

HELPFUL HINT

The income ratios' denominator for Ace Company is 6 (3 + 2 + 1).

1. Ace sells the noncash assets (accounts receivable, inventory, and equipment) for \$75,000. The book value of these assets is \$60,000 (\$15,000 + \$18,000 + \$35,000 – \$8,000). Thus, Ace realizes a gain of \$15,000 on the sale. The entry is:

(1)

Cash	75,000	
Accumulated Depreciation—Equipment	8,000	
Accounts Receivable	15,000	
Inventory	18,000	
Equipment	35,000	
Gain on Realization	15,000	
(To record realization of noncash assets)		

A	=	L	+	OE
+75,000				
+8,000				
-15,000				
-18,000				
-35,000				
				+15,000
Cash Flows				
+75,000				

2. Ace allocates the \$15,000 gain on realization to the partners based on their income ratios, which are 3:2:1. The entry is:

(2)

Gain on Realization	15,000	
R. Arnet, Capital (\$15,000 × 3/6)	7,500	
P. Carey, Capital (\$15,000 × 2/6)	5,000	
W. Eaton, Capital (\$15,000 × 1/6)	2,500	
(To allocate gain to partners' capital accounts)		

A	=	L	+	OE
-15,000				
+7,500				
+5,000				
+2,500				
Cash Flows				
no effect				

3. Partnership liabilities consist of Notes Payable \$15,000 and Accounts Payable \$16,000. Ace pays creditors in full by a cash payment of \$31,000. The entry is:

(3)

Notes Payable	15,000	
Accounts Payable	16,000	
Cash	31,000	
(To record payment of partnership liabilities)		

A	=	L	+	OE
-15,000				
-16,000				
-31,000				
Cash Flows				
-31,000				

4. Ace distributes the remaining cash to the partners on the basis of **their capital balances**. After posting the entries in the first three steps, all partnership accounts, including Gain

on Realization, will have zero balances except for four accounts: Cash \$49,000; R. Arnet, Capital \$22,500; P. Carey, Capital \$22,800; and W. Eaton, Capital \$3,700, as shown in **Illustration 12.10**.

ILLUSTRATION 12.10 Ledger balances before distribution of cash

Ace records the distribution of cash as follows.

A	=	L	+	OE	(4)	
				-22,500		22,500
				-22,800		22,800
				-3,700		3,700
-49,000						49,000
Cash Flows						
-49,000						

(To record distribution of cash to partners)

After posting this entry, all partnership accounts will have zero balances.

A word of caution: **Partnerships should not distribute remaining cash to partners on the basis of their income-sharing ratios.** On this basis, Arnet would receive three-sixths, or \$24,500, which would produce an erroneous debit balance of \$2,000. The income ratio is the proper basis for allocating net income or loss. **It is not a proper basis for making the final distribution of cash to the partners.**

ALTERNATIVE TERMINOLOGY

The schedule of cash payments is sometimes called a *safe cash payments schedule*.

Schedule of Cash Payments

The **schedule of cash payments** shows the distribution of cash to the partners in a partnership liquidation (see **Alternative Terminology**). The schedule of cash payments is organized around the basic accounting equation. **Illustration 12.11** shows the schedule for Ace Company. The numbers in parentheses in column B refer to the four required steps in the liquidation of a partnership. They also identify the accounting entries that Ace must make. The cash payments schedule is especially useful when the liquidation process extends over a period of time.

ILLUSTRATION 12.11 Schedule of cash payments, no capital deficiency

DO IT! 3a | Partnership Liquidation—No Capital Deficiency

The partners of Grafton Company have decided to liquidate their business. Noncash assets were sold for \$115,000. The income ratios of the partners Kale D., Croix D., and Marais K. are 2:3:3, respectively. Complete the following schedule of cash payments for Grafton Company.

Grafton Company												
	A	B	C	D	E	F	G	H	I	J	K	L
1	Item	Cash	+	Noncash Assets	=	Liabilities	+	Kale D., Capital	+	Croix D., Capital	+	Marais K., Capital
2	Balances before liquidation	10,000		85,000		40,000		15,000		35,000		5,000
3	Sale of noncash assets and allocation of gain											
4	New balances											
5	Pay liabilities											
6	New balances											
7	Cash distribution to partners											
8	Final balances											
9												
10												

ACTION PLAN

- First, sell the noncash assets and determine the gain.
- Allocate the gain to the partners based on their income ratios.
- Use cash to pay off liabilities.
- Distribute remaining cash on the basis of their capital balances.

Solution

Grafton Company												
	A	B	C	D	E	F	G	H	I	J	K	L
1	Item	Cash	+	Noncash Assets	=	Liabilities	+	Kale D., Capital	+	Croix D., Capital	+	Marais K., Capital
2	Balances before liquidation	10,000		85,000		40,000		15,000		35,000		5,000
3	Sale of noncash assets and allocation of gain	115,000		(85,000)				7,500 ^a		11,250 ^b		11,250
4	New balances	125,000	-0-		40,000		22,500		46,250		16,250	
5	Pay liabilities	(40,000)			(40,000)							
6	New balances	85,000	-0-		-0-		22,500		46,250		16,250	
7	Cash distribution to partners	(85,000)					(22,500)		(46,250)		(16,250)	
8	Final balances	-0-	-0-		-0-		-0-		-0-		-0-	
9												
10	^a 30,000 x 2/8											
11	^b 30,000 x 3/8											

Related exercise material: BE12.6, DO IT! 12.3a, E12.8, and E12.9.

Capital Deficiency

A capital deficiency may result from recurring net losses, excessive drawings, or losses from realization suffered during liquidation. To illustrate, assume that Ace Company is on the brink of bankruptcy. The partners decide to liquidate by having a “going-out-of-business” sale. They sell merchandise at substantial discounts, and sell the equipment at auction. Cash proceeds from these sales and collections from customers total only \$42,000. Thus, the loss from liquidation is \$18,000 (\$60,000 – \$42,000). The steps in the liquidation process are as follows.

1. The entry for the realization of noncash assets is:

A	=	L	+	OE
+42,000				
+8,000				
		-18,000		
-15,000				
-18,000				
-35,000				
Cash Flows				
+42,000				

(1)	
Cash	42,000
Accumulated Depreciation—Equipment	8,000
Loss on Realization	18,000
Accounts Receivable	15,000
Inventory	18,000
Equipment	35,000
(To record realization of noncash assets)	

A	=	L	+	OE
		-9,000		
		-6,000		
		-3,000		
		+18,000		

Cash Flows
no effect

2. Ace allocates the loss on realization to the partners on the basis of their income ratios. The entry is:

(2)	
R. Arnet, Capital (\$18,000 × 3/6)	9,000
P. Carey, Capital (\$18,000 × 2/6)	6,000
W. Eaton, Capital (\$18,000 × 1/6)	3,000
Loss on Realization	18,000
(To allocate loss on realization to partners)	

3. Ace pays the partnership liabilities. This entry is the same as the previous one.

(3)	
Notes Payable	15,000
Accounts Payable	16,000
Cash	31,000
(To record payment of partnership liabilities)	

4. After posting the three entries, two accounts will have debit balances—Cash \$16,000 and W. Eaton, Capital \$1,800. Two accounts will have credit balances—R. Arnet, Capital \$6,000 and P. Carey, Capital \$11,800. **Illustration 12.12** shows all four accounts.

ILLUSTRATION 12.12 Ledger balances before distribution of cash

Cash			R. Arnet, Capital			P. Carey, Capital			W. Eaton, Capital		
Bal.	5,000	(3)	31,000	(2)	9,000	Bal.	15,000	(2)	6,000	Bal.	17,800
(1)	42,000				Bal.	6,000			Bal.	11,800	Bal.
Bal.	16,000									1,800	

Eaton has a capital deficiency of \$1,800 and so owes the partnership \$1,800. Arnet and Carey have a legally enforceable claim for that amount against Eaton's personal assets. Note that the distribution of cash is still made on the basis of capital balances. But, the amount will vary depending on how Eaton settles the deficiency. Two alternatives are presented in the following sections.

Payment of Deficiency

If the partner with the capital deficiency pays the amount owed the partnership, the deficiency is eliminated. To illustrate, assume that Eaton pays \$1,800 to the partnership. The entry is:

A	=	L	+	OE
+1,800				
		+1,800		
Cash Flows				
+1,800				

(a)	
Cash	1,800
W. Eaton, Capital	1,800
(To record payment of capital deficiency by Eaton)	

After posting this entry, account balances are as shown in **Illustration 12.13**.

ILLUSTRATION 12.13 Ledger balances after paying capital deficiency

Cash		R. Arnet, Capital		P. Carey, Capital		W. Eaton, Capital	
Bal.	5,000	(3)	31,000	(2)	9,000	Bal.	15,000
(1)	42,000			(2)		Bal.	17,800
(a)	1,800					Bal.	11,800
Bal.	17,800						Bal. -0-

The cash balance of \$17,800 is now equal to the credit balances in the capital accounts (Arnet \$6,000 + Carey \$11,800). Ace now distributes cash on the basis of these balances. The entry is:

R. Arnet, Capital	6,000	A = L + OE
P. Carey, Capital	11,800	-6,000
Cash		-11,800
(To record distribution of cash to the partners)	17,800	<hr/>

After posting this entry, all accounts will have zero balances.

Nonpayment of Deficiency

If a partner with a capital deficiency is unable to pay the amount owed to the partnership, the partners with credit balances must absorb the loss. The partnership allocates the loss on the basis of the income ratios that exist between the partners with credit balances.

The income ratios of Arnet and Carey are 3:2, or 3/5 and 2/5, respectively (see **Helpful Hint**). Thus, Ace would make the following entry to remove Eaton's capital deficiency.

(a)		A = L + OE	
R. Arnet, Capital (\$1,800 × 3/5)	1,080	-1,080	
P. Carey, Capital (\$1,800 × 2/5)	720	-720	
W. Eaton, Capital		+1,800	
(To record write-off of capital deficiency)	1,800		

After posting this entry, the cash and capital accounts will have the balances shown in **Illustration 12.14**.

ILLUSTRATION 12.14 Ledger balances after nonpayment of capital deficiency

Cash		R. Arnet, Capital		P. Carey, Capital		W. Eaton, Capital	
Bal.	5,000	(3)	31,000	(2)	9,000	Bal.	15,000
(1)	42,000			(a)	1,080	Bal.	17,800
Bal.	16,000			Bal.	4,920	Bal.	11,080

The cash balance (\$16,000) now equals the sum of the credit balances in the capital accounts (Arnet \$4,920 + Carey \$11,080). Ace records the distribution of cash as:

R. Arnet, Capital	4,920	A = L + OE
P. Carey, Capital	11,080	-4,920
Cash		-11,080
(To record distribution of cash to the partners)	16,000	<hr/>

After posting this entry, all accounts will have zero balances.

$$\begin{array}{r} \text{A} = \text{L} + \text{OE} \\ \hline -17,800 \\ \text{Cash Flows} \\ \hline -17,800 \end{array}$$

HELPFUL HINT

The ratios with all three partners were 3:2:1 and the denominator was therefore 6. Leaving out Eaton, the denominator changes to 5 (3 + 2).

$$\begin{array}{r} \text{A} = \text{L} + \text{OE} \\ \hline -1,080 \\ -720 \\ +1,800 \\ \hline \text{Cash Flows} \\ \hline \text{no effect} \end{array}$$

DO IT! 3b | Partnership Liquidation—Capital Deficiency

Kessington Company wishes to liquidate the firm by distributing the company's cash to the three partners. Prior to the distribution of cash, the company's balances are Cash \$45,000; Rollings, Capital (Cr.) \$28,000; Havens, Capital (Dr.) \$12,000; and Ostergard, Capital (Cr.) \$29,000. The income ratios of the three partners are 4:4:2, respectively. Prepare the entry to record the absorption of Havens' capital deficiency by the other partners and the distribution of cash to the partners with credit balances.

Solution

Rollings, Capital (\$12,000 × 4/6)	8,000	
Ostergard, Capital (\$12,000 × 2/6)	4,000	
Havens, Capital		12,000
(To record write-off of capital deficiency)		
Rollings, Capital (\$28,000 – \$8,000)	20,000	
Ostergard, Capital (\$29,000 – \$4,000)	25,000	
Cash		45,000
(To record distribution of cash to partners)		

Related exercise material: **DO IT! 12.3b** and **E12.10**.

ACTION PLAN

- Allocate any unpaid capital deficiency to the partners with credit balances, based on their income ratios.
- After distribution of the deficiency, distribute cash to the remaining partners, based on their capital balances.

Appendix 12A

Admissions and Withdrawals of Partners

LEARNING OBJECTIVE *4

Prepare journal entries when a partner is either admitted or withdraws.

The chapter explained how the basic accounting for a partnership works. We now look at how to account for a common occurrence in partnerships—the addition or withdrawal of a partner.

Admission of a Partner

The admission of a new partner results in the **legal dissolution** of the existing partnership and the beginning of a new one. From an economic standpoint, however, the admission of a new partner (or partners) may be of minor significance in the continuity of the business. For example, in large public accounting or law firms, partners are admitted annually without any change in operating policies. **To recognize the economic effects, it is necessary only to open a capital account for each new partner.** In the entries illustrated in this appendix, we assume that the accounting records of the predecessor firm will continue to be used by the new partnership.

A new partner may be admitted either by (1) purchasing the interest of one or more existing partners or (2) investing assets in the partnership. The former affects only the capital accounts of the partners who are parties to the transaction. The latter increases both net assets and total capital of the partnership.

HELPFUL HINT

In a purchase of an interest, the partnership is not a participant in the transaction. In this transaction, the new partner contributes *no cash* to the partnership.

Purchase of a Partner's Interest

The **admission** of a partner **by purchase of an interest** is a personal transaction between one or more existing partners and the new partner. Each party acts as an individual separate from the partnership entity. The individuals involved negotiate the price paid. It may be equal to or different from the capital equity acquired. The purchase price passes directly from the new partner to the partners who are giving up part or all of their ownership claims (see **Helpful Hint**).

Any money or other consideration exchanged is the personal property of the participants and **not** the property of the partnership. Upon purchase of an interest, the new partner acquires each selling partner's capital interest and income ratio.

Accounting for the purchase of an interest is straightforward. The partnership records only the changes in partners' capital. **Partners' capital accounts are debited for any ownership claims sold.** At the same time, the new partner's capital account is credited for the capital equity purchased. Total assets, total liabilities, and total capital remain unchanged, as do all individual asset and liability accounts.

To illustrate, assume that L. Carson agrees to pay \$10,000 each to C. Ames and D. Barker for $33\frac{1}{3}\%$ (one-third) of their interest in the Ames–Barker partnership. At the time of the admission of Carson, each partner has a \$30,000 capital balance. Both partners, therefore, give up \$10,000 of their capital equity. The entry to record the admission of Carson is:

C. Ames, Capital		10,000	
D. Barker, Capital		10,000	
L. Carson, Capital			20,000
(To record admission of Carson by purchase)			

Illustration 12A.1 shows the effect of this transaction on net assets and partners' capital.

ILLUSTRATION 12A.1 Ledger balances after purchase of a partner's interest

Net Assets	C. Ames, Capital		D. Barker, Capital		L. Carson, Capital
60,000	10,000	30,000	10,000	30,000	20,000
	Bal. 20,000		Bal. 20,000		

Note that net assets remain unchanged at \$60,000, and each partner has a \$20,000 capital balance. Ames and Barker continue as partners in the firm, but the capital interest of each has changed. The cash paid by Carson goes directly to the individual partners and not to the partnership.

Regardless of the amount paid by Carson for the one-third interest, the entry is exactly the same. If Carson pays \$12,000 each to Ames and Barker for one-third of the partnership, the partnership still makes the entry shown above.

Investment of Assets in a Partnership

The admission of a partner by an investment of assets is a transaction between the new partner and the partnership. Often referred to simply as **admission by investment**, the transaction **increases both the net assets and total capital of the partnership**.

Assume, for example, that instead of purchasing an interest, Carson invests \$30,000 in cash in the Ames–Barker partnership for a $33\frac{1}{3}\%$ capital interest. In such a case, the entry is:

Cash		30,000	
L. Carson, Capital			30,000
(To record admission of Carson by investment)			

Illustration 12A.2 shows the effects of this transaction on the partnership accounts.

ILLUSTRATION 12A.2 Ledger balances after investment of assets

Net Assets	C. Ames, Capital		D. Barker, Capital		L. Carson, Capital
60,000		30,000		30,000	30,000
30,000					
Bal. 90,000					

Note that both net assets and total capital have increased by \$30,000.

Remember that Carson's one-third capital interest might not result in a one-third income ratio. The new partnership agreement should specify Carson's income ratio, and it may or may not be equal to the one-third capital interest.

The comparison of the net assets and capital balances in **Illustration 12A.3** shows the different effects of the purchase of an interest and admission by investment.

ILLUSTRATION 12A.3

Comparison of purchase of an interest and admission by investment

Purchase of an Interest		Admission by Investment	
Net assets	\$60,000	Net assets	\$90,000
Capital		Capital	
C. Ames	\$20,000	C. Ames	\$30,000
D. Barker	20,000	D. Barker	30,000
L. Carson	20,000	L. Carson	30,000
Total capital	\$60,000	Total capital	\$90,000

When a new partner purchases an interest, the total net assets and total capital of the partnership **do not change**. When a partner is admitted by investment, both the total net assets and the total capital **change** by the amount of the new investment.

In the case of admission by investment, further complications occur when the new partner's investment differs from the capital equity acquired. When those amounts are not the same, the difference is considered a **bonus** either to (1) the existing (old) partners or (2) the new partner.

Bonus to Old Partners. For both personal and business reasons, the existing partners may be unwilling to admit a new partner without receiving a bonus. In an established firm, existing partners may insist on a bonus as compensation for the work they have put into the company over the years. Two accounting factors underlie the business reason. First, total partners' capital equals the **book value** of the recorded net assets of the partnership. When the new partner is admitted, the fair values of assets such as land and buildings may be higher than their book values. The bonus will help make up the difference between fair value and book value. Second, when the partnership has been profitable, goodwill may exist. But, the partnership balance sheet does not report goodwill. The new partner is usually willing to pay the bonus to become a partner.

A bonus to old partners results when the new partner's investment in the firm is greater than the capital credit on the date of admittance. The bonus results in **an increase in the capital balances of the old partners. The partnership allocates the bonus to them on the basis of their income ratios before the admission of the new partner.** To illustrate, assume that the Bart-Cohen partnership, owned by Sam Bart and Tom Cohen, has total capital of \$120,000. Lea Eden acquires a 25% ownership (capital) interest in the partnership by making a cash investment of \$80,000. The procedure for determining Eden's capital credit and the bonus to the old partners is as follows.

- 1. Determine the total capital of the new partnership.** Add the new partner's investment to the total capital of the old partnership. In this case, the total capital of the new firm is \$200,000, computed as follows.

Total capital of existing partnership	\$120,000
Investment by new partner, Eden	80,000
Total capital of new partnership	\$200,000

- 2. Determine the new partner's capital credit.** Multiply the total capital of the new partnership by the new partner's ownership interest. Eden's capital credit is \$50,000 ($\$200,000 \times 25\%$).
- 3. Determine the amount of bonus.** Subtract the new partner's capital credit from the new partner's investment. The bonus in this case is \$30,000 ($\$80,000 - \$50,000$).
- 4. Allocate the bonus to the old partners on the basis of their income ratios.** Assuming the ratios are Bart 60%, and Cohen 40%, the allocation is Bart \$18,000 ($\$30,000 \times 60\%$) and Cohen \$12,000 ($\$30,000 \times 40\%$).

The entry to record the admission of Eden is:

	A	=	L	+	OE
Cash	80,000		18,000		+80,000
Sam Bart, Capital			12,000		+18,000
Tom Cohen, Capital			50,000		+12,000
Lea Eden, Capital					+50,000
(To record admission of Eden and bonus to old partners)					
			Cash Flows	+80,000	

Bonus to New Partner. A bonus to a new partner results when the new partner's investment in the firm is less than his or her capital credit. This may occur when the new partner possesses special attributes that the partnership wants. For example, the new partner may be able to supply cash that the firm needs for expansion or to meet maturing debts. Or the new partner may be a recognized expert in a relevant field. Thus, an engineering firm may be willing to give a renowned engineer a bonus to join the firm. The partners of a restaurant may offer a bonus to a sports celebrity in order to add the athlete's name to the partnership. A bonus to a new partner may also result when recorded book values on the partnership books are higher than their fair values.

A bonus to a new partner results in a **decrease in the capital balances of the old partners**. The amount of the decrease for each partner is based on the income ratios before the **admission of the new partner**. To illustrate, assume that Lea Eden invests \$20,000 in cash for a 25% ownership interest in the Bart–Cohen partnership. **Illustration 12A.4** shows the computations for Eden's capital credit and the bonus, using the four procedures described in the preceding section.

1. Total capital of Bart–Cohen partnership	\$120,000
Investment by new partner, Eden	20,000
Total capital of new partnership	<u><u>\$140,000</u></u>
2. Eden's capital credit ($25\% \times \$140,000$)	\$ 35,000
3. Bonus to Eden ($\$35,000 - \$20,000$)	\$ 15,000
4. Allocation of bonus to old partners:	
Bart ($\$15,000 \times 60\%$)	\$9,000
Cohen ($\$15,000 \times 40\%$)	6,000
	<u><u>\$ 15,000</u></u>

ILLUSTRATION 12A.4

Computation of capital credit and bonus to new partner

The partnership records the admission of Eden as follows.

Cash	20,000	+20,000
Sam Bart, Capital	9,000	-9,000
Tom Cohen, Capital	6,000	-6,000
Lea Eden, Capital	35,000	+35,000
(To record Eden's admission and bonus)		

	A	=	L	+	OE
Cash Flows	+20,000				
			+20,000		

Withdrawal of a Partner

Now let's look at the opposite situation—the withdrawal of a partner. A partner may withdraw from a partnership **voluntarily**, by selling his or her equity in the firm. Or, he or she may withdraw **involuntarily**, by reaching mandatory retirement age or by dying. The withdrawal of a partner, like the admission of a partner, legally dissolves the partnership. The legal effects may be recognized by dissolving the firm. However, it is customary to record only the economic effects of the partner's withdrawal, while the firm continues to operate and reorganizes itself legally.

As indicated earlier, the partnership agreement should specify the terms of withdrawal. The withdrawal of a partner may be accomplished by (1) payment from partners' personal assets or (2) payment from partnership assets. The former affects only the partners' capital accounts. The latter decreases total net assets and total capital of the partnership.

Payment from Partners' Personal Assets

Withdrawal by payment from partners' personal assets is a personal transaction between the partners. It is the direct opposite of admitting a new partner who purchases a partner's interest. The remaining partners pay the retiring partner directly from their personal assets. Partnership assets are not involved in any way, and total capital does not change. The effect on the partnership is limited to changes in the partners' capital balances.

To illustrate, assume that partners Morz, Nead, and Odom have capital balances of \$25,000, \$15,000, and \$10,000, respectively. Morz and Nead agree to buy out Odom's interest. Each of them agrees to pay Odom \$8,000 in exchange for one-half of Odom's total interest of \$10,000. The entry to record the withdrawal is:

A	=	L	+	OE
		-10,000		
		+5,000		
		+5,000		

Cash Flows
no effect

J. Odom, Capital	10,000	
A. Morz, Capital		5,000
M. Nead, Capital		5,000
(To record purchase of Odom's interest)		

The effect of this entry on the partnership accounts is shown in **Illustration 12A.5**.

ILLUSTRATION 12A.5 Ledger balances after payment from partners' personal assets

Net Assets	A. Morz, Capital	M. Nead, Capital	J. Odom, Capital
50,000	25,000 5,000	15,000 5,000	10,000 10,000
	Bal. 30,000	Bal. 20,000	Bal. -0-

Note that net assets and total capital remain the same at \$50,000.

What about the \$16,000 paid to Odom? You've probably noted that it is not recorded. The entry debited Odom's capital only for \$10,000, not for the \$16,000 that she received. Similarly, both Morz and Nead credit their capital accounts for only \$5,000, not for the \$8,000 they each paid.

After Odom's withdrawal, Morz and Nead will share net income or net loss equally unless they indicate another income ratio in the partnership agreement.

Payment from Partnership Assets

Withdrawal by payment from partnership assets is a transaction that involves the partnership. Both partnership net assets and total capital decrease as a result. Using partnership assets to pay for a withdrawing partner's interest is the reverse of admitting a partner through the investment of assets in the partnership.

Many partnership agreements provide that the amount paid should be based on the fair value of the assets at the time of the partner's withdrawal. When this basis is required, some maintain that any differences between recorded asset balances and their fair values should be (1) recorded by an adjusting entry, and (2) allocated to all partners on the basis of their income ratios. This position has serious flaws. Recording the revaluations violates the historical cost principle, which requires that assets be stated at original cost. It also violates the going-concern assumption, which assumes the entity will continue indefinitely. The terms of the partnership contract should not dictate the accounting for this event.

In accounting for a withdrawal by payment from partnership assets, the partnership should not record asset revaluations. Instead, it should consider any difference between the amount paid and the withdrawing partner's capital balance as a **bonus** to the retiring partner or to the remaining partners.

Bonus to Retiring Partner. A partnership may pay a bonus to a retiring partner when:

1. The fair value of partnership assets is more than their book value,
2. There is unrecorded goodwill resulting from the partnership's superior earnings record, or
3. The remaining partners are eager to remove the partner from the firm.

The partnership deducts the bonus from the remaining partners' capital balances on the basis of their income ratios at the time of the withdrawal.

To illustrate, assume that the following capital balances exist in the RST partnership: Roman \$50,000, Sand \$30,000, and Terk \$20,000. The partners share income in the ratio of 3:2:1, respectively. Terk retires from the partnership and receives a cash payment of \$25,000 from the firm. The procedure for determining the bonus to the retiring partner and the allocation of the bonus to the remaining partners is as follows.

- Determine the amount of the bonus.** Subtract the retiring partner's capital balance from the cash paid by the partnership. The bonus in this case is \$5,000 ($\$25,000 - \$20,000$).
- Allocate the bonus to the remaining partners on the basis of their income ratios.** The ratios of Roman and Sand are 3:2. Thus, the allocation of the \$5,000 bonus is: Roman \$3,000 ($\$5,000 \times 3/5$) and Sand \$2,000 ($\$5,000 \times 2/5$).

The partnership records the withdrawal of Terk as follows (see **Helpful Hint**).

B. Terk, Capital	20,000	
F. Roman, Capital	3,000	
D. Sand, Capital	2,000	
Cash		25,000
(To record withdrawal of and bonus to Terk)		

The remaining partners, Roman and Sand, will recover the bonus given to Terk as the partnership sells or uses the undervalued assets.

Bonus to Remaining Partners. The retiring partner may give a bonus to the remaining partners when:

- Recorded assets are overvalued.
- The partnership has a poor earnings record.
- The partner is eager to leave the partnership.

In such cases, the cash paid to the retiring partner will be less than the retiring partner's capital balance. **The partnership allocates (credits) the bonus to the capital accounts of the remaining partners on the basis of their income ratios.**

To illustrate, assume instead that the partnership pays Terk only \$16,000 for her \$20,000 equity when she withdraws from the partnership. In that case:

- The bonus to remaining partners is \$4,000 ($\$20,000 - \$16,000$).
- The allocation of the \$4,000 bonus is Roman \$2,400 ($\$4,000 \times 3/5$) and Sand \$1,600 ($\$4,000 \times 2/5$).

Under these circumstances, the entry to record the withdrawal is as follows (see **Helpful Hint**).

B. Terk, Capital	20,000	
F. Roman, Capital	2,400	
D. Sand, Capital	1,600	
Cash	16,000	
(To record withdrawal of Terk and bonus to remaining partners)		

Note that if Sand had withdrawn from the partnership, Roman and Terk would divide any bonus on the basis of their income ratio, which is 3:1 or 75% and 25%.

Death of a Partner

The death of a partner dissolves the partnership. However, partnership agreements usually contain a provision for the surviving partners to continue operations. When a partner dies, it usually is necessary to determine the partner's equity at the date of death. This is done by (1)

HELPFUL HINT

Compare this entry to the next one.

A	=	L	+	OE
				-20,000
				-3,000
				-2,000
Cash Flows				
-25,000				

HELPFUL HINT

Compare this entry to the previous one.

A	=	L	+	OE
				-20,000
				+2,400
				+1,600
Cash Flows				
-16,000				

determining the net income or loss for the year to date, (2) closing the books, and (3) preparing financial statements. The partnership agreement may also require an independent audit and a revaluation of assets.

The surviving partners may agree to purchase the deceased partner's equity from their personal assets. Or they may use partnership assets to settle with the deceased partner's estate. In both instances, the entries to record the withdrawal of the partner are similar to those presented earlier.

To facilitate payment from partnership assets, some partnerships obtain life insurance policies on each partner, with the partnership named as the beneficiary. The partnership then uses the proceeds from the insurance policy on the deceased partner to settle with the estate.

Review and Practice

Learning Objectives Review

1 Discuss and account for the formation of a partnership.

The principal characteristics of a partnership are (a) association of individuals, (b) mutual agency, (c) limited life, (d) unlimited liability, and (e) co-ownership of property. When formed, a partnership records each partner's initial investment at the fair value of the assets at the date of their transfer to the partnership.

2 Explain how to account for net income or net loss of a partnership.

Partnerships divide net income or net loss on the basis of the income ratio, which may be (a) a fixed ratio, (b) a ratio based on beginning or average capital balances, (c) salaries to partners and the remainder on a fixed ratio, (d) interest on partners' capital and the remainder on a fixed ratio, and (e) salaries to partners, interest on partners' capital, and the remainder on a fixed ratio.

The financial statements of a partnership are similar to those of a proprietorship. The principal differences are as follows. (a) The partnership shows the division of net income on the income statement. (b) The owners' equity statement is called a partners' capital statement. (c) The partnership reports each partner's capital on the balance sheet.

3 Explain how to account for the liquidation of a partnership.

When a partnership is liquidated, it is necessary to record the (a) sale of noncash assets, (b) allocation of the gain or loss on realization, (c) payment of partnership liabilities, and (d) distribution of cash to the partners on the basis of their capital balances.

***4 Prepare journal entries when a partner is either admitted or withdraws.**

The entry to record the admittance of a new partner by purchase of a partner's interest affects only partners' capital accounts. The entries to record the admittance by investment of assets in the partnership (a) increase both net assets and total capital and (b) may result in recognition of a bonus to either the old partners or the new partner.

The entry to record a withdrawal from the firm when the partners pay from their personal assets affects only partners' capital accounts. The entry to record a withdrawal when payment is made from partnership assets (a) decreases net assets and total capital and (b) may result in recognizing a bonus either to the retiring partner or the remaining partners.

Glossary Review

***Admission by investment** Admission of a partner by investing assets in the partnership, causing both partnership net assets and total capital to increase. (p. 12-19).

***Admission by purchase of an interest** Admission of a partner in a personal transaction between one or more existing partners and the new partner; does not change total partnership assets or total capital. (p. 12-18).

Capital deficiency A debit balance in a partner's capital account after allocation of gain or loss. (p. 12-13).

General partners Partners who have unlimited liability for the debts of the firm. (p. 12-4).

Income ratio The basis for dividing net income and net loss in a partnership. (p. 12-8).

Limited liability company A form of business organization, usually classified as a partnership for tax purposes and usually with limited life, in which partners, who are called members, have limited liability. (p. 12-4).

Limited liability partnership A partnership of professionals in which partners are given limited liability and the public is protected from malpractice by insurance carried by the partnership. (p. 12-4).

Limited partners Partners whose liability for the debts of the firm is limited to their investment in the firm. (p. 12-4).

Limited partnership A partnership in which one or more general partners have unlimited liability and one or more partners have limited liability for the obligations of the firm. (p. 12-4).

No capital deficiency All partners have credit balances after allocation of gain or loss. (p. 12-13).

Partners' capital statement The owners' equity statement for a partnership which shows the changes in each partner's capital account and in total partnership capital during the year. (p. 12-11).

Partnership An association of two or more persons to carry on as co-owners of a business for profit. (p. 12-2).

Partnership agreement A written contract expressing the voluntary agreement of two or more individuals in a partnership. (p. 12-6).

Partnership dissolution A change in partners due to withdrawal or admission, which does not necessarily terminate the business. (p. 12-3).

Partnership liquidation An event that ends both the legal and economic life of a partnership. (p. 12-12).

Schedule of cash payments A schedule showing the distribution of cash to the partners in a partnership liquidation. (p. 12-14).

***Withdrawal by payment from partners' personal assets** Withdrawal of a partner in a personal transaction between partners; does not change total partnership assets or total capital. (p. 12-22).

***Withdrawal by payment from partnership assets** Withdrawal of a partner in a transaction involving the partnership, causing both partnership net assets and total capital to decrease. (p. 12-22).

Practice Multiple-Choice Questions

1. (LO 1) Which of the following is **not** a characteristic of a partnership?
 - a. Taxable entity.
 - b. Co-ownership of property.
 - c. Mutual agency.
 - d. Limited life.
2. (LO 1) A partnership agreement should include each of the following **except**:
 - a. names and capital contributions of partners.
 - b. rights and duties of partners as well as basis for sharing net income or loss.
 - c. basis for splitting partnership income taxes.
 - d. provision for withdrawal of assets.
3. (LO 1) The advantages of a partnership do **not** include:
 - a. ease of formation.
 - b. unlimited liability.
 - c. freedom from government regulation.
 - d. ease of decision-making.
4. (LO 1) Upon formation of a partnership, each partner's initial investment of assets should be recorded at their:
 - a. book values.
 - b. cost.
 - c. fair values.
 - d. appraised values.
5. (LO 1) Ben and Sam Jenkins formed a partnership. Ben contributed \$8,000 cash and a used truck that originally cost \$35,000 and had accumulated depreciation of \$15,000. The truck's fair value was \$16,000. Sam, a builder, contributed a new storage garage. His cost of construction was \$40,000. The garage has a fair value of \$55,000. What is the combined total capital that would be recorded on the partnership books for the two partners?
 - a. \$79,000.
 - b. \$60,000.
 - c. \$75,000.
 - d. \$90,000.
6. (LO 2) The NBC Company reports net income of \$60,000. If partners N, B, and C have an income ratio of 50%, 30%, and 20%, respectively, C's share of the net income is:
 - a. \$30,000.
 - b. \$12,000.
 - c. \$18,000.
 - d. No correct answer is given.
7. (LO 2) Using the data in Practice Multiple-Choice Question 6, what is B's share of net income if the percentages are applicable after each partner receives a \$10,000 salary allowance?
 - a. \$12,000.
 - b. \$20,000.
 - c. \$19,000.
 - d. \$21,000.
8. (LO 2) To close a partner's drawings account, an entry must be made that:
 - a. debits that partner's drawings account and credits Income Summary.
 - b. debits that partner's drawings account and credits that partner's capital account.
 - c. credits that partner's drawings account and debits that partner's capital account.
 - d. credits that partner's drawings account and debits the firm's dividend account.
9. (LO 2) Which of the following statements about partnership financial statements is **true**?
 - a. Details of the distribution of net income are shown in the owners' equity statement.
 - b. The distribution of net income is shown on the balance sheet.
 - c. Only the total of all partner capital balances is shown in the balance sheet.
 - d. The owners' equity statement is called the partners' capital statement.
10. (LO 3) In the liquidation of a partnership, it is necessary to (1) distribute cash to the partners, (2) sell noncash assets, (3) allocate any gain or loss on realization to the partners, and (4) pay liabilities. These steps should be performed in the following order:
 - a. (2), (3), (4), (1).
 - b. (2), (3), (1), (4).
 - c. (3), (2), (1), (4).
 - d. (3), (2), (4), (1).

Use the following account balance information for Creekville Partnership to answer Practice Multiple-Choice Questions 11 and 12. Income ratios are 2:4:4 for Harriet, Mike, and Elly, respectively.

Assets		Liabilities and Owners' Equity	
Cash	\$ 9,000	Accounts payable	\$ 21,000
Accounts receivable	22,000	Harriet, capital	23,000
Inventory	73,000	Mike, capital	8,000
	<u>\$104,000</u>	Elly, capital	<u>52,000</u>
			<u>\$104,000</u>

11. (LO 3) Assume that as part of liquidation proceedings, Creekville sells its noncash assets for \$85,000. The amount of cash that would ultimately be distributed to Elly would be:

- a. \$52,000.
- c. \$34,000.
- b. \$48,000.
- d. \$86,000.

12. (LO 3) Assume that as part of liquidation proceedings, Creekville sells its noncash assets for \$60,000. As a result, one of the partners has a capital deficiency which that partner decides not to repay. The amount of cash that would ultimately be distributed to Elly would be:

- a. \$52,000.
- c. \$24,000.
- b. \$38,000.
- d. \$34,000.

***13. (LO 4)** Louisa Santiago purchases 50% of Leo Lemon's capital interest in the K & L partnership for \$22,000. If the capital balance of

Kate Kildare and Leo Lemon are \$40,000 and \$30,000, respectively, Santiago's capital balance following the purchase is:

- a. \$22,000.
- c. \$20,000.
- b. \$35,000.
- d. \$15,000.

***14. (LO 4)** Capital balances in the MEM partnership are Mary, Capital \$60,000; Ellen, Capital \$50,000; and Mills, Capital \$40,000, and income ratios are 5:3:2, respectively. The MEMO partnership is formed by admitting Oleg to the firm with a cash investment of \$60,000 for a 25% capital interest. The bonus to be credited to Mills, Capital in admitting Oleg is:

- a. \$10,000.
- c. \$3,750.
- b. \$7,500.
- d. \$1,500.

***15. (LO 4)** Capital balances in the MURF partnership are Molly, Capital \$50,000; Ursula, Capital \$40,000; Ray, Capital \$30,000; and Fred, Capital \$20,000, and income ratios are 4:3:2:1, respectively. Fred withdraws from the firm following payment of \$29,000 in cash from the partnership. Ursula's capital balance after recording the withdrawal of Fred is:

- a. \$36,000.
- c. \$38,000.
- b. \$37,000.
- d. \$40,000.

Solutions

1. a. A partnership is not a taxable entity. Rather, the partnership income is taxed on the individual tax returns of the partners. The other choices are characteristics of a partnership.

2. c. A partnership is not a taxable entity; therefore, the partnership agreement should not include the basis for splitting partnership income taxes. The other choices should be included in a partnership agreement.

3. b. Unlimited liability is a disadvantage of a partnership. The other choices are advantages of a partnership.

4. c. Upon formation of a partnership, each partner's initial investment of assets should be recorded at their fair values, not (a) book values, (b) cost, or (d) appraised values.

5. a. When a partnership is formed, assets invested by the partners are recorded at their fair values. Thus, the combined total capital is \$8,000 (cash) + \$16,000 (fair value of truck) + \$55,000 (fair value of the new storage garage) = \$79,000, not (b) \$60,000, (c) \$75,000, or (d) \$90,000.

6. b. C's income is computed by multiplying the partnership income (\$60,000) by partner C's income ratio (20%) = \$12,000. The other choices are incorrect because (a) is the amount of income that would be allocated to partner N ($\$60,000 \times 50\% = \$30,000$), (c) is the amount of income that would be allocated to partner B ($\$60,000 \times 30\% = \$18,000$), and (d) there is a correct answer.

7. c. After allocating the salary allowance to each partner, \$30,000 will be available to divide according to the income ratio [$\$60,000 - (\$10,000 \times 3)$]. Partner B's share of the remainder is \$9,000 ($\$30,000 \times 30\%$). Partner B's total share of income is equal to \$19,000 (salary allowance of \$10,000 + B's share of the remainder \$9,000), not (a) \$12,000, (b) \$20,000, or (d) \$21,000.

8. c. To close a partner's drawings account, an entry must be made that credits the partner's drawings account and debits that partner's capital account. The other choices are therefore incorrect because a partner's drawings account or a dividend account is not debited.

9. d. The owners' equity statement for a partnership is called the partners' capital statement. The other choices are incorrect because (a) the total amount, not the details, of the distribution of net income is shown in the partners' capital statement; (b) the distribution of net income is not shown on the balance sheet but on the partners' capital statement; and (c) each individual partner's capital balance is shown in the balance sheet.

10. a. The order of events in the liquidation of a partnership is (2) sell noncash assets, (3) allocate gain/loss, (4) pay partnership liabilities, and (1) distribute remaining cash. The other choices are therefore incorrect.

11. b. The book value of the noncash assets is \$95,000 ($\$22,000 + \$73,000$). When Creekville sells its noncash assets for \$85,000, Creekville realizes a loss of \$10,000 on the sale. The income ratio for Elly is 40% (4/10). When allocating the \$10,000 loss on realization to the partners, Elly's capital account will be debited for \$4,000 ($\$10,000 \times 4/10$). The amount of cash that would ultimately be distributed to Elly would be \$48,000 ($\$52,000 - \$4,000$), not (a) \$52,000, (c) \$34,000, or (d) \$86,000.

12. d. The loss on realization is \$35,000 ($\$22,000 + \$73,000 - \$60,000$). When allocating the \$35,000 loss on realization to the partners, Harriet's, Mike's, and Elly's capital accounts will be debited \$7,000, \$14,000, and \$14,000, respectively, as per their income ratios. Mike will now have a capital deficiency of \$6,000 ($\$8,000 - \$14,000$). Elly's share of this deficiency is \$4,000 ($\$6,000 \times 4/6$). The amount of cash that would ultimately be distributed to Elly would be \$34,000 ($\$52,000 - \$14,000 - \$4,000$), not (a) \$52,000, (b) \$38,000, or (c) \$24,000.

13. d. Because this is a purchase of a partner's interest, Santiago's capital account will be equal to half of the interest she is purchasing, or \$15,000 ($\$30,000/2$). The \$22,000 paid by Santiago to Lemon is irrelevant in this question. The other choices are therefore incorrect.

***14. d.** Total partnership capital after the investment by Oleg is \$210,000 ($\$60,000 + \$50,000 + \$40,000 + \$60,000$). Oleg's share of partnership capital is \$52,500 ($\$210,000 \times 25\%$). The total bonus to the old partners related to Oleg's admission is \$7,500 [$\$60,000$

(Oleg's investment) – \$52,500 (Oleg's share of partnership capital)]. Mills' share of the total bonus is equal to the total bonus (\$7,500) times Mills' income ratio (20%) or \$1,500 ($\$7,500 \times 20\%$), not (a) \$10,000, (b) \$7,500, or (c) \$3,750.

- *15. b. The total bonus to Fred from the partnership is \$9,000 ($\$29,000 - \$20,000$). Because Fred has withdrawn, the income ratio

must be restated as 4:3:2. Ursula's share of the bonus paid to Fred is \$3,000 ($\$9,000 \times [3/(4 + 3 + 2)]$). Because the bonus is being paid to Fred, Ursula's capital account must be reduced by her share of the bonus. After Fred's withdrawal, Ursula's capital account will have a balance of \$37,000 ($\$40,000 - \$3,000$), not (a) \$36,000, (c) \$38,000, or (d) \$40,000.

Practice Brief Exercises

1. (LO 1) Charlene Tilson and Jade Petricka decide to organize the Petson partnership. Tilson invests \$15,000 cash, and Petricka contributes \$12,000 cash and two assets from her sole proprietorship (accounts receivable \$9,000 less allowance for doubtful accounts \$1,000, and land having a book value of \$7,000). Prepare the entry to record Petricka's investment in the partnership, assuming the net realizable value of the receivables is \$7,500 and the land has a fair value of \$10,000.

Journalize entries in forming a partnership.

Solution

1. Cash	12,000	
Accounts Receivable	9,000	
Land	10,000	
Allowance for Doubtful Accounts	1,500	
Jade Petricka, Capital	29,500	

2. (LO 2) Matt & Daveson Co. reports net income of \$51,000. Interest allowances are Matt \$8,000 and Daveson \$10,000, salary allowances are Matt \$30,000 and Daveson \$20,000, and the remainder is shared equally. Show the division of net income.

Show division of net income.

Solution

Division of Net Income			
	<u>Matt</u>	<u>Daveson</u>	<u>Total</u>
Salary allowance	\$30,000	\$20,000	\$50,000
Interest allowance	8,000	10,000	18,000
Remaining deficiency (\$17,000)			
[\$51,000 – (\$50,000 + \$18,000)]			
Matt (\$17,000 × 50%)	(8,500)		
Daveson (\$17,000 × 50%)		(8,500)	
Total remainder			(17,000)
Total division of net income	<u>\$29,500</u>	<u>\$21,500</u>	<u>\$51,000</u>

3. (LO 3) After liquidating noncash assets and paying creditors, account balances in Mann Co. are Cash \$33,000; Zach, Capital (Cr.) \$13,000; Put, Capital (Cr.) \$10,000; and Nam, Capital (Cr.) \$10,000. The partners share income equally. Journalize the final distribution of cash to the partners

Journalize final cash distribution in liquidation.

Solution

3. Zach, Capital	13,000	
Put, Capital	10,000	
Nam, Capital	10,000	
Cash		33,000

Practice Exercises

1. (LO 2) M. Gomez (beginning capital \$50,000) and I. Inez (beginning capital \$80,000) are partners. During 2020, the partnership earned net income of \$60,000, and Gomez made drawings of \$15,000 while Inez made drawings of \$20,000.

Prepare journal entries to record allocation of net income.

Instructions

- Assume the partnership income-sharing agreement calls for income to be divided 55% to Gomez and 45% to Inez. Prepare the journal entry to record the allocation of net income.
- Assume the partnership income-sharing agreement calls for income to be divided with a salary of \$30,000 to Gomez and \$20,000 to Inez with the remainder divided 55% to Gomez and 45% to Inez. Prepare the journal entry to record the allocation of net income.
- Assume the partnership income-sharing agreement calls for income to be divided with a salary of \$40,000 to Gomez and \$30,000 to Inez, interest of 10% on beginning capital, and the remainder divided 50%–50%. Prepare the journal entry to record the allocation of net income.
- Compute the partners' ending capital balances under the assumption in part (c).

Solution

1. a. Income Summary		60,000	
M. Gomez, Capital (\$60,000 × 55%)			33,000
I. Inez, Capital (\$60,000 × 45%)			27,000
b. Income Summary	60,000		
M. Gomez, Capital [\$30,000 + (\$10,000 × 55%)]			35,500
I. Inez, Capital [\$20,000 + (\$10,000 × 45%)]			24,500
c. Income Summary	60,000		
M. Gomez, Capital [\$40,000 + \$5,000 – (\$23,000 × 50%)]			33,500
I. Inez, Capital [\$30,000 + \$8,000 – (\$23,000 × 50%)]			26,500
d. Gomez: \$50,000 + \$33,500 – \$15,000 = <u>\$68,500</u>			
Inez: \$80,000 + \$26,500 – \$20,000 = <u>\$86,500</u>			

Prepare schedule of cash payments and journalize transactions in a liquidation.

- 2. (LO 3)** The Braun Company at December 31 has cash \$15,000, noncash assets \$110,000, liabilities \$60,000, and the following capital balances: Ho \$40,000 and Li \$25,000. The firm is liquidated, and \$90,000 in cash is received for the noncash assets. Ho's and Li's income ratios are 60% and 40%, respectively.

Instructions

- Prepare a schedule of cash payments.
- Prepare the entries to record the following, assuming that The Braun Company decides to liquidate the company.
 - The sale of noncash assets.
 - The allocation of the gain or loss on liquidation to the partners.
 - Payment of creditors (Accounts Payable).
 - Distribution of cash to the partners.

Solution

- 2. a.**

The Braun Company
Schedule of Cash Payments

Item	Cash	+	Noncash Assets	=	Liabilities	+	Ho, Capital	+	Li, Capital
Balances before liquidation	\$ 15,000		\$110,000		\$60,000		\$40,000		\$25,000
Sale of noncash assets and allocation of gain	90,000		(110,000)				(12,000)		(8,000)
New balances	105,000		0		60,000		28,000		17,000
Pay liabilities	(60,000)				(60,000)				
New balances	45,000		0		0		28,000		17,000
Cash distribution to partners	(45,000)						(28,000)		(17,000)
Final balances	<u>\$ 0</u>		<u>\$ 0</u>		<u>\$ 0</u>		<u>\$ 0</u>		<u>\$ 0</u>

b. 1. Loss on Realization		20,000	
Cash		90,000	
Noncash Assets			110,000
2. Ho, Capital		12,000	
Li, Capital		8,000	
Loss on Realization			20,000
3. Accounts Payable		60,000	
Cash			60,000
4. Ho, Capital		28,000	
Li, Capital		17,000	
Cash			45,000

Practice Problem

(LO 2) On January 1, 2020, the capital balances in Hollingsworth Company are Lois Holly \$26,000 and Jim Worth \$24,000. In 2020 the partnership reports net income of \$30,000. The income ratio provides for salary allowances of \$12,000 for Holly and \$10,000 to Worth and the remainder to be shared equally. Neither partner had any drawings in 2020.

Journalize and prepare a schedule showing distribution of net income.

Instructions

- Prepare a schedule showing the distribution of net income in 2020.
- Journalize the division of 2020 net income to the partners.

Solution

a.	Net income	<u>\$30,000</u>	
Division of Net Income			
	Lois Holly	Jim Worth	Total
Salary allowance	\$12,000	\$10,000	\$22,000
Remaining income \$8,000 (\$30,000 – \$22,000)			
Lois Holly (\$8,000 × 50%)	4,000		
Jim Worth (\$8,000 × 50%)		4,000	
Total remainder			8,000
Total division of net income	<u>\$16,000</u>	<u>\$14,000</u>	<u>\$30,000</u>
b. 12/31/20	Income Summary		30,000
	Lois Holly, Capital		16,000
	Jim Worth, Capital		14,000
	(To close net income to partners' capital)		

WileyPLUS

Brief Exercises, DO IT! Exercises, Exercises, Problems, and many additional resources are available for practice in WileyPLUS.

Note: All asterisked Questions, Exercises, and Problems relate to material in the appendix to the chapter.

Questions

- The characteristics of a partnership include the following: (a) association of individuals, (b) limited life, and (c) co-ownership of property. Explain each of these terms.
- Kevin Mathis is confused about the partnership characteristics of (a) mutual agency and (b) unlimited liability. Explain these two characteristics for Kevin.

- 3.** Lance Kosinski and Matt Morrisen are considering a business venture. They ask you to explain the advantages and disadvantages of the partnership form of organization.
- 4.** Why might a company choose to use a limited partnership?
- 5.** Newland and Palermo form a partnership. Newland contributes land with a book value of \$50,000 and a fair value of \$60,000. Newland also contributes equipment with a book value of \$52,000 and a fair value of \$57,000. The partnership assumes a \$20,000 mortgage on the land. What should be the balance in Newland's capital account upon formation of the partnership?
- 6.** W. Jenson, N. Emch, and W. Gilligan have a partnership called Outlaws. A dispute has arisen among the partners. Jenson has invested twice as much in assets as the other two partners, and he believes net income and net losses should be shared in accordance with the capital ratios. The partnership agreement does not specify the division of profits and losses. How will net income and net loss be divided?
- 7.** Mutt and Jeff are discussing how income and losses should be divided in a partnership they plan to form. What factors should be considered in determining the division of net income or net loss?
- 8.** M. Elston and R. Ogle have partnership capital balances of \$40,000 and \$80,000, respectively. The partnership agreement indicates that net income or net loss should be shared equally. If net income for the partnership is \$42,000, how should the net income be divided?
- 9.** S. Pletcher and F. Holt share net income and net loss equally. (a) Which account(s) is (are) debited and credited to record the division of net income between the partners? (b) If S. Pletcher withdraws \$30,000 in cash for personal use instead of salary, which account is debited and which is credited?
- 10.** Partners T. Greer and R. Parks are provided salary allowances of \$30,000 and \$25,000, respectively. They divide the remainder of the partnership income in a ratio of 3:2. If partnership net income is \$40,000, how much is allocated to Greer and Parks?
- 11.** Are the financial statements of a partnership similar to those of a proprietorship? Discuss.
- *12.** How does the liquidation of a partnership differ from the dissolution of a partnership?
- 13.** Roger Fuller and Mike Rangel are discussing the liquidation of a partnership. Roger maintains that all cash should be distributed to partners on the basis of their income ratios. Is he correct? Explain.
- 14.** In continuing their discussion from Question 13, Mike says that even in the case of a capital deficiency, all cash should still be distributed on the basis of capital balances. Is Mike correct? Explain.
- 15.** Norris, Madson, and Howell have income ratios of 5:3:2 and capital balances of \$34,000, \$31,000, and \$28,000, respectively. Noncash assets are sold at a gain and allocated to the partners. After creditors are paid, \$103,000 of cash is available for distribution to the partners. How much cash should be paid to Madson?
- 16.** Before the final distribution of cash, account balances are Cash \$27,000; S. Shea, Capital \$19,000 (Cr.); L. Seastrom, Capital \$12,000 (Cr.); and M. Luthi, Capital \$4,000 (Dr.). Luthi is unable to pay any of the capital deficiency. If the income-sharing ratios are 5:3:2, respectively, how much cash should be paid to L. Seastrom?
- 17.** Why is **Apple** not a partnership?
- *18.** Susan Turnbull decides to purchase from an existing partner for \$50,000 a one-third interest in a partnership. What effect does this transaction have on partnership net assets?
- *19.** Jerry Park decides to invest \$25,000 in a partnership for a one-sixth capital interest. How much do the partnership's net assets increase? Does Park also acquire a one-sixth income ratio through this investment?
- *20.** Jill Parsons purchases for \$72,000 Jamar's interest in the Tholen-Jamar partnership. Assuming that Jamar has a \$68,000 capital balance in the partnership, what journal entry is made by the partnership to record this transaction?
- *21.** Jaime Keller has a \$41,000 capital balance in a partnership. She sells her interest to Sam Parmenter for \$45,000 cash. What entry is made by the partnership for this transaction?
- *22.** Andrea Riley retires from the partnership of Jaggard, Pester, and Riley. She receives \$85,000 of partnership assets in settlement of her capital balance of \$81,000. Assuming that the income-sharing ratios are 5:3:2, respectively, how much of Riley's bonus is debited to Pester's capital account?
- *23.** Your roommate argues that partnership assets should be revalued in situations like those in Question 21. Why is this generally not done?
- *24.** How is a deceased partner's equity determined?

Brief Exercises

Journalize entries in forming a partnership.

BE12.1 (LO 1) Barbara Ripley and Fred Nichols decide to organize the ALL-Star partnership. Ripley invests \$15,000 cash, and Nichols contributes \$10,000 cash and equipment having a book value of \$3,500. Prepare the entry to record Nichols's investment in the partnership, assuming the equipment has a fair value of \$4,000.

Prepare portion of opening balance sheet for partnership.

BE12.2 (LO 1) Financial Statement Penner and Torres decide to merge their proprietorships into a partnership called Pentor Company. The balance sheet of Torres Co. shows:

Accounts receivable	\$16,000	
Less: Allowance for doubtful accounts	1,200	\$14,800
Equipment	20,000	
Less: Accumulated depreciation—equip.	7,000	13,000

The partners agree that the net realizable value of the receivables is \$14,500 and that the fair value of the equipment is \$11,000. Indicate how the accounts should appear in the opening balance sheet of the partnership.

BE12.3 (LO 2) Rod Dall Co. reports net income of \$75,000. The income ratios are Rod 60% and Dall 40%. Indicate the division of net income to each partner, and prepare the entry to distribute the net income.

Journalize the division of net income using fixed income ratios.

BE12.4 (LO 2) PFW Co. reports net income of \$45,000. Partner salary allowances are Pitts \$15,000, Filbert \$5,000, and Witten \$5,000. Indicate the division of net income to each partner, assuming the income ratio is 50:30:20, respectively.

Compute division of net income with a salary allowance and fixed ratios.

BE12.5 (LO 2) Nabb & Fry Co. reports net income of \$31,000. Interest allowances are Nabb \$7,000 and Fry \$5,000, salary allowances are Nabb \$15,000 and Fry \$10,000, and the remainder is shared equally. Show the distribution of income.

Show division of net income when allowances exceed net income.

BE12.6 (LO 3) After liquidating noncash assets and paying creditors, account balances in the Mann Co. are Cash \$21,000; A, Capital (Cr.) \$8,000; B, Capital (Cr.) \$9,000; and C, Capital (Cr.) \$4,000. The partners share income equally. Journalize the final distribution of cash to the partners.

Journalize final cash distribution in liquidation.

***BE12.7 (LO 4)** Gamma Co. capital balances are Barr \$30,000, Croy \$25,000, and Eubank \$22,000. The partners share income equally. Tovar is admitted to the firm by purchasing one-half of Eubank's interest for \$13,000. Journalize the admission of Tovar to the partnership.

Journalize admission by purchase of an interest.

***BE12.8 (LO 4)** In Eastwood Co., capital balances are Irey \$40,000 and Pedigo \$50,000. The partners share income equally. Vernon is admitted to the firm with a 45% interest by an investment of cash of \$58,000. Journalize the admission of Vernon.

Journalize admission by investment.

***BE12.9 (LO 4)** Capital balances in Pelmar Co. are Lango \$40,000, Oslo \$30,000, and Fennetti \$20,000. Lango and Oslo each agree to pay Fennetti \$12,000 from their personal assets. Lango and Oslo each receive 50% of Fennetti's equity. The partners share income equally. Journalize the withdrawal of Fennetti.

Journalize withdrawal paid by personal assets.

***BE12.10 (LO 4)** Data pertaining to Pelmar Co. are presented in BE12.9. Instead of payment from personal assets, assume that Fennetti receives \$24,000 from partnership assets in withdrawing from the firm. Journalize the withdrawal of Fennetti.

Journalize withdrawal paid by partnership assets.

DO IT! Exercises

DO IT! 12.1 (LO 1) Indicate whether each of the following statements is true or false. If false, indicate how to correct the statement.

Analyze statements about partnership organization.

- _____ 1. Each partner is personally and individually liable for all partnership liabilities.
- _____ 2. If a partnership dissolves, each partner has a claim to the specific assets he/she contributed to the firm.
- _____ 3. In a limited partnership, all partners have limited liability.
- _____ 4. A major advantage of regular partnership is that it is simple and inexpensive to create and operate.
- _____ 5. Members of a limited liability company can take an active management role.

DO IT! 12.2 (LO 2) Frontenac Company reported net income of \$75,000. The partnership agreement provides for salaries of \$25,000 to Miley and \$18,000 to Guthrie. They divide the remainder 40% to Miley and 60% to Guthrie. Miley asks your help to divide the net income between the partners and to prepare the closing entry.

Divide net income and prepare closing entry.

DO IT! 12.3a (LO 3) The partners of LR Company have decided to liquidate their business. Noncash assets were sold for \$125,000. The income ratios of the partners Cisneros, Gunselman, and Forren are 3:2:3, respectively. Complete the following schedule of cash payments for LR Company.

Complete schedule of cash payments.

LR Company												
	A	B	C	D	E	F	G	H	I	J	K	L
1	Item	Cash	+ Noncash Assets	= Liabilities	Cisneros, Capital	+ Gunselman, Capital	+ Forren, Capital					
2	Balances before liquidation	15,000	90,000	40,000	20,000	32,000	13,000					
3	<i>Sale of noncash assets and allocation of gain</i>											
4	New balances											
5	<i>Pay liabilities</i>											
6	New balances											
7	<i>Cash distribution to partners</i>											
8	Final balances											
9												
10												

Prepare entries to record absorption of capital deficiency and distribution of cash.

DO IT! 12.3b (LO 3) Parsons Company wishes to liquidate the firm by distributing the company's cash to the three partners. Prior to the distribution of cash, the company's balances are Cash \$73,000; Oakley, Capital (Cr.) \$47,000; Quaney, Capital (Dr.) \$14,000; and Ellis, Capital (Cr.) \$40,000. The income ratios of the three partners are 3:3:4, respectively. Prepare the entry to record the absorption of Quaney's capital deficiency by the other partners and the distribution of cash to the partners with credit balances.

Exercises

Identify characteristics of partnership.

E12.1 (LO 1) Mark Rensing has prepared the following list of statements about partnerships.

1. A partnership is an association of three or more persons to carry on as co-owners of a business for profit.
2. The legal requirements for forming a partnership can be quite burdensome.
3. A partnership is not an entity for financial reporting purposes.
4. The net income of a partnership is taxed as a separate entity.
5. The act of any partner is binding on all other partners, even when partners perform business acts beyond the scope of their authority.
6. Each partner is personally and individually liable for all partnership liabilities.
7. When a partnership is dissolved, the assets legally revert to the original contributor.
8. In a limited partnership, one or more partners have unlimited liability and one or more partners have limited liability for the debts of the firm.
9. Mutual agency is a major advantage of the partnership form of business.

Instructions

Identify each statement as true or false. If false, indicate how to correct the statement.

Journalize entry for formation of a partnership.

E12.2 (LO 1) K. Decker, S. Rosen, and E. Toso are forming a partnership. Decker is transferring \$50,000 of personal cash to the partnership. Rosen owns land worth \$15,000 and a small building worth \$80,000, which she transfers to the partnership. Toso transfers to the partnership cash of \$9,000, accounts receivable of \$32,000, and equipment worth \$39,000. The partnership expects to collect \$29,000 of the accounts receivable.

Instructions

- a. Prepare the journal entries to record each of the partners' investments.
- b. What amount would be reported as total owners' equity immediately after the investments?

E12.3 (LO 1) Suzy Vopat has owned and operated a proprietorship for several years. On January 1, she decides to terminate this business and become a partner in the firm of Vopat and Sigma. Vopat's investment in the partnership consists of \$12,000 in cash, and the following assets of the proprietorship: accounts receivable \$14,000 less allowance for doubtful accounts of \$2,000, and equipment \$30,000 less accumulated depreciation of \$4,000. It is agreed that the allowance for doubtful accounts should be \$3,000 for the partnership. The fair value of the equipment is \$23,500.

Instructions

Journalize Vopat's admission to the firm of Vopat and Sigma.

Journalize entry for formation of a partnership.

E12.4 (LO 2) McGill and Smyth have capital balances on January 1 of \$50,000 and \$40,000, respectively. The partnership income-sharing agreement provides for (1) annual salaries of \$22,000 for McGill and \$13,000 for Smyth, (2) interest at 10% on beginning capital balances, and (3) remaining income or loss to be shared 60% by McGill and 40% by Smyth.

Instructions

- Prepare a schedule showing the distribution of net income, assuming net income is (1) \$50,000 and (2) \$36,000.
- Journalize the allocation of net income in each of the situations above.

Prepare schedule showing distribution of net income and closing entry.

E12.5 (LO 2) Coburn (beginning capital, \$60,000) and Webb (beginning capital \$90,000) are partners. During 2020, the partnership earned net income of \$80,000, and Coburn made drawings of \$18,000 while Webb made drawings of \$24,000.

Prepare journal entries to record allocation of net income.

Instructions

- Assume the partnership income-sharing agreement calls for income to be divided 45% to Coburn and 55% to Webb. Prepare the journal entry to record the allocation of net income.
- Assume the partnership income-sharing agreement calls for income to be divided with a salary of \$30,000 to Coburn and \$25,000 to Webb, with the remainder divided 45% to Coburn and 55% to Webb. Prepare the journal entry to record the allocation of net income.
- Assume the partnership income-sharing agreement calls for income to be divided with a salary of \$40,000 to Coburn and \$35,000 to Webb, interest of 10% on beginning capital, and the remainder divided 50%–50%. Prepare the journal entry to record the allocation of net income.
- Compute the partners' ending capital balances under the assumption in part (c).

E12.6 (LO 2) Financial Statement For National Co., beginning capital balances on January 1, 2020, are Nancy Payne \$20,000 and Ann Dody \$18,000. During the year, drawings were Payne \$8,000 and Dody \$5,000. Net income was \$40,000, and the partners share income equally.

Prepare partners' capital statement and partial balance sheet.

Instructions

- Prepare the partners' capital statement for the year.
- Prepare the owners' equity section of the balance sheet at December 31, 2020.

E12.7 (LO 2) Financial Statement Terry, Nick, and Frank are forming The Doctor Partnership. Terry is transferring \$30,000 of personal cash and equipment worth \$25,000 to the partnership. Nick owns land worth \$28,000 and a small building worth \$75,000, which he transfers to the partnership. There is a long-term mortgage of \$20,000 on the land and building, which the partnership assumes. Frank transfers cash of \$7,000, accounts receivable of \$36,000, supplies worth \$3,000, and equipment worth \$27,000 to the partnership. The partnership expects to collect \$32,000 of the accounts receivable.

Prepare a classified balance sheet of a partnership.

Instructions

Prepare a classified balance sheet for the partnership after the partners' investments on December 31, 2020.

E12.8 (LO 3) Sedgwick Company at December 31 has cash \$20,000, noncash assets \$100,000, liabilities \$55,000, and the following capital balances: Floyd \$45,000 and DeWitt \$20,000. The firm is liquidated, and \$105,000 in cash is received for the noncash assets. Floyd and DeWitt income ratios are 60% and 40%, respectively.

Prepare cash payments schedule.

Instructions

Prepare a schedule of cash payments.

Journalize transactions in a liquidation.

E12.9 (LO 3) Data for Sedgwick Company are presented in E12.8. Sedgwick Company now decides to liquidate the partnership.

Instructions

Prepare the entries to record:

- a. The sale of noncash assets.
- b. The allocation of the gain or loss on realization to the partners.
- c. Payment of creditors.
- d. Distribution of cash to the partners.

Journalize transactions with a capital deficiency.

E12.10 (LO 3) Prior to the distribution of cash to the partners, the accounts in the VUP Company are Cash \$24,000; Vogel, Capital (Cr.) \$17,000; Utech, Capital (Cr.) \$15,000; and Pena, Capital (Dr.) \$8,000. The income ratios are 5:3:2, respectively. VUP Company decides to liquidate the company.

Instructions

- a. Prepare the entry to record (1) Pena's payment of \$8,000 in cash to the partnership and (2) the distribution of cash to the partners with credit balances.
- b. Prepare the entry to record (1) the absorption of Pena's capital deficiency by the other partners and (2) the distribution of cash to the partners with credit balances.

Journalize admission of a new partner by purchase of an interest.

***E12.11 (LO 4)** K. Kolmer, C. Eidman, and C. Ryno share income on a 5:3:2 basis. They have capital balances of \$34,000, \$26,000, and \$21,000, respectively, when Don Jernigan is admitted to the partnership.

Instructions

Prepare the journal entry to record the admission of Don Jernigan under each of the following assumptions.

- a. Purchase of 50% of Kolmer's equity for \$19,000.
- b. Purchase of 50% of Eidman's equity for \$12,000.
- c. Purchase of $33\frac{1}{3}\%$ of Ryno's equity for \$9,000.

Journalize admission of a new partner by investment.

***E12.12 (LO 4)** S. Pagan and T. Tabor share income on a 6:4 basis. They have capital balances of \$100,000 and \$60,000, respectively, when W. Wolford is admitted to the partnership.

Instructions

Prepare the journal entry to record the admission of W. Wolford under each of the following assumptions.

- a. Investment of \$90,000 cash for a 30% ownership interest with bonuses to the existing partners.
- b. Investment of \$50,000 cash for a 30% ownership interest with a bonus to the new partner.

Journalize withdrawal of a partner with payment from partners' personal assets.

***E12.13 (LO 4)** N. Essex, C. Gilmore, and C. Heganbart have capital balances of \$50,000, \$40,000, and \$30,000, respectively. Their income ratios are 4:4:2. Heganbart withdraws from the partnership under each of the following independent conditions.

1. Essex and Gilmore agree to purchase Heganbart's equity by paying \$17,000 each from their personal assets. Each purchaser receives 50% of Heganbart's equity.
2. Gilmore agrees to purchase all of Heganbart's equity by paying \$22,000 cash from her personal assets.
3. Essex agrees to purchase all of Heganbart's equity by paying \$26,000 cash from his personal assets.

Instructions

Journalize the withdrawal of Heganbart under each of the assumptions above.

Journalize withdrawal of a partner with payment from partnership assets.

***E12.14 (LO 4)** B. Higgins, J. Mayo, and N. Rice have capital balances of \$95,000, \$75,000, and \$60,000, respectively. They share income or loss on a 5:3:2 basis. Rice withdraws from the partnership under each of the following conditions.

1. Rice is paid \$64,000 in cash from partnership assets, and a bonus is granted to the retiring partner.
2. Rice is paid \$52,000 in cash from partnership assets, and bonuses are granted to the remaining partners.

Instructions

Journalize the withdrawal of Rice under each of the assumptions above.

***E12.15 (LO 4)** Foss, Albertson, and Espinosa are partners who share profits and losses 50%, 30%, and 20%, respectively. Their capital balances are \$100,000, \$60,000, and \$40,000, respectively.

Journalize entry for admission and withdrawal of partners.

Instructions

- Assume Garrett joins the partnership by investing \$88,000 for a 25% interest with bonuses to the existing partners. Prepare the journal entry to record his investment.
- Assume instead that Foss leaves the partnership. Foss is paid \$110,000 with a bonus to the retiring partner. Prepare the journal entry to record Foss's withdrawal.

Problems: Set A

P12.1A (LO 1, 2) Financial Statement The post-closing trial balances of two proprietorships on January 1, 2020, are presented below.

Prepare entries for formation of a partnership and a balance sheet.

	Sorensen Company		Lucas Company	
	Dr.	Cr.	Dr.	Cr.
Cash	\$ 14,000		\$12,000	
Accounts receivable	17,500		26,000	
Allowance for doubtful accounts		\$ 3,000		\$ 4,400
Inventory	26,500		18,400	
Equipment	45,000		29,000	
Accumulated depreciation—equipment		24,000		11,000
Notes payable		18,000		15,000
Accounts payable		22,000		31,000
Sorensen, capital		36,000		
Lucas, capital				24,000
	<u>\$103,000</u>	<u>\$103,000</u>	<u>\$85,400</u>	<u>\$85,400</u>

Sorensen and Lucas decide to form a partnership, Solu Company, with the following agreed upon valuations for noncash assets.

	Sorensen Company	Lucas Company
Accounts receivable	\$17,500	\$26,000
Allowance for doubtful accounts	4,500	4,000
Inventory	28,000	20,000
Equipment	25,000	15,000

All cash will be transferred to the partnership, and the partnership will assume all the liabilities of the two proprietorships. Further, it is agreed that Sorensen will invest an additional \$5,000 in cash, and Lucas will invest an additional \$19,000 in cash.

Instructions

- Prepare separate journal entries to record the transfer of each proprietorship's assets and liabilities to the partnership.
- Journalize the additional cash investment by each partner.
- Prepare a classified balance sheet for the partnership on January 1, 2020.
- Sorensen, Capital \$40,000
Lucas, Capital \$23,000
- Total assets \$173,000

P12.2A (LO 2) Financial Statement At the end of its first year of operations on December 31, 2020, NBS Company's accounts show the following.

Journalize divisions of net income and prepare a partners' capital statement.

Partner	Drawings	Capital
Art Niensted	\$23,000	\$48,000
Greg Bolen	14,000	30,000
Krista Sayler	10,000	25,000

The capital balance represents each partner's initial capital investment. Therefore, net income or net loss for 2020 has not been closed to the partners' capital accounts.

Instructions

1. Niensted \$18,000
 2. Niensted \$20,000
 3. Niensted \$17,700
 - c. Niensted \$42,700
- a. Journalize the entry to record the division of net income for the year 2020 under each of the following independent assumptions.
- Net income is \$30,000. Income is shared 6:3:1.
 - Net income is \$40,000. Niensted and Bolen are given salary allowances of \$15,000 and \$10,000, respectively. The remainder is shared equally.
 - Net income is \$19,000. Each partner is allowed interest of 10% on beginning capital balances. Niensted is given a \$15,000 salary allowance. The remainder is shared equally.
- b. Prepare a schedule showing the division of net income under assumption (3) above.
- c. Prepare a partners' capital statement for the year under assumption (3) above.

Prepare entries with a capital deficiency in liquidation of a partnership.

P12.3A (LO 3) The partners in Crawford Company decide to liquidate the firm when the balance sheet shows the following.

**Crawford Company
Balance Sheet
May 31, 2020**

Assets	Liabilities and Owners' Equity
Cash	\$ 27,500
Accounts receivable	25,000
Allowance for doubtful accounts	(1,000)
Inventory	34,500
Equipment	21,000
Accumulated depreciation—equipment	(5,500)
	<hr/>
	\$101,500
	<hr/>
	Notes payable
	Accounts payable
	Salaries and wages payable
	A. Jamison, capital
	S. Moyer, capital
	P. Roper, capital
	<hr/>
	\$101,500

The partners share income and loss 5:3:2. During the process of liquidation, the following transactions were completed in the following sequence.

- A total of \$51,000 was received from converting noncash assets into cash.
- Gain or loss on realization was allocated to partners.
- Liabilities were paid in full.
- P. Roper paid his capital deficiency.
- Cash was paid to the partners with credit balances.

Instructions

- Loss on realization \$23,000
Cash paid: to Jamison \$21,500; to Moyer \$14,100

a. Prepare the entries to record the transactions.

b. Post to the cash and capital accounts.

c. Assume that Roper is unable to pay the capital deficiency.

- Prepare the entry to allocate Roper's debit balance to Jamison and Moyer.
- Prepare the entry to record the final distribution of cash.

Journalize admission of a partner under different assumptions.

***P12.4A (LO 4)** At April 30, partners' capital balances in PDL Company are G. Donley \$52,000, C. Lamar \$48,000, and J. Pinkston \$18,000. The income sharing ratios are 5:4:1, respectively. On May 1, the PDLT Company is formed by admitting J. Terrell to the firm as a partner.

Instructions

- Terrell \$9,000
- Terrell \$16,000
- Terrell \$54,000
- Terrell \$48,000

a. Journalize the admission of Terrell under each of the following independent assumptions.

- Terrell purchases 50% of Pinkston's ownership interest by paying Pinkston \$16,000 in cash.
 - Terrell purchases $33\frac{1}{3}\%$ of Lamar's ownership interest by paying Lamar \$15,000 in cash.
 - Terrell invests \$62,000 for a 30% ownership interest, and bonuses are given to the old partners.
 - Terrell invests \$42,000 for a 30% ownership interest, which includes a bonus to the new partner.
- b. Lamar's capital balance is \$32,000 after admitting Terrell to the partnership by investment. If Lamar's ownership interest is 20% of total partnership capital, what were (1) Terrell's cash investment and (2) the bonus to the new partner?

***P12.5A (LO 4)** On December 31, the capital balances and income ratios in TEP Company are as follows.

Journalize withdrawal of a partner under different assumptions.

Partner	Capital Balance	Income Ratio
Trayer	\$60,000	50%
Emig	40,000	30%
Posada	30,000	20%

Instructions

- a. Journalize the withdrawal of Posada under each of the following assumptions.
 - 1. Each of the continuing partners agrees to pay \$18,000 in cash from personal funds to purchase Posada's ownership equity. Each receives 50% of Posada's equity.
 - 2. Emig agrees to purchase Posada's ownership interest for \$25,000 cash.
 - 3. Posada is paid \$34,000 from partnership assets, which includes a bonus to the retiring partner.
 - 4. Posada is paid \$22,000 from partnership assets, and bonuses to the remaining partners are recognized.
- b. If Emig's capital balance after Posada's withdrawal is \$43,600, what were (1) the total bonus to the remaining partners and (2) the cash paid by the partnership to Posada?

Continuing Case

Cookie Creations

(Note: This is a continuation of the Cookie Creations case from Chapters 1 through 11.)

CC12 Natalie's high school friend, Katy Peterson, has been operating a bakery for approximately 18 months. Because Natalie has been so successful operating Cookie Creations, Katy would like to have Natalie become her partner. Katy believes that together they will create a thriving cookie-making business. Natalie is quite happy with her current business set-up. Up until now, she had not considered joining forces with anyone. However, Natalie thinks that it may be a good idea to establish a partnership with Katy, and decides to look into it.

Ethics Case

EC12 Alexandra and Kellie operate a beauty salon as partners who share profits and losses equally. The success of their business has exceeded their expectations; the salon is operating quite profitably. Kellie is anxious to maximize profits and schedules appointments from 8 a.m. to 6 p.m. daily, even sacrificing some lunch hours to accommodate regular customers. Alexandra schedules her appointments from 9 a.m. to 5 p.m. and takes long lunch hours. Alexandra regularly makes significantly larger withdrawals of cash than Kellie does, but, she says, "Kellie, you needn't worry, I never make a withdrawal without you knowing about it, so it is properly recorded in my drawings account and charged against my capital at the end of the year." Alexandra's withdrawals to date are double Kellie's.

Instructions

- a. Who are the stakeholders in this situation?
- b. Identify the problems with Alexandra's actions and discuss the ethical considerations involved.
- c. How might the partnership agreement be revised to accommodate the differences in Alexandra's and Kellie's work and withdrawal habits?

Expand Your Critical Thinking

Real-World Focus

CT12.1 This exercise is an introduction to the Big Four accounting firms, all of which are partnerships: Deloitte & Touche, Ernst & Young, KPMG, and PricewaterhouseCoopers.

Instructions

Select a firm that is of interest to you, go to the firm's homepage, and then answer the following questions.

- a. Name two services performed by the firm.
- b. What is the firm's total annual revenue?
- c. How many clients does it service?
- d. How many people are employed by the firm?
- e. How many partners are there in the firm?

Decision-Making Across the Organization

CT12.2 Groupwork Stephen Wadson and Mary Shively, two professionals in the finance area, have worked for Morrisen Leasing for a number of years. Morrisen Leasing is a company that leases high-tech medical equipment to hospitals. Stephen and Mary have decided that, with their financial expertise, they might start their own company to perform consulting services for individuals interested in leasing equipment. One form of organization they are considering is a partnership.

If they start a partnership, each individual plans to contribute \$50,000 in cash. In addition, Stephen has a used IBM computer that originally cost \$3,700, which he intends to invest in the partnership. The computer has a present fair value of \$1,500.

Although both Stephen and Mary are financial wizards, they do not know a great deal about how a partnership operates. As a result, they have come to you for advice.

Instructions

With the class divided into groups, answer the following.

- a. What are the major disadvantages of starting a partnership?
- b. What type of document is needed for a partnership, and what should this document contain?
- c. Both Stephen and Mary plan to work full-time in the new partnership. They believe that net income or net loss should be shared equally. However, they are wondering how to provide compensation to Stephen Wadson for his investment of the computer. What would you tell them?
- d. Stephen is not sure how the computer equipment should be reported on his tax return. What would you tell him?
- e. As indicated above, Stephen and Mary have worked together for a number of years. Stephen's skills complement Mary's and vice versa. If one of them dies, it will be very difficult for the other to maintain the business, not to mention the difficulty of paying the deceased partner's estate for his or her partnership interest. What would you advise them to do?

Communication Activity

CT12.3 Writing You are an expert in the field of forming partnerships. Ronald Hrabik and Meg Percival want to establish a partnership to start "Pasta Shop," and they are going to meet with you to discuss their plans. Prior to the meeting, you will send them a memo discussing the issues they need to consider.

Instructions

Write a memo in good form to be sent to Hrabik and Percival.

All About You

CT12.4 As this chapter indicates, the partnership form of organization has advantages and disadvantages. The chapter noted that different types of partnerships have been developed to minimize some of these disadvantages. Alternatively, an individual or company can choose the proprietorship or corporate form of organization.

Instructions

Go to two local businesses that are different, such as a restaurant, a retailer, a construction company, or a professional office (dentist, doctor, etc.), and find the answers to the following questions.

- a. What form of organization do you use in your business?
- b. What do you believe are the two major advantages of this form of organization for your business?
- c. What do you believe are the two major disadvantages of this form of organization for your business?
- d. Do you believe that eventually you may choose another form of organization?
- e. Did you have someone help you form this organization (attorney, accountant, relative, etc.)?

As partnership accounting is essentially the same under GAAP and IFRS, there is no A Look at IFRS section in this chapter.

Paul Sakuma/AP/Wide World Photos

Corporations: Organization and Capital Stock Transactions

Chapter Preview

Corporations like **Facebook** and **Google** have substantial resources at their disposal. In fact, the corporation is the dominant form of business organization in the United States in terms of sales, earnings, and number of employees. All of the 500 largest companies in the United States are corporations. In this chapter, we will explain the essential features of a corporation and the accounting for a corporation's capital stock transactions. In Chapter 14, we will look at other issues related to accounting for corporations.

Feature Story

Oh Well, I Guess I'll Get Rich

Suppose you started one of the fastest-growing companies in the history of business. Now suppose that by “going public”—issuing stock of your company to outside investors who are foaming at the mouth for the chance to buy its shares—you

would instantly become one of the richest people in the world. Would you hesitate?

That is exactly what Mark Zuckerberg, the founder of **Facebook**, did. Many people who start high-tech companies go public as soon as possible to cash in on their riches. But Zuckerberg was reluctant to do so. To understand why, you need to understand the advantages and disadvantages of being a public company.

The main motivation for issuing shares to the public is to raise money so you can grow your business. However, unlike a manufacturer or even an online retailer, Facebook doesn't need major physical resources, it doesn't have inventory, and it doesn't really need much money for marketing. But why not go public anyway, so the company would have some extra cash on hand—and so you personally get rich? As head of a closely held, nonpublic company, Zuckerberg was subject to far fewer regulations than a public company. Prior to going public, Zuckerberg could basically run the company however he wanted to.

For example, early in 2012, Facebook shocked the investment community by purchasing the photo-sharing service

Instagram. The purchase was startling both for its speed (over a weekend) and price (\$1 billion). Zuckerberg basically didn't seek anyone's approval. He thought it was a good idea, so he just did it. The structured decision-making process of a public company would make it very difficult for a public company to move that fast.

Speed is useful, but it is likely that Facebook will make even bigger acquisitions in the future. To survive among the likes of **Microsoft**, **Google**, and **Apple**, it needs lots of cash. To raise that amount of money, the company really needed to go public. So in 2012, Mark Zuckerberg reluctantly made Facebook a public company, thus becoming one of the richest people in the world.

Corporate Form of Organization

LEARNING OBJECTIVE 1

Discuss the major characteristics of a corporation.

In 1819, Chief Justice John Marshall defined a corporation as "an artificial being, invisible, intangible, and existing only in contemplation of law." This definition is the foundation for the prevailing legal interpretation that a **corporation** is an **entity separate and distinct from its owners**.

A corporation is created by law, and its continued existence depends upon the statutes of the state in which it is incorporated. As a legal entity, a corporation has most of the rights and privileges of a person. The major exceptions relate to privileges that only a living person can exercise, such as the right to vote or to hold public office. A corporation is subject to the same duties and responsibilities as a person. For example, it must abide by the laws, and it must pay taxes.

Two common ways to classify corporations are by **purpose** and by **ownership**. A corporation may be organized for the purpose of making a profit, or it may be not-for-profit. For-profit corporations include such well-known companies as **McDonald's**, **Nike**, **PepsiCo**, and **Google**. Not-for-profit corporations are organized for charitable, medical, or educational purposes. Examples are the **Salvation Army** and the **American Cancer Society**.

Classification by ownership differentiates publicly held and privately held corporations. A **publicly held corporation** may have thousands of stockholders. Its stock is regularly traded on a national securities exchange such as the New York Stock Exchange or NASDAQ. Examples are **IBM**, **Caterpillar**, and **Apple**.

In contrast, a **privately held corporation** usually has only a few stockholders, and does not offer its stock for sale to the general public (see **Alternative Terminology**). Privately held companies are generally much smaller than publicly held companies, although some notable exceptions exist. **Cargill Inc.**, a private corporation that trades in grain and other commodities, is one of the largest companies in the United States.

ALTERNATIVE TERMINOLOGY

Privately held corporations are also referred to as *closely held corporations*.

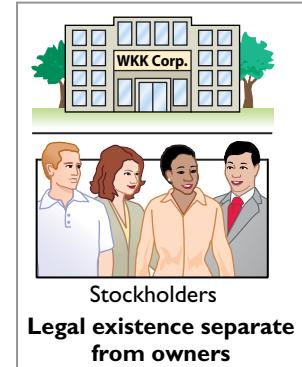

Characteristics of a Corporation

In 1964, when **Nike**'s founders Phil Knight and Bill Bowerman were just getting started in the running shoe business, they formed their original organization as a partnership. In 1968, they reorganized the company as a corporation. A number of characteristics distinguish corporations from proprietorships and partnerships. We explain the most important of these characteristics below.

Separate Legal Existence

As an entity separate and distinct from its owners, the corporation acts under its own name rather than in the name of its stockholders. Nike may buy, own, and sell property. It may borrow money, and it may enter into legally binding contracts in its own name. It may also sue or be sued, and it pays its own taxes.

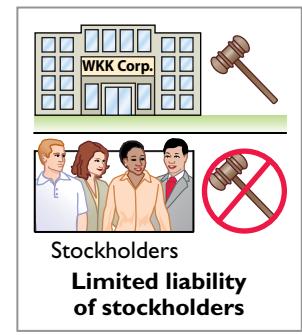

In a partnership, the acts of the owners (partners) bind the partnership. In contrast, the acts of its owners (stockholders) do not bind the corporation unless such owners are **agents** of the corporation. For example, if you owned shares of Nike stock, you would not have the right to purchase inventory for the company unless you were designated as an agent of the corporation.

Legal existence separate from owners

Limited Liability of Stockholders

Since a corporation is a separate legal entity, creditors have recourse only to corporate assets to satisfy their claims. The liability of stockholders is normally limited to their investment in the corporation. Creditors have no legal claim on the personal assets of the owners unless fraud has occurred. Even in the event of bankruptcy, stockholders' losses are generally limited to their capital investment in the corporation.

Limited liability of stockholders

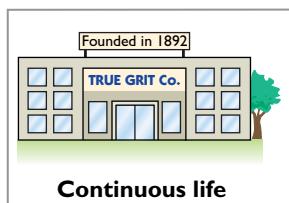

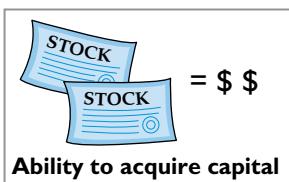

Transferable Ownership Rights

Shares of capital stock give ownership in a corporation. These shares are transferable units. Stockholders may dispose of part or all of their interest in a corporation simply by selling their stock. The transfer of an ownership interest in a partnership requires the consent of each owner. In contrast, the transfer of stock is entirely at the discretion of the stockholder. It does not require the approval of either the corporation or other stockholders.

The transfer of ownership rights between stockholders normally has no effect on the daily operating activities of the corporation. Nor does it affect the corporation's assets, liabilities, and total ownership equity. The transfer of these ownership rights is a transaction between individual owners. The company does not participate in the transfer of these ownership rights after the original sale of the capital stock.

Transferable ownership rights

Ability To Acquire Capital

It is relatively easy for a corporation to obtain capital through the issuance of stock. Buying stock in a corporation is often attractive to an investor because a stockholder has limited liability and shares of stock are readily transferable. Also, numerous individuals can become stockholders by investing relatively small amounts of money.

Continuous Life

The life of a corporation is stated in its charter. The life may be perpetual, or it may be limited to a specific number of years. If it is limited, the company can extend the life through renewal of the charter. Since a corporation is a separate legal entity, its continuance as a going concern is not affected by the withdrawal, death, or incapacity of a stockholder, employee, or officer. As a result, a successful company can have a continuous and perpetual life.

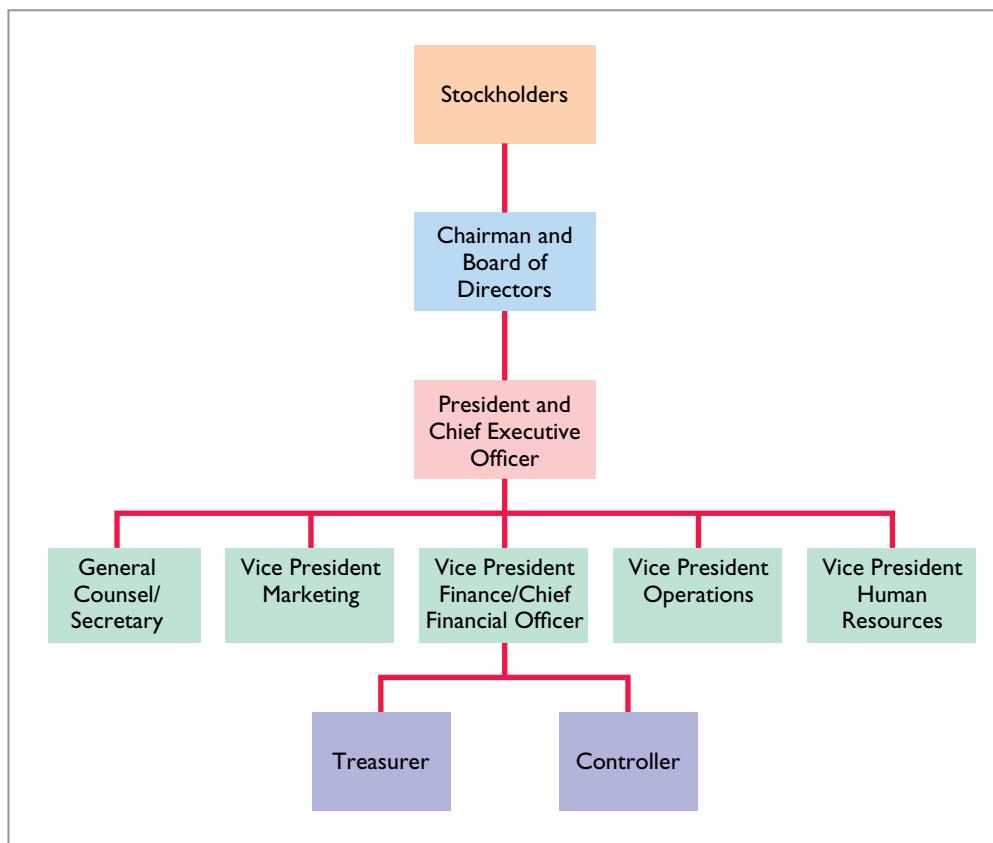

Corporation Management

Stockholders legally own the corporation. However, they manage the corporation indirectly through a board of directors they elect. For example, Phil Knight is the chairman of **Nike**. The board, in turn, formulates the operating policies for the company. The board also selects officers, such as a president and one or more vice presidents, to execute policy and to perform daily management functions. As a result of the Sarbanes-Oxley Act, the board is now required to monitor management's actions more closely. Many feel that the failures of **Enron**, **WorldCom**, and more recently **MF Global** could have been avoided by more diligent boards.

Illustration 13.1 presents a typical organization chart showing the delegation of responsibility. The chief executive officer (CEO) has overall responsibility for managing the business. As the organization chart shows, the CEO delegates responsibility to other officers. The chief accounting officer is the **controller**. The controller's responsibilities include (1) maintaining the accounting records, (2) ensuring an adequate system of internal control, and (3) preparing financial statements, tax returns, and internal reports. The

ILLUSTRATION 13.1

Corporation organization chart

treasurer has custody of the corporation's funds and is responsible for maintaining the company's cash position.

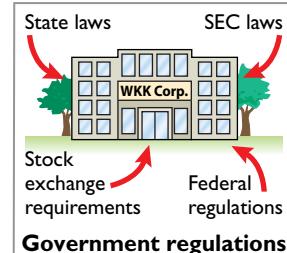

The organizational structure of a corporation enables a company to hire professional managers to run the business (see **Ethics Note**). On the other hand, the separation of ownership and management often reduces an owner's ability to actively manage the company.

Government Regulations

A corporation is subject to numerous state and federal regulations. For example, state laws usually prescribe the requirements for issuing stock, the distributions of earnings permitted to stockholders, and the acceptable methods for buying back and retiring stock. Federal securities laws govern the sale of capital stock to the general public. Also, most publicly held corporations are required to make extensive disclosure of their financial affairs to the Securities and Exchange Commission (SEC) through quarterly and annual reports (Forms 10Q and 10K). In addition, when a corporation lists its stock on organized securities exchanges, it must comply with the reporting requirements of these exchanges. Government regulations are designed to protect the owners of the corporation.

ETHICS NOTE

Managers who are not owners are often compensated based on the performance of the firm. They thus may be tempted to exaggerate firm performance by inflating income figures.

Additional Taxes

Owners of proprietorships and partnerships report their share of earnings on their personal income tax returns. The individual owner then pays taxes on this amount. Corporations, on the other hand, must pay federal and state income taxes **as a separate legal entity**. These taxes can be substantial. They can amount to as much as 40% of taxable income.

In addition, stockholders must pay taxes on cash dividends (pro rata distributions of net income). Thus, many argue that the government taxes corporate income **twice (double taxation)**—once at the corporate level and again at the individual level.

In summary, **Illustration 13.2** shows the advantages and disadvantages of a corporation compared to a proprietorship and a partnership.

ILLUSTRATION 13.2

Advantages and disadvantages of a corporation

Advantages

- Separate legal existence
- Limited liability of stockholders
- Transferable ownership rights
- Ability to acquire capital
- Continuous life
- Corporation management—professional managers

Disadvantages

- Corporation management—separation of ownership and management
- Government regulations
- Additional taxes

Forming a Corporation

A corporation is formed by grant of a state **charter**. The charter is a document that describes the name and purpose of the corporation, the types and number of shares of stock that are authorized to be issued, the names of the individuals that formed the company, and the number of shares that these individuals agreed to purchase (see **Alternative Terminology**). Regardless of the number of states in which a corporation has operating divisions, it is incorporated in only one state.

It is to the company's advantage to incorporate in a state whose laws are favorable to the corporate form of business organization. For example, although **Facebook** has its headquarters in California, it is incorporated in Delaware. In fact, more and more corporations have been incorporating in states with rules that favor existing management. For example, **Gulf Oil** changed its state of incorporation to Delaware to thwart possible unfriendly takeovers. There, certain defensive tactics against takeovers can be approved by the board of directors alone, without a vote by shareholders.

Upon receipt of its charter from the state of incorporation, the corporation establishes **by-laws**. The by-laws establish the internal rules and procedures for conducting the affairs of the corporation. Corporations engaged in interstate commerce must also obtain a **license** from

ALTERNATIVE TERMINOLOGY

The charter is often referred to as the *articles of incorporation*.

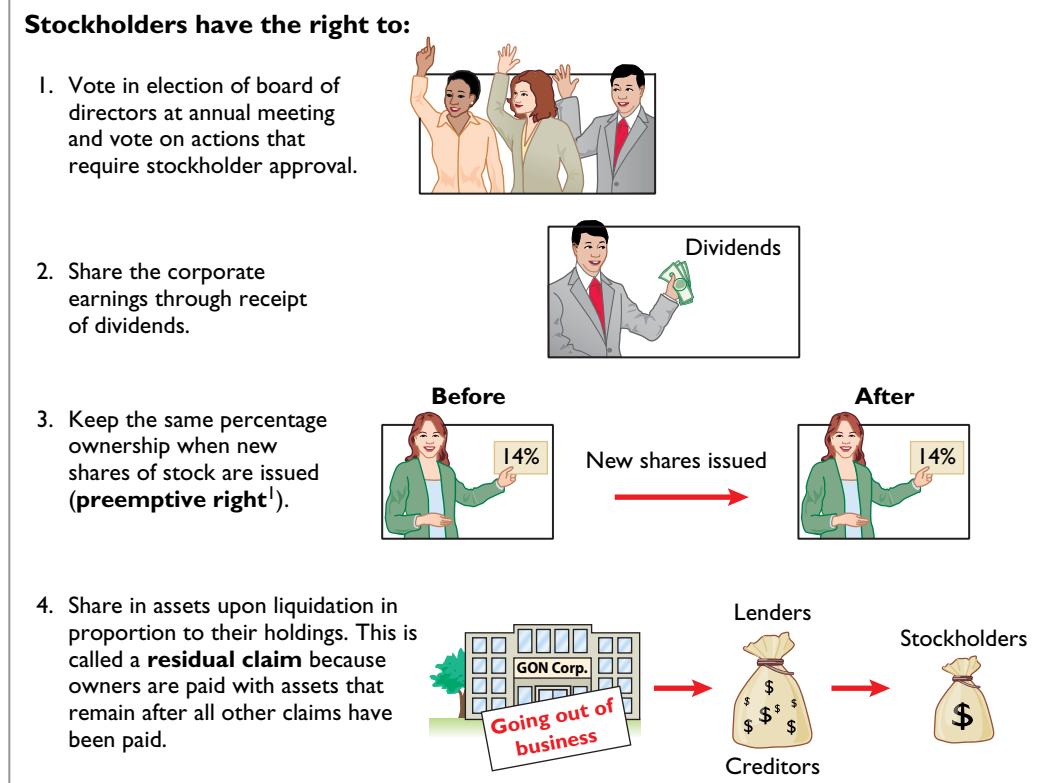

each state in which they do business. The license subjects the corporation's operating activities to the general corporation laws of the state.

Costs incurred in the formation of a corporation are called **organization costs**. These costs include legal and state fees, and promotional expenditures involved in the organization of the business. **Corporations expense organization costs as incurred.** Determining the amount and timing of future benefits is so difficult that it is standard procedure to take a conservative approach of expensing these costs immediately.

Stockholder Rights

When chartered, the corporation may begin selling shares of stock. When a corporation has only one class of stock, it is **common stock**. Each share of common stock gives the stockholder the ownership rights pictured in **Illustration 13.3**. The articles of incorporation or the by-laws state the ownership rights of a share of stock.

ILLUSTRATION 13.3 Ownership rights of stockholders

Proof of stock ownership is evidenced by a form known as a **stock certificate**. As **Illustration 13.4** shows, the face of the certificate shows the name of the corporation, the stockholder's name, the class and special features of the stock, the number of shares owned, and the signatures of authorized corporate officials. Prenumbered certificates facilitate accountability. They may be issued for any quantity of shares.

Stock Issue Considerations

Although **Nike** incorporated in 1968, it did not sell stock to the public until 1980. At that time, Nike evidently decided it would benefit from the infusion of cash that a public sale would bring. When a corporation decides to issue stock, it must resolve a number of basic questions: How

¹A number of companies have eliminated the preemptive right because they believe it makes an unnecessary and cumbersome demand on management. For example, by stockholder approval, **IBM** has dropped its preemptive right for stockholders.

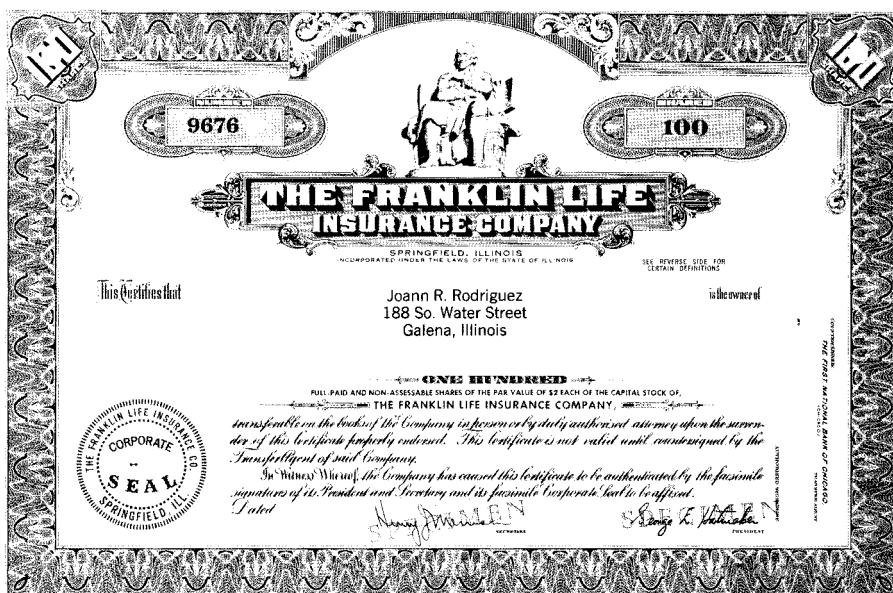

ILLUSTRATION 13.4

A stock certificate

many shares should it authorize for sale? How should it issue the stock? What value should the corporation assign to the stock? We address these questions in the following sections.

Authorized Stock

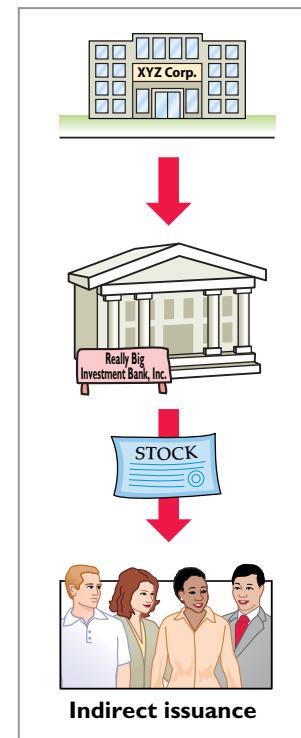

The charter indicates the amount of stock that a corporation is **authorized** to sell. The total amount of **authorized stock** at the time of incorporation normally anticipates both initial and subsequent capital needs. As a result, the number of shares authorized generally exceeds the number initially sold. If it sells all authorized stock, a corporation must obtain consent of the state to amend its charter before it can issue additional shares.

The authorization of capital stock does not result in a formal accounting entry. The reason is that the event has no immediate effect on either corporate assets or stockholders' equity. However, the number of authorized shares is often reported in the stockholders' equity section. It is then simple to determine the number of unissued shares that the corporation can issue without amending the charter: subtract the total shares issued from the total authorized. For example, if **Advanced Micro** was authorized to sell 100,000 shares of common stock and issued 80,000 shares, 20,000 shares would remain unissued.

Issuance of Stock

A corporation can issue common stock **directly** to investors. Alternatively, it can issue the stock **indirectly** through an investment banking firm that specializes in bringing securities to the attention of prospective investors. Direct issue is typical in closely held companies. Indirect issue is customary for a publicly held corporation.

In an indirect issue, the investment banking firm may agree to **underwrite** the entire stock issue. In this arrangement, the investment banker buys the stock from the corporation at a stipulated price and resells the shares to investors. The corporation thus avoids any risk of being unable to sell the shares. Also, it obtains immediate use of the cash received from the underwriter. The investment banking firm, in turn, assumes the risk of reselling the shares, in return for an underwriting fee.² For example, **Google** used underwriters when it issued a highly successful initial public offering, raising \$1.67 billion. The underwriters charged a 3% underwriting fee (approximately \$50 million) on Google's stock offering.

²Alternatively, the investment banking firm may agree only to enter into a **best-efforts contract** with the corporation. In such cases, the banker agrees to sell as many shares as possible at a specified price. The corporation bears the risk of unsold stock. Under a best-efforts arrangement, the banking firm is paid a fee or commission for its services.

How does a corporation set the price for a new issue of stock? Among the factors to be considered are (1) the company's anticipated future earnings, (2) its expected dividend rate per share, (3) its current financial position, (4) the current state of the economy, and (5) the current state of the securities market. The calculation can be complex and is properly the subject of a finance course.

Anatomy of a Fraud

The president, chief operating officer, and chief financial officer of **SafeNet**, a software encryption company, were each awarded employee stock options by the company's board of directors as part of their compensation package. Stock options enable an employee to buy a company's stock sometime in the future at the price that existed when the stock option was awarded. For example, suppose that you received stock options today, when the stock price of your company was \$30. Three years later, if the stock price rose to \$100, you could "exercise" your options and buy the stock for \$30 per share, thereby making \$70 per share. After being awarded their stock options, the three employees changed the award dates in the company's records to dates in the past, when the company's stock was trading at historical lows. For instance, using the previ-

ous example, they would choose a past date when the stock was selling for \$10 per share, rather than the \$30 price on the actual award date. This would increase the profit from exercising the options to \$90 per share.

Total take: \$1.7 million

THE MISSING CONTROL

Independent internal verification. The company's board of directors should have ensured that the awards were properly administered. For example, the date on the minutes from the board meeting could be compared to the dates that were recorded for the awards. In addition, the dates should again be confirmed upon exercise.

Par and No-Par Value Stocks

Par value stock is capital stock to which the charter has assigned a value per share. Years ago, par value determined the **legal capital** per share that a company must retain in the business for the protection of corporate creditors. That amount was not available for withdrawal by stockholders. Thus, in the past, most states required the corporation to sell its shares at par or above.

However, par value was often immaterial relative to the value of the company's stock—even at the time of issue. Thus, its usefulness as a protective device to creditors was questionable. For example, **Facebook**'s par value is \$0.000006 per share, yet its market price recently was \$84. Thus, par has no relationship with market price. In the vast majority of cases, it is an immaterial amount. As a consequence, today many states do not require a par value. Instead, they use other means to protect creditors.

No-par value stock is capital stock to which the charter has not assigned a value. No-par value stock is fairly common today. For example, **Nike** and **Procter & Gamble** both have no-par stock. In many states, the board of directors assigns a **stated value** to no-par shares.

DO IT! 1a | Corporate Organization

Indicate whether each of the following statements is true or false. If false, indicate how to correct the statement.

- _____ 1. Similar to partners in a partnership, stockholders of a corporation have unlimited liability.
- _____ 2. It is relatively easy for a corporation to obtain capital through the issuance of stock.
- _____ 3. The separation of ownership and management is an advantage of the corporate form of business.
- _____ 4. The journal entry to record the authorization of capital stock includes a credit to the appropriate capital stock account.
- _____ 5. All states require a par value per share for capital stock.

ACTION PLAN

- Review the characteristics of a corporation and understand which are advantages and which are disadvantages.
- Understand that corporations raise capital through the issuance of stock, which can be par or no-par.

Solution

1. False. The liability of stockholders is normally limited to their investment in the corporation.
2. True.
3. False. The separation of ownership and management is a disadvantage of the corporate form of business.
4. False. The authorization of capital stock does not result in a formal accounting entry.
5. False. Many states do not require a par value.

Related exercise material: BE13.1, DO IT! 13.1a, E13.1, and E13.2.

Corporate Capital

Owners' equity is identified by various names: **stockholders' equity**, **shareholders' equity**, or **corporate capital**. The stockholders' equity section of a corporation's balance sheet consists of two parts: (1) paid-in (contributed) capital and (2) retained earnings (earned capital).

The distinction between **paid-in capital** and **retained earnings** is important from both a legal and a financial point of view. Legally, corporations can make distributions of earnings (declare dividends) out of retained earnings in all states. However, in many states they cannot declare dividends out of paid-in capital. Management, stockholders, and others often look to retained earnings for the continued existence and growth of the corporation.

Paid-In Capital

Paid-in capital is the total amount of cash and other assets paid in to the corporation by stockholders in exchange for capital stock. As noted earlier, when a corporation has only one class of stock, it is **common stock**.

Retained Earnings

Retained earnings is net income that a corporation retains for future use. Net income is recorded in Retained Earnings by a closing entry that debits Income Summary and credits Retained Earnings. For example, assuming that net income for Delta Robotics in its first year of operations is \$130,000, the closing entry is:

	A	=	L	+	SE
Income Summary		130,000			-130,000 Inc
Retained Earnings					+130,000 RE
(To close Income Summary and transfer net income to Retained Earnings)					
			130,000		

Cash Flows
no effect

If Delta Robotics has a balance of \$800,000 in common stock at the end of its first year, its stockholders' equity section is as shown in **Illustration 13.5**.

Delta Robotics Balance Sheet (partial)		
Stockholders' equity		
Paid-in capital		
Common stock	\$800,000	
Retained earnings	130,000	
Total stockholders' equity		\$930,000

DO IT! 1b | Corporate Capital

At the end of its first year of operation, Doral Corporation has \$750,000 of common stock and net income of \$122,000. Prepare (a) the closing entry for net income and (b) the stockholders' equity section at year-end.

Solution

- a. Income Summary
Retained Earnings
(To close Income Summary and transfer net income to Retained Earnings)
- b. Stockholders' equity
Paid-in capital
Common stock
Retained earnings
Total stockholders' equity

	122,000	122,000
	\$750,000	122,000
	<u> </u>	<u> </u>
	\$872,000	

Related exercise material: **BE13.2** and **DO IT! 13.1b**.

ACTION PLAN

- Record net income in Retained Earnings by a closing entry in which Income Summary is debited and Retained Earnings is credited.
- In the stockholders' equity section, show (1) paid-in capital and (2) retained earnings.

Accounting for Stock Transactions**LEARNING OBJECTIVE 2**

Explain how to account for common, preferred, and treasury stock.

Accounting for Common Stock

Let's now look at how to account for issues of common stock. The primary objectives in accounting for the issuance of common stock are (1) to identify the specific sources of paid-in capital, and (2) to maintain the distinction between paid-in capital and retained earnings. **The issuance of common stock affects only paid-in capital accounts.**

Issuing Par Value Common Stock for Cash

As discussed earlier, par value does not indicate a stock's market price. Therefore, the cash proceeds from issuing par value stock may be equal to, greater than, or less than par value.

When the company records issuance of common stock for cash, it credits the par value of the shares to Common Stock. It also records in a separate paid-in capital account the portion of the proceeds that is above or below par value.

To illustrate, assume that Hydro-Slide, Inc. issues 1,000 shares of \$1 par value common stock at par for cash. The entry to record this transaction is as follows.

	1,000	1,000	A = L + SE
Cash			+1,000
Common Stock (To record issuance of 1,000 shares of \$1 par common stock at par)			+1,000 CS

Now assume that Hydro-Slide issues an additional 1,000 shares of the \$1 par value common stock for cash at \$5 per share. The amount received above the par value, in this case \$4 (\$5 – \$1), is credited to Paid-in Capital in Excess of Par—Common Stock. The entry is as follows.

	5,000	1,000	A = L + SE
Cash			+5,000
Common Stock			+1,000 CS
Paid-in Capital in Excess of Par—Common Stock (To record issuance of 1,000 shares of \$1 par common stock)			+4,000 CS

The total paid-in capital from these two transactions is \$6,000, and the legal capital is \$2,000. Assuming Hydro-Slide, Inc. has retained earnings of \$27,000, **Illustration 13.7** shows the company's stockholders' equity section.

Hydro-Slide, Inc. Balance Sheet (partial)		
Stockholders' equity		
Paid-in capital		
Common stock	\$ 2,000	
In excess of par—common stock	4,000	
Total paid-in capital	6,000	
Retained earnings	27,000	
Total stockholders' equity	<u><u>\$33,000</u></u>	

ILLUSTRATION 13.7

Stockholders' equity—paid-in capital in excess of par

When a corporation issues stock for less than par value, it debits the account Paid-in Capital in Excess of Par—Common Stock if a credit balance exists in this account (see **Alternative Terminology**). If a credit balance does not exist, then the corporation debits to Retained Earnings the amount less than par. This situation occurs only rarely. Most states do not permit the sale of common stock below par value because stockholders may be held personally liable for the difference between the price paid upon original sale and par value.

ALTERNATIVE TERMINOLOGY

Paid-in Capital in Excess of Par is also called *Premium on Stock*.

Issuing No-Par Common Stock for Cash

When no-par common stock has a stated value, the entries are similar to those illustrated for par value stock. The corporation credits the stated value to Common Stock. Also, when the selling price of no-par stock exceeds stated value, the corporation credits the excess to Paid-in Capital in Excess of Stated Value—Common Stock.

For example, assume that instead of \$1 par value stock, Hydro-Slide, Inc. has \$5 stated value no-par stock and the company issues 5,000 shares at \$8 per share for cash. The entry is as follows.

	40,000	25,000	A = L + SE
Cash			+40,000
Common Stock			+25,000 CS
Paid-in Capital in Excess of Stated Value—Common Stock (To record issue of 5,000 shares of \$5 stated value no-par stock)			+15,000 CS

Hydro-Slide, Inc. reports Paid-in Capital in Excess of Stated Value—Common Stock as part of paid-in capital in the stockholders' equity section.

What happens when no-par stock does not have a stated value? In that case, the corporation credits the entire proceeds to Common Stock. Thus, if Hydro-Slide does not assign a stated value to its no-par stock, it records the issuance of the 5,000 shares at \$8 per share for cash as follows.

A	=	L	+	SE
+40,000				
Cash Flows				
+40,000				

Cash	40,000
Common Stock	
(To record issue of 5,000 shares of no-par stock)	40,000

Issuing Common Stock for Services or Noncash Assets

Corporations also may issue stock for services (compensation to attorneys or consultants) or for noncash assets (land, buildings, and equipment). In such cases, what cost should be recognized in the exchange transaction? To comply with the **historical cost principle**, in a noncash transaction **cost is the cash equivalent price**. Thus, **cost is either the fair value of the consideration given up or the fair value of the consideration received**, whichever is more clearly determinable.

To illustrate, assume that attorneys have helped Jordan Company incorporate. They have billed the company \$5,000 for their services. They agree to accept 4,000 shares of \$1 par value common stock in payment of their bill. At the time of the exchange, there is no established market price for the stock. In this case, the fair value of the consideration received, \$5,000, is more clearly evident. Accordingly, Jordan Company makes the following entry.

A	=	L	+	SE
		-5,000 Exp		
		+4,000 CS		
		+1,000 CS		

Cash Flows
no effect

Organization Expense	5,000
Common Stock	
Paid-in Capital in Excess of Par—Common Stock	4,000
(To record issuance of 4,000 shares of \$1 par value stock to attorneys)	1,000

As explained previously, organization costs are expensed as incurred.

In contrast, assume that Athletic Research Inc. is an existing publicly held corporation. Its \$5 par value stock is actively traded at \$8 per share. The company issues 10,000 shares of stock to acquire land recently advertised for sale at \$90,000. The most clearly evident value in this noncash transaction is the market price of the consideration given, \$80,000. The company records the transaction as follows.

A	=	L	+	SE
+80,000				
		+50,000 CS		
		+30,000 CS		

Cash Flows
no effect

Land	80,000
Common Stock	
Paid-in Capital in Excess of Par—Common Stock	50,000
(To record issuance of 10,000 shares of \$5 par value stock for land)	30,000

As illustrated in these examples, **the par value of the stock is never a factor in determining the cost of the assets or services received in noncash transactions**. This is also true of the stated value of no-par stock.

Accounting for Preferred Stock

To appeal to a larger segment of potential investors, a corporation may issue an additional class of stock, called preferred stock. **Preferred stock** has contractual provisions that give it some preference or priority over common stock. Typically, preferred stockholders have a priority as to (1) distributions of earnings (dividends) and (2) assets in the event of liquidation. However, they generally do not have voting rights.

Like common stock, corporations may issue preferred stock for cash or for noncash assets. The entries for these transactions are similar to the entries for common stock. When a corporation has more than one class of stock, each paid-in capital account title should identify the stock to which it relates. A company might have the following accounts: Preferred Stock, Common Stock, Paid-in Capital in Excess of Par—Preferred Stock, and Paid-in Capital in Excess of Par—Common Stock.

For example, if Stine Corporation issues 10,000 shares of \$10 par value preferred stock for \$12 cash per share, the entry to record the issuance is as follows.

	A	=	L	+	SE
Cash	120,000				+120,000
Preferred Stock			100,000		+100,000 PS
Paid-in Capital in Excess of Par—Preferred Stock			20,000		+20,000 PS
(To record the issuance of 10,000 shares of \$10 par value preferred stock)					
					Cash Flows
					+120,000
					

Preferred stock may have either a par value or no-par value. In the stockholders' equity section of the balance sheet, companies list preferred stock first because of its dividend and liquidation preferences over common stock.

How to Read Stock Quotes

Organized exchanges trade the stock of publicly held companies at dollar prices per share established by the interaction between buyers and sellers. For each listed security, the financial press reports the high and low prices of the stock during the year, the total volume of stock traded on a given day, the high and low prices for the day, and the closing market price, with the net change for the day. **Facebook** is listed on the Nasdaq exchange. Here is a

recent listing for Facebook:

Stock	52 Weeks				
	High	Low	Volume	High	Low
Facebook	86.07	54.66	54,156,600	85.59	83.11

These numbers indicate the following. The high and low market prices for the last 52 weeks have been \$86.07 and \$54.66. The trading volume for the day was 54,156,600 shares. The high, low, and closing prices for that date were \$85.59, \$83.11, and \$84.63, respectively. The net change for the day was a decrease of \$0.629 per share.

For stocks traded on organized exchanges, how are the dollar prices per share established? What factors might influence the price of shares in the marketplace? (Go to WileyPLUS for this answer and additional questions.)

DO IT! 2a | Issuance of Stock

Cayman Corporation begins operations on March 1 by issuing 100,000 shares of \$1 par value common stock for cash at \$12 per share. On March 15, it issues 5,000 shares of common stock to attorneys in settlement of their bill of \$50,000 for organization costs. On March 28, Cayman Corporation issues 1,500 shares of \$10 par value preferred stock for cash at \$30 per share. Journalize the issuance of the common and preferred shares, assuming the shares are not publicly traded.

Solution

Mar. 1	Cash Common Stock ($100,000 \times \$1$) Paid-in Capital in Excess of Par—Common Stock (To record issuance of 100,000 shares at \$12 per share)	1,200,000		100,000	1,100,000
Mar. 15	Organization Expense Common Stock ($5,000 \times \$1$) Paid-in Capital in Excess of Par—Common Stock (To record issuance of 5,000 shares for attorneys' fees)	50,000		5,000	45,000
Mar. 28	Cash Preferred Stock ($1,500 \times \$10$) Paid-in Capital in Excess of Par—Preferred Stock (To record issuance of 1,500 shares at \$30 per share)	45,000		15,000	30,000

ACTION PLAN

- In issuing shares for cash, credit Common Stock for par value per share.
- Credit any additional proceeds in excess of par to a separate paid-in capital account.
- When stock is issued for services, use the cash equivalent price.
- For the cash equivalent price, use either the fair value of what is given up or the fair value of what is received, whichever is more clearly determinable.

Accounting for Treasury Stock

HELPFUL HINT

Treasury shares do not have dividend rights or voting rights.

Treasury stock is a corporation's own stock that it has issued and subsequently reacquired from shareholders but not retired (see **Helpful Hint**). A corporation may acquire treasury stock for various reasons:

1. To reissue the shares to officers and employees under bonus and stock compensation plans.
2. To increase trading of the company's stock in the securities market. Companies expect that buying their own stock will signal that management believes the stock is underpriced, which they hope will enhance its market price.
3. To have additional shares available for use in the acquisition of other companies.
4. To reduce the number of shares outstanding and thereby increase earnings per share.

A less infrequent reason for purchasing treasury shares is that management may want to eliminate hostile shareholders by buying them out.

Many corporations have treasury stock. For example, approximately 65% of U.S. companies have treasury stock. In a recent year, **Nike** purchased more than 6 million treasury shares.

Purchase of Treasury Stock

Companies generally account for treasury stock by the **cost method**. This method uses the cost of the shares purchased to value the treasury stock. Under the cost method, the company debits **Treasury Stock** for the **price paid to reacquire the shares**. When the company disposes of the shares, it credits to **Treasury Stock** **the same amount** it paid to reacquire the shares.

To illustrate, assume that on January 1, 2020, the stockholders' equity section of Mead, Inc. has 400,000 shares authorized and 100,000 shares of \$5 par value common stock outstanding (all issued at par value) and Retained Earnings of \$200,000. The stockholders' equity section before purchase of treasury stock is shown in **Illustration 13.8**.

ILLUSTRATION 13.8

Stockholders' equity with no treasury stock

Mead, Inc. Balance Sheet (partial)		
Stockholders' equity		
Paid-in capital		
Common stock, \$5 par value, 400,000 shares authorized, 100,000 shares issued and outstanding	\$500,000	
Retained earnings	200,000	
Total stockholders' equity	<u>\$700,000</u>	

On February 1, 2020, Mead acquires 4,000 shares of its stock at \$8 per share. The entry is as follows.

A	=	L	+ SE
			-32,000 TS
<hr/>			
Cash Flows		-\$32,000	

Feb. 1	Treasury Stock	32,000	
	Cash	32,000	
	(To record purchase of 4,000 shares of treasury stock at \$8 per share)		

Mead debits **Treasury Stock** for the cost of the shares purchased (\$32,000). Is the original paid-in capital account, **Common Stock**, affected? No, because **the number of issued shares does not change**.

In the stockholders' equity section of the balance sheet, Mead deducts treasury stock from total paid-in capital and retained earnings. **Treasury Stock** is a **contra stockholders' equity account**. Thus, the acquisition of treasury stock reduces stockholders' equity. The stockholders' equity section of Mead, Inc. after purchase of treasury stock is shown in **Illustration 13.9**.

Mead, Inc. Balance Sheet (partial)	
Stockholders' equity	
Paid-in capital	
Common stock, \$5 par value, 400,000 shares authorized, 100,000 shares issued, and 96,000 shares outstanding	\$500,000
Retained earnings	200,000
Total paid-in capital and retained earnings	700,000
Less: Treasury stock (4,000 shares)	32,000
Total stockholders' equity	<u><u>\$668,000</u></u>

ILLUSTRATION 13.9
Stockholders' equity with treasury stock

Mead discloses in the balance sheet both the number of shares issued (100,000) and the number in the treasury (4,000). The difference is the number of shares of stock outstanding (96,000). The term **outstanding stock** means the number of shares of issued stock that are being held by stockholders.

Some maintain that companies should report treasury stock as an asset because it can be sold for cash. But under this reasoning, companies would also show unissued stock as an asset, which is clearly incorrect. Rather than being an asset, treasury stock reduces stockholder claims on corporate assets (see **Ethics Note**). This effect is correctly shown by reporting treasury stock as a deduction from total paid-in capital and retained earnings.

ETHICS NOTE

The purchase of treasury stock reduces the cushion for creditors. To protect creditors, many states require that a portion of retained earnings equal to the cost of the treasury stock purchased be restricted from being paid as dividends.

Disposal of Treasury Stock

Treasury stock is usually sold or retired. The accounting for its sale differs when treasury stock is sold above cost than when it is sold below cost (see **Helpful Hint**).

Sale of Treasury Stock Above Cost. If the selling price of the treasury shares is equal to their cost, the company records the sale of the shares by a debit to Cash and a credit to Treasury Stock. When the selling price of the shares is greater than their cost, the company credits the difference to Paid-in Capital from Treasury Stock.

To illustrate, assume that on July 1, Mead, Inc. sells for \$10 per share 1,000 of the 4,000 shares of its treasury stock previously acquired at \$8 per share. The entry is as follows.

July 1	Cash	10,000	
	Treasury Stock		8,000
	Paid-in Capital from Treasury Stock		2,000
	(To record sale of 1,000 shares of treasury stock above cost)		

HELPFUL HINT

Treasury stock transactions are classified as capital stock transactions. As in the case when stock is issued, the income statement is not involved.

A	=	L	+	SE
+10,000				+8,000 TS
				+2,000 TS

Cash Flows
+10,000 

Mead does not record a \$2,000 gain on sale of treasury stock for two reasons. (1) Gains on sales occur when **assets** are sold, and treasury stock is not an asset. (2) A corporation does not realize a gain or suffer a loss from stock transactions with its own stockholders. Thus, companies should **not** include in net income any paid-in capital arising from the sale of treasury stock. Instead, they report Paid-in Capital from Treasury Stock separately on the balance sheet, as a part of paid-in capital.

Sale of Treasury Stock Below Cost. When a company sells treasury stock below its cost, it usually debits to Paid-in Capital from Treasury Stock the excess of cost over selling price. Thus, if Mead, Inc. sells an additional 800 shares of treasury stock on October 1 at \$7 per share, it makes the following entry.

Oct. 1	Cash (800 × \$7)	5,600	
	Paid-in Capital from Treasury Stock	800	
	Treasury Stock		6,400
	(To record sale of 800 shares of treasury stock below cost)		

A	=	L	+	SE
+5,600				-800 TS
				+6,400 TS

Cash Flows
+5,600 

Observe the following from the two sales entries. (1) Mead credits Treasury Stock at cost in each entry. (2) Mead uses Paid-in Capital from Treasury Stock for the difference between cost and the resale price of the shares. (3) The original paid-in capital account, Common Stock, is not affected. **The sale of treasury stock increases both total assets and total stockholders' equity.**

After posting the foregoing entries, the treasury stock accounts will have the balances shown in **Illustration 13.10** on October 1.

Accounting Across the Organization Reebok

Han Myung-Gu/WireImage/Getty Images, Inc

A Bold Repurchase Strategy

In a bold (and some would say risky) move, **Reebok** at one time bought back nearly a third of its shares. This repurchase of shares dramatically reduced Reebok's available cash. In fact, the company borrowed significant funds to accomplish the repurchase. In a press release, management stated that it was repurchasing the shares because it believed its stock was severely underpriced. The repurchase of so many shares was meant to signal management's belief in good future earnings.

Skeptics, however, suggested that Reebok's management was repurchasing shares to make it less likely that another company would acquire Reebok (in which case Reebok's top managers would likely lose their jobs). By depleting its cash, Reebok became a less attractive acquisition target. Acquiring companies like to purchase companies with large cash balances so they can pay off debt used in the acquisition.

What signal might a large stock repurchase send to investors regarding management's belief about the company's growth opportunities? (Go to WileyPLUS for this answer and additional questions.)

DO IT! 2b | Treasury Stock

Santa Anita Inc. purchases 3,000 shares of its \$50 par value common stock for \$180,000 cash on July 1. It will hold the shares in the treasury until resold. On November 1, the corporation sells 1,000 shares of treasury stock for cash at \$70 per share. Journalize the treasury stock transactions.

ACTION PLAN

- Record the purchase of treasury stock at cost.

Solution

July 1	Treasury Stock Cash (To record the purchase of 3,000 shares at \$60 per share)	180,000	180,000
Nov. 1	Cash Treasury Stock Paid-in Capital from Treasury Stock (To record the sale of 1,000 shares at \$70 per share)	70,000	60,000 10,000

- When treasury stock is sold above its cost, credit the excess of the selling price over cost to Paid-in Capital from Treasury Stock.
- When treasury stock is sold below its cost, debit the excess of cost over selling price to Paid-in Capital from Treasury Stock.

Statement Presentation of Stockholders' Equity

LEARNING OBJECTIVE 3

Prepare a stockholders' equity section.

In the stockholders' equity section of the balance sheet, companies report paid-in capital, retained earnings, accumulated other comprehensive income, and treasury stock. Within paid-in capital, two classifications are recognized:

- Capital stock**, which consists of preferred and common stock. Companies show preferred stock before common stock because of its preferential rights. They report information about the par value, shares authorized, shares issued, and shares outstanding for each class of stock.
- Additional paid-in capital**, which includes the excess of amounts paid in over par or stated value.

As discussed in Chapter 5, in some instances unrealized gains and losses are not included in net income. Instead, these excluded items, referred to as other comprehensive income items, are reported as part of a more inclusive earnings measure called comprehensive income. Examples of other comprehensive income items include certain adjustments to pension plan assets, types of foreign currency gains and losses, and some gains and losses on investments. The items reported as other comprehensive income are closed each year to the **Accumulated Other Comprehensive Income** account. Thus, this account includes the cumulative amount of all previous items reported as other comprehensive income. This account can have either a debit or credit balance depending on whether or not accumulated gains exceed accumulated losses over the years. If accumulated losses exceed gains, then the company reports accumulated other comprehensive loss.

Illustration 13.11 presents the stockholders' equity section of the balance sheet of Gruber Inc. (see **International Note**). The stockholders' equity section for Gruber Inc. includes most of the accounts discussed in this chapter. The disclosures pertaining to Gruber's common stock indicate that 400,000 shares are issued, 100,000 shares are unissued (500,000 authorized less 400,000 issued), and 390,000 shares are outstanding (400,000 issued less 10,000 shares in treasury).

INTERNATIONAL NOTE

Like GAAP, under IFRS companies typically disclose separate categories of capital on the balance sheet. However, because of varying accounting treatments of certain transactions (such as treasury stock or asset revaluations), some categories used under IFRS vary from those under GAAP.

ILLUSTRATION 13.11

Stockholders' equity section of balance sheet

Graber Inc. Balance Sheet (partial)	
Stockholders' equity	
Paid-in capital	
Capital stock	
9% preferred stock, \$100 par value, cumulative, 10,000 shares authorized, 6,000 shares issued and outstanding	\$ 600,000
Common stock, no par, \$5 stated value, 500,000 shares authorized, 400,000 shares issued, and 390,000 outstanding	2,000,000
Total capital stock	<u>2,600,000</u>
Additional paid-in capital	
In excess of par—preferred stock	30,000
In excess of stated value—common stock	1,050,000
Total additional paid-in capital	<u>1,080,000</u>
Total paid-in capital	3,680,000
Retained earnings	1,050,000
Total paid-in capital and retained earnings	4,730,000
Accumulated other comprehensive income	110,000
Less: Treasury stock (10,000 common shares)	80,000
Total stockholders' equity	<u><u>\$4,760,000</u></u>

DO IT! 3 | Reporting Stockholders' Equity

Jennifer Corporation has issued 300,000 shares of \$3 par value common stock. It is authorized to issue 600,000 shares. The paid-in capital in excess of par value on the common stock is \$380,000. The corporation has reacquired 15,000 shares at a cost of \$50,000 and is currently holding those shares. It also had a cumulative other comprehensive loss of \$82,000.

The corporation also has 4,000 shares issued and outstanding of 8%, \$100 par value preferred stock. It is authorized to issue 10,000 shares. The paid-in capital in excess of par value on the preferred stock is \$97,000. Retained earnings is \$610,000.

Prepare the stockholders' equity section of the balance sheet.

Solution**ACTION PLAN**

- Present capital stock first; list preferred stock before common stock.
- Present additional paid-in capital after capital stock.
- Report retained earnings after capital stock and additional paid-in capital.
- Deduct treasury stock from total paid-in capital and retained earnings.

Jennifer Corporation
Balance Sheet (partial)

Stockholders' equity	
Paid-in capital	
Capital stock	
8% preferred stock, \$100 par value, 10,000 shares authorized, 4,000 shares issued and outstanding	\$400,000
Common stock, \$3 par value, 600,000 shares authorized, 300,000 shares issued, and 285,000 shares outstanding	<u>900,000</u>
Total capital stock	\$1,300,000
Additional paid-in capital	
In excess of par—preferred stock	97,000
In excess of par value—common stock	<u>380,000</u>
Total additional paid-in capital	<u>477,000</u>
Total paid-in capital	1,777,000

Retained earnings	610,000
Total paid-in capital and retained earnings	2,387,000
Accumulated other comprehensive loss	82,000
Less: Treasury stock (15,000 common shares) (at cost)	50,000
Total stockholders' equity	<u><u>\$2,255,000</u></u>

Review and Practice

Learning Objectives Review

1 Discuss the major characteristics of a corporation.

The major characteristics of a corporation are separate legal existence, limited liability of stockholders, transferable ownership rights, ability to acquire capital, continuous life, corporation management, government regulations, and additional taxes.

Paid-in capital is the total amount paid in on capital stock. It is often called contributed capital. Retained earnings is net income retained in a corporation. It is often called earned capital.

2 Explain how to account for common, preferred, and treasury stock.

Common Stock. When companies record the issuance of common stock for cash, they credit the par value of the shares to Common Stock. They record in a separate paid-in capital account the portion of the proceeds that is above or below par value. When no-par common stock has a stated value, the entries are similar to those for par value stock. When no-par stock does not have a stated value, companies credit the entire proceeds to Common Stock.

Preferred Stock. Preferred stock has contractual provisions that give it priority over common stock in certain areas. Typically, preferred stockholders have preferences (1) to dividends and (2) to assets in liquidation. They usually do not have voting rights.

Treasury Stock. The cost method is generally used in accounting for treasury stock. Under this approach, companies debit Treasury Stock at the price paid to reacquire the shares. They credit the same amount to Treasury Stock when they sell the shares. The difference between the sales price and cost is recorded in stockholders' equity accounts, not in income statement accounts.

3 Prepare a stockholders' equity section.

In the stockholders' equity section, companies report paid-in capital and retained earnings and identify specific sources of paid-in capital. Within paid-in capital, two classifications are shown: capital stock and additional paid-in capital. If a corporation has treasury stock, it deducts the cost of treasury stock from total paid-in capital and retained earnings to obtain total stockholders' equity.

Glossary Review

Accumulated Other Comprehensive Income This account includes the cumulative amount of all previous items reported as other comprehensive income. (p. 13-17).

Authorized stock The amount of stock that a corporation is authorized to sell as indicated in its charter. (p. 13-7).

Charter A document that is issued by the state to set forth important terms and features regarding the creation of a corporation. (p. 13-5).

Corporation A business organized as a legal entity separate and distinct from its owners under state corporation law. (p. 13-2).

No-par value stock Capital stock that has not been assigned a value in the corporate charter. (p. 13-8).

Organization costs Costs incurred in the formation of a corporation. (p. 13-6).

Outstanding stock Capital stock that has been issued and is being held by stockholders. (p. 13-15).

Paid-in capital Total amount of cash and other assets paid in to the corporation by stockholders in exchange for capital stock. (p. 13-9).

Par value stock Capital stock that has been assigned a value per share in the corporate charter. (p. 13-8).

Preferred stock Capital stock that has some preferences over common stock. (p. 13-12).

Privately held corporation A corporation that has only a few stockholders and whose stock is not available for sale to the general public. (p. 13-3).

Publicly held corporation A corporation that may have thousands of stockholders and whose stock is regularly traded on a national securities exchange. (p. 13-3).

Retained earnings Net income that the corporation retains for future use. (p. 13-9).

Stated value The amount per share assigned by the board of directors to no-par value stock. (p. 13-8).

Treasury stock A corporation's own stock that has been issued and subsequently reacquired from shareholders by the corporation but not retired. (p. 13-14).

Practice Multiple-Choice Questions

1. **(LO 1)** Which of the following is **not** a major advantage of a corporate form of organization?
 - a. Separate legal existence.
 - b. Continuous life.
 - c. Government regulations.
 - d. Transferable ownership rights.
2. **(LO 1)** A major **disadvantage** of a corporation is:
 - a. limited liability of stockholders.
 - b. additional taxes.
 - c. transferable ownership rights.
 - d. separate legal existence.
3. **(LO 1)** Costs incurred in the formation of a corporation:
 - a. do not include legal fees.
 - b. are expensed as incurred.
 - c. are recorded as an asset.
 - d. provide future benefits whose amounts and timing are easily determined.
4. **(LO 1)** Which of the following statements is **false**?
 - a. Ownership of common stock gives the owner a voting right.
 - b. The stockholders' equity section begins with paid-in capital.
 - c. The authorization of capital stock does not result in a formal accounting entry.
 - d. Legal capital per share applies to par value stock but not to no-par value stock.
5. **(LO 1)** Total stockholders' equity (in the absence of treasury stock) equals:
 - a. Total paid-in capital + Retained earnings.
 - b. Paid-in capital + Capital stock + Retained earnings.
 - c. Capital stock + Additional paid-in capital – Retained earnings.
 - d. Common stock + Retained earnings.
6. **(LO 1)** The account Retained Earnings is:
 - a. a subdivision of paid-in capital.
 - b. net income retained in the corporation.
 - c. reported as an expense in the income statement.
 - d. closed to capital stock.
7. **(LO 2)** A-Team Corporation issued 1,000 shares of \$5 par value stock for land. The stock is actively traded at \$9 per share. The land was advertised for sale at \$10,500. The land should be recorded at:
 - a. \$4,000.
 - b. \$5,000.
 - c. \$9,000.
 - d. \$10,500.
8. **(LO 2)** ABC Corporation issues 1,000 shares of \$10 par value common stock at \$13 per share. In recording the transaction, credits are made to:
 - a. Common Stock \$10,000 and Paid-in Capital in Excess of Stated Value \$3,000.
 - b. Common Stock \$13,000.
 - c. Common Stock \$10,000 and Paid-in Capital in Excess of Par \$3,000.
 - d. Common Stock \$10,000 and Retained Earnings \$3,000.
9. **(LO 2)** Lucroy Corporation issues 100 shares of \$10 par value preferred stock at \$12 per share. In recording the transaction, credits are made to:
 - a. Preferred Stock \$1,200.
 - b. Preferred Stock \$1,000 and Retained Earnings \$200.
 - c. Preferred Stock \$1,000 and Paid-in Capital in Excess of Preferred Value \$200.
 - d. Preferred Stock \$1,000 and Paid-in Capital in Excess of Par—Preferred Stock \$200.
10. **(LO 2)** Treasury stock may be repurchased:
 - a. to reissue the shares to officers and employees under bonus and stock compensation plans.
 - b. to signal to the stock market that management believes the stock is underpriced.
 - c. to have additional shares available for use in the acquisition of other companies.
 - d. More than one of the above.
11. **(LO 2)** XYZ, Inc. sells 100 shares of \$5 par value treasury stock at \$13 per share. If the cost of acquiring the shares was \$10 per share, the entry for the sale should include credits to:
 - a. Treasury Stock \$1,000 and Paid-in Capital from Treasury Stock \$300.
 - b. Treasury Stock \$500 and Paid-in Capital from Treasury Stock \$800.
 - c. Treasury Stock \$1,000 and Retained Earnings \$300.
 - d. Treasury Stock \$500 and Paid-in Capital in Excess of Par \$800.
12. **(LO 2, 3)** In the stockholders' equity section, the cost of treasury stock is deducted from:
 - a. total paid-in capital and retained earnings.
 - b. retained earnings.
 - c. total stockholders' equity.
 - d. common stock in paid-in capital.
13. **(LO 3)** Which of the following is **not** reported under additional paid-in capital?
 - a. Paid-in capital in excess of par.
 - b. Common stock.
 - c. Paid-in capital in excess of stated value.
 - d. Paid-in capital from treasury stock.
14. **(LO 3)** In the stockholders' equity section of the balance sheet, common stock:
 - a. is listed before preferred stock.
 - b. is added to total capital stock.
 - c. is part of paid-in capital.
 - d. is part of additional paid-in capital.

Solutions

1. c. Government regulations are a disadvantage of a corporation. The other choices are advantages of a corporation.

2. b. Additional taxes are a disadvantage of a corporation. The other choices are advantages of a corporation.

3. b. Costs incurred in the formation of a corporation are expensed as incurred. The other choices are incorrect because costs incurred in the formation of a corporation (a) do include legal fees; (c) are recorded as an expense, not an asset; and (d) provide future benefits whose amounts and timing are difficult to determine. As a result, these costs are immediately expensed.

4. d. Legal capital per share applies to both par value stock and no-par value stock. Many states no longer require a par value and therefore use other means to determine legal capital. The other choices are true statements.

5. a. Total stockholders' equity = Total paid-in capital + Retained earnings. The other choices are incorrect because (b) capital stock and (d) common stock are included under paid-in capital. Choice (c) is incorrect because retained earnings is generally not subtracted in arriving at total stockholders' equity.

6. b. Retained Earnings is net income retained in the corporation. The other choices are incorrect because the Retained Earnings account (a) is earned capital, not paid-in capital; (c) is reported in the statement of retained earnings and on the balance sheet, but not on the income statement; and (d) is a permanent or real account and is never closed.

7. c. Cost is either the fair value of the consideration given up or the fair value of the consideration received, whichever is more clearly determinable. The most clearly determinable value in this noncash transaction is the fair value of the consideration given up of \$9,000 (\$9 per share × 1,000). The other choices are therefore incorrect.

8. c. Common Stock should be credited for \$10,000 and Paid-in Capital in Excess of Par should be credited for \$3,000. The stock is par value stock, not stated value stock, and this excess is contributed, not earned, capital. The other choices are therefore incorrect.

9. d. Preferred Stock should be credited for \$1,000 and Paid-In Capital in Excess of Par—Preferred Stock should be credited for \$200. The other choices are incorrect because (a) a total credit for the entire proceeds to Preferred Stock is incorrect because Preferred Stock has a total par value that is different than total proceeds; (b) this is contributed capital, not earned capital, so a credit to Retained Earnings is not correct; and (c) the account Paid-in Capital in Excess of Preferred Value is not an appropriate account title.

10. d. Corporations repurchase treasury stock to have additional shares available for use in acquisition, to reissue shares under bonus and stock compensation plans, and to signal to the stock market that management believes the stock is underpriced. Although the other choices are true statements, choice (d) is the better answer.

11. a. Treasury Stock should be credited for \$1,000 (100 shares × \$10, the acquisition price). Paid-in Capital from Treasury Stock should be credited for the difference between the \$1,000 and the cash received of \$1,300 (100 shares × \$13), or \$300. The other choices are therefore incorrect.

12. a. The cost of treasury stock is deducted from total paid-in capital and retained earnings. The other choices are therefore incorrect.

13. b. Common stock is reported in the capital stock section of paid-in capital, not in the additional paid-in capital section. The other choices are true statements.

14. c. Common stock is part of paid-in capital. The other choices are incorrect because common stock (a) is listed after preferred stock, (b) is not added to total capital stock but is part of capital stock, and (d) is part of capital stock, not additional paid-in capital.

Practice Brief Exercises

1. (LO 2) On April 10, Leury Corporation issues 3,000 shares of \$5 par value common stock for cash at \$14 per share. Journalize the issuance of the stock. *Prepare entries for issuance of par value common stock.*

Solution

1. April 10	Cash (3,000 × \$14)	42,000	
	Common Stock (3,000 × \$5)		15,000
	Paid-in Capital in Excess of Par—Common Stock (3,000 × \$9)		27,000

2. (LO 2) On June 1, Omar Corporation purchases 600 shares of its \$5 par value common stock for the treasury at a cash price of \$10 per share. On August 15, it sells 400 shares of the treasury stock for cash at \$13 per share. Journalize the two treasury stock transactions. *Prepare entries for treasury stock transactions.*

Solution

2. June 1	Treasury Stock (600 × \$10)	6,000	
	Cash		6,000
Aug. 15	Cash (400 × \$13)	5,200	
	Treasury Stock (400 × \$10)		4,000
	Paid-in Capital from Treasury Stock (400 × \$3)		1,200

3. (LO 3) Financial Statement Navarez Corporation has the following accounts at December 31: Common Stock, \$2 par, 50,000 shares issued, \$100,000; Paid-in Capital in Excess of Par—Common Stock \$40,000; Retained Earnings \$65,000; and Treasury Stock, 2,000 shares, \$17,000. Prepare the stockholders' equity section of the balance sheet. *Prepare stockholders' equity section.*

Solution**3. Stockholders' equity**

Paid-in capital

Common stock, \$2 par value, 50,000 shares issued, and 48,000 shares outstanding	\$100,000
In excess of par—common stock	40,000
Total paid-in capital	140,000
Retained earnings	65,000
Total paid-in capital and retained earnings	205,000
Less: Treasury stock (2,000 common shares)	17,000
Total stockholders' equity	<u><u>\$188,000</u></u>

Practice Exercises

Journalize issuance of common and preferred stock and purchase of treasury stock.

1. (LO 2) Bostick Co. had the following transactions during the current period.

- Mar. 2 Issued 4,000 shares of \$1 par value common stock to attorneys in payment of a bill for \$35,000 for services performed in helping the company to incorporate.
- June 12 Issued 50,000 shares of \$1 par value common stock for cash of \$360,000.
- July 11 Issued 2,000 shares of \$100 par value preferred stock for cash at \$120 per share.
- Nov. 28 Purchased 2,000 shares of treasury stock for \$70,000.

Instructions

Journalize the transactions.

Solution

1. Mar. 2	Organization Expense Common Stock (4,000 × \$1) Paid-in Capital in Excess of Par— Common Stock	35,000	4,000
		31,000	
June 12	Cash Common Stock (50,000 × \$1) Paid-in Capital in Excess of Par— Common Stock	360,000	50,000
		310,000	
July 11	Cash (2,000 × \$120) Preferred Stock (2,000 × \$100) Paid-in Capital in Excess of Par— Preferred Stock (2,000 × \$20)	240,000	200,000
		40,000	
Nov. 28	Treasury Stock Cash	70,000	70,000

Journalize treasury stock transactions.

2. (LO 2) Star Corporation purchased from its stockholders 5,000 shares of its own previously issued stock for \$250,000. It later resold 2,000 shares for \$53 per share, then 2,000 more shares for \$48 per share, and finally 1,000 shares for \$43 per share.**Instructions**

Prepare journal entries for the purchase of the treasury stock and the three sales of treasury stock.

Solution

2. Treasury Stock Cash	250,000	250,000
Cash (2,000 × \$53)	106,000	
Treasury Stock (2,000 × \$50)		100,000
Paid-in Capital from Treasury Stock		6,000
Cash (2,000 × \$48)	96,000	
Paid-in Capital from Treasury Stock		4,000
Treasury Stock (2,000 × \$50)		100,000

Cash ($1,000 \times \$43$)		43,000	
Paid-in Capital from Treasury Stock (\$6,000 – \$4,000)		2,000	
Retained Earnings		5,000	
Treasury Stock ($1,000 \times \$50$)			50,000

Practice Problem

(LO 2, 3) Financial Statement Rolman Corporation is authorized to issue 1,000,000 shares of \$5 par value common stock. In its first year, the company has the following stock transactions.

Journalize transactions and prepare stockholders' equity section.

- Jan. 10 Issued 400,000 shares of stock at \$8 per share.
 July 1 Issued 100,000 shares of stock for land. The land had an asking price of \$900,000. The stock is currently selling on a national exchange at \$8.25 per share.
 Sept. 1 Purchased 10,000 shares of common stock for the treasury at \$9 per share.
 Dec. 1 Sold 4,000 shares of the treasury stock at \$10 per share.

Instructions

- Journalize the transactions.
- Prepare the stockholders' equity section assuming the company had retained earnings of \$200,000 at December 31 and an accumulated other comprehensive income of \$105,000.

Solution

a. Jan. 10	Cash	3,200,000	
	Common Stock		2,000,000
	Paid-in Capital in Excess of Par—Common Stock (To record issuance of 400,000 shares of \$5 par value stock)		1,200,000
July 1	Land	825,000	
	Common Stock		500,000
	Paid-in Capital in Excess of Par—Common Stock (To record issuance of 100,000 shares of \$5 par value stock for land)		325,000
Sept. 1	Treasury Stock	90,000	
	Cash		90,000
	(To record purchase of 10,000 shares of treasury stock at cost)		
Dec. 1	Cash	40,000	
	Treasury Stock		36,000
	Paid-in Capital from Treasury Stock (To record sale of 4,000 shares of treasury stock above cost)		4,000

b.

Rolman Corporation Balance Sheet (partial)

Stockholders' equity	
Paid-in capital	
Capital stock	
Common stock, \$5 par value, 1,000,000 shares authorized, 500,000 shares issued, 494,000 shares outstanding	\$2,500,000
Additional paid-in capital	
In excess of par—common stock	\$1,525,000
From treasury stock	4,000
Total additional paid-in capital	1,529,000
Total paid-in capital	4,029,000
Retained earnings	200,000
Total paid-in capital and retained earnings	4,229,000
Accumulated other comprehensive income	105,000
Less: Treasury stock (6,000 shares)	54,000
Total stockholders' equity	\$4,280,000

Questions

1. Mark Kemp, a student, asks your help in understanding the following characteristics of a corporation: (a) separate legal existence, (b) limited liability of stockholders, and (c) transferable ownership rights. Explain these characteristics to Mark.
2. a. Your friend Katie Fehr cannot understand how the characteristic of corporation management is both an advantage and a disadvantage. Clarify this problem for Katie.
b. Identify and explain two other disadvantages of a corporation.
3. a. The following terms pertain to the forming of a corporation: (1) charter, (2) by-laws, and (3) organization costs. Explain the terms.
b. Donna Fleming believes a corporation must be incorporated in the state in which its headquarters' office is located. Is Donna correct? Explain.
4. What are the basic ownership rights of common stockholders in the absence of restrictive provisions?
5. a. What are the two principal components of stockholders' equity?
b. What is paid-in capital? Give three examples.
6. How does the balance sheet for a corporation differ from the balance sheet for a proprietorship?
7. The corporate charter of Luney Corporation allows the issuance of a maximum of 100,000 shares of common stock. During its first two years of operations, Luney sold 70,000 shares to shareholders and reacquired 7,000 of these shares. After these transactions, how many shares are authorized, issued, and outstanding?
8. Which is the better investment—common stock with a par value of \$5 per share, or common stock with a par value of \$20 per share? Why?
9. What factors help determine the market price of stock?
10. What effect does the issuance of stock at a price above par value have on the issuer's net income? Explain.
11. Why is common stock usually not issued at a price that is less than par value?
12. Land appraised at \$80,000 is purchased by issuing 1,000 shares of \$20 par value common stock. The market price of the shares at the time of the exchange, based on active trading in the securities market, is \$95 per share. Should the land be recorded at \$20,000, \$80,000, or \$95,000? Explain.
13. For what reasons might a company like **IBM** repurchase some of its stock (treasury stock)?
14. Meng, Inc. purchases 1,000 shares of its own previously issued \$5 par common stock for \$12,000. Assuming the shares are held in the treasury, what effect does this transaction have on (a) net income, (b) total assets, (c) total paid-in capital, and (d) total stockholders' equity?
15. The treasury stock purchased in Question 14 is resold by Meng, Inc. for \$16,000. What effect does this transaction have on (a) net income, (b) total assets, (c) total paid-in capital, and (d) total stockholders' equity?
16. Diaz Inc.'s common stock has a par value of \$1 and a current market price of \$15. Explain why these amounts are different.
17. Indicate how each of the following accounts should be classified in the stockholders' equity section.
 - a. Common stock.
 - b. Paid-in capital in excess of par—common stock.
 - c. Retained earnings.
 - d. Treasury stock.
 - e. Paid-in capital from treasury stock.
 - f. Paid-in capital in excess of stated value—common stock.
 - g. Preferred stock.
 - h. Accumulated other comprehensive income.
18. How many shares of common stock did **Apple** have outstanding at September 26, 2015, and at September 27, 2014?

Brief Exercises

List the advantages and disadvantages of a corporation.

Prepare closing entries.

Prepare entries for issuance of par value common stock.

Prepare entries for issuance of no-par value common stock.

BE13.1 (LO 1) Angie Baden is studying for her accounting midterm examination. Identify for Angie the advantages and disadvantages of the corporate form of business organization.

BE13.2 (LO 1) At December 31, Ortiz Corporation reports net income of \$480,000. Prepare the entry to close net income.

BE13.3 (LO 2) On May 10, Jack Corporation issues 2,000 shares of \$10 par value common stock for cash at \$18 per share. Journalize the issuance of the stock.

BE13.4 (LO 2) On June 1, Noonan Inc. issues 4,000 shares of no-par common stock at a cash price of \$6 per share. Journalize the issuance of the shares assuming the stock has a stated value of \$1 per share.

BE13.5 (LO 2) Lei Inc.'s \$10 par value common stock is actively traded at a market price of \$15 per share. Lei issues 5,000 shares to purchase land advertised for sale at \$85,000. Journalize the issuance of the stock in acquiring the land.

Prepare entries for issuance of stock in a noncash transaction.

BE13.6 (LO 2) Garb Inc. issues 5,000 shares of \$100 par value preferred stock for cash at \$130 per share. Journalize the issuance of the preferred stock.

Prepare entries for issuance of preferred stock.

BE13.7 (LO 2) On July 1, Raney Corporation purchases 500 shares of its \$5 par value common stock for the treasury at a cash price of \$9 per share. On September 1, it sells 300 shares of the treasury stock for cash at \$11 per share. Journalize the two treasury stock transactions.

Prepare entries for treasury stock transactions.

BE13.8 (LO 3) Financial Statement Pine Corporation has the following accounts at December 31: Common Stock, \$10 par, 5,000 shares issued, \$50,000; Paid-in Capital in Excess of Par—Common Stock \$30,000; Retained Earnings \$45,000; and Treasury Stock, 500 shares, \$11,000. Prepare the stockholders' equity section of the balance sheet.

Prepare stockholders' equity section.

DO IT! Exercises

DO IT! 13.1a (LO 1) Indicate whether each of the following statements is true or false. If false, indicate how to correct the statements.

Analyze statements about corporate organization.

1. The corporation is an entity separate and distinct from its owners.
2. The liability of stockholders is normally limited to their investment in the corporation.
3. The relative lack of government regulation is an advantage of the corporate form of business.
4. There is no journal entry to record the authorization of capital stock.
5. No-par value stock is quite rare today.

DO IT! 13.1b (LO 1) Financial Statement At the end of its first year of operation, Goss Corporation has \$1,000,000 of common stock and net income of \$236,000. Prepare (a) the closing entry for net income and (b) the stockholders' equity section at year-end.

Close net income and prepare stockholders' equity section.

DO IT! 13.2a (LO 2) Beauty Island Corporation began operations on April 1 by issuing 60,000 shares of \$5 par value common stock for cash at \$13 per share. On April 19, it issued 2,000 shares of common stock to attorneys in settlement of their bill of \$27,500 for organization costs. In addition, Beauty Island issued 1,000 shares of \$1 par value preferred stock for \$6 cash per share. Journalize the issuance of the common and preferred shares, assuming the shares are not publicly traded.

Journalize issuance of stock.

DO IT! 13.2b (LO 2) Fouts Corporation purchased 2,000 shares of its \$10 par value common stock for \$130,000 on August 1. It will hold these shares in the treasury until resold. On December 1, the corporation sold 1,200 shares of treasury stock for cash at \$72 per share. Journalize the treasury stock transactions.

Journalize treasury stock transactions.

DO IT! 13.3 (LO 3) Financial Statement Hoyle Corporation has issued 100,000 shares of \$5 par value common stock. It authorized 500,000 shares. The paid-in capital in excess of par on the common stock is \$263,000. The corporation has reacquired 7,000 shares at a cost of \$46,000 and is currently holding those shares. It also had accumulated other comprehensive income of \$67,000.

Prepare stockholders' equity section.

The corporation also has 2,000 shares issued and outstanding of 9%, \$100 par value preferred stock. It authorized 10,000 shares. The paid-in capital in excess of par on the preferred stock is \$23,000. Retained earnings is \$372,000.

Prepare the stockholders' equity section of the balance sheet.

Exercises

E13.1 (LO 1) Andrea has prepared the following list of statements about corporations.

Identify characteristics of a corporation.

1. A corporation is an entity separate and distinct from its owners.
2. As a legal entity, a corporation has most of the rights and privileges of a person.
3. Most of the largest U.S. corporations are privately held corporations.
4. Corporations may buy, own, and sell property; borrow money; enter into legally binding contracts; and sue and be sued.

5. The net income of a corporation is not taxed as a separate entity.
6. Creditors have a legal claim on the personal assets of the owners of a corporation if the corporation does not pay its debts.
7. The transfer of stock from one owner to another requires the approval of either the corporation or other stockholders.
8. The board of directors of a corporation legally owns the corporation.
9. The chief accounting officer of a corporation is the controller.
10. Corporations are subject to fewer state and federal regulations than partnerships or proprietorships.

Instructions

Identify each statement as true or false. If false, indicate how to correct the statement.

Identify characteristics of a corporation.

E13.2 (LO 1) Andrea (see E13.1) has studied the information you gave her in that exercise and has come to you with more statements about corporations.

1. Corporation management is both an advantage and a disadvantage of a corporation compared to a proprietorship or a partnership.
2. Limited liability of stockholders, government regulations, and additional taxes are the major disadvantages of a corporation.
3. When a corporation is formed, organization costs are recorded as an asset.
4. Each share of common stock gives the stockholder the ownership rights to vote at stockholder meetings, share in corporate earnings, keep the same percentage ownership when new shares of stock are issued, and share in assets upon liquidation.
5. The number of issued shares is always greater than or equal to the number of authorized shares.
6. A journal entry is required for the authorization of capital stock.
7. Publicly held corporations usually issue stock directly to investors.
8. The trading of capital stock on a securities exchange involves the transfer of already issued shares from an existing stockholder to another investor.
9. The market price of common stock is usually the same as its par value.
10. Retained earnings is the total amount of cash and other assets paid in to the corporation by stockholders in exchange for capital stock.

Instructions

Identify each statement as true or false. If false, indicate how to correct the statement.

Journalize issuance of common stock.

E13.3 (LO 2) During its first year of operations, Foyle Corporation had the following transactions pertaining to its common stock.

- Jan. 10 Issued 70,000 shares for cash at \$5 per share.
 July 1 Issued 40,000 shares for cash at \$7 per share.

Instructions

- a. Journalize the transactions, assuming that the common stock has a par value of \$5 per share.
- b. Journalize the transactions, assuming that the common stock is no-par with a stated value of \$1 per share.

Journalize issuance of common stock.

E13.4 (LO 2) Osage Corporation issued 2,000 shares of stock.

Instructions

Prepare the entry for the issuance under the following assumptions.

- a. The stock had a par value of \$5 per share and was issued for a total of \$52,000.
- b. The stock had a stated value of \$5 per share and was issued for a total of \$52,000.
- c. The stock had no par or stated value and was issued for a total of \$52,000.
- d. The stock had a par value of \$5 per share and was issued to attorneys for services during incorporation valued at \$52,000.
- e. The stock had a par value of \$5 per share and was issued for land worth \$52,000.

E13.5 (LO 2) Quay Co. had the following transactions during the current period.

- Mar. 2 Issued 5,000 shares of \$5 par value common stock to attorneys in payment of a bill for \$30,000 for services performed in helping the company to incorporate.
- June 12 Issued 60,000 shares of \$5 par value common stock for cash of \$375,000.
- July 11 Issued 1,000 shares of \$100 par value preferred stock for cash at \$110 per share.
- Nov. 28 Purchased 2,000 shares of treasury stock for \$80,000.

Journalize issuance of common and preferred stock and purchase of treasury stock.

Instructions

Journalize the transactions.

E13.6 (LO 2) As an auditor for the CPA firm of Hinkson and Calvert, you encounter the following situations in auditing different clients.

1. LR Corporation is a closely held corporation whose stock is not publicly traded. On December 5, the corporation acquired land by issuing 5,000 shares of its \$20 par value common stock. The owners' asking price for the land was \$120,000, and the fair value of the land was \$110,000.
2. Vera Corporation is a publicly held corporation whose common stock is traded on the securities markets. On June 1, it acquired land by issuing 20,000 shares of its \$10 par value stock. At the time of the exchange, the land was advertised for sale at \$250,000. The stock was selling at \$11 per share.

Journalize noncash common stock transactions.

Instructions

Prepare the journal entries for each of the situations above.

E13.7 (LO 2) On January 1, 2020, the stockholders' equity section of Newlin Corporation shows common stock (\$5 par value) \$1,500,000; paid-in capital in excess of par \$1,000,000; and retained earnings \$1,200,000. During the year, the following treasury stock transactions occurred.

- Mar. 1 Purchased 50,000 shares for cash at \$15 per share.
- July 1 Sold 10,000 treasury shares for cash at \$17 per share.
- Sept. 1 Sold 8,000 treasury shares for cash at \$14 per share.

Journalize treasury stock transactions.

Instructions

- a. Journalize the treasury stock transactions.
- b. Restate the entry for September 1, assuming the treasury shares were sold at \$12 per share.

E13.8 (LO 2) Rinehart Corporation purchased from its stockholders 5,000 shares of its own previously issued stock for \$255,000. It later resold 2,000 shares for \$54 per share, then 2,000 more shares for \$49 per share, and finally 1,000 shares for \$43 per share.

Journalize treasury stock transactions.

Instructions

Prepare journal entries for the purchase of the treasury stock and the three sales of treasury stock.

E13.9 (LO 2, 3) Financial Statement Tran Corporation is authorized to issue both preferred and common stock. The par value of the preferred is \$50. During the first year of operations, the company had the following events and transactions pertaining to its preferred stock.

Journalize preferred stock transactions and indicate statement presentation.

- Feb. 1 Issued 20,000 shares for cash at \$53 per share.
- July 1 Issued 12,000 shares for cash at \$57 per share.

Instructions

- a. Journalize the transactions.
- b. Post to the stockholders' equity accounts.
- c. Indicate the financial statement presentation of the related accounts.

E13.10 (LO 2) Gilliam Corporation recently hired a new accountant with extensive experience in accounting for partnerships. Because of the pressure of the new job, the accountant was unable to review his textbooks on the topic of corporation accounting. During the first month, the accountant made the following entries for the corporation's capital stock.

Prepare correct entries for capital stock transactions.

May 2	Cash	130,000	
	Capital Stock (Issued 10,000 shares of \$10 par value common stock at \$13 per share)		130,000
10	Cash	600,000	
	Capital Stock (Issued 10,000 shares of \$50 par value preferred stock at \$60 per share)		600,000
15	Capital Stock	15,000	
	Cash (Purchased 1,000 shares of common stock for the treasury at \$15 per share)		15,000
31	Cash	8,000	
	Capital Stock		5,000
	Gain on Sale of Stock		3,000
	(Sold 500 shares of treasury stock at \$16 per share)		

Instructions

On the basis of the explanation for each entry, prepare the entry that should have been made for the capital stock transactions.

Prepare a stockholders' equity section.

E13.11 (LO 3) Financial Statement The following stockholders' equity accounts, arranged alphabetically, are in the ledger of Eudaley Corporation at December 31, 2020.

Common Stock (\$5 stated value)	\$1,500,000
Paid-in Capital in Excess of Par—Preferred Stock	280,000
Paid-in Capital in Excess of Stated Value—Common Stock	900,000
Preferred Stock (8%, \$100 par)	500,000
Retained Earnings	1,234,000
Treasury Stock (10,000 common shares)	120,000

Instructions

Prepare the stockholders' equity section of the balance sheet at December 31, 2020.

Answer questions about stockholders' equity section.

E13.12 (LO 2, 3) Financial Statement Writing The stockholders' equity section of Haley Corporation at December 31 is as follows.

Haley Corporation Balance Sheet (partial)	
Paid-in capital	
Preferred stock, 10,000 shares authorized, 6,000 shares issued and outstanding	\$ 300,000
Common stock, no par, 750,000 shares authorized, 600,000 shares issued	1,200,000
Total paid-in capital	1,500,000
Retained earnings	<u>1,858,000</u>
Total paid-in capital and retained earnings	3,358,000
Less: Treasury stock (10,000 common shares)	<u>64,000</u>
Total stockholders' equity	<u>\$3,294,000</u>

Instructions

From a review of the stockholders' equity section, as chief accountant, write a memo to the president of the company answering the following questions.

- How many shares of common stock are outstanding?
- Assuming there is a stated value, what is the stated value of the common stock?
- What is the par value of the preferred stock?

E13.13 (LO 3) Financial Statement The stockholders' equity section of **Aluminum Company of America (Alcoa)** showed the following (in alphabetical order): additional paid-in capital \$6,101, common stock \$925, preferred stock \$56, retained earnings \$7,428, and treasury stock 2,828. All dollar data are in millions.

The preferred stock has 557,740 shares authorized, with a par value of \$100. At December 31 of the current year, 557,649 shares of preferred are issued and 546,024 shares are outstanding. There are 1.8 billion shares of \$1 par value common stock authorized, of which 924.6 million are issued and 844.8 million are outstanding at December 31.

Prepare a stockholders' equity section.

Instructions

Prepare the stockholders' equity section of the current year, including disclosure of all relevant data.

E13.14 (LO 3) Financial Statement The ledger of Rolling Hills Corporation contains the following accounts: Common Stock, Preferred Stock, Treasury Stock, Paid-in Capital in Excess of Par—Preferred Stock, Paid-in Capital in Excess of Stated Value—Common Stock, Paid-in Capital from Treasury Stock, and Retained Earnings.

Classify stockholders' equity accounts.

Instructions

Classify each account using the following table headings.

<u>Account</u>	<u>Paid-in Capital</u>			<u>Other</u>
	<u>Capital Stock</u>	<u>Additional</u>	<u>Retained Earnings</u>	

E13.15 (LO 3) Financial Statement The following accounts appear in the ledger of Horner Inc. after the books are closed at December 31, 2020.

Prepare a stockholder's equity section.

Common Stock, no par, \$1 stated value, 400,000 shares authorized;	
300,000 shares issued	\$ 300,000
Paid-in Capital in Excess of Stated Value—Common Stock	1,230,000
Preferred Stock, \$5 par value, 8%, 40,000 shares authorized;	
30,000 shares issued	150,000
Retained Earnings	800,000
Treasury Stock (10,000 common shares)	74,000
Paid-in Capital in Excess of Par—Preferred Stock	344,000
Accumulated Other Comprehensive Loss	31,000

Instructions

Prepare the stockholders' equity section at December 31, 2020.

Problems: Set A

P13.1A (LO 2, 3) Financial Statement DeLong Corporation was organized on January 1, 2020. It is authorized to issue 10,000 shares of 8%, \$100 par value preferred stock, and 500,000 shares of no-par common stock with a stated value of \$2 per share. The following stock transactions were completed during the first year.

Journalize stock transactions, post, and prepare paid-in capital section.

- Jan. 10 Issued 80,000 shares of common stock for cash at \$4 per share.
- Mar. 1 Issued 5,000 shares of preferred stock for cash at \$105 per share.
- Apr. 1 Issued 24,000 shares of common stock for land. The asking price of the land was \$90,000. The fair value of the land was \$85,000.
- May 1 Issued 80,000 shares of common stock for cash at \$4.50 per share.
- Aug. 1 Issued 10,000 shares of common stock to attorneys in payment of their bill of \$30,000 for services performed in helping the company organize.
- Sept. 1 Issued 10,000 shares of common stock for cash at \$5 per share.
- Nov. 1 Issued 1,000 shares of preferred stock for cash at \$109 per share.

Instructions

- c. Total paid-in capital
\$1,479,000

Journalize and post treasury stock transactions, and prepare stockholders' equity section.

P13.2A (LO 2, 3) Financial Statement Fechter Corporation had the following stockholders' equity accounts on January 1, 2020: Common Stock (\$5 par) \$500,000, Paid-in Capital in Excess of Par—Common Stock \$200,000, and Retained Earnings \$100,000. In 2020, the company had the following treasury stock transactions.

- Mar. 1 Purchased 5,000 shares at \$8 per share.
 June 1 Sold 1,000 shares at \$12 per share.
 Sept. 1 Sold 2,000 shares at \$10 per share.
 Dec. 1 Sold 1,000 shares at \$7 per share.

Fechter Corporation uses the cost method of accounting for treasury stock. In 2020, the company reported net income of \$30,000.

Instructions

- b. Treasury Stock \$8,000
 c. Total stockholders' equity
\$829,000

Journalize and post transactions, and prepare stockholders' equity section.

P13.3A (LO 1, 2, 3) Financial Statement The stockholders' equity accounts of Castle Corporation on January 1, 2020, were as follows.

Preferred Stock (8%, \$50 par, 10,000 shares authorized)	\$ 400,000
Common Stock (\$1 stated value, 2,000,000 shares authorized)	1,000,000
Paid-in Capital in Excess of Par—Preferred Stock	100,000
Paid-in Capital in Excess of Stated Value—Common Stock	1,450,000
Retained Earnings	1,816,000
Treasury Stock (10,000 common shares)	50,000

During 2020, the corporation had the following transactions and events pertaining to its stockholders' equity.

- Feb. 1 Issued 25,000 shares of common stock for \$120,000.
 Apr. 14 Sold 6,000 shares of treasury stock—common for \$33,000.
 Sept. 3 Issued 5,000 shares of common stock for a patent valued at \$35,000.
 Nov. 10 Purchased 1,000 shares of common stock for the treasury at a cost of \$6,000.
 Dec. 31 Determined that net income for the year was \$452,000.

No dividends were declared during the year.

Instructions

- c. Total stockholders' equity
\$5,350,000

Journalize and post stock transactions, and prepare stockholders' equity section.

P13.4A (LO 1, 2, 3) Financial Statement Peck Corporation is authorized to issue 20,000 shares of \$50 par value, 10% preferred stock and 125,000 shares of \$5 par value common stock. On January 1, 2020, the ledger contained the following stockholders' equity balances.

Preferred Stock (10,000 shares)	\$500,000
Paid-in Capital in Excess of Par—Preferred Stock	75,000
Common Stock (70,000 shares)	350,000
Paid-in Capital in Excess of Par—Common Stock	700,000
Retained Earnings	300,000

During 2020, the following transactions occurred.

- Feb. 1 Issued 2,000 shares of preferred stock for land having a fair value of \$120,000.
 Mar. 1 Issued 1,000 shares of preferred stock for cash at \$65 per share.
 July 1 Issued 16,000 shares of common stock for cash at \$7 per share.
 Sept. 1 Issued 400 shares of preferred stock for a patent. The asking price of the patent was \$30,000. Market price for the preferred stock was \$70 and the fair value for the patent was indeterminable.
 Dec. 1 Issued 8,000 shares of common stock for cash at \$7.50 per share.
 Dec. 31 Net income for the year was \$260,000. No dividends were declared.

Instructions

- a. Journalize the transactions and the closing entry for net income.
 - b. Enter the beginning balances in the accounts, and post the journal entries to the stockholders' equity accounts. (Use T-accounts.)
 - c. Prepare a stockholders' equity section at December 31, 2020.
- c. Total stockholders' equity
\$2,570,000**

P13.5A (LO 3) Financial Statement The following stockholders' equity accounts arranged alphabetically are in the ledger of Galindo Corporation at December 31, 2020.

Common Stock (\$5 stated value)	\$2,000,000
Paid-in Capital from Treasury Stock	10,000
Paid-in Capital in Excess of Par—Preferred Stock	679,000
Paid-in Capital in Excess of Stated Value—Common Stock	1,600,000
Preferred Stock (8%, \$50 par)	800,000
Retained Earnings	1,748,000
Treasury Stock (10,000 common shares)	130,000

Prepare stockholders' equity section.

Instructions

Prepare a stockholders' equity section at December 31, 2020.

**Total stockholders' equity
\$6,707,000**

P13.6A (LO 2, 3) Financial Statement Irwin Corporation has been authorized to issue 20,000 shares of \$100 par value, 10%, preferred stock and 1,000,000 shares of no-par common stock. The corporation assigned a \$2.50 stated value to the common stock. At December 31, 2020, the ledger contained the following balances pertaining to stockholders' equity.

Preferred Stock	\$ 120,000
Paid-in Capital in Excess of Par—Preferred Stock	20,000
Common Stock	1,000,000
Paid-in Capital in Excess of Stated Value—Common Stock	1,800,000
Treasury Stock (1,000 common shares)	11,000
Paid-in Capital from Treasury Stock	1,500
Retained Earnings	82,000
Accumulated Other Comprehensive Income	51,000

Prepare entries for stock transactions and prepare stockholders' equity section.

The preferred stock was issued for land having a fair value of \$140,000. All common stock issued was for cash. In November, 1,500 shares of common stock were purchased for the treasury at a per share cost of \$11. In December, 500 shares of treasury stock were sold for \$14 per share. No dividends were declared in 2020.

Instructions

- a. Prepare the journal entries for the:
 1. Issuance of preferred stock for land.
 2. Issuance of common stock for cash.
 3. Purchase of common treasury stock for cash.
 4. Sale of treasury stock for cash.
 - b. Prepare the stockholders' equity section at December 31, 2020.
- b. Total stockholders' equity
\$3,063,500**

Cookie Creations

(Note: This is a continuation of the Cookie Creations case from Chapters 1 through 12.)

CC13 Natalie's friend, Curtis Lesperance, decides to meet with Natalie after hearing that her discussions about a possible business partnership with her friend Katy Peterson have failed. Because Natalie has been so successful with Cookie Creations and Curtis has been just as successful with his coffee shop, they both conclude that they could benefit from each other's business expertise. Curtis and Natalie next evaluate the different types of business organization. Because of the advantage of limited personal liability, they decide to form a corporation. Natalie and Curtis are very excited about this new business venture. They come to you with information about their businesses and with a number of questions.

Go to WileyPLUS for complete case details and instructions.

Ethics Case

EC13 The R&D division of Piqua Chemical Corp. has just developed a chemical for sterilizing the vicious Brazilian "killer bees" which are invading Mexico and the southern United States. The president of the company is anxious to get the chemical on the market to boost the company's profits. He believes his job is in jeopardy because of decreasing sales and profits. The company has an opportunity to sell this chemical in Central American countries, where the laws are much more relaxed than in the United States.

The director of Piqua's R&D division strongly recommends further testing in the laboratory for side-effects of this chemical on other insects, birds, animals, plants, and even humans. He cautions the president, "We could be sued from all sides if the chemical has tragic side-effects that we didn't even test for in the labs." The president answers, "We can't wait an additional year for your lab tests. We can avoid losses from such lawsuits by establishing a separate wholly owned corporation to shield Piqua Corp. from such lawsuits. We can't lose any more than our investment in the new corporation, and we'll invest in just the patent covering this chemical. We'll reap the benefits if the chemical works and is safe, and avoid the losses from lawsuits if it's a disaster." The following week, Piqua creates a new wholly owned corporation called Finlay Inc., sells the chemical patent to it for \$10, and watches the spraying begin.

Instructions

- a. Who are the stakeholders in this situation?
- b. Are the president's motives and actions ethical?
- c. Can Piqua shield itself against losses of Finlay Inc.?

Comprehensive Accounting Cycle Review

Journalize transactions and prepare financial statements.

ACR13 Karen Noonan opened Clean Sweep Inc. on February 1, 2020. During February, the following transactions were completed.

- Feb. 1 Issued 5,000 shares of Clean Sweep common stock for \$13,000. Each share has a \$1.50 par.
 1 Borrowed \$8,000 on a 2-year, 6% note payable.
 1 Paid \$9,020 to purchase used floor and window cleaning equipment from a company going out of business (\$4,820 was for the floor equipment and \$4,200 for the window equipment).
 1 Paid \$220 for February Internet and phone services.
 3 Purchased cleaning supplies for \$980 on account.
 4 Hired 4 employees. Each will be paid \$480 per 5-day work week (Monday–Friday). Employees will begin working Monday, February 9.

- Feb. 5 Obtained insurance coverage for \$9,840 per year. Coverage runs from February 1, 2020, through January 31, 2021. Karen paid \$2,460 cash for the first quarter of coverage.
- 5 Discussions with the insurance agent indicated that providing outside window cleaning services would cost too much to insure. Karen sold the window cleaning equipment for \$3,950 cash.
- 16 Billed customers \$3,900 for cleaning services performed through February 13, 2020.
- 17 Received \$540 from a customer for 4 weeks of cleaning services to begin February 21, 2020. (By paying in advance, this customer received 10% off the normal weekly fee of \$150.)
- 18 Paid \$300 on amount owed on cleaning supplies.
- 20 Paid \$3 per share to buy 300 shares of Clean Sweep common stock from a shareholder who disagreed with management goals. The shares will be held as treasury shares.
- 23 Billed customers \$4,300 for cleaning services performed through February 20.
- 24 Paid cash for employees' wages for 2 weeks (February 9–13 and 16–20).
- 25 Collected \$2,500 cash from customers billed on February 16.
- 27 Paid \$220 for Internet and phone services for March.

Instructions

- a. Journalize the February transactions. (You do not need to include an explanation for each journal entry.)
- b. Post to the ledger accounts (Use T-accounts.)
- c. Prepare a trial balance at February 28, 2020. c. Totals \$30,420
- d. Journalize the following adjustments. (Round all amounts to whole dollars.)
 - 1. Services performed for customers through February 27, 2020, but unbilled and uncollected were \$3,800.
 - 2. Received notice that a customer who was billed \$200 for services performed February 10 has filed for bankruptcy. Clean Sweep does not expect to collect any portion of this outstanding receivable.
 - 3. Clean Sweep uses the allowance method to estimate bad debts. Clean Sweep estimates that 3% of its month-end receivables will not be collected.
 - 4. Record 1 month of depreciation for the floor equipment. Use the straight-line method, an estimated life of 4 years, and \$500 salvage value.
 - 5. Record 1 month of insurance expense.
 - 6. An inventory count shows \$400 of supplies on hand at February 28.
 - 7. One week of services were performed for the customer who paid in advance on February 17.
 - 8. Accrue for wages owed through February 28, 2020.
 - 9. Accrue for interest expense for 1 month.
 - 10. Karen estimates a 20% income tax rate. (*Hint:* Prepare an income statement up to income before income taxes to help with the income tax calculation.)
- e. Post adjusting entries to the T-accounts.
- f. Prepare an adjusted trial balance.
- g. Prepare a **multiple-step income statement**, a **retained earnings statement**, and a **properly classified balance sheet** as of February 28, 2020. g. Net income \$3,117
Tot. assets \$26,101
- h. Journalize closing entries.

Expand Your Critical Thinking

Financial Reporting Problem: Apple Inc.

CT13.1 The stockholders' equity section for **Apple Inc.** is shown in Appendix A. The complete annual report, including the notes to the financial statements, is available at the company's website.

Instructions

- a. What is the par or stated value per share of Apple's common stock?
- b. What percentage of Apple's authorized common stock was issued at September 26, 2015?

Comparative Analysis Problem: PepsiCo, Inc. vs. The Coca-Cola Company

CT13.2 **PepsiCo, Inc.**'s financial statements are presented in Appendix B. Financial statements of **The Coca-Cola Company** are presented in Appendix C. The complete annual reports of PepsiCo and Coca-Cola, including the notes to the financial statements, are available at each company's respective website.

Instructions

- a. What percentage of authorized shares was issued by Coca-Cola at December 31, 2015, and by PepsiCo at December 26, 2015?
- b. How many shares are held as treasury stock by Coca-Cola at December 31, 2015, and by PepsiCo at December 26, 2015?
- c. How many Coca-Cola common shares are outstanding at December 31, 2015? How many PepsiCo shares of common stock are outstanding at December 26, 2015?

Comparative Analysis Problem: Amazon.com, Inc. vs.

Wal-Mart Stores, Inc.

CT13.3 **Amazon.com, Inc.**'s financial statements are presented in Appendix D. Financial statements of **Wal-Mart Stores, Inc.** are presented in Appendix E. The complete annual reports of Amazon and Wal-Mart, including the notes to the financial statements, are available at each company's respective website. Wal-Mart has 11,000 million shares authorized.

Instructions

- a. What percentage of authorized shares was issued by Amazon at December 31, 2015, and by Wal-Mart at January 31, 2016?
- b. How many shares are held as treasury stock by Amazon at December 31, 2015, and by Wal-Mart at January 31, 2016?
- c. How many Amazon common shares are outstanding at December 31, 2015? How many Wal-Mart shares of common stock are outstanding at January 31, 2016?

Real-World Focus

CT13.4 Use the stockholders' equity section of an annual report and identify the major components.

Instructions

Go to the Annual Reports website, select a company of your choice, and then answer the following questions.

- a. What is the company's name?
- b. What classes of capital stock has the company issued?
- c. For each class of stock:
 1. How many shares are authorized, issued, and/or outstanding?
 2. What is the par value?
- d. What are the company's retained earnings?
- e. Has the company acquired treasury stock? How many shares?

Decision-Making Across the Organization

CT13.5 The stockholders' meeting for Percival Corporation has been in progress for some time. The chief financial officer for Percival is presently reviewing the company's financial statements and is explaining the items that comprise the stockholders' equity section of the balance sheet for the current year. The stockholders' equity section of Percival Corporation at December 31, 2020, is as follows.

Percival Corporation
Balance Sheet (partial)
December 31, 2020

Stockholders' equity	
Paid-in capital	
Capital stock	
Preferred stock, authorized 1,000,000 shares, \$100 par value, 6,000 shares issued and outstanding	\$ 600,000
Common stock, authorized 5,000,000 shares, \$1 par value, 3,000,000 shares issued, and 2,700,000 outstanding	<u>3,000,000</u>
Total capital stock	\$ 3,600,000
Additional paid-in capital	
In excess of par—preferred stock	50,000
In excess of par—common stock	<u>25,000,000</u>
Total additional paid-in capital	<u>25,050,000</u>
Total paid-in capital	28,650,000
Retained earnings	<u>900,000</u>
Total paid-in capital and retained earnings	29,550,000
Less: Treasury stock (300,000 common shares)	<u>9,300,000</u>
Total stockholders' equity	<u><u>\$20,250,000</u></u>

At the meeting, stockholders have raised a number of questions regarding the stockholders' equity section.

Instructions

With the class divided into groups, answer the following questions as if you were the chief financial officer for Percival Corporation.

- a. "I thought the common stock was presently selling at \$29.75, but the company has the stock stated at \$1 per share. How can that be?"
- b. "Why is the company buying back its common stock? Furthermore, the treasury stock has a debit balance because it is subtracted from stockholders' equity. Why is treasury stock not reported as an asset if it has a debit balance?"

Communication Activity

CT13.6 Joe Moyer, your uncle, is an inventor who has decided to incorporate. Uncle Joe knows that you are an accounting major at U.N.O. In a recent letter to you, he ends with the question, "I'm filling out a state incorporation application. Can you tell me the difference in the following terms: (1) authorized stock, (2) issued stock, (3) outstanding stock, and (4) preferred stock?"

Instructions

In a brief note, differentiate for Uncle Joe among the four different stock terms. Write the letter to be friendly, yet professional.

All About You

CT13.7 A high percentage of Americans own stock in corporations. As a shareholder in a corporation, you will receive an annual report. **One of the goals of this course is for you to learn how to navigate your way around an annual report.**

Instructions

Use **Apple's** 2015 annual report provided in Appendix A to answer the following questions.

- a. What CPA firm performed the audit of Apple's financial statements?
- b. What was the amount of Apple's earnings per share in 2015?
- c. What were net sales in 2015?
- d. How much cash did Apple spend on capital expenditures in 2015?
- e. Over what life does the company depreciate its buildings?
- f. What were the proceeds from issuance of common stock in 2015?

FASB Codification Activity

CT13.8 If your school has a subscription to the FASB Codification, log in and prepare responses to the following.

- a. How is common stock defined?
- b. How is preferred stock defined?
- c. What is the meaning of the term shares?

A Look at IFRS

LEARNING OBJECTIVE 4

Compare the accounting for stockholders' equity under GAAP and IFRS.

The accounting for transactions related to stockholders' equity, such as issuance of shares and purchase of treasury stock, are similar under both IFRS and GAAP. Major differences relate to terminology used, introduction of items such as revaluation surplus, and presentation of stockholders' equity information.

Key Points

Following are the key similarities and differences between GAAP and IFRS as related to stockholders' equity.

Similarities

- Aside from terminology used, the accounting transactions for the issuance of shares and the purchase of treasury stocks are similar.
- Like GAAP, IFRS does not allow a company to record gains or losses on purchases of its own shares.

Differences

- Under IFRS, the term **reserves** is used to describe all equity accounts other than those arising from contributed (paid-in) capital. This would include, for example, reserves related to retained earnings, asset revaluations, and fair value differences.
- Many countries have a different mix of investor groups than in the United States. For example, in Germany, financial institutions like banks are not only major creditors of corporations but often are the largest corporate stockholders as well. In the United States, Asia, and the United Kingdom, many companies rely on substantial investment from private investors.
- There are often terminology differences for equity accounts. The following summarizes some of the common differences in terminology.

GAAP	IFRS
Common stock	Share capital—ordinary
Stockholders	Shareholders
Par value	Nominal or face value
Authorized stock	Authorized share capital
Preferred stock	Share capital—preference
Paid-in capital	Issued/allocated share capital
Paid-in capital in excess of par—common stock	Share premium—ordinary
Paid-in capital in excess of par—preferred stock	Share premium—preference
Retained earnings	Retained earnings or Retained profits
Retained earnings deficit	Accumulated losses
Accumulated other comprehensive income	General reserve and other reserve accounts

As an example of how similar transactions use different terminology under IFRS, consider the accounting for the issuance of 1,000 shares of \$1 par value common stock for \$5 per share. Under IFRS, the entry is as follows.

Cash	5,000	
Share Capital—Ordinary		1,000
Share Premium—Ordinary		4,000

- A major difference between IFRS and GAAP relates to the account Revaluation Surplus. Revaluation surplus arises under IFRS because companies are permitted to revalue their property, plant, and equipment to fair value under certain circumstances. This account is part of general reserves under IFRS and is not considered contributed capital.
- IFRS often uses terms such as **retained profits** or **accumulated profit or loss** to describe retained earnings. The term **retained earnings** is also often used.
- Equity is given various descriptions under IFRS, such as shareholders' equity, owners' equity, capital and reserves, and shareholders' funds.

Looking to the Future

As indicated in earlier discussions, the IASB and the FASB are currently working on a project related to financial statement presentation. An important part of this study is to determine whether certain line items, subtotals, and totals should be clearly defined and required to be displayed in the financial statements.

IFRS Practice

IFRS Self-Test Questions

1. Which of the following is **true**?
 - In the United States, the primary corporate stockholders are financial institutions.
 - Share capital means total assets under IFRS.
 - The IASB and FASB are presently studying how financial statement information should be presented.
 - The accounting for treasury stock differs extensively between GAAP and IFRS.
2. Under IFRS, the amount of capital received in excess of par value would be credited to:
 - Retained Earnings.
 - Contributed Capital.
 - Share Premium.
 - Par value is not used under IFRS.
3. Which of the following is **false**?
 - Under GAAP, companies cannot record gains on transactions involving their own shares.
 - Under IFRS, companies cannot record gains on transactions involving their own shares.
 - Under IFRS, the statement of stockholders' equity is a required statement.
 - Under IFRS, a company records a revaluation surplus when it experiences an increase in the price of its common stock.
4. Which of the following does **not** represent a pair of GAAP/IFRS-comparable terms?
 - Additional paid-in capital/Share premium.
 - Treasury stock/Repurchase reserve.
 - Common stock/Share capital.
 - Preferred stock/Preference shares.

IFRS Exercises

IFRS13.1 On May 10, Jaurez Corporation issues 1,000 shares of \$10 par value ordinary shares for cash at \$18 per share. Journalize the issuance of the shares.

IFRS13.2 Meenen Corporation has the following accounts at December 31 (in euros): Share Capital—Ordinary, €10 par, 5,000 shares issued, €50,000; Share Premium—Ordinary €10,000; Retained Earnings €45,000; and Treasury Shares—Ordinary, 500 shares, €11,000. Prepare the equity section of the statement of financial position.

IFRS13.3 Overton Co. had the following transactions during the current period.

- Mar. 2 Issued 5,000 shares of \$1 par value ordinary shares to attorneys in payment of a bill for \$30,000 for services performed in helping the company to incorporate.
June 12 Issued 60,000 shares of \$1 par value ordinary shares for cash of \$375,000.
July 11 Issued 1,000 shares of \$100 par value preference shares for cash at \$110 per share.
Nov. 28 Purchased 2,000 treasury shares for \$80,000.

Instructions

Journalize the above transactions.

International Financial Reporting Problem: Louis Vuitton

IFRS13.4 The financial statements of **Louis Vuitton** are presented in Appendix F. The complete annual report, including the notes to its financial statements, is available at the company's website.

Instructions

Use the company's annual report to answer the following questions.

- a. Determine the following amounts at December 31, 2015: (1) total equity, (2) total revaluation reserve, and (3) number of treasury shares.
- b. Examine the equity section of the company's balance sheet. For each of the following, provide the comparable label that would be used under GAAP: (1) share capital, (2) share premium, and (3) net profit, group share.

Corporations: Dividends, Retained Earnings, and Income Reporting

Chapter Preview

As indicated in the following Feature Story, a profitable corporation like **Van Meter Inc.** can provide real benefits to employees through its stock bonus plan. And as employees learn more about the role of dividends, retained earnings, and earnings per share, they develop an understanding and appreciation for what the company is providing to them.

Feature Story

Owning a Piece of the Action

Van Meter Inc., an electrical-parts distributor in Cedar Rapids, Iowa, is 100% employee-owned. For many years, the company has issued bonuses in the form of shares of company

stock to all of its employees. These bonus distributions typically have a value equal to several weeks of pay. Top management always thought that this was a great program. Therefore, it came as quite a surprise a few years ago when an employee stood up at a company-wide meeting and said that he did not see any real value in receiving the company's shares. Instead, he wanted "a few hundred extra bucks for beer and cigarettes."

As it turned out, many of the company's 340 employees felt this way. Rather than end the stock bonus program, however, the company decided to educate its employees on the value of share ownership. The employees are now taught how to determine the worth of their shares, the rights that come with share ownership, and what they can do to help increase the value of those shares.

As part of the education program, management developed a slogan, "Work ten, get five free." The idea is that after working 10 years, an employee's shares would be worth the equivalent of about five years' worth of salary. For example, a person earning a \$30,000 salary would earn \$300,000 in wages over a 10-year period. During that same 10-year period, it was likely that the value of the employee's shares would accumulate to about \$150,000 (five years' worth of salary). This demonstrates in more concrete terms why employees should be excited about share ownership.

A 12-member employee committee has the responsibility of educating new employees about the program. The committee also runs training programs so that employees understand how their cost-saving actions improve the company's results—and its stock price. It appears that the company's education program to encourage employees to act like owners is working. Profitability has increased rapidly, and employee turnover has fallen from 18% to 8%. Given Van Meter's success, many of the 10,000 other employee-owned companies in the United States might want to investigate whether their employees understand the benefits of share ownership.

Accounting for Dividends and Stock Splits

LEARNING OBJECTIVE 1

Explain how to account for cash dividends, stock dividends, and stock splits.

A **dividend** is a corporation's distribution of cash or stock to its stockholders on a **pro rata (proportional to ownership)** basis. Pro rata means that if you own 10% of the common shares, you will receive 10% of the dividend. Dividends can take four forms: cash, property, scrip (a promissory note to pay cash), or stock. Cash dividends predominate in practice although companies also declare stock dividends with some frequency. These two forms of dividends are therefore the focus of discussion in this chapter.

Investors are very interested in a company's dividend practices. In the financial press, **dividends are generally reported quarterly as a dollar amount per share.** (Sometimes they are reported on an annual basis.) For example, the recent **quarterly** dividend rate was 24 cents per share for **Nike**, 22 cents per share for **GE**, and 25 cents per share for **ConAgra Foods**. **Facebook** does not pay dividends.

Cash Dividends

A **cash dividend** is a pro rata distribution of cash to stockholders. Cash dividends are not paid on treasury shares. For a corporation to pay a cash dividend, it must have the following.

- 1. Retained earnings.** The legality of a cash dividend depends on the laws of the state in which the company is incorporated. Payment of cash dividends from retained earnings is legal in all states. In general, cash dividend distributions from only the balance in common stock (legal capital) are illegal.

A dividend declared out of paid-in capital is termed a **liquidating dividend**. Such a dividend reduces or "liquidates" the amount originally paid in by stockholders. Statutes vary considerably with respect to cash dividends based on paid-in capital in excess of par or stated value. Many states permit such dividends.

- 2. Adequate cash.** The legality of a dividend and the ability to pay a dividend are two different things. For example, **Best Buy**, with retained earnings of over \$4.4 billion, could legally declare a dividend of at least \$4.4 billion. But Best Buy's cash balance is only \$2.2 billion.

Before declaring a cash dividend, a company's board of directors must carefully consider both current and future demands on the company's cash resources. In some cases, current liabilities may make a cash dividend inappropriate. In other cases, a major plant expansion program may warrant only a relatively small dividend.

- 3. Declared dividends.** A company does not pay dividends unless its board of directors decides to do so, at which point the board "declares" the dividend. The board of directors has full authority to determine the amount of income to distribute in the form of a dividend and the amount to retain in the business. Dividends do not accrue like interest on a note payable, and they are not a liability until declared.

The amount and timing of a dividend are important issues for management to consider. The payment of a large cash dividend could lead to liquidity problems for the company. On the other hand, a small dividend or a missed dividend may cause unhappiness among stockholders. Many stockholders expect to receive a reasonable cash payment from the company on a periodic basis. Many companies declare and pay cash dividends quarterly. On the other hand, a number of high-growth companies pay no dividends, preferring to conserve cash to finance future capital expenditures.

Entries for Cash Dividends

Three dates are important in connection with dividends: (1) the declaration date, (2) the record date, and (3) the payment date. Normally, there are two to four weeks between each date. Companies make accounting entries on the declaration date and the payment date.

On the **declaration date**, the board of directors formally declares (authorizes) the cash dividend and announces it to stockholders. The declaration of a cash dividend **commits the corporation to a legal obligation**. The company must make an entry to recognize the increase in Cash Dividends and the increase in the liability Dividends Payable.

To illustrate, assume that on December 1, 2020, the directors of Media General declare a 50 cents per share cash dividend on 100,000 shares of \$10 par value common stock. The dividend is \$50,000 ($100,000 \times \0.50). The entry to record the declaration is as follows.

Declaration Date			A	=	L	+	SE
							-50,000 Div
Dec. 1	Cash Dividends Dividends Payable (To record declaration of cash dividend)		50,000		50,000		+50,000

Cash Flows
no effect

Media General debits the account Cash Dividends. Cash dividends decrease retained earnings. We use the specific title Cash Dividends to differentiate it from other types of dividends, such as stock dividends. Dividends Payable is a current liability. It will normally be paid within the next several months. *For homework problems, you should use the Cash Dividends account for recording cash dividend declarations.*

HELPFUL HINT

The purpose of the record date is to identify the persons or entities that will receive the dividend, not to determine the amount of the dividend liability.

At the **record date**, the company determines ownership of the outstanding shares for dividend purposes (see **Helpful Hint**). The stockholders' records maintained by the corporation supply this information. In the interval between the declaration date and the record date, the corporation updates its stock ownership records. For Media General, the record date is December 22. No entry is required on this date because the corporation's liability recognized on the declaration date is unchanged.

Record Date

Dec. 22		No entry		
---------	--	----------	--	--

On the **payment date**, the company makes cash dividend payments to the stockholders of record (as of December 22) and records the payment of the dividend. If January 20 is the payment date for Media General, the entry on that date is as follows.

A	=	L	+	SE
		-50,000		
Cash Flows				
-50,000				

Cash Flows

Payment Date		
Jan. 20	Dividends Payable Cash (To record payment of cash dividend)	50,000 50,000

Note that payment of the dividend reduces both current assets and current liabilities. It has no effect on stockholders' equity. The cumulative effect of the declaration and payment of a cash dividend is to **decrease both stockholders' equity and total assets**. **Illustration 14.1** summarizes the three important dates associated with dividends for Media General.

ILLUSTRATION 14.1

Key dividend dates

Declaration date Board authorizes dividends	December							January						
	S	M	Tu	W	Th	F	S	S	M	Tu	W	Th	F	S
			1	2	3	4	5	6			1	2	3	
	7	8	9	10	11	12	13		4	5	6	7	8	9
	14	15	16	17	18	19	20		11	12	13	14	15	16
	21	22	23	24	25	26	27		18	19	20	21	22	23
	28	29	30	31					25	26	27	28	29	30

Record date
Registered shareholders are eligible for dividend

Payment date
The company issues dividend checks

When using a Cash Dividends account, Media General should transfer the balance of that account to Retained Earnings at the end of the year by a closing entry. The entry for Media General at closing is as follows.

Retained Earnings		50,000		50,000
Cash Dividends				
(To close Cash Dividends to Retained Earnings)				

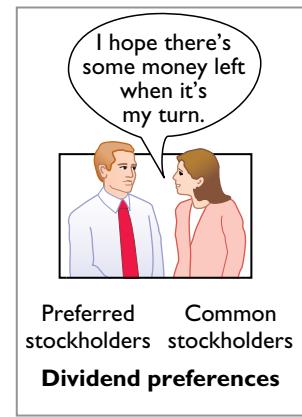

Dividend Preferences

Preferred stockholders have the right to receive dividends before common stockholders. For example, if the dividend rate on preferred stock is \$5 per share, common shareholders

cannot receive any dividends in the current year until preferred stockholders have received \$5 per share. The first claim to dividends does not, however, **guarantee** the payment of dividends. Dividends depend on many factors, such as adequate retained earnings and availability of cash. If a company does not pay dividends to preferred stockholders, it cannot pay dividends to common stockholders.

For preferred stock, companies state the per share dividend amount as a percentage of the par value or as a specified amount. For example, **Earthlink** specifies a 3% dividend on its \$100 par value preferred. **PepsiCo** pays \$4.56 per share on its no-par value stock.

Most preferred stocks also have a preference on corporate assets if the corporation fails. This feature provides security for the preferred stockholder. The preference to assets may be for the par value of the shares or for a specified liquidating value. For example, **Commonwealth Edison**'s preferred stock entitles its holders to receive \$31.80 per share, plus accrued and unpaid dividends, in the event of liquidation. The liquidation preference establishes the respective claims of creditors and preferred stockholders in litigation involving bankruptcy lawsuits.

Cumulative Dividend

Preferred stock often contains a **cumulative dividend** feature. This feature stipulates that preferred stockholders must be paid both current-year dividends and any unpaid prior-year dividends before common stockholders are paid dividends. When preferred stock is cumulative, preferred dividends not declared in a given period are called **dividends in arrears**.

To illustrate, assume that Scientific Leasing has 5,000 shares of 7%, \$100 par value, cumulative preferred stock outstanding. Each \$100 share pays a \$7 dividend ($.07 \times \$100$). The annual dividend is \$35,000 ($5,000 \times \7 per share). If dividends are two years in arrears, preferred stockholders are entitled to receive the dividends shown in **Illustration 14.2**.

Dividends in arrears ($\$35,000 \times 2$)	\$ 70,000
Current-year dividends	35,000
Total preferred dividends	\$105,000

ILLUSTRATION 14.2

Computation of total dividends to preferred stock

The company cannot pay dividends to common stockholders until it pays the entire preferred dividend. In other words, companies cannot pay dividends to common stockholders while any preferred dividends are in arrears.

Dividends in arrears are not considered a liability. No obligation exists until the board of directors formally declares that the corporation will pay a dividend. However, companies should disclose in the notes to the financial statements the amount of dividends in arrears. Doing so enables investors to assess the potential impact of this commitment on the corporation's financial position.

The investment community does not look favorably on companies that are unable to meet their dividend obligations. As a financial officer noted in discussing one company's failure to pay its cumulative preferred dividend for a period of time, "Not meeting your obligations on something like that is a major black mark on your record."

Payment of a cumulative dividend

Allocating Cash Dividends Between Preferred and Common Stock

As indicated, preferred stock has priority over common stock in regard to dividends. Holders of cumulative preferred stock must be paid any unpaid prior-year dividends and their current year's dividend before common stockholders receive dividends.

To illustrate, assume that at December 31, 2020, IBR Inc. has 1,000 shares of 8%, \$100 par value cumulative preferred stock. It also has 50,000 shares of \$10 par value common stock outstanding. The dividend per share for preferred stock is \$8 ($\100 par value \times 8%). The required annual dividend for preferred stock is therefore \$8,000 (1,000 shares \times \$8). At December 31, 2020, the directors declare a \$6,000 cash dividend. In this case, the entire dividend amount goes to preferred stockholders because of their dividend preference. The entry to record the declaration of the dividend is as follows.

A	=	L	+	SE
				-6,000 Div
		+6,000		

Cash Flows
no effect

Dec. 31	Cash Dividends	6,000	
	Dividends Payable		6,000
	(To record \$6 per share cash dividend to preferred stockholders)		

Because of the cumulative feature, dividends of \$2 (\$8 – \$6) per share are in arrears on preferred stock for 2020. IBR must pay these dividends to preferred stockholders before it can pay any future dividends to common stockholders. IBR should disclose dividends in arrears in the financial statements.

At December 31, 2021, IBR declares a \$50,000 cash dividend. **Illustration 14.3** shows the allocation of the dividend to the two classes of stock.

ILLUSTRATION 14.3

Allocating dividends to preferred and common stock

Total dividend	\$50,000
Allocated to preferred stock	
Dividends in arrears, 2020 (1,000 × \$2)	\$2,000
2021 dividend (1,000 × \$8)	8,000
	10,000
Remainder allocated to common stock	\$40,000

A	=	L	+	SE
				-50,000 Div
		+50,000		

Cash Flows
no effect

The entry to record the declaration of the dividend is as follows.

Dec. 31	Cash Dividends	50,000	
	Dividends Payable		50,000
	(To record declaration of cash dividends of \$10,000 to preferred stock and \$40,000 to common stock)		

If IBR's preferred stock is not cumulative, preferred stockholders receive only \$8,000 in dividends in 2021. Common stockholders receive \$42,000.

Investor Insight

What About Dividends?

If you have some excess dollars that you want to invest, you might consider stocks that pay dividends. According to data from the **Standard & Poor's (S&P)** Dow Jones Indices, dividend income made up 33% of the monthly return of the S&P 500 between 1926 and 2015. What that means is that dividends comprise one-third of the return to shareholders.

In addition, data from 1927 to 2014 indicate that dividend payers outperformed non-dividend payers, averaging 10.4% annual growth versus 8.5%. If you do not think that difference is much, the table indicates how an annual investment of \$10,000 would grow at each of these rates.

Growth Over	8.5% Annual Growth Rate	10.4% Annual Growth Rate
10 years	\$ 161,000	\$ 179,400
20 years	524,900	661,800
30 years	1,300,000	2,000,000

Some companies have strong dividend yields, such as **Ford Motor Company** and **AT&T**. Others have been increasing dividend payouts at a strong clip such as **UPS**, **Microsoft**, and **Boeing**. Good luck in your future investing!

What factors must management consider in deciding how large a dividend to pay? (Go to WileyPLUS for this answer and additional questions.)

DO IT! 1a | Dividends on Preferred and Common Stock

MasterMind Corporation has 2,000 shares of 6%, \$100 par value preferred stock outstanding at December 31, 2020. At December 31, 2020, the company declared a \$60,000 cash dividend. Determine the dividend paid to preferred stockholders and common stockholders under each of the following scenarios.

1. The preferred stock is noncumulative, and the company has not missed any dividends in previous years.
2. The preferred stock is noncumulative, and the company did not pay a dividend in each of the two previous years.
3. The preferred stock is cumulative, and the company did not pay a dividend in each of the two previous years.

Solution

1. The company has not missed past dividends and the preferred stock is noncumulative. Thus, the preferred stockholders are paid only this year's dividend. The dividend paid to preferred stockholders would be \$12,000 ($2,000 \times .06 \times \100). The dividend paid to common stockholders would be \$48,000 ($\$60,000 - \$12,000$).
2. The preferred stock is noncumulative. Thus, past unpaid dividends do not have to be paid. The dividend paid to preferred stockholders would be \$12,000 ($2,000 \times .06 \times \100). The dividend paid to common stockholders would be \$48,000 ($\$60,000 - \$12,000$).
3. The preferred stock is cumulative. Thus, dividends that have been missed (dividends in arrears) must be paid. The dividend paid to preferred stockholders would be \$36,000 ($3 \times 2,000 \times .06 \times \100). Of the \$36,000, \$24,000 relates to dividends in arrears and \$12,000 relates to the current dividend on preferred stock. The dividend paid to common stockholders would be \$24,000 ($\$60,000 - \$36,000$).

Related exercise material: BE14.2, DO IT! 14.1a, and E14.2.

ACTION PLAN

- Determine dividends on preferred shares by multiplying the dividend rate times the par value of the stock times the number of preferred shares.
- Understand the cumulative feature. If preferred stock is cumulative, then any missed dividends (dividends in arrears) and the current year's dividend must be paid to preferred stockholders before dividends are paid to common stockholders.

Stock Dividends

A **stock dividend** is a pro rata (proportional to ownership) distribution of the corporation's own stock to stockholders. Whereas a company pays cash in a cash dividend, a company issues shares of stock in a stock dividend. A **stock dividend results in a decrease in retained earnings and an increase in paid-in capital**. Unlike a cash dividend, a stock dividend does not decrease total stockholders' equity or total assets.

To illustrate, assume that you have a 2% ownership interest in Cetus Inc. That is, you own 20 of its 1,000 shares of common stock. If Cetus declares a 10% stock dividend, it would issue 100 shares ($1,000 \times 10\%$) of stock. You would receive two shares ($2\% \times 100$). Would your ownership interest change? No, it would remain at 2% ($22 \div 1,100$). **You now own more shares of stock, but your ownership interest has not changed.**

Cetus has disbursed no cash and has assumed no liabilities. What, then, are the purposes and benefits of a stock dividend? Corporations issue stock dividends generally for one or more of the following reasons.

1. To satisfy stockholders' dividend expectations without spending cash.
2. To increase the marketability of the corporation's stock. When the number of shares outstanding increases, the market price per share decreases. Decreasing the market price of the stock makes it easier for smaller investors to purchase the shares.
3. To emphasize that a company has permanently reinvested in the business a portion of stockholders' equity, which therefore is unavailable for cash dividends.

When the dividend is declared, the board of directors determines the size of the stock dividend and the value assigned to each dividend.

Generally, if the company issues a **small stock dividend** (less than 20–25% of the corporation's issued stock), the value assigned to the dividend is the fair value (market price) per share. This treatment is based on the assumption that a small stock dividend will have little effect on the market price of the shares previously outstanding. Thus, many stockholders consider small stock dividends to be distributions of earnings equal to the market price of the shares distributed. If a company issues a **large stock dividend** (greater than 20–25%), the price assigned to the dividend is the par or stated value. Small stock dividends predominate in practice. Thus, we will illustrate only entries for small stock dividends.

Entries for Stock Dividends

To illustrate the accounting for small stock dividends, assume that Medland Corporation has a balance of \$300,000 in retained earnings. It declares a 10% stock dividend on its 50,000 shares of \$10 par value common stock. The current market price of its stock is \$15 per share. The number of shares to be issued is 5,000 ($10\% \times 50,000$). Therefore, the total amount to be debited to Stock Dividends is \$75,000 ($5,000 \times \15). The entry to record the declaration of the stock dividend is as follows.

A	=	L	+	SE
				-75,000 Div
				+50,000 CS
				+25,000 CS

Cash Flows
no effect

Stock Dividends	75,000
Common Stock Dividends Distributable	50,000
Paid-in Capital in Excess of Par—Common Stock	25,000
(To record declaration of 10% stock dividend)	

Medland debits Stock Dividends for the market price of the stock issued ($\$15 \times 5,000$). (Similar to Cash Dividends, Stock Dividends decrease retained earnings.) Medland also credits Common Stock Dividends Distributable for the par value of the dividend shares ($\$10 \times 5,000$) and credits Paid-in Capital in Excess of Par—Common Stock for the excess of the market price over par ($\$5 \times 5,000$).

Common Stock Dividends Distributable is a **stockholders' equity account**. It is not a liability because assets will not be used to pay the dividend. If the company prepares a balance sheet before it issues the dividend shares, it reports the distributable account under paid-in capital as shown in **Illustration 14.4**.

ILLUSTRATION 14.4

Statement presentation of common stock dividends distributable

Paid-in capital	
Common stock	\$500,000
Common stock dividends distributable	50,000
In excess of par—common stock	25,000
Total paid-in capital	\$575,000

A	=	L	+	SE
				-50,000 CS
				+50,000 CS

Cash Flows
no effect

Common Stock Dividends Distributable	50,000
Common Stock	50,000
(To record issuance of 5,000 shares in a stock dividend)	

Effects of Stock Dividends

How do stock dividends affect stockholders' equity? They **change the composition of stockholders' equity** because they transfer a portion of retained earnings to paid-in capital. However, **total stockholders' equity remains the same**. Stock dividends also have no effect on the par or stated value per share, but the number of shares outstanding increases. **Illustration 14.5** shows these effects for Medland.

	<u>Before Dividend</u>	<u>Change</u>	<u>After Dividend</u>
Stockholders' equity			
Paid-in capital			
Common stock, \$10 par	\$500,000	\$ 50,000	\$550,000
Paid-in capital in excess of par	—	25,000	25,000
Total paid-in capital	500,000	+75,000	575,000
Retained earnings	300,000	-75,000	225,000
Total stockholders' equity	\$800,000	\$ 0	\$800,000
Outstanding shares	50,000	+5,000	55,000
Par value per share	\$10.00	\$ 0	\$10.00

ILLUSTRATION 14.5
Stock dividend effects

In this example, total paid-in capital increases by \$75,000 ($50,000 \text{ shares} \times 10\% \times \15) and retained earnings decreases by the same amount. Note also that total stockholders' equity remains unchanged at \$800,000. The number of shares increases by 5,000 ($50,000 \times 10\%$).

Stock Splits

A **stock split**, like a stock dividend, involves issuance of additional shares to stockholders according to their percentage ownership. **However, a stock split results in a reduction in the par or stated value per share** (see **Helpful Hint**). The purpose of a stock split is to increase the marketability of the stock by lowering its market price per share. This, in turn, makes it easier for the corporation to issue additional stock.

The effect of a split on market price is generally **inversely proportional** to the size of the split. For example, after a 2-for-1 stock split, the market price of **Nike's** stock fell from \$111 to approximately \$55. The lower market price stimulated market activity. Within one year, the stock was trading above \$100 again. **Illustration 14.6** shows the effect of a 4-for-1 stock split for stockholders.

HELPFUL HINT

A stock split changes the par value per share but does not affect any balances in stockholders' equity.

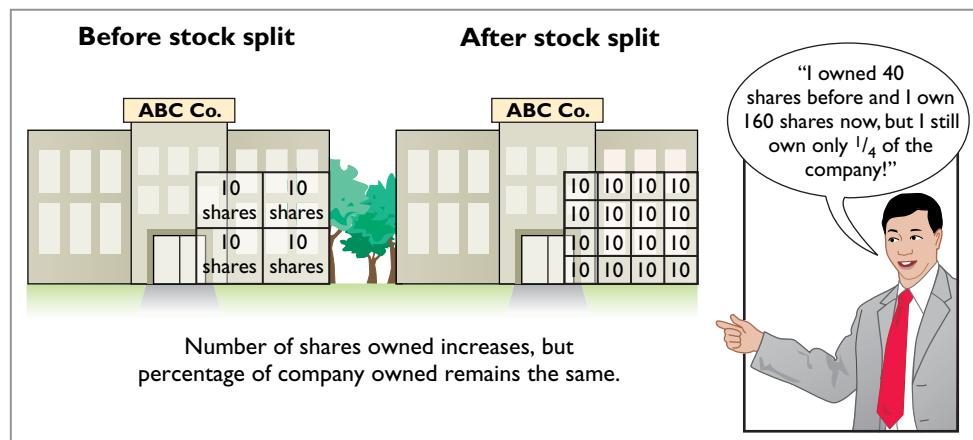

ILLUSTRATION 14.6
Effect of stock split for stockholders

In a stock split, the company increases the number of shares in the same proportion that par or stated value per share decreases. For example, in a 2-for-1 split, the company exchanges one share of \$10 par value stock for two shares of \$5 par value stock. **A stock split does not have any effect on total paid-in capital, retained earnings, or total stockholders' equity.** However, the number of shares outstanding increases, and par value per share decreases. **Illustration 14.7** shows these effects for Medland Corporation, assuming that it splits its 50,000 shares of common stock on a 2-for-1 basis.

ILLUSTRATION 14.7**Stock split effects**

	Before Stock Split	Change	After Stock Split
Stockholders' equity			
Paid-in capital			
Common stock	\$500,000		\$500,000
Paid-in capital in excess of par	<u>–0–</u>		<u>–0–</u>
Total paid-in capital	500,000	\$ 0	500,000
Retained earnings	300,000	0	300,000
Total stockholders' equity	\$800,000	\$ 0	\$800,000
Outstanding shares	50,000	+50,000	100,000
Par value per share	\$10.00	–\$5.00	\$5.00

A stock split does not affect the balances in any stockholders' equity accounts. Therefore, a company does not need to journalize a stock split.

Illustration 14.8 summarizes the differences between stock dividends and stock splits.

ILLUSTRATION 14.8**Differences between the effects of stock dividends and stock splits**

Item	Stock Dividend	Stock Split
Total paid-in capital	Increase	No change
Total retained earnings	Decrease	No change
Total par value (common stock)	Increase	No change
Par value per share	No change	Decrease
Outstanding shares	Increase	Increase
Total stockholders' equity	No change	No change

Investor Insight Berkshire Hathaway**A No-Split Philosophy**

Dietmar Klement/
iStockphoto

Warren Buffett's company, **Berkshire Hathaway**, has two classes of shares. Until recently, the company had never split either class of stock. As a result, the class A stock had a market price of \$97,000 and the class B sold for about \$3,200 per share. Because the price per share is so high, the stock does not trade as frequently as the stock of other companies. Buffett has always opposed stock splits because he feels that a lower stock price attracts short-term investors. He appears to be correct. For example, while

more than 6 million shares of **IBM** are exchanged on the average day, only about 1,000 class A shares of Berkshire are traded. Despite Buffett's aversion to splits, in order to accomplish a recent acquisition, Berkshire decided to split its class B shares 50 to 1.

Source: Scott Patterson, "Berkshire Nears Smaller Baby B's," *Wall Street Journal Online* (January 19, 2010).

Why does Warren Buffett usually oppose stock splits? (Go to WileyPLUS for this answer and additional questions.)

DO IT! 1b | Stock Dividends and Stock Splits

Sing CD Company has had five years of record earnings. Due to this success, the market price of its 500,000 shares of \$2 par value common stock has tripled from \$15 per share to \$45. During this period, paid-in capital remained the same at \$2,000,000. Retained earnings increased from \$1,500,000 to \$10,000,000. President Joan Elbert is considering either a 10% stock dividend or a 2-for-1 stock split. She asks you to show the before-and-after effects of each option on retained earnings, total stockholders' equity, shares outstanding, and par value per share.

ACTION PLAN

- Calculate the stock dividend's effect on retained earnings by multiplying the number of new shares times the market price of the stock (or par value for a large stock dividend).

Solution

The stock dividend amount is \$2,250,000 $[(500,000 \times 10\%) \times \$45]$. The new balance in retained earnings is \$7,750,000 ($\$10,000,000 - \$2,250,000$). The retained earnings balance after the stock split is the same as it was before the split: \$10,000,000. Total stockholders' equity does not change. The effects on the stockholders' equity accounts are as follows.

	Original Balances	After Dividend	After Split
Paid-in capital	\$ 2,000,000	\$ 4,250,000	\$ 2,000,000
Retained earnings	10,000,000	7,750,000	10,000,000
Total stockholders' equity	<u>\$12,000,000</u>	<u>\$12,000,000</u>	<u>\$12,000,000</u>
Shares outstanding	500,000	550,000	1,000,000
Par value per share	\$2.00	\$2.00	\$1.00

Related exercise material: **BE14.3, BE14.4, DO IT! 14.1b, E14.4, E14.5, E14.6, and E14.7.**

- Recall that a stock dividend increases the number of shares without affecting total stockholders' equity.
- Recall that a stock split only increases the number of shares outstanding and decreases the par value per share.

Reporting and Analyzing Stockholders' Equity

LEARNING OBJECTIVE 2

Discuss how stockholders' equity is reported and analyzed.

Retained Earnings

Retained earnings is net income that a company retains in the business. The balance in retained earnings is part of the stockholders' claim on the total assets of the corporation. It does not, however, represent a claim on any specific asset. Nor can the amount of retained earnings be associated with the balance of any asset account. For example, a \$100,000 balance in retained earnings does not mean that there should be \$100,000 in cash. The reason is that the company may have used the cash resulting from the excess of revenues over expenses to purchase buildings, equipment, and other assets.

To demonstrate that retained earnings and cash may be quite different, **Illustration 14.9** shows recent amounts of retained earnings and cash in selected companies.

Company	(in millions)	
	Retained Earnings	Cash
Facebook	\$ 3,159	\$3,323
Google	61,262	8,989
Nike, Inc.	5,695	3,337
Starbucks	4,130	2,576
Amazon.com	2,190	8,658

ILLUSTRATION 14.9

Retained earnings and cash balances

Remember from Chapter 13 that when a company has net income, it closes net income to retained earnings. The closing entry is a debit to Income Summary and a credit to Retained Earnings (see **Helpful Hint**).

When a company has a **net loss** (expenses exceed revenues), it also closes this amount to retained earnings. The closing entry is a debit to Retained Earnings and a credit to Income

HELPFUL HINT

Remember that Retained Earnings is a stockholders' equity account, whose normal balance is a credit.

Summary. To illustrate, assume that Rendle Corporation has a net loss of \$400,000 in 2020. The closing entry to record this loss is as follows.

Retained Earnings	400,000	
Income Summary		400,000
(To close net loss to Retained Earnings)		

This closing entry is prepared even if it results in a debit balance in Retained Earnings. **Companies do not debit net losses to paid-in capital accounts.** To do so would destroy the distinction between paid-in and earned capital. If cumulative losses exceed cumulative income over a company's life, a debit balance in Retained Earnings results. A debit balance in Retained Earnings is identified as a **deficit**. A company reports a deficit as a deduction in the stockholders' equity section, as shown in **Illustration 14.10**.

ILLUSTRATION 14.10

Stockholders' equity with deficit

<u>Balance Sheet (partial)</u>		
Stockholders' equity		
Paid-in capital		
Common stock	\$800,000	
Retained earnings (deficit)	(50,000)	
Total stockholders' equity	<u>\$750,000</u>	

Retained Earnings Restrictions

The balance in retained earnings is generally available for dividend declarations. In some cases, however, there may be **retained earnings restrictions**. These make a portion of the retained earnings balance currently unavailable for dividends. Restrictions result from one or more of the following causes.

- Legal restrictions.** Many states require a corporation to restrict retained earnings for the cost of treasury stock purchased. The restriction keeps intact the corporation's legal capital that is being temporarily held as treasury stock. When the company sells the treasury stock, the restriction is lifted.
- Contractual restrictions.** Long-term debt contracts may restrict retained earnings as a condition for the loan. The restriction limits the use of corporate assets for payment of dividends. Thus, it increases the likelihood that the corporation will be able to meet required loan payments.
- Voluntary restrictions.** The board of directors may voluntarily create retained earnings restrictions for specific purposes. For example, the board may authorize a restriction for future plant expansion. By reducing the amount of retained earnings available for dividends, the company makes more cash available for the planned expansion.

Companies generally disclose **retained earnings restrictions** in the notes to the financial statements. For example, as shown in **Illustration 14.11, Tektronix Inc.**, a manufacturer of electronic measurement devices, had total retained earnings of \$774 million, but the unrestricted portion was only \$223.8 million.

ILLUSTRATION 14.11

Disclosure of restriction

Tektronix Inc. Notes to the Financial Statements

Certain of the Company's debt agreements require compliance with debt covenants. Management believes that the Company is in compliance with such requirements. The Company had unrestricted retained earnings of \$223.8 million after meeting those requirements.

Prior Period Adjustments

Suppose that a corporation has closed its books and issued financial statements. The corporation then discovers that it made a material error in reporting net income of a prior year. How should the company record this situation in the accounts and report it in the financial statements?

The correction of an error in previously issued financial statements is known as a **prior period adjustment**. The company makes the correction directly to Retained Earnings because the effect of the error is now in this account. The net income for the prior period has been recorded in retained earnings through the journalizing and posting of closing entries.

To illustrate, assume that General Microwave discovers in 2020 that it understated depreciation expense on equipment in 2019 by \$300,000 due to computational errors. These errors overstated both net income for 2019 and the current balance in retained earnings. The entry for the prior period adjustment, ignoring all tax effects, is as follows.

Retained Earnings	300,000	300,000		A = L + SE
Accumulated Depreciation—Equipment (To adjust for understatement of depreciation in a prior period)				-300,000 RE
				Cash Flows no effect

A debit to an income statement account in 2020 is incorrect because the error pertains to a prior year.

Companies report prior period adjustments in the retained earnings statement. They add (or deduct, as the case may be) these adjustments from the beginning retained earnings balance. This results in an adjusted beginning balance. For example, assuming a beginning balance of \$800,000 in retained earnings, General Microwave reports the prior period adjustment as shown in **Illustration 14.12**.

General Microwave	
Retained Earnings Statement (partial)	
Balance, January 1, as reported	\$ 800,000
Correction for overstatement of net income in prior period (depreciation error)	<u>(300,000)</u>
Balance, January 1, as adjusted	\$ 500,000

ILLUSTRATION 14.12

Statement presentation of prior period adjustments

Again, reporting the correction in the current year's income statement would be incorrect because it applies to a prior year's income statement.

Retained Earnings Statement

The **retained earnings statement** shows the changes in retained earnings during the year. The company prepares the statement from the Retained Earnings account. **Illustration 14.13** shows (in T-account form) transactions that affect retained earnings.

Retained Earnings	
1. Net loss	1. Net income
2. Prior period adjustments for overstatement of net income	2. Prior period adjustments for understatement of net income
3. Cash dividends and stock dividends	
4. Some disposals of treasury stock	

ILLUSTRATION 14.13

Debits and credits to retained earnings

As indicated, net income increases retained earnings, and a net loss decreases retained earnings. Prior period adjustments may either increase or decrease retained earnings. Both cash dividends and stock dividends decrease retained earnings. The circumstances under which treasury stock transactions decrease retained earnings are explained in Chapter 13.

Statement Presentation and Analysis

Presentation of Stockholders' Equity

Illustration 14.14 presents the stockholders' equity section of Graber Inc.'s balance sheet. Note the following: (1) "Common stock dividends distributable" is shown under "Capital stock" in "Paid-in capital" and (2) a note (Note R) discloses a retained earnings restriction.

ILLUSTRATION 14.14

Comprehensive stockholders' equity section

Graber Inc. Balance Sheet (partial)		
Stockholders' equity		
Paid-in capital		
Capital stock		
9% Preferred stock, \$100 par value, cumulative, callable at \$120, 10,000 shares authorized, 6,000 shares issued and outstanding		\$ 600,000
Common stock, no par, \$5 stated value, 500,000 shares authorized, 400,000 shares issued and 390,000 shares outstanding	\$2,000,000	
Common stock dividends distributable	50,000	2,050,000
Total capital stock		2,650,000
Additional paid-in capital		
In excess of par—preferred stock	30,000	
In excess of stated value—common stock	1,050,000	
Total additional paid-in capital		1,080,000
Total paid-in capital		3,730,000
Retained earnings (see Note R)		1,150,000
Total paid-in capital and retained earnings		4,880,000
Less: Treasury stock (10,000 common shares)		80,000
Total stockholders' equity		<u><u>\$4,800,000</u></u>

Note R: Retained earnings is restricted for the cost of treasury stock, \$80,000.

Instead of presenting a detailed stockholders' equity section in the balance sheet and a retained earnings statement, many companies prepare a **stockholders' equity statement** (see Appendix 14A). This statement shows the changes (1) in each stockholders' equity account and (2) in total that occurred during the year. An example of a stockholders' equity statement appears in **Apple's** financial statements in Appendix A.

Analysis of Stockholders' Equity

Investors are interested in both a company's dividend record and its earnings performance. Although those two measures are often parallel, that is not always the case. Thus, investors should investigate each one separately.

Payout Ratio. One way that companies reward stock investors for their investment is to pay them dividends. The **payout ratio** measures the percentage of earnings a company distributes in the form of cash dividends to common stockholders. It is computed by **dividing total cash dividends declared to common shareholders by net income**.

To illustrate, **Nike's** dividends were recently \$821 million and net income was \$2,693 million. **Illustration 14.15** shows Nike's payout ratio.

ILLUSTRATION 14.15

Nike's payout ratio

Cash Dividends Declared on Common Stock	÷	Net Income	=	Payout Ratio
\$821	÷	\$2,693	=	30.5%

Companies attempt to set their dividend rate at a level that will be sustainable. Companies that have high growth rates are characterized by low payout ratios because they reinvest most of their net income in the business. Thus, a low payout ratio is not necessarily bad news. Companies that believe they have many good opportunities for growth, such as **Facebook**, will reinvest those funds in the company rather than pay dividends. However, low dividend payments, or a cut in dividend payments, might signal that a company has liquidity or solvency problems and is trying to conserve cash by not paying dividends. Thus, investors and analysts should investigate the reason for low dividend payments.

Illustration 14.16 lists recent payout ratios of four well-known companies.

Company	Payout Ratio
Microsoft	24.5%
Kellogg	43.3%
Facebook	0%
Wal-Mart	49.0%

ILLUSTRATION 14.16
Payout ratios of companies

Return on Common Stockholders' Equity. Investors and analysts can measure profitability from the viewpoint of the common stockholder by the **return on common stockholders' equity**. This ratio indicates how many dollars of net income the company earned for each dollar invested by the common stockholders. It is computed by dividing **net income available to common stockholders** (which is net income minus preferred stock dividends) by average common stockholders' equity.

To illustrate, **Walt Disney Company**'s beginning-of-the-year and end-of-the-year common stockholders' equity were \$31,820 and \$30,753 million, respectively. Its net income was \$4,687 million, and no preferred stock was outstanding. The return on common stockholders' equity is computed as shown in **Illustration 14.17**.

Net Income minus Preferred Dividends	÷	Average Common Stockholders' Equity	=	Return on Common Stockholders' Equity
(\$4,687 – \$0)	÷	$\frac{(\$31,820 + \$30,753)}{2}$	=	15.0%

ILLUSTRATION 14.17
Return on common
stockholders' equity
and computation

As shown above, if a company has preferred stock, we would deduct the amount of **preferred dividends** from the company's net income to compute income available to common stockholders. Also, the par value of preferred stock is deducted from total stockholders' equity when computing the average common stockholders' equity.

DO IT! 2 | Analyzing Stockholders' Equity

On January 1, 2020, Siena Corporation purchased 2,000 shares of treasury stock. Other information regarding Siena Corporation is provided below.

	<u>2019</u>	<u>2020</u>
Net income	\$110,000	\$110,000
Dividends on preferred stock	\$10,000	\$10,000
Dividends on common stock	\$2,000	\$1,600
Common stockholders' equity, beginning of year	\$500,000	\$400,000*
Common stockholders' equity, end of year	\$500,000	\$400,000

*Adjusted for purchase of treasury stock.

(a) Compute return on common stockholders' equity for each year, and (b) discuss its change from 2019 to 2020.

ACTION PLAN

- Determine return on common stockholders' equity by dividing net income available to common stockholders by average common stockholders' equity.

Solution

a.

$$\begin{array}{l} \text{Return on} \\ \text{common stock-} \\ \text{holders' equity} \end{array} \quad \begin{array}{c} \text{2019} \\ \frac{(\$110,000 - \$10,000)}{(\$500,000 + \$500,000)/2} = 20\% \end{array} \quad \begin{array}{c} \text{2020} \\ \frac{(\$110,000 - \$10,000)}{(\$400,000 + \$400,000)/2} = 25\% \end{array}$$

- b. Between 2019 and 2020, return on common stockholders' equity improved from 20% to 25%. While this would appear to be good news for the company's common stockholders, this increase should be carefully evaluated. It is important to note that net income did not change during this period. The increase in the ratio was due to the purchase of treasury shares, which reduced the denominator of the ratio. As the company repurchases its own shares, it becomes more reliant on debt and thus increases its risk.

Corporate Income Statements

LEARNING OBJECTIVE 3

Describe the form and content of corporation income statements.

Income Statement Presentation

Income statements for corporations are the same as the statements for proprietorships or partnerships except for one thing: the reporting of income taxes. For income tax purposes, corporations are a separate legal entity. As a result, corporations report **income tax expense** in a separate section of the corporation income statement, before net income. The condensed income statement for Leads Inc. in **Illustration 14.18** shows a typical presentation. Note that the corporation reports income before income taxes as one line item and income tax expense as another.

ILLUSTRATION 14.18

Income statement with income taxes

Leads Inc. Income Statement For the Year Ended December 31, 2020		
Sales revenue	\$ 800,000	
Cost of goods sold	600,000	
	200,000	
Gross profit		
Operating expenses	50,000	
	150,000	
Income from operations		
Other revenues and gains	10,000	
	(4,000)	
Income before income taxes	156,000	
Income tax expense	46,800	
Net income	<u><u>\$109,200</u></u>	

Companies record income tax expense and the related liability for income taxes payable as part of the adjusting process. Using the data for Leads Inc., in Illustration 14.18, the adjusting entry for income tax expense at December 31, 2020, is as follows.

A	=	L	+	SE	
				-46,800 Exp	
				+46,800	

Cash Flows
no effect

Income Tax Expense		46,800
Income Taxes Payable		
(To record income taxes for 2020)		46,800

The income statement of **Apple** (in Appendix A) presents another illustration of income taxes.

Income Statement Analysis

The financial press frequently reports earnings data. Stockholders and potential investors widely use these data in evaluating the profitability of a company. A convenient measure of earnings is **earnings per share (EPS)**, which indicates the net income earned by each share of outstanding **common stock**.

EPS and Preferred Dividends

The existence of preferred dividends slightly complicates the calculation of EPS. When a corporation has both preferred and common stock, we must subtract the current year's preferred dividend from net income, to arrive at **income available to common stockholders**. **Illustration 14.19** shows the formula for computing EPS.

Net Income minus Preferred Dividends	÷	Weighted-Average Common Shares Outstanding	=	Earnings per Share
---	---	---	---	-----------------------------------

ILLUSTRATION 14.19

Formula for earnings per share

To illustrate, assume that Rally Inc. reports net income of \$211,000 on its 102,500 weighted-average common shares.¹ During the year, it also declares a \$6,000 dividend on its preferred stock. Therefore, the amount Rally has available for common stock dividends is \$205,000 (\$211,000 – \$6,000). Earnings per share is \$2 (\$205,000 ÷ 102,500). If the preferred stock is cumulative, Rally deducts the dividend for the current year, whether or not it is declared. Remember that companies report **earnings per share only for common stock** (see **Ethics Note**).

Investors often attempt to link earnings per share to the market price per share of a company's stock.² Because of the importance of earnings per share, most companies must report it on the face of the income statement. Generally, companies simply report this amount below net income on the statement. **Illustration 14.20** shows the presentation for Rally Inc.

ETHICS NOTE

In order to meet market expectations for EPS, some managers engage in elaborate treasury stock transactions. These transactions can be very costly for the remaining shareholders.

Rally Inc. Income Statement (partial)		
Net income	<u><u>\$211,000</u></u>	
Earnings per share	<u><u>\$2.00</u></u>	

ILLUSTRATION 14.20

Basic earnings per share disclosure

DO IT! 3 | EPS

On January 1, 2020, Siena Corporation purchased 2,000 shares of treasury stock. Other information regarding Siena Corporation is provided below.

	2019	2020
Net income	\$110,000	\$110,000
Dividends on preferred stock	\$10,000	\$10,000
Dividends on common stock	\$2,000	\$1,600
Weighted-average number of shares outstanding	10,000	8,000*
Common stockholders' equity, beginning of year	\$500,000	\$400,000*
Common stockholders' equity, end of year	\$500,000	\$400,000

*Adjusted for purchase of treasury stock.

(a) Compute earnings per share for each year, and (b) discuss the change from 2019 to 2020.

Solution

$$\text{a. Earnings per share} \quad \frac{\text{($110,000} - \text{$10,000)} \quad \text{($110,000} - \text{$10,000)}}{10,000} = \$10 \quad \frac{8,000}{\$12.50}$$

- b. Between 2019 and 2020, earnings per share increased from \$10 to \$12.50. While this would appear to be good news for the company's common stockholders, this increase should be carefully evaluated. It is important to note that net income did not change during this period. The increase was due to the purchase of treasury shares, which reduced the denominator of the ratio. As the company repurchases its own shares, it becomes more reliant on debt and thus increases its risk.

ACTION PLAN

- Determine return on common stockholders' equity by dividing net income available to common stockholders by the average common stockholders' equity.
- Determine earnings per share by dividing net income available to common stockholders by the weighted-average number of common shares outstanding.

¹The calculation of the weighted average of common shares outstanding is discussed in advanced accounting courses.

²The ratio of the market price per share to the earnings per share is called the **price/earnings (P/E) ratio**. The financial media report this ratio for common stocks listed on major stock exchanges.

Appendix 14A

Stockholders' Equity Statement

LEARNING OBJECTIVE *4

Describe the use and content of the stockholders' equity statement.

When balance sheets and income statements are presented by a corporation, changes in the separate accounts comprising stockholders' equity should also be disclosed. Disclosure of such changes is necessary to make the financial statements sufficiently informative for users. The disclosures may be made in an additional statement or in the notes to the financial statements.
